Third, the bill addresses what has been a serious roadblock to the successful implementation of the incentive of current law. This problem is the lack of transportation services to move contributed property from the point at which it is made available to the point at which it is needed. This bill would help alleviate this problem by giving taxpayers which contribute such services the same treatment as taxpayers contributing property. This special deduction would be limited to the incremental costs incurred by the taxpayers in transporting the qualifying property.

TECHNICAL DESCRIPTION

Expansion of eligible recipients of property under section 170(e)(3)

Under section 170(e)(3) of current law, qualifying contributions of property must be made to organizations described in section 501(c)(3). As a consequence, contributions to some governmental units do not qualify. Thus, for example, public housing authorities or welfare departments operating emergency food programs are not eligible to receive contributions of food deductible under this section. The bill would rectify this by amending section 170(e)(3) to allow contributions to any organization described in section 170(c)(1) (which covers federal, state and local governmental units) or section 170(c)(2) (which covers organizations described in section 501(c)(3)).

Special rule for contributions of food

Individual donors—Under current law, contributions of property may qualify for the special treatment of section 170(e)(3) only if the donor is a corporation. Thus, individual farmers and agricultural cooperatives are not eligible to make contributions under this section. The bill amends section 170(e)(3) to allow, in the case of contributions of food, any taxpayer which is actively engaged in the trade or business of the production or marketing of food to qualify. For purposes of the new provision, food is defined to mean any agricultural product which is intended for, and at the date of contribution is suitable for, human consumption and which is not subject to federal alcohol or tobacco excise tax under Chapters 51 or 52 of the Internal Revenue Code.

Gleaning—the bill specifically provides that a charitable contribution of food under this section shall include contributions of food which qualifying organizations remove from the fields of the taxpayer (such as crops which are left behind by traditional harvesting techniques.)

Fees—Under current law, a contribution will not qualify under section 170(e)(3) if the donee transfers the property it receives from the donor in exchange for money, other property or services. However, under Treasury Regulation Section 1.170A-4A(b)(3)(ii), a donee may charge a fee to another organization in connection with its transfer of the donated property, if the fee is small or nominal in relation to the value of the transferred property, is not determined by the value of the property, and is designed to reimburse the donee-organization for its administrative, warehousing, or other similar costs. The bill would allow donee-organizations to charge similar fees to the ultimate recipients of food under the same restrictions, i.e., that the fee be small or nominal in relation to the value of the property, not be based on that value, and be designed to reimburse the donee-organization for its administrative, etc. costs.

Contributions of transportation services

Under current law, contributions may qualify for the special treatment of section 170(e)(3) only if they are contributions of property. One of the most serious problems

faced by food banks and other organizations involved in feeding the needy is that of transporting donated food. To help resolve this problem, the bill allows contributions of transportation services to move food, the donation of which is a qualifying contribution, to qualify under section 170(e)(3). In order to qualify, the services must be contributed by a taxpayer which is actively engaged in the trade or business of providing such services, or by the donor of the food being transported. In addition, the taxpayer must receive from the donee a written statement representing that the property is a qualifed contribution.

Amount of deduction

Under current law, the amount of the deduction for contributions qualifying under section 170(e)(3) is the fair market value of the property, limited to the lesser of twice the taxpayer's basis in the property or that basis plus one-half the amount of gain the taxpayer would have recognized if the property had been sold. This rule will continue generally to apply to contributions made under the amendments to section 170(e)(3). However, in the case of a taxpayer which makes a qualifying contribution of food, and which, under its method of accounting, does not use inventories in computing taxable income, the amount of the deduction is 50 percent of the gross receipts the taxpayer would have realized from the sale of the food in the ordinary course of its business. (This rule would apply to most individuals engaged in farming because they are generally not required to use inventories). Further, in the case of contributions of qualifying transportation services, the deduction will be the fair market value of the services, limited to the lesser of twice the taxpayer's incremental direct costs incurred in providing the services or such direct costs plus one-half the amount of gain the taxpayer would have realized if the services had been provided by the taxpayer at their fair market value.

Effective date

The amendments made by the bill would be effective for qualifying contributions made after the date of enactment.

By Mr. PACKWOOD (for himself, Mr. HOLLINGS, Mr. STEVENS, Mr. INOUYE, Mr. GORTON, Mr. CRANSTON, Mr. MATTINGLY, Mr. SARBANES, Mr. GOLDWATER, Mr. CHILES, Mr. GARN, Mr. BUMPERS, Mr. MURKOWSKI, Mr. GLENN, Mr. COHEN, Mr. MOYNIHAN, Mr. TRIBLE, Mr. NUNN, Mr. KASTEN, Mr. HEFLIN, Mr. HUMPHREY, Mr. STENNIS, Mrs. HAWKINS, Mr. DODD, Mr. EAST, Mr. BENTSEN, Mr. WEICKER, Mr. PELL, Mr. WILSON, Mr. LEVIN, and Mr. TSONGAS):

S.J. Res. 150. Joint resolution to designate August 4, 1984, as "Coast Guard Day"; to the Committee on the Judiciary.

COAST GUARD DAY

● Mr. PACKWOOD. Mr. President, today I am introducing, along with 30 of my colleagues, a joint resolution to designate August 4, 1984, as "Coast Guard Day."

Since its founding in 1790, the Coast Guard has provided dedicated and often courageous service to the people of this Nation. We all are familiar with the Coast Guard's search and rescue function. Countless lives have been saved through these efforts. In addition, many lives have undoubtedly been saved by the Coast Guard's boating safety program.

The Coast Guard also has important responsibilities in the areas of merchant marine safety, aids to navigation, environmental protection, maritime law enforcement, and port safety. All Americans benefit either directly or indirectly from these services.

Mr. President, the men and women of the U.S. Coast Guard have a long and proud history of service to this Nation. I think it is most appropriate that we set aside one day in their honor.

Mr. President, I ask unanimous consent that the text of this joint resolution be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S.J. RES. 150

Whereas the United States Coast Guard is the oldest continuous seagoing service, its history tracing back to 1790;

Whereas the United States Coast Guard has made valuable contributions to our Nation in the areas of boating safety, search and rescue, aids to navigation, merchant marine safety, environmental protection, maritime law enforcement and port safety;

Whereas military and civilian personnel of the United States Coast Guard and its predecessors have displayed enthusiasm, excellence and courage since 1790 in serving the people of this Nation; and

Whereas the Nation relies on the readiness of the nearly 100,000 active duty and reserve military officers and enlisted personnel, cadets, civilian employees, and auxiliary volunteers of the United States Coast Guard to rescue victims, protect our environment, and defend our Nation if the need arises: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating August 4, 1984 as "Coast Guard Day", and calling upon all Federal, State and local government agencies and people of the United States to observe the day with appropriate programs, ceremonies, and activities.●

COAST GUARD DAY

Mr. STEVENS. Mr. President, I am particularly pleased to join Senator PACKWOOD and 29 other Senators in introducing this joint resolution to honor our oldest seagoing service by designating August 4, 1984, as "Coast Guard Day." I heartily concur with Senator PACKWOOD's remarks concerning the remarkable record of the Coast Guard in performing its many duties.

Nowhere is the courage and dedication of the Coast Guard better demonstrated than in my home State, Alaska, where search and rescue and other Coast Guard functions are often performed in the most hazardous of conditions. Alaskans take comfort in knowing that the Coast Guard is always ready to aid in marine emergencies.

Mr. President, we hope that this joint resolution will serve as a small token of our appreciation for a job well done.

By Mr. SPECTER:

S.J. Res. 151. Joint resolution to enact a moratorium on federally authorized access charges imposed on residential customers without regard to such customer's use of long-distance service; to the Committee on Commerce, Science, and Transportation.

ACCESS CHARGE JOINT RESOLUTION

Mr. SPECTER. Mr. President, I rise today to introduce a joint resolution to provide for a moratorium on implementation of the recent decision of the Federal Communications Commission imposing a flat monthly access charge on residential telephone customers.

For months, the divestiture of AT&T has caused speculation that the divestiture will spark a dramatic rise in telephone rates. In March 1982, I chaired a Judiciary Committee hearing to examine that question and received assurances from the FCC, that the divestiture would not create rate increases. Following that hearing, I introduced a resolution to insure that the Congress have available to it the information with which to assess those conclusions.

Today, 15 months later, without congressional input, the FCC has announced that as of January 1, 1984, an access fee of $2 per month will be imposed on all residential telephone customers. The FCC expects that this access fee would then be increased over the next 6 years to $6 to $8 per month. With an average residential bill for local service today just under $10, this would create an alarming 20 to 80 percent rise in residential rates. Equally alarming is the fact that, as of last week, the Chairman of the FCC, Mark S. Fowler, testified that the Commission did not know what the impact of this rate surcharge would be on the elderly and poor. Instead, Commissioner Fowler recommended "that Congress stay its hand on access charges until it can review the results of—an FCC—yearend investigation of the State rate situation" and stated that "If corrective legislation appears warranted then it can be enacted during 1984."

I suggest instead that it is the FCC, not the Congress, which should stay its action until the impact of this surcharge and state authorized rate hikes on consumers, particularly those economically disadvantaged are assessed.

The antitrust action against AT&T was brought by the U.S. Government to increase competition and thereby, lower costs. It would be a cruel irony if this action instead, resulted in sharply

increased costs for local users and a decline in universal service.

The recent access charges ordered by the FCC, however, appear to signal this very result. Judge Harold Greene, overseeing the AT&T divestiture, sharply disagreed with the FCC's action and observed:

Over 50 percent of the residential subscribers make only nominal use of long distance and 15 percent make no use of that service at all. Yet under the FCC policy all of them must pay for that access (to the long-distance network). It should be noted in this connection that 91 percent of all households now have telephones. As the FCC's access fee reaches $7, as it will in a few years, this is estimated to drop to 60 percent for very poor blacks, 65 percent for very poor living in rural areas, and 58 percent for very poor young people. That hardly sounds like universal service.

Greene concluded that imposing these access charges "undermines one of the assumptions underlying the court's approval of the decree that there would be no impairment of the principle of universal service."

The joint resolution I am today introducing would afford the Congress the opportunity to examine the necessity for the imposition of access surcharges and, to the extent some new surcharge is mandated, the best available structure for such surcharge. In addition to staying the FCC's action until January 1, 1985, the resolution would require that the FCC report to Congress on the impact of its access charge proposals and those of rate increase proposals pending before State authorities including an estimate of the numbers of customers who would be likely to discontinue service if such access charges and rate increases were imposed.

If the FCC surcharges are imposed on January 1, 1984, any adverse impact may be irretrievable if Congress later determines that such across-the-board access charges are incompatible with guaranteeing the availability of universal telephone service. On the other hand, if given an opportunity to address the issue, I am confident that the Congress can provide a rate solution for our restructured telephone network that will both fairly distribute costs and insure the continuation of universal service.

Mr. President, I ask unanimous consent the joint resolution be printed in the RECORD.

There being no objection, the joint resolution ordered to be printed in the RECORD, as follows:

S.J. RES. 151

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

Whereas it is in the interest of all Americans and the Nation that the public have access to reasonably priced, high quality telephone service;

Whereas 91 per centum of all American households now have telephones;

Whereas significant rate increases threaten a fifty-year effort to provide affordable, universally available telephone service to the American public;

Whereas significant rate increases could force many Americans, particularly the elderly, subsiding on low fixed incomes, the economically disadvantaged, and those living in high cost urban areas to discontinue telephone service;

Whereas the Federal Communications Commission has approved a plan that would require the payment of across-the-board access fees by all residential telephone customers as a substitute for long-distance subsidies generally reported to have been provided to defray the cost of local telephone service;

Whereas over 50 per centum of the residential subscribers make only nominal use of long-distance service and 15 per centum made no use of that service at all, rendering the general application of such fee discriminatory;

Whereas the impending divestiture of the Bell Telephone System should not provide an occasion for unfairly increasing rates for local telephone service; and

Whereas the establishment of a fair system of charges to telephone users requires attention to the public policy implications of any charge which creates a disparate impact upon users, particularly those who are elderly or poor: Now, therefore, be it

Resolved by the Senate and the House of Representatives, That no Federal authority, including the Federal Communications Commission, shall authorize or impose access charges (or other fees related to long-distance service) on residential telephone customers without regard to such customers' use of long-distance service; that within six months the Federal Communications Commission shall report to the Congress on the impact of its access charge proposals and those of rate increase proposals pending before State authorities, including its estimate of the numbers of customers who would be likely to discontinue local service if such access charges and rate increases were imposed.

By Mr. LEVIN:

S.J. Res. 152. Joint resolution to designate the week of May 6, 1984, through May 12, 1984, as "Batten's Disease Awareness Week"; to the Committee on the Judiciary.

BATTEN'S DISEASE AWARENESS WEEK

● Mr. LEVIN. Mr. President, I am submitting a joint resolution today proclaiming the week of May 6 through May 12 as "Batten's Disease Awareness Week."

Batten's disease is a neurological disorder which manifests itself in previously normal children between the ages of 3 to 8 and is characterized by a slow progression of clumsiness, stumbling, failure of vision, seizures, changes in personality, and dropping of scholastic grades. The disease eventually leaves its victims totally disabled and unable to care for themselves and usally ends in death within 1 to 10 years after the intial diagnosis. The disease may have an incidence as high as 1 in 12,500 births, similar to other common genetic disorders. One out of four offspring is at risk of inheriting Batten's disease if the mother and father are both carriers of, but not affected by, Batten's disease. The changes which occur in the brain, of these children are quite similar to the changes in the aging person. Thus, effective treatment for Batten's disease may also allow us to alter the process of senility in all people.

It has only been in the last few years that significant research on Batten's disease has been undertaken, largely as a result of the efforts of Dr. J. Alfred Rider, president of the Children's Brain Disease Foundation, a nonprofit, tax-exempt charitable organization which was started in 1968 primarily to determine the cause and cure of various progressively deteriorating brain diseases occurring in infancy and childhood. Since Batten's disease is a typical example of these conditions, the foundation decided to focus primarily on Batten's disease as its first objective.

The National Institutes of Health, in the last 4 years, has realized the importance of research in this area and has singled out Batten's disease for expanded research funding in the near future.

In fiscal year 1983 appropriations for NIH, $700,000 was made available to carry out research on Batten's disease.

In testimony presented to the Senate Appropriations Subcommittee on Labor, Health and Human Services April 29 of this year, Dr. Rider emphasized:

Research is the only way to solve this disease and prevent the devastating tragedy in families who have children so afflicted and effect tremendous savings to society as a whole. The cost of care for each child is enormous and may be as high as $50,000 to $100,000 a year. Thus, 10 children such as these would cost more per year than the funds, $700,000, we are requesting.

Dr. Rider went on to say:

In the last year, research has expanded and is progressing rapidly. This momentum must be maintained. * * * we are in the process of assisting with the development of two Batten disease centers, one at the University of Indiana and one at the University of Florida. * * * there are over thirty-four principal investigators from major universities, medical centers and institutes throughout the world involved in various phases of research pertaining to Batten's disease. If funding is provided, the chances of the development of a specific treatment program in the foreseeable future appear to be very good.

Mr. President, it is my hope that passage of this resolution will improve public understanding and awareness of the implications of Batten's disease, and encourage early diagnosis and care of children who inherit this fatal disorder. It is also my hope that setting aside a special week will attract attention to the need for further research into the treatment and cure of Batten's disease.

Lastly, Mr. President, but most importantly, I would like to say thank you to Jo Ann and Lawrence Gajor of Livonia, Mich., for making me aware of the devastation of Batten's disease. The Gajors have devoted much of their lives over the past 3 years to calling to the attention of the American people the human and economic costs of Batten's disease. The untiring efforts of the Gajors have promoted a greater awareness of the challenge we face in seeking treatment and cure of this disease.

Mr. President, I would like to share with my colleagues excerpts from the letter received from Jo Ann and Lawrence Gajor a few months ago:

Our son, Mark, is 6 years old and dying from Batten's disease. He has been sick for 3 years. Two of the five children who we know of in this area who had Batten's disease have already died, one is in a vegetable state, one is almost blind, and Mark is very severely affected.

We were hoping that you might help us in some way. * * * It is difficult to be brief in describing what has transpired during the last 3½ years, but we will try to do so. Our perfect, beautiful, little son started having small problems when he was 2½ years of age and suffered a seizure at 3 years of age. In the next 3 years he had speech tests, skin and muscle biopsies, spinal taps, blood tests, brain scans, EEG tests and many others. Truthfully, we can't even recall all the difficulties we have had in attempting to diagnose and help our little boy. Our worst fears were finally realized when our little boy reached the age of 4 years and we were told he would become blind, deaf, mentally impaired and die within a few years. It is very painful to watch him deteriorate when we want desperately to help him. He does not walk or talk, has a seizure disorder, and is rapidly becoming blind. He is severely mentally impaired and has been in a wheelchair for approximately 2 years.

We have contacted doctors and researchers in this country and other countries, but we have been told that there is no treatment.

I urge my colleagues to support this resolution and I hope it will win speedy passage.

By Mr. MOYNIHAN (for himself and Mr. D'AMATO):

S.J. Res. 153. Joint resolution to congratulate the people of the county of New York on the occasion of the tricentennial of the founding of the county of New York; to the Committee on the Judiciary.

300TH ANNIVERSARY OF THE FOUNDING OF THE COUNTY OF NEW YORK

Mr. MOYNIHAN. Mr. President, it is my pleasure to introduce, along with my distinguished colleague Senator D'AMATO, a joint resolution celebrating the 300th anniversary of the founding of the county of New York.

Known to most as Manhattan, the county of New York has a long and most celebrated history. Since its inception on November 1, 1683, New York County has been at the center of the life of both the Nation and the world. Three hundred years after its birth, the county of New York remains the financial, artistic, and cultural capital of the Nation. No small accomplishment.

Manhattan has also served as the port of entry to countless immigrants. Coming to the United States from the nations of Europe and the rest of the world, for many Manhattan was the first portion of this Nation that they saw. Its architecture and grandeur was a symbol of the wealth and power of a growing nation.

These immigrants, in turn, contributed to both the material and cultural wealth of Manhattan. On a few scarce miles would grow neighborhoods which reflected the variant cultures and peoples which combined to form the pastiche of this Nation. And New York served as a microcosm of the variety of the Nation.

Mr. President, I urge my colleagues to join Senator D'AMATO and myself in supporting this legislation. The 300th anniversary of the county of New York is most worthy of the congratulations of the Senate.

Mr. President, I ask unanimous consent that the full text of the bill be included in the RECORD.

There being no objection, the joint resolution ordered to be printed in the RECORD, as follows:

S.J. RES. 153

Whereas November 1, 1983, is the 300th anniversary of the founding of the County of New York;

Whereas the founding of the County of New York was an important step forward in the development of a system of representative government and common law jurisprudence in what was to become the State of New York;

Whereas the County of New York and the City of New York were coterminous during the period beginning on November 1, 1683, and ending on December 31, 1897, and during such period the City of New York served as the marketplace of, and the gateway to, the Nation and grew to become the most populous and cosmopolitan city in the United States;

Whereas the County of New York was associated with many important events which occurred during the establishment and expansion of the Republic;

Whereas the County of New York, more widely known as Manhattan, grew to become, and has continued to be, the commercial, financial, and communications center of a great City and a great Nation; and

Whereas many individuals who immigrated to the United States entered the United States through the county of New York and many such immigrants established residence in the county of New York: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress of the United States, on behalf of all of the people of the United States, congratulates the people of the County of New York on the occasion of the tricentennial of the founding of such County.

Mr. D'AMATO. Mr. President, I am pleased today to join my friend and colleague, Senator MOYNIHAN, in sponsoring this resolution celebrating the 300th anniversary of the founding of the county of New York, more widely known as Manhattan. As Americans, we are extremely proud of the contributions of the citizens of this magnificent island, both to the Nation and the city of New York.

Manhattan has served as the gateway for the vast majority of our Nation's immigrants. As their first impression of America it touched all of their lives. The neighborhoods of New York reflect the various waves of immigrants to our Nation—Chinatown, Little Italy, Yorkville, and Spanish Harlem. One sees, feels, and senses the immigrant spirit throughout Manhattan.

Manhattan is the financial services, commercial, communications, and arts center of our Nation. The county contains 6 of the Nation's 10 largest banking institutions, the New York and American Stock Exchanges, and the largest stock brokerage houses in the world. These institutions all play a significant role in creating the capital essential for our Nation's economy.

Of the top industrial companies in the Nation, Manhattan has more than any State, let alone county. It contains 66 of the Fortune 500 industrial companies. Of the Fortune 500 service companies, Manhattan has 63, more than any city in the Nation.

The major radio and television broadcasting companies can also be found in Manhattan. New York County also has the first museum devoted to radio and television, the Museum of Broadcasting, which has radio and television tapes of the last half century.

The richest art treasures of the world can be seen in this county. Museums such as the Metropolitan, the Frick, the Museum of Modern Art, the Whitney, the Cloisters, and the Guggenheim are known by all visitors to New York City. In addition, there are such cultural treasures as Broadway, Radio City Music Hall, and the Lincoln Center for the Performing Arts which houses the Metropolitan Opera, the New York City Opera, the New York City Ballet, the New York Philharmonic Orchestra, and the Juilliard School of Music.

The county, through the United Nations, provides a place where representatives from nations around the world gather and discuss their concerns. The county provides protection for these diplomats and creates an atmosphere which permits the free interchange of ideas.

Mr. President, for all of these reasons I urge my colleagues to join us in paying tribute to Manhattan, and to its citizens, by recognizing the 300th anniversary of the establishment of New York County.

By Mr. DIXON:

S.J. Res. 154. Joint resolution to recognize the contributions of the Illinois Waterway to the development of the State of Illinois after 50 years of operation; to the Committee on the Judiciary.

ILLINOIS WATERWAY CORRIDOR

Mr. DIXON. Mr. President, it is with great pride today that I introduce a Senate joint resolution which will recognize the contributions of the Illinois Waterway to the development of the State of Illinois after 50 years of operation.

This resolution that I am introducing today is an appropriate complement to one introduced yesterday by my good friend and distinguished colleague, Senator RUSSELL LONG of Louisiana, which would designate the week of October 2-8, 1983, as "National Port Week."

Since its opening to commercial navigation in 1933, the Illinois Waterway has provided a low cost, safe, and efficient form of transportation and accommodated the movement of virtually billions of tons of cargo between the Great Lakes and the Mississippi River.

Illinois has long been regarded as the hub of our Nation's transportation system and the 350-mile Illinois Waterway provides an integral part of this country's waterborne traffic system.

The Illinois Waterway corridor has not only accommodated the growth and development of the State of Illinois, but has also enhanced the development of every community with goods to ship from the Great Lakes through the Mississippi River, down to the Gulf of Mexico.

As we set aside a week to recognize the important contributions of our Nation's ports, I hope that my colleagues will join me in acknowledging the contributions of the Illinois Waterway corridor to our Nation's economic development.

Mr. President, I ask unanimous consent that the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 154

Whereas the Illinois Waterway was opened for commercial navigation in 1933;

Whereas the year 1983 marks the fiftieth anniversary of that historic event;

Whereas the Illinois Waterway corridor, which bisects the State of Illinois for three hundred and fifty miles from Lake Michigan to the Mississippi River, has become one of the most heavily industrialized regions of the Nation and the leading agricultural producing region of the Nation;

Whereas the Illinois Waterway annually handles the shipment of about forty-five million tons of cargo in barges, including fifteen million tons of grain, six million tons of coal, four million tons of petroleum products, four million tons of sand and gravel and one and one-half million tons of iron and steel;

Whereas the availability of low-cost, safe and efficient barge transportation on the Illinois Waterway has been a major factor in the development of the economy of the State; and

Whereas the Illinois Association of Port Districts, a nonprofit corporation incorporated in the State of Illinois, is sponsoring a commemorative function to honor fifty years of continuous transportation service afforded by the Illinois Waterway: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Illinois Waterway is recognized for its contribution to the growth and development of the State of Illinois during fifty years of operation and all Federal agencies are encouraged to assist and cooperate with the Illinois Association of Port Districts in the planning of appropriate activities to commemorate the fiftieth anniversary of the Illinois Waterway.

By Mr. PERCY (for himself and Mr. PELL):

S.J. Res. 156. Joint resolution to designate the month of October 1983 as "International Youth Exchange Month"; to the Committee on the Judiciary.

INTERNATIONAL YOUTH EXCHANGE MONTH

Mr. PERCY. Mr. President, it gives me great pleasure to introduce a joint resolution which proclaims that the month of October, 1983, be named "International Youth Exchange Month."

Exchanges of young people between the United States and the other countries of the world make a lasting and valuable contribution to the search for world peace.

The international exchange of young people is especially valuable because it offers our young people an experience that will change their lives—to learn another language and about another society. And the same holds true for foreign students who can share their culture with American families and learn about the American way of life. These peole-to people programs enable us to see our fellow man more clearly and to listen more carefully to the concerns of other peoples.

I hope my colleagues will wholeheartedly support this joint resolution to name October, 1983, as "International Youth Exchange Month." This resolution will assist in giving national recognition to these valuable citizen-based programs which serve our nation's long-term national interests.

Mr. PELL. Mr. President, I fully support the statement of my distinguished chairman. The exchange programs, and especially youth exchange programs, are made possible by the tireless and dedicated support of thousands of volunteers in communities all across this country. These people open their hearts and homes to countless foreign students and visitors, giving them a chance to experience the warmth and vitality of the American people.

This joint resolution recognizes the generosity of these citizens who welcome foreign students into their community. It is also intended to promote and encourage expanded exchanges between the United States and other countries, an objective which I have sought to achieve through my amendment to the USIA authorization bill, doubling that Agency's funds for exchange programs, and through the introduction of a resolution specifically designed to expand exchange between the United States and the Soviet Union.

I wholeheartedly endorse proclaiming October, 1983, as "International Youth Exchange Month," and urge my colleagues to support this measure.

By Mr. MELCHER (for himself, Mr. ABDNOR, Mr. ANDREWS, Mr. BAUCUS, Mr. BINGAMAN, Mr. BOSCHWITZ, Mr. BUMPERS, Mr. BURDICK, Mr. CHILES, Mr. COCHRAN, Mr. DIXON, Mr. DURENBERGER, Mr. HOLLINGS, Mr. HUDDLESTON, Mr. JACKSON, Mrs. KASSEBAUM, Mr. KENNEDY, Mr. MATTINGLY, Mr. MCCLURE, Mr. MOYNIHAN, Mr. PELL, Mr. PRYOR, Mr. RANDOLPH, Mr. SARBANES, Mr. SASSER, Mr. STAFFORD, Mr. WARNER, and Mr. WILSON):

S.J. Res. 157. Joint resolution designating November 13, 1983, as "National Retired Teachers Day"; to the Committee on the Judiciary.

NATIONAL RETIRED TEACHERS DAY

Mr. MELCHER. Mr. President, on behalf of myself, Mr. ABDNOR, Mr. ANDREWS, Mr. BAUCUS Mr. BINGAMAN, Mr. BOSCHWITZ, Mr. BUMPERS, Mr. BURDICK, Mr. CHILES, Mr. COCHRAN, Mr. DIXON, Mr. DURENBERGER, Mr. HOLLINGS, Mr. HUDDLESTON, Mr. JACKSON, Mrs. KASSEBAUM, Mr. KENNEDY, Mr. MATTINGLY, Mr. MCCLURE, Mr. MOYNIHAN, Mr. PELL, Mr. PRYOR, Mr. RANDOLPH, Mr. SARBANES, Mr. SASSER, Mr. STAFFORD, Mr. WARNER, and Mr. WILSON I am today introducing a Senate joint resolution to designate November 13, 1984, as "National Retired Teachers Day."

With all of the attention being given currently to excellence in education, it seems altogether fitting that we recognize the contribution our retired teachers made to each of us and to all American citizens, regardless of age.

I believe each of us remembers especially one or two teachers who influence on our lives cannot be understimated. Whether as a strict but fair disciplinarian, a humorous master of subject matter, a vigorous proponent of true dedication to our American ideals, a coach who taught us fair play, or a person with all these gifts and more—we remember. Far too often we neglect

to tell them what they have meant to us.

This resolution in a small way, does exactly that.

I want to pay special tribute to Ms. Gladys Johnson of Great Falls, Mont., who first suggested this resolution to me. She never had the misfortune of having me as a pupil. But I know about her great contribution to learning, and to advancing the cause of the teaching profession. She was a great teacher; she still is a great person.

My thanks go to all of my teachers—those that are still alive and, to all of my teachers who have passed on, my thanks goes to them in Heaven. All of my former teachers who are deceased earned Heaven. I and a few of my classmates from time to time gave them enough trouble so their patience and kindness earned them their eternal heavenly reward. What they have contributed to me, I can never repay. My thanks and eternal respect is all I have.

Mr. WILSON. Mr. President, I have cosponsored this amendment because it is important to give credit where credit is due. Our Nation's retired teachers are deserving of recognition and thanks for their years of dedication to educating America's youth. Designating November 13, 1983 as "National Retired Teachers Day," is our way of expressing appreciation, and it is only fitting for us to do so.

With all the attention to teachers and education today, perhaps a moment of reflection upon past achievements of our Nation's educators is in order. When I think about the long-lasting effects that teachers have on their students, a specific quotation comes to mind: "A teacher affects eternity; he can never tell where his influence stops." I am pleased to recognize all those retired teachers who have indeed affected eternity, and I have therefore cosponsored and supported the proposal for National Retired Teachers Day.

AN EXAMPLE OF INTEGRITY

Mr. PRYOR. Mr. President, Coach Sam Coleman was head football coach in Camden, Ark., for many years throughout the 1940's and 1950's, and even after that. He was an example of integrity to many young men and boys who played football during those years, not only on the field but in classes as well. He was a taskmaster, a firm believer in hard work and the application of every young student to the assigned job at hand. I think of Coach Coleman many times when the subject of good teachers comes up. He was a man of few words, but what he said was important to students in his class. We know that he spoke from wide experience and with the good of his students always in mind.

To honor Sam Coleman and all other retired teachers, I am pleased to cosponsor this resolution.

Mr. WARNER. Mr. President, there are times in this venerable institution of the U.S. Senate when a Member conceives an excellent idea at just the right time. Our distinguished colleague from Montana, Mr. MELCHER, has done just that in introducing this resolution designating November 13, 1983 as "National Retired Teachers Day." I consider it a privilege to have been asked by him to be a cosponsor.

I am positive that every Member of the Senate, in fact every American, remembers with special fondness at least one teacher whose wise counsel changed the course of his or her life.

Mr. career was, indeed, directed by courageous decisions, unlimited patience, and the sacrific of many who followed the teaching profession. During my high school days, two beloved teachers joined to chart my professional life. One, Mr. Cubbage, a high school physics teacher, recognizing a latent ability in mathematics and science, encouraged me—instilled in me—the confidence to rise to the top of the class in these areas. The second was an admirable woman in every respect, Mrs. Smith, whose patience was unlimited. She finally recognized that foreign language was not my forté. Their wise counsel redirected my efforts from liberal arts to engineering. I shall be everlastingly grateful.

An equally farsighted individual entered my life. His name is Captain Eddy, USN, who created the program whereby thousands of young men learned the electronics skills to operate the sophisticated equipment aboard America's ships in World War II. He was unyielding in his discipline of teaching and accepted only excellence. His opening remarks to the class were, "either you or the man on your right or on your left will be flunked out." Indeed, 50 percent—or over half—failed to meet his standards and dropped out. These three teachers changed the direction of my life as a teenager.

This resolution honors the over 1½ million retired teachers in America. These individuals dedicated most of their working lives to the development of our Nation's youth and we all owe them a great debt of gratitude. It is fitting that a special day honors their contribution to America.

Mr. President, this day will bring special memories of all my teachers but, especially, Mr. Cubbage, Mrs. Smith, and Captain Eddy.

I urge my colleagues to join us in honoring these most deserving women and men.

Mr. BINGAMAN. Mr. President, I think it is safe to say that I have learned something about teaching by having lived next to it for so many years. My mother, my father, and my sister are teachers, and if this were a family gathering, I might bespeak their virtues for an hour, but it is not, and I think they would join me in what I am about to say.

In our society, good teachers are precious resources who deserve our sincerest thanks; great teachers are national treasures who deserve to be emulated, and honored and remembered. Today, permit me to honor and remember Mrs. Gladys Gruschus—for years the patient, enthusiastic mathematics instructor at Western High School in Silver City, N. Mex. Her success, I think, rested partly in her resilience and partly in the enthusiasm with which she pursued her subject. Her resiliency manifested itself in a wonderful sense of humor—a sense of humor which understood our adolescent personalities so thoroughly that she was able to guide, and shape, and teach without carping and without having to suffer an undue measure of teenage foolishness. At the same time, she took such intense interest in her subject that she ignited our curiosity and fueled our growing enthusiasm for the rudiments of trigonometry, algebra, and geometry. Some I am sure, merely learned her lessons and went home with her blessing but with those who showed even the faintest hint of additional interest, she was tireless in her efforts to stimulate, to inform, and to go beyond the normal curriculum and communicate all that their minds could accept.

Mrs. Gruschus is, in every way, a completely admirable human being. A widow with a family to support, she lived in a small, spare house, and worked hard to balance her life's requirements with her circumstances. I remember her with respect as a great teacher and with appreciation as a fine person.

ADDITIONAL COSPONSORS

S. 400

At the request of Mr. MATHIAS, the name of the Senator from New York (Mr. D'AMATO) was added as a cosponsor of S. 400, a bill to designate the birthday of Martin Luther King, Jr., a legal public holiday.

S. 474

At the request of Mr. COCHRAN, the name of the Senator from Florida (Mrs. HAWKINS) was added as a cosponsor of S. 474, a bill to amend title 18, United States Code, to provide for the protection of Government witnesses in criminal proceedings.

S. 476

At the request of Mr. LEVIN, the name of the Senator from California (Mr. CRANSTON) was added as a cosponsor of S. 476, a bill to amend title II of the Social Security Act to require a finding of medical improvement when disability benefits are terminated, to provide for a review and right to personal appearance prior to termination of disability benefits, to provide for

uniform standards in determining disability, to provide continued payment of disability benefits during the appeals process, and for other purposes.

S. 764

At the request of Mr. WARNER, the name of the Senator from North Dakota (Mr. ANDREWS) was added as a cosponsor of S. 764, a bill to assure the continued protection of the traveling public in the marketing of air transportation, and for other purposes.

S. 816

At the request of Mr. BRADLEY, the names of the Senator from Rhode Island (Mr. CHAFEE), the Senator from Connecticut (Mr. DODD), the Senator from Washington (Mr. JACKSON), the Senator from Rhode Island (Mr. PELL), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Maine (Mr. COHEN), and the Senator from Kentucky (Mr. HUDDLESTON) were added as cosponsors of S. 816, a bill to extend the Superfund legislation for 5 additional years, and for other purposes.

S. 836

At the request of Mr. PELL, the names of the Senator from New Jersey (Mr. BRADLEY) the Senator from Kentucky (Mr. HUDDLESTON), the Senator from New Mexico (Mr. BINGAMAN), and the Senator from Colorado (Mr. HART) were added as cosponsors of S. 836, a bill to provide for the continuation of the National Diffusion Network.

S. 918

At the request of Mr. HATFIELD, the name of the Senator from Pennsylvania (Mr. SPECTER) was added as a cosponsor of S. 918, a bill to amend the Employee Retirement Income Security Act of 1974 and the Internal Revenue Code of 1954 to provide greater protection to women under private pension plans.

S. 1113

At the request of Mr. SPECTER, his name was added as a cosponsor of S. 1113, a bill to amend the Internal Revenue Code of 1954 to provide that tax-exempt interest shall not be taken into account in determining the amount of social security benefits to be taxed.

S. 1145

At the request of Mr. DENTON, the name of the Senator from Texas (Mr. TOWER) was added as a cosponsor of S. 1145, a bill to recognize the organization known as the Catholic War Veterans of the United States of America, Inc.

S. 1271

At the request of Mr. RANDOLPH, the names of the Senator from Virginia (Mr. WARNER), the Senator from Virginia (Mr. TRIBLE), and the Senator from Minnesota (Mr. DURENBERGER) were added as cosponsors of S. 1271, a bill to encourage citizen participation in wildlife conservation programs and to establish the National Fish and Wildlife Foundation.

S. 1285

At the request of Mr. HATCH, the names of the Senator from Wisconsin (Mr. KASTEN) and the Senator from New Mexico (Mr. BINGAMAN) were added as cosponsors of S. 1285, an original bill to improve the quality of mathematics and science teaching and instruction in the United States, and for other purposes.

S. 1305

At the request of Mr. PACKWOOD, the name of the Senator from Hawaii (Mr. INOUYE) was added as a cosponsor of S. 1305, a bill to amend the Internal Revenue Code of 1954 to extend the energy tax credit for investments in certain classes of energy property, and for other purposes.

S. 1419

At the request of Mr. SARBANES, the name of the Senator from Florida (Mrs. HAWKINS) was added as a cosponsor of S. 1419, a bill to amend title XVIII of the Social Security Act to retain the option of direct reimbursement for all providers under the medicare program.

S. 1434

At the request of Mr. D'AMATO, the name of the Senator from Florida (Mrs. HAWKINS) was added as a cosponsor of S. 1434, a bill to amend the Internal Revenue Code of 1954 to provide that a spouse having compensation shall not be disqualified from having a spousal individual retirement account.

S. 1581

At the request of Mr. DOLE, the name of the Senator from Nebraska (Mr. EXON) was added as a cosponsor of S. 1581, a bill granting the consent of Congress to the Central Interstate Low-Level Radioactive Waste Compact.

S. 1623

At the request of Mr. DOLE, the name of the Senator from Minnesota (Mr. BOSCHWITZ) was added as a cosponsor of S. 1623, a bill to establish a National Commission on Neurofibromatosis.

S. 1680

At the request of Mr. GOLDWATER, the names of the Senator from Maryland (Mr. MATHIAS), the Senator from Arizona (Mr. DECONCINI), the Senator from Missouri (Mr. DANFORTH), the Senator from Florida (Mr. CHILES), the Senator from North Dakota (Mr. BURDICK), and the Senator from North Dakota (Mr. ANDREWS), were added as cosponsors of S. 1680, a bill to clarify the circumstances under which territorial provisions in licenses to distribute and sell trademarked malt beverage products are lawful under the antitrust laws.

S. 1701

At the request of Mr. MCCLURE, the name of the Senator from Wyoming (Mr. WALLOP) was added as a cosponsor of S. 1701, a bill to impose specific directions on the Bonneville Power Administration.

S. 1720

At the request of Mr. PELL, the name of the Senator from West Virginia (Mr. BYRD) was added as a cosponsor of S. 1720, a bill to amend the Federal Reserve Act to provide for increased representation of small business interests on the Board of Governors of the Federal Reserve.

S. 1724

At the request of Mr. BINGAMAN, his name was added as a cosponsor of S. 1724, a bill to designate the Federal Building in Las Cruces, N. Mex. as the "Harold L. Runnels Federal Building."

S. 1730

At the request of Mr. DIXON, the names of the Senator from Georgia (Mr. NUNN) and the Senator from Arkansas (Mr. BUMPERS) were added as cosponsors of S. 1730, a bill to amend the Small Business Act to increase small business participation in the procurement process, thereby reducing costly noncompetitive procurements and increasing defense preparedness, and for other purposes.

SENATE JOINT RESOLUTION 50

At the request of Mr. LEVIN, the names of the Senator from Massachusetts (Mr. KENNEDY), the Senator from North Carolina (Mr. EAST), the Senator from Kentucky (Mr. FORD), and the Senator from Hawaii (Mr. MATSUNAGA) were added as cosponsors of Senate Joint Resolution 50, a joint resolution designating the week beginning September 25, 1983, as "National Adult Day Care Center Week."

SENATE JOINT RESOLUTION 112

At the request of Mr. INOUYE, the names of the Senator from California (Mr. CRANSTON), the Senator from Connecticut (Mr. DODD), the Senator from Kansas (Mr. DOLE), the Senator from Minnesota (Mr. DURENBERGER), the Senator from Ohio (Mr. GLENN), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Vermont (Mr. LEAHY), the Senator from Montana (Mr. MELCHER), and the Senator from Mississippi (Mr. STENNIS) were added as cosponsors of Senate Joint Resolution 112, a joint resolution to proclaim the month of March 1984 as National Social Work Month.

SENATE JOINT RESOLUTION 119

At the request of Mr. HUMPHREY, the name of the Senator from Idaho (Mr. SYMMS) was added as a cosponsoer of Senate Joint Resolution 119, a joint resolution to designate the week of December 11, 1983, through December 17, 1983, as "National Drunk and Drugged Driving Awareness Week."

SENATE JOINT RESOLUTION 121

At the request of Mr. ABDNOR, the names of the Senator from Missouri (Mr. EAGLETON) and the Senator from Pennsylvania (Mr. HEINZ) were added as cosponsors of Senate Joint Resolution 121, a joint resolution to designate November 1983 as "National Diabetes Month."

SENATE JOINT RESOLUTION 132

At the request of Mr. RIEGLE, the names of the Senator from North Carolina (Mr. EAST), the Senator from North Carolina (Mr. HELMS), the Senator from Maryland (Mr. SARBANES), the Senator from Missouri (Mr. EAGLETON), and the Senator from Alaska (Mr. MURKOWSKI) were added as cosponsors of Senate Joint Resolution 132, a joint resolution to designate the week beginning August 7, 1983, as "National Correctional Officers Week."

SENATE JOINT RESOLUTION 136

At the request of Mr. GLENN, the names of the Senator from South Dakota (Mr. ABDNOR), the Senator from Minnesota (Mr. BOSCHWITZ), the Senator from Arizona (Mr. GOLDWATER), and the Senator from South Carolina (Mr. THURMOND) were added as cosponsors of Senate Joint Resolution 136, a joint resolution to recognize "Volunteer Firefighters Recognition Day," as a tribute to the bravery and self-sacrifice of our volunteer firefighters.

SENATE JOINT RESOLUTION 145

At the request of Mr. LONG, the names of the Senator from New Jersey (Mr. LAUTENBERG) and the Senator from Oregon (Mr. PACKWOOD) were added as cosponsors of Senate Joint Resolution 145, a joint resolution to designate the week of October 2, 1983 through October 8, 1983, as "National Port Week."

SENATE JOINT RESOLUTION 149

At the request of Mr. HUDDLESTON, the names of the Senator from Tennessee (Mr. SASSER), the Senator from Wisconsin (Mr. PROXMIRE), the Senator from Montana (Mr. BAUCUS), the Senator from South Carolina (Mr. HOLLINGS), the Senator from California (Mr. CRANSTON), the Senator from South Dakota (Mr. ABDNOR), the Senator from New York (Mr. D'AMATO), the Senator from Michigan (Mr. RIEGLE), the Senator from West Virginia (Mr. BYRD), the Senator from Arkansas (Mr. PRYOR), the Senator from Illinois (Mr. DIXON), the Senator from South Carolina (Mr. THURMOND), the Senator from Nebraska (Mr. EXON), and the Senator from Texas (Mr. BENTSEN) were added as cosponsors of Senate Joint Resolution 149, a joint resolution to temporarily suspend the authority of the Secretary of Agriculture, under the milk price support program, to impose a second 50-cents-per-hundredweight deduction from the proceeds of sale of all milk marketed commercially in the United States.

At the request of Mr. BOSCHWITZ, the names of the Senator from North Carolina (Mr. HELMS), the Senator from Oklahoma (Mr. BOREN), the Senator from Kansas (Mr. DOLE), the Senator from Nebraska (Mr. ZORINSKY), the Senator from Iowa (Mr. JEPSEN), the Senator from Utah (Mr. HATCH), the Senator from Kentucky (Mr. FORD), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Georgia (Mr. NUNN), the Senator from Georgia (Mr. MATTINGLY), the Senator from Michigan (Mr. LEVIN), were added as cosponsors of Senate Joint Resolution 149, supra.

SENATE RESOLUTION 139

At the request of Mr. ZORINSKY, the names of the Senator from West Virginia (Mr. BYRD), and the Senator from Connecticut (Mr. DODD) were added as cosponsors of Senate Resolution 139, a resolution disapproving the recommendation of the Study Group on Senate Practices and Procedures to abolish the Senate Committee on Veterans' Affairs.

SENATE RESOLUTION 182

At the request of Mr. DOLE, the name of the Senator from California (Mr. CRANSTON) was added as a cosponsor of Senate Resolution 182, a resolution expressing the sense of the Senate with respect to travel by Members of the Senate to the Soviet Union.

AMENDMENT NO. 1457

At the request of Mr. LEVIN, the name of the Senator from California (Mr. CRANSTON) was added as a cosponsor of Amendment No. 1457 intended to be proposed to S. 476, a bill to amend title II of the Social Security Act to require a finding of medical improvement when disability benefits are terminated, to provide for a review and right to personal appearance prior to termination of disability benefits, to provide for uniform standards in determining disability, to provide continued payment of disability benefits during the appeals process, and for other purposes.

SENATE CONCURRENT RESOLUTION 62—RELATING TO THE SOCIAL SECURITY BENEFIT DISPARITY KNOWN AS THE NOTCH PROBLEM

Mr. MATTINGLY (for himself, Mr. KENNEDY, Mr. HUMPHREY, and Mr. CHAFEE) submitted the following concurrent resolution; which was referred to the Committee on Finance:

S. CON RES. 62

Whereas unforeseeable economic conditions have adversely affected the changes made by the Congress in 1977 in the social security retirement benefit formula;

Whereas those born in 1917 (and thereafter) whose work records are otherwise identical to work records of those born in 1916 will receive lower social security benefits under the present formula;

Whereas a simple repeal of the 1977 benefit formula would cost the Federal Old-Age and Survivors' Insurance Trust Fund approximately $7,000,000,000 and would adversely affect those who chose to retire in the 1979 through 1981 period at age sixty-two through sixty-four;

Whereas some compensatory alteration in benefit formulas is desirable to mitigate the benefit differential experienced by those who retired at age sixty-five in 1982; and

Whereas the National Commission on Social Security, after extensive investigation, found that this disparity in benefit amounts was unjust and that steps should be taken to resolve it: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the Commissioner of Social Security and the Secretary of Health and Human Services should immediately develop a plan and report to Congress on the steps which Congress might consider for purposes of correcting the security benefit disparity known as the notch problem.

Mr. MATTINGLY. Mr. President, last year I introduced a resolution which called upon the Commissioner of Social Security and the Secretary of Health and Human Services to conduct a study on steps which might be taken by Congress to correct the social security disparity which has come to be known as the notch problem. Although the National Commission on Social Security found that the disparity in benefit amounts was unjust and that steps should be taken to resolve the notch problem, no action has been pursued which would accomplish that. Again today I bring the notch problem to the attention of my colleagues as I introduce a resolution similar to the one I offered last year.

The Social Security Amendments of 1983 which passed the Senate in March and were signed into law in April did not attempt to solve the notch problem. Although we in Congress have in effect ignored the problem, it is not easily ignored by those individuals who are victims of the notch. My office continues to receive requests from those social security beneficiaries who, despite the fact that their work records are identical to those of individuals who were born 1 year or even 1 month earlier than they, are receiving substantially lower benefit payments. The disparity in these benefits makes a real difference in the quality of life for these retirees.

Of particular concern to me is the fact that the benefit computation rules for these individuals, established by the 1977 social security amendments, actually penalize workers who continue in their employment past the age of 62, since the difference in benefits is greater for those who delay retirement beyond that age. I believe we should encourage or even reward those who are and have been willing to work after they reach 62 or even 65. After retirement they should not be penalized for having chosen to continue working and contributing to the

economic well-being of this Nation. Such a system is not just.

It is only right that Congress take immediate steps to rectify this indisputable inequity. I hope the finance committee will give this resolution its attention and I urge my colleagues to support its passage.

Mr. KENNEDY. Mr. President, I am pleased to join Senators MATTINGLY, CHAFEE, and HUMPHREY as sponsors of this concurrent resolution, which calls for an investigation by the Commissioner of Social Security and the Secretary of Health and Human Services into the so-called notch problem in the social security system.

In the effect to salvage the near-bankrupt social security system in 1977, Congress passed a series of cost-cutting reforms. Because the old system of determining benefits over-compensated for inflation, Congress enacted a new formula to calculate benefits for future recipients. The reforms permitted retirees born before 1917 to continue receiving benefits under the old formula. Persons born after 1921 were to be covered by the new formula. A transitional period was created for persons born between 1917 and 1921, who were permitted to calculate their benefits under a separate formula if the benefits were higher than under the new system.

In 1977, however, no one anticipated the high interest rates we have suffered in the past few years. As a result, the new program has created an unforeseen and unacceptable disparity under the transition formula for the treatment of retirees. Workers who were born only days apart, one on December 31, 1916, and another a day later, who hold the same jobs and who pay the same social security tax could receive benefits that vary by as much as $2,000 a year.

Congress clearly intended no such notch effect in 1977. Five years later, when the first retirees born in the transitional period turned 65 in 1982, thousands of them across the country began to write to Congress in protest. It is our responsibility now to investigate this disparity and to end this injustice. Those who have been unjustly penalized by the 1977 legislation deserve reconsideration and revision of the current formula. With 1.6 million new beneficiaries filing for social security each year, large numbers of people are already affected, or will soon be affected by this problem. In addition, there may also be a second unfortunate notch effect waiting in the future for retirees born after the transition, and I hope that the report of the Social Security Administration will also consider this question.

Social security is the cornerstone of economic justice in this Nation. It is the solemn commitment by this country and its Government to provide a secure retirement for workers and their families. As we have learned in recent years, there is no easy solution to the problems that face social security. However, I believe that Congress has a responsibility to remedy the unintended consequences of our actions in the 1970's, and to deal fairly with the critical problem that has suddenly confronted many senior citizens.

I urge my fellow Senators to join us in supporting this resolution. I look forward to the report of the Social Security Administration and I hope that together we can act promptly to restore equality and fairness for all our senior citizens.

SENATE CONCURRENT RESOLUTION 64—RELATING TO AGRICULTURAL MARKETING ORDERS

Mr. LEVIN (for himself, Mr. COCHRAN, Mr. HUDDLESTON, Mr. MELCHER, Mr. ANDREWS, Mr. BOREN, Mr. RIEGLE, Mr. CRANSTON, Mr. HOLLINGS, Mr. ZORINSKY, Mr. DECONCINI, Mr. NUNN, and Mr. WILSON) submitted the following concurrent resolution; which was referred to the Committee on Agriculture, Nutrition, and Forestry:

S. CON. RES. 64

Resolved by the Senate (the House of Representatives concurring),

Whereas agricultural marketing orders have been used successfully in the United States for almost half a century to promote the orderly marketing of agricultural commodities;

Whereas agricultural marketing orders help prevent unreasonable fluctuations in the supplies and prices of commodities such as vegetables, fruits, and milk;

Whereas quality control, research, and promotion programs operated under agricultural marketing orders have improved the quality of such commodities, thus benefiting both producers and consumers; and

Whereas agricultural marketing orders are especially needed today because of the financial hardships faced by farmers: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of Congress that—

(1) the existing system of agricultural marketing orders contributes substantially to the well-being of the people of the United States and should be preserved; and

(2) decisions relating to the timing or manner of implementing agricultural marketing orders should be the responsibility of the Secretary of Agriculture, who should consult with the producers of the agricultural commodity subject to an order prior to issuing or revising an order.

SEC. 2. The Secretary of the Senate shall transmit a copy of this Resolution to the President and the Secretary of Agriculture.

Mr. LEVIN. Mr. President, today I am submitting a concurrent resolution that will maintain the integrity of the marketing order system. Marketing orders were created by the Congress in 1937 to provide a system to help growers and handlers of fresh fruits and vegetables assure quality products, to advertise fresh produce, and, in cases of unusually large crops, to control access to markets.

Under the Agricultural Marketing Agreement Act of 1937, the Secretary of Agriculture is mandated to decide when a marketing order should or should not be issued—after two-thirds of those producing the product ask for such an order to be approved. Unfortunately, politics have recently gotten involved in the decisionmaking process. Last year, for example, the producers of tart cherries, experiencing a bumper year, asked that a marketing order be established that would allow for a reserve pool of 20 percent of the cherry crop. The Agriculture Department agreed that the creation of such a reserve pool was warranted under the guidelines governing the issuance of marketing orders—but the Office of Management and Budget forced Agriculture to abandon the plan. It has been estimated that Michigan farmers lost $25 million because of that decision. That may not be considered a lot of money by the Office of Management and Budget, but I can assure all my colleagues that it would have meant a lot to the cherry producers of Michigan and to the economy of my State.

The resolution that I am submitting today, with my colleagues Senators COCHRAN, HUDDLESTON, BOREN, MELCHER, ZORNISKY, HOLLINGS, ANDREWS, CRANSTON, RIEGLE, NUNN, DECONCINI, and WILSON, would assure that decisions on the worthiness of proposed marketing orders are made by the Agriculture Department on the merits of each individual case.

Mr. HUDDLESTON. Mr. President, I am pleased to join Senator LEVIN, Senator COCHRAN, and others in cosponsoring a concurrent resolution expressing support for the existing system of agricultural marketing orders. This resolution will make clear to the administration that Congress believes that the Department of Agriculture should continue to operate the agricultural marketing order program in accordance with historical policy.

This concurrent resolution addresses the concerns of farmers that the Department of Agriculture is being hampered in its efforts to effectively operate the agricultural marketing order program.

The Agricultural Marketing Agreement Act of 1937 requires the Secretary of Agriculture to administer the agricultural marketing order program for the benefit of both farmers and consumers. Historically, the marketing order program has been used by the Secretaries of Agriculture as a self-help program for farmers.

The program has enabled producers of a particular surplus commodity to work together to bring supply in line with demand, thereby preventing sharp fluctuations in prices. In that

way, the program has protected the interests of both farmers and consumers.

Marketing orders differ from other agricultural adjustment measures in several significant respects. Orders are generally initiated by a particular agricultural industry. Handlers in each industry bear the local costs of administering the program.

The existing agricultural marketing order program contributes substantially to the well-being of our Nation's people, and its operation should not be changed without congressional review and authorization. The Secretary of Agriculture is best qualified to oversee the agricultural marketing order program, and other Federal agencies should not interfere with his management of the program.

Our concurrent resolution will express the sense of Congress that the existing system of agricultural marketing orders should be preserved and that the responsibility for decisions relating to the timing or manner of implementing agricultural marketing orders should remain with the Secretary of Agriculture.

SENATE CONCURRENT RESOLUTION 65—RELATING TO SOUTH AFRICA'S "BLACKSPOT" POLICY

Mr. GLENN (for himself, Mr. BOSCHWITZ, Mr. CRANSTON, Mr. DOLE, Mr. HEINZ, Mr. MOYNIHAN, Mr. SARBANES, and Mr. TSONGAS) submitted the following concurrent resolution; which was referred to the Committee on Foreign Relations:

S. CON. RES. 65

Whereas the Government and the people of the United States have recognized inherently and innately, as a natural extension of this Nation's founding principles and objectives, the rights of property owners and of their descendants to possess and occupy land which they have lawfully acquired and maintained;

Whereas violations of these rights within or outside the United States are considered a flagrant abuse of basic assumptions governing the conduct of civilized societies and cannot be condoned by the people or the Government of the United States;

Whereas the Republic of South Africa is systematically and forcibly removing millions of black South Africans from land they owned and farmed for generations, stripping them of their citizenship, and relocating them in racially segregated communities, in violation of the United Nations Charter and the Universal Declaration of Human Rights;

Whereas living conditions in the new black "homelands" are grossly inferior to those enjoyed by white South Africans, for example (1) there is only one doctor for every four hundred thousand people in the black "homelands", while white South Africans have a doctor for every three hundred and fifty people, and (2) the infant mortality rate in the black "homelands" is two hundred and eighty-two per one thousand births, while in white South Africa the infant mortality rate is twelve per one thousand births;

Whereas the "blackspot" policy toward blacks prompted Saul Mkhize to oppose the Republic of South Africa's attempts to force him to surrender land his family had owned for three generations;

Whereas this policy moved Saul Mkhize to write South African Prime Minister Botha stating, "We do not wish to be rebellious in any way, but only to continue to live our lives in our own environment."; and

Whereas this policy led to the shooting death of Saul Mkhize by the security police of the Republic of South Africa: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of the Congress that—

(1) the Government of the Republic of South Africa should comply with internationally recognized human rights, the United Nations Charter, and the Universal Declaration of Human Rights by ending the "blackspot" policy and allowing relocated South Africans to remain in or return to their legally acquired land and residences;

(2) the Government of the United States should continue its policy of not recognizing the sovereignty or independence of the so-called "homelands";

(3) at such times that any "homeland" official applies for a visa for travel to the United States, no such visa should be granted to such official unless such official holds a passport which is recognized as valid by the Government of the United States; and

(4) the President and his representatives should convey to the Government of the Republic of South Africa the concerns expressed in this concurrent resolution.

SEC. 2. The Secretary of the Senate shall transmit a copy of this concurrent resolution to the President with the request that he further transmit such copy to the Ambassador of the Republic of South Africa to the United States and to the Prime Minister of the Republic of South Africa.

Mr. GLENN. Mr. President, today I am introducing a new resolution expressing the sense of the Senate that the Republic of South Africa should cease its "blackspot" policy of forcibly removing black South Africans from their legally acquired residences and relocating them. This new resolution is essentially the same as Senate Concurrent Resolution 45 which I introduced on June 15. The new resolution contains technical changes and the third resolved clause has been modified to clarify its meaning. The intent of the third resolved clause is to insure that the United States does not give any measure of recognition to the so-called independence of these South African-created homelands by granting visas to "homeland" officials on a "homelands" passport. We do not intend to prohibit all travel to the United States by officials of the homelands, either those which have been declared independent by South Africa or those which have not. However, we do want to insist that no U.S. visa be granted to any such official unless such official holds a passport which is recognized as valid by the Government of the United States. I believe the new language of the third resolved removes any ambiguities which may have been present in Senate Concurrent Resolution 45.

SENATE RESOLUTION 195—BUDGET WAIVER RELATING TO THE CONSIDERATION OF S. 1009

Mr. STEVENS, from the Committee on Governmental Affairs, reported the following original resolution, which was referred to the Committee on the Budget:

S. RES. 195

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 1009. Such waiver is necessary because S. 1009 authorizes the enactment of new budget authority which would first become available in fiscal year 1984, and such bill was not reported on or before the appropriate date required under section 402(a) of the Congressional Budget Act of 1974 for such authorizations.

The waiver of section 402(a) is necessary to permit congressional consideration of statutory authority for the agencies of the U.S. Government.

S. 1009 provides an authorization for fiscal year 1984 of such sums as may be necessary for reauthorization of the Federal Physicians Comparability Allowances Program, first authorized in 1978.

SENATE RESOLUTION 196—BUDGET WAIVER RELATING TO THE CONSIDERATION OF S. 1513

Mr. STEVENS, from the Committee on Governmental Affairs, reported the following original resolution, which was referred to the Committee on the Budget:

S. RES. 196

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 1513. Such waiver is necessary because S. 1513 authorizes the enactment of new budget authority which would first become available in fiscal year 1984, and such bill was not reported on or before the appropriate date required under section 402(a) of the Congressional Budget Act of 1974 for such authorizations.

The waiver of section 402(a) is necessary to permit congressional consideration of statutory authority for the National Historical Publications and Records Commission.

S. 1513 provides an authorization for fiscal year 1984 of $4,000,000, as part of a five-year reauthorization totaling $23,000,000.

SENATE RESOLUTION 197—BUDGET WAIVER RELATING TO THE CONSIDERATION OF S. 242

Mr. HATCH, from the Committee on Labor and Human Resources, reported the following original resolu-

tion; which was referred to the Committee on the Budget:

S. RES. 197

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to S. 242, to provide additional authorizations for labor intensive programs, to provide additional provisions for the dislocated workers program under Title III of the Job Training Partnership Act, to promote employment and training for recipients of federally financed unemployment benefits, to provie procurement targeting in labor surplus areas, and for other purposes. Such waiver is necessary because S. 242 authorizes the enactment of new budget authority which would first become available in fiscal year 1983, and which would first become available in fiscal year 1984 and such bill was not reported prior to the date required pursuant to section 402(a) of the Congressional Budget Act of 1974 for such authorizations.

Compliance with section 402(a) of the Congressional Budget Act of 1974 was not possible by such date, and the enactment of S. 242 is necessary to meet the urgent needs of the unemployed.

SENATE RESOLUTION 198—RELATING TO THE EXPORT OF NUCLEAR REACTOR COMPONENTS

Mr. BOSCHWITZ (for himself, Mr. GLENN, Mr. HART, Mr. PROXMIRE, Mr. HUMPHREY, Mr. HELMS, Mr. RIEGLE, Mr. FORD, and Mr. PRESSLER) submitted a resolution; which was referred to the Committee on Foreign Relations:

S. RES. 198

Whereas halting the spread of nuclear weapons is one of the primary goals of United States foreign policy;

Whereas the United States, along with 117 nations, is a party to the Nuclear Nonproliferation Treaty;

Whereas the Congress in 1978 passed the Nuclear Nonproliferation Act which is designed to establish guidelines for the export of nuclear materials and technology;

Whereas the Government of India has made an urgent request to the United States for nuclear reactor components for its nuclear power station at Tarapur;

Whereas India is not a party to the Nuclear Nonproliferation Treaty and has not agreed to place its nuclear facilities under International Atomic Energy Agency safeguards;

Whereas the Government of India conducted a nuclear explosion in 1974 and has refused to rule out future nuclear tests;

Whereas there have been reports indicating that the Government of India is preparing for another nuclear test, which would require a cutoff of United States nuclear exports under the Nuclear Nonproliferation Act;

Whereas in order to provide the requested nuclear reactor components to India the President may have to waive the requirement for such a cutoff of United States nuclear exports;

Whereas the nuclear cooperation agreement between the United States and India provides that nuclear facilities supplied by the United States to India shall be subject to international safeguards; and

Whereas this agreement expires in 1993 and India has not agreed to extend its safeguard provisions in perpetuity; Now, therefore, be it

Resolved, That it is the sense of the Senate that the United States Government should not export or help arrange for other countries to export nuclear reactor components for the nuclear power station at Tarapur, India, unless the Government of India provides to the United States Government stronger nuclear nonproliferation guarantees. These guarantees should include, at a minimum—

(1) reliable assurances by the Government of India that it is not engaged in a program to develop nuclear weapons and will not explode additional nuclear devices; and

(2) agreement by the Government of India to extend the safeguards provisions in the United States-Indian nuclear cooperation agreement in perpetuity.

SEC. 2. The Secretary of the Senate shall transmit a copy of this resolution to the President.

Mr. BOSCHWITZ. Mr. President, I rise today, along with my colleague, Senator JOHN GLENN, to submit a resolution which reaffirms the commitment to the United States to halting the spread of nuclear weapons. This resolution, which, in addition to Senator GLENN, has been cosponsored by Senators PROXMIRE, HART, HUMPHREY, HELMS, PRESSLER, RIEGLE, and FORD, expresses the sense of the Senate that we should not export or help arrange for other countries to export nuclear reactor components to India for its nuclear power station at Tarapur unless India provides us with stronger nonproliferation guarantees.

Mr. President, it is interesting to note the broad spectrum of the cosponsors of this resolution. From among the most conservative Members of our body to the most liberal, this resolution, which has only been brought to the attention of Members a day or two ago, has already attracted a number of most meaningful cosponsors.

This response springs, of course, from the recognition that the proliferation of nuclear weapons is something that we must stop. Otherwise, it is not unlikely that in our lifetime we will indeed see the detonation of one of those weapons.

Actually, Mr. President, the likelihood of such a nuclear exchange between the superpowers is very remote, in my judgment. Both sides are simply too powerful. But if nuclear weapons proliferate among many nations, as they have begun to, and if we are not able to control and contain the spread of nuclear technology, we indeed are going to be heading down the road to trouble.

India has made an urgent request to the United States for spare parts for its nuclear plant at Tarapur. The problem at Tarapur is that its nuclear fuel has deteriorated and has contaminated the plant's coolant. There have been reports that workers in some areas of the plant are being exposed to high levels of radiation. It is not certain whether the spare parts India has requested from the United States, plus decontamination procedures, will be adequate to solve Tarapur's problem.

In any event, the Reagan administration has informed the Indians that it will make sure they receive the necessary parts for the plant, either from the United States or from alternative suppliers in Europe and Japan. While I can understand the administration's desire to be responsive to India's request, I also think we should gain meaningful concessions from India on the issue of nuclear nonproliferation before we rush to help them get the nuclear components they want.

Mr. President, the resolution we are introducing states that two of those concessions should be the following:

First, the Government of India should be required to assure us that it is not engaged in a program to develop nuclear weapons and will not explode another nuclear device. India detonated a nuclear explosion in 1974 and has refused to rule out further nuclear tests. In fact, it has recently been reported that India could be making preparation for a second nuclear test at the Rajasthan Desert test site. Given the threat that Pakistan may be attempting to acquire nuclear weapons, we have reason to worry that further nuclear testing by India may not be consistent with its pledge to use nuclear power for peaceful purposes.

Further, under the terms of the Nuclear Non-Proliferation Act of 1978, one of the cornerstones of U.S. nonproliferation policy, the United States may not export nuclear parts or technology to any nonnuclear weapons state engaged in nuclear explosive activities. The President may waive this prohibition, subject to congressional veto.

To date, the administration has not indicated whether President Reagan will use his waiver authority in this case. If he does, Congress veto power is, of course, in serious doubt due to the recent Supreme Court ruling against the legislative veto. It is therefore important for the Senate to speak out on this issue in advance. Our resolution does just that.

Second, Mr. President, this resolution states that as another condition for receiving the spare parts, India should agree to extend the safeguards provision in the United States-Indian nuclear cooperation agreement in perpetuity. Although the United States-Indian agreement first initiated in 1963 provides for International Atomic Energy Agency safeguards on U.S.-supplied nuclear facilities in India, this agreement lapses in 1993.

The United States interprets the agreement to mean that the safeguards provision extends in perpetuity, but the Indians contend that all provisions of the agreement lapse in

1993. If we want to make sure the nuclear installation at Tarapur, one we supplied, remains safeguarded indefinitely we must apply whatever leverage we have on India now. This is the message of our resolution.

Mr. President, the two items mentioned in this resolution, India's plan for another nuclear test and its disagreement with us over the nuclear cooperation agreement, are hardly the only disputes we have with India on the nonproliferation issue. We have chosen these two because sooner or later India must make these concessions if the United States is to legally cooperate with India in the nuclear field.

As I have already noted, U.S. nuclear exports are forbidden under the NNPA to any nonnuclear state involved in nuclear explosive activities. In addition, the NNPA requires that U.S. nuclear spare parts be exported only to safeguarded facilities. Therefore, Mr. President, all we are really asking India to do is allow the United States to comply with its own nonproliferation law.

However, the resolution does not say at all that we must limit ourselves to these two conditions. We should as a matter of policy require that India accept IAEA safeguards on all nuclear installations, not just the one at Tarapur. In addition, we could require that India not reprocess spent fuel from a U.S.-supplied facility without our consent, a position India does not now accept.

As you know, Mr. President, it is the reprocessing of spent fuel that produces plutonium, a material that can be used to make a nuclear weapon. But again, Mr. President, our resolution does not require these last steps I have mentioned, although neither does it preclude them. So we are approaching it in a reasonable manner.

Mr. President, there has lately been considerable public attention focused on the issue of strategic nuclear arms control. I certainly share the concern felt by the countless Americans about the nuclear arms competition between the United States and the Soviet Union.

There is unquestionably a need for the United States and the U.S.S.R. to reduce their nuclear arsenals, but I think there is another important aspect of the nuclear arms question which often gets lost in all the discussion about the nuclear freeze, the build down, and other proposals for strategic arms control. That is the issue of nuclear proliferation. That is an issue that should not get lost.

Therefore, Mr. President, when the Senate Foreign Relations Committee resumes it consideration of the various arms control proposals now pending before it, I will offer an amendment urging the United States to continue to press forward on the nonproliferation front.

Meanwhile, I am very pleased to join Senator GLENN and the rest of my colleagues in speaking out on the export of nuclear spare parts to Tarapur. In this we have an opportunity to strengthen the global nonproliferation system at one of its weakest points. We must not allow this opportunity to slip away.

Mr. President, in closing I would like to thank Senator GLENN and his staff for their cooperation on this issue. The Senator from Ohio has been a leader in the nonproliferation field for many years. I was pleased to vote with him in 1980 when he tried to stop for the Carter administration from shipping nuclear fuel to India despite the latter's failure to place all its nuclear facilities under safeguards. I look forward to working with him in the future on the vital and underpublicized question of nuclear nonproliferation.

Mr. President, I ask unanimous consent that an article entitled "Stop This Nuclear Sale," which appeared in the Washington Post of July 22, 1983, be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, July 22, 1983]

STOP THIS NUCLEAR SALE

(By Rudy Boschwitz)

Although the debate about strategic nuclear arms control has dominated the news lately, the Reagan administration now has before it a true "test case" in a less publicized area of the nuclear arms question—nuclear proliferation. This case, India's request for reactor components for nuclear plan: at Tarapur (a city just north of Bombay) is important for two reasons.

First and foremost the manner in which the U.S. government responds to the Indian request will reveal the strength of our commitment to halting the proliferation of nuclear weapons. Second, this case demonstrates the potential impact on U.S. nonproliferation policy of the recent Supreme Court decision on the legislative veto.

India has made an urgent request to the administration for component parts for two reactors at Tarapur that have developed serious radiation leaks. In my opinion, it will be difficult for the administration to honor this request without violating U.S. nonproliferation laws. This law, the so-called Nuclear Non-Proliferation Act, passed by Congress in 1976 contains a provision banning exports of nuclear material to countries "engaged in activities . . . having direct significance for the manufacture or acquisition of nuclear explosive devices . . ." The problem is that there have been strong hints that India could be preparing for a second nuclear test, and Prime Minister Indira Gandhi has in fact refused to rule out further nuclear testing.

India first exploded a nuclear device in 1974, calling it a "peaceful nuclear explosion." However, Pakistan, with which India has been in deep dispute for over three decades, does not see it quite that way. Many proliferation experts fear that the Pakistanis are-clandestinely acquiring their own bomb-making capability.

Under NNPA, the president may waive the prohibition against unclear exports to India, but Congress may overturn this decision by passing a concurrent resolution within 60 days of his action. However, the congressional veto power granted to Congress in the NNPA, and many other laws, could now be invalidated by the recent Supreme Court ruling against the legislative veto. The uncertainty here is the breadth of the court's decision: the case involved a one-house veto, while the NNPA provides that both houses of Congress must vote to block a presidential action.

The NNPA's two-house veto was a useful nonproliferation tool three years ago when Congress nearly succeeded in blocking another ill-advised nuclear export deal to India by another administration. The facts of the case were these: under the Nuclear Non-Proliferation Treaty (NPT) of 1970, signed by 115 nations including the United States and the Soviet Union, the nuclear "have" nations agreed to supply the nuclear "have-not" nations with nuclear technology for peaceful purposes in return for a pledge from the non-nuclear states to forgo the acquisition of nuclear weapons and submit all their nuclear facilities to periodic inspections by the International Atomic Energy Agency, an arm of the United Nations. These inspections are called full-scope safeguards.

Unfortunately, a number of countries that are major proliferation risk—India, Pakistan, South Africa, Brazil and Argentina to name several—have not signed the treaty.

In order to exert pressure on these countries to allow inspection of all their facilities, Congress passed the NNPA, which in addition to the provision previously mentioned, contains another provision banning nuclear exports to countries that do not accept IAEA safeguards on all their facilities.

In 1980, President Carter wanted to continue to supply nuclear fuel to India even though the Indians do not accept full-scope IAEA safeguards. Carter exercised his authority to waive this ban granted to him by the NNPA. Although the House voted resoundingly, 298–98, to overturn the waiver, the Senate upheld Carter's action in a close vote, 48–46. On this vote I was pleased to join forces with my colleague, Sen. John Glenn, who led the fight against the fuel exports. Too bad we lost.

With our veto power now in doubt, it is all the more important for those of us in Congress to speak out loudly and try to influence public opinion on the proliferation issue. Regarding India's current request for reactor parts, the administration should not provide India with the parts it needs, nor should it arrange for other countries to do so. Instead, it should try to persuade all the major nuclear suppliers—mainly ourselves and our European allies—to withhold parts from the Indians until they: (1) make it clear that they are not planning another nuclear test and (2) accept full-scope IAEA safeguards. If we who are already in the nuclear business, either for civilian or military purposes, are really serious about wanting to stop proliferation, this is the kind of bold, forceful step that we have no choice but to take.

We must recognize that what drives countries like India and Pakistan to join the nuclear club is not some perverse affection for nuclear weapons but a much more human emotion—fear. They are afraid for their se-

curity in a hostile world. Just as our concern about Soviet military power and our desire to deter its use against us forces us to deploy nuclear weapons. Therefore, it is vital that we strengthen the international nonproliferation system, or regime, as it is sometimes called so that frightened countries will come to trust it as a way of removing the nuclear terror.

On June 7, 1981, Israeli fighter-bombers executed the first overt military attack in history on a nuclear facility, destroying Iraq's Osirak research reactor. The Israelis acted because they did not trust the peaceful intentions of a nuclear program being developed by an uncompromising enemy and because they had an equal distrust for the international nonproliferation regime. While many expressed alarm and outrage that military force was used to resolve this question, I think the Israelis did us all a favor by reminding us of our responsibility to countries afraid of a nuclear threat from hostile neighbors.

We can exercise that responsibility by taking a tough stand on the export of component parts to India. If we are not willing to take this type of action both now and in the future, we should not be surprised when another Osirak-style raid occurs by some other threatened nation, or, worse still, when one of these countries actually uses a nuclear weapon against an adversary. We have the power to prevent these horrible outcomes; the question is, do we have the will?

Mr. BOSCHWITZ. Mr. President, I also ask unanimous consent that other Senators who wish to file statements on this resolution during the course of the day be allowed to do so, and that their statements appear at this point in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GLENN. Mr. President, I am pleased to join Senator BOSCHWITZ in submitting this resolution concerning our nuclear nonproliferation policy toward India and its relation to the shipment of spare parts for the nuclear reactors at Tarapur. Once again, we are faced with an important decision that will determine whether the United States intends to live up to its nonproliferation commitments and the spirit of its laws in this area. Three years ago, the previous administration failed the first real test of its nonproliferation policy when President Carter made the decision to send fuel to Tarapur despite the refusal of the Indians to accept full-scope safeguards on their nuclear facilities as required under the Nuclear Nonproliferation Act of 1978. The House by a 2-to-1 margin, voted to overturn the President's decision, and the Senate came within two votes of doing the same. Only one of two pending shipments was then sent, with the second one scheduled to be delivered at a later time. The main arguments against the shipment were that the Indians had in the past refused to abide by clear U.S. understandings about the 1963 United States/India Agreement for Cooperation as well as the terms of a heavy-water sale agreement between the United States and India in 1956. Despite being told by the United States that the use of our heavy water in a nuclear explosives program would be contrary to the provisions of the sale agreement, the Indians went ahead and used our material in the reactor that produced the plutonium for their 1974 nuclear explosion. Subsequently, after the passage of the NNPA, the Indians refused to abide by the full-scope safeguards criterion for U.S. exports to nonweapon States. The previous administration argued that if we did not send fuel for Tarapur we risked having the Indians claim that we had abrogated the agreement—a claim, incidentally, that would be false since the Indians agreed in a 1971 amendment to the 1963 agreement to abide by all our export laws—and might then remove safeguards from previous U.S. exports including the accumulated spent fuel.

To the amazement of some, after the fight over the fuel shipment was resolved, the Indians began claiming publicly that they would have the right to remove safeguards from Tarapur after the United States-India agreement expired in 1993. They also began claiming publicly that they have the right to reprocess U.S.-origin spent fuel without our permission, even though the United States-India agreement clearly calls for "a joint determination on safeguardability" of the proposed reprocessing facility before any extraction of plutonium from U.S.-origin spent fuel can be processed. Such a joint determination has never been made.

In response to news reports suggesting that the Indians were seeking to terminate the agreement, I wrote to the President on February 5, 1981, suggesting that if the Indians wish to terminate their agreement with the United States, we should accommodate them with the understanding that such termination does not relieve them of any obligation with respect to either continued safeguarding of the reactors and the spent fuel or U.S. prior consent on the reprocessing of U.S.-origin spent fuel. I ask unanimous consent that this letter and the reply from the White House be placed in the RECORD at this point.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

COMMITTEE ON GOVERNMENTAL AFFAIRS, SUBCOMMITTEE ON ENERGY, NUCLEAR PROLIFERATION AND GOVERNMENT PROCESSES,
Washington, D.C., February 5, 1981.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: Recent press reports indicate that the Indian government is proposing an amicable end to its Agreement for Cooperation in nuclear matters with the United States. This issue has been an irritant in U.S.-Indian relations since 1974 when the Indians exploded a nuclear device using plutonium obtained from an unsafeguarded Canadian research reactor in which U.S. heavy-water was emplaced.

In an aide-memoire delivered by the U.S. State Department to India four years earlier, the U.S. position was made clear that we would consider use of our materials for nuclear explosive purposes as a contravention of the terms under which the material was supplied. Nonetheless, India proceeded with the explosion. That action was one of the factors that influenced the U.S. Congress to pass the Nuclear Nonproliferation Act of 1978 which provides that except for Presidential intervention, no U.S. nuclear materials would be exported to any non-weapon state which refuses to accept full-scope safeguards on its nuclear facilities.

It is important to understand that 111 non-weapons states, in return for receiving cooperation from nuclear suppliers, including the U.S., have accepted full-scope safeguards by virtue of their adherence to the Non-Proliferation Treaty. To send materials to nonsigners such as India, who refuse to honor this export criterion, is to undermine the Treaty.

The Indian issue is a complex one involving subtle legal arguments regarding the obligations of both the United States and India under the Agreement for Cooperation and the Fuel Contract pursuant thereto. It is not my intent to reiterate all those arguments. They were exhaustively examined during the Senate debate last fall on President Carter's decision to send the fuel, and I would be glad to discuss them with you at length at your convenience. Rather, the purpose of this letter is to inform you that if the official Indian attitude on the reprocessing of U.S.-origin spent fuel at Tarapur is as reported in the Washington Post of February 3, 1981 (and my staff has been told by a State Department spokesman that the quotes do represent official Indian attitudes), then a significant part of the rationale used to justify sending the fuel has been undercut. During the Senate debate, the proponents of the shipment argued that the shipment was necessary in order to ensure that the Indians could not claim breach-of-contract on the part of the United States. In that way, it was argued, the safeguards on the spent fuel at Tarapur and on the reactor itself would be maintained, and we could prevent the Indians from reprocessing the spent fuel since U.S. permission is required under the Agreement. Those arguments played a large part in convincing the Senate by a vote of 48–46, to uphold the President's decision. I argued against the decision on the grounds that the Indians had not shown good faith with the United States in terms of the discharge of Indian obligations under the previous heavy-water sales agreement; that India had refused to accept full-scope safeguards as required under the Nuclear Nonproliferation Act (NNPA) of 1978; that Prime Minister Gandhi had reiterated that the Indians would mount nuclear explosions whenever they felt it was in their national interest; and that it would be damaging to the U.S. to fail the first substantive test of the NNPA.

The Post article quotes Dr. V. N. Meckoni, Director of the Tarapur Nuclear Safety Group, as saying "There is no question of permission from the U.S. for the reprocessing of Tarapur fuel. The fuels belongs to us." This suggests that, despite our bending over backwards in order to show good will toward India in the nuclear area, the Indians may be prepared to violate the Agree-

ment for Cooperation and separate out plutonium from the spent fuel at Tarapur without our permission.

If the Indians take such action, we will be faced with a situation in which the United States publicly took a large step backwards in its nonproliferation stance to placate the Indians only to be subsequently and rudely thrust aside. This is hardly likely to enhance American prestige in the world community.

In my view, it would be most desirable and appropriate for the President to issue a strong statement regarding the United States' attitude on the nonproliferation of nuclear weapons, and on the United States' determination not to knuckle under to the threats of other countries that demand the export of our nuclear materials without satisfying the export criteria in our laws.

If the Indians wish an amicable end to our nuclear fuel contract rather than satisfying the legal export conditions designed to prevent the misuse of nuclear materials, I feel we should accommodate them with the understanding that termination of the contract does not relieve them of any obligation with respect to either the continued safeguarding of the reactors and the spent fuel or U.S. prior consent on the reprocessing of U.S.-origin spent fuel.

The Tarapur shipment approved last year was divided into two parts, only one of which has been sent. In light of the Indian statements I urge that you withhold sending the second part of the shipment until appropriate assurances are received from the Indians regarding the future disposition of our spent fuel and the maintenance of safeguards.

Finally, I continue to hold to the position that the issue in the Tarapur case is not what we can or cannot prevent the Indians from doing. Their large, unsafeguarded, indigenous program will eventually dwarf the Tarapur program in terms of production of weapons-usable materials. The issue, rather, concerns the impact that our decisions in this area will have on other nations. If the most flagrant nuclear violator can obtain nuclear materials with no concessions, the message to the signatories of the NPT is that the political commitment they made in order to receive nuclear assistance has been devalued. An equally unfortunate message is also sent to those countries that may be going down the path of developing a weapons option themselves and to suppliers who may be aiding them to do so. We should be resolute in our determination not to engage in nuclear trade with countries that are unwilling to allow effective full-scope safeguards on their nuclear facilities. To do otherwise is to guarantee failure in obtaining international consensus on strengthening and tightening the international safeguards system.

Best regards.

Sincerely,

JOHN GLENN.

DEPARTMENT OF STATE,
Washington, D.C., April 17, 1981.

Hon. JOHN GLENN,
U.S. Senate,
Washington, D.C.

DEAR SENATOR GLENN: The White House has asked me to reply to your recent letter about the future of US nuclear cooperation with India. We recognize your longstanding commitment to non-proliferation and appreciate having your views on the India issue at this stage.

As you know the Administration has been actively reviewing the situation with a view to deciding on a course of action that best serves our non-proliferation and foreign policy interests. I understand that you have been briefed by State Department officials to bring you up to date on developments in a number of areas of non-proliferation concern, including India. As you can appreciate, therefore, our discussions about the US-India nuclear relationship are at a very delicate stage.

While I cannot at this point predict the outcome of this review or of related discussions with representatives of the Indian Government, this is a matter of high priority to which we will be devoting considerable attention on the weeks ahead.

Sincerely,

ALVIN PAUL DRISCHLER,
Action Assistant Secretary
for Congressional Relations.

Mr. GLENN. Mr. President, unfortunately, these conditions were ignored when the United States subsequently allowed the Indians to sign an agreement for a new fuel contract with the French for Tarapur. Despite the history of contentiousness on key points concerning safeguards, the United States did not insist upon clarification of these points prior to giving its approval of the French/Indian agreement. In particular, the United States did not insist that the French/Indian agreement assure that perpetual safeguards shall apply to the fuel provided by France; did not assure that safeguards shall apply to any material derived from French-supplied fuel and to any facility through which such fuel passes; and did not assure that French-supplied fuel cannot be reprocessed without a joint determination on safeguardability of the reprocessing facility by the United States, the French, and the Indians.

As a result of the French/Indian agreement, the Indians will receive fuel for Tarapur without having to put all their nuclear facilities under safeguards, thus escaping a major aim of U.S. nonproliferation policy instituted under the NNPA.

Now, after all this history, the Indians have come back with a request for the United States to ship spare parts for the Tarapur reactors. And once again, an administration has seen fit to cave in before India's demands without requiring the least quid pro quo in return. This time, the argument for shipment of nuclear parts is based not just on the United States/Indian Agreement for Cooperation, but also on an ostensible desire to protect both nuclear plantworkers at Tarapur who are being excessively exposed to radiation, as well as Indian citizens living near the Tarapur reactors who could be exposed to radiation in the event of an accident.

That there is a safety problem at the Tarapur reactors is beyond question, but whether the spare parts will solve the problem is another matter entirely. In the meantime, sending the parts without any quid pro quo will put the United States once again in the position of having its nonproliferation policy undermined by countries with the worst records since the Nuclear Nonproliferation Treaty went into force nearly 15 years ago.

Reports that activities, including the sinking of shafts, are proceeding at the Rajasthan Desert test site plus the Indians' steadfast refusal to join the NPT or to put their entire nuclear program under safeguards renders hollow the claim that the United States would be forsaking a moral obligation if the spare parts were not delivered.

My view of this situation was conveyed to the White House in a letter I wrote to the President on July 7, 1983. I ask unanimous consent that this letter and the reply by the White House to it appear in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

U.S. SENATE, COMMITTEE ON GOVERNMENTAL AFFAIRS, SUBCOMMITTEE ON ENERGY, NUCLEAR PROLIFERATION AND GOVERNMENT PROCESSES,
Washington, D.C., July 7, 1983.

President RONALD REAGAN,
The White House
Washington, D.C.

DEAR MR. PRESIDENT: I was recently informed, first via a wire story and subsequently through official channels, that Secretary of State Shultz has made, on behalf of your administration, a commitment to the Indians that the U.S. will aid them in obtaining certain spare parts for the Tarapur reactors. This aid will take the form of both approving the transfer of such parts from third parties, and exporting directly to India those parts which third parties cannot provide. I understand that extensive discussions have already taken place with Germany and Italy on the possibility of those countries supplying at least some of the desired equipment.

My views on this were recently solicited by Secretary Shultz through Senator Percy. I have been informed that a cable was sent to the Secretary informing him of my view, which is that I am opposed to providing the Indians with any help in obtaining these reactor items as long as the Indians maintain the position that the safeguards principles of "perpetuity" and "pursuit" do not apply to U.S. exports under the U.S./India Agreement for Cooperation of 1963, as amended in 1971.

I believe that, in aiding the Indian nuclear program under present circumstances, the administration is making a grave error that will undermine the nuclear nonproliferation regime in much the same way as the Carter Administration undid its own policy by sending fuel to Tarapur in 1980.

Some of my colleagues in the House and Senate have written to you about this issue and it is not my intention to reiterate their arguments. Rather, because it has been claimed that the transfer of spare parts is a "safety" and humanitarian issue that should override nonproliferation concerns, I wish to bring to your attention some information suggesting that such claims are misleading and obscure the true pricture of nuclear safety at Tarapur.

Nuclear experts in your administration have told my staff that the Tarapur reac-

tors are, from the standpoint of safety and independently of the spare parts, much worse than the worst operating plants in the United States. There have been serious fuel failures in the past few years in which significant amounts of radioactive materials have entered the primary coolant and been deposited in pipes, pumps, valves, and other equipment, thus resulting in high exposure levels to workers (30–50 rems/hour in some areas of the plant). These reactors are old and do not represent up-to-date design. They have not been retrofitted to bring them up to acceptable safety standards. Their emergency core cooling system (ECCS) equipment is out-of-date and marginal. Even under conditions of half power operation, these reactors release amounts of radioactive materials to the atmosphere that are 100 times greater than that allowed under U.S. regulations.

I have been told that if these reactors had been operating in the United States, the Nuclear Regulatory Commission would have shut them down years ago. Indeed, the only two U.S. reactors of this design, Dresden I and Humboldt Bay, were permanently shut down a few years ago because of problems with ECCS equipment and fuel element leakage in one case and the inability to meet new seismic requirements in the other. Neither plant had to face the new safety requirements imposed by the NRC after the Brown's Ferry fire or the TMI accident.

The bottom line of this litany, Mr. President, is that the basic safety problems of these plants appear to be so profound that the transfer of the spare parts would not adequately address them. It is hard to escape the conclusion that Indian workers at Tarapur would continue to be irradiated at high levels even if the parts were delivered and installed.

It thus appears, Mr. President, that the relationship of the spare parts to the status of safety at Tarapur is analogous to the relationship of a precancerous wart to the health of a terminally ill patient.

Nonetheless, some would argue that the U.S. has a moral obligation to do all it reasonably can to ensure that its exports, including nuclear reactors, are used safely. I don't disagree with this notion, but I also believe that the U.S. has a moral as well as a legal obligation to uphold and strengthen the international nonproliferation regime, whose failure would risk many more lives on this earth than would the failure of the reactors at Tarapur. When one adds to this the realization that the Tarapur reactors are so far off U.S. safety standards that it cannot be reliably estimated what accidents might happen if the reactors were to continue to operate with or without the additional spare parts, the case for the shipment of these parts in the absence of any reasonable concession by the Indians on safeguards evaporates.

I urge you to reverse the administration's unilateral concession to the Indians, and to link any assistance at Tarapur to concrete Indian actions aimed at ensuring the retention and expansion of safeguards within their nuclear program.

Sincerely,

JOHN GLENN,
U.S. Senator.

U.S. DEPARTMENT OF STATE,
Washington, D.C., July 28, 1983.

Hon. JOHN GLENN,
U.S. Senate,
Washington, D.C.

DEAR SENATOR GLENN: The White House has asked me to reply to your letter of July 7, 1983 in which you urged the President to oppose the export of certain spare parts to India for use in the Tarapur reactors.

As you know, Secretary Shultz during his recent visit to India told the Indian Government that if the necessary parts were not available from third country suppliers, President Reagan would be prepared to take the appropriate steps to see that they could be obtained in the United States. This was a very difficult decision, and the President's basic concern throughout was the health and safety of the people working at the reactors and living nearby. I can assure you that this decision was reached only after very long and, we think, careful consideration of all aspects of the case, including many of the same facts and problems you raised in your letter. We sincerely believe that we have not sacrificed our non-proliferation principles in making this accommodation.

The President has not yet decided what specific measures will be taken to permit the export of the parts to India, because we are waiting to find out exactly how many of the parts will be available from third country suppliers. We will, of course, keep you fully informed of developments as they occur.

Sincerely,

POWELL A. MOORE,
Assistant Secretary for Legislative and Inter-Governmental Affairs.

Mr. GLENN. Mr. President, it should be noted that in Mr. Powell Moore's reply on behalf of the President, the White House does not dispute the claims made in my letter regarding the safety situation at Tarapur and the role that the spare parts can and cannot play in alleviating safety concerns.

The resolution offered by Senator BOSCHWITZ and myself is a very simple expression of a position whose reasonableness I challenge anyone to deny. It says that as a minimum condition for consideration of the delivery of spare parts to Tarapur, the Indians should give reliable assurances that they are not engaged in a program to develop nuclear weapons—and that includes "peaceful nuclear explosions"—and that they will not explode additional nuclear devices. It also requires that the Government of India extend the safeguards provisions in the United States/Indian Agreement for Nuclear Cooperation in perpetuity so that safeguards on all previous U.S. exports and on materials derived from those exports will not expire with the expiration of the United States/Indian agreement.

Mr. President, I believe it is time that the United States stop being spineless in its efforts to prevent the spread of nuclear weapons around the globe, and I also believe it is time that the administration began paying closer attention to the spirit of our nonproliferation laws in the United States. I urge my colleagues to support this resolution, which sends a clear message to the President that he would be ill-advised to proceed with the proposal to aid the Indians in obtaining the spare parts for Tarapur without obtaining substantial concessions from the Indians in the area of nuclear nonproliferation.

SENATE RESOLUTION 199—BUDGET WAIVER RELATING TO THE CONSIDERATION OF H.R. 2840

Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation, reported the following original resolution; which was referred to the Committee on the Budget:

S. RES. 199

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of H.R. 2840. Such waiver is necessary because H.R. 2840 authorizes the enactment of new budget authority which would first become available in a fiscal year and was not reported on or before May 15 of that year, as required by section 402(a) of the Congressional Budget Act of 1974 for such authorizations.

The authorizations contained in H.R. 2840 are necessary in order to permit the United States Government and the State of Alaska to proceed with the transfer of management of the Pribilof Islands. It was not possible for such authorizations to have been reported by the Committee on Commerce, Science, and Transportation prior to the statutory deadline for such authorizations because negotiations regarding the transfer had not been completed at the time of the deadline.

SENATE RESOLUTION 201—RELATING TO THE USE OF CHEMICAL WARFARE AGENTS BY THE SOVIET UNION

Mr. PRESSLER (for himself, Mr. PERCY, Mr. DOLE, Mr. SARBANES, Mr. GLENN, Mr. PELL, Mr. LEAHY, Mr. D'AMATO, Mr. GARN, Mr. HELMS, Mr. DOMENICI, Mr. ZORINSKY, Mrs. HAWKINS, Mr. WILSON, Mr. BOSCHWITZ, Mr. COHEN, Mr. DODD, Mr. BUMPERS, Mr. HUMPHREY, and Mr. MURKOWSKI) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 201

Whereas the accumulated evidence indicates that the Soviet Union is engaged in the use and/or provision of chemical warfare agents in Southeast Asia and Afghanistan;

Whereas this finding is based upon investigations conducted by the United States Government and by other governments and international organizations such as the United Nations and the governments of Canada and France; and,

Whereas such activities are in contravention of arms control agreements signed and ratified by the Union of Soviet Socialist Republics: Therefore, be it

Resolved, That it is the sense of the Senate that the United States should immediately seek to:

(a) urge that other governments carefully assess the evidence and, where possible, conduct their own independent investigations of suspected chemical warfare;

(b) assist the United Nations to gain unhindered access for United Nations investigators to areas where chemical and toxin weapons use is suspected; and,

(c) negotiate with the Soviet Union and other nations the strengthening of existing agreements on chemical, biological and toxin weapons so as to provide effective mechanisms for assuring compliance, to include provision for on-demand, on-site inspection when necessary.

YELLOW RAIN: RESOLUTION ON CHEMICAL AND TOXIN WARFARE

Mr. PRESSLER. Mr. President, today I offer a resolution on the use and/or provision of chemical and toxin warfare agents by the Soviet Union. Joining me as principal cosponsor is Senator PERCY. A large number of other Senators have joined as original cosponsors of the resolution, including Senators DOLE, SARBANES, GLENN, PELL, LEAHY, D'AMATO, GARN, HELMS, DOMENICI, ZORINSKY, HAWKINS, WILSON, BOSCHWITZ, COHEN, DODD, BUMPERS, HUMPHREY, and MURKOWSKI.

The Foreign Relations Subcommittee on Arms Control which I chair has held a series of hearings, beginning in 1981, on the suspected use and/or provision of chemical warfare agents. The tone of testimony received at the first hearing in November 1981, and at the last hearing in late February 1983, is dramatically different. Over that time period, the United States and other governments—including the United Nations—have intensified their efforts to gather evidence on reports of chemical warfare in Afghanistan and in Southeast Asia.

As the evidence and reports have grown, the case pointing to Soviet culpability has become compelling. We in the Senate must make our views known on this unacceptable situation. The victims of this form of combat are most often simply peasants. As Dr. Amos Townsend of the International Rescue Committee pointed out in testimony to the subcommittee on February 24, 1983, the very young and the old have suffered the most from chemical warfare.

Let me note that while opinion on U.S. Government charges of chemical warfare was highly divided at the November 1981 hearing, the new body of carefully analyzed evidence has convinced many former skeptics.

Doubters now can review alternative sources of analysis in addition to that provided by the Secretary of State in two extensive reports issued in March 1982 and in November 1983. The Canadian Government has issued a total of four reports to date. Its detailed conclusions have swayed the thinking of several witnesses who testified at our hearing in February. France has conducted its own investigation. While the French Government has chosen not to release a report at this time, Foreign Minister Claude Cheysson has stated that French investigators have confirmed the findings made by the United States. Cheysson delivered this statement in Bangkok on March 26, 1983. The Thai Government has adopted a parallel view.

The United Nations has investigated charges brought by the United States on the uses of chemical warfare for several years. Unfortunately, the U.N. team's efforts have been hampered by the interference of a senior Soviet United Nations official and by the refusal of the Governments of the Soviet Union, Vietnam, Cambodia and Laos to cooperate. Despite these obstacles, the U.N. investigatory team has produced an interim report, published at the end of last year. That report provides support for charges that chemical and toxin weapons are, indeed, being used in Southeast Asia.

In the wake of growing evidence that chemical warfare agents are being employed, the U.N.'s membership voted overwhelmingly in favor of continuing the investigation of these illegal and inhumane incidents. We should applaud the world community for acting as it has, despite Soviet and East bloc efforts to kill the investigation. Moreover, the United Nations, operating through the Secretary General, has moved to transfer control away from the Soviet Undersecretary General who sought to block the process. Henceforth, the investigatory effort will come under the direct guidance of the Secretary General. This will make it difficult for the Soviets to manipulate the process, and it will assure the quick and impartial consideration of charges of chemcial warfare.

Mr. President, the United States must now work with the United Nations and with other nations to assure that U.N. investigators gain unimpeded access to the areas where chemical warfare is reported.

It is important to note that this form of warfare is not only inhumane, but it is also outlawed by agreements signed by the Soviet Union. By using and/or providing chemical warfare agents, the Soviet Union is in flagrant violation of arms control agreements: the 1925 Geneva protocol and the 1972 Biological and Toxin Weapons Convention. Such action threatens the prospects for significant arms control. If we are to avoid nuclear destruction, we must have such accords, and all parties to international agreements must abide by their terms.

It is deplorable to find that many of those who advocate rapid progress at the negotiating table are silent on these treaty violations. Such silence in no way serves the interests of international security and of progress through negotiations. If arms control agreements are to have value, those who break treaties must, at a minimum, suffer the outrage of both domestic and international opinion. Internationally, this situation has improved as is evident by the Canadian and French findings and by the votes and report issued in the United Nations. But much remains to be done. Other governments must declare their outrage. If they are dissatisfied with our assessments, let them conduct their own independent inquiries. Domestically, those who wish to advance the cause of arms control must be outspoken on these incidents. Silence does not serve our interests.

At the last hearing on this issue, entitled "Yellow Rain: The Arms Control Implications," the testimony suggested to me that while the growing evidence on yellow rain should make us cautious in proceeding with arms control agreements with the Soviet Union, we must proceed toward arms control. What is needed in making arms control effective are stringent means for verifying compliance with treaties. In the case of the 1925 and 1972 agreements, there are no such verification provisions. It is this lack of verification requirements—including onchallenge rights of inspection—that allows the Soviet Union and its allies to continue this form of behavior with little check. We must urge that verification requirements for these accords be strengthened.

The best place to negotiate such arrangements is within the Committee on Disarmament in Geneva. That body includes representatives from the world's developing nations. These nations have every right to be involved in these negotiations, since these nations have been the battleground for the use of chemical and toxin weapons.

The use of chemical and toxin weapons continues to this day. There is little to indicate a reverse in this trend. Today, the Acting U.S. Permanent Representative to the United Nations will submit recently analyzed evidence on this deadly form of warfare to the Secretary General. I urge Senators to read this report.

Mr. President, the issue raised by this resolution must be the concern of every American and every Senator. The use of chemical and toxin weapons must stop. Protest against this unacceptable form of behavior is not an issue for partisan politics. It must be everyone's position that the use of yellow rain cease immediately. I urge every one of my colleagues to make their concerns known by joining as cosponsors of this important resolution.

Mr. President, I ask unanimous consent that the following materials be printed in the RECORD: The report

being submitted to the U.N. Secretary General together with the letter of transmission; a U.S. Government paper submitted on July 5, 1983, to the Committee on Disarmament on procedures for onsite verification of a chemical weapons ban; and an article from Science magazine summarizing the conclusions of the United States, Canadian, and United Nations yellow rain investigations.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. GOVERNMENT COVER LETTER TO U.S. SECRETARY GENERAL—AUGUST 4, 1983

The Acting Permanent Representative of the United States of America has the honor to submit a further report on the use of chemical and toxin weapons which contains new evidence available to the United States. It is based on the scientific analysis of a series of blood samples drawn from victims of earlier toxic attacks in Laos that were frozen for future analysis, as well as blood samples drawn from victims of a toxic attack in Kampuchea in March of this year.

The United States, over the past three years, has submitted a series of reports presenting the evidence in detail and continues to be deeply concerned over the use of chemical and toxin weapons in flagrant violation of international conventions and international law. In view of the concerns of members of the United Nations as expressed in General Assembly resolutions 35/144C, 36/96C, 37/98D, and 37/98E, and in view of the study presently being conducted under your direction on means of dealing with allegations of use of chemical, biological, and toxin weapons, it is requested that the enclosed report be circulated at an early date as an official document of the General Assembly.

FURTHER REPORT ON USE OF CHEMICAL AND TOXIN WEAPONS—NEW EVIDENCE AVAILABLE TO THE UNITED STATES

The United States continues to receive and analyze disturbing evidence and reports of use of chemical and toxin warfare agents in Laos, Kampuchea and Afhganistan. The use of these weapons is a flagrant contravention of two major international agreements and customary international law.

In an ongoing effort to call world attention to the problem, and to secure a halt to the use of those weapons, the United States has periodically released its evidence. Over the past two years, biomedical samples (blood, urine, or tissue) from victims have been analyzed in American laboratories for the presence of T2 and HT2 trichothecene toxins. To date, biomedical samples from 20 victims of eight separate toxin weapon attacks in Laos and three separate attacks in Kampuchea have been shown to contain trichothecene toxins. Control samples, taken from similar individuals who had not been subjected to toxin agent attack, were negative. Additional samples from victims and controls have been collected over the past year and are currently under analysis employing newly developed, more sophisticated, increasingly sensitive, state-of-the-art techniques. The complexity of trichothecene analysis in biomedical samples has necessitated development of new techniques and analytical procedures, a lengthy and tedious process. The levels of trichothecenes detected cannot be attributed to any known natural phenomena. Previously reported analysis results of biomedical and other data may be found in earlier United States submissions.

The following is an account of the results of the analysis of four additional sets of blood samples.

* * * * *

On November 6, 1981, a Lao resistance fighter was injured by a toxic agent grenade in northern Vietiane Province of Laos. Following the blast he experienced severe eye irritation and tearing and was blinded for approximately 30 minutes. Within a few hours, and continuing over a period of several days, he experienced the development of hundreds of small (2 to 5 mm) fluid filled blisters on the exposed areas of his upper torso and edema of the head and neck.

He was assisted to the Nong Khai Hospital in Thailand where the camp physician and a U.S. physician examined him on November 11 (5 days after the attack) and noted the blisters and mild conjunctivitis in both eyes. Blood samples were drawn at that time, chilled and maintained on ice during transit to the U.S., and frozen for future analysis.* Two blood samples, analyzed at the U.S. Army Chemical Systems Laboratory for the presence of traditional chemical agents, were negative for such agents. Three blood samples were submitted to a private U.S. laboratory for analysis by gas chromatograph-mass spectrometer (GC-MS) technique for the presence of trichothecenes. Detectable levels of T2 and HT2, a metabolite of T2, were found in all three samples of the victims' blood as follows:

[In parts per billion]

	T-2	HT-2
Sample No.:		
1	9	6
2	10	6
3	9	5

* * * * *

On 24-26 March 1982, at the Nong Khai refugee camp in Thailand blood samples were drawn by U.S. and camp medical personnel from H'Mong refugees who reported symptoms as a result of exposure to aircraft-delivered toxic agent warfare attacks in Laos on the 3rd, 11th and 16th of January 1982.

Symptoms reported by the victims included: headache, nausea, vomiting with blood, diarrhea with blood, weakness, vertigo, drunklike sensations, and visual disturbances. As a result of the attacks, of 154 people involved, 44 died within 2 to 5 days of exposure. Analysis of a blood sample from one of the surviving victims, a 10-year old boy, for T2 and HT2 trichothecene toxins revealed the presence of 32 ppb HT2. This victim also was suffering from malaria and showed a depressed white cell count of 4,200. The blood samples were handled in the same manner as above, and analysis was performed at the same private U.S. laboratory using identical GC-MS techniques.

Also on 24-26 March 1982 at the Nong Khai camp, blood samples were drawn from four H'Mong who had been exposed to attacks on 15 February 1982 in Laos. The survivors reported that two attacks were directed against several villages with a collective death count estimated to be between 85-100 people. Most of the villager's chickens and half of their pigs also died. Rice, tapioca, and other crops were affected as well. Symptoms reported by the victims included: fever, headache, nausea, vomiting, diarrhea, double vision, coughing, chest pain, eye irritation and tearing, hearing difficulty, fatigue, and jaundice.

Blood samples from these victims were handled and analyzed as with the others, for the presence of T2 and HT2 trichothecene toxins. The blood of one of the victims showed the presence of 28 ppb T2 and 16 ppb HT2 toxin. This individual, a 35-year old male, had also been exposed to a previous toxic agent attack in mid-December 1981.

Blood was drawn at the same time from three control individuals in the camp who had not been subjected to a toxic agent attack. These control samples were analyzed for T2 and HT2 trichothecene toxins with negative results.

* * * * *

On March 20, 1983, at Khao Din refugee camp in Thailand, near the Kampuchean border, three young Kampuchean women aged 18, 19 and 25, complaining of effects of a toxic agent, were examined by physicians. The three victims complained of symptoms typical of past trichothecene toxin exposure victims. They had become ill on March 9 after passing through an area in Kampuchea reported to have been subjected to a toxic agent attack on March 4 and 5. Blood samples were drawn from each victim and from two control individuals who were living in the same area under the same conditions as the victims, but who had not been exposed to any toxic agent.

The blood samples were analyzed by a private United States laboratory for the presence of T2 and HT2 toxins. One of the victims still had detectable levels of both T2 and HT2 (19 ppb T2 and 32 ppb HT2 respectively) in her blood. Blood samples from both control individuals were negative for both toxins.

* * * * *

All samples were submitted on a blind, coded basis to a private United States laboratory. Blood samples were precipitated with acetone and filtered. The filtrate was evaporated to dryness, dissolved in methanol: water (1:19, v/v) and passed through a XAD-2 column. The 90 percent methanol eluate was collected and dried on a steam bath. The samples were analyzed on a HP-5985B gas chromatograph-mass spectrometer data system.

ILLUSTRATIVE ONSITE INSPECTION PROCEDURES FOR VERIFICATION OF CHEMICAL WEAPONS STOCKPILE DESTRUCTION

(Figures and charts do not appear in the RECORD)

I. INTRODUCTION

Procedures for destruction of chemical weapons, and for verification of the destruction, have been discussed in general terms in a number of working papers. A recent U.S. paper (CD/CW/CTC 28; 11 January 1983) contains U.S. views on general verification procedures.

However, the course of the negotiations has shown that a common approach to verification of stockpile destruction cannot be achieved through a discussion of concepts and general principles alone. It is necessary

*Due to the volume of samples received and the limited capacity of the laboratories conducting the analyses, it has been necessary to freeze some biomedical samples while higher priority samples were analyzed. Since only one victim was sampled in this attack, it initially received a low priority.

to understand how the approaches proposed would actually be carried out in practice.

The purpose of this paper is to facilitate further negotiations by illustrating in concrete terms how the U.S. approach to verification of stockpile destruction would work. For the purposes of illustration, we have chosen a specific destruction facility already operating in the U.S., the Chemical Agent Munitions Disposal System (CAMDS). The paper outlines possible verification measures for this facility.

The specific procedures outlined here are preliminary, illustrative, and tailored to a specific facility. While the concepts and general principles would be applicable to any facility, the actual procedures must take into account both the characteristics of a facility and of the items being destroyed. Thus, the procedures employed at another facility could be somewhat different.

II. OVERALL DESCRIPTION OF THE CHEMICAL AGENT MUNITIONS DISPOSAL SYSTEM (CAMDS)

The Chemical Agent Munitions Disposal System (CAMDS) is an industrial-size prototype facility for destruction of chemical weapons and storage containers filled with mustard agent or the nerve agents GB or VX. The facility is located on the grounds of Tooele Army Depot; the site is approximately 45 road miles southwest of Salt Lake City, Utah.

CAMDS, which began toxic operations in September 1979, is being used to develop and demonstrate technology for demilitarization of toxic chemical munitions and to obtain technical data from which other similar plants can be designed and built.

Current activities are devoted to completion of a Technical Data Package for use in the design and construction of the first full-scale U.S. disposal facility, to be located at Johnston Atoll in the Pacific. This planned facility, which might begin operations in the late 1980s, would have a destruction capacity two-to-five times greater than CAMDS.

CAMDS was designed to destroy mustard agent by incineration, GB by reaction with sodium hydroxide solution, and VX by treatment with chlorine. However, the experience obtained to date at CAMDS suggests that incineration is the method of choice for all three agents. Explosives and propellants are thermally destroyed. Inert components and metal parts are mechanically demilitarized and decontaminated by heat treatment. In view of the dangerous materials involved, the entire facility is highly automated and designed for remote handling of items being destroyed.

Figure 1 provides a diagram of the CAMDS facility.

III. INCINERATION OF CHEMICAL WEAPONS

Incineration has several advantages over other methods for destruction of mustard agent, GB, and VX. Use of a common destruction method can reduce costs considerably by eliminating the need for different sets of process equipment. Furthermore, incineration produces less salt waste products to be disposed of than the chemical treatment processes do. From an arms control standpoint, incineration is preferable since it destroys the characteristic carbon-phosphorus bond of the nerve agents, thereby ensuring that the salt product cannot be recycled.

Chemical agent can be incinerated without first draining it from a munition or bulk container. This approach, called *in situ* incineration, is used at CAMDS for destruction of mustard agent. In principle, GB and VX could also be destroyed by this method.

Alternatively, the chemical agent may be drained from a munition or container and then injected into an incinerator. The metal component would be passed through the incinerator or separate metal parts furnace. This approach allows greater control of the incineration process and is being investigated at CAMDS for destruction of GB an VX. A similar process was used for destruction of mustard agent at Rocky Mountain Arsenal (see document CCD/436).

Since the two incineration processes present somewhat different verification tasks, they are described in detail separately below. Illustrative verification procedures, based on U.S. experience at CAMDS, are outlined in Section IV.

A. In situ incineration

Figure 2 provides a schematic diagram for destruction of chemical weapons by means of in situ incineration. As indicated, the sequence of steps varies somewhat depending on whether the items being processed are in bulk storage (such as "ton" containers—commercial chemical shipping containers which hold approximately one ton of material), in munitions containing explosives, or in munitions without explosive components.

Munitions of all types and bulk containers are moved in a special van from a nearby storage area to a revetted munitions holding area on the CAMDS site. This holding area is designed to store approximately a one-day supply for destruction operations.

As needed, munitions are transferred with a special transporter vehicle from the munitions holding area to the unpack building area of CAMDS. Here munitions are removed from their shipping and storage containers and prepared for the demilitarization process. The unpack area at CAMDS has a number of different configurations for handling bulk containers and different munition types (i.e., 115mm rockets, mines, 105mm burstered projectiles—i.e., 105mm burstered projectiles containing an explosive charge to burst open the munition—105mm non-burstered projectives, 155mm burstered projectiles, 155mm and 8-inch non-burstered projectiles, 4.2-inch mortar cartridges).

From the unpack area, all munitions containing explosives travel to the explosive containment cubicle, where explosive components (e.g., propellant; fuse; burster) are removed. These components are destroyed by incineration in a deactivation furnace. Next, the munitions are transferred by conveyor to the projectile disassembly facility. Munitions without explosives are sent directly to this facility from the unpack area, bypassing the explosive containment cubicle.

In the projectile disassembly facility munitions are processed through a device which removes the nose closure from non-burstered projectiles and pulls the burster well from all items ("burster well removal machine"). It can also be used to drain GB and VX from the projectiles.

For in situ incineration, the projectiles coming from the projectile disassembly facility are loaded into an "egg-carton" tray. (This tray holds 48–75 items, depending on the type of item.) The projectile-filled tray is transferred into the metal parts furnace on a small charge car. Bulk items, which arrive directly from the munition holding area, are also placed on a wheeled platform ("charge car") for transfer into the furnace.

The metal parts furnace processing system includes a rotary hearth furnace, a primary fume burner, an auxiliary fume burner, and equipment for removing destruction products from the exhaust gases. The furnace is made up of three chambers: a punching chamber, a chamber for controlled volatilization of agent, and a final burnout chamber for incineration of any agent remaining on metal parts.

In the punching chamber, holes are made in a ton container to permit release of agent vapor during the volatilization process. Other bulk items and projectiles are handled without punching. The punching chamber serves only a vestibule in this case.

In the volatilization chamber the item is heated to 600–900 degrees Fahrenheit to vaporize the agent. An oxygen-deficient atmosphere is maintained to avoid combustion at this stage. After the temperature/air flow profile indicates that vaporization is complete, the charge car is moved to the burnout chamber. In this chamber metal parts are maintained at 1000 degrees Fahrenheit or higher for 1–4 hours to complete the destruction of any small remaining quantities of agent or degradation products.

Detoxified scrap metal parts are removed from the furnace by the discharge car and transferred to the cooling chamber. After the scrap is cooled and certified free from agent it is loaded into trucks using a remotely operated crane and hoist. (Although 115mm rocket casings are destroyed by sawing or shearing while being processed, most metal items emerge basically intact.)

Agent fumes from the punching chamber and the volatilization chamber are incinerated in the primary fume burner. This chamber is operated with a flue gas temperature of 1450–1600 degrees Fahrenheit and provides a minimum residence time of 0.5 second.

Fumes from the burnout chamber, as well as the flue gases from the primary fume burner, pass through the auxiliary fume burner. This burner operates with a flue gas temperature of 1600 degrees Fahrenheit; the minimum residence time is 0.5 second.

Flue gases from the auxiliary fume burner are processed through a scrubber system, which removes agent destruction products, and are eventually exhausted to the atmosphere. The scrubber solution is evaporated to dryness, leaving a salt residue which is stored in drums for future disposal.

B. Injection-method incineration

Tests of this method are currently being conducted at CAMDS for destruction of GB and VX. It differs from the in situ method in that metal parts and agent are incinerated separately. Figure 3 provides a schematic diagram.

Projectile processing is the same as for the in situ method until the point at which the burster well has been removed in the projectile disassembly facility. At this stage agent is removed through a suction probe lowered into the projectile. This agent is drained into an agent holding tank, while the metal parts are processed through the metal parts furnace system.

Bulk items arriving from the munition holding area are drained in the bulk item facility area of the projectile disassembly facility. The metal parts are subsequently processed through the metal parts furnace system, while the agent is piped into an agent holding tank.

Agent from the holding tank is injected into a furnace, through a probe, onto a hot metal surface. The agent flash vaporizes and is processed through a fume burner and scrubbing system very similar in situ incineration. (For the CAMDS tests the metal parts furnace is being used. However, the

Johnston Atoll destruction facility now being designed includes a separate liquid incinerator.)

IV. ILLUSTRATIVE ONSITE INSPECTION PROCEDURES

Previous discussions have led to agreement that verification procedures for destruction of declared stocks should be designed:

To confirm the identity and quantity of the materials destroyed; and,

To confirm that the materials have actually been destroyed. In this respect, it would be important to confirm that the process destroyed the materials completely and that nothing was diverted in lieu of being processed.

Specific onsite monitoring and inspection procedures which might be used at the CAMDS facility to carry out these verification tasks are discussed below. While these procedures are designed for a specific facility, they incorporate several general principles which are applicable to any process for chemical agent destruction:

A combination of human inspection and monitoring with sensors is necessary for effective verification;

A detailed engineering review of the facility by international verification personnel, including onsite inspection, is necessary before destruction operations begin:

Inspection must be continuous during periods in which destruction operations are underway;

Inspectors must be qualified personnel and have a comprehensive, up-to-date knowledge of the design and operation of the destruction facility;

Inspectors must be permitted to confirm the validity of all data used for verification purposes;

To ensure confidence, data used for verification should be as closely linked as possible to the actual destruction step;

Monitoring and inspection procedures should be designed to minimize interference with the operation of the destruction facility, while providing effective verification;

To the extent consistent with verification needs, monitoring and inspection procedures should make use of data generated during routine facility operations;

To the extent consistent with verification needs, common procedures should be used for different destruction processes within the same facility;

Close cooperation between international verification personnel and host state operating personnel is important for effective international verification.

In situ incineration at CAMDS

Figure 4 outlines the verification procedures discussed below.

For all liquid agents, including GB and VX the identity and purity of the material being destroyed could be confirmed by sampling it immediately before the item enters the metal parts furnace system and analyzing the sample automatically with an on-line, dual-column gas chromatograph. At CAMDS samples could be taken from munitions with the automatic drain probe already built into the machine used to remove buster wells and drain projectiles. For bulk items, a slight modification of the operating sequence would be needed. Rather than transporting the item directly from the munition holding area to the metal parts furnace, the item would go first to the area equipped for draining bulk items. A sample could be obtained using the draining lines. The sample would be analyzed automatically with an on-line, dual-columngas chromatograph. A different sampling procedure would be needed for mustard agent, since the pure agent is a solid up to about 15 degrees Celsius. One possibility would be to sample and analyze volatilized agent where it enters the primary fume burner. (This procedure would be unsuitable for the nerve agents since they already decompose at this stage.)

Since only one agent and one type of item would be processed during a given period, the same gas chromatograph could probably be used for all analyses, although it might have to be shifted from one part of the facility to another, depending on what was being destroyed. (Such an analytical system is not currently installed.)

The quantity of material destroyed could best be determined by weighing items (projectile-filled trays or bulk containers) immediately before and after passage through the metal parts furnace. The item to be weighed should be placed on a support containing an accurate load cell. The measured weight difference should be cross-checked against the value expected from the calculated content of the item. The number of items should be measured by mechanical or electronic item counters and visual observation at the same points as the weight is determined. (While current capability exists for counting the number of items, current weighing capability is only partial and approximate.)

Confirmation of actual agent destruction should rest on confirmation: (a) that the conditions in the destruction step are sufficient to destroy the material completely and (b) there are no pathways for diversion. In addition, the waste materials should be subject to sampling and analysis on a random basis to ensure complete destruction.

For CAMDS the key parameters of the agent destruction step which should be measured are the temperature-time profile of the volatilization chamber, the temperature of the primary fume burner, and the rate of the air flow through the primary fume burner (i.e., the residence time of agent). Temperatures would be measured by thermocouples; flow rates by orifice plates. These instruments are already used for process monitoring. The absence of diversion pathways could be confirmed by conducting an egineering inspection of the facility before destruction operations begin, television and direct surveillance of key process areas, particularly during shut-down and maintenance periods, and periodic reinspection.

Data from each sensor, including television cameras, would be transmitted to a central monitoring station in the control room and recorded to provide a permanent record.

To ensure that metal parts, such as shell casings, could not be reused, they should be destroyed by punching, sawing, or crushing. Confirmation would easily be obtained by visual observation of the scrap metal parts emerging from the destruction step.

Injection-method incineration

Figure 5 provides an outline of the verification procedures discussed below.

For this process the identity and purity of the material being destroyed should be confirmed by taking a sample close to the inlet of the liquid incinerator and analyzing the sample with an on-line, dual-column gas chromatograph. (Such a system is not currently installed.)

The quantity of agent being destroyed would be determined by using an accurate flowmeter near the inlet of the liquid incinerator. However, uncertainty exists about whether sufficient accuracy is possible. If not, it would be necessary to weigh items, using load cells, before and after they were drained and to establish, through inspection, that no diversion pathways existed. A system would be incorporated to detect efforts to cut into the agent drain line ("continuity check").

Methods for confirming actual destruction would be similar to those for the in situ process; thermocouples would be used to measure the time-temperature profile of incinerator, and the flow rate through it would be determined with an orifice plate. The destruction of metal parts would be monitored visually.

The measures necessary to ensure security of data, including the use of television surveillance systems at key points, are discussed in Section V below.

Inspectors

The verification procedures described above are intended to provide an optimum balance between monitoring with sensors and inspection by verification personnel. To some extent, use of sensors can reduce the inspection burden. However, continuous presence of inspectors during periods of destruction operations is essential for accomplishing certain technical tasks, particularly visual surveillance and ensuring that automatic sampling and analysis equipment is operating properly.

The functions described above would require a minimum of two inspectors to be present during each operating shift to monitor data from sensors and to conduct visual surveillance and at least one during each maintenance shift. During non-working shifts, sensors such as film cameras triggered by motion in the field of view or television cameras would suffice.

CAMDS has a 10-hour operating shift and a 10-hour maintenance shift, followed by a 4-hour non-working shift. Thus, for CAMDS, a minimum of three inspectors present for duty would be adequate. To accommodate illnesses and other absences from duty, a slightly larger number would have to be assigned to the facility.

The inspectors should all have technical backgrounds, be familiar with CW destruction operations, and receive special training as inspectors.

V. ENSURING THE VALIDITY OF DATA USED FOR VERIFICATION

If states are to have confidence that declared stockpiles have been destroyed, they must have confidence that the data used for verification are valid. To ensure validity of the data, inspectors at CAMDS would have to be able to inspect the facility before it began destruction operations and to participate in all calibration of thermocouples, load cells, flowmeters, gas chromatographs, and any other sensors, as well as observe closely their installation and daily operation. (Recalibration of instruments and reinspection of the process equipment would be required whenever the process is shutdown for an appreciable time.) Furthermore, safeguards must be incorporated in the sensor systems to protect against efforts to tamper either with the sensors themselves or the data transmitted from them.

Equipment security

The security of the monitoring equipment itself would be ensured by a tamper-detecting design of each item. In effect, certain key components, such as signal-generating circuitry, would be enclosed in a box which

protects the sensor against mechanical or electronic interference. Attempts to remove the box would disturb microswitches which would set off alarms to alert inspectors; if an attempt were made to cut off a segment of the protective containers without interfering with the microswitches, the tampering would be detected during the visual inspection of the equipment. Tampering with the microswitches would also cause the erasure of information used to "authenticate" the data. ("Authentication" is discussed below.)

Tampering with the sensors might also be attempted through electromagnetic radiation. Protection against this would be accomplished by placing proper shielding inside the tamper detecting enclosure.

For each sensor, the status of the protective container, as well as the operating status of the equipment, would be monitored electronically by inspectors from the CAMDS control room.

Data security

The volume of data generated from the various sensors and transmitted to the inspectors' monitoring station in the CAMDS control room would be small. Measurements would be made infrequently (for example, only once every few minutes). Therefore, a relatively simple data transmission system would be adequate. Either radio frequency or cable transmission links could be used.

To assure the integrity of the data during transmission, the data would be converted from analog to digital form whenever necessary and an "authentication" scheme would be adopted. Data would not be encrypted, but a unique identifier would be added to each group of data points transmitted. This identifying "tag" would be generated by the monitoring system. Any attempt to alter the data during transmission would be detected at the central monitoring station since it would cause a mismatch between the expected and received "tag". (Although encryption is not necessary in this case, it is a valuable method of ensuring integrity of data which may be useful under circumstances other than those described here.)

The availability of low-cost microprocessors means that such data authentication procedures can generally be carried out without substantially increasing the cost of the monitoring system. Inside the tamper-indicating enclosure of each sensor, a microprocessor would control the data collection function of the sensor, the authentication procedure, and the communications between each sensor and the central monitoring station.

However, in the case of television cameras, the amount of data generated is very large compared to that produced by other sensors. The cost of authenticating television images would be substantial. A less expensive solution to ensuring data integrity would be to enclose the television camera in a tamper-detecting box. This would ensure that the camera itself and its field of view are not tampered with. Proper shielding of the coaxial cable between the camera enclosure and the video recorder in the central monitoring station, along with a simple sensing circuit to detect attempts to cut into the cable, would be sufficient to detect any effort to interfere with data transmission.

Security of the central monitoring station would be achieved by enclosing data readout and recording devices in tamper-indicating containers when inspectors are not physically present.

Other data security considerations

The integrity of data from senors cannot always be ensured simply by ensuring the integrity of each sensor and of the transmitted data. For example, load cells and item counters could be manipulated mechanically to produce false data. A weight determination could be made either too high or too low by exerting force mechanically on a load cell when an item was being weighed. For this reason, visual surveillance of the weighing and counting equipment, using closed circuit television, is necessary.

Protection against deceiving a single sensor at a given time would be achieved by coordinating the operation of more than one sensor. For example, a projectile on a conveyor belt would trigger an item counter; in turn, signals from the counter would cause the activation of the television surveillance system at key points while also alerting other process monitors along the path of the projectile. Since it would be known what activities and data values are to be expected during the destruction process of the projectile, the appropriate sensors for these activities should give readings within a known range and time period.

Any sensor not recording the appropriate information within the normal time period would cause an alert in the monitoring system. Reactions to such alerts are part of the operating procedures of the inspectors. Such reactions would be determined by categorizing the various possible alerts into levels of significance. In turn, the significance of each alert would be related to the impact it has on the verification system.

Effective monitoring might also be prevented if a key sensor fails to work properly. Therefore, the overall data collection system for monitoring the destruction of chemical stockpiles must be designed either with redundancy of sensors or redundancy of coverage or both. Redundancy of coverage means that information about any process step can either be collected with the corresponding sensor or it can be deduced from information collected by sensors at other steps of the process; redundancy of sensors means that every sensor is duplicated. Sensor duplication is feasible for inexpensive items such as temperature sensors or flow meters; however, it becomes impractical for such large items as television systems and gas chromatographs. The preferable approach, which is the basis for the procedures described in this paper, is to have redundancy of coverage whenever feasible so that no single monitoring step becomes a critical one. The development, therefore, of the monitoring system involves two major components: secure and reliable sensors and an effective system design.

[From Science, Dec. 17, 1982]

A CLOUDBURST OF YELLOW RAIN REPORTS

(By Eliot Marshall)

(U.N. and Canadian investigators agree that chemical weapons are being used, but fail to endorse the U.S. discovery of mycotoxins.)

Two State Department officials lifted a large box onto the dais during a news conference on 29 November, pulled off a cardboard sheath, and revealed the most photogenic evidence produced so far in the investigation of chemical warfare in Asia. It was a Soviet gas mask, allegedly retrieved by a covert agent in Afghanistan in September 1981. The headpiece is apparently still contaminated with the fungal toxin T2, the suspected active ingredient in yellow rain.

The cameras clicked. The reporters murmured. And an official said no one need be afraid because the mask was sealed in an airtight container. One reporter gibed at the speaker, Robert Dean, deputy director of the Bureau of Politico-Military Affairs: "Why don't you slip it on for us, Bob?"

So went the latest and most disturbing briefing in America's effort to persuade the world that the Soviets are using outlawed chemical weapons in Southeast Asia and Afghanistan. It preceded by one week the release of a less dramatic United Nations (U.N.) report, the product of 2 years of research, titled, "Chemical and Bacteriological (Biological) Weapons Report of the Secretary General." The U.N. investigators found two charges to be "well supported." These were claims by refugees that "harassing agents" were used against resistance fighters in Afghanistan and that "some toxic material" was used against the Hmong people of Laos. The U.N. team found no proof that fungal poisons (mycotoxins) were involved. But it also rejected a Soviet thesis (Science, 2 July, p. 32) that mycotoxins spread through Southeast Asia after the United States seeded the area with elephant grass.

American officials expected the U.N. report to be equivocal, and they took pains to lay out their own strongest evidence a week in advance. Dean told the reporters that "all the relevant government agencies" are now convinced that the Soviets and their allies are engaged in chemical warfare. The government claims to have "conclusive evidence" that compounds forbidden by the 1925 Geneva Protocol and by the 1972 Biological and Toxin Weapons Convention—including the tricothecene toxin T2—are being used in Laos, Kampuchea, and Afghanistan. The Soviet Union signed the 1972 treaty, which forbids not just the use, but the possession of biological weapons. The latest attacks occurred as recently as October in Laos and Kampuchea, Dean said. The State Department called the press conference to display the gas mask, one of two recovered from Afghanistan, and to release a new report to Congress and the U.N.

The bulk of the 12-page report lays out new and old evidence collected by U.S. intelligence agencies, including some findings produced by the analysis of blood, urine, and tissue samples taken from victims of gas attacks in Laos and Kampuchea. (The gas masks are the only physical evidence of chemical warfare in Afghanistan: given their origin, it is impossible to check on their *bona fides.*) Biological samples from 33 alleged victims in Southeast Asia have been screened, according to the report. "Specimens from 16 of these individuals show the presence of tricothecene mycotoxins." T2 and other tricothecene toxins have been found together in environmental samples collected at battle sites, apparently in combinations never seen in nature. Canadian and U.S. experts have concluded independently that these deposits could not have occurred naturally. The report says, "The finding of T2 toxin and HT2 toxin . . . in the blood, urine, and issue of victims of these attacks provides unequivocal evidence of their use as weapons."

The Soviet response, issued by Tass the next day, was that all of this is a "brazen lie" and "a propaganda screen behind which the Reagan Administration is pressing forward its large-scale program of preparations for chemical and bacteriological warfare."

With the superpowers engaged in a verbal brawl such as this, it is all the more impor-

tant that disinterested experts intervene. The credibility of the U.N. and of the general effort to control weaponry hangs in the balance.

There are signs that the U.N. may be ready to become more actively involved than it has been. The recent investigation was hampered by inadequate laboratory facilities, staff turnover, and poor data collection. On 26 November, the General Assembly voted 106 to 14 to call a special conference "as soon as possible" to review the 1972 toxin treaty and to design a new system for investigating complaints and checking on compliance. On 29 November, the General Assembly voted 71 to 18 to ask the director general of the U.N. to give chemical and biological warfare questions more visibility in the bureaucracy. In the past, such matters have been passed down to the disarmament staff. Now the director general has been asked to draw up a standing list of laboratories and experts competent to study these charges and to appoint a new investigative group responsible directly to him. Among the nations opposing both resolutions were Afghanistan, Laos, Vietnam, and the Soviet Union.

The only other relevant investigation was conducted last spring by several Canadian officials led by Lieutenant Colonel G. R. Humphreys of the military surgeon general's office in Ottawa. With another officer and some diplomatic officials, he spent a month interviewing victims of gas attacks in refugee camps and hospitals along Thailand's border with Laos and Kampuchea. The Canadians also collected samples, but the analysis may not be available for some time, because, a laboratory official says: "We don't want any mistakes."

Based on interviews and a reading of medical records, the Canadians concluded that chemical or biological agents are being used against unprotected troops and civilians in Southeast Asia. At least two different materials are involved, Humphreys says. One of them may contain mycotoxins. The other is a "knockout" agent. The Canadians saw and collected samples of yellow rain themselves, and Humphreys can testify to its devastating effects on Hmong villagers.

The Canadian report differs from the State Department's in two important respects. First, the Canadians found the American description of yellow rain poisoning to be exaggerated. Rather than producing immediate vomiting, hemorrhaging, and death, as claimed by the Americans, yellow rain was slow to produce effects and they seemed reversible, according to Humphreys. Those who died were chiefly the very young and very old who, in the absence of good medical care, became dehydrated by 10 or more days of vomiting and diarrhea. The Canadian description is compatible with the observed effects of tricothecene poisoning in laboratory animals.

Second, the Canadians concluded that a closely analyzed battle near Tuol Chrey, Kampuchea, exposed Khmer Rouge soldiers to a "highly potent" incapacitating agent, not yellow rain. The Canadians did not exclude the possibility that some mycotoxins were mixed with the knockout agent. This chemical did not appear lethal, Humphreys says, but did put soldiers out of action for several days. Humphreys is unequivocal: the substance used against the Khmer Rouge soldiers was not yellow rain but a volatile material suitable for use where friendly and hostile forces must operate in the same environment. This contrasts with the U.S. report, which stressed that the blood and urine of the Khmer Rouge victims at Tuol Chrey contained the mycotoxin T2, an alleged ingredient of yellow rain.

The State Department's November paper also emphasizes the fact that high levels of T2 were found in the stomach and intestine of a soldier who died a month after being exposed to the gas attack at Tuol Chrey. Humphreys found it "impossible to exclude blackwater fever [a variety of malaria] as a possible cause of death." Malaria is rampant among these soldiers. Another factor confuses the case. Humphreys believes the Khmer Rouge may suffer from the misuse of atropine, a drug commonly given by Khmer Rouge medics to soldiers who have been in chemical attacks. Atropine is an antidote only for classic nerve agents. If used wrongly, as Humphreys suspects may be the case here, it can produce a variety of bad side effects. One is the retention of urine. Blackwater fever also produces kidney failure. The soldier from Tuol Chrey, according to the Canadian report, died "in acute renal failure."

Thus, while the Canadian and U.N. inquiries give strong support to the charge that toxic sprays are being used in Southeast Asia, they leave unconfirmed the charge that the poison is specifically a mycotoxin. That uncertainty may end when the Canadian laboratory finishes its analysis of the 200 or so samples collected during Humphreys' visit to Thailand. Perhaps not. It is a good sign, in any case, that other countries have begun to examine the evidence.

Mr. PERCY. Mr. President, I join today with Senator PRESSLER and with a bipartisan group of Senators in offering a resolution expressing the sense of the Senate on the use and/or provision of chemical warfare agents by the Soviet Union.

Chemical warfare, called yellow rain by its unfortunate victims, is outlawed by international agreements that were signed and ratified by the Soviet Government. Such activities are not only inhuman and demand the condemnation of every American and every nation on Earth, but they raise serious questions about the Soviet Union as a negotiating partner. Moreover, we are dealing here not only with an issue of arms control, but of the most basic human rights.

The victims of this heinous behavior are more often the innocent rather than combatants. These weapons have killed and injured women and children. The H'mong tribes people who have suffered so often from other people's wars are today suffering again from these weapons. These unfortunate people wish nothing more than to be left alone to tend their simple farms. Instead, they have been vicously attacked for being in the way on a shifting battlefield. The tragedy is today being repeated throughout Southeast Asia and, thousands of miles away, in Afghanistan.

Despite new theories that claim that the presence of toxins can be explained by the activities of bees or by environmental processes, it seems strange that deaths are reported only in two areas of the world, Southeast Asia and Afghanistan. The only common thread linking these two widely separated areas is that of a Soviet presence or of Soviet involvement in conflicts in these regions. Moreover, the deaths have been associated with specific incidents involving witnessed attacks.

The Foreign Relations Committee held hearings on this important issue in November 1981 and most recently in February 1983. In the period spanning these hearings, the evidence indicating Soviet involvement in this form of warfare has continued to grow. I must say that the evidence is of such a scale that the case against the Kremlin is compelling. I also ask that Senators recall the incident in 1979 in the Soviet city of Sverdlovsk, suggesting Soviet manufacture of anthrax. Manufacturing biological agents, just as using chemical and toxin weapons, is outlawed by solemn international agreements ratified by the Soviet Union.

In neither case, yellow rain nor anthrax, has the Soviet Union or its allies provided the United States, U.N., or other investigators the right to examine the sites where incidents have occurred. Unfortunately, neither the 1925 Geneva protocol nor the 1972 Biological and Toxin Weapons Convention requires onsite inspection. There is an important lesson to be gained here for effective arms control. Agreements that are reached for agreement's sake, lacking solid systems of accountability, do not serve any nation's interests.

These incidents have placed a dark cloud over the Soviet Union and its accomplices in Southeast Asia and Afghanistan. They make it clear that arms control must have strong and effective provisions of verification. Arms control is an act of security. It cannot be a matter based on trust.

Mr. President, I urge every Senator to carefully review the story of "Yellow Rain" and to read the recently published Foreign Relations Committee hearings entitled, "Yellow Rain: The Arms Control Implications." As I have stated, the evidence is compelling. It comes not only from the U.S. Government but also from the United Nations and the Governments of Canada, France, and Thailand. There are also reliable and detailed independent accounts. An important role has been played by Dr. Amos Townsend, who has been in Southeast Asia for several years for the International Rescue Committee. In testimony before the committee, Dr. Townsend summarized the situation succinctly:

> Although individual cases may be in question from time to time, there is no question in my mind that chemicals, of more than one type, have been, and are still being used against Lao-H'mong and Khmer in Southeast Asia.

Other assessments arrive at the same conclusion with regard to Afghanistan.

I beleive that this is a significant resolution, and I hope that my colleagues will support it.

Mr. D'AMATO. Mr. President, I am pleased to join with my distinguished colleagues as an original cosponsor of this important resolution expressing the sense of the Senate concerning Soviet use of chemical and toxin weapons and Soviet supply of these weapons to its allies for their use. The gravity of Soviet violations of both the 1925 Geneva Protocol banning the use of chemical and biological weapons and the 1972 Biological and Toxin Weapons Convention which prohibits the mere possession of toxin weapons, as well as their production and use, cannot be overstated. It bears directly upon our current efforts to negotiate fair and verifiable strategic and theater nuclear arms accords with the Soviet Union. Indeed, it has the most serious implications for the entire spectrum of our relations with the Soviet Union.

I strongly support our efforts to secure Soviet adherence to the 1925 Geneva Protocol banning the use of chemical and biological weapons and the 1972 Biological and Toxin Weapons Convention which prohibits the mere possession of toxin weapons.

The United States has adhered to a unilateral moratorium on chemical weapons production for 14 years. We have destroyed all biological and toxin material we possessed as required by the 1972 Convention. We have attempted to secure a negotiated agreement with the Soviet Union to ban all chemical weapon production and storage. We have held 12 formal bilateral negotiating rounds with the Soviet Union on this issue since the mid-seventies. The result of these talks was a joint progress report to the United Nations Committee on Disarmament in July 1980.

This report addressed the scope of the proposed chemical weapons ban, the timing for its implementation, and some compliance issues, but avoided the tough questions of verification. In January 1981, the United States decided to take the issue before the Chemical Weapons Working Group of the U.N. Committee on Disarmament. Those discussions have gone nowhere. Despite Soviet hints at a more relaxed and forthcoming position on verification, no substantive proposals have been produced.

This issue is now critical, because there is very strong physical and anecdotal evidence of Soviet and Soviet-surrogate use of Soviet manufactured and supplied lethal chemical and toxin weapons in Southeast Asia and Afghanistan. The United States has formally charged the Soviet Union with violations of both the 1925 protocol and the 1972 convention. Details of the charges may be found in State Department special reports No. 8 and No. 104. Independent scientific authorities in France, Canada, Thailand, and other countries have endorsed our findings.

Chemical weapons and biological and toxin weapons are weapons of mass destruction, just as nuclear weapons are. The Soviet Union and its surrogates are using these weapons against hostile groups in both Afghanistan and Southeast Asia, indiscriminately killing noncombatants, including defenseless women and children. These attacks are reported to be continuing unabated, without regard to international protests.

This resolution provides a vital opportunity for the Senate to restate its urgent concern over this issue. First, it states that the United States should urge other governments to assess the evidence of Soviet and Soviet-surrogate violations and, where possible, to conduct independent investigations on their own of suspected chemical warfare. Second, it states that the United States should assist the U.N. in gaining unhindered access to areas where chemical and toxin weapon use is suspected. Finally, it calls upon the United States to negotiate with the Soviet Union and other nations the strengthening of existing agreements on chemical, biological, and toxin weapons so as to provide effective mechanisms for assuring compliance and to include provision for on demand onsite inspection when necessary.

These are all vital points. The evidence of systematic, repeated, massive, the continuing Soviet violations of both the 1925 protocol and the 1972 convention continues to grow.

Lethal chemical and toxin weapons are now being used to kill hundreds of thousands of people. Innocent civilians in Afghanistan, Laos, and Kampuchea are being murdered by chemical and toxin weapons which they do not even understand. The evidence clearly shows these weapons are being produced by the Soviet Union and are being employed by Soviet troops and by Soviet surrogates. The world must awaken to this horror and act to halt it now.

Only by focusing world opinion on this matter can we ever hope to affect Soviet behavior. Independent assessments and investigations by other nations and by the United Nations are the best way to do this. The provisions of this resolution are timely and worthy of immediate endorsement.

Strengthening existing agreements to provide mechanisms for assuring compliance is, however, the central issue here. Providing for on demand onsite inspection is the only way to insure that substantial violations of existing international agreements do not recur. The underlying problem is that chemical, biological, and toxin weapons are weapons of mass destruction. They are of great military significance and their development and production can be disguised as legitimate civilian chemical production or biological research. These characteristics stress the verification provisions of any treaty concerning chemical, biological, and toxin weapons very severely.

In this regard, our confidence in the Soviet Union as a negotiating partner in arms control efforts must be guarded until the issue of Soviet compliance with existing treaties is resolved. If they will not only violate with impunity an international arms control agreement, but will also make massive and repeated use of the lethal toxin weapons developed and produced in violation of this agreement to indiscriminately kill noncombatant men, women, and children as well as the resistance fighters who are their presumed targets, how much of a basis of mutual trust is there upon which to build new arms control agreements?

This resolution, when energetically implemented by the executive branch, will provide the Soviet Union an opportunity to show that it will accept the verification measures its present behavior makes necessary. The United States and the other members of the international community can only be confident that Soviet protestations of good will and peaceful intent are worthy of trust and are not merely the deceptive cloak of lies hiding Soviet development of prohibited weapons in search of significant military advantage if adequate verification measures are included in all proposed agreements. Verification provisions must be certain in their operation. They must be open and they must produce convincing evidence which may be freely and fully shared with the public.

While I am not committed to any single method of verification, the experience with Soviet noncompliance with arms control agreements they solemnly entered into with other nations forces me to require comprehensive, strict, explicit, and demonstrably effective verification measures as a basis for my support for any future arms control agreements involving the Soviet Union.

In closing, I most strongly urge my colleagues to study this issue with care and reflect upon it deeply. Defense and foreign policy issues bearing directly upon our future security and upon the preservation of world peace are raised by Soviet violations of chemical and toxin arms control agreements. Resolving these issues must become a high administration priority.

SENATE RESOLUTION 204—RELATING TO RAOUL WALLENBERG

Mr. LEVIN submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 204

Whereas Raoul Wallenberg accepted the request of the United States War Refugee Board and went to Hungary in the summer of 1944 as a Secretary of the Swedish legation;

Whereas Raoul Wallenberg, with unparalleled courage and selflessness, took creative and daring actions in rescuing nearly one hundred thousand Hungarian Jews from extermination at the hands of the Nazis;

Whereas the Soviet Union, after occupying Hungary, arrested Wallenberg on January 17, 1945, in violation of international law and the diplomatic immunity of Wallenberg, and without an explanation of the seizure and subsequent incarceration;

Whereas there is substantial evidence contradicting Soviet claims that Wallenberg died in 1947;

Whereas reports from former prisoners in the Soviet Union, suggest that Raoul Wallenberg is still alive; and

Whereas Raoul Wallenberg, on October 5, 1981, was only the second person ever granted honorary United States citizenship: Now, therefore, be it

Resolved, That it is the sense of the Senate that the President, acting directly or through the Secretary of State should take all possible steps at all appropriate times to ascertain the whereabouts of Raoul Wallenberg and to secure his return to freedom.

SEC. 2. The Secretary of the Senate shall transmit a copy of this resolution to the President with the request that the President further transmit such copy to the Ambassador of the Union of Soviet Socialist Republics to the United States.

Mr. LEVIN. Mr. President, today is Raoul Wallenberg's 71st birthday. Today we should be helping one of this century's greatest and most courageous humanitarians celebrate his 71st year. Larger than life, Mr. Wallenberg deserves a place of paramount respect in the annals of human history. But today, we do not even know where he is—we have not known what has become of him since his bogus arrest at the close of World War II. The lingering and haunting questions surrounding his life prompt me to introduce this resolution calling on the Soviet Union to provide accurate information about Mr. Wallenberg and to grant him his freedom.

Raoul Wallenberg was born in 1912 into a prominent Swedish banking family. As a young boy, he was afforded the luxuries of wealth, traveling extensively and receiving an excellent education. In 1935 he received an honorary degree in architecture from the University of Michigan. Upon his return to Sweden, Mr. Wallenberg began to pursue the family banking and commerce interests.

Working at a bank in Haifa, Israel, Raoul Wallenberg met Jews who had fled the terror and inhumanity of Nazi Germany. His perception of the Nazi horror was strengthened in 1944 when he was sent to Budapest to promote his family's business in exports. He soon learned that death was big business and that people, not goods, were being exported.

That same year, Mr. Wallenberg came to the attention of the U.S. War Refugee Board. Recognizing in him a rare combination of pragmatic businessman and moral idealist, the Board approached Mr. Wallenberg with a request. At their behest, he went to Hungary that summer ostensibly as a Secretary to the Swedish legation in Budapest. His real task was to oversee an operation whose purpose was to save as many Jewish lives as possible by any means possible.

Mr. Wallenberg entered into a world devoid of morality—a world where human life was an expendible commodity and extermination an accepted practice. He performed his task brilliantly in that depraved environment for less than a year, but he touched the lives of over 100,000 human beings. He created passports—paper pledges of protection issued in the name of the Swedish Government. He took those passports and distributed them to those who were about to be taken away, threatening the guards if they attempted to violate the protection that the passports promised. His schemes worked. People were pulled from cattlecars and death marches bound for concentration camps. They were escorted to a citywide network of houses and hospitals operating under the flag of the Swedish Government. Mr. Wallenberg made daily visits, and insured that ample supplies were provided.

During this period, Mr. Wallenberg did the impossible. He was possessed and inspired by vivid scenes of civilization turned inside out. As the Nazis stepped up their efforts to implement the "final solution," his resolve grew commensurately stronger.

His efforts did not end with the long-awaited defeat of the Nazis. Shortly after the Russian occupation of Hungary in January 1944, he met with high-level Russian officials. Hoping to persuade them to adopt this plan for rebuilding Budapest, both physically and psychologically, he arranged to talk with them. But there was no talk. But he was never allowed to lay his plan out. Instead he was arrested and imprisoned. No accusation, no trial, just a Moscow jail cell.

From scanty details, we have learned that the Soviets probably thought Mr. Wallenberg a spy, an agent of the American Government. They sought information from him—information he did not have. They sought confessions from him—confessions he could not make. And when they failed to get what they wanted, they decided to take what they could get. They decided to break him as they had broken so many others.

Consequently, he began a long journey which even now we do not totally understand. From scattered reports, it appears that he was transferred from one prison to another. But nobody could be sure because the Soviets refused to even acknowledge that they were holding him prisoner. As interest in his plight grew, however, pressure on the Soviets to account for him mounted.

Finally in 1957, they produced a document, signed by the current Foreign Minister of the Soviet Union, Andrei Gromyko. That document was intended to demonstrate that newly discovered records indicated that Wallenberg had been imprisoned but had died of a heart attack in July 1947. No death certificate could be produced and there was no explanation for his arrest. The document simply reported the death and blamed past misunderstandings and confusion on already discredited figures of the Stalinist regime.

Since then, the Soviets have held to their story and insist that they have no additional information.

But a substantial body of evidence has emerged that contradicts the official Soviet line. For years there have been reports of sightings, stories of meeting, and tales of conversations. In the late 1970's, a man named Jan Kaplan was released from a Soviet prison. In a phone conversation with his wife in Israel, he mentioned that he had seen a Swedish prisoner who had been held for over 30 years. Soviet authorities caught wind of Kaplan's conversation and he was arrested again. Repeated attempts by our Government to locate Mr. Kaplan have been obstructed. His crime appears to be that in making a casual comment about a Swedish prisoner, he had agitated the Soviets. The Kaplan comment raises the possibility that Wallenberg may have survived decades of Soviet abuse, that the Soviets have been nuturing a 25-year-old lie.

There are thousands of men and women who are alive today, here in the United States and abroad, because of Raoul Wallenberg. Michigan has an active and vibrant Hungarian community and many of its members were touched by Mr. Wallenberg's work. Evidence of his selflessness and devotion is around us everywhere. But the man is nowhere to be found.

Mr. President, the tragic irony is glaring. A man who fought so fearlessly for the freedom of others was denied his own freedom. I introduce this resolution today to continue the fight to win Raoul Wallenberg's freedom and hope that his next birthday will not be shrouded in darkness and lies.

SENATE RESOLUTION 205—RELATING TO THE FLAT RATE INDIVIDUAL INCOME TAX

Mr. HELMS (for himself, Mr. NICKLES, Mr. D'AMATO, and Mr. MURKOWSKI) submitted the following resolution which was referred to the Committee on Finance:

S. RES. 205

Whereas, the Internal Revenue Code of 1954 is a complex and cumbersome set of tax laws;

Whereas, the current system of high marginal tax rates imposed on a taxable income base that has been heavily eroded by special tax breaks and loopholes has given the tax system enormous complexity, gross inequities, and economic distortions;

Whereas, higher marginal tax rates distort optimal functioning of the economic system by introducing considerations other than efficiency and profitability, and stifle individual productivity and economic growth;

Whereas, lower marginal tax rates would draw economic activity out of the so-called "underground economy" and into taxable activity, and thereby foster economic growth and productivity; and

Whereas, a flat rate income tax would promote equity, remove the devastating effects of bracket creep, and reduce the complexity of the Internal Revenue Code: Now, therefore, be it

Resolved, That it is the sense of the Senate that the Internal Revenue Code of 1954 should be amended to establish a flat individual income tax based on these principles:

(1) The tax system should be simple, understandable, and evenhanded.

(2) No income should be taxed more than once.

(3) All individual income subject to tax should be taxed at the same rate, and that rate should be as low as possible.

(4) The individual income tax base should be as broad as possible, with few, if any, special tax breaks in the form of credits, deductions, and exclusions.

(5) Personal exemptions should be provided so that the poorest households would pay no income taxes.

(6) The amount of overall tax revenues should be no greater than under the current tax system.

FLAT TAX RESOLUTION

Mr. HELMS. Mr. President, during my years in the Senate, I have made no secret of my desire to overhaul our Federal income tax system. Let us face it—the Internal Revenue Code of 1954 is a disaster. It is a complex and burdensome set of laws widely regarded as unfair, and correctly so.

The legislation I am introducing today would put the Senate on record in favor of changing the tax system. It is a nonbinding sense of the Senate resolution that makes certain findings of fact about our current system of taxation and endorses the basic principles of the so-called flat rate income tax.

During the 97th Congress, I offered the "Flat Rate Tax Act of 1982," which would have replaced part of our present income tax schedule with a 10 percent across-the-board flat rate tax on all personal income. By eliminating preferential tax treatment, my proposal would have made it possible for the average American taxpayer to file an income tax return the size of a regular postcard.

Mr. President, I am convinced the key to sustained and vigorous economic growth lies in the adoption of policies aimed at reducing marginal tax rates and stimulating investment in the private sector of our economy. I simply do not believe the current tax system offers much hope of attaining these ends. On the contrary, the system we have now tends to penalize productivity and encourage tax evasion.

The beauty of a flat rate personal income tax lies in its simplicity. If we simplify our tax system so that every American can fill out his or her income tax on the back of a postcard, we would put an end to the huge and burdensome tax avoidance industry.

The IRS estimates that as much as $100 billion disappears into the so-called underground economy each year because of widespread dissatisfaction with the system. I believe that many of the people who utilize the underground economy do so because the system encourages them. These are citizens who have been forced underground by oppressive taxation and an overly complex tax system.

Mr. President, the beauty of a flat tax is more than skin deep, as the adage goes. A flat rate tax would lower marignal tax rates for all Americans and put an end to inflation-induced bracket creep.

Economist Michael Evans recently performed an econometric computer analysis of the effects on work saving if we adopted a 17-percent flat rate income tax. He estimated that work effort would increase by 3.3 percent and saving and investment would increase by $64 billion per year. This would raise the productive capacity of the economy by about 5 percent, which would generate approximately $150 billion additional GNP at 1981 levels.

Mr. President, a flat rate income tax system would also promote equity. The current tax schedule attempts to accomplish socially oriented policy objectives by channeling income and investment into supposedly desirable activities. Unfortunately, built-in structural impediments make the system much less progressive than many people think. The result is nonsensical. Too many people spend their time and money seeking ways to avoid taxation. I firmly believe that wealthier taxpayers would pay more income taxes under a flat rate system, even at a lower rate.

Mr. President, the notion of a tax system that is simple, understandable, and even-handed is catching on. Opinion polls indicate growing discontent with the current system. As more attention focuses on the flat rate tax, its popularity builds. Congress has responded with a dazzling array or reform proposals. At last count, 11 bills aimed at simplifying the Internal Revenue Code were pending, eight in the House and three in the Senate. I am revising the proposal I introduced last year, and hope to have it ready early this fall.

Despite the mounting interest in flat rate reform, I am afraid too much attention has been given to differences in the various ideas, and too little attention has been given to their similarities. Disagreement of the fine print has paralyzed debate and obscured the genuine merit of the flat rate income tax.

I am offering this resolution to draw attention once again to the need for flat rate reform. It sets out certain findings about our current system, findings I believe most, if not all, Members of the Senate can agree with. Furthermore, it lays down certain principles that are common to many of the flat tax proposals that have been offered in Congress. The resolution makes no attempt to establish which, if any, deductions, credits or exclusion should be retained. Nor does it attempt to establish any particular flat rate. Once we get general agreement on the basics, I hope we can then fully discuss the specifics.

I urge my colleagues to consider this proposal and join me in working for its passage.

Mr. D'AMATO. Mr. President, I rise today in support of a resolution introduced by my distinguished colleague from North Carolina (Mr. HELMS). This resolution would express the sense of the Senate in support of the principles of a flat rate individual income tax.

The Internal Revenue Code contains a myriad of loopholes through which individuals can escape paying income taxes. The code is a complex and confusing set of regulations that provides no sense of equity. As it stands now, only the wealthy can afford to hire the necessary accountants and lawyers to discover ways of avoiding income taxes. The working class does not enjoy this luxury and, thus, pay more than their fair share of income taxes. A flat rate income tax would alleviate the problem of the less affluent carrying more of a burden than the wealthy.

In addition, a flat rate tax system would eliminate bracket creep. Bracket creep is a cruel tax borne primarily by the middle class. Inflation pushes the typical American worker into a higher marginal tax bracket because of the impact of inflation on wages. In the end, take home pay is diminished. The wealthy are unaffected but the little person is unduly burdened.

What has been the effect of an individual income tax system that provides no equity? A subterranean economy of immense proportions has developed. It is estimated that $100 billion of income annually goes unreported to the IRS. This is clearly a result of the general dissatisfaction with the current tax structure.

Since the Tax Code now encourages individuals to avoid taxes, policymakers have begun to look for ways to squeeze revenues from, heretofore, protected sources. Paramount in my mind are recent efforts to directly tax previously sacrosanct municipal bonds. This effort was initiated in the social security bailout package. In the bailout package, a ridiculous provision requires the inclusion of tax-exempt interest for determining taxation of social security benefits. This is just the first step leading to direct taxation of all State and local bonds. Taxation of municipal bonds will not occur if the Tax Code is changed to effectively and equitably raise the intended amount of revenues while providing equity.

Mr. President, passage of this resolution would put the Senate on record in support of a flat rate individual income tax structure. The prime beneficiaries of such a reform would be both the middle class and the Federal Treasury.

SENATE RESOLUTION 206—RELATING TO ACCIDENTAL NUCLEAR WAR CAUSED BY ACTS OF TERRORISM

Mr. GLENN (for himself and Mr. TSONGAS) submitted the following resolution which was referred to the Committee on Foreign Relations:

S. RES. 206

Whereas acts of international terrorism have taken place with increasing frequency in recent years; and

Whereas such acts have been committed at times by groups with no visible or traceable support to the government of any country; and

Whereas there is increasing concern that a terrorist group could obtain or fabricate a nuclear weapon; and

Whereas the detonation of a nuclear explosive device by a terrorist group within territories deemed essential by the United States or the Soviet Union to their national integrity or national security would dangerously heighten tensions and possibly trigger nuclear war; and

Whereas it is in the interests of both the United States and the Soviet Union to prevent the triggering of nuclear war: Now therefore, be it

Resolved, That the President should take the necessary steps to negotiate an agreement between the United States and the Soviet Union, either in conjunction with current arms control negotiations or through separate negotiations, providing for mutual cooperation to deal with the threat of accidental nuclear war caused by acts of terrorism.

Mr. GLENN. Mr. President, on behalf of myself and Senator PAUL TSONGAS I rise to introduce a resolution concerning the prevention of nuclear war stemming from terrorist activities. Mr. President, over a period of many years the United States and Soviet Union have searched for ways to reduce international tension and make the possibility of nuclear war less likely. The Partial Test-Ban Treaty, the treaty banning weapons of mass destruction from outer space, the Tlatelolco Treaty, the Seabed Treaty, the NPT, and Salt I, were all designed to move us back from the brink and to get some control over the ever widening arms race. More recently, the Salt II negotiations and the present START talks represent continuations of past activity to make war more distant. There is now widespread recognition of both sides that there will be no winners in a full scale nuclear exchange, and it is therefore in the interests of both superpowers to do everything possible to assure that such an exchange will never happen.

We have, in cooperation with the Soviets, established a communication link between us, the so-called hotline, so that we can exchange information quickly and efficiently concerning events that may be subject to misinterpretation. But as the numbers of warheads has risen and their accuracy has improved, concerns have been raised on both sides about counterforce capabilities, leading to the possible placing of nuclear forces on more of a hair-trigger than was the case previously. Under such conditions it is particularly important that the United States and the U.S.S.R. examine all contingencies that could conceivably lead to the launching of nuclear weapons by one side or the other. One such contingency that ought to be given more attention than it has in the past is that of nuclear terrorism.

It is becoming apparent that there is a growing interest in the malevolent use of nuclear materials in the world. The number of incidents involving nuclear threats of one kind or another has grown steadily. Within our borders, the United States has established the so-called nuclear emergency search teams (NEST), which are dispatched to look for nuclear weapons or nuclear materials in connection with a received threat. These teams have been called out at least 14 times since being established in 1974.

As we look at political conditions abroad, especially in some of the countries which we are most worried about in terms of the spread of nuclear weapons, it is clear that we cannot predict exactly in whose hands nuclear weapons may fall. One need only consider what might possibly have happened in the course of the rushed evacuation of the Shah and his supporters from Iran if nuclear weapons had been stockpiled there. For this reason, it is not in the realm of impossibility to suppose that subnational groups could be in possession of nuclear weapons at sometime in the future. Under such conditions, the potential for such groups to trigger nuclear war is considerably high.

We have had many periods of particularly high tension between the United States and the Soviet Union since the end of World War II. Imagine what could happen in the future if we were once again in such a period and during this time a subnational group, having come into possession of nuclear weapons, were to detonate a device in the United States or the U.S.S.R. or in an area deemed essential to the national security of either side. Could we be sure that the result of such an act would not be a nuclear exchange between the superpowers?

Some would argue that this is a hypothetical situation that is not likely to become a realistic threat for many years into the future. That may well be true, although there are disagreements among experts as to how long it will take before we see the first real nuclear threat by a subnational group. But in any case, I do not believe that we have the luxury of ignoring this possibility. Accordingly, my resolution calls on the President to initiate the negotiation of an agreement between the United States and the Soviet Union, either in conjunction with current arms control negotiations, or through separate negotiations, to provide for mutual cooperation in dealing with the threat of accidental nuclear war caused by acts of terrorism.

We will undoubtedly continue to have problems with the Soviets in many areas which, in some cases, could result in the heightening of tension between us, but we must do everything possible to insure that the ultimate step is not taken by either side. Both countries have had rational leadership which has enabled us to keep the peace since the end of World War II. We must insure that the activities of irrational elements are not able to take advantage of our nuclear fears and our lack of contingency planning to trigger World War III.

In a recent book entitled "Nuclear Hostages," the author, Mr. Bernard J. O'Keefe, who is chairman of the National Association of Manufacturers and chief executive officer of EG&G Inc., present a personal history of the development of the nuclear age in the United States, and has some important observations to make about arms control and the reduction of international tensions. In one passage, Mr. O'Keefe states that, "We, the citizens of the United States, must realize that we and the citizens of the Soviet Union are held together in mutual

bondage, as hostages to the nuclear threat.

Mr. O'Keefe is right on the mark. It is important that the threat be reduced and eventually eliminated. As part of that effort, we and the Soviets must have a common understanding of how we will avoid nuclear war as a result of terrorist activities exploiting our mutual hostage status. The resolution I am introducing, if adopted and acted upon by the President, would begin the process of achieving that understanding.

SENATE RESOLUTION 207—RELATING TO THE USE OF CHEMICAL AND TOXIN WEAPONS

Mr. QUAYLE submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 207

Whereas, there is the strongest evidence that lethal and incapacitating chemical and toxin weapons have been used by the Soviet Union and its allies against innocent civilians in Afghanistan, Laos, and Kampuchea in violation of basic human rights;

Whereas, the Geneva Protocol of 1925 and customary international law prohibits the use of chemical weapons, and the Biological and Toxin Weapons Convention of 1972 bans the existence of toxin weapons;

Whereas, the use of chemical and toxin weapons is a clear violation of human rights, international law and arms control treaties, with the widest ranging implications: Now, therefore, be it

Resolved, that the Senate—

(1) condemns the Governments of the Soviet Union and its allies for using, or condoning the use of, inhumane and illegal chemical and toxin weapons; and

(2) declares its support for—

(A) the United Nations efforts to continue to investigate information concerning activities that may constitute a violation of the Geneva Protocol of 1925;

(B) the recommendation of the 37th United Nations General Assembly that the parties to the Biological and Toxin Weapons Convention of 1972 hold a special conference to strengthen that treaty's compliance procedures; and

(C) the President's efforts to negotiate, at the 40 nation Committee on Disarmament, a comprehensive and effectively verifiable multilateral treaty which bans the development, production, stockpiling, or transfer of chemical weapons, and which includes a comprehensive mechanism for ensuring compliance.

SEC. 2. The Secretary of the Senate shall transmit a copy of this resolution to the President, to the Secretary of State, to the Director of the Arms Control and Disarmament Agency, to the Secretary General of the United Nations, and to the President of the Soviet Union.

Mr. QUAYLE. Mr. President, the use of chemical and toxin weapons in Afghanistan, Laos, and Cambodia is a heinous crime against humanity. Though there are still some who refuse to acknowledge the fact that these weapons are being used, the evidence is irrefutable.

Today at noon the State Department released a new report that they are sending to the United Nations Secretary General outlining further scientific evidence that chemical and toxin weapons have been used in Laos and Kampuchea. This report is based on the scientific analysis of a series of blood samples drawn from victims of several different toxic attacks.

Attacks are described in the report where the death toll mounted to 44 within 2 to 5 days of exposure to the chemical agents. These particular attacks took place in January 1982 and were carried out by aircraft.

On February 15, 1982, another series of chemical attacks took place against several H'mong villages. An estimated 85 to 100 people died. Most of the villagers' chickens and half of their pigs also died.

Mr. President, I ask unanimous consent that the report be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

REPORT COVER LETTER TO U.N. SECRETARY GENERAL

I have the honor to submit, enclosed, a further report on the use of chemical and toxin weapons which contains new evidence available to the United States. It is based on the scientific analysis of a series of blood samples drawn from victims of earlier toxic attacks in Laos that were frozen for future analysis, as well as blood samples drawn from victims of a toxic attack in Kampuchea in March of this year.

We have, over the past three years, submitted a series of reports presenting the evidence in detail. The United States continues to be deeply concerned over the use of chemical and toxin weapons in flagrant violation of international conventions and international law. In view of the concerns of members of the United Nations as expressed in General Assembly resolutions 35/144 C, 36/96 C, 37/98 D, and 37/98 E, and in view of the study presently being conducted under your direction on means of dealing with allegations of use of chemical, biological, and toxin weapons, I request that the enclosed report be circulated at an early date as an official document of the General Assembly.

FURTHER REPORT ON USE OF CHEMICAL AND TOXIN WEAPONS—NEW EVIDENCE AVAILABLE TO THE UNITED STATES

The United States continues to receive and analyze disturbing evidence and reports of use of chemical and toxin warfare agents in Laos, Kampuchea and Afghanistan. The use of these weapons is a flagrant contravention of two major international agreements and customary international law.

In an ongoing effort to call world attention to the problem, and to secure a halt to the use of these weapons, the United States has periodically released its evidence. Over the past two years, biomedical samples (blood, urine, or tissue) from victims have been analyzed in American laboratories for the presence of T2 and HT2 trichothecene toxins. To date, biomedical samples from 20 victims of eight separate toxin weapon attacks in Laos and three separate attacks in Kampuchea have been shown to contain trichothecene toxins. Control samples, taken from similar individuals who had not been subjected to toxin agent attack, were negative. Additional samples from victims and controls have been collected over the past year and are currently under analysis employing newly developed, more sophisticated, increasingly sensitive, state-of-the-art techniques. The complexity of trichothecene analysis in biomedical samples has necessitated development of new techniques and analytical procedures, a lengthy and tedious process. The levels of trichothecenes detected cannot be attributed to any known natural phenomena. Previously reported analysis results of biomedical and other data may be found in earlier United States submissions.

The following is an account of the results of the analysis of four additional sets of blood samples.

On November 6, 1981, a Lao resistance fighter was injured by a toxic agent grenade in northern Vietiane Province of Laos. Following the blast he experienced severe eye irritation and tearing and was blinded for approximately 30 minutes. Within a few hours, and continuing over a period of several days, he experienced the development of hundreds of small (2 to 5 mm) fluid filled blisters on the exposed areas of his upper torso and edema of the head and neck.

He was assisted to the Nong Khai Hospital in Thailand where the camp physician and a U.S. physician examined him on November 11 (5 days after the attack) and noted the blisters and mild conjunctivitis in both eyes. Blood samples were drawn at that time, chilled and maintained on ice during transit to the U.S., and frozen for future analysis.* Two blood samples, analyzed at the U.S. Army Chemical Systems Laboratory for the presence of traditional chemical agents, were negative for such agents. Three blood samples were submitted to a private U.S. laboratory for analysis by gas chromatograph-mass spectrometer (GC-MS) technique for the presence of trichothecenes. Detectable levels of T2 and HT2, a metabolite of T2, were found in all three samples of the victims' blood as follows:

	Parts per billion	
	T-2	HT-2
Sample No:		
1	9	6
2	10	6
3	9	5

On 24-26 March 1982, at the Nong Khai refugee camp in Thailand blood samples were drawn by U.S. and camp medical personnel from H'Mong refugees who reported symptoms as a result of exposure to aircraft-delivered toxic agent warfare attacks in Laos on the 3rd, 11th and 16th of January 1982.

Symptoms reported by the victims included: headache, nausea, vomiting with blood, diarrhea with blood, weakness, vertigo, drunklike sensations, and visual disturbances. As a result of the attacks, of 154 people involved, 44 died within 2 to 5 days of exposure. Analysis of a blood sample from one of the surviving victims, a 10-year old boy, for T2 and HT2 trichothecene

* Due to the volume of samples received and the limited capacity of the laboratories conducting the analyses, it has been necessary to freeze some biomedical samples while higher priority samples were analyzed. Since only one victim was sampled in this attack, it initially received a low priority.

toxins revealed the presence of 32 ppb HT2. This victim also was suffering form malaria and showed a depressed white cell count of 4,200. The blood samples were handled in the same manner as above, and analysis was performed at the same private U.S. laboratory using identical GC-MS techniques.

Also on 24-26 March 1982 at the Nong Khai camp, blood samples were drawn from four H'Mong who had been exposed to attacks on 15 February 1982 in Laos. The survivors reported that two attacks were directed against several villages with a collective death count estimated to be between 85-100 people. Most of the villager's chickens and half of their pigs also died. Rice, tapioca, and other crops were affected as well. Symptoms reported by the victims included: fever, headache, nausea, vomiting, diarrhea, double vision, coughing, chest pain, eye irritation and tearing, hearing difficulty, fatigue, and jaundice.

Blood samples from these victims were handled and analyzed as with the others, for the presence of T2 and HT2 trichothecene toxins. The blood of one of the victims showed the presence of 28 ppb T2 and 16 ppb HT2 toxin. This individual, a 35-year-old male, had also been exposed to a previous toxic agent attack in mid-December 1981.

Blood was drawn at the same time from three control individuals in the camp who had not been subjected to a toxic agent attack. These control samples were analyzed for T2 and HT2 trichothecene toxins with negative results.

On March 20, 1983, at Khao Din refugee camp in Thailand, near the Kampuchean border, three young Kampuchean women aged 18, 19 and 25, complaining of effects of a toxic agent, were examined by physicians. The three victims complained of symptoms typical of past trichothecene toxin exposure victims. They had become ill on March 9 after passing through an area in Kampuchea reported to have been subjected to a toxic agent attack on March 4 and 5. Blood samples were drawn from each victim and from two control individuals who were living in the same area under the same conditions as the victims, but who had not been exposed to any toxic agent.

The blood samples were analyzed by a private United States laboratory for the presence of T2 and HT2 toxins. One of the victims still had detectable levels of both T2 and HT2 (19 ppb T2 and 32 ppb HT2 respectively) in her blood. Blood samples from both control individuals were negative for both toxins.

All samples were submitted on a blind, coded basis to a private United States laboratory. Blood samples were precipitated with acetone and filtered. The filtrate was evaporated to dryness, dissolved in methanol:water (1:19, v/v) and passed through a XAD-2 column. The 90 percent methanol eluate was collected and dried on a steam bath. The samples were analyzed on a HP-5985B gas chromatograph-mass spectrometer data system.

Mr. QUAYLE. Mr. President, these are documented cases with scientific evidence. What more is needed to convince the naysayers that these heinous crimes are taking place. I am not a scientist, but these findings combined with past scientific results as well as all the other information that is available leaves no doubt that these illegal weapons have been used. They were used against men, women, and children whose only crime is wanting to be left alone and not wanting to be dominated by repressive totalitarian regimes.

The United States has been outspoken in its call to bring these inconceivable horrors to the forefront of world opinion. Some countries and many people have said we should not be so bellicose in our outrage. Others have said it is an intelligence problem that should not be openly discussed, and still others wish that we would ignore these violations of human rights, international law, and arms control treaties. These people and countries are wrong.

The H'mong in the highlands of Laos have no constituency to cry out for them. The men, women, and children in the jungles and plains of Cambodia have no constituency to plead to world opinion to call a stop to these unwarranted attacks. And, the freedom fighters in Afghanistan have no constituency to stand up and say the Soviets have broken treaties and international law which they agreed to.

Mr. President, I submit to you that this Congress and this Government should be the constituency which speaks for these defenseless people. For too long there has been a deafening silence coming from these Chambers.

For this reason, I am introducing a resolution which condemns the governments of the Soviet Union, Afghanistan, Vietnam, and Laos for using or condoning the use of chemical and toxin weapons. The resolution also declares support for three initiatives that are presently underway.

The first is the United Nations efforts to continue investigating reported violations of the Geneva Protocol of 1925.

The second is the U.N. General Assembly recommendation to convene a special conference for the signatories of the Biological and Toxin Weapons Convention of 1972 to strengthen that treaty's compliance procedures.

And finally, it declares the Senate's support for the President's efforts to negotiate a comprehensive and effectively verifiable multilateral treaty banning the development, production, stockpiling, or transfer of chemical weapons.

Mr. President, there are reports filtering out of Laos, Cambodia, and Afghanistan that these weapons are still being used. On June 27 the Foreign Broadcast Information Service, FBIS, reported that there was an article in the Bangkok Post on June 25 stating that nearly 300 H'mong hill tribe people crossed the Mekong River, which separates Thailand from Laos, seeking shelter from "chemical bomb attacks."

The report says that a village on Phou Bai Mountain was attacked for 4 consecutive days by a Vietnamese plane which dropped poisonous chemical bombs.

In the July 13 FBIS there is another report describing a Laotian helicopter dropping yellow powder on to two Lao villages.

These are just two recently reported attacks. It is difficult to know exactly how accurate this information is, but when it is combined with our intelligence, it is enough to convince me that these attacks have not stopped.

At present there are two international treaties, the 1925 Geneva Protocol and the 1972 Biological and Toxin Weapons Convention, which are supposed to protect the world from chemical, biological, and toxin weapons. From the amassed evidence, it is clear the Soviet Union and its client states: Afghanistan, Laos, and Vietnam are not abiding by these treaties. In fact, they are blatantly ignoring them.

Yet these treaties were reached because the majority of the nations of this world realized the danger of such potentially devastating and inhumane weapons of war. They were agreed to so the very atrocities that are happening in the mountains of Laos, the jungles of Kampuchea, and the rocky terrain of Afghanistan would never take place.

The 1925 Geneva Protocol was a direct result of the use of poisonous gases in World War I. To delve into history briefly, dusk was approaching on April 22, 1915, when the Germans let loose the first greenish cloud of chlorine gas. They had released 168 tons of it. The gas slowly drifted across the French lines at Ypres catching the soldiers in the trenches unaware. Panic ensued as the burning gas caused unspeakable pain and for many a slow and tortuous death. The number of dead and injured in that first attack range up to 15,000 injured, 5,000 of them fatally. During the course of the war, it is estimated about 1 million people suffered or died as a direct result of the use of chemical weapons.

The cries of agony from that war led to the Geneva Protocol which outlaws the use in war of "asphyxiating, poisonous, or other gases, and all analogous liquids, materials, and devices." It also bans bacteriological warfare. But, it does not prohibit the possession of any of these lethal agents. The Soviet Union, Vietnam, the United States and some 115 other nations have signed the protocol.

In 1969, President Nixon unilaterally decided to dispose of the U.S. stockpiles of biological weapons. Then on April 10, 1972, the "Convention on the Prohibition of the Development, Production, and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on Their Destruction," otherwise known as the 1972 Biological and Toxin Weapons Convention, was

signed in Washington, London, and Moscow. It was ratified by the Senate on March 26, 1975. The convention was signed by the Soviet Union, Afghanistan, Laos, Vietnam, and over 100 other countries. As the convention's title suggests, it bans the development, production, stockpiling, transfer or possession of biological and toxin weapons.

These two treaties are supposedly binding, yet even more important are the moral prohibitions against using these weapons. Perhaps President Franklin D. Roosevelt expressed it best when he said that their use "has been outlawed by the general opinion of civilized mankind."

The Geneva Protocol and the Biological and Toxin Convention exist to protect all nations from these heinous weapons. The ban on the use of chemical weapons has, by reason of the practice and affirmations of states, become a part of the rules of customary international law which are binding on all states. Yet today, the Soviet Union and a few of its client states are showing contempt for these international treaties and for human life and decency.

The reappearance of these weapons of terror came in 1975 when H'Mong tribesmen from the mountainous regions of Laos started fleeing to Thailand and describing a strange new phenomenon, "yellow rain." They described planes flying overhead and releasing yellow clouds that would fall upon them, landing like rain drops on their villages and fields, bringing death, illness, pain, and panic.

In 1978 similar reports began coming from Kampuchea and then in 1979 they started emerging from Afghanistan.

At first these reports were not taken seriously, but they should have been. What some tried to shrug off as a natural phenomenon, was in reality the result of a cold and calculated decision by the Soviet Union and its allies to use deadly and incapacitating chemical and toxin weapons against innocent men, women, and children.

Mr. President, we in Congress have been all too quiet on these clear violations of human rights, international law, and arms control treaties. This is why today I am introducing this resolution. It is time we as a body reaffirmed our abhorrence to these weapons, condemned the instigators and showed our support for what is being done to ban them from existence.

The first reports from H'Mong refugees describing yellow rain were scattered and generally ignored or not believed. But, as time passed the reports continued and evidence began to mount; this was true in Laos, then Kampuchea and finally in Afghanistan. Today, there is a preponderance of evidence that chemical and toxin weapons have been used as weapons of terror to drive H'Mong, Khmer, and Afghans from their homeland.

This convincing evidence comes from numerous sources that have been documented and verified. There are too many similarities in reports from refugees in Indochina and Afghanistan to ignore. They come from victims of the attacks as well as eyewitnesses.

Doctors treating survivors of attacks thousands of miles apart also report similar after-effects: hoarse voices, vision impairment, weakness, lung disorders, and skin lesions. The symptoms that are documented in these two different areas of the world are too alike to be coincidences.

Refugee workers and journalists, including Sterling Seagrave who wrote the book titled "Yellow Rain" have openly commented or written about the use of chemical weapons.

Since 1979, hundreds of physical and biological samples have been collected from Southeast Asia, and since May 1980 from Afghanistan. The physical samples include vegetation, viles of liquid and shell fragments, while the biological samples include skin tissue and body fluids. Many of these samples have been analyzed and tested by U.S. Government laboratories and by those of independent American universities.

The analysis of many of the samples reveal evidence of mycotoxins of the trichothecenem group. A toxin is a chemical poison which is usually produced in nature by living organisms, but also can be produced synthetically. The symptons generally associated with these toxins are severe itching, blistering, vomiting, and hemorrhaging. These are the same symptons reported by the victims of attacks in Southeast Asia and Afghanistan.

The evidence released today by the State Department is just further proof that chemical and toxin weapons are being used.

The United States is not alone in its investigation of these violations of human rights and international treaties, as the Canadian Government has been active. Several studies have been done on this issue. One was an independent Canadian investigation done by Dr. Harold Schiefer, chairman of the Toxicology Group at the University of Saskatchewan was asked to do the study. He went to Thailand in February 1982. His report states:

> It appears that a number of agents or a combination thereof have been employed, one being generally known as "Yellow Rain." Most of the features described with "Yellow Rain" are consistent with trichothecene mycotoxicosis.

Mr. President, suffice it to say the technical evidence is there for those who still have doubts. I know there are many naysayers. But, if they look at all the evidence, which includes the scientific analysis, sanitized intelligence, refugee reports, the reports from doctors, refugee workers, and journalists; I find it hard to believe they can still be doubters.

Now the question arises as to where these chemical and toxin weapons come from as neither Vietnam, Afghanistan, or Laos has the capability to develop or produce the majority of these sophisticated chemical agents and toxins. The obvious answer is that the Soviet Union supplies the countries with the weapons. In fact it is the only Communist country which has the industrial facilities and chemical warfare research capable of producing such weapons in such quantities.

Our intelligence links the Soviets to supplying and/or directly or indirectly using these chemical and toxin weapons in Afghanistan and Southeast Asia. There are also numerous Soviet military advisers in the countries where these weapons are being used. Some of the advisers are from the Soviet Chemical Corps.

These weapons are being used by the Soviets and their clients to end resistance movements which are operating from relatively inaccessible jungle or mountainous terrain. They provide a cheap and easy way to attack forces that have no protection from them and cannot retaliate in kind. These chemical agents can do more harm than conventional weapons and their use saves lives and material.

Soviet military doctrine even teaches that chemical weapons are an effective and acceptable means of warfare. Al Santoli's article in the July 26 edition of Parade magazine accurately describes this.

These weapons of terror can subdue entire villages by making the people sick immediately or over a period of time. They contaminate food supplies and water sources and cause both near- and long-term health problems. These weapons are indiscriminate in that they kill or injure innocent men, women, and children. The reports are that old people and children suffer the most and are most easily affected.

Mr. President, the use of these weapons not only violate the basic human rights of these poor people who are being gassed and attacked, but they also have a tremendous impact on arms control with implications that affect all arms treaties.

If the Soviets so callously violate these two treaties, how are they to be trusted with others? This is one of the reasons other countries are extremely hesitant to come out and openly support the U.S. contentions that chemical and toxin weapons are being used. They are afraid of the implications. Yet the Soviets must be made to abide by the agreements they sign.

One of the ways to do that is by continuing to focus world attention on what is happening and thus cause world opinion to weigh against the So-

viets. I do not believe this resolution will begin to do that, but it is a step in the right direction. It puts the Senate on record as condemning these actions, but as stated earlier, it also declares the Senate's support for three initiatives that the administration has undertaken in trying to stop the use and proliferation of these weapons.

First it declares the Senate's support for the U.N. efforts to investigate the allegations that chemical and toxin weapons are being used in Southeast Asia and Afghanistan. A report by the U.N. Experts Group concluded "It could not disregard the circumstantial evidence suggestive of the possible use of some sort of toxic chemical substance in some instances."

The United Nations has established a group of experts to investigate potential violations of these international treaties. They have had several meetings to coordinate future efforts and to provide acceptable guidelines. The members of this group are serious and I believe can provide a useful mechanism for carrying on an international investigation, provided they are allowed to do so by the countries that are accused of the violations.

This resolution also declares its support for the U.N. General Assembly's resolution which called for the signatories of the Biological and Toxin Weapons Convention of 1972 to reconvene to strengthen the treaty's compliance procedures.

Most importantly, this resolution supports the President's efforts to negotiate a comprehensive and effectively verifiable multilateral treaty which bans the development, production, stockpiling, or transfer of chemical weapons. This is being debated in Geneva at the 40 nation Committee on Disarmament. This treaty would include a comprehensive mechanism for insuring compliance.

Mr. President, it is only when such a treaty is accepted and ratified by the nations of the world that we will know we are safe from these weapons of pain and death. The men, women, and children of Afghanistan, Laos, and Cambodia have suffered and died from these weapons. The world will be forever haunted by the cries of these people unless an agreement is reached. Their anguished pleas to stop the yellow rain from falling must not be met with deaf ears.

Until such a treaty is reached, we in the United States must continue to speak out and provide the world with evidence of these crimes. I commend the State Department for releasing this new information, and I encourage them to continue with their efforts. There are many dedicated and unheralded genuine heros who have been responsible for getting out the information while others have preferred to stand mute. They have my utmost respect and admiration.

Mr. President, I hope my fellow Senators will join me as cosponsors of this resolution. If they are not convinced that these weapons are being used, then they should ask for briefings from the appropriate agencies. After these, I feel certain they will come to understand the true horrors that have been inflicted on innocent people.

These violations of human rights, international law, and arms control treaties must stop. We in the Senate must do our part. If we do not, we are not living up to our responsibilities as Senators, or as human beings.

AMENDMENTS SUBMITTED

DAIRY PRODUCT STABILIZATION ACT OF 1983

PRESSLER AMENDMENTS NO. 2117 AND 2118

Mr. PRESSLER submitted two amendments to the bill (S. 1529) to stabilize a temporary imbalance in the supply and demand for dairy products, to enable milk producers to establish, finance, and carry out a coordinated program of dairy product promotion, to adjust the support levels for the 1983 and subsequent crops of tobacco, to make modifications in the tobacco production adjustment program, and for other purposes, as follows:

AMENDMENT No. 2117

On page 19, line 14, insert "(1)" after "(on)".

On page 19, line 18, insert after "productivity" the following: "and (2) the feasibility of imposing a limitation of the total amount of payments and other assistance a producer of milk may receive during a year under section 201(d) of the Agricultural Act of 1949 (7 U.S.C. 1446 (d))".

AMENDMENT No. 2118

On page 20, line 21, insert ", and imported into," after "in".

On page 27, line 5, insert "and each person importing milk or milk products into the United States" after "the producer".

On page 27, line 8, insert "or by the importer" after "producer".

CRITICAL AGRICULTURAL MATERIALS ACT

PRESSLER AMENDMENT NO. 2119

Mr. PRESSLER submitted an amendment intended to be proposed by him to the bill (H.R. 2733) to extend and improve the existing program of research, development, and demonstration in the production and manufacture of quayule rubber, and to broaden such program to include other critical materials, as follows:

On page 11, line 23, insert "(1)" after "(b)".

On page 12, between lines 5 and 6, insert the following new paragraph:

(2) (A) As used in this paragraph, the term "family farm" means a farm which is operated only by a producer and the immediate family of the producer.

(B) If the Secretary exercises the authority provided in paragraph (1) with respect to the 1984 or 1985 crop of wheat, corn, upland cotton, or rice, in the case of a producer who operates a family farm or produces less than the maximum amount prescribed by the Secretary of such commodity in the crop year concerned, the Secretary may prescribe that the established price for the 1984 or 1985 crop of wheat, corn, upland cotton, or rice, as the case may be, used to make payments to such producer shall be no less than the minimum established price prescribed in the sections referred to in paragraph (1).

HYDROELECTRIC POWERPLANT AUTHORIZATION

HECHT AMENDMENT NO. 2120

Mr. BAKER (for Mr. HECHT) proposed an amendment to the bill (S. 268) to authorize the Secretary of the Interior to construct, operate, and maintain hydroelectric powerplants at various existing water projects, and for other purposes, as follows:

1. Section 1: On page 1, above line 3, insert the heading "Title I".

On page 1, line 3, delete the words "That the" and insert in lieu thereof "Sec. 101. The".

On page 2, line 5, delete the numeral "4" and insert in lieu thereof "104".

On page 2, line 7, delete the numeral "4" and insert in lieu thereof "104".

On page 2, line 11, after the word "of" insert the words "Title I of".

On page 2, line 13, delete the numeral "4" and insert in lieu thereof "104".

2. Section 2. On page 2, line 17, delete the numeral "2" and insert in lieu thereof "102".

On page 2, line 20, delete the numeral "4" and insert in lieu thereof "104".

On page 2, line 23, delete the numeral "4" and insert in lieu thereof "104".

On page 3, line 1, delete the words "or uprating".

On page 3, line 2, after the words "authorize in" insert "section 104 of".

3. Section 3: on page 3, line 3, delete the numeral "3" and insert in lieu thereof "103".

On page 3, line 4, after the words "authorize in" insert "section 104 of".

4. Section 4: On page 5, line 7, delete the numeral "4" and insert in lieu thereof "104".

5. Section 5: On page 6, line 9, delete the numeral "5" and insert in lieu thereof "105".

On page 6, line 10, delete the numeral "4" and insert in lieu thereof "104".

On page 6, line 14, after the words "provisions of" insert "Title I of".

On page 7, line 10, delete the numeral "4" and insert in lieu thereof "104".

6. Section 6 : On page 8, line 1, delete the numerals "6" and "4" and insert in lieu thereof "106" and "104" respectively.

7. Section 7: On page 8, line 6, delete the numeral "7" and insert in lieu thereof "107".

On page 8, line 8, delete the numeral "4" and insert in lieu thereof "104".

8. Section 8: On page 9, line 19, delete the numeral "8" and insert in lieu thereof "108".

On page 9, line 22, delete the numeral "4" and insert in lieu thereof "104".

On page 10, line 3, delete the numerals "2" and "3" and insert in lieu thereof "102" and "103" respectively.

On page 10, line 6, delete the numeral "4" and insert in lieu thereof "104".

9. On page 10, after line 14, insert the following:

SEC. 109. The provisions of this Title I shall not apply to any project authorized or affected by Title II of this Act.

TITLE II

SEC. 201. (a) The Secretary of the Interior is authorized to increase the capacity of existing generating equipment and appurtenances at Hoover Powerplant (hereinafter "Uprating Program"); and to improve parking, visitor facilities, and roadways and to provide additional elevators, and other facilities that will contribute to the safety and sufficiency of visitor access to Hoover Dam and Powerplant (hereinafter "Visitor Facilities Program").

(b) The Secretary of the Interior is authorized to construct a Colorado River bridge crossing, including suitable approach spans, immediately downstream from Hoover Dam for the purpose of alleviating traffic congestion and reducing safety hazards. This bridge shall not be a part of the Boulder Canyon Project and shall neither be funded nor repaid from the Colorado River Dam Fund or the Lower Colorado River Basin Development Fund.

SEC. 202. (a) Clause (1) of subsection (c) of section 403 of the Colorado River Basin Project Act of 1968 (43 U.S.C. 1543(c); 82 Stat. 894) is revised to read as follows:

"(1) all revenues collected in connection with the operation of facilities authorized in Title III in furtherance of the purposes of this Act (except entrance, admission, and other recreation fees or charges and proceeds received from recreation concessionaires), until completion of repayment requirements of the Central Arizona Project;

(b) Clause (2) of said subsection (c) is revised by inserting immediately preceding the existing proviso:

"Provided, however, That for the Boulder Canyon Project commencing June 1, 1987, and for the Parker-Davis Project commencing June 1, 2005, and until the end of the repayment period for the Central Arizona Project described in section 301(a) of this Act, the Secretary of Energy shall provide for such surplus revenues by including the equivalent of 4½ mills per kilowatt-hour in the rates charged to purchasers in Arizona for application to the purposes specified in subsection (f) of this section and by including the equivalent of 2½ mills per kilowatt-hour in the rates charged to purchasers in California and Nevada for application to the purposes of subsection (g) of this section as amended and supplemented: *Provided, further,* That after the repayment period for said Central Arizona Project, the equivalent of 2½mills per kilowatt-hour shall be included by the Secretary of Energy in the rates charged to purchasers in Arizona, California and Nevada to provide revenues for application to the purposes of said subsection (g) of this section:"

SEC. 203. The Boulder Canyon Project Act of 1928 (43 U.S.C. 617 *et seq.;* 45 Stat. 1057), as amended and supplemented, is further amended:

(a) In the first sentence of section 2(b), by striking out "except that the aggregate amount of such advances shall not exceed the sum of $165,000,000", and by replacing the comma after the word "Act" with a period.

(b) In section 3, by deleting "$165,000,000" and inserting in lieu thereof "$242,000,000, of which $77,000,000 (October 1983 price levels) shall be adjusted plus or minus such amounts as may be justified by reason of ordinary fluctuations of construction costs as indicated by engineering cost indices applicable to the type of construction involved herein. Said $77,000,000 represents the additional amount required for the Uprating Program and the Visitor Facilities Program."

SEC. 204. The Boulder Canyon Project Adjustment Act of 1940 (43 U.S.C. 618 *et seq.*, 54 Stat. 774), as amended and supplemented, is further amended:

(a) In section 1 by deleting the phrase "during the period beginning June 1, 1937, and ending May 31, 1987" appearing in the introductory paragraph of section 1 and in section 1(a), and insert in lieu thereof "beginning June 1, 1937".

(b) In section 1(b) by deleting the phrase "and such portion of such advances made on and after June 1, 1937, as (on the basis of repayment thereof within such fifty-year period or periods as the Secretary may determine) will be repayable prior to June 1, 1987" and inserting in lieu thereof "and such advances made on and after June 1, 1937, over fifty-year periods".

(c) In section 1 by deleting the word "and" at the end of subsection (c); deleting the period at the end of subsection (d) and inserting in lieu thereof "; and", and by adding subsection (e) to read:

"(e) To provide revenues from and after June 1, 1987, for application to the purposes specified in section 403(c)(2) of the Colorado River Basin Project Act of 1968, as amended and supplemented."

(d) In section 2:

(1) By deleting the first sentence and subsection (a) and inserting in lieu thereof:

"All receipts from the project shall be paid into the Colorado River Dam Fund and shall be available, without further appropriation, for:

(a) Defraying the costs of operation (including purchase of supplemental energy to meet temporary deficiencies in firm energy which the Secretary of Energy is obligated by contract to supply), maintenance and replacements of, and emergency expenditures for, all facilities of the project, within such separate limitations as may be included in annual appropriations acts;" and

(2) By deleting existing section 2(e) and inserting in lieu thereof a new section 2(e) reading:

"(e) Transfer to the Lower Colorado River Basin Development Fund established by Title IV of the Colorado River Basin Project Act of 1968, as amended and supplemented, of the revenues referred to in section 1(e) of this Act."

(e) By deleting the final period and placing a colon at the end of section 6 and adding:

"Provided, That on appropriated funds advanced, respectively, for the Uprating Program and for the Visitor Facilities Program as defined in section 201(a) of [S. 268], the rate of interest for advances for each shall be determined by the Secretary of the Treasury, as of the beginning of the fiscal year in which the initial advance for the particular program involved is made, on the basis of the computed average interest rate payable by the Treasury upon its outstanding marketable public obligations which are neither due nor callable for fifteen years from the date of issue."

(f) In section 12, in the paragraph beginning with "Replacements", by deleting "during the period from June 1, 1937, to May 31, 1987, inclusive" and inserting in lieu thereof "beginning June 1, 1937".

SEC. 205. (a) Capacity resulting from the Uprating Program and associated energy shall be allocated for use in Arizona, California and Nevada in the respective amounts specified in the applicable power marketing criteria promulgated by the Secretary of Energy. Such allocated capacity and associated energy shall be disposed of only pursuant to contracts effective June 1, 1987 and expiring on September 30, 2017, between the Secretary of Energy and purchasers in Arizona, California and Nevada eligible to enter into such contracts under section 5 of the Boulder Canyon Project Act: *Provided, however,* That in the case of Arizona and Nevada, such contracts shall be made with the agency designated by state law as the agent of such state for purchasing power from the Boulder Canyon Project.

(b) The Uprating Program authorized under section 201(a) of this Act may be undertaken with appropriated funds or with funds advanced under contracts made with the Secretary of the Interior by non-federal purchasers described in subsection (a) of this section, or a combination thereof. Any funding provided by non-federal purchasers shall be advanced to the Secretary of the Interior pursuant to the terms and conditions of such contracts.

(c) Notwithstanding any other provisions of the law, funds advanced by non-federal purchasers for use in the Uprating Program shall be deposited in the Colorado River Dam Fund and shall be available for the Uprating Program.

(d) Those amounts advanced by non-federal purchasers shall be financially integrated as capital costs with other project costs for rate setting purposes, and shall be returned to those purchasers advancing funds throughout the contract period through credits which include interest costs incurred by such purchasers for funds contributed to the Secretary of the Interior for the Uprating Program.

SEC. 206. Reimbursement of funds appropriated for construction of facilities authorized under section 201(a) of this Act, inclusive of any funds advanced by non-federal purchasers, shall be a repayment requirement of the Boulder Canyon Project beginning with the first day of the month following completion of the installation, except that the costs of the Visitor Facilities Program as defined in section 201(a) of this Act shall become a repayment requirement beginning June 1, 1987, or when substantially completed, as determined by the Secretary of the Interior, if later.

SEC. 207. This Act shall not be construed to either support or prejudice:

(a) claims concerning the existence or scope of any right to renew a contract in effect on the date of this Act for purchase of electrical energy generated at Hoover Dam, including, but not limited to, any right to increased capacity resulting from the Uprating Program, or

(b) claims concerning the existence or scope of preference in the purchase of electrical energy generated at Hoover Dam, including, but not limited to, any right to increased capacity resulting from the Uprating Program.

GARN AMENDMENT NO. 2121

Mr. BAKER (for Mr. GARN) proposed an amendment to the bill, S. 268, supra, as follows:

In Title II, Sec. 207, add a new subsection (c) as follows:

(c) Any right to determine by arbitration or court proceedings any dispute or disagreement as to the interpretation or performance of any provisions of this Act or any other laws of the United States in effect on the date of this Act, or the Criteria or Regulations, either to be published or subsequently amended relating in any way to allocation of energy generated at Hoover Dam from capacity existing on the date of this Act or increased capacity resulting from the Uprating Program.

EDUCATION CONSOLIDATION AND IMPROVEMENT ACT AMENDMENTS

HATCH AMENDMENT NO. 2122

Mr. BAKER (for Mr. HATCH) proposed an amendment to the bill (S. 1008) to make certain technical amendments to improve implementation of the Education Consolidation and Improvement Act of 1981, and for other purposes; as follows:

On page 32, line 18, beginning with "(a)" the first time it appears, strike out through "(c)" the first time it appears on line 3, page 33.

On page 33, line 3, strike out "such Act" and insert in lieu thereof "the Act of September 30, 1950 (P.L. 874, 81st Congress)".

On page 33, line 16, beginning with "Treating" strike out through the period the first time it appears on line 21.

JACK D. WATSON POST OFFICE BUILDING

STEVENS AMENDMENT NO. 2123

Mr. STEVENS proposed an amendment to the bill (S. 1797) to name the U.S. Post Office Building to be constructed in Fort Worth, Tex., as the "Jack D. Watson Post Office Building"; as follows:

At the end add:

SERVICE OF GOVERNOR UNTIL SUCCESSOR QUALIFIES

SEC. Section 202(b) of title 39, United States Code, is amended by adding at the end thereof the following sentence: "A Governor may continue to serve after the expiration of his term until his successor has qualified, but not to exceed one year."

DAIRY PRICE SUPPORTS

COCHRAN AMENDMENT NO. 2124

Mr. COCHRAN proposed an amendment to the joint resolution (S.J. Res. 149) to temporarily suspend the authority of the Secretary of Agriculture, under the milk price support program, to impose a second 50 cents per hundredweight deduction from the proceeds of sale of all milk marketed commercially in the United States; as follows:

On page 1, line 2, strike out "November 1, 1983" and insert in lieu thereof "October 1, 1983".

COLUMBIA RIVER GORGE ACT OF 1983

GORTON (AND OTHERS) AMENDMENT NO. 2125

(Referred to the Committee on Energy and Natural Resources.)

Mr. GORTON (for himself, Mr. JACKSON, and Mr. HATFIELD) submitted an amendment intend to be proposed by them to the bill (S. 627) to authorize the establishment of a National Scenic Area to assure the protection, conservation, enhancement, and management of scenic, natural cultural and other resource values of the Columbia River Gorge in the States of Oregon and Washington, to establish national policies to assist in achieving this objective, and for other purposes, as follows:

S. 627 is amended by adding at the end thereof the following new Title and renumbering the preceding sections accordingly:

"TITLE II

SEC. 201. TABLE OF CONTENTS.—

Sec. 201. Table of Contents.
Sec. 202. Findings, purposes and policies.
Sec. 203. Definitions.
Sec. 204. Description of area.
Sec. 205. Establishment of the Commission.
Sec. 206. Powers of the Commission.
Sec. 207. Timetable.
Sec. 208. Interim procedures.
Sec. 209. Management Plan for the area.
Sec. 210. Certification of Implemetation Plans.
Sec. 211. Acquisition.
Sec. 212. Federal lands within the area.
Sec. 213. Intergovernmental cooperation.
Sec. 214. Indian rights not impaired.
Sec. 215. Exemptions from the Act.
Sec. 216. Enforcement.
Sec. 217. Jurisdication of the Federal Courts.
Sec. 218. Appeals.
Sec. 219. Mitigation of local revenue losses.
Sec. 220. Authorization of applications.
Sec. 221. Acquisition fund.
Sec. 222. Compliance with Budget Act.
Sec. 223. Literal construction.
Sec. 224. Severability.

FINDINGS AND PURPOSES

SEC. 202. (a) FINDINGS.—The Congress finds that—

(1) the Gorge is a unique national and regional asset containing historic, cultural, community, biological, scientific, economic, geologic and transportation resources which must be maintained for the benefit of all citizens;

(2) the Gorge is an indivisible natural entity which should be viewed as one unit since management or development actions of one agency may have serious impacts on resources such as air and water quality, water flow, soil stability, fish and wildlife habitat and scenic beauty of areas of the Gorge within the jurisdiction of other agencies;

(3) there are more than fifty local, state and federal agencies presently exercising governmental authority in the Gorge which have widely divergent regulations and policies governing development, management and protection of the Gorge, and the existence of so many different and divergent governmental agencies functioning in two states within the Gorge has made unified management of the Gorge difficult;

(4) in order to protect natural, scientific, economic, cultural and other values of federal, state and local government lands and facilities located within the Gorge, there must be a real partnership between all jurisdictions within the Gorge through a management entity having the authority and financial resources to protect and enhance the Gorge's resources;

(5) the Gorge Area contains over 40,000 residents in cities, towns and rural communities. Their right to continue enjoyment of their homes and their economic well-being must be assured.

(6) the scenic, historic, recreational, archaeological, and scientific qualities of the Gorge, particularly those located in the most sensitive and critical lands within the Gorge, deserve identification and protection;

(7) the Gorge is an historic gateway between the Pacific Ocean and the interior of North America traveled by Native Americans, explorers, traders, and pioneers; evidencing human habitation for over 11,000 years, the Gorge Area contains a major navigable waterway used in interstate commerce and is today of commercial and economic importance to the Pacific Northwest and the Nation in terms of transportation, energy production, fishing, agriculture, and recreation;

(8) the Gorge is a spectacular canyon of compelling and majestic beauty formed by the Columbia River, cutting through the Cascade Range which contains magnificent scenic, natural, and recreational resources of regional, national and international significance;

(9) the botanical diversity of the Gorge, ranging from sagebrush and grasslands in the eastern portion to lush rain forests in the west, includes many threatened and endangered species and is unique in the Nation and the world;

(10) because of its unique resources, the Gorge is a natural area for tourism and recreation, and the highways, trails and scenic viewpoints in the Gorge Area are heavily used by residents of the nearby Portland-Vancouver metropolitan area and by visitors from throughout the Pacific Northwest, the Nation, and the world;

(11) competing uses of and human impacts on the Gorge include federal hydroelectric power development, state and interstate highway construction and intense development of port and navigation facilities, farms, orchards, forest production, cities, and towns;

(12) the possibility of urban and suburban development and the lack of coordinated planning and authority within the Gorge have given rise to the fear of a threat to the preservation of this unique natural resource;

(13) state and federal agencies and private parties undertake land management and development activities such as timber harvesting, development of energy and transmission facilities and highway construction which impact the physical appearance of the Gorge Area and have a substantial effect on interstate commerce;

(14) federal and state government agencies and local governments currently lack the financial and technical resources and areawide planning authority necessary to protect and enhance the unique resources of the Gorge and to resolve existing and potential differences between and inconsistent actions taken by those government agencies and citizens involved in developing, planning for, protecting and enhancing the Gorge;

(15) numerous comprehensive studies of the Gorge have been done by federal and state agencies and commissions detailing the resources of and threats to the Gorge Area which have concluded that unified management of the Area is essential to its continued viability;

(b) PURPOSES.—The purposes of this title are—

(1) to protect and enhance the scenic, cultural, and natural resources of the Columbia River Gorge, including sensitive habitats of threatened and endangered species of flora and fauna and critical and sensitive lands, while providing for public enjoyment, enhancement of local communities, and continued commerce;

(2) to protect, conserve, and enhance the scenic, natural, cultural and other values of existing federal, state and local government property located in the Gorge, including lands owned or controlled by the numerous Departments of the United States Government and the States of Oregon and Washington;

(3) to enhance the well-being of residents and encourage continued growth and vitality of existing municipalities, homes and businesses in the Gorge Area;

(4) to establish a single management entity charged with providing for and managing the public use and enjoyment of the Columbia River Gorge in a manner consistent with natural resource protection and maintenance of the existing landscape, including establishment, acquisition, maintenance, and operation of public recreation, natural areas, and tourist and interpretive facilities to meet the needs of the growing population and increased travel in the region;

(5) to establish a mechanism for effective cooperation in the Gorge by local, state and national interests through creation of a commission with authority and resources to develop, monitor and enforce a unified management plan for the Gorge which is binding on all governmental entities having authority over land and resources in the Gorge that will protect, preserve and enhance its unique resources;

(6) to establish a process by which critical and sensitive lands within the Gorge will be identified and a program to assure their protection and preservation will be established and maintained;

(7) to protect and preserve the historic and archaeological resources of the Columbia River Gorge and, where appropriate to make these resources more available to the public for educational and scientific purposes;

(8) to encourage and strengthen tourism and economic development efforts in the Gorge which rely on the natural resources and are compatible with the unique natural setting of the area;

(9) to foster and enhance the historical uses of the Gorge as a vital transportation corridor in interstate commerce and as an important source of regional power generation in the Pacific Northwest;

(10) to utilize to the fullest extent possible the land use planning and other resources and powers of local and state governments and existing federal agencies to develop and implement the management plan for the Gorge;

(11) to provide resources and assistance to state and local governments to foster the policies and realize the purposes of this Title;

(12) to provide for extensive public review and comment on Gorge management plans; and

(13) to provide funds to assist in the administration of this Title and for the purchase of critical and sensitive lands in the Gorge:

DEFINITIONS

SEC. 203. DEFINITIONS.—

(a) "Agency" or "Agencies" refers to all state and federal agencies, departments, commissions, boards, instrumentalities and quasi-governmental entities which have any authority to undertake, assist, regulate or grant any permit, license or other form of approval for any land management or development within the Gorge Area: *Provided*, "assist" as used herein refers to any grant, loan, loan guarantee, sale of flood insurance or any other form of direct or indirect financial or technical assistance to any other agency, person, corporation or private entity;

(b) "Columbia River Gorge," "Gorge," "Area" as used herein refers to the combined geographical area respectively defined on the effective date of this Title as the Columbia River Gorge by the Washington State Legislature in chapter 48, Laws of 1975, 1st Extraordinary Session, now codified as RCW 43.97.090 and by the Oregon State Legislature in chapter 482, Laws of 1977, now codified as ORS 390.460 and as legally described in Appendix A to this Title and depicted generally on the map entitled "Columbia River Gorge Vicinity, October, 1979," attached to this Title as Appendix B, both of which are incorporated herein by this reference;

(c) "Commission" refers to the Columbia River Gorge Commission established by section 5(a) of this Title;

(d) "Critical and sensitive lands" refers to lands or shorelines having any of the characteristics described in section 209(b)(2) of this Title;

(e) "Implementation Plans" refer to the plans developed by federal and state agencies and local governments pursuant to section 210 of this Title which shall govern and regulate land management and development within the Gorge Area;

(f) "Land Management or Development" or "Development" refers to projects and activities, or permits and approvals which allow projects and activities, which may impact, alter or modify the physical appearance, form or character of land or shorelines and the structures thereon within the Gorge Area, including but not limited to:

(1) Construction, expansion, modification or location of buildings, mobile homes, energy facilities, transmission and receiving facilities or other structures;

(2) Agency or local government approval of plans, zoning and other land use ordinances, subdivisions or other land use or building approvals or permits;

(3) Sales or conveyances by agencies of timber or timber lands, timber harvesting and application of forest practices regulations;

(4) Land clearing, grading and filling, except land cultivation for agricultural activities;

(5) Road or highway construction or expansion; and

(6) Sand, gravel or mineral extraction;

The term "Land" as used herein shall include "Shorelines," which shall refer to (i) all lands extending landward of the low water mark of, (ii) all wetlands, bogs, marshes and deltas associated with, and (iii) all lands which are subject to intermittent or periodic inundation with water from any river, stream or lake situated with the Gorge Area. If any part of a development is located within a shoreline, the entire development shall be subject to this Title.

(g) "Local Government," where uses in this Title, refers to any county, city, town, port or other municipal corporation or other governmental entity created by or pursuant to state law and located, in whole or in part, within the geographical area defined in section 203(b) of this Title.

(h) "Management Plan" refers to the management plan developed pursuant to section 209(a) and 209(b) of this Title.

ESTABLISHMENT OF AREA

SEC. 204. ESTABLISHMENT OF AREA.—The Columbia River Gorge Area is hereby established, consisting of all lands located within the geographical area described in section 203(b) of this Title.

ESTABLISHMENT OF THE COMMISSION

SEC. 205. (a) ESTABLISHMENT.—There is hereby established the Columbia River Gorge Commission which shall administer this Title, and which shall consist of 14 members, to be appointed as follows:

(1) one elected official each from Clark, Skamania, and Klickitat Counties in the state of Washington, or a local government within said Counties;

(2) one elected official each from Wasco, Hood River, and Multnomah Counties in the state of Oregon, or a local government within said Counties;

(3) four members-at-large who shall be residents of the state of Washington, at least 2 of whom shall be residents of the Gorge Area; and

(4) four members-at-large who shall be residents of the state of Oregon, at least two of whom shall be residents of the Gorge Area;

(b) NOMINATION AND APPOINTMENT.—Not more than thirty days after the effective date of this title, and thereafter within forty-five days if a vacancy occurs, the Governors of the states of Washington and Oregon each may provide to the President of the United States a list of nominations from such state for each of the state's positions and shall include such information about the nominees as the President may request. Within thirty days of receipt of the nominations, the President shall appoint the Commission members from each Governor's list of nominations for each state's positions, except that the President may decline to appoint for any reason any of a Governor's nominees for a position and shall so notify the Governor. The Governor may thereafter make successive nominations within thirty days of receipt of the notice until nominees acceptable to the President are appointed for each position. In the event the required nominations for any state position on the Commission are not received from the Governor of either state within the time specified for such nominations, the President shall appoint the Commission member or members for the positions specified in subsection (a) of this section.

(c) CHAIR AND VICE-CHAIR.—Each Governor may include in the lists of nominees submitted to the President pursuant to subsection (b) of this section one nominee each for the chair and vice-chair of the Commission. Such nominees shall be chosen from among the nominees for the member-at-large positions on the Commission. The President shall appoint the chair and vice-chair from among the nominees designated by the Governors, except that the President may decline to appoint for any reason any of a Governor's nominees for chair or vice-chair of the Commission and shall so notify the Governors. The Governors may thereafter make successive nominations for chair and vice-chair of the Commission within thirty days of receipt of such notice until nominees acceptable to the President are appointed for each position. The President shall decide whether the first chair will be from Oregon or Washington and the positions of chair and vice-chair shall alternate therafter between the staff every two years. The chair and vice-chair may not be residents of the same state. The vice-chair shall serve as the chair-elect.

(d) TERMS.—Members of the Commission shall be appointed for a term of four years, except that the initial appointment of the eight members-at-large shall be as follows: one from each state shall be appointed for a term of four years, and one from each state shall be appointed for a term of three years, and one from each state shall be appointed for a term of two years, and one from each state shall be appointed for a term of one year. Thereafter, all citizen members of the Commission shall be appointed for terms of four years. No member shall serve more than two full four-year terms, which shall not include partial terms served as a result of initial appointments or appointments to fill vacancies.

(e) NON-VOTING EX OFFICIO MEMBERS.—The President shall appoint as non-voting ex officio members of the Commission a representative of the United States Forest Service, the Bonneville Power Administration, the United States Army Corps of Engineers and such other federal or state agencies as may be deemed appropriate.

(f) VACANCIES.—Any vacancy in the Commission shall be filled in the same manner in which the original appointment was made.

(g) HOLDOVER TERMS.—Any member may serve after the formal expiration of his or her term until a successor is appointed.

(h) QUORUM AND VOTING.—A quorum shall consist of eleven members. The Commission shall act only on an affirmative vote of a majority of those members present, except that a lesser number may, pursuant to rules established by the Commission, be authorized to hold hearings.

(i) COMPENSATION.—Commission members shall be allowed per diem compensation and travel expenses in the same manner as prescribed by sections 5702-5707 of Title 5, United Stated Code, as now or hereafter amended.

(j) MEETINGS.—

(1) the Commission shall meet at least once every three months and meetings of the Commission shall be held within the Columbia River Gorge Area. The Commission shall give notice of all regular meetings and hearings by publishing notice fourteen days in advance thereof in two or more newspapers of general circulation in the Gorge Area, one of which shall be published in Washington and one in Oregon. The notice shall state the date, time, place and agenda of the meeting. The Commission shall not be limited to considering items of business included on the published agenda. The Commission may call such emergency or special meetings as the chair or a majority of the members of the Commission deem necessary without having first complied with the notice provisions of this section, provided that the Commission shall make a reasonable attempt to notify the news media in the Gorge Area of such special or emergency meetings.

(2) all actions of the Commission shall be taken at open public meetings: *Provided*, That the Commission may hold executive sessions during a regular or special meeting: to consider matters affecting national security; to consider the selection of a site or the acquisition of real estate by lease or purchase, when publicity regarding such consideration would cause a likelihood of increased price; to consider the disposition of real estate by lease or sale, when publicity regarding such consideration would cause a likelihood of decreased price; to discuss pending or ongoing litigation; to consider the appointment, employment, or dismissal of a public officer or employee; or to hear complaints or charges brought against such officer or employee by another public officer, person, or employee unless such officer or employee requests a public hearing. The Commission also may exclude from any public meeting, hearing or executive session, during the examination of a witness on any matter, any or all other witnesses in the matter being reviewed or investigated by the Commission.

(k) COMMISSION OFFICE.—the Commission shall designate a principal office to be located within the Gorge Area and may designate other offices within or outside of the Gorge Area.

POWERS OF THE COMMISSION

SEC. 206. (a) AUTHORITY AND RESPONSIBILITY.—The Commission shall have the following powers and duties—

(1) it shall prepare, adopt, implement and enforce a unified Management plan for the Gorge;

(2) it shall identify critical and sensitive lands in the Gorge and develop, implement, and enforce a program to protect those lands;

(3) it shall review federal, state and local Implementation plans for compliance with the Management plan and certify such plans as are found to be in compliance;

(4) it shall prepare a biennial report to the President, the Congress, and the Governors and state legislatures of the states of Washington and Oregon advising them of the status of the Management Plan and its implementation;

(5) it is authorized to acquire any fee or less-than-fee interest in property pursuant to section 211 of this Title;

(6) it is authorized to exercise the power of eminent domain but only to acquire critical and sensitive lands and further subject to the provisions of section 211(b) of this title;

(7) it is authorized to make gifts or exchanges of land or interests therein or enter into contracts with other agencies, local governments or not-for-profit organizations for purposes of conveying or accepting fee or less-than-fee interests in land or providing for management of lands or interests in lands held by the Commission when the Commission determines that such gifts, exchanges or contracts will further the purposes of this title;

(8) it is authorized to acquire real and personal property or services in furtherance of the purposes of this title;

(9) it is authorized to make grants to agencies, local governments and not-for-profit organizations for purposes of purchasing fee or less-than-fee interests in land as set forth in section 211;

(10) it is authorized to review and recommend to Congress any alterations of the boundaries of the Gorge Area as may become necessary to achieve the purposes of this title;

(11) it is authorized to provide technical and financial assistance to federal agencies as well as to state agencies and local governments to carry out the purposes of this title;

(12) it is authorized to adopt such rules and regulations as it may deem necessary pursuant to the procedures established in section 553 of Title 5, United States Code; *provided*, adoption of the Management Plan and certification of Implementation Plans shall not constitute adoption of rules or regulations within the meaning of section 553;

(13) it is authorized to establish an executive committee and appoint subcommittees and advisory committees as needed;

(14) it is authorized to hear appeals pursuant to the procedures established in sections 554-557 of Title 5, United States Code, and this title;

(15) it is authorized to employ such staff as may be needed without regard to the provisions of Title 5, United States Code, governing appointments in the competitive service. Employees of the Commission may be paid without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, except that no individual so appointed may receive pay in excess of the annual rate of basic pay for grade GS-15 of the General Schedule as it is established from time-to-time;

(16) it is authorized to procure professional, technical and other services, including legal counsel, to the extent deemed necessary and at rates determined by the Commission to be reasonable compensation for such services;

(17) it is authorized to nominate sites and objects of historic or archaeological significance for inclusion on the National Register of Historic Places;

(18) it is authorized to sue and be sued;

(19) it is authorized to initiate and approve such amendments to the Management Plan or Implementation Plans as the Commission deems necessary to implement the purposes and policies of this Title; and

(20) it is authorized to take such other actions as may be necessary to carry out the purposes and policies of this Title.

TIMETABLE FOR ADOPTION OF PLANS

SEC. 207. (a) APPOINTMENT OF COMMISSION.—Within thirty days after the effective date of this Title, the Governors of the states of Washington and Oregon may submit nominations to the President for appointment to the Commission and within sixty days after the effective date of this Title the President shall appoint the members of the Commission pursuant to the provisions of sections 205 (a) and (b) of this Title.

(b) MANAGEMENT PLAN.—Within eighteen months after appointment of its members, the Commission shall adopt the Management Plan pursuant to section 209 of this Title.

(c) IMPLEMENTATION PLANS.—Within twelve months after the Commission's adoption of

the Management Plan, all agencies and local governments covered by this Act shall submit implementation plans to the Commission pursuant to section 210 of this Title.

INTERIM PROCEDURES

SEC. 208. INTERIM REVIEW OF LAND MANAGEMENT OR DEVELOPMENT ACTIVITIES.—

(a) ACTIVITIES REQUIRING COMMISSION REVIEW.—Those land management or development activities which consist of sand, gravel or mineral extraction, subdivisions and short platting, and construction of commercial and industrial facilities shall not be undertaken, assisted, regulated or approved by any federal or state agency or local government, or any official or employee thereof, between the date the Commission members are appointed (but in any event no later than sixty days after the effective date of this Title and the date the Commission certifies an Implementation Plan for the agency or local government pursuant to section 210(b) of this Title, until sixty days have expired after the Commission receives notice of any proposal or application for such land management or development pursuant to section 208(b) below.

(b) PROCEDURE FOR COMMISSION REVIEW.—

(1) Prior to certification of its Implementation Plan, every agency or local government which proposes to undertake, assist, regulate, or which receives an application for those land management or development activities defined in section 208(a) above in the gorge shall give notice of the proposal or application to the Commission at the earliest possible time. The notice shall include a copy of the application and all plans, profiles, studies and other documents related to the proposal or application available to the agency or local government. In the case of an application received by an agency or local government, notice of the application shall be given to the Commission no later than seven days after the agency or government receives such application.

(2) Within sixty days after receipt by the Commission of the notice required in (b)(1) above, the Commission shall have the authority to review such proposal or application to determine whether it is consistent with the purposes of this Title, the Commission's interim guidelines when adopted, and the Management Plan when adopted. If the Commission determines that the proposal or application is inconsistent with such purposes, guidelines or Management Plan, it shall so notify the agency or local government submitting the proposal or application, setting forth the reasons for its decision in writing.

(3) In the event the Commission has made a written determination of inconsistency, said land management or development activity shall not proceed unless, upon resubmission of the proposal or application to the Commission, a determination of consistency is made. No proposal or application shall be resubmitted to the Commission unless it has been modified to eliminate the inconsistences found by the Commission. In the event the Commission makes no written finding of inconsistency as provided herein within sixty days of receipt by it of the notice required in (b)(1) above, the proposal or application shall be deemed approved. In the event the documents constituting notice described in (b)(1) above are not all received by the Commission on the same date, the sixty-day review period will commence on the latest of the submission dates.

(4) Upon certification by the Commission of an Implementation Plan pursuant to section 210 of this title, the requirements of this section shall cease to apply to the agency or local government for which an Implementation Plan has been certified; *Provided,* That nothing in this section shall be construed to prohibit the Commission from receiving and investigating complaints of noncompliance with such certified Implementation Plans or taking such actions as it deems necessary to enforce the provisions of this title, the Management Plan or any certified Implementation Plan.

(c) COMMISSION REVIEW OF ADDITIONAL ACTIVITES.—In addition to reviewing the activities specified in section 208(a) above, the Commission is authorized to initiate review of any other land management or development activity, as defined in section 3 above, (i) on lands which meet the criteria for critical and sensitive lands or (ii) which the Commission determines may cause an irreparable change inconsistent with the purposes of the title or which may have a significant adverse impact upon effectiveness of the Management Plan to be adopted. The Commission may initiate such review by written notice from the chair to the federal or state agency or local government proposing or which has received an application for such land management or development activity. After receipt of said notice from the Commission, the agency or local government shall provide the Commission with the applications, plans, profiles, studies and other documents relating to such activity and no such land management or development shall be undertaken, assisted or approved by any federal or state agency or local government until the Commission makes a written determination of consistency or inconsistency. The Commission shall make a determination within sixty (60) days after it receives the application and related documents and the Commission shall follow the procedures of section 208(b)(2) and (3) to the extent not inconsistent with this subsection.

(d) INFORMATION TO AGENCIES AND LOCAL GOVERNMENTS.—From time-to-time the Commission in its discretion may provide information or notice to agencies and local governments regarding the application of this title to land management or development undertaken, regulated or approved by said agencies or local governments, the requirements and procedures for interim review or any other matters relating to compliance with the Act and the rules, regulations or guidelines of the Commission; *provide,* no information or notice given shall affect the required submission of proposals or applications to the Commission under subsections (a) and (b) of this section or under section 210.

MANAGEMENT PLAN FOR THE AREA

SEC. 209. (a) PREPARATION.—The Commission shall prepare a Management Plan for conservation, use and development of the Area. In preparing the Management Plan, the Commission shall use, among other data and documents, the information and data developed in previous studies of the Gorge conducted by federal and state agencies and local governments. During the preparation of the Management Plan, the Commission shall hold public meetings and hearings to receive testimony from residents of the Area, representatives of governments and agencies potentially affected by the Management Plan, and citizens and representatives of groups interested in the development and preservation of the Gorge. The Commission shall give notice of the dates, times and locations of such public meetings and hearings as provided in section 205(h) of this title. Participation in meetings and hearings concerning the Management Plan shall be provided for and the Commission shall insure that the objectives of the Management Plan, the actions to be undertaken in the preparation of the Management Plan and the times when such actions are proposed to be taken are well publicized and openly discussed.

(b) CONTENT.—The Management Plan shall—

(1) be based upon such inventories, studies and analyses of the Gorge's resources, including but not limited to the archaeological, social, economic, forest, historical, natural, geological, botanical, recreational and scenic characteristics of the Area as the Commission deems appropriate;

(2) designate critical and sensitive lands within the Gorge Area which are essential to its protection, development and interpretive value including:

(A) lands which have unique or distinctive scenic features in the Gorge;

(B) lands containing rare or endangered wildlife or plants eligible for designation under federal or state authorities;

(C) lands which are or may qualify for designation as landmarks or natural heritage, historic places or archaeologic sites of State or national significance;

(D) lands needed to provide critical recreation and interpretative facilities and access to public lands for visitors to the Gorge including lands identified for park, recreation, open space, trails or natural areas pursuant to federal, state or local plans;

(3) contain a program for protection of the critical and sensitive lands identified by the Commission. This can be through land use controls, incentives and subsidies, land trades, less-than-fee acquisition, including scenic easements and development rights, fee title acquisition or other means pursuant to the provisions of section 211 of this Title.

(4) contain goals and guidelines which establish objectives for the treatment of resources in the Gorge, including urban, rural, and natural resource lands, that set forth appropriate residential, commercial, industrial, timber, agricultural, mining and recreational uses, practices and design standards;

(5) establish procedures for review of federal, state and local Implementation Plans, and amendments thereto, for conformance with the goals, guidelines and standards of the Management Plan;

(6) contain goals and guidelines to promote the economic viability of the communities within the Gorge Area in a manner consistent with the purposes of the Title;

(7) establish procedures for periodic amendments to the Management Plan and Implementation Plans.

CERTIFICATION OF IMPLEMENTATION PLANS

SEC. 210. (a) NOTICE AND LETTERS OF INTENT.—

(1) Upon adopted of the Management Plan, the Commission shall transmit a copy of the Management Plan to and notify each federal and state agency and local government which engages in, assists, regulates or issues permits or approvals for land management or development in the Gorge that an Implementation Plan shall be submitted within twelve months of the notice. Within sixty days after receipt of such notice, each agency and local government shall submit to the Commission a letter stating that it proposes to develop an Implementation Plan for land management and development with the Area in which it operates or has

authority and any ageny or local government may request assistance from the Commission in developing an Implementation Plan.

(2) If any agency or local government fails to submit a letter as provided in this section, or fails to submit an Implementation Plan in accordance with the time provided in this section, the Commission may issue to such agency or local government a notice and order pursuant to section 217 of this title and may adopt an Implementation Plan for that agency or local government.

(b) SUBMISSION OF IMPLEMENTATION PLAN.—Within twelve months after adoption of the Management Plan, all federal and state agencies and local governments required to submit letters of intent shall submit Implementation Plans to the Commission for review and certification. All such Plans shall provide for regulation of all land management and development within the Gorge Area which the agency or local government may engage in, assist, regulate, or for which it issues permits or approvals. The Implementation Plans shall recognize it is the responsibility of the agencies and local governments to enforce the Implementation Plan and utilize the full authority of the agencies and local governments to carry out the purposes of the title. The Implementation Plan shall be consistent with the Management Plan. The Commission may specify the format and types of provisions to be included within the Implementation Plans.

(c) COMMISSION REVIEW OF IMPLEMENTATION PLANS.—Implementation Plans shall become effective upon review and approval by the Commission. The Commission shall make a good faith effort to complete its review within six months of submission to it of an Implementation Plan. If the Plan is consistent with the Management Plan and the purposes to this title, the Commission shall so certify to the agency or local government submitting the Plan.

(d) EFFECT OF SUBMISSION OF INCONSISTENT IMPLEMENTATION PLAN.—If the Commission finds that an Implementation Plan is not consistent with the Management Plan or the purposes of this title, the Commission shall make a good faith effort to so notify the agency or local government submitting the Plan within six months of submission. The Commission shall state in detail the basis for that decision and shall submit to the agency or local government suggested modifications to the Plan to make it consistent with the Management Plan and the purposes of this title. The agency or local government shall have ninety days after it receives recommendations from the Commission to make modifications eliminating the inconsistencies and to resubmit the Plan to the Commission for approval. Any resubmitted Implementation Plan shall take effect when and in such form and content as is approved and certified to the local government or agency by the Commission. In the event that the Commission determines that a resubmitted Plan is not consistent with the management Plan or the purposes of this title, the provisions of section 210(a)(2) shall apply and the Commission may adopt an Implementation Plan for the agency or local government.

(e) LATER SUBMISSION BY FEDERAL, STATE OR LOCAL AGENCY OR GOVERNMENT.—

(1) In the event that an agency or local government has not complied with the requirements of this section, it may thereafter on written notice to the Commission elect to develop an Implementation Plan, in which event it shall comply with the requirements of this section. Upon certification of such Implementation Plan by the Commission, it shall supersede any plan that may have been adopted by the Commission for that local government or agency.

(2) Federal and state agencies and local governments not initially required to submit letters of intent and Implementation Plans to the Commission pursuant to subsections (a) and (b) of this section shall submit letters of intent within sixty days, and Implementation Plans within twelve months, of the occurrence of one or more of the following events:

(A) creation after the effective date of this title of an agency or local government which is authorized to undertake, assist, regulate or approve activities which constitute land management or development as defined in this title;

(B) additions to or changes in the functions or authority of an existing agency or local government which authorizes it to undertake, assist, regulate or approve activities which constitute land management or development as defined in this title; or

(C) a determination by an agency or local government which does not normally undertake, assist, regulate or approve activities which constitute land management or development as defined in this Act to do so.

(f) EFFECT OF CERTIFIED IMPLEMENTATION PLAN.—Upon certification by the Commission of an Implementation Plan, that Plan shall become the basis for all subsequent decisions by the agency or local government concerning all land management and development and shall overlay and supersede all conflicting or inconsistent statutes, laws, ordinances, plans, rules and regulations.

(g) AMENDMENTS OF IMPLEMENTATION PLANS.—Either the Commission or an agency or local government having a certified Implementation Plan may propose such amendments as it deems necessary from time-to-time. Proposed amendments shall be reviewed and approved or disapproved in conformance with the requirements of this section.

ACQUISITION

SECTION 211. (a) AUTHORIZATION.—The Commission is authorized to identify fee and less-than-fee interests in lands within the Gorge which shall be acquired and held in public ownership. In the event such lands are not acquired or held by existing federal or state agencies or local governments, then the Commission is authorized to acquire by donation, purchase with donated or appropriated funds, exchange, bequest, lease, gift or to otherwise acquire fee or less-than-fee interests in any lands, including but not limited to air rights, water rights, mineral rights, development rights, and scenic and conservation easements, which the Commission determines are necessary or appropriate to achieve the purposes of this title. The Commission may hold and manage such property or may convey or lease such property under such convenants or other contractual arrangements as provided in section 6 above as will limit the future use of the property in accordance with the purposes of this title.

(b) EMINENT DOMAIN.—The Commission may exercise the power eminent domain but such power is (i) limited to acquisition of critical and sensitive land (ii) shall be exercised to acquire full fee title not a less-than-fee interest and (iii) shall be exercised only upon a determination that all other reasonable methods for protecting such lands, including but not limited to land use controls, incentives and subsidies, willing seller, less-than-fee or fee title acquisition, are unsuccessful, (iv) shall not be exercized to acquire owner-occupied, single family residences. The Commission shall separately approve by a two-thirds majority each exercise of the power of eminent domain by official action at a public meeting. Eminent domain proceedings initiated by the Commission shall be governed by the provisions of sections 257 and 258 of Title 40, United States Code, except to the extent inconsistent with the provisions of this title.

(c) CONSIDERATION OF AREA LANDOWNER OFFERS.—The Commission shall give prompt and careful consideration to all offers of sale or transfer made by persons owning real property or any interest therein within the Area, weighing any hardship to the owner which may result from delay in acquisition.

(d) ACQUISITION BY AGENCIES AND LOCAL GOVERNMENTS.—The Commission may recommend to any agency or local government the acquisition of particular lands and the fee or less-than-fee interest therein as appropriate to carry out the purposes of this title. Notwithstanding any other provision of law to the contrary, any agency or local government is hereby authorized to acquire by donation, purchase with donated or appropriated funds, exchange, bequest or otherwise any fee or less-than-fee interests in any lands in the Gorge indentified by the Commission. The Secretary of Agriculture, through the United States Forest Service, may acquire through purchase, exchange or otherwise any land within the Gorge notwithstanding the proximity of such lands to be acquired to lands then owned or controlled by the Forest Service. The Commission may direct the United States Forest Service to make such exchanges of land as the Commission deems necessary to acquire critical and sensitive lands within the Gorge.

FEDERAL LANDS WITHIN AREA

SEC. 212. CONFLICTS WITH FEDERAL AGENCIES MANAGING LANDS WITHIN AREA.—Lands owned or managed by any agency of the United States shall remain subject to management and control by the appropriate federal agency and otherwise subject to the provisions of law applicable to managment of such lands. In the case of conflict between any provision of this title and any other provision of law applicable to federal management of lands within the Gorge Area, the provisions of this title shall govern.

INTERGOVERNMENTAL COOPERATION

SEC. 213. (a) RETENTION OF STATE AND LOCAL JURISDICTION.—Nothing in this title shall diminish, enlarge, or modify any right of the state of Oregon, the state of Washington or any local government of either state to exercise civil and criminal jurisdiction within the Area or to tax persons, corporations, franchises, or property, including mineral or other interests, in or on lands or waters therein.

(b) STATE AND LOCAL LAND USE POWERS FULLY EXERCISABLE.—Nothing in this title shall be construed to prevent the enactment, adoption or implementation by any state or local government of any law, ordinance, rule or regulation, plan, land use control or other provision of law which is consistent with applicable state law and with the provisions of this title. In the case of conflict between any provision of this title and any other provision of state or local law

applicable to lands within the Area, the provisions of this title shall govern.

INDIAN TRIBAL RIGHTS NOT IMPAIRED

SEC. 214. INDIAN TRIBAL RIGHTS NOT IMPAIRED.—Nothing in this title shall be construed to alter, amend, repeal, impair, modify or otherwise affect any treaty or other right of an Indian tribe.

EXEMPTIONS FROM THE TITLE

SEC. 215. EXEMPTIONS FROM ACT.—The provisions of this title shall not apply to—

(a) The ongoing development of new locks at the Bonneville Dam;

(b) any emergency land management or development by an agency or local government which is essential to the protection of public health or safety or necessary for national security or defense;

(c) any land management or development which has commenced prior to the date of enactment of this title; *provided,* (i) for land management or development undertaken by or receiving assistance from agencies or local governments, "commencement" shall occur at such time as binding agreements or contractual obligations for the land management or development activity have been entered into and such agreements or obligations cannot be cancelled or modified without substantial monetary loss or penalty, or if no contract or binding agreement is used or required, at such time as actual physical modification of the land or shoreline has occurred; or (ii) for land management or development consisting of agency or local government approvals or permits for land management or development, "commencement" shall occur at such time as the agency or local government has issued all required permits and approvals for the land management or development activity.

(d) agricultural activity on lands used principally for agriculture purposes, and commercial forest activities conducted on forest lands as those lands are now or hereafter defined in the respective Forest Practice Acts of Oregon and Washington; excepting only where, upon completion of the agricultural or commercial forest activity, the lands will be converted to a different use.

ENFORCEMENT

SEC. 216. (a) INITIATION OF ENFORCEMENT PROCEEDINGS.—

(1) The Commission shall have authority to enforce this title through an administrative notice and order proceeding to be established pursuant to the standards set forth in subsection (2) below. Whenever the Executive Committee has reason to believe a use or condition exists in violation of the title, the Management Plan, an Implementation Plan, interim guidelines of a determination of the Commission pursuant to sections 208 and 210 of this title, the Executive Committee may direct the issuance of a notice and order to stop work, to assess a civil penalty in an amount not to exceed $500 per day, or to abate the violation and restore the land or shoreline, or any combination thereof. The effect of a notice and order to stop work shall be to require the immediate cessation of such work or activity until authorized by the Commission to proceed.

(2) Prior to issuing a notice and order, the Commission shall have adopted rules and regulations to implement this section which shall:

(A) establish standards and procedures for the issuance, contents and service of a notice and order to stop work and for civil penalties and abatement and restoration;

(B) provide that a notice and order to stop work shall be issued only when agencies or local governments have not commenced an enforcement action and where the Commission's Executive Committee determines (i) that a violation exists and the violation is causing or can reasonably be expected to cause significant, imminent environmental harm or an imminent danger to the health or safety of the public, or (ii) that more than thirty days have expired since the issuance of a notice and order to abate and restore and the abatement and restoration ordered therein have not been undertaken or completed;

(C) provide that where a notice and order has been issued pursuant to subsection (B) of this section, the owner, operator, person or agency upon whom the notice and order is served may, within thirty days of service thereof, apply to the chair or vice-chair for temporary relief from the notice and order to stop work. Within five days of receipt of such request for temporary relief, the chair or vice-chair shall issue a written decision granting or denying the requested relief or modifying the notice and order to stop work and stating the reasons for decision;

(D) provide for an administrative appeal of a notice and order pursuant to section 219 of this title.

(3) Any person adversely affected by a decision of the Commission rendered after an administrative appeal of an enforcement order may, within thirty days of the decision of the Commission, bring an action for review of such order as provided in section 219(e) of this title.

(b) JUDICIAL RELIEF.—Notwithstanding any other procedure of remedy provided for in this section, the Commission may bring an action for damages, punitive damages, injunctive, declaratory or other relief, including suspension or revocation of a permit or approval, in the United States District Courts of Oregon or Washington to prevent or correct any violation of this title, the interim guidelines, the Management Plan, an Implementation Plan, or a decision or an order of the Commission.

(c) CRIMINAL PENALTIES.—Any person who knowingly and willful violates any order of the Commission which is lawfully issued pursuant to subsection (a) above shall be fined no more than $10,000 or imprisoned no more than twelve months, or both.

(d) WITHHOLDING OF FEDERAL FUNDS.—In addition to the remedies provided for in subsections (a) through (c) of this section, no federal funds shall be granted, loaned, contracted for or in any manner committed or disbursed for or with regard to any land management or development as defined in this title which does not comply with the title, interim guidelines, the Management Plan, an Implementation Plan, or a decision or an order of the Commission.

JURISDICTION OF FEDERAL COURTS

SEC. 217. JURISDICTION OF FEDERAL COURTS.—The courts of the United States shall have exclusive jurisdiction of actions arising under this title, and venue shall be in the United States District Courts for Washington or Oregon.

APPEALS

SEC. 218. (a) DECISIONS APPEALABLE.—Any agency, local government or person aggrieved by a decision or order of the Commission made pursuant to sections 208 (including failure of the Commission to find inconsistency thereunder), 210, 211 and 217 of this Title shall be deemed final unless a written appeal stating the basis and arguments therefor is filed in the principal office of the Commission no later than thirty days after entry by the Commission of the decision or order being appealed. Rules and regulations adopted by the Commission shall not be construed as decisions or orders under this section.

(b) ADMINISTRATIVE LAW JUDGES.—Appeal hearings for the Commission shall be conducted by an independent administrative law judge who shall make findings and recommend actions to the Commission.

(c) HEARING PROCEDURE.—All appeal hearings shall be conducted pursuant to sections 554–557 of Title 5, United States Code.

(d) DECISIONS FINAL.—All decisions of the Commission shall be final unless within thirty days of the decision an action is brought in the United States District Courts for Washington or Oregon challenging the decision.

MITIGATION OF LOCAL REVENUE LOSSES

SEC. 219. MITIGATION OF LOCAL REVENUE LOSSES.—Any private lands acquired by the Commission under this Title, whether retained by the Commission or transferred to the administrative jurisdiction of any other department, agency, or instrumentality of the United States, shall be treated as entitlement land within the meaning of sections 1601 *et seq.* of Title 31, United States Code.

AUTHORIZATION OF APPROPRIATIONS

SEC. 220. (a) IN GENERAL.—Effective for fiscal years commencing after September 30, 1983, there are hereby authorized to be appropriated such sums as may be necessary to carry out the purposes of this Title.

(b) LAND AND WATER FUND.—Effective for fiscal years commencing after September 30, 1983, amounts in the Land and Water Conservation Fund are authorized to be appropriated for the acquisition, in accordance with this Title and other applicable law of lands, waters, and interests therein within the Area.

(c) Effective for fiscal year that ends on September 30, 1984, there is authorized to be appropriated for the operation of the Commission and the initial implementation of this Title.

ACQUISITION FUND

SEC. 221. (a) ESTABLISHMENT.—There is established an acquisition fund for the acquisition of lands and interests therein within the Area. This fund shall be available without fiscal year limitation for expenses necessary for acquiring land and interests therein under section 211 hereof.

(b) INITIAL CAPITAL.—The initial capital of the fund shall consist of appropriations made for that purpose. The Commission is authorized to make such subsequent transfers to the fund as it deems appropriate in connection with activities to be carried on through the fund.

(c) APPROPRIATION.—There is hereby authorized to be appropriated a sum not to exceed as initial capital of the acquisition fund.

(d) DONATIONS.—The Commission may accept contributions or donations of money, services, and property, real, personal or mixed, for the management, protection, development, acquisition and conveying of the lands within the Area. Moneys received hereunder shall be credited to the acquisition fund.

COMPLIANCE WITH BUDGET ACT

SEC. 222. COMPLIANCE WITH BUDGET ACT.—No authority under this Title to enter into contracts or to make payments shall be effective except to the extent and in such

amounts as provided in advance in appropriations acts. Any provision of this Title which, directly or indirectly, authorized the enactment of new budget authority shall be effective only for fiscal years beginning after September 30, 1983.

LIBERAL CONSTRUCTION

SEC. 223. LIBERAL CONSTRUCTION.—This Title is remedial in nature and shall be liberally construed to achieve the purposes set forth herein.

SEVERABILITY

SEC. 224. SEVERABILITY.—Should any section, subsection, paragraph, sentence, clause or phrase of this Title be declared unconstitutional or invalid for any reason, such decision shall not affect the validity of the remaining portions of this Title".

Mr. GORTON. Mr. President, I am pleased to join my distinguished colleagues, Senators JACKSON and HATFIELD, in introducing, at the request of Governor Spellman of Washington and Governor Atiyeh of Oregon, legislation regarding the future management of the Columbia River Gorge. This legislation is being introduced as an amendment to S. 627, the Columbia River Gorge Act of 1983, which is currently pending in the Energy and Natural Resources Committee.

The Governors have been working diligently over the last several months to develop legislation that sets forth a broadly based plan for the area which, when implemented, will protect the natural, scenic, and cultural resources of the Gorge, as well as protect and recognize the importance of economic development for the region.

This legislative proposal provides a solid framework from which to resolve longstanding concerns about the Gorge. It forges a local, State and Federal partnership by establishing a Columbia River Gorge Commission to provide unified management of the area.

I have always believed that land management plans for the area should be developed primarily by those people at the State and local level who are most directly impacted by and concerned about the planning process. For this reason, I commend this legislative initiative by the Governors of Washington and Oregon. I appreciate their recognition of the important interests of those people who reside in the Gorge and their encouragement of the continued growth and vitality of existing municipalities, homes, and businesses in the area.

The unique features of the Columbia River Gorge are recognized and appreciated by everyone who is familiar with the area. Although people may differ on the solution, I believe that we all have the same goal in mind and that is to preserve and protect the special features of the Gorge for future generations to enjoy and to appreciate as we have done. With all interested parties working together, I believe that a balance can be achieved to protect these unique features and to retain the area as a viable economic base for the region.

In March, I held a town meeting in Vancouver to discuss the future management of the Gorge with concerned citizens. The meeting was helpful to me to learn about the interests and concerns of those citizens living in the Gorge area. In the future, I look forward to further meetings and hearings in the Gorge to discuss with all interested parties their recommendations or suggestions for changes or modifications to this important legislation. I also intend to work closely with the congressional delegations from Washington and Oregon.

Mr. JACKSON. Mr President, on behalf of the Governors of Oregon and Washington, I am joining my colleagues Senator GORTON and Senator HATFIELD in the introduction of an amendment regarding the Columbia River Gorge.

Mr. President, the introduction of this amendment today fulfills a commitment that I made last year to Governor Spellman of Washington and Governor Atiyeh of Oregon to place before the Congress their recommendation for insuring the protection, conservation, enhancement, and management of scenic, natural, cultural and other resource values in the Columbia River Gorge. This legislation was transmitted to me and the other members of the Washington and Oregon congressional delegation on July 22, 1983. I ask unanimous consent that the letter of transmittal and the text of this proposed legislation appear in the RECORD immediately following my remarks.

Mr. President, I wish to congratulate the Governor of my State and Governor Atiyeh for coming together in this fashion. The Governors and their staffs have spent countless hours attempting to resolve the many issues that must be addressed in legislation such as this which directly impacts upon two States. These individuals have worked long and hard to reach the agreement which is embodied in the amendment we are introducing today. I think they should be commended for their efforts in this regard.

Having said this, Mr. President, I want to make it abundantly clear to my colleagues in the Senate as well as others interested in the Columbia River Gorge that I have taken no position relative to the merits of the Governor's proposal. I am joining in the introduction of this amendment as a courtesy to the chief executives of the two States involved so that their proposal may, in due course, be considered along with other measures that have or may be introduced regarding the Gorge. I would not want my introduction of this measure today to be construed by anyone as an endorsement of the provisions or the concepts embodied in it.

Mr. President, I welcome the Governor's Gorge proposal and look forward to working with them as well as all other interested parties in the months ahead.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

OFFICE OF THE GOVERNOR,
Salem Oreg., July 22, 1983.

Hon. HENRY M. JACKSON,
U.S. Senator,
Washington, D.C.

DEAR SCOOP: In March, we announced a series of principles which we believed must be the basis of any proposal to manage the Columbia River Gorge. This was a significant moment in the history of our two states.

In the intervening months, our offices have prepared and circulated drafts of proposed legislation that reflected those principles. Comments were sought out from every quarter of opinion in as many as 30 meetings and review of dozens of letters.

The proposal we are transmitting is our collective effort to meld these varied opinions, while preserving our original principles. You will note several major changes and, we hope, improvements. For example, the size, composition and appointment of the Commission is dramatically changed. Other segments have been refined as well.

In the near future, Pat Amedeo and Ed Devine will be contacting your office to explain the background of the legislation and to answer questions we are sure will arise. We hope that you will join with your colleagues from Oregon and Washington and jointly introduce this legislation.

Sincerely,

VICTOR ATIYEH,
Governor of Oregon.
JOHN SPELLMAN,
Governor of Washington.

Mr. HATFIELD. Mr. President, I am pleased to join today with my colleagues from the State of Washington, Mr. JACKSON and Mr. GORTON, in cosponsoring legislation to protect the Columbia River Gorge. The Governors of Oregon and Washington have developed this bill and asked that it be introduced.

On March 1, 1983, I joined with Senator PACKWOOD in introducing legislation that is similar to the bill I am cosponsoring today. I would note that I also cosponsored this legislation during the last session of Congress. Both Senator PACKWOOD and I have held hearings in Oregon this year on this matter and, I can say that there is a great deal of interest in this topic.

The approach espoused in the Governor's bill is somewhat different than has been promoted in earlier Columbia gorge protection measures. This bill, in my opinion, provides for more local control in the establishment of a Columbia Gorge protection plan, but is weak in protecting critical areas during the interim period before the final plan is adopted. The other bill I have sponsored gives the Commission

greater control over activities in the gorge management area, but has received a great deal of resistence from local residents. It is my hope that the Governor's bill will lead the way to the direction of molding a final protection measure for the Columbia River Gorge. I might also note that this is the first bill that has been cosponsored by Members from both Oregon and Washington, a positive step forward in molding a final gorge protection bill.

Mr. President, I continue to believe that some type of protection mechanism is necessary to insure future generations the opportunity to enjoy the beauty and splendor the Columbia River Gorge affords. It is my hope that this bill will lead the way to a final product and, more importantly, one that all citizens and interest groups can support.

NOTICES OF HEARINGS

SUBCOMMITTEE ON ENTREPRENEURSHIP AND SPECIAL PROBLEMS FACING SMALL BUSINESS

Mr. WEICKER. Mr. President, I would like to announce that the Senate Small Business' Subcommittee on Entrepreneurship and Special Problems Facing Small Business, will hold a field hearing in Eau Claire, Wis. on "Special Problems Facing Small Business in the Midwest." The hearing will be held on August 22, 1983, starting at 10 a.m. at the county board room of the Eau Claire County Courthouse. For further information please contact Michael Morris of the committee staff at 224-5175. Senator KASTEN will chair.

SUBCOMMITTEE ON EXPORT PROMOTION AND MARKET DEVELOPMENT

Mr. President, I would like to announce that the Senate Small Business Committee's Subcommittee on Export Promotion and Market Development will hold a field hearing in St. Paul, Minn. on "Small Business Exports and Export Financing." The hearing will be held on September 9, 1983, in the hearing chambers of the Metropolitan Council, 300 Metro Square Building, 7th and Robert St., starting at 2 p.m. For further information, please contact Anne Sullivan of the committee staff at 224-5175. Senator BOSCHWITZ will chair.

SUBCOMMITTEE ON THE FAMILY FARM

Mr. President, I would like to announce that the Senate Small Business's Subcommittee on the Family Farm, will hold a field hearing in Goshen, N.Y., on "The Effect of Canadian Imports on New York State Agriculture". The hearing will be held on August 19, 1983. For further information, please contact John McNamara of the committee staff at 224-2809. Senator D'AMATO will chair.

SUBCOMMITTEE ON WATER AND POWER

Mr. NICKLES. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of a public hearing before the Subcommittee on Water and Power to receive testimony on S. and H.R. 71, bills entitled the High Plains States Groundwater Demonstration Act of 1983. The hearing will be held on Thursday, September 29, beginning at 10 a.m. in room SD-366 of the Dirksen Senate Office Building.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Subcommittee on Water and Power, Committee on Energy and Natural Resources, U.S. Senate, Washington, D.C. 20510.

For further information you may wish to contact Mr. Russ Brown of the subcommittee staff at 224-2366.

SUBCOMMITTEE ON PUBLIC LANDS AND RESERVED WATER

Mr. WALLOP. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of public hearings before the Subcommittee on Public Lands and Reserved Water, on Friday, September 23, beginning at 9 a.m. in room SD-366 of the Dirksen Senate Office Building. The subcommittee will receive testimony on S. 1090, to establish a National Outdoor Recreation Resources Review Commission to study and recommend appropriate policies and activities for Government agencies at the Federal, State, and local levels and for the private sector, to assure the continued availability of quality outdoor recreation experiences in America to the year 2000, and for other purposes.

On Friday, September 30, beginning at 9 a.m. in room SD-366 of the Dirksen Senate Office Building, the subcommittee will receive testimony on S. 837, to designate certain national forest system lands in the State of Washington for inclusion in the National Wilderness Preservation System, and for other purposes.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Subcommittee on Public Lands and Reserved Water, Committee on Energy and Natural Resources, U.S. Senate, Washington, D.C. 20510. Oral testimony will be limited to no more than 5 minutes. Witnesses may be placed in panels.

For further information regarding these hearings, you may wish to contact Mr. Tony Bevinetto of the subcommittee staff at 224-5161.

AUTHORITY FOR COMMITTEES TO MEET

SUBCOMMITTEE ON INTERNATIONAL TRADE

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on International Trade of the Committee on Finance be authorized to meet during the session of the Senate on Thursday, August 4, to hold a hearing on S. 979, Export Administration Act amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be deemed to have been authorized to meet during the session of the Senate on Thursday, August 4, to hold a hearing on Central America Policy.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

H.R. 1646, THE RAILROAD RETIREMENT SOLVENCY ACT OF 1983

● Mr. WEICKER, Mr. President, on August 2, the Senate voted overwhelmingly to approve H.R. 1646, the Railroad Retirement Solvency Act of 1983. Since I was necessarily absent, I was unable to join my colleagues in supporting this vital piece of legislation. The passage of this measure was critical in averting a drastic reduction in benefits to the 1 million railroad retirees in this Nation; 6,000 of whom reside in Connecticut. This emergency legislation was necessitated by a serious shortfall in the railroad retirement account and the insolvency of the railroad unemployment insurance account. Had the Congress failed to enact legislation to shore up the financial integrity of these two accounts, current railroad retirement beneficiaries would have experienced a 40-percent reduction in tier 2 benefits on October 1.

The bill which was approved by both Houses in less than 24 hours is the result of negotiations between rail labor, management, and the administration over the last 6 months. Not unlike the social security legislation which the Congress approved earlier this year, H.R. 1646 produces solvency in the railroad retirement system and avoids drastic benefit reductions through a series of tax increases on labor and management, slower benefit growth, and general funds transfers. The bill also provides for repayment of nearly $1.8 billion to the windfall benefit account.

Under the circumstances, H.R. 1646 represents the only game in town to assure that rail retirees do not suffer a loss of benefits this year. However, I do have some deep reservations about the impact of this package on current retirees, small and regional carriers, and the commuter rail authorities in the Northeast. With respect to current beneficiaries, I am troubled by the cost-of-living adjustment offset, under which tier 2 benefits will be offset by

tier 1 COLA's dollar for dollar by up to 5 percent. On January 1, 1984, the social security cost-of-living increase of 3.5 percent for tier 1 will be deducted from tier 2 benefits. The other 1.5 percent could be taken out of tier 2 benefits in 1985. While this action was part of the package, I am deeply concerned about the impact of this change. Retirees rely on a fixed income and have little financial recourse available to them to protect against inflation. Therefore, I commend the Senator from Pennsylvania, Mr. HEINZ, for his request for a study which would evaluate the effect of this COLA offset on beneficiaries and the possibility of modifying the provision if the economy and rail employment levels improve.

I am further troubled by the impact of the tax increases on the commuter rail authorities which took over conrail's commuter service obligations under the Northeast Rail Services Act of 1981 and on the short line and regional rail freight carriers. While all carriers must share in the financial burden of shoring-up the railroad retirement system, I am concerned that these taxes will impose costs on freight carriers in my region which could in turn inhibit service on marginal branch lines down the road. I do not believe that adequate consideration was given to smaller railroads in the development of the tax structure in this bill, and I would hope that the impact of these taxes is carefully assessed over the next year, so that Congress is not faced with unnecessary reductions in service or the bankruptcy of certain lines.

Last, with respect to the commuter rail authorities, I would like to commend the Senator from New Jersey, Mr. BRADLEY, for his efforts on their behalf, including the Connecticut Department of Transportation, which in conjunction with Metro-North, provides commuter rail service to my constituents between New Haven and New York City. Per his request, the Department of the Treasury in cooperation with rail labor and the commuter agencies, will undertake a study to evaluate the commuter agencies participation in the railroad retirement system and railroad unemployment insurance system. The Department of Treasury will be asked to report to the Congress in early 1984. Our commuter rail authorities provide an essential transportation service in major metropolitan areas in the Northeast and already have before them the difficult task of providing service at affordable costs. Given the significant increase in taxes anticipated by this bill, I look forward to the findings of the study.

Mr. President, as I have mentioned here, all parties have made significant financial sacrifices in order to arrest the hemorrhaging of the railroad retirement system. In 1974, and again, in 1981, rail labor and management agreed to certain modifications which were intended to redress the financial problems of the system. There is no question that H.R. 1646 as approved by both Houses represents the most drastic overhaul of the railroad retirement system.

That the parties have been forced to revisit this issue and to accept major tax increases and benefit reductions is necessitated by the severe and unexpected decline in rail unemployment. In 2 years, the level has dropped 25 percent from 514,000 workers in 1981 to 388,000 in 1983. Few people here in Washington or in the industry could have predicted this devastating reduction in the rail sector. However, it is essential that Railroad Retirement Board which historically has been the watchdog of employment levels in the industry give the utmost scrutiny to future fluctuations in rail employment levels in order that legislation of this kind again not be forced upon rail labor, management and the Congress. I commend all the parties for working together to enact emergency legislation which will insure financial solvency of the railroad retirement system and to perserve the benefits of our many railroad retirees.●

THE PRESIDENT'S COMMISSION ON ORGANIZED CRIME

● Mr. D'AMATO. Mr. President, I am proud today to endorse with full enthusiasm the President's Commission on Organized Crime, announced last Thursday. President Reagan has given the Commission one of the great opportunities in our Nation's history: to lead a decisive and successful war against organized crime in this generation.

The Commission will conduct a series of public hearings between now and March 1, 1986, when it submits its final report. The model for this Commission is the highly successful series of hearings Senators Kefauver and McClellan conducted in the 1950's. More recently, the organized crime hearings conducted by the Senate Judiciary Committee under the leadership of Senators THURMOND and BIDEN have produced a wealth of new and significant information about organized crime.

The Commission will render its greatest contribution in two areas of vital importance: educating the public about the effects of organized crime on all our lives and developing the comprehensive strategy necessary to wage a successful war on crime.

I am especially proud that the President has chosen two New Yorkers to serve on this 20-member Commission.

The appointment of Judge Irving R. Kaufman of the U.S. Court of Appeals for the Second Circuit to head the Commission is an excellent one. He was an assistant Federal prosecutor in New York from 1935 to 1940. Judge Kaufman was named to the U.S. District Court for the Southern District of New York in 1949. In 1960, as a Federal district court judge, he presided over the trial of organized crime figures who attended the famous Apalachin, N.Y., conference in 1957. In 1961, Judge Kaufman was named to the Court of Appeals for the Second Circuit. He became chief judge in 1973, a post he was forced to resign on his 70th birthday.

Another New Yorker appointed to this blue ribbon Commission is Frances A. Sclafani of the Suffolk County District Attorney's Office. She, too, is an excellent and knowledgable choice.

Mr. President, I spoke earlier of the possibility of breaking up organized crime in this generation. That is not an empty rhetorical statement. There have been approximately 1,400 Federal organized crime convictions in the last 2 years alone. We have scored major victories in this decade against the crime families of New York, Chicago, Philadelphia, New Orleans, and Cleveland.

Law enforcement agents are making the greatest breakthroughs in their history in infiltrating and in exposing organized crime's extensive involvement in international narcotics trafficking. Since 1982, when Attorney General William French Smith gave the FBI concurrent jurisdiction with the Drug Enforcement Administration to handle narcotics investigations, over 800 convictions have been obtained.

As I am confident the Commission will discover, organized crime is not limited to La Cosa Nostra. I heard ample and convincing testimony regarding the existence of newly emerging, nontraditional, organized crime groups when I joined Senators THURMOND and BIDEN at the Judiciary Committee's first field hearing on organized crime in New York City on July 11.

It was at that hearing that I also heard testimony from the brilliant U.S. attorney for the southern district of New York, Rudolph Guiliani. Mr. Guiliani testified as follows:

> We are at a turning point. If we could now redouble our efforts we could end La Cosa Nostra within this generation. In my view it can be done. The 12 new Task Forces established by President Reagan finally give us both the resources and the cooperation needed to infiltrate organized drug trafficking.

The Comprehensive Crime Control Act approved by the Senate Judiciary Committee, which I have wholeheartedly endorsed, contains numerous provisions that will aid us in our efforts against organized crime.

In the Commission on Organized Crime, we have the historic opportuni-

ty to add the major ingredients that have been lacking in all our efforts to combat organized crime to date: The development of a comprehensive strategy for an all-out war on organized crime and the mobilization of public opinion in support of that war.

Mr. President, in conclusion, I ask to have printed in the RECORD the report on the Commission and the biography of Judge Kaufman, which appeared in the July 29, 1983, New York Times.

The report follows:

PRESIDENT CHOOSES 20 AS MEMBERS OF ORGANIZED CRIME COMMISSION

(By Leslie Maitland Werner)

WASHINGTON, July 28.—President Reagan today named a 20-member commission that he said would spend nearly three years analyzing organized crime and recommend judicial and legislative changes to help fight it.

The commission, to be headed by Judge Irving R. Kaufman of the United States Court of Appeals for the Second Circuit, will hold public hearings across the country and submit a report on March 1, 1986. It is part of an eight-point program for combating narcotics trafficking and organized crime that the President outlined last October.

In a ceremony in the steamy-hot White House Rose Garden today, President Reagan signed an executive order establishing the panel, to be formally known as the Commission on Organized Crime.

INVESTIGATIONS OF 1950'S CITED

The President compared the work of the commission to that of the racketeering investigations conducted in the 1950's by Senator Estes Kefauver and Senator John L. McClellan.

"Few weapons against organized crime have proven more effective or more important," Mr. Reagan said.

"I agree government cannot stop or abolish the human impulses that make racketeering profitable," he said. "But I also believe we have the capacity to break apart and ulimately destroy the tightly knit, regional and national networks of career criminals who live off of these activities."

According to Judge Kaufman, who participated in a press briefing with Attorney General William French Smith and the Director of the Federal Bureau of Investigation, William H. Webster, the commission will seek subpoena power from Congress.

"We've been given a broad mandate by the President, and we intend to exercise it," Judge Kaufman said. He said illegal narcotics trade alone accounted for $79 billion a year in untaxed money.

AIDES TO COMMISSION NAMED

Judge Kaufman, who said he did not yet know when or where the commission would hold its first hearing, noted after the briefing that he had asked Peter F. Vaira, the former United States Attorney in Philadelphia, to act as executive director of the commission. He said Alan J. Hruska, a partner in the New York law firm of Cravath, Swaine & Moore, had been asked to serve as general counsel.

The judge, who was praised by the President as "one of America's most distinguished jurists," said he did not intend to step down from the bench.

"If it gets too demanding, I'll have to do something to lessen my load," said the judge, who is 73 years old and stepped down as chief judge for the appeals court three years ago. He added that he would have to disqualify himself from any cases involving organized crime.

Among the other 19 members of the Commission are Senator Strom Thurmond, Republican of South Carolina, the chairman of the Senate Judiciary Committee, and his counterpart in the House, Peter W. Rodino Jr., Democrat of New Jersey. Potter Stewart, a former Associate Justice of the United States Supreme Court, who was named last week to serve on the President's National Bipartisan Commission on Central America, will serve on this one as well. The panel also includes several present and former local law enforcement officials, lawyers and law professors.

Thomas DeCair, press secretary to the Attorney General, said the Commission's budget of $500,000 for the rest of this fiscal year will come from the funds already granted to set up 12 new teams of Federal agents whose mandate is to focus on drug trafficking by organized crime.

After Mr. Reagan's speech last October announcing his program for fighting narcotics trafficking by organized crime, the Justice Department sought $2.5 million from Congress to finance the commission. But Congress turned down that request, approving $127.5 million of the $130 million the Department had sought for the task forces and the commission.

COMPARISON TO CANCER RESEARCH

At the briefing before the ceremony, Judge Kaufman said he thought the commission's mission should be likened to "cancer research," in that new answers were needed to fight the pervasive growth of organized crime throughout the country.

"We lack a comprehensive strategy for confronting this menance," the judge said, adding that even when crime leaders are tried and convicted, new ones simply replace them. He said the commission would strive for a "detailed understanding of how mobsters operate," and later vowed: "We shall not witchhunt, neither shall we whitewash."

In response to reporters' questions, the officials said they would not judge the propriety of the President's welcoming political support from the President has received from the International Longshoremen's Association and the Teamsters, whose former president, Roy L. Williams, was convicted last year of plotting to bribe United States Senator Howard Cannon, Democrat of Nevada, and of defrauding the union's pension fund.

The Attorney General replied that there were "remarkable ramifications" to the "suggestion" that "we should boycott an organization" because individuals connected with it have been convicted of crimes.

"Based on what has recently happened, there might be circumstances under which we would then have to terminate all of our relationships with Congress," Mr. Smith added, drawing laughs.

RESPONSE FROM CONGRESS

Later in the day three Democrats in the Senate, angered by Mr. Smith's quip, said he should apologize. In a joint statement, Senator Joseph R. Biden, Jr. of Delaware and Senator Robert C. Byrd of West Virginia said that "the criminal activities of certain Teamster and I.L.A. leaders are well documented," and that the Attorney General "should disclose what information, if any, he has indicating criminal activities by the 'leaders' of Congress." Senator Sam Nunn of Georgia said he was "shocked" and that Mr. Smith "should put up or shut up."

Those appointed to the commission were identified as follows:

Phyllis T. Aranza, a lieutenant in the Houston Police Department's Homicide Division.

Jesse A. Brewer Jr., deputy chief of the Los Angeles Police Department.

Carol Corrigan, a Deputy District Attorney in Alameda County, Calif., and an Assistant Professor of Law at the University of California's Hastings College of Law.

Justin J. Dintino, executive officer of the New Jersey State Police Department and a member of the Organized Crime Committee of the International Association of Chiefs of Police.

John F. Duffy, sheriff of San Diego County, Calif., and president of the Police Executive Research Forum.

Willaim J. Guste Jr., Attorney General of Louisiana.

Judith Richards Hope, a partner in the Washington law firm of Paul, Hastings, Janofsky & Walker and a former associate director of the White House Domestic Council.

Phillip Manuel of Alexandria, Va., president of the Phillip Manuel Resource Group, a consulting firm that assists in investigations of economic crimes, and a former chief investigator of the Senate subcommittee on investigations.

Thomas McBride, associate dean of the Stanford University Law School and former associate Watergate Special Prosecutor and former Inspector General of the Departments of Labor and Agriculture.

Eugene Methvin of McLean, Va., a senior editor of Readers Digest who writes on crime.

Edwin L. Miller Jr., District Attorney San Diego County, Calif., and former United States Attorney for the Southern District of California.

Manuel J. Reyes, a lawyer who served on the Miami Organized Crime Commission.

Charles H. Rogovin, professor of law at Temple University in Philadelphia and former president of the Criminal Justice Associates, the Police Foundation and the Massachusetts Organized Crime Council.

Barbara Ann Rowan of Manassas, Va., a lawyer with Rowan Associates and a former staff attorney for the House ethics committee's investigation of Korean influence-buying.

Frances A. Sciafani of the Suffolk County District Attorney's office.

Samuel K. Skinner, a partner in the Chicago law firm of Sidley & Austin and a former United States Attorney for the Northern District of Illinois.

HEAD OF U.S. CRIME COMMISSION—IRVING ROBERT KAUFMAN

WASHINGTON, July 28.—In nearly 34 years on the Federal bench, Irving R. Kaufman has rarely been content to be just a judge. The Commission on Organized Crime announced here today is the latest of a long list of panels and commissions Judge Kaufman has headed or served on.

At the age of 73, he has unflagging energy. There had been speculation that because of the post on the commission he would give up his active seat on the United States Court of Appeals for the Second Circuit and assume the reduced workload of a senior Federal judge. Some of his judicial colleagues even had private bets with one another on whether Judge Kaufman would "go senior," thus opening up a Second Cir-

cuit seat to be filled by the Reagan Administration.

Those who guessed correctly that Judge Kaufman would remain on active status counted on the fact that he has never been known to walk away from the action. Some recalled the reluctance with which he gave up the chief judgeship of the Second Circuit three years ago on his 70th birthday.

Under Federal law, chief judges must yield their titles and administrative responsibilities at 70. Judge Kaufman lobbied for a change in the law. At his prompting, Senator Daniel Patrick Moynihan introduced such an amendment, but it failed and Judge Wilfred Feinberg became chief judge.

Judge Kaufman has often handled cases involving organized crime. As a Federal district judge in 1960, he presided over the trial of 20 men who had attended the underworld conference in 1957 in Apalachin, N.Y. From 1935 to 1940 he was an assistant Federal prosecutor in New York.

Irving Robert Kaufman was born in New York City on June 24, 1910, the son of Herman and Rose Spielberg Kaufman. In 1931 he received his law degree from Fordham University Law School.

He spent several years in private practice but was drawn to public service. In 1947–48 he worked in Washington as a special assistant to the Attorney General and set up a Justice Department unit to control lobbying.

He was the youngest Federal judge in the country when President Truman named him to the United States District Court for the Southern District of New York on Oct. 15, 1949.

In 1951 he presided over the espionage trial of Julius and Ethel Rosenberg, who were charged with conspiring to steal and deliver atomic secrets to the Soviet Union. A jury convicted the couple, and on April 5, 1951, Judge Kaufman pronounced the only peacetime death sentence for espionage in United States history. The Rosenbergs were executed on June 19, 1953.

Critics of the sentence accused the judge of maintaining post-trial contacts with prosecutors and agents of the Federal Bureau of Investigation concerning sentencing.

CITES "CONTINUING HARASSMENT"

Controversy over the case has never ended. Judge Kaufman wrote in an article in The New York Times Magazine in 1975 that he had been subjected to "a continuing pattern of harassment because of a trial I presided over more than 20 years ago." In 1976 his friend Simon H. Rifkind, a New York lawyer and former Federal judge, set up a special subcommittee of the American Bar Association "to counteract unwarranted criticism" of Judge Kaufman.

In the years after the Rosenberg case, Judge Kaufman gained a reputation for liberal rulings involving civil rights and civil liberties. In 1961 he ruled that the city of New Rochelle in Westchester County had deliberately created and maintained a racially segregated school; it was one of the first decisions to apply the Supreme Court's 1954 decision in Brown v. Board of Education to the nominally integrated school district of a northern suburb.

Judge Kaufman was named to a new seat on the Court of Appeals in September 1961. He became chief judge through seniority in 1973.

He grew increasingly interested in judicial administration and introduced several procedural changes to expedite appeals. The Second Circuit, which includes New York, Connecticut and Vermont and is one of the busiest Federal circuits, won praise for keeping its calendar current year after year.

Judge Kaufman served as president of the Institute of Judicial Administration from 1969 to 1971 and has been the chairman of its executive committee since 1971. He headed a joint commission of the institute and the American Bar Association that produced 20 volumes of standards for juvenile justice.

MANY IMPORTANT CASES

He has continued to write opinions in important cases ranging from free speech to antitrust. He wrote the opinion in 1979 that overturned most of the $87 million antitrust judgment that Berkey Photo Inc. had won from the Eastman Kodak Company. Last year he wrote the majority opinion affirming the fraud and extortion conviction of Joseph M. Margiotta, then the Republican chairman in Nassau County.

Judge Kaufman and his wife, Helen, live in Manhattan. They have twin 41-year-old sons, James, an investment banker, and Richard, an accountant. Another son, Robert, died last year. They have four grandchildren.

Although many of Judge Kaufman's law clerks are intensely loyal to him, his ability to be a stern taskmaster is almost legendary in the Federal courthouse. Several young lawyers who have begun clerkships in his chambers have not completed the year, which is unusual for a highly prized Court of Appeals clerkship.

Lawyers who have argued cases before him praise his careful preparation and fairness.●

INDUSTRIAL DEVELOPMENT BONDS

● Mr. D'AMATO. Mr. President, I recently received a letter from Mr. Robert Dormer, president of the New York State Job Development Authority (JDA). Mr. Dormer wrote to illustrate a point I have emphasized previously on the Senate floor; the absolute importance of industrial development bonds (IDB) financing to the continued success of the Small Business Administration's section 503 certified development company program.

Mr. Dormer described 11 section 503 projects initialed in New York State since January 1 of this year. These projects, all of which utilized IDB financing, have created nearly 500 new jobs. For example, an SBA loan of $500,000, combined with a $440,000 IDB issue resulted in the creation of 121 private sector jobs in the manufacture of specialty optical products in Melville, N.Y. In another instance, an SBA loan of only $76,000, combined with an IDB of the same amount, permitted SAS Industries of Riverhead to acquire land and construct a building to manufacture rubber gaskets and seals, resulting in 25 new jobs.

Without the availability of IDB financing, these projects would not have been financed and 500 jobs would have been lost. These projects are typical of the impact of the 503 program, coupled with IDB financing, on local development. IDB's represent an extremely efficient use of a Federal tax exemption for job creation and retention that would not otherwise occur.

The success of the 503 program in New York was possible only because the job development authority was able to coordinate existing New York JDA programs and the 503 program with the use of small issue IDB's. My bill, S. 499, currently before the Senate Finance Committee, will insure that IDB's will continue to be available for use in conjunction with the 503 program beyond the current September 30, 1983, sunset date.

At a time of high unemployment, it is imperative that every possible opportunity to stimulate job creation be utilized. The continued use of IDB's in conjunction with the 503 program is a most effective means of achieving the administration's stated goal, the improvement of private sector opportunities through capital formation.

Mr. President, we must act—and act quickly—to pass S. 499.●

CLINCH RIVER BREEDER REACTOR

● Mr. McCLURE. Mr. President, I am pleased to note that the Senate has received an executive communication from Secretary of Energy Hodel announcing the administration's endorsement of the alternative financing plan for the Clinch River breeder reactor as well as strong support for the completion of the project. The President and his senior officials have pledged their support for the plan and will work to insure its acceptance.

As Secretary Hodel discusses in his letter, the financing plan has also been endorsed by the investment community and will raise $1 billion of private financing for Clinch River, thus significantly reducing the burden on the Federal budget. This figure represents 40 percent of the funds needed to complete the project.

Mr. President, the Energy and Water Development Appropriations Act, signed into law on July 14, does not include funds for the Clinch River breeder reactor. As Secretary Hodel states in his letter transmitting the alternative financing plan, the administration strongly urges the Congress to approve the proposal before the end of the fiscal year to insure predictable and continued funding with no interruption in current construction activities.

Mr. President, I ask that the Secretary's transmittal letter be printed in the RECORD.

The letter follows:

THE SECRETARY OF ENERGY,
Washington, D.C., August 1, 1983.

Hon. GEORGE BUSH,
President of the Senate, Washington, D.C.

DEAR MR. PRESIDENT: Enclosed is the alternative funding plan for completing the Clinch River Breeder Reactor Plant Project recommended by the Administration for

consideration and action by the Congress. In the conference report (H. Rept. No. 97-980) accompanying the Further Continuing Appropriations Act for Fiscal Year 1983 (Public Law 97-377), Congress directed the Department of Energy to: ". . . vigorously explore proposals including a reconsideration of the original cost-sharing arrangement, that would reduce Federal budget requirements for the Clinch River project or project alternative, and secure greater participation from the private sector. The Department is to submit its findings to the cognizant congressional committees for consideration by not later than March 15, 1983."

In response to this direction, a task force of utility and investment banking representatives was formed by the Breeder Reactor Corporation. The mission of this task force was to explore prospects for increased private sector financing of the Clinch River Project, thereby reducing the Federal budget requirements to complete the Project. A preliminary task force plan was transmitted to Congress by the Department of Energy on March 15, 1983. It was recognized at the time that further refinement would be necessary before either the Congress or the Administration could determine its acceptability.

Because the final plan was not ready when the Energy and Water Development Appropriations Bill, 1984, was considered by Congress, both Houses passed the bill (which became Public Law 98-50) without funds for Clinch River. As noted in the accompanying Appropriations Committee reports, this action was taken in the absence of a "viable and substantive alternative" financing plan and the Senate committee report clearly stated that "the Committee is deferring this matter without prejudice." Both committee reports took the position that (House wording) "If an alternative financing arrangement can be worked out, the Committee would consider appropriating funds to continue the project."

Since then, the task force has developed a detailed plan which was submitted to the Department on June 29, 1983. I have carefully evaluated this plan and strongly endorse it as a positive means of achieving the objectives of Congress and the Administration.

On July 21, 1983, representatives of the Breeder Reactor Corporation, a consortium of 753 electric utility systems, and the nuclear industry, labor, and investment banking firms presented the plan with their full backing to President Reagan and high-level Administration officials and the President emphasized his strong support for completion of the Clinch River Project. He and his senior officials are committed to support this plan and will work to ensure its acceptance.

The Clinch River Project is a critical element in this vital program to develop the breeder reactor, a technology that can help meet our electricity needs for thousands of years. The potential benefits to our economic future and national security that the breeder offers are enormous, and the prudent course of action would be to take advantage of this very attractive alternative financing plan.

The development of breeder technology is important within the framework of our national energy policy of developing a diverse mix of energy resources because of the strategic importance of electricity and the need to ensure future Americans will have adequate supplies of economic electricity. Industrialized economies are steadily becoming more electrified and this is particularly true in the United States. Over the past decade, while our use of all nonelectric forms of energy dropped by 15 percent, we increased our demand for electricity by 20 percent. Uranium is an important fuel for future growth in baseload electrical capacity, and a long term role for uranium in the Nation's energy mix requires availability of the breeder.

In addition to Clinch River's primary importance to the development of breeder technology, thousands of productive jobs are supported by the Project across the United States and it will enhance U.S. technological strength and nonproliferation influence worldwide. In order to support our nonproliferation objectives through influence on international development of nuclear technology, the United States must be a recognized leader and active participant in the nuclear technologies that other nations are pursuing. Completion of Clinch River will demonstrate to a skeptical world that the United States has the political will to complete its nuclear development commitments, contributing significantly to our negotiating strength.

The design, licensing, hardware fabrication, and site preparation activities required for the Project are all well advanced. All findings resulting from the licensing process regarding plant safety, site suitability, and environmental acceptability have been favorable, and we expect that the Nuclear Regulatory Commission will issue a construction permit and make it effective by December 1983. Construction of the plant is planned to begin immediately thereafter. The advanced stage of design and hardware fabrication combined with the stable funding provided by the alternative financing plan will permit the construction phase to proceed expeditiously towards plant completion in 1989. During the construction phase, peak construction manpower working on the project will be approximately 5,000 people. An additional 17,000 people will be productively employed on supporting Project activities across the United States.

Accordingly, I am submitting formally, with full Administration endorsement, the final task force plan for consideration and action by the Congress. This plan, endorsed by four leading investment banking firms, will raise $1 billion of private capital for the Project, which represents 40 percent of the funding needed to complete Clinch River, and will significantly reduce Federal budget requirements.

Since the Energy and Water Development Appropriations Act, 1984, did not include funds for the Project for fiscal year 1984, the Administration strongly urges the Congress to enact the legislation necessary to implement the Alternative Financing Plan as soon as possible. It is imperative that Congress conclude action prior to the end of the fiscal year in order to ensure that funds for the Project are available to avoid further costly disruptions and delays.

The Department of Energy is eager to work closely with Congress to develop the necessary appropriations language that will permit us to achieve that goal.

Sincerely,

DONALD PAUL HODEL.●

S. 1005—THE CORRECTIONAL FACILITY DEVELOPMENT ACT

● Mr. D'AMATO. Mr. President, on July 27, the Judiciary Committee Subcommittee on Juvenile Justice held a most important hearing on S. 1005, the Correctional Facility Development Act, and other proposals for Federal assistance to State and local law enforcement agencies. I commend Senator SPECTER for calling the hearing and for inviting me to testify and then join him on the panel.

I am very happy to report that all of the witnesses endorsed S. 1005. The witnesses included Thomas A. Coughlin, III, commissioner, New York State Department of Corrections; Robert Landon, director of corrections, Commonwealth of Virginia; James F. Palmer, director, Department of Corrections, Washington, D.C.; and Joseph Williams, administrative judge, Criminal Court, New York, N.Y.

S. 1005, which I introduced on April 7, 1983, authorizes the National Institute of Corrections to make grants of $1 billion per year for 3 years to help our States with their prison construction and rehabilitation projects. These grants will finance up to one-third of the total construction costs—excluding land acquisition—of State correctional facilities and facility improvements. This $3 billion in Federal spending, combined with $6 billion in State spending, could produce as many as 180,000 desperately needed new prison cells.

The record of the July 27 hearing, when released will answer in great detail any objections which may exist to the Federal Government's commitment of resources on a large scale to assist State prison construction efforts. I would like to address the three most important of those objections in this statement, namely, that:

First, we do not need more prisons;

Second, we cannot afford to build them;

Third, prison construction is the responsibility of the States.

With respect to the first objection, the national prison overcrowding crisis has been called our Nation's No. 1 criminal justice priority by both the National Governors' Association and the Attorney General's Task Force on Violent Crime. State prison populations have increased by 43,000 in the last 2 years alone. Despite all their efforts, however, the States have failed to keep pace with this increase. As a result, they are being forced to parole prisoners who are not rehabilitated. Last week, the Illinois system announced that in about 2 weeks it would have to stop admitting prisoners altogether. For a very limited amount of time the local jails will attempt to hold these prisoners. Then, as the DuPage County Sheriff says, "Who's going to blink first, I don't know." I ask that a New York Times article entitled, "Illinois Prisions Threatening to Turn Away Inmates," be printed in

the RECORD at the conclusion of this statement.

Clearly, there is a crisis and we are running out of time to address it. We must now face the fact that its solution requires an expenditure of money. This brings us to the second objection. My answer is that I can think of no better investment of public funds than prison construction and rehabilitation. Our mass transportation systems, for example, which I have worked so hard for, are unsafe. So are our parks, streets, and housing developments, into which we pour so many billions of public dollars. So I ask my colleagues: What good do we do with all our spending on these projects if the public is afraid to use them? What good are the hundreds of billions we spend on defense and foreign aid to secure a more peaceful world if we cannot secure peace at home? On July 26, Mr. President, we in the Senate voted a defense authorization level of close to $200 billion. The next day I attended the markup of the appropriations bill for the Department of Justice. We agreed to a level of approximately $3.3 billion.

I do not claim that prison construction will solve the crime problem. I do claim that securing the domestic tranquility our Constitution promises is an impossible task without it. I do believe, however, that an additional $3 billion over 3 years for the safety of our people, especially when considered in light of our defense and foreign aid spending levels, is not excessive.

If we compare, for example, the number of heroin addicts—500,000—to the estimated number of addicts in prison—between 100,000 and 200,000—we see that there are hundreds of thousands of addicts walking our streets today. Because there is only one way to support a heroin habit, these addicts have been aptly described as "walking crime machines." Collectively, heroin addicts are stealing tens of billions of dollars a year and committing hundreds of thousands of violent crimes to support their habits. It is time to take our streets back from these criminals.

The unpleasant truth is that we have a very large criminal population in this country. While we search for effective crime prevention and criminal rehabilitation solutions, we have the responsibility to separate these "bad actors" from the rest of society.

Unless we act soon, more States are going to be forced to follow Illinois' example and stop admitting prisoners altogether. Testimony from all of the witnesses at the July 27 hearing indicates that the New York, Virginia, and District of Columbia systems are in a desperate race to avoid such a situation. My statement accompanying the introduction of S. 1005 on April 7 details the prison overcrowding crisis that is pandemic throughout our Nation today.

The third major objection that has been raised to previous proposals for Federal assistance to State prison construction efforts is that law enforcement is primarily a State and local responsibility. Although there were once good reasons to support this argument, the reality of life in 1983 now undercuts it decisively.

One of the major responsibilities of the Federal Government is to prevent the smuggling of narcotics and other illegal drugs into this country. Yet there can be no doubt that the Federal Government is failing to meet this responsibility. Illegal drugs are an $80 billion a year business in the United States. Ninety percent of these drugs come from foreign countries. Because so much crime today is attributable to the flood of illegal drugs, the Federal Government has the responsibility to assist local governments bear the financial burdens resulting from its interdiction failures.

Mr. President, there is a national prison overcrowding crisis. If we order our priorities correctly, we can afford to meet this challenge successfully. Success in this effort demands the full partnership of all levels of government. For all of these reasons, I urge my colleagues to give S. 1005 their full support.

The article follows:

ILLINOIS PRISONS THREATENING TO TURN AWAY INMATES

CHICAGO, July 25.—For about two more weeks, Illinois state prisons will accept prisoners form county sheriffs if they phone ahead for reservations. After that, the state says, it will run out of beds.

Then, says the DuPage County Sheriff, Richard Doria, "Who's going to blink first, I don't know. But I can tell you this; I'm not at all happy that the state wants to give me its problems."

The crisis has developed since an Illinois Supreme Court ruling July 12 that halted the practice of alleviating overcrowding by giving prisoners extra time off for good behavior.

The law permits the state to free inmates three months early, but since the prisons reached their capacity in June 1980, said Nic Howell, a corrections department spokesman, release up to 11 months early has become routine. Over the last three years more than 10,000 felons have been released before their sentences expired, he said, adding that none of these had committed murder, rape or armed rubbery.

ALMOST 100 PERCENT TURNOVER

With the early release program no longer available as a mechanism for controlling the size of the prison population, Mr. Howell said, "We're almost at the point of 100 percent turnover." The prisons were built to hold 13,900 inmates, he said, and "Our projections are this year to get 13,000 new prisoners."

All parties—the Governor, state's attorneys, county sheriffs and state prison officials—have appealed to the public for money for new prisons. The sparring for an immediate solution found a temporary truce last week in the "space available" system, which, corrections officials said, has allowed for transfer of most prisoners.

After negotiating with the state, Cook County, which includes Chicago and many of its suburbs, sent 100 prisoners to state facilities last week, with an estimated few dozen remaining. The previous week the state accepted 90 of the 130 scheduled for transfer.

Philip Hardeman, director of the Cook County Department of Corrections, said that if the state did refuse to accept any more inmates after Aug. 5, the date the state expects to run out of space, "we could have 600 on the floor in four weeks" from lack of beds.

FOUR IN A CELL

Macon County Sheriff Stephen D. Fisher in Decatur said overcrowding was intense already in his 40-year-old jail. He said any proposal that kept more state prisoners in his system was out of the question. Currently, he said, build for 25.

Law enforcement officials trace the overcrowding to a decision in the 1970's not to build more prisons, to the reclassification of residential burglary as a more serious crime with stiffer penalties, and to stepped-up prosecutions and convictions throughout the state.

"More Federal dollars went into law enforcement, because that's what the public wanted," Mr. Howell said. "In 1977, 500,000 criminal cases were filed in Illinois courts. In 1981 that climbed to 700,000. That's one reason we're in a crisis."

Gov. James R. Thompson has thrown his energies into the problem, meeting with groups throughout the state. He has also been canvassing state legislators to see if he can gather enough votes to pass emergency relief measures.

EMERGENCY SESSIONS URGED

The Governor hopes to persuade the General Assembly to convene in an emergency session to make the flexible early release system legal, until a long-term solution can be found. Officials are also debating the feasibility of "modular housing" and of permitting more doubling up of prisoners in one-man cells.

Peter B. Bensinger, chairman of the Governor's Task Force on Prison Crowding, advocates as a temporary solution expanded work release, county supervision in some cases of releasees, and a broader parole system for lesser offenses.

For the long term, sheriffs and state's attorneys have called for building more prison space beyond the 4,000 new beds that are under construction or planned. Mr. Bensinger proposed a revenue sharing program under which county jails and corrections officials would handle the cases of lesser offenders. Some sheriffs are amendable to that, including Mr. Doria, who said he could find room, temporarily, for prisoners of the state if the price was right.

UNDER COURT ORDER

That would be impossible for Cook County, Mr. Hardeman said, because its already crowded facility is under a Federal court order limiting population.

"We don't want the money, we don't want the dollars," he said. "We're always hovering around the 4,500 limit. No amount of money is going to make up for our being in contempt of court."

Other county officials fear that they, too, could be breaking the law if the state does not accept their prisoners. "I can't hold anyone for more than a week, then I'll hear

from the judge," said Mr. Fisher. "If the Governor tells me he's not taking the prisoners, and my judge says deliver them to the Department of Corrections or I'll hold you in contempt, they're going to the Department of Corrections. I'm going to listen to the judge—he can put me in jail."●

FEDERAL CREDIT UNION WEEK

● Mr. DOMENICI. Mr. President, I am pleased to sign as a cosponsor of Senate Joint Resolution 84, designating the week beginning June 24, 1984, as "Federal Credit Union Week"; 1984 marks the 50th anniversary of the industry as it was instituted by the Federal Credit Union Act in 1934. Today's credit union is a good friend to the average American—a familiar, secure place for one's savings or convenient place to borrrow funds for that new "dream car." There are Americans from every walk of life who are members.

Since 1934, credit unions have increased greatly in number and size. Credit unions now outnumber all other financial institutions added together. At the end of 1979 there were 15,201 commercial banks, 4,709 savings and loan associations, and 463 mutual savings banks. Today, nationwide, there are some 22,000 State and Federal credit unions in operation serving 47 million members and controlling $76.6 billion in assets. In New Mexico, there are 95 credit unions as of the end of 1982. They represent nearly 270,000 members and control over a half billion dollars in assets. That the credit union has kept pace and collars such a sizable share of the financial community is no small feat in today's turbulent financial world.

The underlying motivation of the credit union movement was to establish mutual or cooperative associations of workers to provide an outlet for orderly savings and sources of small loans, As the industry has entered the 1980's, and while this remains an important part of the movement, the focus has broadened in the effort to compete successfully with other financial institutions and to best serve their members. Although services offered vary, all federally chartered credit unions may write mortgages as well as consumer loans, and can offer MasterCard and Visa credit cards. They pay 12 percent or more on passbook savings accounts and are offering individual retirement accounts. Some even offer the equivalent of money market funds and pool member's money to make stock market purchases at reduced brokerage commission rates.

Today's membership represents a fair cross section of the American working household, and continues to represent diverse groups of common interests. Most are occupationally oriented, but I know of a unique credit union serving a group of Arabian horse owners. Within New Mexico's borders, there is a credit union serving residents on several of the Indian reservations in the northwestern San Juan County. Also, a small group of business associates in Albuquerque have formed the "American Free Enterprise Federal Credit Union." Its membership—74—is the smallest in the State. However, its growth is indicative of the overall credit union expansion in New Mexico—assets have accumulated to $1½ million during the past 7 months. The Los Alamos Credit Union is the State's largest with 24,760 members, many of whom are associated with the National Labs. The State industry grew at a rate of 14 percent last year, and there is no doubt in my mind that it will continue as a vital financial force. The credit unions are a respectable competitor for our deposits and are a viable source of credit. Indeed, I salute 50 noble years of service and have the utmost confidence that the next 50 years will be as bright for credit unions.●

THE MADRID CONFERENCE

● Mr. D'AMATO. Mr. President, it appears likely that, after nearly 3 years of discussion, the Madrid Conference will soon conclude. As a member of the Commission on Security and Cooperation in Europe, I have followed closely developments at the Conference, called to review the implementatton of the Helsinki Final Act.

Despite its repeated profession of support for, and dedication to, the principles contained in the Helsinki Final Act, the Soviets have repeatedly and blatantly violated both the letter and spirit of the agreement. This has been particularly true with regard to Soviet treatment of members of the Jewish community.

The Greater New York Conference on Soviet Jewry recently compiled a report highlighting the Soviet human rights violations which have occurred during the Madrid Conference.

Mr. President, I encourage my colleagues to read this important report and I request that it be printed in the RECORD in its entirety.

The report follows:

THREE YEARS OF OPPRESSION

(The Greater New York Conference on Soviet Jewry, New York, Aug. 1, 1983)

For the past three years, representatives of the nations which signed the 1975 Helsinki Accords have been meeting in Madrid to review each other's compliance with them. During the same three years, the Soviet Union has intensified its oppression of Soviet Jews, in direct violation of commitments made in Helsinki. The Soviet violations are too numerous to catalogue here, but the sampling which follows is all that is necessary to document the pattern.

The events highlighted here, in a chronological fashion, represent merely the tip of a frightening iceberg. They are singled out not because they were unique, but rather because they are typical of the life of a committed Jew in the USSR today. When reviewed against the background of the Madrid Conference and the relevant language of the Helsinki Final Act, these Soviet violations raise fundamental questions about the future of what has become known as the "Helsinki process."

NOVEMBER 1980

Viktor Brailovsky, a distinguished Jewish scientist and co-founder of a samiadat publication called "Jews in the USSR," is arrested in Moscow on the eve of the Madrid Conference. He is charged with Article 190-1, which prohibits "the circulation of fabrications known to be false which defame the Soviet State and social system." The informal scientific seminars for refuseniks hosted by Brasilovsky and others are disrupted.

Emigration total: 789.

DECEMBER 1980

Hebrew teachers Bliyahu Kssar, Yuli Kosharovsky, Ze'ev Shakhnovsky and Crigory Kozenahtein are all threatened. A class of Kssar is broken up by KGB agents, who confiscate Hebrew books and issue warnings to his students. Telephones of several leading refuseniks are also disconnected.

Emigration total: 889.

JANUARY 1981

Roris and Medi Kun of Moscow are refused permission to emigrate for the 10th time. Aleksandr Magidovich, a young Jewish activist from Tula, is sentenced to 2½ years for violating Article 190-1.

Emigration total: 850

FEBRUARY 1981

The apartment of Moscow Jewish activist Aron Gurevich is searched. Six leading activists, including Kssar, Kosharovsky, and Vladimir Prestin, are called in by the KGB in connection with the investigation of Brailovsky. In Kiev, activist Vladimir Kialik is placed under close surveillance, and all mail to him is stopped.

Emigration total: 1,407.

MARCH 1981

More KGB pressure is directed against Kosharovsky and Hebrew teacher Favel Abramovich. Kosharovsky completes 10 years of living as a refusenik—his most recent refusal was based on work he was engaged in 13 years earlier.

Emigration total: 1,249.

* * * * *

SEPTEMBER 1981

The KOB conducts a series of raids in Kharkov, arresting Aleksandr Peritsky, a distinguished scientist and co-founder of an informal "university" for children of refuseniks. Lokshin and Taukerman are brought to trial and receive 3-year sentence.

Emigration total: 405.

OCTOBER 1981

Five Jews hoping to lay wreaths to mark the anniversary of a massacre of Jews at Babi Yar are detained. In Moscow, the KGB raids the homes of Kosharovsky, Abramovich, Natasha Khassins, and Leonid Tesmenitaky. In Leningrad, Zelichonok's phone is disconnected.

Emigration total: 368.

NOVEMBER 1981

80 Moscow Jews involved in teaching informal classes are threatened by the KOB in an attempt to discourage potential students. The KGB also conducts a series of raids of Jewish homes in Odesas, and an essay by Paritsky's young daughter is used to convict him. He received 3-year sentence.

Emigration total: 363.

DECEMBER 1981

OVIR imposes a new restriction on some applicants for visas, demanding that they produce a certificate proving they are not liable for military conscription. In Toilisi, new threats are directed against brothers Ysai and Grigory Goldshtoin. In Leningrad, the KGB scared some children and parents away from a Chanukah party hosted by refusenik Evgeny Matakin.

Emigration total 434.

Annual emigration total for 1981: 9,447 (compared to 21,471 in 1980 and 51,320 in 1979).

JANUARY 1982

Grigory Vasserman of Leningrad is beaten up and left semi-conscious in the street on his way home from a Hebrew tutorial, but no one is apprehended. Refuseniks claim that postal authorities are not delivering new invitations. Prisoner of Conscience Anatoly Shcharansky spends another birthday apart from his wife, Avital.

Emigration total: 290.

FEBRUARY 1982

A number of Soviet Jewish scientists, including Mikhail Fuks Rabinovich, Semion Katz, Yuri Medvedkov, Olga Medvedkova, Viktor Kipnis, Valery Soyfer and Aleksandr Paritsky, are arbitrarily stripped of their scientific degrees. Activists including Kosharovsky and Yehudit Ratner Dialy are warned to stop their activities. In Novosibirsk, KGB threats are directed against Felika Kochubiovsky, who has expressed interest in founding a USSR-Israel Friendship Society.

Emigration total: 283.

MARCH 1982

The KGB attempts to block plans for Purim celebrations. One celebration is disrupted when Aron Gurevich's apartment in Moscow is raided.

Emigration total: 289.

APRIL 1982

Young refusenik Mikhail Tsyvin is detained for holding up a banner in Red Square asking authorities to let him go to Israel. The KGB launches a new drive against Moscow's religious Jews, raiding homes and calling Grigory Kantorovich and others in for questioning. The mother of refusenik Alla Smeliansky issues an appeal from Israel, asking the Soviets to permit her daughter and daughter's family to join her there.

Emigration total: 288.

MAY 1982

In Moscow, Favel Abramovich is forcibly taken from a friend's home, interrogated for several hours, and told that if he continues to teach, he "could have an accident and break his legs." He decides to curtail his summer teaching. He also joins with Korharovsky and Khassina in an appeal to the KGB to return to Jewish materials previously confiscated. Former POC Ida Nudel, still denied permission to join her sister in Israel, is denied a residency permit for Moscow. Activists Lev Shefer and Vladimir Yelchin receive prison sentences. Also, invalids Vladimir and Izolda Tufeld are again refused visas to join their son in Israel. Both Tufelds are serously ill and bedridden.

Emigration total: 205.

JUNE 1982

Lov Ejbert is told he may have to wait 10 more years for a visa.

Emigration total: 182.

JULY 1982

Refusenik scientists continue to be dismissed from their professional posts; the latest is Venyamin Caniclin, a researcher at the Moscow Research Institute of Antihiotica. Polina Paritsky, wife of POC Aleksandr Paritsky, reports that Aleksandr has been asked to publicly retract his views or face additional punishment.

Emigration total: 186.

AUGUST 1982

Evgeny Lein, released from prison, is warned against renewing Jewish activities. Dr. Edward Nadgorny, a distinguished and brilliant physicist with 25+ years of service at the Academy of Science's Solid State Physics Institute (which he co-founded), is demoted after applying to emigrate. His salary is slashed, he is denied access to research facilities and forbidden to publish. When he suffers a heart attack shortly thereafter, he is refused care in the Institute's medical facility. His wife is also fired from her job.

Emigration total: 238.

SEPTEMBER 1982

Felike Roehubievsky is arrested in Novosibirsk. Activists Boris Kanyevsky, Ilys Coltser, and Valery Senderov, who conducted a study of discrimination against Jews at Moscow University, are arrested. POC Anatoly Shcharansky, completely isolated from his family, begins a hunger strike in prison on Yom Kippur. 69-year-old distinguished scientist and long-term refusenik Aleksandr Lerner, alone since his wife's death in July 1981, agrees to cut off all contact with the West under threat of arrest by the KGB.

Emigration total: 246.

OCTOBER 1982

The Leningrad OVIR advises emigration applicants to resign from their jobs before applying (perhaps to avoid criticism of Helsinki violations based on earlier firings). POC Aleksandr Paritsky, refusing to recant, is placed in solitary confinement and denied winter clothes. Jewish activist Yuri Tarnopolsky, frustrated by repeated refusals, begins a hunger strike. In Moscow, Inna Speranskaya's apartment is raided and she and her friend Iosif Begun are threatened.

Emigration total: 168.

NOVEMBER 1982

Hebrew teacher Tosif Begun is arrested for the third time. In Odesor, the KGB raids Ida Nepomnisrhchy's flat, and attempts to provoke a fight. Long-term refusenik Marat Osnia is refused again, this time because of "the general international situation" since his secrecy classification a decade earlier is no longer a valid excuse. Mikhail Kremen's flat is also raided, and postcards of Israel are among the materials confiscated.

Emigration total: 137.

DECEMBER 1982

Five refuseniks are questioned in Odessa. Several leading refuseniks, including Khasaine, Viktor Fulmakht, and Yakov Alpert, receive "final refusal's." Former POC Simon Shnirman is drafted again, and Rvgeny Lein is threatened with "parasitism," Kochubievsky receives a 2½ year sentence. After wandering from town to town, Ida Nudel finally receives permission to settle in the obscure Moldavian city of Bendery, far from any friends. Another former POC, Vladimir Slepak, returns to Moscow to resume the quest to emigrate he began in 1970.

Emigration total: 176.

Annual total for 1982: 2,688.

JANUARY 1983

POC Anatoly Shcharansky, seriously ill, ends his hunger strike. Simon Shnirman is arrested again. More "final refusals" are issued: recipients include Leningrad activists Iosif Radomyslasky and Grigory Vasserman. 87-year-old Ovssy Broitman, all alone in the USSR after the death of his wife, is still refused permission to join his son in Israel.

Emigration total: 81.

FEBRUARY 1983

The KGB calls in a number of scientists who signed a letter to the President of Israel, Natasha Khassina is threatened again, and Shnirman receives a 3-year sentence.

Emigration total: 125.

MARCH 1983

Yuri Tarnopelsky is arrested in Kharkov. Soviet interference with mail and telephone communications between Soviet Jews and their friends in the West continues.

Emigration total: 101.

APRIL 1983

Lev Elbert is called up by the military reserve. The Soviets begin to publicize a new "Anti-Zionist Committee," and a major new anti-Semitic media campaign links Zionism with Nazism, and attacks several Jewish activists by name.

Emigration total: 114.

MAY 1983

Lev Elbert is charged and sentenced to one year. In Moscow, refuseniks learn that invitations now must be renewed every six months, a virtually impossible task because of Soviet interference with mail from Israel.

Emigration total: 116.

JUNE 1983

The Anti-Zionist Committee declares that almost all Soviet Jews who wanted to leave have left, a statement denounced by the U.S. State Department as "patently false." Activist Leonid Volvovsky's apartment in Gorky is searched, and Odessa activists Yakov Mesh and Valery Povzner are questioned. Gennady Khassin's mother dies in Israel, but his request for a visitor's visa to go to her funeral is denied. Yuri Tsrnopolsky receives a 3-year sentence.

Emigration total: 102.

JULY 1983

Lev Elbert is accused of smuggling hashish into the labor camp and is briefly placed in isolation. Iosif Begun, still awaiting trial, is also accused of breach of discipline in prison.

Emigration total: 167.●

DOT CONFERENCE REPORT

● Mr. MATTINGLY. Mr. President, yesterday, I voted against the amendment offered by Mr. MATHIAS to the conference report on H.R. 3329 the Department of Transportation and related agencies appropriations bill. It dealt with a matter which clearly exceeded the jurisdiction of that report. Reference to the Office of Personnel Management's proposed Federal regulations, published in the Federal Register on July 14, 1983, was not made in either the Senate or the House-passed version of the transportation appropriations bill. I objected to the attempt to raise the issue of a temporary prohibition against the implementa-

tion of these regulations until October 15, 1983, on that conference report.

It is true that there has been a great deal of discussion and debate, one might even say controversy, over the package of proposed regulations which OPM published in March. It is also true, and significantly important, that substantial changes have been made in response to comments received from agencies, Members of this body, Federal employees themselves, and their unions. The changes embodied in the July 14 proposed regulations are in direct response to those comments and objections. The Office of Personnel Management has operated in responsible good faith. In addition, I believe OPM is pursuing the correct course in seeking changes in the Federal pay and promotion system. The present system needs revision. In September 1981, GAO published a study which criticized OPM for its lack of aggressive leadership in promoting a merit pay program. It has taken that leadership in endeavoring to establish a uniform system, and a system by which an outstanding employee can be recognized for his performance.

An editorial which appeared in the Milwaukee Journal on May 30, 1983, stated the issue well, "When good, bad, and indifferent workers are paid the same, and when job security rests on seniority alone, everyone's moral is deadened." In the Federal Government, as in the private sector, outstanding employees deserve to be rewarded for outstanding performance. The proposed regulations provide the mechanism by which this can be accomplished. Under the regulations, all employees with a rating of "fully successful" or above are eligible for career ladder promotions, with no minimum time within the grade required. Those with the highest summary ratings will be given first consideration. It should be noted as well, Mr. President, that approximately 98 percent of the 1.4 million members of the white-collar Federal work force, who are currently eligible to receive within grade increases on the basis of attaining an acceptable level of competence in their jobs, achieve the equivalent of a "fully successful" rating or better. Under the new OPM plan, an appraisal system is not permitted to pre-establish distribution of expected levels of performance. In addition, employees are given the right to request reconsideration of their performance ratings.

Since the effort to delay implementation was successful, it is my hope that all parties will work together to achieve a fair, reasonable, and timely compromise. A system which feeds low morale and which prevents the recognition of excellence is not fair either for hardworking Federal employees or for the American public. I am concerned about constant delay. In addition, Mr. President, I am convinced that the best way to perfect a program is first to allow it to operate. Where problems exist, they can be easily recognized and improvements made.●

MARTIN LUTHER KING, JR., HOLIDAY BILL

● Mr. SARBANES. Mr. President, I rise to commend the House of Representatives for its action Tuesday in passing H.R. 3706, a bill to establish a Martin Luther King, Jr., national holiday. As a cosponsor of the Senate Martin Luther King Holiday bill, I am very happy to see this substantial progress. I urge my colleagues in the Senate likewise to move forward.

I cosponsored similar legislation in the 97th Congress and in previous Congresses, and am proud to note that my own State of Maryland has celebrated Martin Luther King's birthday, January 15, as a legal holiday since 1974. Nineteen States now recognize a day as a legal holiday in honor of Dr. King. It is entirely fitting that the Nation now unite in setting aside a day for this purpose—a day for all Americans just as his dream is the American dream. It is long overdue.

Dr. Martin Luther King, Jr., was one of our Nation's greatest leaders in the ongoing struggle to achieve full equality and justice for all Americans. He has been an inspiration around the world for those who cherish freedom, peace, and the dignity of mankind. His vision of America's promise, his ability to impart that vision to others, and his power to inspire so many to follow him have truly wrought a change in America benefiting us all.

It is especially important that national recognition of Dr. King not be further delayed. Fundamental rights for which he strived and which we now recognize as guaranteed to all our people by the Constitution—including the right to participate in the democratic process, the right to open and decent housing, and the right to equality in education—are today threatened by insensitivity of government, intolerance among individuals, and by increasing poverty. In fact, one out of seven Americans and more than one out of three blacks now live below the poverty level—the highest rate of poverty in the United States since 1965, according to the most recent Census Bureau statistics reported in yesterday's newspapers. Such poverty threatens to erode the gains we have made and endanger our goals of equal opportunity for all—goals sought by Martin Luther King, Jr.

We need Martin Luther King's dream of America. By establishing a national holiday to commemorate his birthday, we create a greater awareness of his life and his contributions to our national character. This inspiration will help us to continue to move forward. I urge my colleagues to take up this matter at the earliest possible time.●

TRANS-ALASKA PIPELINE

● Mr. MURKOWSKI. Mr. President, to many in the lower 48, Alaska is only known for its oil pipeline. The 800-mile TransAlaska Pipeline from Barrow to Valdez was built with great fanfare and toil. The first oil reached Valdez and was loaded onto a tanker 6 years ago last Thursday, July 28, 1977. That pipeline was responsible for many changes in Alaska—an influx of people, of dollars, and of goods have fundamentally changed the lifestyle of many Alaskans. And it has changed the image of Alaska in the minds of many others.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point an article that appeared in the Anchorage Times on July 29, 1983, which describes the importance of the pipeline to Alaska on this, its sixth anniversary of operation.

The article follows:

VALDEZ ANNIVERSARY

Thursday shouldn't get too far beneath the horizon without some mention that it was the sixth anniversary of the day the first oil from Prudhoe Bay reached the end of the trans-Alaska pipeline at Valdez. That same day the first tanker headed south from Valdez to distribute the Alaska crude to markets throughout the nation.

In the six years since, 3,787 tankers have carried 3,018,697,623 barrels of oil that came through that pipeline from the rich pools on the state's north coast.

There is no question that more than 3 billion barrels of oil made a major impact on the nation's energy supply. Right now the North Slope provides 20 percent of domestic oil. The revenue to the state has contributed positively to the lifestyles and incomes of Alaskans.

That the long stretch of pipe has functioned well for six years with only minor problems is a tribute to its designers, its builders, its investors and the operators who have overseen the line since it came alive.

There were those who were nervous as July 28, 1977, approached. Relay teams had walked the 800-plus miles alongside the line as the oil made its first trip south.

The pipeline is a marvelous accomplishment. In the years to come, July 28 will be looked upon as a special date in the state's history.●

RADIO MARTI

● Mr. LEVIN. Mr. President, I voted to oppose cutting off debate on the motion to proceed to the proposal to establish Radio Marti. My opposition to Radio Marti is based on my strong opposition to the practices of the Castro goverment and on the need to effectively bring to the Cuban people the truth about current events and the policies of their government.

I am convinced that the administration's goals for Radio Marti can best be achieved through an expansion of the programing by the Voice of Amer-

ica directed at Cuba. An alternate proposal has been made by Senator ZORINSKY which would increase Voice of America programing directed at Cuba from 5½ to 14 hours, which is the same number of hours as have been proposed for Radio Marti. But because it would establish a "Cuban Service" within the current Voice of America and not a wholely separate entity such as Radio Marti, the Zorinsky proposal would not result in retaliation through Cuban jamming of U.S. broadcasts into Cuba or Cuban interference with radio broadcasts within the United States—including possibly some stations in my home State of Michigan. Furthermore, using the Voice of America would cost the Federal Government less than half of what it would cost to establish Radio Marti in fiscal year 1984.

Expanding the Voice of America service to Cuba would, thus, give us an option for broadcasting which would be effective instead of self-defeating; firm instead of provocative; and fiscally sound instead of wasteful.

TRIBUTE TO MARY ANN GSCHWIND

● Mr. DOMENICI. Mr. President, I have known of many persons in my life who have saved lives and become heroes in bringing back to life those who might otherwise have died, but this story of a Alamogordo nurse's heroism may have surpassed them all

Mary Ann Gschwind, who died tragically in an automobile accident July 21, completed the one last act of kindness she could still perform in this world following her death. Though she had seen little of her life at the tender age of 20, she had wisdom and sensitivity far beyond her years as her final request to her parents was that they donate any organs of her body for purposes of transplant.

Within moments after her death from a brain injury as a result of the accident at Beaumont Army Medical Center, her heart was flown to Tucson, where it was transplanted into David Butrum at the University of Arizona Hospital. Butrum, a 42-year-old janitorial executive, had only 6 weeks to live before the transplant and now has a new chance at life.

Mary Ann Gschwind's corneas are helping a 14-year-old girl and a 19-year-old girl see better. Both received the transplants at a San Antonio hospital.

And one of her kidneys was also transplanted successfully in San Antonio into a 35-year-old woman, so she too can have a chance at a normal life. The other kidney was flown to Japan for use in a kidney transplant operation there.

As a parent with children of my own, I too feel the anguish of her parents who saw their child's life tragically ended in an automobile accident. But Mary Ann Gschwind has given all of us, in her death, a courageous and heroic example of caring concern for her fellow man that few, if any, can match. She has selflessly given the chance for a new life to others through her kind donation.●

RECOGNITION OF DR. ERNEST E. JUST

● Mr. HOLLINGS. Mr. President, I ask Senate recognition of one of South Carolina's greatest scientists, Dr. Ernest E. Just, whose centennial of birth will be recognized at a symposium at South Carolina State College in the fall. Dr. Just was born on August 14, 1883 in Charleston, S.C. His father and paternal grandfather were wharf builders and erected some of the largest docks in the Charleston Harbor which still stand today. His father died when he was 4 years old. His mother supported the family by teaching school and by establishing a cooperative farm and industrial settlement named Maryville in her honor. After receiving his early education in his mother's school, Dr. Just then attended the Academy of South Carolina State College and Kimball Union Academy in Meriden, N.H. where he was editor of the school newspaper and the highest ranking student in his class. Dr. Just then entered Dartmouth University as a Rufus Choate Scholar and was elected to Phi Beta Kappa in his junior year. He earned the highest departmental honors in both history and biology and was awarded a B.A. degree magna cum laude. In the fall of 1907, Dr. Just joined the faculty of Howard University as an instructor in English. In 1908, he organized the first drama group at Howard University which led to the development of professional instruction in drama at Howard. In 1909, Dr. Just began graduate training at the Marine Biological Laboratory at Woods Hole, Mass. and received his Ph.D. in zoology in 1915 from the University of Chicago distinguishing himself in the fields of cellular physiology and experimental embryology. Although today Dr. Just is noted for his contributions of life sciences, he was rightfully disturbed, that as a black man, his value to the human race was viewed as limited. During the later years of his career, he spent several years doing his research in Germany, Italy, and France. In 1915 Dr. Just received the first Spingarn Medal awarded by the NAACP given "to the man or woman of African descent and American citizenship who shall have made the highest achievement during the preceding year or years in any honorable field of endeavor." Dr. Just later returned to the United States and served as the head of the Department of Zoology at Howard University. Dr. Just died in 1941. Perhaps the times in which he lived did not allow the fullest recognition of Dr. Just's scientific accomplishments, but I am proud that our society has advanced to the degree that we now rightly recognize Dr. Ernest E. Just, the great scientist and the great man.●

SURFACE MINING CONTROL AND RECLAMATION ACT

● Mr. SPECTER. Mr. President, yesterday I introduced S. 1755, a bill to amend the Surface Mining Control and Reclamation Act. A copy of that bill was not printed in the RECORD. I request that the bill be printed in today's RECORD.

The bill follows:

S. 1755

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. ABANDONED MINE LAND PROGRAM.—Amend section 401 (30 U.S.C. 1201) to read:

"SEC. 401. (a) There is created on the books of the Treasury of the United States two trust funds to be known respectively as the Abandoned Surface Mine Reclamation Fund (hereinafter referred to as the "surface fund") and the Abandoned Underground Mine Reclamation Fund (hereinafter referred to as the "underground fund") which shall be administered by the Secretary of the Interior. State abandoned mine reclamation funds (State funds) generated pursuant to this title shall be established by each State pursuant to an approved State program.

"(b) The funds shall consist of amounts deposited in the fund, from time to time derived from—

"(1) the reclamation fees levied under section 402 of this Act: *Provided*, That an amount not to exceed 10 per centum of such reclamation fees collected for any calendar quarter shall be reserved beginning in the first calendar year in which the fee is imposed and continuing for the remainder of that fiscal year and for the period in which such fee is imposed by law, for the purpose of section 507(c), subject to appropriation pursuant to authorization under section 712: *Provided further*, That not more than $10,000,000 shall be available for such purposes;

"(2) any user charge imposed on or for land reclaimed pursuant to this title, after expenditures for maintenance have been deducted;

"(3) donations by persons, corporations, associations, and foundations for the purposes of this title; and

"(4) recovered moneys as provided for this title.

"(c) Moneys in the surface fund may be used for the following purposes:

"(1) reclamation and restoration of land and water resources adversely affected by past coal mining, including but not limited to reclamation and restoration of abandoned surface mining areas, abandoned coal processing areas, and abandoned coal refuse disposal areas; planting of land adversely affected by past coal mining to prevent erosion and sedimentation; prevention, abatement, treatment and control of water pollution created by coal mine drainage including restoration of streambeds, and construction

and operation of water treatment plants; prevention, abatement, and control of burning coal refuse disposal areas and burning coal in situ;

"(2) for use under section 406, by the Secretary of Agriculture, of up to one-fifth of the money deposited in the funds annually and transferred by the Secretary of the Interior to the Secretary of Agriculture for such purposes;

"(3) acquisition of land as provided for in this title;

"(4) enforcement and collection of the reclamation fee provided for in section 402 of this title;

"(5) studies by the Department of the Interior by contract to such extent or in amounts as are provided in appropriation Acts with public and private organizations to provide information, advice, and technical assistance, including research and demonstration projects, conducted for the purposes of this title;

"(6) restoration reclamation, abatement, control, or prevention of adverse effects of coal mining which constitutes an emergency as provided for in this title;

"(7) grants to the States to accomplish the purposes of this title;

"(8) administrative expenses of the United States and each State to accomplish the purposes of this title; and

"(9) all other necessary expenses to accomplish the purposes of this title.

"(d) Moneys in the underground fund may be used for the following purposes:

"(1) reclamation and restoration of land and water resources adversely affected by past underground coal mining, abandoned coal processing areas, and abandoned coal refuse disposal areas; sealing and filling abandoned deep mine entries and voids; planting of land adversely affected by past underground coal mining to prevent erosion and sedimentation; prevention, abatement, treatment, and control of water pollution created by coal mine drainage including restoration of streambeds, and construction and operation of water treatment plants; prevention, abatement, and control of burning coal refuse disposal areas and burning coal in situ; and prevention, abatement, and control of coal mine subsidence;

"(2) for use under section 406, by the Secretary of Agriculture, of up to one-fifth of the money deposited in the funds annually and transferred by the Secretary of the Interior to the Secretary of Agriculture for such purposes;

"(3) acquisition and filling of voids and sealing of tunnels, shafts, and entryways under section 409;

"(4) acquisition of land as provided for in this title;

"(5) enforcement and collection of the reclamation fee provided for in section 402 of this title;

"(6) studies by the Department of the Interior by contract to such extent or in such amounts as are provided in appropriation Acts with public and private organizations to provide information, advice, and technical assistance, including research and demonstration projects, conducted for the purposes of this title;

"(7) restoration, reclamation, abatement, control or prevention of adverse effects of coal mining which constitutes an emergency as provided for in this title;

"(8) grants to the States to accomplish the purposes of this title;

"(9) administrative expenses of the United States and each State to accomplish the purposes of this title; and

"(10) all other necessary expenses to accomplish the purposes of this title.".

SEC. 2. DIRECT AML FUNDING TO STATES.—Amend section 401(d), (30 U.S.C. 1231(d)), to read:

"(d) Moneys from the fund shall be available for the purposes of this title, only when appropriated therefor, and such appropriations shall be made without fiscal year limitations.

"(1) Moneys from the fund allocated to the States and Indian tribes pursuant to section 402(g) shall be paid directly to the States and Indian tribes by the Secretary of the Treasury not later than ninety days following the end of each calendar quarter, without prior appropriation by Congress, for use by the States and Indian tribes as approved by the Secretary pursuant to section 405.

"(2) Moneys from the fund not allocated to the States and Indian tribes pursuant to section 402(g) shall be available for the purpose of this title only when appropriated therefor, and such appropriations shall be made without fiscal year limitations.

"(3) The Secretary of the Treasury shall pay interest to this fund quarterly at the prevailing rates of Treasury bills on the balance of moneys in the fund.".

SEC. 3. RECLAMATION THROUGH REMINING.—Amend section 711, (30 U.S.C. 1301), to read:

"SEC. 711. In order to encourage advances in mining and reclamation practices, to allow postmining land use for industrial, commercial, residential, or public use (including recreational facilities), or to encourage reclamation of abandoned mine lands and areas not reclaimed to meet the performance standards of this chapter, the regulatory authority with approval by the Secretary may authorize departures in individual cases on an experimental basis or by regulation for remaining of abandoned mine lands from the environmental protection performance standards promulgated under sections 515 and 516 of this Act. Such departures may be authorized if (i) the experimental or alternative remining practices are potentially more or at least as environmentally protective, during and after mining operations, as those required by promulgated standards; (ii) the mining operations approved for particular land-use or other purposes are not larger or more numerous than necessary to determine the effectiveness and economic feasibility of the experimental practices; and (iii) the experimental practices do not reduce the protection afforded public health and safety below that provided by promulgated standards.".●

THE ADMINISTRATION'S UNFAIR DEFENSE OF ITS "FAIRNESS"

● Mr. LEVIN. Mr. President, I should like to take this opportunity to include in the RECORD an article by Robert Greenstein which appeared in the June 19 issue of the Washington Post, entitled "Stockman Is Still Cooking the Numbers."

This article is both distressing and essential. It demonstrates that Mr. Stockman persists in using budgetary and economic data in a way that can generously be referred to as highly misleading. It is important that Americans know that the pattern of distortion continues and that the pronouncements of the Reagan administration must be viewed through a fine sieve of skepticism.

A couple of points raised by Mr. Greenstein should suffice to commend that it be read to its conclusion.

First, Mr. Stockman claims that spending for low-income benefit programs in fiscal years 1982 and 1983 were only 5 percent below the levels sought for those years in the last Carter budget. However, Mr. Stockman arrives at this conclusion by comparing the spending levels which Carter projected, assuming 7-percent unemployment, with the levels which Reagan pursued assuming 10-percent unemployment. Since the costs of a number of these programs increase as unemployment rises, the Stockman numbers utilize the recession to mask the depth of the Reagan cuts. I find it virtually impossible to believe that anyone crafty enough to manipulate data in this way could be unaware of how misleading is its presentation.

Second, the article focuses on the Stockman contention that the Reagan tax cut did not really do all that much for wealthy individuals. In order to arrive at this conclusion, Mr. Stockman only had to make two "minor" interpretations. First, he limits the definition of "wealthy" to people making $200,000 and above and he ignores any benefit which they received from the 25-percent income tax cut over 3 years. By only focusing on the portion of the Reagan tax bill which dropped the maximum tax rate on unearned income from 70 to 50 percent, Mr. Stockman chose to disregard the on-the-average of $22,000 which they received from the 3-year across-the-board tax cut.

The Director of the Office of Management and Budget has marshaled these and other arguments to refute any claim that this administration has been unfair. However, his need to resort to half-truths and ludicrous assumptions to make his case shows how far this administration has strayed from the path of simple equity.

I ask that the text of the article, "Stockman Is Still Cooking the Numbers," appear in full following my remarks.

The article follows:

[From the Washington Post, June 19, 1983]

STOCKMAN IS STILL COOKING THE NUMBERS—NOW HE WANTS US TO BELIEVE REAGAN IS FAIR

(By Robert Greenstein)

David Stockman is at it again.

After he confessed to rigging the computers in 1981 to make the prospective Reagan deficits shrink, one would have thought that the budget director had had his fill of numbers juggling. But it was not to be. This time, of all things, Stockman has been fiddling with figures in the hope of demonstrating how fair the Reagan administration really is in its treatment of rich and poor.

Stockman unveiled his latest statistical wizardry before the Congressional Joint

Economic Committee last month. He came fully equipped with charts, each to illustrate a remarkable assertion.

Claim 1: The poor have been affected only marginally by Reagan administration budget cuts. Indeed, if all of its proposed cuts for fiscal 1984 were enacted, Stockman contended, low-income benefit programs (food stamps, Medicaid, low income housing, child nutrition, Supplemental Security Income and Aid to Families with Dependent Children) would still be reduced only 5 percent below the levels sought by Jimmy Carter.

Claim 2: Large parts of programs for the needy weren't serving the poor anyway. Before the Reagan cuts, Stockman maintained, more than two-fifths of the benefits of low-income programs went to families with incomes exceeding 150 percent of the poverty line.

Claim 3: The wealthy really were not the big winners in the 1981 tax-cut act. In fact, he asserted, they had received less than 1 percent of the benefits.

It was an impressive performance, even if it was based on some peculiar evidence.

Start with Stockman's contention that actual spending for low-income benefit programs in fiscal 1982 and 1983—plus Reagan's proposed spending for fiscal 1984—is only 5 percent below the levels sought for these years in the last Carter budget.

Here Stockman has deftly made use of the high unemployment experienced under the Reagan administration in an effort to bolster his case. The costs of a number of these basis benefits programs vary with unemployment levels—when more people are out of work, the number of households qualifying for the programs multiplies and program costs rise. By one estimate, for example, food stamp costs rise about $600 million for every percentage-point increase in the jobless rate.

The Reagan budget numbers Stockman cited reflect the impact of 10 percent unemployment on the costs of these programs. By contrast, the Carter budget numbers used by Stockman were calculated back in 1981, based on projections that unemployment would average only about 7 percent in the budget stemming from higher unemployment to make Reagan's spending levels look closer to Carter's—thereby making the Reagan cuts appear smaller than they actually are.

Stockman was not content to stop his strange comparison there. Further manipulations occurred when he adjusted the Carter and Reagan budgets for inflation, converting both to "constant 1981 dollars."

To do this, Stockman adjusted downward both the actual Carter and the actual Reagan budget numbers for 1982, 1983 and 1984. He reduced the projected Carter spending levels for 1983 by 16 percent—since the Carter budget had projected that prices in 1983 would be 16 percent higher than in 1981. And he adjusted the Reagan numbers for 1983 downward by just 10 percent—the inflation level for 1981-1983 reflected in the Reagan budget. Since the Carter numbers were reduced by larger percentages that the Reagan numbers, this made Carter spending levels appear smaller in relation to Reagan's.

To be sure, such adjustments are valid in most cases—but *not* for two of the major programs, Medicaid and subsidized housing.

Medicaid budgets are based on projections of inflation in health care costs rather than on projections of the *overall* inflation rate. When you do the proper inflation adjustment—using health care costs rather than overall inflation—you discover that the Reagan Medicaid cuts are about $2 billion deeper for the 1982-1984 period—or more then double what Stockman indicated.

Equally egregious was Stockman's manipulation of the housing numbers. A substantial portion of federal outlays for subsidized housing consists of fixed costs under long-term contracts for construction or rehabilitation. These costs do not vary with inflation any more than a homeowner's fixed monthly mortgage payments do. Stockman had no business adjusting these fixed costs for inflation. However, Stockman adjusted these costs anyway, and reduced the fixed payments in the Carter housing budget by a greater percentage than he reduced the identical fixed payments in the Reagan budget.

This bit of legerdemain made it appear that Ronald Reagan—whose administration has cut billions from new appropriations for subsidized housing, raised rents for all 3.5 million families and elderly persons living in subsidized units, and reduced the number of new low-income housing units being constructed or rehabilitated by more than half—actually spent more on these programs over the past two years than Carter would have.

How significant are Stockman's manipulations? A new Congressional Budget Office analysis shows that as a result of the last two years of budget reductions, fiscal 1983 expenditures for the low income benefits programs were cut $5.2 billion below what they would have been had no changes been made by Congress. Stockman's chart, however, showed a reduction of only $1.7 billion. In other words, Stockman made two-thirds of the Reagan cuts disappear.

The administration's reductions, of course, would have been far deeper had all of its proposed cuts in aid to the poor been enacted. Of $20 billion requested last year in further cuts in these programs for the 1983-1985 period, Congress agreed to less than $4 billion.

Among the reductions rejected outright were administration proposals that would have doubled rents over several years for some of the poorest families living in subsidized housing, ended or reduced food stamps for more than 90 percent of the elderly who receive them, and sliced 700,000 low-income pregnant women and children from a food supplement program that has been proved to reduce infant mortality.

So much for Stockman Claim 1.

Next, Claim 2: That large chunks of benefits have been going to persons far above the poverty line. Indeed, Stockman maintains that before Ronald Reagan came to the rescue, average workers were being taxed to bring welfare families up to virtually the same standard of living as themselves.

Specifically, he contends that in 1981, 42 percent of all benefits in these programs went to families over 150 percent of the poverty line, and that 150 percent of the poverty line for a family of four that year was $13,390—or 92 percent of the medium annual income for employed workers.

The misuse of statistics is particularly striking here. First, Stockman has compared 150 percent of the poverty line for a family of four ($13,390) to the medium income for an individual worker. Sorry, but you can't do that. The real numbers go like so: The median income for a family of four in 1981 exceeded $26,000—not $13,390—and 150 percent of the poverty line is about half—not 92 percent—of the median income for a comparably sized family.

Then Stockman counted as part of the income of program beneficiaries the value of health insurance coverage provided by Medicaid and the benefits from living in subsidized housing—but he did not include in his median income figures for workers either the comparable fringe benefits for employer-paid health insurance or the tax subsidies for mortgage and medical payments that many middle-income families receive. This makes for a neat comparison of apples and oranges.

When you do these comparisons properly, you find that the income and benefits of those participating in the federal programs were far below the living standards of average American families—even before the Reagan budget cuts took effect.

Nor is Stockman's claim valid that 42 percent of low-income benefits went to families over 150 percent of the poverty line. While these figures are derived from Census data, Stockman misuses the evidence in ways that the Census Bureau itself warns against.

Drawing on the Census Bureau's work, Thomas C. Joe, a former Nixon administration welfare expert who now directs the Center for the Study of Social Policy, has prepared a devastating critique that shreds Stockman's claims on this issue.

A number of Stockman's "high-income" families were actually unemployed and receiving federal benefits for just a few months in 1981. Once back to work, they stopped receiving aid. But Stockman's figures reflect families' incomes for all of 1981 (rather than just for the months they actually received benefits), which enables Stockman to count many of these families as "high income" beneficiaries. The Census Bureau explicitly warns about this problem in the data, but Stockman ignored the admonition.

Similarly, the Stockman data distort income patterns when the composition of a household changes. The data attribute to households the income earned during the entire year by persons who were household members for only a small part of the year. Yet the absence of households members for part of the year (especially deserting fathers) may be the very reason that the remaining family members needed aid. The Census Bureau warns about this, too, stating that the data "may not always reflect the true economic status of the household during the year."

In short, the numbers Stockman uses have a major impact in exaggerating the number of high-income households receiving aid. When those distortions are removed, the picture is quite different. For example, Agriculture Department evidence that is free from these distortions shows that no more than three-tenths of 1 percent of food stamp benefits in 1981 went to families whose cash incomes exceeded 150 percent of the poverty line during the month they received food stamps.

While these manipulations are disturbing Stockman's numbers-juggling reaches its zenith in his description of administration tax policies.

The wealthy, according to Stockman, received all of their tax cut when the top tax rate was lowered from 70 percent to 50 percent. Since this change constituted less than 1 percent of the tax benefits from the 1981 tax act, Stockman tells us, the wealthy ended up with less than 1 percent of the largesse and can hardly be described as the prime beneficiaries.

These startling conclusions contrast sharply with the findings of virtually every independent study of the 1981 tax act. The Joint Congressional Committee on Taxation, for example, found that the wealthiest 5 percent of taxpayers would gain 35 percent of the benefits from the tax act. Congressional Budget Office studies have shown that in fiscal 1982 through 1985, the tax and budget changes enacted under the Reagan administration will take more than $20 billion in benefits away from households with incomes below $10,000 a year—while increasing the after-tax incomes of those making more than $80,000 a year by $64 billion.

How did Stockman get such different results?

First, his claim that lowering the top rate represented all of the tax cuts for the wealthy is nonsense. He simply ignores the plethora of new loopholes and expanded tax breaks incorporated into the 1981 act, such as the changes in estate taxes, IRA's and Keogh's, the All Savers Certificate and dividend reinvestment.

Second, Stockman carefully limited his definition of the wealthy (without informing his audience) to the top two-tenths of 1 percent of all taxpayers, those with incomes of more than $200,000 a year. This suited his purposes admirably: With so few taxpayers defined as wealthy, their aggregate tax benefits would not look so large. The sizable tax benefits going to the much larger number of taxpayers in the $50,000–$200,000 range were simply excluded from his calculations.

Moreover, Stockman omitted the fact that the elite group he did define as wealthy received, on average, a whopping $22,000 apiece just from the changes in tax rates—before even counting the new tax shelter opportunities. Ronald Reagan himself saved $90,000 on his taxes last year because of the 1981 act. His after-tax income went up almost as much as if his salary had doubled.

The final part of Stockman's tax presentation was an attempt to discredit independent studies showing that those with high incomes received very large tax breaks. The problem with the studies, Stockman declared, was that for the wealthy, tax gains or losses stem less from rate changes (which the studies focused on) than from changes in the extent to which income is diverted into tax-free investments (which most of * * *.)

Stockman's implication was that by reducing the top rates, tax shelters were being made less attractive—and that declining use of shelters would reduce the gains for the wealthy below the levels cited in the studies.

While lowering the top rate may, by itself, reduce the use of shelters, Stockman again failed to disclose all of the facts: The 1981 act created so many new shelter opportunities that use of shelters has exploded despite the reduction in the top rate.

Use of syndicated shelters grew 12.5 percent in 1982, far more than the rate of inflation. Moreover, preliminary data indicate that for the first quarter of this year, syndicated tax shelter use is up 50 percent from the comparable period last year. The burgeoning use of shelters, which confer the preponderance of their benefits on the affluent, suggests that tax benefits for the wealthy from the 1981 act are likely to be larger—not smaller—than previous studies and analyses have indicated.

Finally, there is the question of purchasing power. A favorite Stockman (and White House) theme is that the average American's purchasing power has increased sharply during the Reagan presidency because inflation has come down so much. Purchasing power, however, is not determined solely by prices—but by the interaction of prices and wages.

What the administration has failed to say is that wages have come down about as much as prices, leaving the average American with virtually no gain in real purchasing power.

What is widely regarded as the best measure of purchasing power—the Commerce Department's index of real per capita personal disposable income—shows that purchasing power under Reagan has increased at an annual rate of only four-tenths of 1 percent. This is well below the average rate of increase under every other president for the past 30 years.

The growth in purchasing power that did take place in the Reagan years occurred primarily from January 1981 until August 1981—before the Reagan economic program took effect. Since August 1981, when the Reagan tax and budget program was enacted, real per capita personal disposal income has declined. The average American's standard of living has fallen since the Reagan administration's program was enacted.

Stockman's manipulation of the numbers makes rational debate on these spending issues more difficult. But perhaps most significant is the new dimension that Stockman has added to the much-discussed "fairness" issue.

For what can raise more basic questions about whether this administration is fair than when one of its principal officials—with access to data, staff and resources that few others in this town possess—utilizes this power to rig the terms of the debate and misrepresent the nature of his administration's policies.

AMENDMENT TO SECTION 404 TO PROTECT STATE WATER RIGHTS

● Mr. WALLOP. Mr. President, on July 31 the Federal district court in Colorado decided the case of Riverside Irrigation District against Andrews. It held that the U.S. Army Corps of Engineers was properly, acting within its Federal police power authority when it denied a nationwide section 404 permit to plaintiff because of the proposed deleterious downstream effects the exercise of plaintiff's water rights would have on the habitat of the whooping crane. The authority under which the corps was properly operating was the Endangered Species Act as made operative by section 404 of the Clean Water Act.

In broad terms this means that Federal agencies are authorized to regulate the quantity of water discharged from private reservoirs. For reasons that will be explained, this precedent cannot be allowed to stand. I hereby announce my intention to introduce legislation to correct this holding, and I invite participation in development of that legislation by my colleagues and interested groups.

For some time now two great legal schemes which govern water resources in the West have been precariously balanced in relation to one another. On the one hand, we have State water allocation systems upon which agriculture, industry, and municipalities have long relied in determining the quantity of water which they may use now and in the future. On the other hand we have a number of interrelated Federal laws which serve the equally beneficial goals of protecting water quality, wetlands, and fish and wildlife. We have long known that careless expansion of one legal scheme could do serious injury to the other.

Within the context of individual projects and problems these two legal schemes have often conflicted. Solutions have been worked out through negotiation and compromise without doing violence to either system of law. However, if the decision of the court in the Riverside case is allowed to stand it will do far more than affect the parties involved. It will do serious violence to the entire system of State laws which has been established to allocate quantities of water.

For you to understand the far-reaching implications of the holding, I must first tell you the facts of this particular case. The Riverside Irrigation District and the Public Service Co. of Colorado propose to build a reservoir on Wildcat Creek which is an intermittent tributary of the South Platte River. The water will be used for a powerplant and irrigation.

The dam and reservoir are upland, away from the river. There are no allegations, by any party, that construction of the dam or reservoir will have any significant adverse effect on water quality, wetlands, fish and wildlife, or endangered species.

However, the Corps of Engineers and the Fish and Wildlife Service assert that exercise of Riverside's State water right, its withdrawal of water from the river through a pipeline, would reduce the flow of water in the river and thereby cause an adverse effect downstream. The adverse effect is to the habitat of the whooping crane, an endangered species. The habitat is located 250 to 300 miles downstream. The Corps of Engineers will only grant the section 404 permit necessary to construct the dam and reservoir if Riverside agrees to conditions. The conditions would require Riverside to put back in the river all or a part of the quantity of water which it plans to withdraw from the river to fill its reservoir.

Riverside brought suit against the Corps of Engineers contending that though the corps must consider the environmental effects of dam and reservoir construction, it could not con-

sider the effects of its consumptive use of water which was authorized under a State water permit. Riverside argued that the conditions imposed by the Federal agencies were contrary to the intent of Congress as clearly set forth in section 101(g) of the intent of Congress as clearly set forth in section 101(g) of the Clean Water Act. That section states that nothing in the act, "shall be construed to supercede or abrogate rights to quantities of water which have been established by any State."

The district court held that the Clean Water Act permits the corps to take into consideration adverse effects on the aquatic ecosystem, including fish and wildlife, even when those effects are far removed from the construction site. Because the corps may consider such effects before granting a section 404 permit, the court held that the Endangered Species Act requires that the effects be considered by the corps.

As for section 101(g) the court held that it was only an expression of congressional policy. Besides, the court reasoned, the corps is not taking away a State water right, it is only telling Riverside how it may exercise that right.

This is the fatal flaw in what is otherwise a well-reasoned decision. In fact, the only option the irrigation district and PSC now have is to put back into the river a quantity of water equal to all or a portion of the quantity which they are entitled to use under their State permit. It is clear that such a requirement attempts to supersede a right to a quantity of water which has been established by the laws of the State of Colorado. To characterize the action as regulation rather than prohibition is to seriously contort both the clear meaning of words and the express intent of Congress.

Many of my colleagues, particularly those from Eastern States, may ask what is the danger of giving the corps control over water rights? You may say that efforts to use and develop privately held land are often halted by a determination that the land is a valuable resource. Federal permits or assistance are often withheld if an endangered species or other protected resource would be adversely affected.

However, these restrictions are usually based on concerns over the environmental impacts on the land in question. These prohibitions and restrictions concerning land are somewhat predictable. But a similar restriction on the use or water, particularly in the West where water is scarce and land almost valueless without it, places more than a cloud over the water users at the source of the environmental concern. It clouds every water right from the area of concern all the way up to the headwaters, which may be over a thousand miles away.

In the West, we now allocate our scarce water resources through State agencies, under principles and laws established over the past 100 years, and under painstakingly negotiated interstate compacts. Congress and the courts have repeatedly recognized the unique and important role of western water law in all aspects of our economic, social, and political lives. Our statutes have consistently sought to preserve and protect that system from Federal interference.

If this district court decision is allowed to stand or is expanded, we may now see a dual system of water allocation with decisions of the Corps of Engineers and the Fish and Wildlife Service superimposed upon those of the States. Moreover, we may see a situation in which additional consumptive use of Platte River water for any purpose will be prohibited. No western river would be exempt from such a possible consequence.

This decision will most probably be appealed. The Tenth Circuit and perhaps the Supreme Court may be called upon to determine the issue. Perhaps they will disagree with the district court and moot the issue. Perhaps they will not. We should not take that chance and impose upon the people of the West the uncertainty that would prevail in the interim.

When Senator HART and I introduced the amendment that became section 101(g) of the Clean Water Act it was drafted in broad terms to address a general concern which we could not more clearly articulate at the time. Six years have now passed. The regulatory program and interagency procedures which implement the act have now been fully developed. We can now more clearly articulate the concerns which we have regarding the extent of the corps' jurisdiction. I intend to articulate those concerns in an amendment to the Clean Water Act which the Senate will consider this fall.

It is my intent to offer an amendment to section 404 of the act. The amendment will provide that in acting on permits, the corps and EPA shall not take into consideration effects of the diversion of quantities of water for beneficial use. Diversions covered by the provision would be those which are or are to be undertaken pursuant to a right to appropriate and use water granted by any State. The exception would not apply to projects which are designed to isolate water and wetlands and to convert them to dryland.

It is not my intent to do violence to the wetlands protection provisions of the Clean Water Act or to compromise the goals of the Endangered Species Act. My intent is to protect State water allocation systems which I believe are now in jeopardy under this most recent interpretation of the act. I announce my intentions now, before the August recess, as an invitation to my colleagues and to interested parties. It is an invitation to enter into a dialog concerning the most appropriate way to protect these two important systems of law while placing them back in the proper balance.

My colleagues who know me well know the depth of my concern over this issue. My intentions to address the problem are serious.

Therefore, I urge interested parties to contact me directly or to contact Ms. Terri Sneider of the Committee on Energy and Natural Resources. By working together we might develop a genuine solution rather than inviting a confrontation, and thereby better protect the goals of both these beneficial systems of law.●

REINSTITUTING THE DEATH PENALTY

● Mr. LEVIN. Mr. President, today the chairman of the Senate Judiciary Committee, Senator THURMOND, has reported a number of crime bills including a bill to reinstitute the death penalty for certain Federal offenses. Many of my colleagues already know of my views in opposition to capital punishment and know that should the bill be brought up, I intend to engage in lengthy debate on this issue. I am confident that a number of other Senators share my concerns about capital punishment and will join me in my effort to defeat the bill.

I hope that once the pros and cons of reinstituting the death penalty are considered, the Senate will follow the example of the British House of Commons, which resoundingly defeated an effort to restore capital punishment in Great Britain on July 13, 1983. According to the Washington Post, during the debate former conservative Prime Minister Edward Heath told members of the House that restoration of capital punishment would do nothing to enhance the safety of the people of the realm and that the annual debate on capital punishment in the House had prevented the legislators from giving real attention and resources to the problems of crime.

Mr. President, I happen to believe that no procedure for sentencing individuals to death would conform to the standards we hold sacred in this country. Our system is not foolproof and human error can lead to irreparable mistakes. Based on my experiences as a lawyer, I know that errors are made often and that innocent people are convicted of crimes. In order to maintain order in our society I suppose we all must accept these errors—at least where there is an opportunity to correct them. But when a person is executed the error can never be corrected.

Because of the risk that an innocent person will be executed, capital punishment should be rejected unless it can be shown that its benefits to society outweigh the risk of such errors.

The primary argument made by proponents of the death penalty is that the punishment deters those who would commit capital crimes, thereby protecting innocent people. I know of no persuasive studies which convince me that capital punishment has a greater deterrent effect than does a sentence of life in prison. In fact, a comparison of the FBI's statistics on homicide rates in America between 1962 and 1980 show that States with capital punishment have a higher average murder rate than States without it. During those years, States with the death penalty averaged 7 murders per 100,000 population, while States without the death penalty had a much lower average murder rate—4.5 murders per 100,000.

Mr. President, proponents of capital punishment argue that the new post-Furman procedures for determining whether a death sentence should be imposed limit the arbitrary and discriminatory nature of the death penalty which the Supreme Court found constitutionally objectionable when it struck down virtually every existing State statute in its Furman decision. But the death penalty continues to be imposed in an arbitrary and discriminatory manner today—disproportionately against the poor and the poorly represented. Studies conducted on imposition of the death penalty under the post-Furman statutes show that the race of the victim now figures predominantly in the jury's decision about whether to impose the death penalty.

There are a number of other compelling reasons why the Senate should firmly reject legislation to reinstitute the death penalty. All in all, after having done considerable research on the issue, I am convinced that the problems associated with capital punishment outweigh any possible benefit which society might derive from it and that is why I will do everything I can to see this bill defeated.

I also wanted to take this opportunity to insert in the RECORD a letter which was delivered to every Senator from the leadership of the religious community in strong opposition to S. 114, the death penalty bill reported by the Senate Judiciary Committee during the 97th Congress which was nearly identical to the bill placed on the calendar today.,

The letter follows:

SEPTEMBER 18, 1981.

DEAR SENATOR: We are writing to urge you to oppose S. 114, a bill to reinstitute the death penalty, which may come before the Senate in the not too distant future. We have serious concerns about any bill which sanctions the use of capital purnishment.

The religious traditions which we represent share a common belief that all human life is sacred. We believe that every individual has a unique worth and dignity which is given by God.

Government has the responsibility of protecting the lives of its citizens. We acknowledge this obligation and we reaffirm our interest in continued commitment to a society which is both safe and just. Our work brings us into touch with the deepest dimensions of the lives of both the victims and the perpetrators of crimes in our communities. We have witnessed the tragedy brought into the lives of victims of violent crime and also in the lives of those who commit such crimes. We believe that the death penalty fails to achieve the goal of protecting society and in fact perpetuates this tragic cycle of vengeance and violence.

While we support effective law enforcement measures within our criminal justice system, the irrevocable nature of the death penalty undermines our inherent respect for human life and eliminates any possibility of reform or of real restitution to society.

Both our experience and statistics bear witness to the disturbing reality that the death penalty is applied disproportionately to the poor, the uneducated, and minorities. This injustice frustrates society's goal of achieving an equitable judicial system.

Passage of this bill would represent a hollow victory for society in leading us to believe that we have "done something" about the real problems of crime and violence which plague our lives today. The taking of a human life should be reserved only to God—not to fallible human beings. We urge you to carefully consider our views and seek alternatives to the death penalty which respect the sacredness of human life.

Sincerely,

The Rt. Rev. John M. Allin, Presiding Bishop, The Episcopal Church (U.S.A.); Ross T. Bender, Moderator, Mennonite Church General Assembly; Bishop James R. Crumley, Jr., Lutheran Church in America; Arie R. Brouwer, General Secretary, Reformed Church in America; Rabbi Alexander M. Schindler, President of the Union of American Hebrew Congregations; Bishop H. Ellis Finger, Jr., President, Council of Bishops, The United Methodist Church; Avery D. Post, President, United Church of Christ; William P. Thompson, Stated Clerk of the General Assembly, United Presbyterian Church in the U.S.A.; Kenneth L. Teegarden, General Minister and President, Christian Church (Disciples of Christ); Stanley Bohn, Executive Secretary for Home Ministries, General Conference Mennonite Church; James E. Andrews, Stated Clerk, The General Assembly of the Presbyterian Church in the United States; Robert W. Neff, General Secretary of the General Board, Church of the Brethren; (Rev. Msgr.) Francis J. Lally, Secretary, Department of Social Development and World Peace, U.S. Catholic Conference; and Rev. Dr. O. Eugene Pickett, President, Unitarian Universalist Association of Churches in North America.●

SOVIET DAY OF SHAME

● Mr. DOLE. Mr. President, on August 21, 1983, we will join Americans of Czech and Slovak descent in sadly commemorating the 15th anniversay of the Soviet Day of Shame. On that day, 600,000 Soviet-led Warsaw Pact troops marched into Czechoslovakia and crushed the last hopes of furthering the progressive reforms initiated in the short-lived movement to institute Socialism With a Human Face; 15 years later, the Soviet presence continues to manifest itself in all aspects of Czechoslovak life. Even now, upwards of 80,000 troops police the Czechoslovak countryside.

The infamous Soviet invasion was provoked by the experimental reforms of Alexander Dubcek, then head of the Communist Party of Czechoslovakia. Dubcek's movements toward greater autonomy allowed the people of Czechoslovakia a taste of freedom. These reforms were quickly snuffed out by harsh orders from the ruling elite in Moscow, who could not accept any reversal of the so-called gains of socialism. Czechoslovakia was the first casualty of the infamous Brezhnev doctrine, which seeks to justify Soviet military intervention whenever and wherever the interests of socialism, as defined by the Kremlin, are threatened.

Specifically, the invasion was in violation of many key principles of international law in the charter of the United Nations. It violated the principles of self-determination of peoples and the sovereignty of a member state of the United Nations, and blatantly violated the article prohibiting the use of military force in the relations between individual members of the United Nations.

REPRESSIONS CONTINUE

Despite ongoing repressions, the peoples of Czechoslovakia continue to yearn for freedom. In recent years, two groups have voiced dissent, the Committee for the Defense of the Unjustly Prosecuted (VONS) and Charter 1977, petitioning the Czechoslovak Government to honor its commitments guaranteeing basic human rights under the Helsinki Final Act, both of these groups have been repeatedly harassed.

Under pressure from the Soviets, the Czechoslovak Government persecutes and imprisons intellectuals and dissidents. Within this past month, Mr. Ladislav Lis, VONS member and Charter 1977 signatory and spokesman, was sentenced to 14 months imprisonment and 3 more years internal exile on charges of incitement, this is but one of many unjust cases. The Czechoslovak regime has also pressured Catholic activists and arrested and imprisoned several members of the clergy.

As cochairman of the Commission on Security and Cooperation in Europe, I regret that these manifestations of noncompliance with the Helsinki Final Act continue. We must be careful not to assume that the peace and freedom of any nation can be

maintained as long as the Soviet Union retrains its present doctrines.

Mr. President, let us recognize and encourage the quest of the Czechs and Slovaks for true sovereignty, our resolute support for human rights must not fade. We shall never forget those who give of themselves in order to make the dreams of freedom a reality.

As Franklin D. Roosevelt, in his Four Freedoms speech, stated:

Freedom means the supremacy of human rights everywhere. Our support goes to those who struggle to gain those rights or keep them. Our strength is in our unity of purpose.●

TERRORIST GROUPS AND THE UNITED NATIONS

● Mr. GRASSLEY. Mr. President, as a Member of the U.S. Senate, I am becoming increasingly concerned about the drain on U.S. resources being made by the United Nations each year. American taxpayers have provided more than $10 billion for the support of the United Nations and its affiliated agencies since 1964. Each year, the United Nations asks for more money, and hard-earned U.S. tax dollars are being pumped into the United Nations at a rate of more than $1 billion each year at present.

As pointed out in the following article by Allan Brownfeld, the United Nations uses substantial amounts of this money to help finance such terrorist groups as the Palestine Liberation Organization (PLO) and the South West Africa Peoples Organization (SWAPO), as well as the African National Congress (ANC). Each of these groups has been repeatedly identified by intelligence agencies in the United States and around the world as a pro-Soviet, anti-American terrorist organization exercising a kind of international "lynch law" to destabilize and destroy the pro-Western governments of friendly neighbors. In each instance, the ill-concealed hand of the Soviet Union may be seen providing military advisers, arms, training, and equipment for these terrorist groups.

The U.N. General Assembly, once described by a leading Washington Post columnist as an "institutional outrage," a "moral swamp," "that operates much of the time by the mob rule of the Third World in close alliance with the Soviet-bloc," has granted permanent observer status to SWAPO, PLO, and several other pro-Soviet terrorist organizations. These organizations receive financial support from the United Nations, and maintain independent offices in New York and other parts of the world to carry on their terrorist propaganda and plan their terrorist activities. And U.S. taxpayers are providing 25 percent of the money to subsidize these Soviet-sponsored terrorist campaigns.

Mr. Brownfeld calls to our attention that in Southern Africa, SWAPO is recognized by the United Nations as the "sole and authentic" representative of the Namibian people, even though there are many other political parties in Namibia. As the following item points out:

SWAPO, of course, is financed by the Soviet Union and its Cuban and eastern European surrogates. The United Nations and its specialized agencies have allocated $40 million to SWAPO for U.N. programs between 1977 and 1981 and new programs slated for the 1982-86 period.

My concern arises from the fact that U.S. national security is deeply involved in Namibia, which has become the focus of the global East-West struggle. South West Africa, which is generally referred to as Namibia, has the largest uranium mine in the world, and vast mineral resources such as copper, tin, lead, zinc, and many others. It is a major source of industrial and gem diamonds, and some geologist think it may have as much oil and gas as the Arabian peninsula. In addition, Namibia has deepwater ports capable of harboring the Soviet nuclear submarine fleet in a much improve position to bisect the oil and mineral lifeline from the Persian Gulf to the NATO countries of Western Europe and to the east coast of the United States.

Apparently the military strategies in the Kremlin have selected Namibia as the Southern Africa gateway for further Soviet empire expansionism in the Soviet mineral "resource war" to control the sources of such stragetic minerals as chrome, the platinum group, iridium, vanadium, and others which are critical to the U.S. national defense industrial base. It is no secret that the Soviets have proclaimed for years that if they can control the minerals from the Southern Africa area, they can bring the NATO countries and the United States to their knees in a matter of weeks, because of their dependence on these vital minerals to fuel the industrial activities which provide not only our national defense, but most of the defense materials for the Free world. In short, SWAPO control of Namibia will subject the United States to the risk of Soviet blackmail.

It is no secret that the Soviets expect to sell us the rope with which we will hang ourselves. By allowing the United Nations to use U.S. tax dollars to finance pro-Soviet terrorist groups bent on denying the U.S. access to vital strategic minerals, we are committing slow-motion suicide. We are contributing to our own destruction. I recommend the following article to the consideration of my colleagues in Congress and to all Americans whose personal safety is being put at risk by our continued and foolish support of a United Nations which has become an enemy of the people of our country.

The article follows:

[From the Washington Inquirer, June 24, 1983]

U.N.: A DREAM THAT FAILED

(By Allan C. Brownfeld)

It is becoming clear to more and more Americans, and others in the Western world, that the United Nations is clearly a dream that failed.

Why otherwise intelligent and worldly men believed that a lasting peace could truly be achieved by establishing a world organization—including in membership the very states which were most threatening to the peace—is difficult to understand. Other men with that same dream created the League of Nations. It ended in the devastation of World War II.

The record of the U.N. ever since its creation should convince anyone not blind to reality that the primary hope for the organization—that it would preserve the peace—was simply a twentieth century form of alchemy.

According to Article Four of the Charter of the U.N., "Membership in the U.N. is open to all peace-loving states which accept the obligations contained in the present Charter . . ."

Communist China was condemned by the U.N. for its aggressive role in Korea. The U.N. even went to war to protect South Korea against Communist aggression. Yet, by changing the definition found in Article Four to include Communist China in the U.N., that body has shown that its own charter is irrelevant to its real operating procedures. It has now embraced the concept of "universality," a phrase not found in the Charter, rather than the concept of "peace-loving," which is specifically set forth.

The U.N. version of "university," however, is quite selective. Israel has been expelled from a number of U.N. bodies. Taiwan was expelled from the U.N. itself. South Africa is not permitted to take its seat in the General Assembly—although South Africa was a founding member of the U.N. Where was "universality" when the U.N. placed an embargo against Rhodesia—although it was not guilty of invading the territory of any other sovereign state?

Beyond this, the U.N. was silent as freedom was destroyed in country after country. When the people of Hungary rose up in 1956 against Soviet oppression, the U.N. did nothing. When the Communists built the Berlin Wall in violation of international law and of the U.N. Charter itself, the U.N. did nothing. Czechoslovakia rose up against its Communist government and the U.N. remained silent.

In June, 1963, the U.N. accepted the credentials of the government the Soviet Union had forcibly imposed upon the people of Hungary. Discussing this action, the Assembly of Captive European Nations declared: "The approval of the credentials of the Kadar regime by the U.N. Credentials Committee will come as a great shock to the people of Hungary and other captive nations. The absence of any attempt to challenge the legitimacy of the representatives appointed by a regime the U.N. has branded as one established by Soviet military intervention will, we feel, be viewed as proof that to all practical purposes the question of Hungary has been dropped, as proof that sheer expediency and not principle determines the policies." At the present time the U.N. remains silent about the Soviet invasion of Afghanistan, and its use of chemical warfare against the innocent people of that

country. The U.N. has, for almost a decade, been deeply involved in supporting and promoting international terrorism. This attitude became clear in January, 1975 when Secretary General Kurt Waldheim permitted the Vietcong to open an office in Geneva, The Vietcong's Provisional Revolutionary Government was authorized by the Swiss Government at Mr. Waldheim's request to establish an office at the U.N.'s Geneva headquarters for contacts with world organizations and agencies there. Later, Yasir Arafat, carrying a gun, was welcomed to speak in the General Assembly.

Today U.N. refugee camps are being used by terrorist groups such as the Palestine Liberation Organization (PLO), the South West Africa Organization (SWAPO) and the African National Congress (ANC).

In southern Africa, SWAPO is recognized by the U.N. as the "sole and authentic" representative of the Namibian people, even though there are some 45 political parties in Namibia. SWAPO, of course, if financed and trained by the Soviet Union and its Cuban and Eastern European surrogates. The U.N. and its specialized agencies have allocated $40 million to SWAPO for U.N. programs begun between 1977 and 1981 and new programs slated for the 1982-86 period. Among these is the SWAPO-controlled Institute for Namibia, located in Zambia. Between 1977 and 1981, about $1 million a year in U.N. funds went to finance the Institute. In 1982 several U.N. member nations pledged an additional $2 million. The U.S. pledge of $500,000 for 1982 was by far the largest.

Why has the U.S. continued to pay one-fourth of the bills of an organization which works against our interests and those of peace—and which gives Moscow three votes to our one? Professor John Roche recently declared: "To put it bluntly, the U.N. has been taken over by a coalition of anti-democratic nations . . . The last time I looked the U.S. was putting in about a quarter of the money, to say nothing of the choice of location and other perks. Now I don't like anti-democratic organizations, but I am prepared to accept their existence—so long as I don't pay for their fun and games."●

THE COAST GUARD'S 193D BIRTHDAY

● Mr. MURKOWSKI. Mr. President, on August 4, 1983, the U.S. Coast Guard will celebrate its 193d birthday. Charged with maritime law enforcement and protection of lives and property at sea, the Coast Guard has been a vital arm of the Department of Transportation in times of peace and has served as part of the U.S. Navy in times of war.

Mr. President, as a former coastguardsman, I know full well how serious and difficult is the task the Coast Guard faces. As an Alaskan growing up in Ketchikan, I know firsthand how all-important the Coast Guard is to people whose lives are oriented to the sea. Their search and rescue missions have meant survival to thousands of Alaskans and other Americans.

I congratulate the Coast Guard on a job well done and wish it many happy returns of the day.●

LABELING OF FROZEN CHEESE PIZZAS

● Mr. D'AMATO. Mr. President, I rise to applaud the actions of the Department of Agriculture with respect to the labeling of frozen cheese pizzas. The American consumer is entitled to know precisely what contents are included in the food he or she purchases. Prior to the issuance of these regulations, the use of imitation cheese and cheese substitutes in frozen pizzas did not conform to those standards. I have pressed the Department to implement regulations similar to those proposed in New York and I am pleased to see that they have now done so.

These new regulations will require the manufacturer of frozen pizzas to indicate when a cheese substitute of equal nutritional value is used in the pizza by labeling it as "substitute" cheese, and when a less nutritious substitute is used by labeling it as "imitation." It is my hope that this action will enable the consumers of this Nation to make a better informed choice when purchasing food for their families. This is truly a change whose time has come.●

MARTIN LUTHER KING, JR., DAY, A NATIONAL HOLIDAY

● Mr. D'AMATO. Mr. President, I am proud today to add my name as a cosponsor of S. 400, which designates the birthday of Dr. Martin Luther King, Jr., as a national holiday. The passage of a similar bill by the House on August 2 was a welcome development. I support S. 400 because of my profound desire to see Dr. King's dream become a reality. I have reviewed all the arguments for and against this legislation, and concluded that support for S. 400 is the logical and moral choice.

Since Dr. King's assassination, we Americans have endured 15 years of painful and harmful divisions among ourselves. A national holiday in honor of a great leader who dedicated himself to joining people together could help us heal many of those divisions. It would encourage us to reflect and act with renewed dedication to further the fundamental American ideals of equality, justice, and brotherhood.

We should not ignore the special meaning such a day would have for black people, either. There is a very emotional and very human side to our decision to designate a Martin Luther King, Jr., Day. This day would mark our national commitment to racial equality in a way that would touch the lives of all Americans in a very specific way, in a way, I daresay, that all our legislation and court decisions do not and cannot.

I believe that Dr. King was not just a great man, but also a good man. Every time I hear his "I have a dream" speech, I again reflect upon the great contribution he made to all our lives. He helped bring us together; by his good and highly moral example, he showed us the way to brotherhood. Dr. King was a man of whom all Americans can be proud. I urge my colleagues to join me in support of S. 400 to honor this great American and to help keep his dream alive.●

A PRIZE-WINNING ESSAY ON NUCLEAR POWER

● Mr. BINGAMAN. Mr. President, a young constitutent of mine from Santa Fe, N. Mex., recently won the Civitan's Great Southwest District 1982-83 Citizenship Essay Contest with an essay entitled "On Nuclear Power in America's Future." Mr. Andrew Norris Carpenter is to be congratulated for his scholarship and very fine review of a highly complex issue. Mr. President, I ask unanimous consent that his essay be printed in the RECORD.

The essay follows:

ON NUCLEAR POWER IN AMERICA'S FUTURE

Nuclear power has been heralded as the shining hope for America's energy future. In 1973, the now defunct Atomic Energy Commission stated that by the year 2000 the United States could produce over fifty percent of its electricity and one-quarter of all its energy by nuclear energy. However, recent studies have concluded that nuclear power is uneconomical and unnecessary for the United States. This essay shall be devoted to the important question of nuclear energy's role in our nation's future.

People like to believe that problems are simple and easily solved. Unfortunately, this rationale is not valid. Problems often have multiple causes, multiple results, and multiple solutions. Solving a problem involves taking the course of action that will be the most beneficial for all interests involved—social, political, economic, and ecological. The problem of our nation's energy future is no different. The general welfare of our nation—indeed, the stability of the world—depends on the availability of economical and reliable sources of energy. Unfortunately, the United States is running out of the high-quality energy it has been using; there is a genuine energy problem that our country will have to face in order to survive. The most optimistic projections give us only a few hundred years of recoverable fossil fuels to use. Yet, oil, natural gas, and coal account for ninety percent of our nation's energy use. Clearly, something must be done. Nuclear power certainly looks like a solution to our energy problem. Nuclear fission produces electricity—at the rate of 139,000,000 kilocalories per kilogram of fuel—that can be used for much of what fossil fuels do today. Electricity cannot only heat our homes and run our electrical appliances, but can also form hydrogen gas out of water that would drive our cars. Nuclear fission's technology is well-developed, and breeder reactors can extend the useful supplies of uranium-235 almost indefinitely. There have been no major nuclear power accidents, and we are finding methods of containment and detoxification of nuclear wastes. We have invested 150 billion dollars in nuclear energy, and it seems that even

safer nuclear fusion can be commercially developed within the next fifty years. Although nuclear power presently produces only three percent of our nation's energy, we can clearly rely on nuclear power to take a leading role in America's energy future.

The question, however, is not whether nuclear power can take a dominant role in our energy future, but whether nuclear energy should take a leading role in it. It is clear that a major energy transition of some kind is inevitable. There is simply no way that we can maintain our present life style without developing new sources of energy. We have already seen that nuclear energy can become this new source of energy. However, we have not acknowledged the Faustian bargain that we strike by doing this.

The issue is not merely technical, but technical, social, and moral. Our nuclear fires have the potential to be extremely destructive as well as beneficial. Although a fission reactor cannot explode like an atomic bomb, it can blow up like a steam boiler because of the high pressures involved in the cooling and containment systems. A large-scale nuclear accident would be devastating: radioactive materials would be released into the environment that could kill or injure thousands of people and contaminate large amounts of land for thousands of years. Furthermore, spent nuclear fuel can be used to produce nuclear explosives or used as a toxin by terrorists. The technology for protecting ourselves from the radioactive waste is not developed enough to say that we will find a safe solution; our descendants may have to deal with this problem in a way that we do not like to think about. Spreading nuclear technology around the world runs the risk of allowing unstable governments to gain the technology to produce nuclear weapons. However, it is believed that we can make nuclear power safe and reliable—at a great cost. We can defend our present lifestyle, but we must decide if our present lifestyle is worth protecting.

America is not only the world's largest energy user; it is the largest energy waster. Eighty-five to ninety percent of the energy used in America could easily be saved if a more energy-efficient lifestyle were instituted. When one hears about the environmental movement, one thinks of having to make unbearable sacrifices. This is simply not true. The overall quality of life is the same or higher in Japan and most of the Western European nations than it is in America, yet those people use only one-half to one-third the energy per person as we do. Americans waste more fossil fuel than is used by two-third of the world's population; more energy is spent on American air-conditioning than is used in all of China. Conserving energy may simply mean not using a 5,000 pound automobile to drive one-half mile for a six-pack of beer, beer that will be drunk in energy-inefficient homes, and out of cans that will be thrown away. Conserving energy means understanding the laws of thermodynamics and their implications. We must take into account the entire cost of an energy source, not simply the initial cost. It does not take unjust sacrifices. It only takes thought. Why use fossil fuels that must be extracted, processed, transported, converted to electricity at a power plant, and transmitted simply to heat a home. We can wear warmer clothing and build houses that take advantage of the great influx of solar radiation that reaches all of us every day. Why build monuments to energy waste such as the 110-story World Trade Center in Manhattan, which uses as much electricity each year as a city of 100,000 persons? Why build glass buildings where not a single window can open and whose heating and cooling systems must operate 24 hours a day, seven days a week? The basic principle of ecology is that everything and everybody are all interconnected.

I feel that America's future does not lie in ignoring this fact, but by accepting it. If we do not, the quality and stability of life on our planet will surely be degraded. I am an optimistic person: I believe that Americans will operate with the same principles that our nation was founded on—reason and forebearance, and that we will be willing to give up a few things and change patterns of our lives in order to prevent a continuing decrease in freedom and in the quality of life for all.

Therefore, I say that America's future does not depend on nuclear power to maintain our present lifestyle at great political, moral, and ecologic costs, but lies in living with nature and ourselves. Nuclear power may play a role in our transition to such a sustainable earth society, but nuclear power—and the values it represents—alone is not the answer.●

IN MEMORY OF FRED B. BURKE

● Mr. RIEGLE. Mr. President, I want to express my gratitude for the life and work of Fred B. Burke, who for the last 20 years has been one of the chief architects of this Nation's public transportation policy. I am sure I speak for many other Senators who came to know and respect his labor on behalf of public transportation.

Mr. President, it is rare indeed that one individual can have the influence on a major area of public policy that Fred Burke has had on Federal mass transit policy. That is a measure of his unusual intelligence and determination.

Fred Burke was born on February 4, 1930 in Ionia, Mich. He attended the University of Michigan Law School and served as an administrative assistant to the commissioner in the Michigan State Highway Department. Fred was a son of whom his home State could be proud.

After serving his country for 2 years in the U.S. Army, Fred Burke came to Washington in 1958. My predecessor, Senator Phillip Hart, recognized Fred Burke's ability and asked Fred to serve as his campaign director in elections of 1958 and 1964. As a key member of Phil Hart's staff for 7 years, Fred Burke came to understand and love the workings of the Senate.

In 1965, Fred moved on to a high management position during the exciting early years of the Appalachian Regional Commission, and rose eventually to become the Commission's Alternate Federal Cochairman. He later served as the Deputy Assistant Secretary for Public Affairs in the Department of Transportation.

In 1969, he founded Fred B. Burke, Inc., as a transportation consulting firm, and over the next 14 years he became the driving force that turned fragmented support for public transportation into an effective nationwide coalition. Fred Burke possessed a unique ability to form transportation legislation that would fairly and equitably distribute Federal assistance. Because of his work, Congress was able to strike a delicate balance between the demands of urban areas and rural areas, between the needs of bus and rail systems, and between the interests of established transit systems and new agencies. Because Fred was able to create such a balance, Congress was able to provide significantly increased Federal assistance to mass transit across the country.

Mr. President, the chapel of one American college has a bronze plaque that reads: "Never take your college as a matter of course, because many people whom you may never know anything about have broken hearts to get it for you." Perhaps a similar thought could be addressed to those who depend upon public transportation—the elderly who rely on it for mobility, the poor who need it for access to jobs, the residents of large cities that would be unlivable without it, as well as the residents of many smaller communities that are also served by public transportation. Literally millions of people who may never hear the name of Fred B. Burke will benefit for decades to come from his efforts.

The many who do know his name, know that Fred Burke gave much of himself so that the Nation could have stronger public transit. During the last year of his life, major public transit legislation was moving through Congress. His skill and determination did much to make that legislation successful. His efforts were also taking a far larger toll on his body than most of us realized.

Fred B. Burke, who has been called the ultimate civil servant, made a major contribution to his country. He will be sorely missed.

Mr. President, I know that I speak not only for myself but for a number of my colleagues when I express profound gratitude for his life and sympathy to his family.

Mr. President, I ask that the text of a Washington Post article of June 14, 1983 be printed in the RECORD.

The article follows:

TRANSIT'S FRED BURKE, ULTIMATE CIVIL SERVANT

It became obvious at Fred B. Burke's funeral Friday night why he had been so successful at what he did, which was to put together the government programs that saved mass transit.

Everyone who counts was there: the key staff members from the key committees on Capitol Hill, some big wheels from the U.S. Conference of Mayors, close friends from the Urban Mass Transportation Administration and the American Public Transit Asso-

ciation, and representatives from big systems like New York's Metropolitan Transit Authority and Washington's Metro.

Even Walter Bierwagen, a gentle intellectual who rose from representing bus drivers in the old D.C. Transit System Inc. to become an international vice president in the Amalgamated Transit Union, showed up in a wheelchair while still recovering from a severe stroke.

The remarkable thing about Burke was that he understood all of those competing interests—authorizing committees and appropriating committees, labor and management, big city pols and their sometimes politically difficult transit authorities—and could talk to them all without losing the trust of any.

Burke invented legislative formulas that would work politically. Federal transit money over the years has been limited, with many cities competing for grants from the same pot. All of them were clients of Fred B. Burke Inc.

The transit community is no different from many other interests in Washington: its members share the love of federal money. They have conflicting goals, ranging from labor protections (which unions want and managements don't) to allocation formulas that favor little cities over big, or vice versa. Somebody has to bring it together, and that somebody isn't always officially in the government. Fred Burke was one of those somebodies, a former federal official turned consultant, but the ultimate civil servant.

The heart ailment that claimed Burke at 53 had been a major problem in recent months. When he should have been taking it easy, he worked furiously on Capitol Hill during last December's lame-duck session to protect transit interests in the legislation that increased the federal gasoline tax.

He helped write the deal that created, for the first time, a federal trust fund for transit programs similar to the one "the highway guys," as he called them, have had since 1956.

Then, when part of that deal began to come unglued after former transportation secretary Drew Lewis left town and the Office of Management and Budget began to rewrite history in the new Reagan budget, Burke went back to the hill to sort it out.

He was at least moderately successful. A newcomer to transit matters at OMB was asked recently how the program was going and he replied, "Well, there's this Fred Burke problem." He meant that, for the OMB's point of view, it wasn't going very well at all.

As Friday evening wore on, as condolences were expressed to family members, as the mood lightened a bit, labor began to talk to management; appropriations had a few words with authorization, reporters trolled. Government works that way in Washington, and Fred Burke understood that better than anyone.●

POOR SHOPPERS AT THE PENTAGON

● Mr. PRYOR. Mr. President, recently the Arkansas Gazette commented on the enormous prices being paid by the taxpayers for Defense Department tools and spare parts.

The Gazette suggested that the Secretary's nickname be changed from "Cap the Knife" to "Caspar the Claw Hammer" because his buyers at the Pentagon have been buying claw hammers for $435 each.

I commend the Gazette's editorial to my collegues and I ask that it be printed in the RECORD at this point.

The editorial follows:

POOR SHOPPERS AT THE PENTAGON

The fate of John Henry, the legendary gandy-dancer in the powerful folk ballad, should be administered to the Pentagon's purchasing procedures. "He died with the hammer in his hand, Lord. He died with the hammer in his hand."

Recent audits of the Pentagon's purchasing procedures turned up some interesting transactions. The horror stories were uncovered by various government agencies that decided there must be something wrong with the way the Defense Department was running its procurement system.

One group discovered the Department was paying $185 each for post tips—apparently the kind that might be on the legs of a kitchen chair—that contained 14 cents worth of plastic. Half-inch screws were billed at $9.47 each and a 12-foot measuring tape of the kind that might be found in any carpenter's tool chest cost the government $437. Gould Simulation Systems, Inc., of Melville, N.Y., charged the Navy $436 for a sledge hammer and $435 for a claw hammer.

In slightly larger deals, the Navy bought $80,284 worth of spare parts for flight simulators but, with no more attention than a grocery shopper would give to selecting a head of lettuce, it could have bought the same parts for $3,638. The Air Force spent $3.2 million for parts worth $883,000

Auditors have turned up hundreds of purchases that could have been made (with considerable savings) at the Wal-Mart or Target stores. In cases of specialized parts not normally available to off-the-shelf shoppers, there is little evidence to suggest the purchasing officials haggled over prices.

When the story began to emerge, the Navy fired an officer at the Orlando, Fla., naval center and reprimanded the commanding officer and a civilian purchasing agent.

Corrective action at one little naval center is meaningless. Defense Department suppliers from Florida to California know the price of hammers.

Measuring tapes and spare parts are like "crumbs from the table" in the Defense Departments purchases. The real horror stories are to be found in the planes, tanks, trucks, ships, and missiles that come in at twice the price originally estimated. In a military budget that exceeds $200 billion, the opportunities are abundant.

One little problem is that public perception is blunted by numbers that are beyond comprehension. When a plane that was supposed to cost $18 million comes in with a delivered price of $30 million, the garden-variety citizen may not give the deal a second thought. He hasn't bought an airplane recently and has no idea what one is supposed to cost; he does know the price of a claw hammer or a half-inch screw.

Back in the days when Caspar W. Weinberger was director of the Office of Management and Budget or secretary of Health, Education, and Welfare, he was known, deservedly, as "Cap the Knife." His proclivity for slashing recommendations for food stamps or other "social" programs obviously did not carry over to his current job as secretary of Defense. Now he can assure us, with a straight and innocent face, there is no waste in the Defense Department. We are down to the "muscle" and any cut in appropriations or even a failure on the part of Congress to increase the budget by the full 10 per cent (after inflation) recommended by President Reagan would be a disaster.

The solemn assurance that there is "no waste" in defense spending—and, therefore, no opportunity to tighten up the budget—has been absurd to the macroanalyst all along. Now the price of hammers has revealed the flaw in the ridiculous claim in terms anyone can understand.

Some months ago, President Reagan revealed his grasp of problems related to government spending and redoubling deficits when he cited an example (perhaps apocryphal) of a food stamp recipient who collected "change" from a grocery purchase and bought a bottle of gin.

"That's the problem right there," he said.

The implication was that if we could eliminate the gin purchases from the food stamp program we would solve the country's fiscal problems.

The Defense Department budget is some $200 billion larger than the food stamp budget. Admittedly, there is a potential for waste in all government—or, for that matter, private—spending. The opportunity increases with the size of the budget. The recent audits have shown that the Defense Department could be improved with more careful spending. We could not balance the budget by eliminating waste from the Department but we could make a dent in the shortfall.

Mr. Weinberger no longer deserves the name "Cap the Knife." Those who deal in such matters may elect to call him "Caspar the Claw Hammer."

When the Defense Department pays $435 for a hammer, there is no validity to the claim that waste has been eliminated from the armed forces.

The situation would be improved if the present no-bid procedure were permitted to "Die with a hammer in its hand."●

WORKING IN SAN QUENTIN IS SAFER THAN PHARMACY

● Mr. JEPSEN. Mr. President, as my colleagues know, I have been working for quite some time to get legislation making the robbery of a controlled substance from a pharmacy a Federal offense. In an effort to build a case for this legislation, I have from time to time placed articles in the RECORD pointing out why this legislation is so necessary.

Recently, an article came across my desk which is perhaps one of the most compelling stories about how serious this problem has become. The article, written by a 61-year-old pharmacist from San Rafael, Calif., tells how this man feels safer dispensing prescriptions at the San Quentin prison than he did serving the general public from his community pharmacy. I hope my colleagues can grasp the seriousness of this commentary. We must ask ourselves what kind of society have we when law abiding citizens feel safer in prison doing their life's work than out in the community.

I strongly recommend that my colleagues take a moment to read this amazing story. I think it will convince

many that the problem is so serious that it deserves Federal attention.

Mr. President, I ask that the article entitled "Working In San Quentin Is Safer Than It Used To Be in My Own Store" be printed in the RECORD at the end of my statement.

Mr. President, I am also placing in the RECORD, an editorial which appeared in the July issue of American Druggist magazine which asks the question "Could U.S. Law Make Crime Worse?" I think many of us may already know the answer to that question but I believe the editor, Mr. Stanley Siegelman, makes a very intelligent and rational argument as to why the pharmacy robbery legislation is necessary and will not make the crime worse. I recommend this article to any of my colleagues who may have some questions as to the necessity for the legislation I have introduced.

Mr. President, I ask that the July 1983 editorial entitled, "Could U.S. Law Make Crime Worse?" be inserted in the RECORD immediately following my remarks.

The material follows:

[From American Druggist, July 1983]

"WORKING IN SAN QUENTIN IS SAFER THAN IT USED TO BE IN MY OWN STORE"

(By Marianne Wilson)

Pharmacist Elvus Regalia, 61, operated a pharmacy in San Rafael, a suburb of San Francisco, for 25 years.

Today, he is one of two full-time pharmacists working at Newmiller Hospital, located inside San Quentin, maximum security prison. What's more, he actually feels safer inside the prision than he did in his own store!

Owning the San Rafael pharmacy wasn't always dangerous. Mr. Regalia, a soft-spoken man, looks back upon those days with pleasure:

"I really got to know my customers. I would recommend things to them and they were grateful for my interest and advice. That meant a lot to me. It was more than just a business."

The pharmacy was also the center of his family life: "My wife and all my children helped out. We enjoyed working together. We all put in long hours, but the business served us well. I got a lot of enjoyment from that store.

"It must have agreed with the children because my daughter, who is a nun, is director of pharmacy at a hospital in southern California. And my youngest son is thinking of entering pharmacy school in the fall."

PRIME TARGET

Mr. Regalia doesn't remember exactly when his enjoyment was replaced by fear. But his pharmacy, located in a downtown medical building, suddenly became a prime target for drug-hungry criminals. The owner installed ever more elaborate burglary systems, but they didn't help. The store was broken into six times, and Mr. Regalia was held-up at gun point three other times. All were drug-related crimes.

Though his family became increasinlgy concerned for his safety. Mr. Regalia was stubborn and refused to sell the business that had been his life's work. His store was robbed yet again, but this time the scenario was far more terrifying. He was held hostage at gunpoint for over three hours. Today, five years later, Mr. Regalia remembers every detail of his harrowing ordeal that spring day in 1978:

HOSTAGE

"I came up from the stockroom," Mr. Regalia recalls, "and all of a sudden this guy, who had been in the store for awhile but didn't look particularly suspicious, pulled out a gun. He forced me to tie up my salesperson and the one customer who happened to be in the store. Then I had to show him where all the drugs were. He kept warning me that he had a 'full-clip' in his gun and that he would blow all our heads off if he had to. He consumed an unbelievable amount of hard drugs. I couldn't understand how he was still standing, much less talking, after all that he took."

After much cajoling, the pharmacist was able to convince his assailant to set the other two hostages free.

"I knew that the customer I had tied up had a serious heart problem. One of my greatest fears was that she would suffer a heart attack. I kept telling the guy that if she did have a heart attack and die, he'd be held responsible for murder. He finally let them both go."

By this time, the outside of Mr. Regalia's pharmacy was awash with police, concerned friends, reporters and television cameras. The assailant spoke with the police on special phone lines they had set up. Inside, Mr. Regalia kept his cool.

Preoccupied with the police outside and the pharmacist's continuing conversation, the intruder put the gun down on a counter. Mr. Regalia grabbed it and ran out of the store. The police went in and got him.

Mr. Regalia has harsh words for the way in which the legal system dealt with the criminal:

"He spent seven months in a county jail waiting for his trial to come up. And then, because of plea bargaining, he got out with the only stipulation being that he report daily to a drug rehabilitation unit for five months. Five months! I saw how many, and what type, drugs that man consumed in just three hours. There was no way he could be completely rehabilitated in just five months. On top of it all, he had a previous conviction."

ONCE MORE

A while after that ordeal, Mr. Regalia's store was again burglarized. It was New Year's Eve, 1980, and the family was getting ready to have a party when the call came.

"It was one of those quick in-and-out type of break-ins," Mr. Regalia says. "They got the drugs they wanted and left. The robbers were gone by the time police arrived. No one was ever apprehended."

That break-in was the straw that broke the camel's back. For his own safety and sanity, not to mention his family's, Mr. Regalia sold the store.

"It was a hard decision, but I felt I was just pushing my luck the longer I stayed. The fund and enjoyment had long gone out of the business. Every time someone I didn't know walked into the store, I would think, 'this is it, he's going to be the one'. And at home, whenever the phone rang late at night or early in the morning, I would say, 'oh no, not again'. That's no way to live."

FINANCIAL PRESSURE

"Even with insurance, a pharmacy owner always loses out when there's a robbery or break-in." Mr. Regalia notes. "Insurance doesn't pay for everything. Broken window and locks, cleaning and sorting out the store—it all adds up. And who can ever remember everything that's been taken? There's also the added cost of all that lost time. If you want to testify at the trial, you have to have someone take your place. I was being nickeled and dimed to death each time there was a break-in. It was time to get out."

Even though Mr. Regalia sold his business two years ago, the feisty pharmacist was determined to protest against a legal system that, he says, "often seems to have more respect of the rights of the accused than the victim." He appeared as a witness last year before the President's Task Force on Victims of Crime. Mr. Regalia detailed to the committee the terror that had changed his life. He was the only pharmacist to appear.

As an aftermath, he was chosen, along with five other committee witnesses, to attend a private reception in the White House Rose Garden. Lois Herrington, chairperson of the Task Force and currently the U.S. Assistant Attorney General designee, recounted the personal story of each attending witness to a host of government dignitaries including President Reagan and Vice President Bush. After the reception, President Reagan chatted individually with all the witnesses.

"It was pretty thrilling, going to Washington and meeting the president," recalls Mr. Regalia. "But the important thing is I'm now more hopeful something good will come out of all that's happened not only to me, but to the countless other victims of crime."

DETERRENTS

Mr. Regalia feels legal deterrents are the most effective crime fighting weapons. He urges all pharmacy owners to prosecute robbers and follow through on all pretrial and trial activity. He does not advocate, however, pharmacists using guns to protect themselves.

The former pharmacy owner is a strong supporter of currently proposed pharmacy crime legislation.

"I really do believe that if the robbery or the attempted robbery of drugs from a pharmacy was a Federal crime, many would-be criminals would stop and consider what they were getting themselves into. If the crime carried with it a more severe punishment, it would act as a deterrent. If criminals were made to pay a bit more for their crimes, I think the number of crimes would decrease."

In the two years since Mr. Regalia sold his pharmacy, the number of drug-related pharmacy crimes in Marin County has increased.

SAN QUENTIN

Describing his job in the prison, he says: "The lines are drawn inside. You know what to expect, and that's a lot easier to take than the surprise element I had to face every day on the outside. It is pretty ironic that I ended up working with hardened criminals. But I'm a lot less vulnerable to attack behind bars than I was behind the counter."

Helen Regalia, the pharmacist's wife, agrees that he is safer behind prison walls. She is glad that her son seems more interested in hospital pharmacy than he does in owning a drug store.

"It's sad to say, but pharmacists are just very vulnerable to crime these days," Mrs. Regalia says. "At least hospitals seems a bit safer."

[Editorial]

COULD U.S. LAW MAKE CRIME WORSE?

(By Stanley Siegelman)

The above headline, published in another pharmacy magazine, asks an intriguing question—one that deserves an answer. It reflects a sentiment that emerged at a hearing held by the House subcommittee on crime.

At that hearing, subcommittee chairman William H. Hughes (D., N.J.) asserted that a Federal law which addressed itself to pharmacy crime is unnecessary, because existing law (the Hobbs Act) already covers the subject. At the same time, Rep. Hughes contended a new law might even exacerbate pharmacists' problems. He conceded that the U.S. government had not prosecuted many robberies under the Hobbs Act, which is a generically worded statute against violence committed by organized crime.

Cobwebs surround the 40-year-old Hobbs law. It has atrophied through virtual nonuse. Recommending its application may be likened in another context to a physician saying vaguely "Let's try an antibacterial," instead of saying specifically "Let's try cefaclor." By brandishing Hobbs, Mr. Hughes raises hob.

Rep. Henry J. Hyde (R., Ill.), sponsor of H.R. 1255, controlled substances robbery legislation, calls the Hobbs Act "a statutory monkey wrench—a clumsy, general-purpose statute which is ill-suited to the task at hand." Asking the Justice Dept. to prosecute under that Act, he says, "is like asking a skilled mechanic to overhaul an entire automobile engine with a monkey wrench."

Rep. Hyde's automotive metaphor is most apt. "We must give the Justice Department the proper tool if we expect Federal prosecutors to do a proper job," he explains. H.R. 1255 would be such a tool. By contrast, the Hobbs Act is rife with quirky imperfections—to the extent that the Justice Department is leery about invoking it.

The answer to the question-in-the-headline, then is, "no." A new law that pointedly makes drug-related violence against pharmacies and other DEA registrants a Federal crime is both desirable and necessary. It would not make the situation "worse."

How much worse could matters get, anyway? Reports pouring in to American Druggist show no abatement in crimes against pharmacies; if anything, they are more numerous and more vicious.

The cries of pharmacists are voices in the wilderness. Few outside the profession appreciate the trauma of being exposed to the daily possibility of murder at the hands of drug-hungry criminals.

Even those officials who are sympathetic do not seem to grasp the singularity of the pharmacist's plight. James Knapp, deputy assistant attorney general in the Justice Department's criminal division, for example, sees no difference between an assault on a drug store and an assault on a grocery. Most pharmacy robberies, he said, "are indistinguishable from those of liquor stores, convenience food outlets, or service stations . . ."

He misses the point. Only the pharmacist has been entrusted with the burden of dispensing controlled substances. Only the pharmacist has become the target of a singularly malevolent breed of specialized criminal. Logic and equity dictate that the pharmacist be protected by the same government that singled him (her) out for unique responsibilities.

U.S. authorities are quick to prosecute community pharmacists for infractions of regulations involving controlled substances, but do not take similar punitive action against any other type of retailer—or against criminals who hold up drug stores. The situation smacks strongly of nonjustice, if not injustice.

Rep. Hyde sees the situation with exceptional clarity. In a letter to Mr. Hughes, he says, in part: "Pharmacists do not desire merely to display printed cardboard signs in their stores (stating the pharmacy is protected by the Hobbs Act). Cardboard offers little protection from flying bullets. Neither do they want a few 'show' Federal prosecutions.

"They do not expect Federal authorities to investigate and prosecute every controlled substances robbery. As taxpayers, pharamacists recognize the need for efficient use of Federal resources.

"What pharmacists do want is some consideration by the national government. . . . They recognize that Federal resources are finite and that Federal jurisdiction is not a panacea to their problem. They do believe, however, that . . . our FBI and DEA agents are, on the whole, better trained and equipped to deal with some of these difficult cases.

"Pharmacists believe that some criminals share this view and will be deterred by the prospect of Federal prosecution, even if the number of such prosecutions is limited . . .

"In short, pharmacists believe that Federal investigation and prosecution of controlled substances robberies is appropriate, particularly in those cases where there are complexities that require the sophisticated resources available in the Department of Justice. . .

"In the last Congress, 187 of our colleagues co-sponsored my bill. After only three months more than one hundred of our colleagues in this Congress who have cosponsored H.R. 1255 believe that Federal controlled substances robbery legislation will help protect those who manufacture and dispense such substances. The Justice Department agrees.

"How can we refuse even to consider this legislation in committee and on the floor of the House, in view of a very clear need, and such strong support?"

Well said, Mr. Hyde!●

RADIO MARTI

● Mr. PRYOR. Mr. President, I can sympathize with the concerns of the supporters of Radio Marti and share their dismay that the Cuban Government has so successfully kept from its people basic information about what is happening not only around the world but in Cuba itself.

I do not believe, however, that Radio Marti is the answer.

The Voice of America, it seems to me, can fill the role meant for Radio Marti. The administration may want to increase broadcast hours of VOA, raise the strength of its signals into Cuba, or adjust the content of its programing somewhat to meet our objectives toward the Cubans, but I think we should take advantage of the recognized success and credibility of VOA rather than creating what could be a very troublesome issue in the Caribbean.

I am also convinced that the Cuban Government has the means and the will to interfere with American broadcasts if we estabish Radio Marti. We have already had a taste of the power of Cuba's "megastation," which reaches all the way to Salt Lake City. Many Arkansas broadcasters have spoken to me about this matter, and it appears that several stations in my State would be affected by Cuban jamming.

For these reasons I will vote against the bill to establish Radio Marti as reported by committee and urge my colleagues to do the same.●

NATIONAL NURSING HOME EMPLOYEES WEEK AUGUST 21-27

● Mr. PRYOR. Mr. President, there are few issues in this country today that are as important to us as providing services and care for our elderly. And no aspect of this care is more important than in nursing homes.

If any of you have worked in a nursing home, as I have, even for 1 day, you would be able to appreciate the problems the staff faces and the remarkable degree of dedication to the job that makes it possible for them to stay in the work.

National Nursing Home Employees Week is August 21-27, and I think it is fitting that we say thank you to the many excellent nursing home employees nationwide during this week. There are 700,000 employees who provide long-term care for 1.4 million Americans. They certainly deserve our recognition.

By 1990 projections show that we will need 300,000 additional nursing home beds. To provide the care for these beds, this means we will need 21 percent more employees; 15,000 additional persons in administration, physician services, and therapy; 14,000 nurses; 18,000 licensed practical nurses; and 90,000 nurses aides.

We are becoming an aging society, and the quality of our employees largely will determine the quality of life for our elderly who need long-term care. For the first time in the history of the United States, there are more people over 65—11.7 percent—than teenagers—11.3 percent. In fact, the number of elderly are growing twice as fast as the rest of the population—by the year 2020, those over 65 will outnumber teenagers 2 to 1.

National Nursing Employees Week is an appropriate reminder of the important contributions employees provide to society.●

MARXIST REVOLUTIONARY TERRORISM IN EL SALVADOR: OVER 20,000 VICTIMS

● Mr. SYMMS. Mr. President, the research done for my remarks was made

available to me by the Council for Inter-American Security. I thank them for their help in preparing my remarks.

MARXIST TERRORISM IN EL SALVADOR: OVER 20,000 VICTIMS

SUMMARY

Mr. President, the foreign press has long been an excellent source of objective data on terrorism and human rights abuses by the Marxist-Leninist revolutionary guerrillas in El Salvador. Foreign reports of guerrilla atrocities have not been systematically analyzed by the U.S. executive branch, however, and have been largely ignored by the U.S. media.

But foreign press reports available from the U.S. Government's Foreign Broadcast Information Service (FBIS) show that from October 1979 to June 1983, over 21,900 citizens of El Salvador were killed, wounded, kidnaped, or held hostage by Communist terrorists. Moreover, during the same period there were over 1,500 acts of violence against civilian property in El Salvador by the revolutionary terrorists.

The methodology used to derive these statistics is straightforward. The foreign press reports of Marxist terror were merely tabulated over time, with duplicative reports excluded. Many of the reports came from Marxist media sources themselves.

The following brief new study raises an important question: why have the executive branch and the U.S. media ignored for so long the obvious evidence of Marxist terrorism in El Salvador?

INTRODUCTION

Mr. President, it has become an accepted "public fact" that the democratically elected Government of El Salvador is responsible for most of the death and destruction that has occurred in that country since 1979. During the House of Representative's late July 1983 debate on the Boland-Zablocki bill, for example, one Congressman said:

> In El Salvador, the abuse of human rights is legend. Killing and torture are the pattern and practice of the "security forces." The military in El Salvador is a clear and present danger to human life and constitutes the major impediment to much needed economic and social reform.

But the facts are quite different, and it is my intent to make these facts available to the American public.

When the reform-minded military leaders of El Salvador staged a successful coup on October 15, 1979, they made a series of promises to the people of El Salvador not unlike the promises the Sandinistas in neighboring Nicaragua made when they had come to power 4 months earlier—respect for human rights, free elections, economic and social pluralism. Unlike the Sandinistas in Nicaragua, however, the junta in El Salvador has kept their stated public promises to the citizens of their country. Economic and constitutional reform have proceeded in El Salvador. Parties and politics flourish, there is a free press, free universities, and free trade unions in El Salvador. Moreover, free elections were held in March 1982 in which over 80 percent of the Salvadoran population participated and were judged by hundreds of international observers to have been fair elections. Democracy, though fragile, has taken root in El Salvador. This is a stark contrast to the Marxist-totalitarian regime taking root in Sandinista Nicaragua, which has denied all elections.

Mr. President, it has not been easy. The response of the Communist terrorists in El Salvador to these reforms has been to conduct a campaign of armed insurrection and terrorism against the people and property of El Salvador. As Lenin said, the purpose of terrorism is to terrorize. The deliberate use of terrorism as a tactic of destabilization is a consistent aspect of so-called wars of liberation. Terrorism is employed to produce repression by the government under attack, to intimidate the population, and to produce anger at the inability of the government to provide order and security, thus weakening its authority and legitimacy, and creating a revolutionary situation.

The assumption that the Government of El Salvador is responsible for the death and destruction in that country cannot continue to go unchallenged. The data presented here represents a description of Communist terrorist activities in El Salvador from October 1979 through June 1983. It is not a complete record, because there may be some gaps in the coverage. The daily reports contained in the Latin American edition of the Foreign Broadcast Information Service (FBIS) do provide, however, an accurate account of the violence perpetrated by the Communist guerrillas in El Salvador. These FBIS reports reveal the shocking results of serious and repeated terrorist activities seldom given adequate, if any, coverage in the United States and the Western press. FBIS contains reports from a wide variety of sources, including radio reports from various stations ranging from Radio Cadena in San Jose, Costa Rica, to Radio Venceremos—the guerrilla station started in early 1981—Radio Sandino, Radio Havana, various Central American newspapers, and Central American wire services such as Latin Reuters and ACCAN-EFE.

It is virtually impossible to precisely quantify terrorism. How can one measure fear, how can one measure disorientation, intimidation, grief, and anguish? Exact statistics, even if available, would not measure these consequences. But if terrorism cannot be precisely quantified, it can be described using numbers as an approximation of the reality of terrorism.

The Communist guerrillas in El Salvador have killed, kidnaped, intimidated, bombed, burned, sabotaged, forcibly occupied churches, schools, hospitals, radio stations, attacked embassies, buses, villages, homes, cars, streets, and citizens causing widespread death, destruction, terror, and refugees.

ILLUSTRATIVE PRESS REPORTS

The following are some illustrative narrative descriptions of terror culled from FBIS. The attacks by the Communist guerrillas on innocent citizens, trying to pursue their lives in normal ways—driving in a car, broadcasters in radio stations, government workers at their jobs, people praying in church, people sitting in their living rooms plunged into darkness without electricity, peasants harvesting—the very people the guerrillas claim they desire to liberate—give evidence of the systematic, deliberate, and uninhibited use of violence against the innocent.

On January 4, 1980, it was reported by Paris AFP radio service that:

> Members of the clandestine Farabundo Marti Popular Liberation Forces (FPL) today seized five local radio stations. The FPL occupied the radio stations to broadcast to the nation what they termed a revolutionary New Year message, in which they made an appeal for national insurrection. . . . The radio stations seized were Radio Senorial, Radio Cadena Central, Circuito, Radio Sonora and Radio 1080.

El Diario de Hoy reported on March 20, 1980:

> Several automobiles were burned yesterday when subversive groups armed with submachineguns and pistols stopped cars at traffic lights and hurled Molotov cocktails at them. Similar actions against innocent drivers were reported in other sectors of the capital.

On January 13, 1980, Buenos Aires Latin reported:

> Some 20 members of the subversive organization, the People's Revolutionary Bloc (BPR), seized the metropolitan cathedral this morning while San Salvador Archbishop Oscar Arnulfo Romero was about to finish his homily, a church spokesman said. The prelate had criticized kidnapings and the taking of hostages, specifically mentioning the occupation of the Panamanian Embassy, the kidnaping of South African Ambassador Archibald Gardner Dunn and the capture of a national guardsman in Arcatao, 130 km north of here. Archbishop Romero asked for mercy for the hostages during the homily. He told the BRP group that, if they truly represent the people, they should not torment people who have no responsibility whatsoever for the events taking place in this convulsed country.

On April 16, 1980, Panama City ACAN radio service reported:

> Six persons died Monday in Soyapango, 6 km east of San Salvador, when the town was "taken" by a guerrilla commando group. That morning a large number of guerrillas of the Armed Forces of National Resistance (FARN) arrived on the scene, and an armed

clash ensued. Four civilians were killed in the 90 minute clash. None of these four victims had any relationship with the guerrilla group, and it is believed that they were caught in the crossfire.

According to FBIS reports, the mayor of San Salvador on April 15, 1980 stated:

The destruction of small businesses, factories, banking and financial institutions, ambulances, state agricultural equipment, mass transit and private automobiles by bombs, arson, and looting is reducing the capability for providing public services and leads to mass unemployment which generates poverty, Julio Adolfo Rey Presndes, Mayor of San Salvador, told newsmen yesterday.

Radio Cadena's report of August 7, 1980:

Spokesman of Berlin municipality in Usulutan Department told this station today that some 1,000 people who have fled the violence in nearby cantons are in Berlin. The municipal spokesman said that most of the refugees are women and children from the cantons of Corozal, Corozalito, La Union and (Las Cielitas). . . . It has also been reported that in San Augustin, Usulutan Department, there are some 1,500 refugees who have fled from the political violence in the rural areas.

Over 3,500 people—working at the Salvadoran Education Ministry, the Spanish Embassy, the National Commercial School, the General Francisco Mendez National Institute, the Panamanian Embassy, the Agriculture and Livestock Development Bank, the National Waterworks and Sewers Administration, the Labor and Social Welfare Ministry, the Salvadoran Foreign Trade Institute, the Office of the Teachers Welfare Board, the Jose Simeon Canas Central American University, the Central Market Administrative Office, all of which were forcibly occupied—were held hostage in the month of February 1980, alone.

In February 1981, a report from El Mundo state:

Another general power outage in the east was caused by another dynamite attack at 0275. In this way, San Miguel returned to its situation of the previous days and nights . . . It was also said that it had been known that the area affected is larger than the previous one, since it includes a part of Usulutan, Morazan and La Union Departments. For the time being, it was said the San Miguel, which was just beginning to recover from a recent outage, has returned to a disastrous situation and the citizens fear that the situation might be worse this time.

Over 25 separate bombings of highway machinery, restaurants, stores, private homes, banks, high tension wire, supermarkets and branch banks were reported in September 1981 alone.

October 8, 1980 reports from San Jose Radio Noticias stated:

A new state of the liberation struggle waged by the revolutionary organizations against the Salvadoran regime has begun. Some 300 guerrillas made the first reported appropriations of stable grains and export products. In La Haciendita, in the northern part of the country, revolutionary columns carrying automatic weapons and dressed in olive drab seized a significant amount of corn yesterday. They urged us to help them load the cereals and then left, a peasant said. A young women who arrived with the guerrillas emphasized that the people need the food to continue the war.

As Aleksandr Solzhenitsyn has so directly pointed out:

Let us not forget that violence does not and cannot exist by itself; it is invariably intertwined with the lie. They are linked in the most intimate, most organic and most profound fashion; violence cannot conceal itself behind anything except lies, and lies have nothing to maintain them except violence. Anyone who has once proclaimed violence as his method, must inexorably choose the lie as has principle.

The violence and the lies regarding El Salvador must be exposed, challenged, and understood for what they are. El Salvador is a country that is under attack by externally supported terrorists whose goal is to gain power in order to implement a totalitarian dictatorship over the people of that country. This report is a description of the means—the use of terror—they are employing to achieve that goal.

(See Annex B for 1983 press reports.)

THE BATTLE FOR THE MEDIA

In the fall of 1981, Nicaraguan Sandinista and Salvadoran Marxist guerrilla leaders were quoted in a U.S. newspaper as saying that the Marxist revolutionary war for Central America would be fought and won in the U.S. press.

The world renowned Soviet dissident, Dr. Andrei Sakharov, stated in the current issue of Foreign Affairs:

Here one must take into account that, in the countries of the West, *pro-Soviet propaganda* has been conducted for quite a long time and is very goal-oriented and clever, and that *pro-Soviet elements have penetrated many key positions, particularly in the mass media.* (Italic added.)

This is a very interesting statement from a Soviet dissident widely respected throughout the world.

These two statements, together with what role we know that the U.S. press played in our loss of the Vietnam war, indicate clearly the national security problem America faces today. The Soviets seem to be trying, through their apparent attempts at manipulation of the U.S. press, to inhibit U.S. political leaders from even describing the nature of the revolutionary problem in Central America, let alone outline an effective solution. The war in Central America is being fought here and now in the battle for American public opinion. Unfortunately, Senators who dare to present the objective facts on Marxist terrorism in El Salvador do so in defiance of the U.S. media's apparent bias, and at their own political risk. Suppression of objective free debate on Central America is even more insidious than revolutionary Marxist terror striving for political power out of a gun barrel.

Marxist orientation of Sandinista revolutionaries. The guerrillas in El Salvador are receiving direct support from the Sandinista revolutionary regime in Nicaragua. There is explicit testimony that the Sandinistas are Marxist-Leninists. Comandante Humberto Ortega, Minister of Defense in a speech on August 25, 1981, stated the following to the Sandinista military:

. . . Marxism-Leninism is the scientific doctrine which guides our revolution, the instrument of analysis of our vanguard to understand the historical process and to create the revolution; Sandinismo is the concrete expression of the historical development of the struggle in Nicaragua. Without Sandinismo we cannot be Marxist-Leninists and Sandinismo without Marxism-Leninism cannot be revolutionary, and because of that they are indisoluably united and be-

cause of that our moral strength is Sandinismo, our political strength is Sandinismo and our doctrine is that of Marxism-Leninism.

Thus there is direct evidence that the Sandinistas are Marxist, beyond the clear material support they receive from the Cubans and the Soviets. The Salvadoran guerrillas, who are at the end of the Kremlin's pipeline, are also Marxists.

The Sandinista National Anthem has the following third verse:

"los yanquis,
los enemigos de la humanidad"

"the yankees,
the enemies of mankind"

This evidence shows that the revolutionary guerrillas of Central America are also anti-U.S.A.

TORRES: MARXIST-LENINIST PRINCIPLES GUIDE FSLN

PA231550 Managua Domestic Service in Spanish 1200 GMT 23 Apr 82.

[Text] The 112th birthday of Vladimir Ilich Lenin was commemorated at the Jose Benito Escobar workers federation last night.

The event was headed by Brigade Commander Hugo Torres, member of the General Staff of the Sandinist Peoples Army; Soviet Ambassador German Shlyapnikov; Socorro Galan, president of the Nicaraguan Association of Friends of the Socialist Countries; and the members of the Executive Committee of the Nicaraguan Labor Coordination Organization, as well as delegates from the diplomatic corps of the socialist countries accredited to our country.

In greeting the birth of the leader of the working class, Galan stressed the importance of integrating the peoples to the efforts for peace, friendship and solidarity as set by Lenin's fruitful life.

In his speech, Shlyapnikov referred to the giant boost that the October Revolution, led by Lenin, gave to the peoples of the world. He said that the winds of the revolutions and the Leninist ideas continue to blow the sails of social progress and the hopes of humankind are based on them.

In the final part of his speech, the Soviet ambassador emphasized that his government, faithful to the Leninist postulates for peaceful coexistence, recently proposed a summit between Ronald Reagan and Leonid Brezhnev. This meeting, he added, could be held in Switzerland or Finland this year to discuss the problems of disarmament but this proposal has not received an answer from the White House yet.

Meanwhile Torres said: The principles of Marxism-Leninism, wisely applied to the reality of our society, guided the revolutionary actions of the FSLN, the Nicaraguan people's vanguard, to the victory over the dictatorship. Through Lenin, Torre continued, we learned of a different world as explained by Carlos Fonseca and German Pomares. Lenin said that the people needed a vanguard in order to succeed and the Nicaraguan people succeeded because they had the FSLN which knew how to interpret the people's will and their best aspirations and how to study the relationship between the oppressors and the oppressed, he noted.

Torres stressed that the Nicaraguan vanguard, through Sandino and Fonesca, knew how to apply the principles of the international revolution by adjusting them, in a creative manner, with the country's reality. He also emphasized that the existence of the Soviet Union and the socialist sphere have prevented imperialism from unleashing all its aggressive potential in the world.

He concluded by saying that it is not possible to talk about the defense of the revolution if it is not carried out through the joint action of workers, students and peasants as prescribed in the Leninist doctrine.

TIRADO LOPEZ ON ROLE OF MARXISM IN FSLN STRATEGY

PA270308 Managua Radio Sandino in Spanish 1830 GMT Feb 83.

[Text] Commander of the Revolution Victor Tirado inaugurated a Marxist economy course at the Nicaraguan Public Administration Institute, INAP, in homage to the 100th anniversary of the death of Karl Marx, founder of scientific socialism. At the ceremony, Tirado said that our history and the Somozist dictatorship line made us believe that armed struggle was the center of an unquestionable way of struggle recommended by Marxism.

Commander Tirado, who is also coordinator of the committee for activities to commemorate the 100th anniversary of Marx's death, added that in the process of creating the FSLN our brilliant leader Carlos Fonseca taught us to examine the country's economic structure and to learn about the people's idiosyncrasies, psychology and feelings in order to arrive at solutions based on real facts, which is applying Marxism to our reality. This is why the FSLN outlined a government plan and prepared itself for a predominant role in government, he said. Not only is it necessary to know how to achieve power, but also to know what will be done afterwards; this, too, is applying Marxism to Nicaragua's reality, he added.

Here is part of Commander Tirado Lopez' INAP speech: [Begin recording] (?Inspired) by Marx, the FSLN outlined its strategy and program tactics, The first thing that this eminent thinker took into consideration was the idea that in order to work out a revolutionary plan, it is necessary to start from the roots, from our most advanced and [word indistinct] traditions. This is what Lenin, Fidel Castro and all the revolutionary men of our time, as Carlos Fonseca, have done. One of Fonseca's greatest merits was that he managed to consolidate the country's revolutionary ideas [words indistinct]. Because, in order to perfect a revolutionary strategy, it was first necessary to determine what had become of our country, its conditions at the time and its future possibilities. Fonseca discovered our country's situation at the time and what could be done in the future. He studied Nicaragua's reality and first decided where to center the efforts aimed at overthrowing the tyranny, getting rid of Yankee imperialism's domain over our country and establishing a new government. As we all know, the efforts centered on the armed struggle, as this was the conclusion of the Marxist analysis: To center on the struggle of Sandino's teachings, which Fonseca picked up and consolidated with [words indistinct]. [end recording]

ANNEX B: FURTHER PRESS REPORTS OF TERRORIST VIOLENCE IN 1983

COFFEE FACILITY SABOTAGED

PA111502 (Clandestine) Radio Venceremos in Spanish to El Salvador 0230 GMT 11 May 83.

[Text] Our army is mobilizing throughout the country. It continues to increase the number of zones and towns under its control. More people are now joining our ranks and there is no objective that we decide to seize that we cannot seize.

On Monday, 9 May, our forces made an incursion into Chinameca, in San Miguel Department, where they gained control over the northern sector near the road which, from this position, leads into Nueva Guadalupe. A harsh blow was dealt to the obligarchy's war economy with this action, by keeping the dictatorship from turning a good many dollars into weapons and ammunition to be used against our people.

During this action, we sabotaged the important Montealegre coffee processing plant, owned by the oligarchic (Libes) family. In this processing plant, we destroyed six vehicles, the coffee-processing machinery, the maintenance shop, and the offices. The gasoline station and over 20,000 quintals of coffee were burned down. We also recovered several weapons, including several 44-Magnum rifles.

In Chinameca we also sabotaged three electrical transformers located in the central part of town. We thus reaffirm Vides Casanova's incapacity. His troops never showed up to carry through the braggart defense minister's challenge. Many may be missing General Garcia who, compared with useless Vides Casanova, was not as incapable as he seemed.

RIGHTIST DEPUTY ATTACKED

PA101746 Havana International Service in Spanish 0000 GMT 10 Jan 83.

[Text] Salvadoran Col Jorge Alberto Jarquin is in serious condition after several armed men intercepted him last night in San Salvador and threw a grenade at the car in which he was riding. Jarquin, a deputy of the extreme rightist Nationalist Republican Alliance, was riding in the car with two bodyguards, who were also seriously wounded.

HAVANA REPORTS ON SITUATION WITHIN COUNTRY

REGIME BOMBINGS, FMLN ACTIONS

PA310009 Havana International Service in Spanish 1800 GMT 30 Dec 82.

[Text] Air Force planes and artillery of the Salvadoran regime army indiscriminately bombed Los Laureles and Las Colinas in San Vicente Department, where, according to an official report, guerrilla forces have been regrouping. Press dispatches state that the bombing is so intense that it can be heard in the department's capital and in neighboring municipalities.

Radio Venceremos, the official voice of the FMLN said guerrilla commandos again occupied Nueva Esparta, La Union, where they held a meeting with the townspeople and distributed propaganda before leaving. Nueva Esparta is one of the five towns that were under guerrilla control at the end of November during the Heroes and Martyrs of October campaign.

Radio Venceremos also revealed the names of nine prisoners of war that the FMLN captured on 22 December along the northern main road in Chalatenango Department. The rebel station asked relatives of the pow's to immediately get in touch with the International Red Cross, as they fear the government could take reprisals.

BOMB EXPLOSIONS IN CAPITAL

PA020323 Havana International Service in Spanish 0000 GMT 2 Jan 83.

[Text] Central American radio stations have reported that on Friday night FMLN combatants exploded three bombs in San Salvador, leaving one third of the capital without electricity.

Two of the bombs destroyed several electric posts, and a third bomb damaged a telephone exchange box. One person was injured as a result of the explosions.

The army has established strict vigilance at strategic points in the city. In addition, it was learned that troops from garrisons in eastern El Salvador are gathering to begin a counterinsurgency operation in La Paz, San Vicente and Usulutan Departments in the next few hours.

In an interview granted to Radio Farabundo Marti, Cayetano Carpio, member of the FMLN general command, said that the positive results of FMLN actions during 1982 allow the beginning of the decisive stages for the strategic annihilation of the enemy.

SUPPORT WEAPONS BATTALION DESCRIBED

PA191906 (Clandestine) Radio Venceremos in Spanish to El Salvador 0230 GMT 19 May 83.

[Excerpts] The support weapons battalion that downed the U.S-made A-37 plane has been organized step by step. from victory to victory, until it has become a specialized unit that effectively accompanies the columns and battalions of the Commander Rafael Arce Zablah Brigade.

The creation of the Amilcar Hernandez Support Weapons Battalion dates back to 1980, when the people's force fighting the dictatorship was beginning to launch those heroic and bold attacks on the enemy's headquarters. It was in January 1980, during a heroic attack on the national guard's central headquarters, that the first artillery piece appeared, built through the revolutionary forces' creativity. It caused the first enemy casualties, as well as significant damages to the national headquarters. We have been improving our weapons ever since.

In November 1982, the Amilcar Hernandez, alias Commander Adan, Support Weapons Battalion reached its maximum power, when our military forces seized from the troops in Gotera two .50-cal machineguns and two 120-mm mortars. Now we have support weapons of all kinds. We can open any type of fire on any target. Now we can satisfy the desire of the dictatorship's troops; all they have to do is approach our positions to receive any fire they may want. We have stopped enemy advances, disorganizing their ranks, making them disperse, inflicting numerous casualties.

Now the Amilcar Hernandez, alias Commander Adan, Support Weapons Battalion, which has become a powerful and effective support force, is getting ready to deal new blows to the enemy and to obtain new victories for the people.

ARMY, EXTREMISTS CLASH; BLACKOUT REPORTED

PA201357 San Salvador El Mundo in Spanish 18 May 83 p 3.

[Excerpt] San Miguel, 18 May—For 1 and ½ hours, during a storm and in the dark of night, members of the 3d Brigade fought a large number of extremists in Hacienda Monte Grande. According to the reports, the fighting began at 2200, 2 km from this place on the Pan-American Highway. No reports have been released on the number of casualties suffered during the long clash, which ended at 2330.

The terrorists also blew up three high voltage towers near the Cuscatlan Bridge. This caused a blackout that will probably continue, unfortunately, because three other big blasts were heard last night in the area between Mercedes Umana and Villa El Triunfo.

COPREFA REPORTS REBEL ATTACK ON TENANCINGO

PA220344 San Salvador El Diario De Hoy in Spanish 21 May 83 pp 4, 15.

[Text] A group of terrorists dressed in uniforms similar to those used by army soldiers invaded Tenancingo 2 nights ago and robbed the citizens. The Armed Forces Press Committee [Coprefa] reported that the guerrillas entered town at 2100 and sacked local stores. They took food, money and household items.

The terrorists led the people to believe that they were soldiers, but military sources said that soldiers never carry out actions against the people and that their discipline is very strict. In addition, Coprefa added that a group of guerrillas machinegunned a Red Cross vehicle when it was traveling through a place known as a La Pedrera in Usulutan.

The same terrorists harassed Jiquilisco for several hours, but this attack was repelled by armed forces troops who forced them to flee. No army casualties were reported. It was reported from San Francisco Gotera that two terrorists surrendered to the authorities with their rifles, seeking the protection of the amnesty law issued recently.

Many terrorists are turning themselves in to the authorities in various parts of the country. According to Coprefa, the guerrillas have said that they are tired of wandering aimlessly in the mountains, going hungry, and enduring humiliations from their foreign commanders.

EAST-WEST ECONOMIC RELATIONS

● Mr. GARN. Mr. President, two recent articles concerning the issue of East-West economic relations have been brought to my attention, and I would like to share them with my colleagues.

First Mr. Elliott Hurwitz, a Special Assistant to the Undersecretary of State for Economic Affairs, has reviewed the historical record with respect to the Soviets' use of economic measures to bring pressure upon governments whose policies they find objectionable or threatening. As Mr. Hurwitz notes in his article, "Soviets Use Sanctions With Great Effect,"

Although they have recently cultivated an image among their Western trading partners as a "reliable supplier," the Soviets have used economic measures in six major attempts (as well as several lesser efforts) since World War II to compel changes in the policies or actions of other nations.

The implications for increased Western European dependence on Soviet energy supplies as a consequence of the Siberian natural gas pipeline should be clear.

Jack Anderson, in his article, "Moscow: The New Pharaohs," points out the link between the misguided technology transfer policies of the West and the Soviet abuse of human rights. Anderson writes that:

Soviet repression is currently being perpetuated by the West's enthusiastic export of high technology to the Soviet Union. This allows the Kremlin planners to forge ahead with their grandiose industrial and public works projects, which increase the need for more slave workers in the face of the nation's chronic labor shortage.

Again, the Siberian pipeline project has a bearing on this issue, and I commend the efforts of my colleague from Colorado, Senator ARMSTRONG, for his efforts to bring this to the attention of the public.

Mr. President, upon our return from the upcoming recess, we will be considering the reauthorization of the Export Administration Act. The issues raised in the articles I am submitting for the RECORD should be kept in mind as we endeavor to address this legislation and move to stem the flow of technology to the Soviet Union and its allies. I ask that the articles by Messrs. Hurwitz and Anderson be printed in the RECORD.

The articles follow:

MOSCOW: THE NEW PHARAOHS

(By Jack Anderson)

The world press follows a double standard in reporting on Soviet and U.S. embarrassments. Any misstep by the U.S. government, however trivial, attracts the withering glare of the media's spotlight. Yet the Soviets are allowed to operate in the shadows, safe from embarrassing publicity.

From time to time, therefore, I have tried to illuminate events on the dark side of the planet. Today, I want to focus on what should be the Kremlin's greatest humiliation: its hopeless dependence on slave labor to keep its economy from collapsing.

The whole Soviet system would be crushed under the weight of its ideological and bureaucratic baggage if it weren't for the enforced labor of millions of criminals and political prisoners in the work camps of the Gulag Archipelago.

Unfortunately, the West, through a combination of greed and naivete, has been encouraging the ghastly slave-labor system for decades—by providing the markets and technology that keep the unworkable Soviet system afloat.

Soviet repression is currently being perpetuated by the West's enthusiastic export of high technology to the Soviet Union. This allows the Kremlin planners to forge ahead with their grandiose industrial and public works projects, which increase the need for more slave workers in the face of the nation's chronic labor shortage.

The sale of high-tech items for the natural gas pipeline from Siberia to Western Europe is compounded folly. When the pipeline is completed, it will earn billions in badly needed hard currency, thus permitting the Soviets to pay for their huge military machine and their foreign adventures.

It is a cruel irony that many of the Soviet Union's 4 million slave laborers are reportedly at work on the very pipeline project that will forge their chains even tighter.

My associates, Dale Van Atta and Michael Binstein have investigated the Soviets' ex-

ploitation of slave labor. Over a period of several months, they have interviewed numerous U.S. officials and other experts on the subjects. They were given access to secret U.S. intelligence reports.

Their conclusion was grim: the use of forced labor in the Soviet Union will accelerate in the next five or six years.

As Alexander Solzhenitsyn chronicled it so memorably, the forced labor system reached its peak under Stalin. Millions of Soviet citizens were shipped off to prison camps in Siberia and arctic Russia, where they were literally worked to death.

After a decline immediately following Stalin's death, the number of prisoners began inching up again in Nikita Khrushchev's waning days. The threat of labor camp sentences was chiefly political, a club to keep dissidents under control. But in recent years Soviet administrators have come to realize that slave labor is now a necessity. Consider these vignettes compiled by the International Society for Human Rights from interviews with Russian exiles:

Work quotas at a labor camp for women near the town of Kungur were eight times higher than in non-prison Soviet factories, according to Julia Vosnessenskaya, a 42-year-old poet who drew a two-year sentence for joining an independent writers' group. The camp, located near the pipeline route, housed more than 2,000 women in space built for 800.

She spent 12 hours a day sewing clothes for pipeline workers. "The women consider it a great misfortune to be situated near a 'Great Economic Project,'" she said, "for in Russia things are built the way the pyramids were—not so much with knowledge and technology, but with the use of hordes of slaves."

On-the-job safety at the camps is minimal or nonexistent, according to several exiles. Machinery fails, fingers are severed, workers are blinded by drills and polishing machines that lack protective screens.

Peter Bergman, 62, was sentenced in the late 1970s for trying to emigrate to Israel. He was taken in handcuffs by helicopter to a camp at Tymen, also on the pipeline route. He learned that defying camp regulations or even failing to meet the production quota brought beatings, hunger rations and solitary confinement.

Despite myriad firsthand accounts, West European governments, eager to get Siberian natural gas, have demanded proof that slave laborers are working on the pipeline. In fact, the CIA and State Department have indisputable evidence that 90 to 100 prison camps are close to the pipeline route. Logically, they must be supplying at least some services or direct labor for the project.

SOVIETS USE SANCTIONS WITH GREAT EFFECT

(By Elliott Hurwitz)

The North Atlantic Treaty Organization foreign ministers met recently in Paris to discuss issues of common concern, and one area of discussion was the security implications of East-West economic relations. Part of the reason for their interest was a concern that a possible increase in Western dependence on trade with the Soviet Union may create vulnerabilities that could permit the Soviets to exert economic pressure in order to achieve political goals.

It might be useful to examine past instances in which the Soviets have used economic measures in an attempt to gain political advantages from other nations.

Although they have recently cultivated an image among their Western trading partners as a "reliable supplier," the Soviets have used economic measures in six major attempts (as well as several lesser efforts) since World War II to compel changes in the policies or actions of other nations. For the most part they have used economic weapons in instances in which the target nations were highly dependent on the Soviet Union for their economic and industrial development. Indeed, four of the six major episodes were directed against fraternal communist allies:

In 1948, in response to Yugoslavia's establishment as an independent communist state, the Soviets and their Eastern European allies recalled their technical experts, canceled a loan commitment and then severed all trade and economic assistance. At the time, Yugoslavia was dependent on the Soviet Union and its allies for more than half its trade, and was completely dependent for technical assistance and credits.

In 1958 Yugoslavia was once again the victim of Soviet economic sanctions when Yugoslav insistence on taking an independent view of various international issues (including the 1956 Hungarian uprising) caused Moscow to effect an across-the-board reduction of trade.

In 1958, when a Soviet diplomat in Australia defected, his wife attempted to do the same but became involved in an airport scuffle with Soviet security men and Australian police. When the woman decided to seek asylum along with her husband, the Soviets broke diplomatic relations with Australia and terminated all purchases of Australian wool, reducing trade between the two countries by more than 95 percent.

In 1958, when one party in Finland's Parliament changed its position to a less pro-Soviet line, the Soviets canceled existing trade contracts, withdrew their ambassador and held up promised discussions of Soviet aid.

In 1960 ideological differences with China induced the Soviets to withdraw their technical experts, on whom the Chinese were significantly dependent, and reduce trade between the two neighboring nations by more than 75 percent.

The Soviet Union's most blatant use of economic weapons was against Albania in 1960. The Albanians had supported the Chinese at a conference of communist states, and in retaliation the Soviets delayed trade negotiations and cut back on loans and technical assistance. When the Albanians had the temerity to accept an industrial-development loan from China in 1961, the Soviets broke diplomatic relations, canceled all aid and severed all trade. These actions were of no small importance to the Albanians, since about half their total trade and most of their loans and technical assistance came from the Soviets.

More recently the Soviets have used economic pressures and threats of a lesser magnitude than those just cited:

In 1967, to deal with what they viewed as objectionable Cuban policies, the Soviets reduced their supply of fuel to Cuba until the following year, when Havana relented and brought its foreign policy closer into line with Moscow.

In 1981 the Soviets threatened Poland with a cutoff in supplies of oil and other raw materials unless the Solidarity movement was halted.

Late last year an Italian business delegation to Moscow was warned that Italian commercial interests would suffer if Italy did not take politically significant steps toward "economic normalization."

These instances do not decisively demonstrate that the Soviets will invariably wield economic weapons against their present or future trading partners. They do show, however, that the Soviet Union (as other nations are) quite capable of using economic measures in areas in which it has leverage and in which it sees the promise of political gain outweighing the short-term economic costs.

The Soviet Union has most often used economic sanctions, complemented by other measures, to try to reverse or counter what it has seen as objectionable policies or political positions. Soviet ideology emphasizes the political consequences of economic relations, and Moscow would view it as naive to try to divorce the two. The structure of the Soviet state—with production and foreign trade as government monopolies, and with a strong capability to impose economic costs on an uncomplaining population—has made it easier for the Soviets to use economic weapons in instances in which they have chosen to do so.

External economic relations clearly bring benefits to the Soviets, and they will certainly take these benefits into account before they use economic weapons against their trading partners. But past Soviet behavior shows that where there is a dependency they may well judge the potential political gains to be worthwhile.

Nations that place increasing reliance on Soviet supplies of energy or on Soviet purchases of manufactured goods should take into account the demonstrated Soviet willingness to use economic measures to extract political gain.●

RE: HABEAS CORPUS REFORM

● Mr. NUNN. Mr. President, on many occasions I have risen in this Chamber to address my colleagues on the need to restore a sense of finality to our criminal justice system, in part by reform of our Federal habeas corpus laws. Under those laws as they now stand, our courts have been burdened, time and again, with needless and repetitive habeas corpus petitions.

I have consistently sponsored or cosponsored reasonable legislation designed to address the need for habeas corpus reform. Specifically, during this session of Congress, I have cosponsored S. 117, the Crime Control Act of 1983, and S. 217, the Finality of Criminal Judgments Act, both of which contain many of the desired reforms. These bills would serve to streamline current habeas corpus procedure in several important ways. They would prevent Federal habeas corpus relief where: One, the issue was not raised in State court, or two, was disposed of on the merits in a collateral proceeding unless the petitioner establish prejudices and other exceptional circumstances. They provide for specific statutes of limitations on the filing of habeas corpus petitions. Finally, they assign binding authority to State court determinations of certain issues absent a showing of special circumstances by the petitioner.

I was pleased by the Senate Judiciary Committee's recent action on July

26, 1983, in favorably reporting a substitute bill for S. 217 which would reform current habeas corpus laws to limit Federal judicial interference in State criminal proceedings. It is my understanding that this legislation incorporates some of the reforms which I have previously advocated, including a statute of limitations for individuals in State custody to seek Federal habeas corpus relief. The bill also provides that a Federal court will not reopen issues if the defendant received a full and fair review of that issue in State court. Finally, the bill places rigid restrictions on the ability of a defendant to raise an issue in a Federal habeas corpus proceeding which was not previously raised in State court.

While on a recent trip to Georgia, I was again reminded of a shocking and tragic incident which occurred over 10 years ago in Donalsonville, Ga., which resulted in the brutal and senseless death of six innocent family members. This incident, and the subsequent 9½ years of legal proceedings which have followed, provide an excellent example for the need to reform Federal habeas corpus law and procedure.

During the afternoon of May 14, 1973, four individuals, three of whom had recently escaped from a Maryland prison, burglarized the Donalsonville home of Jerry Alday. While the burglary was in process, Jerry Alday and his father, Ned Alday, unsuspectedly arrived at Jerry's residence. Upon their arrival, Jerry and his father were taken into the house at gunpoint. They were then shot in the head at close range; Ned Alday was shot seven times while Jerry Alday was shot four times.

Shortly thereafter, Jerry Alday's brother, Jimmy, also arrived at the Alday residence and was killed by a handgun fired at close range. Jerry Alday's wife, Mary, was the next family member to arrive at the residence. After being robbed of $1, she was locked in the bathroom of the house due to the arrival of yet two more members of the Alday family, Jerry's uncle Aubrey and brother, Chester. Aubrey and Chester were then taken into the Alday home and slain in similar fashion.

Mary Alday was then led from the bathroom into another portion of the house and raped by at least two of the individuals while her husband, father-in-law and other members of the Alday family lay dead. She was then taken to a wooded area where she was again raped by two of the individuals, beaten when she refused to commit oral sodomy and had her breasts mutilated. She was then killed with two shots from a handgun.

Several days later, Carl Isaacs, Billy Isaacs, George Dungee, and Wayne Carl Coleman were apprehended and arrested for the slayings. Billy Isaacs confessed his role in the slayings and pled guilty while the remaining defendants pled not guilty. In January 1974, a jury found the trio guilty of the Alday slayings. Additionally, the jury found the existence of statutory aggravating circumstances and fixed punishment at death. The defendants immediately appealed their convictions and death sentences on a number of grounds, including an allegation that prejudicial pretrial publicity denied them of their right to a fair trial. In July 1976, the Georgia Supreme Court affirmed the conviction and sentence of the defendants and in November 1976, the U.S. Supreme Court denied the defendants writ of certiorari. The defendants then filed an application for a State writ of habeas corpus and received an evidentiary hearing. In August 1977, the Superior Court of Georgia denied the defendants' petition for a writ and in April 1978 the Georgia Supreme Court affirmed the judgment of the superior court. In October 1978, the U.S. Supreme Court declined to review the State's denial of the defendants application for a writ of State habeas corpus.

In May 1979, the defendants filed an application for a writ of Federal habeas corpus in Federal District Court for the Southern District of Georgia. In October 1981, over 2 years after the petition was filed, the district court denied the requested relief. In December 1981, the defendants appealed this decision to the U.S. Court of Appeals in Atlanta, Ga. Oral argument was conducted approximately 18 months later in October 1982. The court of appeals recently remanded the case back to the district court in order to develop further evidence on the issue of pretrial publicity. I point out that this issue of pretrial publicity is essentially the same issue which was raised, litigated, and decided on direct appeals in the State courts approximately 7 years ago.

It has now been approximately 9½ years since the defendants were convicted of these heinous crimes. Since that time, the Georgia Supreme Court has affirmed their conviction, the U.S. Supreme Court has refused to review their conviction, the Georgia Superior Court and the Georgia Supreme Court have both refused to grant State habeas corpus relief, the U.S. Supreme Court has refused to review this denial and the Federal District Court has refused to grant a writ of Federal habeas corpus. Yet the case goes on in degradation of the opinions of the Georgia courts.

The Alday case is a classic example of the frustrating and unnecessary delays which too often characterize our criminal justice system. This lack of finality has been generated both by abuse of habeas corpus procedures as well as our lengthy appeals processes. It is for this Congress to take steps to end this abuse and restore a sense of credibility to our criminal justice system. With the Alday case vividly in mind, I urge the Senate to quickly consider the proposals for habeas corpus reform which are now pending before us.●

THE ORIGINAL CLINCH COST SHARING PLAN: A MODEL IGNORED

● Mr. HUMPHREY. Mr. President, last December the Congress agreed in conference to ask the Department of Energy (DOE) to "vigorously explore proposals, including a reconsideration of the original cost-sharing arrangement that would reduce Federal budget requirements for the Clinch River project." DOE has settled on a plan that would simply have the Government lend money to itself through the sale of Government guaranteed bonds to spread out the spending on the Clinch River project.

What is disturbing about this plan and the study DOE has done at a cost of $1 million is that they simply ignore Congress instructions. We asked for a proposal that would increase industry's share of the project's cost and risk, we got a plan that ironically increases Government's risks and costs. I have already submitted a detailed analysis in the July 29 RECORD as to why the plan DOE has been asked to back is unsound.

At first it is difficult to understand how DOE could get behind such a plan. But, then, when you look at who DOE asked for help, the Breeder Reactor Corp. (BRC), it is not so difficult to fathom. This corporation, after all, stopped soliciting for utility contributions to the Clinch River project back in 1977, nearly 6 years ago, and is unwilling to solicit now for fear of being rejected. Under these pressures, it is not surprising that BRC came up with a plan that provides industry with Government guarantees against any risk and that asks for no further investment of industry venture capital.

For the same reason, DOE carefully avoids complete reference to Congress instructions when claiming it answered Congress request. Rather than cite the full instructions for DOE to "vigorously explore proposals, including a reconsideration of the original cost-sharing arrangement, that would reduce Federal budget requirements for the Clinch River project," DOE and BRC cite these instructions with a conveniently placed ellipsis that eliminates any reference to reconsidering the original plan.

This is no accident. There is nothing in the plan DOE is now backing that is any way remotely similar to the original cost-sharing plan, which at first had industry paying for most of the project and that was finalized in 1973

with industry paying at least 40 percent of the project's cost without it getting any equity share or ownership in the plant itself. Had the BRC or DOE reconsidered this original plan, Congress would have a plan before it today with some semblence of true cost sharing in it.

DOE and the BRC, though, were unwilling even to discuss the project's original cost sharing plan in their studies. I, therefore, asked the Congressional Research Service (CRS) to detail this plan and to describe the history of the project's private sector participation in general. The study that CRS filed, "Private Sector Participation in the CRBR Project," is quite sound.

This history correctly notes that the Clinch River breeder reactor project originally was publicly understood to be what it in fact is, a demonstration project. Thus, it was known not as the Clinch River breeder reactor project, but as the breeder demonstration program. Also, when the project was first authorized in 1970, the Federal Government treated it as a demonstration similar in character to the light water reactor demonstration effort of the 1950's. The Federal Government assumed that the private sector—the nuclear utilities and the nuclear vendors—would pay for nearly all of the project out of their pocket and Government would only help by affording its research facilities and nuclear fuel to the project.

Mr. President, before the Senate votes in September on a plan DOE claims answers Congress request for true cost sharing in the spirit of the original proposals agreed to in the early 1970's, it is essential that it know what these earlier cost-sharing agreements were. I ask that the full text of the CRS study be placed in the RECORD.

The material follows:

BRIEF HISTORY OF PRIVATE PARTICIPATION IN THE CLINCH RIVER BREEDER REACTOR PROJECT

The fiscal year 1984 Energy and Water Development Appropriation Act (Public Law 98-50) has been signed into law, without any funding for the Clinch River Breeder Reactor Project (CRBR). However, appropriations committee reports from both houses of Congress (H. Rept. 98-217 and S. Rept. 98-153) note that FY84 funding for CRBR might be provided if an arrangement that increases the amount of private financing for the project can be approved. It is likely that Congress will be asked to consider such an arrangement shortly. As an aid in the consideration of new proposals for private financing of the Clinch River Breeder Reactor Project, this report reviews the history of private financial contributions to the project and what the private sector was to get in return.

EARLY HISTORY OF THE BREEDER REACTOR DEMONSTRATION PROJECT [1]

Public Law 91-44 (The Atomic Energy Commission Authorization Act for fiscal year 1970), Section 106, authorized the Atomic Energy Commission (AEC) to participate in the Project Definition Phase of a Liquid Metal Fast Breeder Reactor (LMFBR) Demonstration Program under cooperative arrangements with reactor manufacturers and others in accordance with criteria that had been previously reviewed by the Joint Committee on Atomic Energy (JCAE). These criteria, titled "Statutory Criteria for Fourth Round Arrangements Under the Commission's Power Reactor Demonstration Program," envisaged limited AEC assistance to the private sector in building a demonstration LMFBR. The program was conceived as an extension of earlier AEC assistance programs that led to the commercialization of light water reactors.

The criteria established a two-phase program. Under the first, or Project Definition Phase, the AEC entered into a number of contracts with reactor manufacturers with the objective of determining whether sufficient bases existed for a definitive cooperative arrangement. Under the second phase of the program the AEC undertook negotiations with reactor manufacturers and utilities that eventually led to contracts to construct and operate an LMFBR demonstration plant.

The criteria listed several types of assistance that the Government was prepared to consider providing to such demonstration projects. In general, the assistance corresponded to that furnished under earlier cooperative demonstration projects. It was contemplated that the demonstration plant would be financed and owned by a utility, or group of utilities, and that governments assistance would be strictly limited as to type and amount.

In June 1970 Congress approved the fiscal year 1971 AEC Authorization Act (P.L. 91-273), which authorized the AEC to enter into a cooperative arrangement with a reactor manufacturer and others for participation in the research and development, design, construction, and operation of an LMFBR powerplant in accordance with the Statutory Criteria previously submitted to the JCAE. The AEC was authorized to provide financial assistance to the project totaling $50 million minus the costs of the Project Definition Phase; supply up to $10 million worth of fuel free of charge; and provide the project with up to $20 million in the form of services, facilities, or equipment otherwise available to the AEC under its civilian base program.

At that time the demonstration LMFBR was estimated to cost about $400 to $500 million. As negotiations between the AEC, reactor manufacturers, and utilities proceeded, it became apparent that additional Government funds above the $80 million authorized in P.L. 91-273 would be needed to gain private participation in the project.

In a June 4, 1971 message to Congress on energy, President Nixon stressed the importance of demonstrating breeder reactor technology and requested that an additional $50 million be authorized for the demonstration LMFBR. Congress went beyond that request, in the FY 1972 AEC Authorization Act (Public Law 92-84) by raising the authorization for direct assistance to the project to $100 million and removing the $20 million limit on indirect assistance provided from the base program in favor of a limit of 50 percent of the capital cost of the plant.

By 1971 the form that private participation in the project might take had become less clear. Utility ownership of the plant was still envisaged as the principle source of private funding, but other sources were now anticipated as well. According to AEC testimony before the JCAE: [2]

"The financial participation of the electric utilities is expected to be of two principle forms. An owner utility or group of utilities are expected to participate financially on a basis consistent with the value of the plant as an electric power producer over the projected useful lifetime of the plant. Although the specific basis for determining this value is yet to be worked out, this direct financial participation could be in the range of $75 to $150 million and even as high as $200 million. . . . Additionally, it is expected that the owner utilities, other utilities throughout the Nation, and others in the energy-related equipment industry, would be prepared to participate in (a) the cost of research and development, (b) first-of-a-kind costs, and (c) the financial uncertainty associated with the availability of this plant as a power producer."

During 1971, the utility industry organized a fund-raising campaign for the demonstration LMFBR with a goal of raising $250 million. At the AEC's request the Edison Electric Institute (EEI), American Public Power Association (APPA), and National Rural Electric Cooperatives Association (NRECA), surveyed member utilities as to their interest in owning and managing the demonstration LMFBR. In January 1972, the AEC accepted a proposal from Commonwealth Edison (CE) and the Tennessee Valley Authority (TVA) as the basis for negotiations of a definitive arrangement.

As these negotiations continued, it became apparent that the utility financial contribution—both of the utility industry as a whole and those of TVA and CE—were to be limited in amount, and the utility industry was not willing to underwrite any additional risk including liability. If the project was to proceed, the AEC would have to assume the open-ended risk of project cost overruns and other financial risks.

After lengthy negotiations between the JCAE, and AEC, and officials of CE and TVA, the project participants signed contracts in 1973 under which the Government agreed to accept the open-ended financial risks from the project (see below). However, neither the program authorization nor the Statutory Criteria were changed until 1975 to recognize this very basic change from the ground rules on government assistance.

ORIGINAL CONTRACTS FOR THE LMFBR DEMONSTRATION PLAN

The basic contracts for the breeder demonstration project were signed by five parties on July 25, 1973. The signatories represented the Atomic Energy Commission; the

Reprinted in U.S. Congress. Joint Committee on Atomic Energy. Modifications in the Proposed Arrangements for the Clinch River Breeder Reactor Demonstration Project. Hearings, 94th Cong., 2d Sess., Apr. 14 and 29, 1976. Washington, U.S. Govt. Print. Off., 1976. p. 58.9

[2] U.S. Congress. Joint Committee on Atomic Energy. AEC Authorizing Legislation Fiscal Year 1972. Hearings, 92nd Cong., 1st Sess., Mar. 4, 1971. Washington, U.S. Govt. Print. Off., 1971. p. 702.

Tennessee Valley Administration; Commonwealth Edison Company; the Project Management Corporation (PMC), which was established to provide overall management and coordination for the project; and the Breeder Reactor Corporation (BRC), which was organized to represent the interests of a large number of utilities that pledged to contribute funds.

The main contract was a 4-party agreement between the AEC, TVA, CE, and PMC (contract number AT(49-18)-12), which set out the responsibilities and authority of the parties to participate cooperatively in the design, construction, and operation of a demonstration LMFBR plant. PMC and BRC simultaneously signed a contract, which established how utility funds would be made available, and the AEC and BRC signed a contract (AT(49-18)-14), which defined their relations.

Project resources

Paragraph 7 of the 4-party agreement sets specific limits on the resources to be supplied to the project by the utilities (through BRC), TVA, and CE. The utilities agreed to provide approximately $250 million in ten equal yearly installments. TVA agreed to provide the site for the plant, power transmission facilities, $2 million (above contributions through BRC), and the availability of top management for project guidance. CE also agreed to provide $2 million and the availability of top management. Reactor manufacturers were not party to the agreements, but the AEC expected manufacturers to contribute about $20-40 million to the project.[3]

Additional resources to be made available to the project included, income from the sale of electricity produced during the first five years of operation, plutonium bred during that period, and any funds from the sale of the plant or part of its property. TVA agreed to purchase the electricity produced during the first five years at the highest incremental cost of generating the electricity that it otherwise would have used. At the end of the 5-year demonstration period, TVA would have the option to purchase the plant under a pricing formula specified in the 4-party agreement. The AEC agreed to accept custody and ownership of the plant upon termination of the contract; or upon its expiration, if TVA did not exercise its purchase option.

All remaining resources for the project were to be supplied by the AEC. The AEC agreed to provide funding pursuant to its authority under PL. 92-84, discussed above. Furthermore, the AEC agreed that if at any time the resources available to the project appeared to PMC to be insufficient to conduct project activities it would make a good faith effort to obtain additional legislative authorization and funds. In addition, the AEC agreed to indemnify TVA, Commonwealth Edison, and PMC against claims and liabilities of third parties arising out of project activities.

When the contracts were executed, in 1973, the cost of the plant and the first five years of operation was estimated to be $730 million. Estimated project resources as of July 1973 in millions were:[4]

Utility contributions	$254
Reactor manufacturers	20-40
AEC direct assistance	92
AEC base program	320
AEC furnished fuel	10
Revenue from electricity sale	31
Total	727-747

Possible revenue from the sale of the plant at the end of the five year demonstration period was not included in the above estimate, but as noted above the 4-party contract specified that any such revenue would be available to the project.

Utility benefits of project participation

The major benefit that the utilities expected to receive from their contributions to the breeder reactor demonstration program was realization of the projects principal objective of furthering the development of the LMFBR as an energy conversion option. Additional benefits included participation in the definition and management of the project and free access to all information and patents produced as a result of project activities.

The 4-party contract vested overall project management authority in the PMC, through its Board of Directors and a Project Steering Committee (PSC). The Board established the general policies of the project and had oversight over all activities. It consisted of 2 members selected by TVA, 2 members selected by CE, and one member selected by BRC. According to the 4-party contract the AEC was to seek the necessary legislative authority to permit two of its officials to serve on the PMC Board. However, Congress never granted that authority.

The responsibility for day-to-day management of the project was given to the PSC, which was composed of one representative each from TVA, CE, and the AEC. However, lead roles for various aspects of the project were assigned to the participants. The AEC had the lead role for the nuclear steam supply system (i.e. the reactor and associated equipment), TVA had the lead role for plant operation, and PMC and its staff had the lead role for the balance-of-plant and for integration of over-all plant activities.

The contracts established an appeal mechanism to resolve disagreements among the parties. Appeals proceeded from the steering committee to the PMC Board and then, upon the request of any steering committee or Board member, to the heads of TVA, CE, and the AEC. Unanimous agreement was needed at the last level before a problem could be resolved.

In addition to their input to project management, the utilities were given broad access to information. The contract specified that all patent rights, and ownership of all other information produced as a result of project activities including, drawings, specifications, technical data, and reports would belong to the Government. However, BRC, PMC, and the electric utilities which contributed to the project would be afforded royalty-free rights to use the information, inventions, and patents produced.

In addition, participating utilities were given the right to assign personnel to observe and engage in project activities and receive training. BRC was to be kept informed of all significant matters affecting the project and was to transmit this information to the participating utilities and to the public.

Several conditions for termination of the project are established in the 4-party agreement, including such reasons as failure to receive the necessary permits for the construction or operation of the plant, or the existence of insufficient resources to permit the effective conduct of the project. In the event of termination, the contributing utilities are entitled to receive as settlement any unpledged funds in a proportionate ratio to their contributions. There is no contractual provision for refund of utility contributions to BRC.[5]

1975-76 CHANGES IN THE STATUTORY CRITERIA AND PROJECT CONTRACTS

By February 1975, within 1½ years of the signing of the contracts for the breeder demonstration program, the estimated net cost of the project (after subtracting projected revenues from electricity sales during the 5-year demonstration period) had increased from $699 million to $1,736 million.[6] The relatively fixed utility and manufacturers contribution to the project was then estimated at about $268 million. Hence, it became apparent that under the existing contracts the Government would be responsible for the great majority of the project costs. In response to this new funding situation, Congress revised the project authorization and approved new Statutory Criteria to allow for broader Government financial participation in the project. The contracts between the project participants were also modified to give the Government increased control of the project to go along with its increased funding.

Revised authorization and statutory criteria

Following the increase in project cost estimates in 1975, significant opposition to the breeder demonstration project (which was now named the Clinch River Breeder Reactor Project—CRBR) began to appear in Congress. Nevertheless, Congress authorized continuation of the project in Public Law 94-187, the fiscal year 1976 authorization act for the Energy Research and Development Administration (ERDA).

That act provided for substantial increases in the Federal share of the CRBR project. Specifically, Public Law 94-187: (1) eliminated the Government spending limit of 50 percent on the capital cost of the plant; (2) authorized new spending of $181.5 million on the CRBR above the $100 million previously authorized; (3) provided for yearly project spending authorization; (4) removed the previous distinction between direct project funding and funding for CRBR from the base breeder program; and (5) specified a procedure under which the Joint Committee on Atomic Energy (JCAE) could approve of new Statutory Criteria for revised contract negotiations for the project.

In addition, Public Law 94-187 for the first time authorized the provisions already included in the project contracts under which the Government indemnified the other project participants against third party claims. The act also authorized ERDA to acquire ownership of the CRBR plant.

ERDA gained additional freedom to broaden its participation in the CRBR project on April 29, 1976, when the JCAE approved the "Amended Statutory Criteria

[6] JCAE Hearings on Modifications in the Proposed Arrangements, op. cit., p. 71.

for Fourth Round Arrangements Under the Energy Research and Development Administration's Power Reactor Demonstration Program," which had been proposed by ERDA in February 1975.

The amendments to the Statutory Criteria: (1) changed provisions calling for "maximum industrial and utility participation" in the project to "meaningful industrial and utility participation"; (2) removed provisions limiting ERDA equipment funding to first-of-a-kind equipment; (3) provided for the first time for ERDA funding of construction of buildings and related facilities; and (4) provided for ERDA to modify the project contracts to assume PMC's responsibilities for overall project management.

Modified project contracts

The JCAE approval of the amended Statutory Criteria allowed ERDA to execute new contracts with the CRBR project participants in accordance with negotiations that had been proceeding for more than a year. The purpose of the new contracts was to increase the ERDA role in overall management of the project to be more in line with its share of the funding, while preserving the utilities rights to royalty-free use of inventions and information and their right to assign personnel to the project. On May 4, 1976, modifications to the 4-party contract and the other project agreements were executed.

The major change in the new contracts was that responsibility to manage the project was shifted from the PMC to ERDA. ERDA was to establish an "integrated project management organization" comprised of PMC, industry, and Government personnel under ERDA direction. Significant project matters were still to be referred to the PSC, but for review only rather than decision. The appeal mechanism for disagreements among the participants on significant matters was retained, but the Administrator of ERDA was given the authority to decide matters upon which the heads of ERDA, TVA, and CE could not reach unanimous agreement.

ERDA's freedom to direct the project, though substantial, was somewhat constrained by contract provisions requiring the agency to design and build the LMFBR demonstration plant in conformance with a specified reference design and to follow certain principal project objectives. ERDA's failure to do so could be grounds for termination of the agreements.

Another major change made in the new contracts was that ownership of the demonstration plant was shifted from PMC to ERDA, subject to TVA's rights to future ownership following the 5-year demonstration period.

No significant changes were made in the agreements regarding the private sector financial contributions to the project, their access to any information or patents produced, or their right to place personnel in key project positions.

THE CURRENT SITUATION

The 1975/76 Statutory Criteria and Contracts are still in effect and govern the private sector contributions and benefits from the project. The Department of Energy (DOE) has taken over the responsibilities given to ERDA.

DOE's most recent estimate is that it will cost a total of $3.9 billion to complete the project. Of that total, about $1.5 billion has been spent. Thus far the private sector has contributed about $150 million to the project. According to current agreements, the total private sector contribution, including interest, is estimated to be about $325 million. However, a BRC Task Force has developed a plan to modify financing for the CRBRP.[7] The Reagan Administration supports the plan and is preparing a legislative proposal to implement it.

ADDENDUM—SUMMARY OF KEY EVENTS RELATING TO PRIVATE PARTICIPATION IN THE CLINCH RIVER BREEDER REACTOR DEMONSTRATION PROGRAM

DATE, EVENT, STATUS OF PRIVATE PARTICIPATION

July 11, 1969, P.L. 91-44—AEC authorized to begin project definition for a cooperative LMFBR demonstration program under criteria which specify limited Government assistance to a utility owned facility.

June 2, 1970, P.L. 91-273—AEC authorized to enter into a cooperative arrangement to build and operate a demonstration LMFBR. Up to $80 million in Federal assistance authorized for a privately owned project estimated to cost $400-500 million.

March 4, 1971, JCAE hearing—AEC testified that anticipated private funding for the LMFBR includes up to $200 million from a utility owner and additional contributions from other utilities throughout the nation.

Early 1971—The electric utility industry organized a fund-raising campaign with a goal of obtaining $250 million from utilities with no ownership interest in the LMFBR plant.

August 11, 1971, P.L. 92-84—Congress authorized up to $100 million in direct assistance and additional indirect assistance (exclusive of end capital items) up to a total of 50 percent of the capital cost of a utility-owned LMFBR demonstration plant.

July 25, 1973, Contracts for LMFBR demonstration signed—Utilities agreed to provide $254 million, a site, and additional services to the demonstration project. AEC agreed to provide all additional funding for the estimated $699 million project. PMC established to control the assets and manage the project under joint utility and AEC direction.

February 1975—Estimated project costs escalate to $1,736 billion. Private sector pledges estimated at $268 million.

Dec. 31, 1975, P.L. 94-187—Government funding for the demonstration project put on a yearly basis with no overall (e.g. 50% of capital cost) spending limit. JCAE empowered to approve new program criteria with increased ERDA participation. ERDA ownership of the plant authorized.

May 4, 1976, New project contracts signed—Ownership of the facility and overall project management shifted from PMC to ERDA.

Aug. 1, 1983—$1.5 billion of total estimated project cost of $3.9 billion spent. $150 million of total estimated private contribution of $325 million received. Plan for additional private sector participation under development by DOE.●

ADDRESS BY DR. JAMES H. BILLINGTON

● Mr. HATCH. Mr. President, for the benefit of my colleagues I should like to have printed into the RECORD an address by Dr. James H. Billington, the director of the Woodrow Wilson Center for Scholars. Dr. Billington's speech, which is entitled "The Adventure of Liberal Education," was presented at the inauguration ceremony of Rev. Frank R. Haig as president of Le Moyne College on January 22, 1982. Dr. Billington states that in his view, the biggest failure of American higher education in the last 15 years is its renunciation of its traditional role of transmitting moral, spiritual, and intellectual values from one generation to another. Dr. Billington's reflections are concise and thought provoking, and I commend his address to my colleagues.

The address follows:

THE ADVENTURE OF LIBERAL EDUCATION

(By Dr. James H. Billington)

(An address on the occasion of the Inauguration of the Reverend Frank R. Haig, S.J., as President of Le Moyne College.)

Nothing may be more important—and less understood—in our civilization than liberal education. No other country in human history has given so much of it to so many as has America since World War II. Yet liberal education is largely seen by students as a kind of cerebral salad bar for random nibbling at low calorie ideas between beer parties; by faculties as rhetorical camouflage for their preferred pursuits of narrow specialization within a tenured sanctuary and utopian kibitzing at those outside; and by the public as an increasingly expensive, possibly subversive diversion from preparing for a job.

Webster defines liberal education as "intended to bring about improvement, discipline, or free development of the mind or spirit." It is thus a process, not a product—and it is crafted by and for that magnificent, troublesome thing we call the human mind. If you are bothered, as a classmate of mine once was, that education encourages putting the brains in charge consider my old professor's reply: "What other part of the anatomy would you suggest?"

The dictionary sees liberal education combining freedom and discipline. And these two qualities are inseparable from each other and indispensable to liberal democracy.

Liberty is the core value of our civilization—the distinctive battle cry of the American revolution, which sought to promote individual freedom and limit central authority—in contrast to most later revolutions that have only intensified the power of government over people by creating the secular idols of blood nationalism or repressive communism.

In out time, the horizons of freedom remain unlimited only in the life of the mind and spirit. In the material world today resources are limited, while appetites, expectations, and conflicting claims are everywhere on the rise. Only in the life of the mind does one man's pursuit of happiness not threaten another's. For the mind's highest happiness is the pursuit of truth; truth is bigger than all of us; and one man's discovery can be another's gain.

But freedom did not come into being and will not survive without responsibility. Inner discipline is the Siamese twin of external freedom—the guardian of liberal democracy as well as liberal education. Higher civilization in Europe and America grew gradually from the deepening discipline of

the classical call to exercise the mind rather than just indulge the body, and of the Judeo-Christian call to grope for goodness rather than just grasp for goods.

The special discipline of a liberal education begins with learning to use words and numbers—the languages of quality and quantity, respectively. Then, at a higher level, comes the discipline of digesting experience and experiments from the past. One cannot innovate without learning first what was thought before in the library, or tried in the laboratory.

A leaf may seem most free when it breaks loose from the tree; but it is in fact enslaved at that very moment—to every passing gust of wind—and to the certainty of descent and decomposition. Societies that survive do not shed their leaves every year—and they keep their roots alive not only in historical tradition, but in such unchanging realities as divine creation and objective moral order.

Democracy in America was rooted in a covenant before it flowered into a constitution. It may, however, go to seed without discipline. And if it does, a large amount of the responsibility will fall on the educational system—the largest and freest in the world, which has slipped into an incoherence that may pose an even graver threat to liberal education from within than do economic pressures from without. The coherence provided by maintaining a core of common courses here at Le Moyne suggests that shared values can still be imparted with a liberal education—and that mind and spirit can coexist harmoniously as they do in Webster's definition.

More lethal to liberal democracy than the fanaticism of the few is the indifference of the many. Apathy is the hidden killer in our midst; and apathy seems pretty far advanced these days. I am told that when students on an American college campus were polled recently on whether they thought students were too apathetic, 5 percent said yes, 5 percent said no, and the other 90 percent were apathetic.

Rheinhold Niebuhr once said of democracy that man's capacity for good makes it possible; his capacity for evil makes it indispensible. Perhaps our capacity for apathy will make it unsustainable.

For free men, the antidote to apathy is adventure: moving out, seeking clues, asking questions. Liberal education at its best is always an adventure; and if you embark on it, you will find that familiar sights acquire new qualities—as historic landmarks or scientific signposts—often pointing to unexpected destinations.

In epic antiquity, Aeneas lost Troy that he might found Rome. In the real-life epic that opened the modern era, the Italian Columbus looking for Asia on behalf of Spain discovered America. Euler, a famous 18th-century German plotting troop movements across seven bridges in a Baltic town opened up the new science of topology. An unknown 20th-century Russian seeking fuel amidst a civil war recovered perhaps the most haunting picture of Christ ever painted: a 14th-century icon of Rublev. We are all enriched because someone hazarded a new theory amidst a humdrum task, because someone recognized the face on the firewood.

The classical liberal education involved—as the adventure should today—both scientific and artistic truth, both Euler's formulae and Rublev's form, both order and beauty. For the mind seeks not just to grasp general laws, but also to reach out for that which is special about each individual: to find, as Yeats once put it, "In all poor foolish things that live a day Eternal beauty wandering on her way."

The liberally educated person in our time must be open to that which is unique, often strange, sometimes beautiful about other cultures and religions. Those who do not learn to listen to other people when they are whispering their prayers may have to contend with them later when they are howling their battle cries.

The adventure of liberal learning involves not just the world outside, but also the world within. Beyond Socrates' call to "know thyself" lies Augustine's invitation to discover that self within us that is deeper than we are ourselves.

In my view, the greatest and least acknowledged failure of American higher education to the broader society in the last 15 years is its quiet but unmistakable renunciation of its historic function of transmitting moral and spiritual as well as intellectual values and standards from one generation to another.

It has, of course, been part of the American genius to separate the churches from the state and to keep the authorities of either at some distance from the structures of education. But one cannot separate the mind from the spirit in the process of liberal education. Some moral standards and even ultimate beliefs are necessarily imparted along with secular technique. Freedom *of* religion in the societ has all too often been misinterpreted as implying freedom *from* religion within the academies—leading to what David Riesman has called "the bigotry of the enlightened"—with ideology or methodology often becoming a surrogate for religion itself.

There may be something a little bit implausible about localizing and limiting the exalted American ideal of liberal education to the pedestrian confines of any college campus: these green zones for late adolescents which seem closer to animal house than to the angel hosts; these ivied islands so far removed from the mainland of life.

But it is not so presumptuous, perhaps, if we think of the liberal arts college as the starting place for an adventure—providing an island of poverty as a prelude to the prose of life.

Some of those very first settlers to bring English language and culture to our country were thrown up on the island of Bermuda before they got here. This image of Captain John Smith's party landing briefly on an enchanted island before proceeding on to fulfill his main mission appears to have fascinated—and may have directly inspired—the greatest poet of our language as he was writing his final play.

Shakespeare's *Tempest*, you will recall, tells how fantasy aided self-discovery during an interlude on an island among people cast up by a storm who then return more wisely to the larger world. Shakespeare through the aged Prospero tells us near the end that the value of the play enacted there lay not in any "insubstantial pagent faded" but in the discovery that "we are such stuff as dreams are made on."

Man has the capacity to dream as well as reason, to embark on adventure for its own sake even if it may fail. When the same Jesuit order that founded this college left China in the early 18th-century, after a remarkable century of the most nearly successful effort in history to build a bridge between that ancient Eastern culture and the Christian West, they left behind a haunting epitaph:

> Go away, voyager,
> Congratulate the dead,
> Console the living,
> Pray for everyone,
> Wonder and be silent.

You have here at Le Moyne world enough and time not just to learn, but also to wonder and be silent, following perhaps yet another poet, Philip Larkin, who in our own time, punctuates his work as a university librarian by visiting a half-deserted nearby church "to stand in silence."

> A serious house on serious earth it is.
> In whose blent air all our compulsions meet.
> Are recognized, and robed as destinies.
> And that much never can be obsolete.
> Since someone will forever be surprising
> A hunger in himself to be more serious.
> And gravitating with it to this ground,
> Which, he once heard, was proper to grow wise in.

You have built on solid ground here. You have a wonderfully good captain for your adventure. He has sung for you today; he has already summonded a chorus into being, and he may just be able to keep you whistling even in troubled times. Since his schoolboy days, when I was first privileged to know him, Father Haig has always combined demanding intellectual discourse with spirited good humor. His distinguished scholarly career shows equal concern for both physics and metaphysics. He is a pilot who has been on the bridge before—and can steer by the stars as well as by modern instruments.

Perhaps he and you—perhaps even a new generation in American liberal education—can rediscover those links between the natural and the human sciences that were present in the original liberal arts curriculum of the trivium and quadrivium. Forging such a connection anew represents an adventure of the mind and spirit that the contemporary French philosopher, a former navigator, Michel Serres, has brilliantly compared to the earlier effort of explorers from the age of Father Le Moyne himself to find a northwest passage from the Atlantic to the Pacific.

But, whatever the course of your individual explorations, I hope you find here under this good leader some of the sense of shared purpose that is as essential to liberal learning as it is to liberal democracy. Whatever tempests lie ahead, never be ashamed to dream—and even to look back beyond Shakespeare's final fantasy to Dante's—to that alta fantasia in the last canto of the Divine Comedy, which was both a beatific and a geometric vision. And do not be afraid to look ahead beyond the incoherence of the moment in the knowledge that the left and right halves of the brain come together in one fragile human mind, just as the hemispheres—East and West, North and South—are united in one planet.●

INEQUITABLE DAIRY ASSESSMENTS

● Mr. BAUCUS. Mr. President, the ill-fated dairy assessments do not address the problems of our growing dairy surpluses and they are inherently inequitable. The first 50-cent assessment is being collected from all producers, not only from those that currently contribute to the CCC-owned surplus stocks.

The only result of taxing all dairy producers at the 50-cent-per-hundredweight rate is to force even greater production. Producers must do this to offset the direct loss of income.

I had intended to introduce an amendment to S. 1529. My amendment would have limited the milk assessment and diversion program to areas in which Federal milk marketing orders are in effect. This would have corrected what I see as a gross inequity in the compromise dairy bill as passed by the Senate Agriculture Committee.

If Montana dairymen and dairymen from non-surplus-producing areas are forced to pay a 50-cent assessment they give up more than producers under Federal marketing order areas. For example, Montana dairymen receive a full $1.65 less for their milk than do producers under Federal marketing orders.

If Agriculture Secretary Block follows through with his plans to impose the second 50-cent assessment in September 1, Montana dairymen will be hard pressed to cover their cost of production. I am pleased to support Senate Joint Resolution 149; it would express the sense of the Congress that a second 50-cent assessement be delayed until November 1. I hope, along with many of my colleagues, that the Senate will be able to make the necessary adjustments in the existing program in a fair and equitable manner.

Under the current assessment and the proposed second 50-cent assessment, Montana falls into a chaotic milk marketing system. I would hope that we could return to a more orderly marketing system under which dairy farmers can receive a reasonable price for their product and consumers are assured of an adequate supply of dairy products at reasonable prices.●

INGENUITY OF PRIVATE ENTERPRISE

● Mr. TOWER. Mr. President, I rise to remind my colleagues of one of our country's most treasured assets—the ingenuity of private enterprise. This American attribute has historically responded to dynamic economic situations and contributed to our Nation's success. I call on my colleagues to reinforce and encourage this basic American advantage so that we might continue to lead the world in every way.

We have observed the responsiveness to changing economic and social trends of private enterprise. Certainly, we have witnessed a shift from a material producing society to an information-producing society, and I firmly believe that the flexibility and ingenuity of private enterprise has facilitated this transition. There is no sector of our economy that does not benefit from the possibilities brought on by this ingenuity. Recently, the example of a Texas firm's high-technology response to the marketing needs of the agricultural sector has been brought to my attention. That firm, the National Rancher's Registry, has established a computer center out of San Antonio that provides a network to bring together agriculture buyers and sellers from across the Nation. Through the use of this technology, the National Rancher's Registry has opened up new doors for increasing the marketing efficiency of agricultural goods from livestock to farm equipment, commodities to farm produce.

Mr. President, I further maintain that it is the ingenuity exemplified by private enterprises that provides the greatest assurance of continued American preeminence. Capitalism affords the incentives to provide a product or service cheaper, faster, and better, and this American characteristic has historically distinguished the United States as the leader on every front. We must maintain for future generations these incentives and I call on my colleagues to rise to the important challenge of preserving the concepts of enterpreneurship. Finally, Mr. President, I commend those individuals in all States who have declared their lives to providing the ideas necessary to preserve the authority and position of the United States of America.●

THE ST. LOUIS AREA BACKSTOPPERS

● Mr. EAGLETON. Mr. President, I rise today to commend an outstanding organization in my home State of Missouri which will mark its 24th anniversary on September 11, 1983. I refer to the Backstoppers, a nonprofit organization which offers financial assistance and counseling services to widows and children of St. Louis metropolitan area law enforcement officers and firefighters who were killed in the line of duty.

Currently, the Backstoppers, comprised of approximately 600 concerned men and women, are providing much-needed assistance to 52 widows and 70 children in the Greater St. Louis area.

Police and fire department members in the city of St. Louis, St. Louis County, Jefferson County, St. Charles County, and Franklin County all are covered by the Backstoppers.

The Backstoppers goal is a simple yet generous one: to provide for the survivors of those who have given their lives in the performance of their duty.

The Backstoppers provide for both the immediate needs of survivors and, at an appropriately early date, Backstopper officers meet with the widow and review the family's financial condition. The Backstoppers assume all existing debts, including home mortgage payments or rent.

Concern and support for survivors does not end with the initial crisis. A committee of Backstoppers counsels families on employment and educational opportunities, and in emergency situations. Where there is inadequate health insurance, the Backstoppers offer prepaid hospitalization to the families they assist. In the event that other assistance is not available, they provide educational aid and interest-free loans.

A highlight of the year is a Christmas party at which the children are entertained and presented with gifts, including a $100 U.S. savings bond.

Mr. President, police officers and firefighters who lose their lives in the line of duty have given the ultimate gift. Through their fine, generous work, the Backstoppers let surviving families know day in and day out that they are cherished members of the community.

The Backstoppers and the families they assist deserve our warmest thanks and appreciation.●

HUNGER IN AMERICA

● Mr. GLENN. Mr. President, earlier this week President Reagan discovered that Americans were going hungry. According to news accounts, President Reagan said he was perplexed about hunger, because he thought government was taking care of those in need.

Government is not—thanks to the President's cuts in nutrition programs. Almost 6 months to the day after proposing a fiscal year 1984 budget that would cut $1.5 billion from food programs for families and children, President Reagan appointed a commission to recommend a national program to the White House within 3 months.

The fact is that we do not need another commission to develop a national program. What we need is an administration that will use the programs we have.

The President's February budget message asked Congress to cut $1.1 billion from the food stamp program, and $400 million from school breakfast and summer feeding programs. More than 1 in 3 poor families would lose more than $280 a year in benefits as a result of such cuts.

These proposals came on the heels of budgets which reduced the food stamp program by more than $2 billion—or nearly 20 percent—in fiscal year 1982 and fiscal year 1983, and slashed the school lunch fund by more than $1.5 billion—or about 38 percent—over the same period. As a direct result of these actions, last year the food stamp program served nearly 1 million fewer Americans, while 2 million children dropped out of the school lunch program. Even though unemployment rose to almost 11 percent late in 1982 and despite the fact

that 34.4 million Americans—or a staggering 15 percent of our population—lived in poverty last year, participation in the food stamp porgram did not increase beyond the level of 22 million people.

The report released by the Census Bureau on August 2 shows who is really paying for the President's program. In the last 5 years, 10 million Americans have been forced below the poverty line. But these overall figures only mask the devastation among black and Hispanic Americans. Nearly 4 in 10 blacks live in poverty, as do nearly 3 in 10 Hispanics. Nearly 1 in 5 children live in poverty, and half the families below the poverty line are headed by single women; 1982 represented the third year in a row that poverty in America increased. The administration does not need a commission to tell them that this disturbing trend guarantees increased hunger. Instead of putting America's hungry on hold for 3 months, the President could act now to alleviate human suffering.

The 1984 budget resolution contained authorizations for reserve funding of $450 million in the food stamp program, $300 million in the WIC program, and $150 million for the school lunch program. When Congress returns from recess in September, I will submit legislation to appropriate increased funding for these programs and the Older Americans Nutrition Program. The Older Americans Nutrition Program has not received funding increases to match inflation and is not expanding to serve new senior citizens in need.

Three months from now, the President's commission could well propose some worthy initiatives, and I would welcome any constructive proposals. In the meantime, Presidential commissions and public relations offensives will do little to alleviate hunger in America, and I urge President Reagan to give my proposals his support.●

THE TARGET PRICE FREEZE

● Mr. ABDNOR. Mr. President, I should like to engage the distinguished chairman of the Agriculture Committee in a discussion about an amendment I had planned to offer to the target price freeze. Because the Senate failed to act on the target price freeze in an expedious manner, time has grown too short to permit adequate attention to my amendment.

Although I will refrain from offering my amendment at this time, I ask the committee to study it carefully so that it might be considered for future action on the target price program.

Under my amendment the Secretary of Agriculture will be permitted to implement an acreage reduction program using the 1983 target prices. The Secretary will continue to have the discretion to design a program that he deems appropriate and my amendment will not alter the basic program established by the Secretary.

My amendment will, however, provide producers a choice either: To enter into the program established by the Secretary and receive the 1983 target price, or to enter into the program established by the Secetary and also agree to limit their marketings as well thereby receive the 1984 and 1985 target prices. Producers who choose the higher target must agree to participate in the acreage reduction program specified by the Secretary and, further, to reduce their marketings accordingly. The required reduction in marketings would be calculated by using a simple algebraic formula which eliminates an unfair slippage factor.

Slippage represents the additional acreage each producer must remove from production in order to comply with the program. It reflects the error which occurs when USDA uses acreage reductions instead of marketing limitations. The error occurs because some producers elect not to participate in the program; others comply with the letter but not the spirit of the program by taking poor and marginal land out of production, thereby reducing their acreage but not their production; and still others simply farm more intensively on the fewer acres they are allowed to plant under the program. In any event, despite the intent of the program to reduce production, there remains every incentive for producers to maximize their yield.

The net result for the Nation is apparent in that yields have soared and near-record production levels have been achieved despite PIK, setasides, paid diversions, and every good intention of USDA to try to bring supply into better alinement with demand. The result for individual farmers which is not so apparent is that producers who comply in good faith with the spirit as well as the letter of the program, and actually do reduce production, are penalized because they must reduce their production by an additional 30 percent to offset production by those who do not reduce. Obviously, that is not fair to producers nor is it good policy for the Nation.

My amendment will correct this basic inequity and provide the needed incentive for a more effective supply management program. Since producers who elect to receive the higher target prices must certify that their marketings have been reduced, and not just their acreage, the incentive to overproduce which is inherent in the existing program will be reduced.

Hopefully, with this requirement we will no longer see acreage reductions resulting in a mere fractional proportionate reduction in production or, as was the case in 1982, even a slight increase in production from a 15-percent set-aside for wheat, for example. Furthermore, producers will be more apt to participate in the program due to the incentive of the higher target prices.

In short, under my amendment those who participate in good faith in the spirit as well as the letter of the program will be rewarded and those who do not will be penalized, rather than the reverse, which is the case under the existing program.

Mr. HELMS. Mr. President, I thank my distinguished colleague from South Dakota for bringing his amendment to my attention. Very definitely we are at a turning point in farm policy. Many of our present farm programs have failed farmers as much as they have failed taxpayers. Now is the time to look for new directions. I assure my colleague that I shall carefully consider his amendment as Congress moves toward developing more equitable farm legislation.

Mr. ABDNOR. I thank the chairman for his consideration.●

ATTITUDINAL PROBLEMS FACING ORGAN TRANSPLANTATION IN OUR SOCIETY

● Mr. KENNEDY. Mr. President, on Tuesday, August 2, Senator ANDREWS and I introduced S. 1728, the National Task Force on Organ Procurement and Transplant Reimbursement Act, to help address the problem that America lacks a national network for coordinating organ transplants. I know my colleagues are well aware that at the present time patients in need of organs for transplantation have often had to resort to public appeals through the mass media to find a compatible organ. I hope that the proposed task force will find viable alternatives to the difficult process which patients and their families now undergo.

I believe that America is capable of solving the medical and technical problems of organ transplantation given the concerted effort that a body such as the task force would make. However, I believe that there is a problem of attitudes toward organ transplantation which can be addressed by the Nation as a whole, as well as the task force. Earlier this year, the National Kidney Foundation (NKF) received "Attitudes and Opinions of the American Public Toward Kidney Donations," a study prepared by the Gallup Organization, which characterized American attitudes toward kidney transplantation. It showed that while 93 percent of the Americans polled said that they have heard or read something about organ transplants, most are reluctant to par-

ticipate personally in organ donation. Approximately 72 percent of those who heard of organ donation said that they were very likely to give permission to have the kidneys of a loved one donated after that person's death, and 50 percent said that they would very likely donate their own child's kidney, should the child die accidentally. Yet the significant fact is that only 24 percent of those polled said that they are very likely to want their own kidneys donated after their death. Thus, 76 percent of those polled said that they did not desire to have their kidneys donated after their death. If this number is representative of America at large and for organs in general, then this is a real obstacle to an effective national network of organ transplantation.

If individuals do not want their own organs donated after their death, this message may be communicated to their families; once communicated, it would be difficult for grieving relatives to donate the organs of the deceased. Furthermore, donor cards which give specific intention of donation will be left unsigned; in fact, the NKF study found that while awareness of organ donor cards is very high (76 percent of those interviewed), only 18 percent of those aware of organ donor cards have signed one. Even more distressing is the fact that among those likely to want their own kidneys donated, only 31 percent have signed a card; furthermore, less than half (41 percent) have told their family members that they want their own kidneys donated after their death, and still less (18 percent) have told close friends. Finally, only 5 percent of those likely to want their kidneys donated have told their doctor, and hardly 4 percent of those polled have indicated their intentions to donate their own kidneys after death in wills.

I hope that members of this august body will give full support to S. 1728. The National Task Force on Organ Procurement and Transplant Reimbursement Act which Senator ANDREWS and I have proposed will permit the addressing of the problem of American attitudes toward organ transplantation and its impact on the availability of donor organs. The task force will explore the important medical and technical impediments to a more compassionate and effective organ transplantation process in America. But, each American will have to personally address the question of being a donor.

Mr. President, I ask to have printed in the RECORD the executive summary and several tables from the Gallup Organization's study prepared for the National Kidney Foundation.

The material follows:

EXECUTIVE SUMMARY

Awareness of organ transplants is high—Most Americans have heard or read something about organ transplants, with 93% of a nationally representative sample of those age 18 years or over saying that they had. This level of awareness is relatively constant across all demographic variables except race, where 95% of white respondents have heard of organ transplants but only 84% of black respondents.

Most believe that someone has to give permission for their own kidney to be donated in order to have kidneys available—Among those aware of organ transplants, most (89%) believe, correctly, that somebody has to have given permission for their kidney to be donated after their death in order for a kidney to be transplanted into someone who needs it.

Most believe that a doctor cannot order kidney removal—Equally, most (88%) believe, correctly, that a doctor cannot give permission to remove the kidney of someone who has just died.

Many fewer believe that a relative of someone who died can give permission—A smaller proportion, but still a substantial majority (64%) believe, correctly, that a relative of someone who has died can give permission to have that person's kidneys donated.

More people are likely to give permission for donation of kidneys of a loved one or of own child than are likely to want their own kidneys donated—Almost three-quarters (72%) of those aware of organ transplants say they are very likely to give permission to have the kidneys of a loved one donated after that person's death, and half say they are very likely to donate their own child's kidneys in the event of accidental death of the child. However, only 24% say they are very likely to want their own kidneys donated after their death.

Those who are more likely to want their own kidneys donated after death are more educated; with higher income; whites rather than blacks—Those who are most likely to want their own kidneys donated after their death are those who have completed more formal education and are in higher income brackets (two interactive variables). Blacks are much less likely than whites to want their own kidneys donated (10% vs. 27%). These same demographic characteristics distinguish those more likely to give permission for the kidneys of a loved one or their own child to be donated.

When added to rate various reasons for not wanting their own kidneys donated, the leading response was that "I never really thought about it"—About one in five (20%) say that a very important reason for not wanting to have their kidneys donated after their death is that "I never really thought about it".

Dislike for idea of being cut after death cited as "very important" by one in five—about the same proportion (20%) as "very important", the reason "I don't like the idea of somebody cutting me up after I die". No other reason was cited by that large a proportion of respondents as being "very important".

Few say that religious reasons or complicated permission procedures are very important—Only 7% say either that the reasons "it is against my religion" or that "it is complicated to give permission" are very important reasons for not wanting their own kidneys donated after their death.

Dislike for the idea of being cut up after death is the reason which most sharply differentiates those more and less likely to want own kidneys donated—The greatest difference between those more and less likely to want their own kidneys donated is in their response to the reason: "I don't like the idea of somebody cutting me up after I die". Only 5% of those who say they are very/somewhat likely to want their own kidneys donated characterized that reason as being "very important", compared with 44% of those who are not very/not at all likely, more than twice the difference of each of the eight other reasons presented.

Few have taken actions to implement their interest in having their own kidneys donated after their death—Less than half (41%) who say they are very/somewhat likely to want their own kidneys donated after their death have told family members about their desires. Even fewer (31%) have signed an organ donor card; told close friends (18%); told a doctor (5%); or put it in their will (4%).

Awareness of organ donor cards is very high—Seventy-six percent of those interviewed say they have heard of organ donor cards. Even among those not likely to want their own kidneys donated. 76% had heard of the cards; almost two-thirds of blacks interviewed (65%) had heard of them.

A small proportion of those aware of organ donor cards have signed them—Only 18% of those aware of organ donor cards have signed one. Even among those likely to want their own kidneys donated, only 35% have signed a card.

Most correctly assess consequences of signing organ donor cards—Virtually all aware of organ donor cards and virtually all who say they have signed an organ donor card believe, correctly, that the following two statements are false:

"If you signed a card, someone can force you to give up one of your kidneys when they need one for a transplant."

"Once you have signed a card, you cannot change your mind."

Very high level of belief that a central file of card signers exist—Almost two-thirds of those aware of cards, and half of those who have signed cards believe, erroneously, that the following statement is true:

"There is a central file of people who have signed donor cards which is made available to doctors or others who are trying to locate a kidney donor."

About one-third believe there are kidney banks, as there are blood banks—About one-third (31%) of those aware of organ transplants believe, erroneously, that there are kidney banks, just as there are blood banks. This is equally true of those more or less likely to want to have their own kidneys donated. Those who have signed an organ donor card are less likely (23%) to believe this is true.

Virtually no one believes that donated kidneys are "always" available, "often" available, or "never" available—Those respondents with an opinion split about equally between believing that donated kidneys are "sometimes" available (44%) or "rarely" available (41%).

TABLE 1.—*Awareness of organ transplants*

Have heard of organ transplants:	*Percentage*
Yes	93
No	5
Don't know/no answer	2
	100

Note.—Number of interviews=1,574.

TABLE 2.—*Actions taken by those very and somewhat likely to want own kidneys donated* [1]

Action taken:	[2] Percent
Told family members	41
Signed organ donor card	31
Told close friends	18
Told doctor	5
Put it in will	4
None of these	50

[1] Base equals 1,488; those aware of organ transplants.
[2] Total exceeds 100 percent due to multiple responses.

TABLE 3.—OPINIONS ABOUT EXISTENCE OF "KIDNEY BANKS JUST LIKE BLOOD BANKS"

	Percent saying:				
	True	False	Don't know	Total	Number of interviews
Population type:					
Aware of organ transplants	31	47	21	100	1,488
Very/somewhat likely to permit donation of own kidney	31	52	17	100	610
Not very/not at all likely to permit donation of own kidney	32	42	27	100	452
Signed organ donor card	23	60	17	100	221

●

LEGISLATIVE VETO

● Mr. KASTEN. Mr. President, I have developed a proposal to replace the legislative veto over Federal Trade Commission rules that was recently invalidated by the Supreme Court. I am a firm believer in the legislative veto as an essential element in our arsenal of weapons for regulatory reform. Along with congressional and executive branch oversight, legislative veto authority provides Congress an important opportunity to insure that an agency's exercise of its delegated legislative power is consistent with congressional intent. I believe that veto is necessary in order to shift the real power of Government away from the bureaucracy and back to the elected Congress.

My proposal would provide a joint resolution of disapproval mechanism for FTC rules. Under the proposal, newly issued FTC rules would have to be submitted to Congress. The rule could become effective after 30 days unless: First, within 30 days the House or Senate Commerce Committee report a joint resolution of disapproval—or the committee is discharged—and second, within another 60 days the joint resolution of disapproval is enacted into law.

Like the legislative veto provision previously in effect for the FTC, the proposal calls for expedited congressional consideration of disapproval resolutions: First, committees may be discharged after a 20-day period through a privileged motion on the Senate floor; second, the disapproval resolution itself is also privileged on the Senate floor; and debate on the resolution is limited to 2 hours. Even if this proposal were not enacted into law, Congress could still disapprove an FTC rule through enactment of a joint resolution. The significance of the proposal is therefore: First, that it calls for a systemmatic submission of new FTC rules to Congress; and second, that it provides for expedited congressional consideration of disapproval resolutions.

This approach is considered to be constitutional, because it utilizes a joint resolution—which is presented to the President—rather than a concurrent resolution—which is not. Except for certain minor changes necessary to tailor the proposal to the FTC Act, this joint resolution of disapproval mechanism is identical to S. 1650 introduced on July 20, 1983, by Senators LEVIN, BOREN, GRASSLEY, DECONCINI, and KASTEN.

I call attention to this proposal and would be interested in receiving comment from my colleagues in the Senate and from the general public.

The material follows:

CONGRESSIONAL REVIEW OF RULES

The Federal Trade Commission Act (15 U.S.C. 41 et seq.) is amended by inserting after section 26, as added by section 10 of this Act, the following new section:

"SEC. 27. (a)(1) On the day the Commission forwards to the Federal Register for publication a recommended final rule, the Commission shall transmit a copy of such rule to the Secretary of the Senate and the Clerk of the House of Representatives. The Secretary of the Senate and the Clerk of the House of Representatives are authorized to receive a recommended final rule under this subsection whether the appropriate House is in session, stands in adjournment or is in recess.

"(2) On the day on which the Secretary of the Senate and the Clerk of the House of Representatives receive a recommended final rule, the Secretary and the Clerk shall transmit a copy of such rule to the appropriate committees.

"(b)(1) Notwithstanding any other provision of law, no recommended final rule may become effective until the expiration of a period of thirty days after the date on which such rule is received by the Secretary of the Senate and the Clerk of the House of Representatives. If, before the expiration of such thirty-day period, either appropriate committee orders reported or is discharged from consideration of a joint resolution with respect to such rule, such rule may not become effective until the earlier of—

"(A) the expiration of a period of sixty days beginning on the date on which the committee ordered reported or is discharged from consideration of such joint resolution, except that such rule may not become effective under this subparagraph if within such sixty-day period a joint resolution with respect to such rule has become law;

"(B) any time after either House of Congress has rejected a joint resolution with respect to such rule; or

"(C) the adjournment of Congress sine die at the end of a Congress, except that such rule may not become effective under this subparagraph if—

"(i) a period of thirty days has not expired since the date on which such rule was received by the appropriate committees; and

"(ii) within such thirty-day period, a joint resolution with respect to such rule has become law.

"(2) For purposes of this subsection—

"(A) the term 'days' means only days of continuous session of Congress;

"(B) continuity of session is broken only by an adjournment sine die at the end of a Congress; and

"(C) the days on which either House is not in session because of an adjournment or recess to a day certain shall be excluded in the computation of days of continuous session of Congress for the thirty-day period referred to in this subsection if the adjournment is for more than three days, and shall be excluded in such computation for the sixty-day period referred to in this subsection if the adjournment is for more than fifteen days.

"(c) Notwithstanding any other provision of law, any final rule subject to this section shall be considered a recommendation of the Commission to the Congress and shall have no force and effect as a rule unless such rule has become effective in accordance with this section.

"(d) Whenever an appropriate committee reports a joint resolution pursuant to this section, the resolution shall be accompanied by a committee report specifying the reasons for the committee's action.

"(e) Congressional inaction on, or rejection of, any resolution of disapproval concerning a rule shall not be deemed an expression of approval of the rule involved. The compliance of the Commission with the requirements of this section, including any determination by the Commission under this section, shall not be subject to judicial review of any kind.

"(f)(1) If a recommended final rule of the Commission is disapproved under this section, the Commission may issue a recommended final rule which relates to the same acts or practices as the disapproved rule. Such recommended final rule—

"(A) shall be based upon—

"(i) the rulemaking record of the recommended final rule disapproved by the Congress; or

"(ii) such rulemaking record and the record established in supplemental rulemaking proceedings conducted by the Commission, in accordance with section 553 of title 5, United States Code, in any case in which the Commission determines that it is necessary to supplement the existing rulemaking record; and

"(B) may reflect such changes as the Commission considers necessary or appropriate, including such changes as may be appropriate in light of congressional debate and consideration of the resolution of disapproval with respect to the rule.

"(2) After issuing a recommended final rule under this subsection, the Commission shall transmit such rule to the Secretary of the Senate and the Clerk of the House of Representatives, in accordance with subsection (a)(1) of this section, and such rule shall only become effective in accordance with this section.

"(g) The provisions of this subsection, subsections (a)(2), (d) and (g) through (k) of this section are enacted by Congress—

"(1) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they are deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of joint resolutions, and they supersede other rules only to the extent that they are inconsistent therewith; and

"(2) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same

manner and to the same extent as in the case of any other rule of that House.

"(h) Except as provided in subsection (k) of this section, joint resolutions shall, upon introduction or receipt from the other House of Congress, be immediately referred by the presiding officer of the Senate or the House of Representatives to the appropriate committee of the Senate or the House of Representatives, as the case may be.

"(i)(1)(A) Except as provided in subparagraph (B) of this paragraph, if the committee to which a joint resolution has been referred does not report such resolution within 20 days of continuous session of Congress after the date of transmittal to the Congress of the recommended final rule to which such joint resolution relates, it shall be in order to move to discharge the committee from further consideration of such resolution.

"(B) If the committee to which a joint resolution transmitted from the other House has been referred does not report such resolution within 30 days after the date of transmittal of such resolution from the other House, it shall be in order to move to discharge such committee from further consideration of such resolution.

"(2) Any motion to discharge under paragraph (1) of this subsection must be supported in writing by one-fifth of the Members, duly chosen and sworn, of the House of Congress involved, and is highly privileged in the House and privileged in the Senate (except that it may not be made after a joint resolution has been reported with respect to the same rule); and debate thereon shall be limited to not more than one hour, the time to be divided in the House of Representatives equally between those favoring and those opposing the motion to discharge and to be divided in the Senate equally between, and controlled by, the majority leader and the minority leader, or their designees. An amendment to the motion is not in order.

"(j)(1) Except as provided in paragraphs (2) and (3) of this subsection, consideration of a joint resolution shall be in accord with the rules of the Senate and of the House of Representatives, respectively.

"(2) When a committee has reported or has been discharged from further consideration of a joint resolution, or when the companion joint resolution from the other House has been placed on the calendar of the first House, it shall be in order, notwithstanding the provisions of rule XXII of the Standing Rules of the Senate or any other rule of the Senate or the House of Representatives, at any time thereafter (even though a previous motion to the same effect has been disagreed to) to move to proceed to the immediate consideration of either such joint resolution. The motion is highly privileged in the House and privileged in the Senate and is not debatable. An amendment to the motion is not in order.

"(3) Debate on a joint resolution shall be limited to not more than two hours (except that when one House has debated the joint resolution of that House, the companion joint resolution of the other House shall not be debatable), which shall be divided in the House of Representatives equally between those favoring and those opposing the resolution and which shall be divided in the Senate equally between, and controlled by, the majority leader and the minority leader, or their designees. A motion further to limit debate is not in order. An amendment to, or motion to recommit, the joint resolution is not in order. A motion to reconsider shall be in order only on the day on which occurs the vote on adoption of the joint resolution, and shall not be debatable. Any other motions shall be decided without debate.

"(k) If a joint resolution has been ordered reported or discharged from the committee of the House to which it was referred, and that House receives a joint resolution with respect to the same rule from the other House, the resolution of disapproval of the other House shall be placed on the appropriate calendar of the first House. If, prior to the disposition of a joint resolution of one House, that House receives a joint resolution with respect to the same rule from the other House, the vote in the first House shall occur on the joint resolution of the other House.

"(l) For purposes of this section—

"(1) The term 'appropriate committee' means either the Committee on Energy and Commerce of the House of Representatives or the Committee on Commerce, Science, and Transportation of the Senate, as the case may be.

"(2) The term 'rule' means any rule promulgated by the Commission pursuant to this Act, other than any rule promulgated under section 18(a)(1)(A) of this Act and any interpretive or procedural rule.

"(3) The term 'joint resolution' means a joint resolution the matter after the resolving clause of which is as follows: 'That the Senate and the House of Representatives disapprove the rule entitled————, transmitted to the Congress by the Federal Trade Commission on————, 19—.', the blank spaces being filled with the appropriate title of the rule and the date of transmittal of the rule to the Congress, respectively.".

(b) The amendment made by subsection (a) of this section shall be effective on the date of enactment of this Act, except that any rule promulgated by the Federal Trade Commission after June 23, 1983 and before such date of enactment shall be transmitted by the Federal Trade Commission on the date of enactment of this Act to the Secretary of the Senate and the Clerk of the House of Representatives, in accordance with subsection (a)(1) of section 24 of the Federal Trade Commission Act, as added by subsection (a) of this section. Any such rule shall have no force and effect except in accordance with such section 24.●

SYNTHETIC FUELS

● Mr. HATCH. Mr. President, Senator GARN and I are delighted to endorse the measure introduced by Senator DOMENICI, S. 1396, particularly insofar as it would promote development of this country's vast synthetic fuels resources. Because Utah holds vast reserves of coal, oil shale, and tar sands, we have long been aware of the potential these resources have for alleviating our national energy problems. We are equally aware of the tremendous difficulties associated with bringing them into production.

Incentives provided by Congress over the last decade have prompted scientists and engineers in our corporations and universities to develop and—in some cases—perfect recovery technology. At the beginning of 1980 it appeared as though we were on the verge of a major synthetic fuels boom. This boom never materialized, and judging from the number of recently abandoned projects, perhaps it never will. Why?

Have we solved the energy problem? No. Are we still vulnerable to the vicissitudes of foreign supplies? Yes. Is our technology base inadequate? No. Then, why?

A major share of the answer lies in the worldwide economic recession, with the reduced demand for energy supplies among industrialized nations. But part of the answer also lies in the inconstancy of our Government's energy policy. The truth of the matter is that a temporary glut in oil supplies has become a pretext for abandoning a prudent long-term energy policy that was years in the making.

The legislation we are considering helps remedy this situation in two important ways of particular significance to Utah. First, it extends the affirmative commitment for synthetic fuels projects which allows investors in these risky but vital ventures to recover a portion of their investment in tax savings. Second, it extends the energy investment tax credit to tar sands property—a correction of an oversight by Congress 6 years ago. Since it now appears that several tar sands projects are close to commercial production, this additional investment incentive is critical.

Data supplied to our offices by one of the companies involved in these projects indicate that revenues lost to the Treasury in the form of credits will be made up more than tenfold by taxes and royalties recovered during the construction and initial operating stages. More important, a new sector of basic industry with both national and global significance will have been born. Perhaps, for once, we will be ready for the next energy crisis before it is upon us. We sincerely hope so. The last decade has shown us that a synfuels industry cannot be achieved over night regardless of circumstances or how badly it is needed.

Senator GARN and I commend Senator DOMENICI and Senator WALLOP for their foresight and diligence in advancing this legislation.●

GENERAL HUGH ROBINSON

● Mr. PRYOR. Mr. President, last Friday, July 29, Maj. Gen. Hugh Robinson, Southwest Division Engineer for the U.S. Army Corps of Engineers, retired from active service in ceremonies at Dallas, Tex. In his last command with the Army, General Robinson was in charge of five engineer districts, including the Little Rock district. It was in this capacity and in relation to his work in Arkansas that I came to know General Robinson.

General Robinson is one of those truly extraordinary individuals whose

leadership abilities brought him to the forefront of his peer group at an early stage of his career and sustained him through the remarkable heights he attained. I am sure that the training he received at the U.S. Military Academy nurtured a talent and drive that was already his. General Robinson was unique among military men in his understanding of the sometimes delicate relationships between the military and civilian communities. In my opinion General Robinson would have been successful in comparable degrees in any career he might have chosen, and our Nation must be glad that he chose to serve his country.

The friendships that Hugh Robinson developed in Arkansas during his last tour of duty will remain lasting and will serve him well in the future. I can assure him of that. I personally feel that Hugh Robinson had a lot more to contribute to this Nation and I regret that he chose to terminate his active duty status at this time. His new duties with the Southland Corp. will, no doubt, enable him to continue to compete and contribute in new and innovative ways. I wish him well in all of his future endeavors.●

THE MEANING OF FREEDOM

(By request of Mr. BAKER, the following statement was ordered to be printed in the RECORD:)

● Mr. GOLDWATER. Mr. President, over the past several weeks, Senator BAKER and others of my distinguished colleagues have aired their views on the legislative process as it functions now. All of us who read our constitutent mail and who talk with the folks back home, know that there is increasing dissatisfaction about the way we operate. Unfortunately, one of the biggest problems we have is that we often legislate in the duress of a special interest group instead of in the national interest. This particular phenomenon has given rise to what George Will calls "iron triangles." In a speech prepared for the 10th Annual Sol Feinstone Lecture at West Point, Will characterized these iron triangles as the "three-sided relationship that exists between the congressional committee that authorizes a particular program, the executive bureaucracy that administers that program, and the client group in the country that benefits from it." George Will goes on to develop a very strong case that this particular type of legislating is robbing us of our most precious heritage—freedom. Mr. President, because this speech is so appropos to what we are doing here, I ask that the entire speech be printed in the RECORD, and I hope that my colleagues will read and benefit from the lessons in Mr. Will's speech.

The speech follows:

THE MEANING OF FREEDOM

(By George F. Will)

I have had essentially two careers. My current profession is as a journalist, commenting on the day's news. My training is as a political philosopher. I want to try, with your indulgence, to combine these two pursuits; to briefly survey the political climate of this country in the 1980s; and then to say what I think is alarming about it and why I think it derives from a difficult, ambiguous, and perhaps wrong idea of freedom—a four-century-old error now that represents a kind of wrong-turning in the American, and indeed the Western, tradition of political philosophy. Which is to say, I'm going to be mildly depressing. That's all right; I subscribe to the Ohio-in-1895 theory of history, so named by me for the little known fact that in Ohio in 1895 there were just two automobiles, and they collided.

I have a strong sense that things go wrong in America because of certain wrong ideas about freedom and the political order and what we owe to our society. This country is increasingly at the mercy of hostile forces and increasingly finding it difficult to defend itself. I believe that we have for too long subscribed to the belief that freedom is the absence of restraints imposed by others. And I believe that a natural corollary to that erroneous belief is the erroneous belief that government exists simply to facilitate, to the maximum extent possible, the unrestrained enjoyment of private appetites. This is a political philosophy flowing directly from a concept of freedom that I take to be, in the long run, disastrous; and to the extent that our country is founded on it, our country is ill-founded. I shall come to that gloomy conclusion, and perhaps an optimistic coda, a few pages hence.

Let me begin by telling you where we are and then try to relate where we are, in our political and economic argument, to what, indeed, I take to be our philosophic roots.

The place to begin to understand the political climate of the 1980s is with the only recent political benchmark, the 1980 presidential election. The Republicans, after they won that election, set about doing what the winner of every election does systematically and aggressively, which is to misconstrue the results, to wring from the results an alleged mandate to do precisely what the person winning wanted to do anyway. In this case, the winners said that the 1980 election was that most unusual of American experiences: a positive, forward-looking affirmation of the winner's political philosophy. I see no evidence in any of the election analysis to confirm that. It seems to me reasonably clear that it was a classic, normal American election, which is to say that someone lost it, not that someone won it; indeed, the 1980 national election was a repudiation of its immediate predecessor. And if you look at the results, it wasn't as astonishing as most people thought. It was the case, I believe, that the President's margin of victory, although substantial, was only the ninth largest margin of victory in this century. Further, although the Republicans won substantial Senate gains (12 seats), Democratic candidates to the Senate won more votes in 1980 because, while Republicans were winning close victories in small states, Glenn in Ohio and Cranston in California, for example were winning tremendous victories for the Democratic Party.

My point is simply that the mood of the American people was divided and remains divided today. It is in this division that we see the root of the structural, systemic, political problems in this country: a problem in defining and, because of the problem in defining, a problem in defending freedom.

In the last two years, we have seen the divisions in the American mind writ large. We have, I think, learned three important lessons. The first is that the American people talk a very different (you might say, a very much more conservative) game than they are prepared to have their government play. The second lesson is that the American middle class, the broad mass of the country, which is the articulate, organized, intense complainer about big government, is incomparably the biggest beneficiary of big government and is determined to use all its wiles and guiles to remain so. And the third lesson of the last two years—the most amusing to some and the most alarming to others—is that the conservative agenda for the United States costs more money than the liberal agenda.

Let me go over these briefly to set the stage for how we got to this peculiar argument about our politics.

When Ronald Reagan won the presidency, people said that his victory marked the end of an era. Ronald Reagan was going to melt, or so the theory was, the iron triangles that have dominated our politics in Washington, lo these many years. By "iron triangle" I mean the three-sided relationship that exists between the congressional committee that authorizes a particular program, the executive bureaucracy that administers that program, and the client group in the country that benefits from it. There are 10,000 iron triangles in this interest-group-brokered liberalism we practice in Washington.

It is, indeed, the nature of our politics, of our political philosophy, to justify organizing into private groups to bend public power to private purposes. I have often said that if you want to understand the American government, do not read the Constitution; that has precious little to do with it. Read instead the Washington telephone directory, and especially those pages that carry the listings "National Association of . . ." There you will find some of the 2200 trade associations and other lobbies that are, after government and then publishing in all its forms, the third largest employer group in Washington. You know the big ones: the National Association of Manufacturers, the National Association of Broadcasters. You may not have heard of the National Crushed Stone Association, or the National Ice Association or the National Truck Stop Association. Every interest group, every economic group in the country, is organized to bend the public power to its purposes.

And, indeed, why not? Listen as we go through an election year: There is one word you will hear over and over again—"responsive." Candidate after candidate pledges that he or she will be a "responsive" officeholder. It is my thesis that what ails our government is that it is "responsive" to a fault, that it has a hair trigger to every organized and intense interest group, that it is big but not strong. It does not have the internal strength to say "no."

A few years ago, Burger King ran a television commercial in which Burger King's claim to fame was that at Burger King, unlike at McDonald's, they would take the pickle off your hamburger if you didn't want it. They had a jingle that went, "Hold the pickle, hold the lettuce. Special orders don't upset us. . . . Get it your way at Burger King." Government is a giant Burger King. Everyone comes to place his

order and, to the extent possible, the brokered government simply delivers favors.

This is not, by the way, a partisan observation. The Republicans are just as guilty as the Democrats. Indeed, the clearest example of this degradation of the democratic dogma, this purely responsive government, is the doctrine of democracy that leaves no room for leadership. Leadership, after all, has been called the ability to inflict pain and get away with it (short-term pain for long-term gain, it is hoped). Leadership is getting people to do something they'd rather not do at the moment. It surely is the job of government to have a longer view than the average individual has, to get people to look to the future and provide for the national strength.

When Gerry Ford became President, he conducted a press conference at which he was asked if he favored a stiff tax on a gallon of gasoline as a form of price rationing to dampen demand. His answer was, and it was exactly, this: "Today I saw a poll that shows that eighty-one percent of the American people do not want to pay more for a gallon of gasoline. Therefore," said the President, "I am on solid ground in opposing it." Well, all ground seems solid when your ear is to it; and, as Churchill said, "It is very difficult to look up to someone in that position."

But it is increasingly the philosophic position of the democracies that democracy exists to do nothing more than read the latest polls and act accordingly.

Well, how do you do that if you're looking at the divided opinion of the American electorate today, the American people who complain bitterly about big government? The American electorate is comprised of people, one in seven of whom is a Social Security recipient, Social Security being incomparably the biggest component of big government, and incomparably the most sacrosanct. One in six Americans who work off the farm works for government. And 48 or 49 percent of America's families this year will receive some form or other of transfer payment from the government about which they merrily complain, the day long.

The President says we must get government off the backs of the American people. Who does he think put it there? It was put there by legislators, elected and reelected. The Congress of the United States passed 3,500 laws in the decade of the seventies. That's nearly one law a day, seven days a week, for ten years. It couldn't happen, of course, if Congress had a simple rule that said you cannot vote for a bill you have not read. But the state legislatures, which are ostensibly more responsive to the real desires of the American public, are worse. The state legislature of New York passed 9,500 laws in one decade. The 50 state legislatures combined passed a quarter of a million.

They are not doing so because the legislators, who are professional politicians, get up in the morning and say, "How today can I be obnoxious to my voters?" They are doing it because the American people have a voracious appetite for public services. They also have a negligible willingness to pay for them which accounts for our inflationary bias. Indeed, someone has said that today's conservatism is, in many cases, the prayerful belief that it is time to cut thy neighbor's subsidy.

Of course, the great American middle class is the primary beneficiary of this largess, not surprisingly. Most Americans are in the middle class; most benefits go to the middle class. This explains why, once Congress got done cutting means-tested welfare programs last year, the will to cut further evaporated.

Now we come to the most alarming note of all for conservatives, namely, that their agenda for the country costs more than the liberal agenda, because it begins by accepting 95 percent of the liberal agenda: most of Social Security, most of Medicare, Medicaid, and Food Stamps. The arguments we've been having with such great fanfare and rolling of drums in Washington is about the very margins of the modern welfare state.

Ronald Reagan and the Republican Party were perceived as accepting the basic American consensus for the welfare state, a consensus that has been growing steadily since 1932. For 50 years now the American government has grown at a constant pace in a constant direction under both parties. If Ronald Reagan and the Republicans had not been seen as accepting this growth, Reagan would have lost, not won, 44 states. On top of everything else, the Republicans are adding, or trying to add (and the question is very much open), $1.5 trillion for national defense, $8 billion for new prisons, and a $5 billion revenue loss for tuition tax credits. As Everett Dirksen once said, "A billion here, a billion there, it adds up to real money." And it is adding up very fast.

We see in the United States today a kind of despair, a kind of cultural and political despair about the inability of the American people to, on the one hand, cut the demands they make on government or, on the other, pay the taxes necessary to pay the bills for the services they manifestly demand politically.

Where then does this leave us? It leaves us in a crisis. We, like all other Western, developed industrial democracies, have built an enormous welfare state. We have come to a consensus, which I think is by and large correct, that it is humane and, in many cases, efficient to purchase a number of things collectively: some pensions, some medical care, some housing. In the great postwar period of economic growth, our economy was strong, and the going was easy, and the growth came fast, and the gusher of revenues to the government at constant tax rates made building a welfare state effortless. In that great 25-year period roughly between 1948, the beginning of the Marshall Plan, and 1973, the Yom Kippur War and the consequent revolution in energy prices and the slowdown of growth throughout the industrial world, we made a whole series of promises to ourselves—promises of entitlements that constitute claims on the future wealth of this country, promises made on the assumption that the economic growth of those 25 years was the norm for the foreseeable future. But that was an economic growth we have not seen since and do not know today how to restore.

As we enter the middle 1980s, then, the American political system is being asked to do something it has no experience in doing, something no one went into politics to do, no one knows how to do, and no one wants to learn. And that is to break promises or to raise taxes, to break promises or to impose pain and get away with it. We have a uniquely difficult time now in the 1980s. We are being asked not to think as individuals but to think collectively, not to think as isolated, self-interested people but to think as citizens, something we have rarely been required to do in the past, as a reading of those pages in the Washington telephone directory will tell you. Generally, Americans relate to their government as individual or organized claimants. Now we are being asked to think about giving back, or enduring pain.

There is one other thing that illustrates the divided mind of the American people today. As we enter the middle of this decade, the peculiarity of politics is that rarely in America has there been such a clear consensus for one overriding public goal. That goal is a balanced budget. The goal is clear, and there is no intellectual mystery about how to achieve it. If you want to balance the budget, do the following four things: end the deductibility for tax purposes of mortgage interest payments; tax entitlement programs as income; lower the indexing of entitlement programs; and tax employer-paid health insurance as compensation. With these steps you would more than balance the budget. At any given time there are only 537 people in Washington because they were elected; and if we did these four things, we would end the careers of 537 politicians—because, loudly though the American people clamor for a balanced budget, they will reject every one of the four measures just suggested that together would bring about what they say they desire. We have for the past 50 years had a government devoted to inflaming appetite and facilitating consumption to the point at which we now have a deeply underfunded economy; naturally, consuming too much, we save too little. Having lost the habit of deferring gratifications, we have lost the habit of thrift and investment. The American people today are saving five percent of their disposable income—approximately half of what the Germans are saving, approximately a third of what the Japanese are saving. We have been living for a long time off the seed corn of our future, and now we are beginning to pay for it.

How did we become an improvident people? The answer, I think, like the answer to all great questions of human life, is an idea. History is the history of the human mind. And our problem is deeply rooted in a doctrine of what government is for, and that doctrine derives from a concept of freedom that I think is mistaken.

We have today a government that is, as few governments ever have been, omnipresent and omniprovident. And, as the government has become more and more solicitous, it has become less and less respected—a great paradox of modern life. Never has government tried harder to do more; never has it been less respected.

In this regard, conservatives have talked themselves into a terrible dilemma. On the one hand, they preach the doctrine that the government is too clumsy and too stupid, too venal and too poorly motivated, to do anything much to help, say, Cleveland. But, the next moment, the conservatives turn around and say to the country, "Give us $1.5 trillion for national defense and give us your young men and women." Now a government that is too incompetent to help Cleveland cannot make those kinds of claims on the American people.

How did we get to this incoherence about the point of government? It is in the history of our political philosophy that we must seek the answer. The history of Western political philosophy divides, not altogether neatly but reasonably neatly, into two periods, the ancient and the modern—the modern period beginning and turning, really, with Machiavelli and Hobbes. And between the ancient and the modern doctrines, one thing stands out; a different definition of natural right and of freedom.

To the ancient, the idea of freedom was this: A person is free when he lives as human beings are supposed to live, when he lives as is appropriate for this kind of creature, when he lives in the way that is by nature right. There were certain patterns of noble behavior. And it was the duty of government, as ancients understood it, to so draw the laws to shape the citizens so that they could, in the end, be worthy of the good society. The basic doctrine of ancient political philosophy was that men and women are biological facts. But ladies and gentlemen suited for free government are social artifacts, creatures of the law—difficult to bring about.

This was the controlling doctrine of Western political philosophy from its inception in Plato to the Renaissance. It obviously is a doctrine of politics as a branch of education. Indeed, the book that launched Western political philosophy, Plato's "Republic," is a book about education.

Then, with Machiavelli and Hobbes, something changed, Machiavelli lived in the tumult, the constant, angry civil strife of Italy, populated by warring city-states. Hobbes lived in the decay of Tudor institutions in England, a civil war looming and sometimes raging. To these two men, the political problem was different. It was order. "Stop being so ambitious," they said. "Don't try to make men more noble. Look at them square and look at them whole. Take them as they are and make them behave. That is the only political problem. Do not—repeat, do not—try to improve them. Indeed, if you look at man," they said, "he is a simple, not very noble creature." And the very simplicity of man—the fact that, if left alone, mankind is under the sway of a few simple strong passions—makes him very easy to control. Hobbes said that man is under the sovereign mastery of pain and pleasure. He's afraid of death, and he desires fame and security. Fine. Give him that, and he will behave. Others said that people are inherently self-interested: "Give them a commercial country. Subsume all human passions in getting and giving and gaining. We shall have a commercial republic in which all the energies that have hitherto made political societies tumultuous will be channeled into commerce. It's not noble. It's not pretty, but it solves the political problem. After all," they said, "natural right is not living as it is naturally appropriate for man. Natural right shall henceforth be defined as a right to those things toward which our strongest passions incline us."

Generally, it was a revolution of self-interestedness. Mankind was to be viewed as a self-interested animal—not attractive, not noble, but manageable. And so we got modern political philosophy. And we came to the founding of the first modern nation, the first militantly, proudly, self-consciously modern nation, the United States. We came to the revolution in democratic theory, wrought by the most creative political philosopher we have produced, James Madison.

Before the United States was founded, all political philosophers had agreed about one thing: If democracy is possible, it is only possible in a small, face-to-face society—Pericles' Athens or Rousseau's Geneva. For when you have a large society, you have factions, and factions are the enemy of democracy. Madison took that theory, turned it on its head, and turned it inside out. He said, "Not true; the more factions the better." Madison said that we must have an extensive republic.

You can state the Founding Fathers' political philosophy in a kind of catechism: What is the great problem in politics? The answer is tyranny. To what tyranny is a democracy prey? The tyranny of the majority. How do you prevent that? By not having any majorities. By having only minorities. So that any majority at any given time will be just a shifting, unstable coalition of minorities, constantly changing kaleidoscopically.

Therefore, we must expand the country, not have a small democracy but a huge one. When the Founding Fathers met in Philadelphia, however, this was a country of only 3 million free souls, and eighty percent of them lived within 20 miles of tidewater, strung out along the fringe of an unexplored continent. But what did they call the congress that they convened in Philadelphia? They called it the Continental Congress. That is chutzpah.

They called it the Continental Congress because they knew where they were going. Roughly, they were going to California, but, basically, they were going west. They were going to have a huge democracy filled with factions because, that way, they would avoid a tyrannical majority.

So it came to pass that James Madison—in what I take to be the two great documents on American political thought, Federalist Papers 10 and 51—pointed the way. In Paper 10, he said that we must have the saving multiplicity of factions. And in Federalist Paper 51, in a sentence crucial to the thrust of his thought, he said, "We see throughout our system the process of supplying, by opposite and rival interests, the defect of better motives."

This was a country founded, to a remarkable and, I increasingly find, an alarming extent, on the expectation that no one would operate from public-spirited motives. Everyone would operate from factional motives. But, because there would be so many factions pursuing their self-interest, and the government would be restricted to simply an umpire's role keeping the competition and the factionalism peaceful, there would be no tyrannical majority.

Well, I think it works. If all the country has to worry about is the absence of a tyrannical domestic majority, then it works. And, at that point, when we were surrounded by protective oceans, months away from Europe, instead of 30 minutes away from Moscow by missile, that might have been an adequate philosophy of freedom and an adequate conception of government. It is, I suggest, no longer so, because what we have is the need, increasingly, to have better motives.

It is perfectly understandable why the 18th century fell for this particular doctrine of philosophy. The 18th century discovered astronomy. The 18th century, in a sense, discovered modern physics, too, and fell in love with both subjects. The heavens at that time looked like a marvelous clockwork of orderly planets. We now know from better telescopes and other instruments that there is a lot of wobbling and banging about among the planets, and it's not so tidy as it appears. But it looked then as though the universe itself was run by a benevolent clockmakergod, and that the same principle could be applied to politics.

Hence, the doctrine of separation of powers. Hence, the checks-and-balances system of the American government. Rival institutions with rival interests would be held in equipoise, just like the solar system—all parties acting self-interestedly but holding one another apart in preempting tyranny.

And so we came, in this country, to define the public interest as whatever results from this maelstrom of private interests. One might call it the Cuisinart theory of government: You just stir things up, and out comes a kind of puree, something to be called, by semantic fiat, "the public interest."

Well, it's not that simple. It's not that effortless. It leaves you, as I've said, with a doctrine of merely responsive government. And, if I am right in my definition of leadership as the ability to inflict pain and get away with it, it leaves you, technically, disarmed. It leaves you unable to have even a doctrine of, let alone the fact of, leadership.

It leaves us with a country with enormous disintegrative forces. It leaves us with those pages in the Washington telephone directory. It leaves us with brokered government. It leaves us with brokered government. It leaves us a society given over to the instant satisfaction of demands. It leaves us with a society incapable of deferring gratifications. It give us, for that reason, an economy perennially underinvesting, an economy consuming more money than it is generating in revenues, and an economy about to produce, in the middle of this decade, a serious turning, I believe, on the defense budget.

This last point is so, I think, because when a country is asked to pay for its national security, it is being asked to look to the future. It is being asked to think collectively. And we have no habit of that, we have no history of that, and we decreasingly have an ability to do that, because we have no public philosophy that tells us to do that.

After all, we are a country in which we see, throughout our system, a process of supplying, by opposite and rival interests, a "defect of better motives." And we are in a decade when, preeminently, we need good motives.

Well, what, then, are we to do about it? To me it seems clear that in order to defend freedom in the late 20th century, we need to define it correctly. We need to go back from whence we came. We need to go back to Greece and Rome. We need to go back to the understanding that freedom is not just the absence of restraints imposed by others. Someone operating in the absence of restraints can be governed by passion, can be enslaved by appetite.

Consider those words. They are not careless metaphor. They are the language of politics: "governed" by passion, "enslaved" by appetite. We are not free when we are unable, either individually or collectively, to control our passional, appetitive side.

To that end, the redefining of freedom, I suggest there is a place to which we can turn—the beginning. If you've taken a wrong turn early in the road, you wind up very far from where you want to be, and you have to go back. I would suggest that we go back to Socrates. In "The Crito", one of "The Dialogues," Socrates is about to die. He has been sentenced to death by Athens for corrupting the youth. Whether or not he did so, I shall not dwell upon here. He has been duly tried and sentenced, and some of his friends come to him and say, "We will help you escape; it has been an unjust trial; it is an unjust law. You're innocent. We will get you out. You will not have to drink the hemlock and die." And Socrates says, "No, I shall not leave. Because I would thus be untrue to my parents. Because," he says, "the laws of Athens are my parents. They shaped my parents who made me. They brought my parents together in matrimony, they sustain the family, they sustain life.

The laws of the community make us. We do not make the community."

That is Socrates' view of the world. What is ours? Ours is captured in the idea of a social contract. That concept is the fiction behind modern politics: that we came together one day as a people and decided it served our individual interests to contract to set up a society. Historically the idea of a social contract is quite preposterous, but it continues to be an analytic metaphor expressing the doctrine of modern politics, and doctrine of self-interest.

Well, now I ask you to justify conscription. I ask you to justify having any army to defend a social contract. No one risks his or her life to defend a contract that he or she entered into voluntarily simply for convenience. If all our institutions and all our laws represent nothing more than the momentary calculation of convenience by disparate, self-interested individuals, then they are not only undefended, they are, in a way, indefensible.

We need a longer view of the social order. We need what the Greeks had, what Socrates had, what Western political philosophy had until we made a wrong turn about 400 years ago. We need a sense that we are bound and obligated to our society because we are not free without laws. We are not free without the restraints imposed on us by the law. We are not free, we are unformed. We are governed by passion and enslaved by appetite until we become not just men and women, but gentlemen and ladies; not just biological facts, but social artifacts.

Amplification of this idea was provided by Abraham Lincoln. Lincoln took on the great topic of freedom: To what extent is the law of a community legitimately concerned with the inner life of man?

The reason we had a civil war can be perhaps best articulated by reference to a single episode: Lincoln was debating Stephen Douglas for a Senate seat in 1858 in Illinois. Lincoln, of course, would lose. Douglas, at one point, said, "What we should do about the question of slavery in the territories [whether Kansas and Nebraska should be free states or slave territory] is let them vote. Put it to the test. Let them decide what it is in their interest to do." And Lincoln said, "No, there are limits." He said, "There are limits to the sway of self-interest." He said, "Stephen Douglas is preaching the doctrine that there is no test of right or wrong but self-interest."

And on that issue, this republic nearly foundered in the middle of the last century. And on the subject of the primacy of the doctrine of self-interest, it can again be threatened and, indeed, can founder.

In a speech at the Wisconsin state fair at approximately the same time, Lincoln told a story. He said there was an oriental despot who summoned together his wise men and challenged them to invent a sentence to be carved in stone, to be forever in view, and to be always true. The wise men went away and came back after a while and said, "We've got the sentence." It was: "This, too, shall pass away." And Lincoln, on the eve of the Civil War, when it was very possible that the American experiment in democracy would pass away, went on to say, "If we attend to the cultivation of not only the physical world around us, but of the moral world around us, we can endure." To adopt another phrase of his, it was the duty of government not just to minister to self-interestedness, but to summon, as he said, "the better angels of our nature."

It is the purpose of government not just to tantalize self-interest, but to call people above it. This was an echo, in our 16th President, of the ancient political philosophy and the ancient political vision to which I think we need to recur. That, I think, is the challenge for everyone in the United States who understands that leadership is about sacrifice.

Obviously, the good society is a society that allows an enormous range of private freedom. I'm not questioning that. Obviously, the good society has an enormous sphere in which we are not told what to do. But that sphere is not without limits. This is not a popular message. And I know all the arguments. It is said, for example, that the sale of pornography should be viewed as a private transaction; the law should treat it as a private transaction between an individual buyer and an individual seller. Indeed, the law can so treat it, but the law cannot make the results, which include Times Square and a billion-dollar pornography industry, a private phenomenon. That's public. That has to do with the quality of our lives.

Abortion is an issue on which honorable men and women of good will disagree. The law can treat an abortion as a private transaction between an individual and her doctor. The law can treat it that way, but nothing can make 1.7 million abortions a year a private phenomenon. That's a public phenomenon that has to do with the way we live, the way we treat sexuality, and life, and relations between the sexes.

We are, like it or not, involved in our laws, in shaping our own inner lives. Statecraft is, inevitably, soulcraft. The question is whether it will be good soulcraft or bad soulcraft. My point is that the doctrine of self-interestedness is self-fulfilling. Treat people as being purely self-interested and, sooner or later, you get people capable of nothing higher.

We need to recur, as Lincoln did, to a grander rhetoric, to the politics of exhorting people and, indeed, to laws—conscription being, I believe, one of them—that stipulate and embody the principle that we, like Socrates, are the creatures of our laws, and, as they give us life and character and freedom and restraints and virtues, so too we have a debt to pay back.●

ENDANGERED SPECIES

● Mr. GLENN. Mr. President, one need not reach far back into history to recall examples of injustice and inhumanity. The past reminds us that minorities in various countries may be made scapegoats and targets for cruelty—and this cruelty has made up a tragic part of the Jewish legacy, often taking the terrible shape of anti-Semitism. Today, it is deplorable that anti-Semitism and injustice still exist around the world: In parts of Central America, in various Arab countries, and in the Soviet Union Jews constitute an endangered species.

In the U.S.S.R., anti-Semitism may be traced from Alexander III's policies through Stalin's campaign to destroy Jewish culture to present Soviet policies of harassment. And today, the Soviet Jew faces a new crisis: Emigration is virtually at a standstill. In 1979, Jewish emigration reached a high-point of 51,320. In 1982, the number plummeted to 2,688. This year, a mere 637 Soviet Jews have been allowed to emigrate. We now look upon a Soviet Union that allowed more Jews to leave in the single month of February 1979, than in the past 12 months.

As disturbing as these numbers are, it is even more unsettling to learn of the hardships facing those Soviet Jews who simply apply for exit visas. Their first step is to acquire an invitation from first degree relatives—immediate family members—living outside the U.S.S.R. But often contacts with hopeful relatives are made impossible. Mail stops and phone lines are severed. Applicants are routinely threatened and dismissed from work. Their families become social outcasts and their children are abused and assaulted in school. Many are arrested, imprisoned or exiled. Soviet officials, in addition, frequently fabricate catagories and charges—insufficient kinship or "possession of state secrets" are reasons listed in application denials. Most recently, in direct violation of the Helsinki accords, the U.S.S.R. has informed many Jews that they will accept no further applications.

Many Jewish members of the Soviet intelligensia applying for exit visas have not only been denied, but have been stripped of academic degrees—as if such action might erase vast knowledge and wisdom. It is even becoming increasingly difficult for Soviet Jews to attain quality educations. They are systematically refused access to top universities despite equal or superior qualifications.

And the teaching of Jewish culture has been made nearly impossible. The Soviet Union has the third largest Jewish population of any nation, but it is a country unwilling to permit open Jewish worship or the recognition and enjoyment of Hebrew culture. Of the 60 synagogues in the Soviet Union, only 3 are known to have rabbis. Small group study is prohibited. Even kindergarten classes teaching the Hebrew alphabet have been subjected to KGB threats.

Mr. President, we must recognize the vicious turn that Soviet policy has taken. In April of this year, the Government organized an official anti-Zionist committee to renounce Zionism, hasten forced assimilation and foster anti-Semitism. The committee claims that all the Jews wishing to leave the Soviet Union have done so, and they maintain that any proof to illustrate otherwise is the juggling of figures by Zionist propaganda. But such representation is clearly contrary to the facts. All Members of Congress are aware of the hundreds of thousands of Soviet Jews who wish to emigrate and are frustrated in their efforts. The more notable names—Shcharansky, Sakharov, Begin, Brailovsky, Nudel, Wallenberg—represent untold more who have suffered and yearn to be free. As many as 380,000 of the nearly

2 million Soviet Jews reportedly wish to emigrate. And today, there are 16 Jewish activists serving prison sentences; 2 currently await trial. Their only crime is the belief that Jewish dignity and identity must—at all costs—be maintained.

Under the guise of anti-Zionism, anti-Semitic articles have increased in the Soviet press in an attempt to cut through the very fiber of the Jewish culture. The most outlandish attempt to break the will and spirit of the Jewish people purports that Soviet Jews collaborated with the Nazis during World War II. And such propaganda invokes chilling analogies—these are indeed ominous forces at work in the Soviet Union.

The Soviets, Mr. President, now appear to believe they are somehow punishing the United States for its hard-line policies. Moscow maintains Washington's tough-talk rhetoric has seriously harmed United States-Soviet relations. And in reaction to the current East-West chill, the Soviets have frozen shut the emigration door. Today, I believe we must make the Soviet Union understand we will never forget the Soviet Jew. We must make them understand that a relaxation of emigration restrictions will immediately bolster United States-Soviet relations. And we must, in addition, never unnecessarily escalate tensions with our principal adversary—for such escalation affects the very lives of those forcibly contained within Soviet borders.

It is time for the Soviets to end their use of Jews as political pawns and to respect their rights as human beings. It is time for the Soviets to treat the Helsinki accords as something more than a political thermometer. And it is time for the Soviet Union to look inside itself and recognize the injustice and inhumanity within its own society.

Mr. President, as I mentioned earlier, this injustice and anti-Semitism also exists in other parts of the world. Many Jews living as tiny minorities in certain Arab countries share an underlying fear of the future and live quietly among shadows of the past. Their fears spring from memories of religious discrimination in traditional Yemen, from the persecution of Jews by revolutionary regimes in Iraq and Syria, and from the outbreak of anti-Jewish violence in countries such as Morocco and Tunisia. Of the nearly 800,000 Jews living in the Arab world in 1947, only 35,000 remain today. And numbers continue to decline as Jews living as minorities in certain countries continue to suffer.

In Syria, the entire Jewish population of 4,500 is currently prohibited from emigrating. In the past, Jews caught trying to flee the country were sentenced to prison under unbearable conditions—if successful, the escapee's relatives were often tortured. Every aspect of Jewish life was controlled by the Syrian Government. In 1976, as a result of international protests, many of the worst excesses of Jewish mistreatment were curbed. Yet today, the Jew in Syria is still harshly discriminated against.

In Iraq, the 2,700-year-old Jewish community has endured perhaps the worst discrimination since the Nazis came to power in Germany. Persecution was at its worst in the late 1960's, when secret trials, torture, and hangings were commonplace. Today, improvement is negligible—the only bright spot for Iraq's 300 Jews is that international pressure eventually convinced the Government to quietly allow some 2,500 fellow Jews to emigrate in the early 1970's, even while other restrictions remained in place.

And we must remember that this discrimination is not only found in some parts of the Arab world. Current PLO policy in Latin America and Africa, for example, not only seeks to encourage violence and upheaval, but attempts to spread falsehoods and propaganda concerning Jews. In Nicaragua, there are reports that almost the entire small Jewish community has been terrorized and frightened into exile. Nuevo Diaro, a newspaper that often reflects the policies of the Sandinista government, has been filled with anti-Semitic propaganda—an article published a year ago referred to "synagogues of Satan." The Nicaraguan Government, and others in the region, repeatedly ignore the rights of minorities and crush the concept of religious freedom.

Mr. President, it is a sad fact that the Jew today suffers many of the hardships and injustices he has endured for thousands of years. Around the world, this sad legacy of the Jewish past must be interrupted. Anti-Semitism must be extinguished. And we must continue to stand up for the principles of human rights and religious freedom by which this Nation was created.●

PHARMACY CRIME PROBLEM WORSENS

● Mr. JEPSEN. Mr. President, the Philadelphia College of Pharmacy and Science recently completed a study on the occurrence of pharmacy crime. This study was made possible by a grant from the National Association of Chain Drug Stores. To my knowledge, this is the most comprehensive survey ever conducted and I must say, the findings are alarming.

The study was conducted by sending a mail questionnaire to 2,000 randomly selected community pharmacies located throughout the United States. Responses were received from pharmacies located in urban, suburban, and rural locations. For this reason, I think the study represents a good cross section of the pharmacy community.

The researchers discovered that almost 50 percent of all pharmacies, regardless of where they were located, had been the target of either a burglary or a robbery. I would point out, Mr. President, that the survey covered only the last 5 years. I would fully expect that if we asked the same questions but covered the past 10 years, we would find that even more pharmacists had been either burglarized or robbed.

One other fact from the survey I should like to bring out, because I believe it is something that is often overlooked, is the actions taken by pharmacists themselves to reduce the number and severity of these crimes. Perhaps the most disturbing trend is the decision by pharmacists to discontinue stocking of controlled substances. Last month, Mr. President, I placed an article in the RECORD which talked about the plight of many cancer patients who find it difficult to obtain the pain-killing drugs they need to live at home.

I do not blame pharmacists for taking this drastic step. I am sure they believe it is the only thing they can do. We in Congress must recognize the seriousness of this problem and act to correct this situation.

For over 4 years, I have been working to get pharmacy robbery legislation enacted by Congress. Although my colleagues in the Senate have been very supportive of these efforts, final passage has always run into one roadblock after another. I want my colleagues to understand that I will not back down from my quest for enactment of pharmacy robbery legislation.

Mr. President, I ask that an article appearing in American Druggist magazine entitled "Pharmacy Crime Problem Worsens, New Study Finds" appear in the RECORD at the conclusion of my remarks. This article lays out the actual statistics found by the researchers and does an excellent job of explaining the relevancy of some of these statistics.

The article follows:

PHARMACY CRIME PROBLEM WORSENS, NEW STUDY FINDS

This article was written by three faculty members of the Philadelphia College of Pharmacy & Science: Maven J. Myers, J.D., Ph.D., professor of pharmacy administration and associate dean for pharmacy; and assistant professors of pharmacy administration Larry D. Grieshaber, Ph.D., and David B. Brushwood, J.D. Their work was made possible by a grant from NACDS.

There is no doubt that crime is one of the major concerns of today's community pharmacy practitioner. Contemporary pharmacy publications contain numerous reports of crimes against pharmacies, pharmacists, and pharmacy employees. Both the property and safety of pharmacists are in jeopardy in today's high crime environment.

Within their communities, pharmacists have been vocal in expressing their concern, and national pharmacy leaders are fighting for stiffer penalties to be imposed against perpetrators. There is, however, surprisingly little data available which substantiate the magnitude of pharmacy crime and which describe the nature and severity of these incidents.

The best data available come from statewide studies of pharmacy crime. State boards of pharmacy occasionally include crime-related questions on their licensure renewal applications. In 1977, Joseph L. Fink III and Maven J. Myers published the results of a study of pharmacy crime in Pennsylvania. A similar study of Mississippi was conducted and reported by Helen Wetherbee and Dewey Garner in 1979. In 1977, the National Association of Retail Druggists conducted an informal national survey. In recognition of the importance of having a comprehensive national data base on the occurrence of pharmacy crime, the Philadelphia College of Pharmacy and Science was awarded a grant by the National Association of Chain Drug Stores to do a national study of this problem. The preliminary data from this study are presented here.

SCOPE

The study was conducted by sending a mail questionnaire in March, 1983 to a systematic random sample of 2,000 community pharmacies. Responses were received from 641 (32 percent of the sample. Pharmacies in urban, suburban and rural locations replied. Table 1 shows a location breakdown of respondent pharmacies.

Pharmacists were asked to indicate whether their pharmacies had been the target of a burglary or robbery in the five year period beginning January 1, 1978. Table 1 indicates that over 45 percent of pharmacies in all locational categories (47 percent overall) had been the target of at least one burglary or robbery. It should be noted that in this study, the ubiquitous problem of shoplifting was not classified as a pharmacy crime.

TABLE 1.—LOCATIONAL ANALYSIS OF SURVEY RESPONDENTS

Type of area	Number of respondents	Percent of total respondents	Number of respondents reporting one or more crimes	Percent of respondents in category
Urban	228	35.6	114	50.0
Suburban	242	37.7	115	47.5
Rural	150	23.4	68	45.3
Location not reported	21	3.3	9	42.8
Total	641	100.0	306	47.7

There is an interesting statistic to be noted in the locational breakdown: In the minds of many people, high crime rates and urban settings go hand in hand. However, the percentage (50.0 percent) of urban pharmacies reporting the occurence of a crime is only slightly higher than the percentage of (45.3 percent) of rural pharmacies reporting such occurance. The problem of pharmacy crime is apparently universal; no pharmacy is risk-free.

INCIDENCE

Respondents reported the incidence of robbery and burglary they experienced from 1978 to 1982 inclusive. for purposes of this study, robbery was defined as the taking of property from a person or in his presence by means of force (*i.e.*, while the pharmacy was open). A burglary was defined as breaking and entering while the premises were unoccupied (*i.e.* while the store was closed).

Table 2 summarizes the data on the incidence of robberies and burglaries. It comes as no surprise that the total number of robberies and burglaries (both completed and attempted) has steadily increased over the years in question. In only one category (attempted robbery) was the incidence relatively unchanged over the years.

TABLE 2.—TYPE OF CRIME REPORTED BY YEAR OF OCCURRENCE

Year of occurrence	Attempted burglary	Burglary	Attempted robbery	Robbery	Total crime incidents in the year
1978	8	38	1	16	63
1979	9	45	2	22	78
1980	15	54	5	25	99
1981	10	57	3	34	104
1982	15	72	3	35	125
Year not reported	6	29	2	10	47
Total	63	295	16	142	516

CRIMINALS

For the victim of a crime, the criminal act is the beginning of an odyssey through the criminal justice system. The victim works with law enforcement personnel (which may involve many hours over the days, weeks, and even months following the crime) to help in the apprehension of the criminal. If the criminal is apprehended, then the victim is required to spend additional time with the judicial process as prosecutors seek to secure a conviction. Table 3 indicates that apprehension and conviction rates are disappointingly low. Only about one in four burglars who successfully burglarize a pharmacy are apprehended. Of those who are apprehended, 65 percent are convicted. Only 16 percent of those who successfully burglarize a pharmacy are eventually convicted. These odds are certainly in the criminal's favor.

Pharmacy robbers appear to be slightly less successful. Forty percent of robbers are apprehended. Fewer than a quarter of those who rob pharmacies are eventually convicted. Of course, robbery tends to be a riskier crime because there are witnesses, there is frequently a shorter getaway time, and some victims are uncooperative with the robber. In any case, the would-be pharmacy burglar or robber is more likely successfully to complete and get away with his/her crime than not.

PREVENTION

Pharmacists are not passively sitting back and accepting the rising crime rate. They have taken many different measures to combat or prevent the problem. These measures are summarized in Table 4. As the percentage tabulation shows, many pharmacists have increased their security measures in more than one way.

TABLE 3.—APPREHENSION AND CONVICTION RATES OF PHARMACY CRIMINALS

[In percent]

	Attempted burglary (n=63)	Burglary (n=295)	Attempted robbery (n=16)	Robbery (n=142)
Perpetrators apprehended	38.1	25.4	37.5	40.1
Perpetrators convicted	15.9	16.6	37.5	24.6

TABLE 4.—STEPS PHARMACISTS HAVE TAKEN TO DETER DRUG-RELATED CRIMES

	Number reporting	Percentage of respondents (n=641)
Installed silent alarm	295	46.0
Discontinued stocking some controlled drugs	262	40.9
Installed audible alarm	233	36.3
Installed stronger locks	190	29.6
Installed bars on doors and/or windows	138	21.5
Now keep a gun in the pharmacy	81	12.6
Shortened hours	73	11.4
Now screen employees more carefully	62	9.7
Installed better safe	42	6.6
Discontinued after-hours emergency service	35	5.5
Installed closed circuit TV	29	4.5
Hired security guards	28	4.4
Hired more employees	15	2.3
Other	58	9.0

The traditional forms of prevention (alarms, locks, bars on entry points) are well represented in the responses. There are, of course, limits to how much these measures may reasonably be improved. Once these preventives have been installed, they may be updated. However, there comes a point at which the amount of protection provided by these devices is outweighed by their cost. It is difficult to cost-justify Fort Knox-like security in the community pharmacy. When these devices fail to deter crime, pharmacists must institute less traditional measures.

One of the most striking findings of this survey is the extent to which community pharmacies are no longer stocking some controlled drugs that are the targets of drug-related burglaries or robberies. Over 40 percent of respondents reported reducing their inventory of these items. This finding has serious implications for the drug distribution system. How can patients who legitimately require these drug products gain access to them if community pharmacists refuse to carry them? How can society expect pharmacists to stock these products when its law enforcement and criminal justice systems have failed to make it reasonably safe to do so? These questions raise ethical and public policy issues that must be addressed by the profession and by agencies of public policy establishment.

The increasing abandonment of after-hours emergency service is a similar issue.

In spite of repeated warnings against doing so by law enforcement professionals, a significant number of pharmacists are seeking protection by arming themselves with guns in their pharmacies.

It can only be reiterated that doing so puts the inexperienced (and/or frightened) gunman-pharmacist at serious risk during a robbery.

It also increases the chances of injury to innocent bystanders. Anyone who considers arming himself should carefully consider these disadvantages.

IMPACT

The findings of the study underscore the magnitude of the pharmacy crime problem and indicate it is continuing to grow rapidly. The data also suggest that in spite of attempts by pharmacists to protect themselves, the crime problem is becoming increasingly worse.

This may be because criminals are likely to succeed in their robbery or burglary attempts and will probably not be convicted of their crimes.

These disheartening statistics suggest several systemwide steps that need to be pursued.

First, pharmacists must continue to work among themselves and with law enforcement personnel to find more effective ways to prevent the occurrence of drug-related crime.

Second, the problem needs to be attacked at its point of origin; i.e., substance abuse programs need to be strengthened to decrease the number of addicts and thus the street value of many controlled drugs.

Finally, the law enforcement and criminal justice systems need to be more effective so that those penalities that do exist will have a chance to function as deterrents.

WHAT SURVEY FOUND ABOUT CRIME

Rural pharmacies are hit with surprising frequency.

Apprehension and conviction of criminals continue low.

Robberies, burglaries rise.

More RPh's eliminate controlled drugs from inventory.

Drug stores beef up security.

RPh's arm themselves with guns.●

THE GOOD SAMARITAN VOLUNTEER MILEAGE BILL

● Mr. ARMSTRONG. Mr. President, is the Government making volunteerism a luxury that few Americans can afford?

This question was posed at a congressional hearing and struck with lightning bolt force. Lightning then struck twice when the answer came back loud and clear: Yes, Government policy does discourage volunteerism.

I have introduced Good Samaritan legislation to reverse this policy.

The facts are indisputable. Though social needs are greater than ever, fewer and fewer Americans are financially able to deliver meals to shut-ins, visit the sick, take scouts on camping trips, drive a cancer-stricken child to daily treatments, or help conduct the local Special Olympics.

This decline is at least partly the fault of Federal tax policy which prevents proper reimbursement for volunteer costs. Although costs of owning and operating a car exceed 24 cents a mile, volunteers can deduct from their taxes only 9 cents for each volunteer mile driven, or about one-third of the actual costs.

The result? Americans no longer just volunteer; they have to pay to volunteer.

The Good Samaritan Volunteer Mileage bill I have just introduced will correct this problem. It is simple. Volunteers would be able to deduct the same mileage costs as businessmen and Government workers, who use cars in their work: 20 cents a mile.

The justice of this bill is clear. Consider the following cases: A State volunteer director attends a weeklong volunteer covention in Hawaii. As long as most of the day is spent in volunteer meetings, the trip—airfare, meals, lodging, sightseeing, and so forth—is fully deductible. When the director returns, and resumes work driving about the State coordinating volunteer activities, only 9 cents a mile is deductible.

A Salvation Army volunteer who comforts the sick can deduct only 9 cents a mile for driving to the hospital. Yet a salesman calling on that same hospital to sell medical supplies not only earns a salary but deducts 20 cents a mile from his Federal tax return.

A Red Cross volunteer reporting to a disaster shelter during a flood is allowed by the Federal Government to deduct ony 9 cents a mile to get there. Yet a paid employee of the Federal Emergency Management Agency is reimbursed 20 cents a mile to drive to the same shelter.

Or consider neighbors who band together to establish neighborhood citizen watches to patrol their streets. They can deduct only 9 cents a mile, but a security guard hired to patrol the same neighborhood can deduct 20 cents a mile.

Or consider the chairman of the Denver chapter of the American Red Cross who each year drives more than 2,300 volunteer miles. Though he is allowed a deduction of only 9 cents a mile, the actual cost for owning and running his car exceeds 25 cents per mile.

More than 92 million Americans volunteer their time, services, skills, and cars to help the needy, the victims of natural disasters, the homeless, the sick, the imprisoned, the homebound. The total value of these services exceed $64 billion, according to the Gallup Organization.

These volunteers are essential to our national well-being. Without them, there is a real question about whether our less fortunate could even survive. Neighbors helping neighbors is an American tradition; it is something that the Federal Government should encourage, not tax.

But voluntarism is becoming a luxury that too few Americans can no longer afford because Federal policy is horribly out of date.

The volunteer mileage deduction became law in 1958. Then the deduction was 7 cents a mile, gasoline sold for 29 cents a gallon, and oil was 15 cents a quart. Today, gasoline costs upward of $1.29, and oil exceeds a $1 a quart—increase of more than 300 percent and 500 percent.

And what can volunteers deduct for their mileage?

Only 9 cents a mile, just a 28-percent increase in 25 years.

It is no surprise, then, that volunteer leaders report their frustration in trying to recruit and retain volunteers and their cars:

The Junior League of Denver reports a sharp drop in school volunteers, especially low-income urban areas where mothers must drive crosstown to reach their children's schools.

The director of the Colorado Office of Volunteerism reports that three seniors programs are threatened because the low mileage deduction allowed by the IRS makes it impossible for seniors to fit volunteer work and expense into their budgets.

The District of Columbia Retired Senior Volunteer program reports that "volunteers are unable to continue volunteering as a result of high costs of driving their car."

Contact, a youth community communications hotline in Syracuse, N.Y., reports increasing resistance from volunteers to requests for participation in workshops away from volunteers' homes.

Montgomery County, Md., reports a dramatic decrease in willingness of volunteers to provide cars to deliver services. It is so serious the country is considering loaning county cars to volunteers, at considerable expense to the county.

These and other case histories underscore why this legislation is urgently needed. High gasoline costs and the refusal of the Federal Government to allow volunteers an adequate deduction for mileage costs in computing their Federal income taxes jeopardize the quality—and in some cases, the very existence—of many vital volunteer programs.

Congress should not want responsibility for the decline in volunteerism.

To help the spirit of volunteerism to prosper, I urge quick enactment of the Good Samaritan Volunteer Mileage bill.

Mr. President, I have recently chaired hearings on this Good Samaritan legislation. The testimony by the Junior League, American Legion, and Volunteer: The National Center for Citizen Involvement, was thoughtful and compelling. I urge my colleagues to spend a few minutes and read their remarks, which I ask to be printed at this point in the RECORD.

The material follows:

TESTIMONY IN SUPPORT OF S. 1167 AND S. 1579—VOLUNTEER MILEAGE EQUITY LEGISLATION

Thank you, Mr. Chairman and members of the subcommittee, for this opportunity to testify on the very important topic of mileage equity for volunteer drivers. I am John Chromy, a volunteer myself, and a member of the board of directors of Volunteer: The National Center for Citizen Involvement.

Volunteer is the only national voluntary organization that exists for the sole purpose of encouraging the more effective involvement of all citizens in community problem-solving. We serve as a national advocate for volunteering and work to improve the effectiveness of volunteer management skills by providing a variety of information-sharing, training and technical assistance services to local, community-based volunteer groups.

Volunteer maintains a close working relationship with the over 300 local Volunteer Centers and Volunteer Clearinghouses that place more than 250,000 new volunteers in community agencies each year. We serve an

additional 6,000 local, state and national organizations through our Associates program and our magazine and we provide training and information services to over 10,000 volunteer leaders annually.

I am here today, Mr. Chairman, on behalf of our chairman, Governor George Romney, who sends his regrets at not being with you as you address this important issue. Governor Romney feels very strongly about the unique contributions of volunteers in our society and about the need to provide those volunteers with continuing incentives, as well as with the recognition they so rightly deserve.

On behalf of Governor Romney, the entire board of Volunteer and 92 million American volunteers, I strongly urge the passage of legislation to equalize the tax deductions for volunteer drivers. This legislation would relieve a portion of an increasing financial burden which is being shouldered by volunteer drivers and would provide a visible means for our government, the Congress and our society to recognize the enormous contributions of the volunteers who so willingly serve this country.

The volunteer community—those individuals who give their time and energy to help meet our country's needs—is broad and far-reaching. A 1981 Gallup survey highlighted the amazing fact that over half of the adults and half of the teenagers in this country are volunteers. These volunteers are from every social, economic, ethnic, age, cultural and religious group in our country. There are 92 million American volunteers. They work in hospitals, libraries, day care centers, nursing homes and neighborhood organizations. They serve on boards of directors and on community councils. They staff our fire departments and our ambulance services. They council troubled youth, work with 4H-ers and train young athletes.

They raise the funds that fight cancer, combat birth defects and battle heart disease. They are always there to stack the sandbags, staff the shelters and rescue the stranded during floods, fires and other disasters. They work with their local churches and support the arts in their communities. They fight for the rights of others. They feed the elderly, help the disabled and transport the injured. They supply needed services and work for the benefit of others and the communities in which they live. Volunteers give in excess of 11 billion hours of service each year, service which has been valued at a record-high of $64.5 billion annually.

Hundreds of thousands of miles are driven each year by these volunteers. Although there are no national surveys on the use of personal automobiles for volunteer work, local statistics speak for themselves. A study coordinated by the Volunteer Bureau in Montgomery County, Maryland estimated that volunteers had driven over 800,000 miles in one year. In Minnesota, a Board on Aging survey of transportation programs for seniors revealed that over three million miles were driven by their volunteers in that great state.

Maryland Lung Association estimates that their board of directors alone drive over 36,000 miles each year to support a program which does so much to fight lung diseases. In Dallas, Texas, volunteer Big Brothers and Big Sisters drove in excess of 250,000 miles in 1982 to support troubled boys and girls in that city. The American Red Cross has estimated that individual Red Cross volunteers across the country are driving from between 2,000 and 12,000 miles each year while providing the assistance that our medical services, our disaster services and, indeed, our military services could not do without.

The director of the District of Columbia Retired Senior Volunteer Program, a part of a national network of over 200,000 volunteers, recently told us that many of their volunteers are unable to continue volunteering as a result of the high costs of driving their cars. This problem is further complicated since many senior volunteers share rides to volunteer assignments. Many other volunteers feel similar economic strains. Fortunately, many of them just dig deeper into their pockets and continue their service, but many volunteers may not be able to continue.

The value of volunteer time cannot be expressed in figures and statistics alone. Why do Americans volunteer? They volunteer partly because it's an American tradition. Indeed, it is the way in which our country was founded, developed and built into the great nation it is today. Americans also volunteer because they are a fundamentally generous, helpful and caring people. They also volunteer because they have been asked, because they are needed and because they know that others care about what they do. But, most of all, they volunteer because they know that it is right to do so!

Stop for a moment, Mr. Chairman, and consider where our nation would be without its volunteers—the elderly shut-in waiting for a hot meal that would never come, the scout troops that would never take another camping trip, the child with leukemia who would never get to her cancer treatment center, or the accident victim who might never receive his emergency medical treatment. Our world would be a much different place than it is now, Mr. Chairman. In fact, if volunteers ever stopped caring and giving, American life as we know it would cease to exist.

Sydney Harris, the syndicated columnist for the Chicago Sun Times described the contributions of the American volunteer when he participated in the 1981 National Forum on Volunteerism. He said, "one of the sectors has money, one has power and we have people. . . . The money and the power can't do much without the people. . . ."

We have recognized that the contributions made by our nation's volunteers are invaluable, Mr. Chairman. We have gladly accepted the hours of service they have given and acknowledged the many miles they have driven in providing those services. And, yet, the federal government has chosen to place a lower value on those contributions than they do on those made by the paid worker. While the paid government social worker is allowed to claim 20¢ per mile for driving to a hospital to visit a sick patient, a volunteer is only allowed to deduct 9¢ per mile for making that same visit. The medical supply salesman who uses his car in the course of his work is allowed to deduct 20¢ per mile, but his neighbor will only be allowed to deduct 9¢ per mile for transporting cancer patients to and from their treatment centers.

The Treasury Department has estimated a revenue loss of $100 million if this legislation were to pass. Compare this figure with the enormous value of the contributions of our nation's volunteers. Do these contributions mean less to our country than those of its paid workers? The symbolic implication of this inequity is hard to explain to the 92 million Americans who give their time and energy for others and for their communities. In addition, let me remind you that the current dollar value of volunteer activity in this country is $64.5 billion. I think you will agree, Mr. Chairman, that these facts, when combined with the potential for increased volunteer activity, make the revenue loss seem relatively small indeed.

The United States government has a long-standing tradition of encouraging charitable giving through its tax laws. The enactment of the recent charitable contributions legislation has made current deductions available to all taxpayers. As a result, passage of volunteer mileage equity legislation is now even more important since it affects volunteers at every economic level. We would stress, Mr. Chairman, that government leaders have increasingly turned to the volunteer community to provide needed services. It is a contradiction that this same government does not encourage and support these activities with its tax laws.

The American Automobile Association has released recent figures that estimate the cost of operating an automobile at 23.8¢ per mile. Although lower than in previous years, we would emphasize that this cost is nearly 4¢ per mile more than the current rates allowed to business and government drivers and 15¢ per mile higher than the current rates allowed volunteer drivers.

There is no justification for this inequitable treatment. Volunteers play a unique role in our country. Their contributions can be measured in dollars and in the economic, social and ideological well-being of our society. Volunteer commends the efforts of Senators Armstrong and Durenberger and of Congresswoman Mikulski to equalize the mileage tax deduction allowed volunteers. This is a necessary step to ensure equity toward the value of the work performed by all our citizens. It will encourage our volunteers to continue the very important service they perform. And, in addition, it will provide recognition for the special contributions of America's volunteers. It will show that the President, the Congress and all of American society also cares about the work of these special people. This legislation, like the service of our volunteers, is not only needed and important, it is right and just! Thank you.

STATEMENT OF JOSEPH E. MILLER, JR., ASSISTANT DIRECTOR, NATIONAL LEGISLATIVE COMMISSION, THE AMERICAN LEGION

Mr. Chairman and Members of the Subcommittee on Taxation and Debt Management, The American Legion is pleased to appear before you today to present its views in support of S. 1167 and S. 1579, proposed legislation that would amend the Internal Revenue Code of 1954 to increase the volunteer mileage deduction to the same level enjoyed by persons engaged in using privately owned vehicles (POV) for business and government activities. The American Legion, perhaps the nation's largest volunteer organization, strongly encourages the enactment of the proposals of Senator Durenberger and Senator Armstrong to correct an inequity in the treatment of volunteers who use their POV's for volunteer related activities.

Since the birth of our organization on March 17, 1919, The American Legion has been actively involved in this country's volunteer efforts. In fact, one of the primary goals of our initial meeting was to create, "a fraternity dedicated to the equitable treatment of all veterans, particularly the disabled, their widows and orphans". Six

months later, meeting in St. Louis, The American Legion finalized its preamble which concluded with the mission "to consecrate and sanctify our comradeship by our devotion to *mutual helpfulness*" (italics added).

Since those early days, The American Legion has expanded its volunteer activities to include athletic events (like Special Olympics), scholarship funds, blood donor programs and a multitude of community based volunteer activities too numerous to cite here. To illustrate our involvement, we would like to ask that several documents which explain Legion programs and activities be included for the record. In addition, we would like to submit for the record a copy of the 1982 Consolidated Posts Report indicating the degree of involvement of American Legion Posts in volunteer programs and activities at the community level. Today, there are 58 Departments and more than 16,000 American Legion Posts in this country and overseas. In addition, there are nearly 12,000 American Legion Auxiliary Units worldwide. Together, the Legion and its Auxiliary represent more than 3.6 million members who serve their communities and fellow Americans without pay. Our membership looks to the federal government to recognize their contributions and services and for equitable treatment. National Volunteer Week is but one way the government had recognized the achievement of volunteers. Many of our members also depend on the volunteer mileage tax deduction to deduction to defray a portion of the cost of providing their services to charitable activities.

The deduction volunteers take for miles driven is not compensation. Rather, it is to help offset the expense of operating an automibile which is being used to conduct volunteer activities. More importantly, however, it is the individuals who are helped by the Legion's, as well as other volunteer organization programs who are the real beneficiaries of the volunteer mileage tax deductions, for without an adequate reimbursement, the programs aiding Americans in need might be greatly curtailed.

Presently, an inequity exists that threatens to deny beneficiaries those services that they desperately need. To illustrate the burden facing the volunteer driver today we would like to submit copies of two letters received by the Legion's Legislative Division. The inequity that we are referring to is between the allowable mileage rate tax deduction which can be taken by persons driving for business and the deduction which can be taken by those persons who use their automobiles to conduct charitable activities. Mr. Chairman, the correction of this inequity is long overdue. Given the state of the economy and the ever increasing reliance on volunteers to conduct programs once supported by federal revenues, the perpetuation of a dual reimbursement rate can no longer be supported by arguments of cost to Federal Treasury, enforceability or that the current mileage rate is adequate to cover the incremental costs directly attributable to the rendering of charitable services.

In April of 1982 this Subcommittee was presented with a table showing the anticipated revenue loss from a bill, S. 473, that like S. 1167, was introduced by Senator Durenberger. The Treasury estimated that the loss in federal revenues for FY 82 at $7 million; for FY 83 at $55 million; for FY 84 at $102 million; for FY 85 at $115 million; for FY 86 at $135 million and for FY 87 at $159 million. A total of $573 million in lost revenues from FY 82 through FY 87. Please notice that the anticipated loss for FY 82 to FY 83 increased by $48 million with a loss increase from FY 83 to FY 84 of $47 million. But, the loss increase from FY 84 to FY 85 is only $13 million and for the FY 86, $20 million and FY 87 the loss increase was projected at $24 million.

Clearly, something dramatic would have to be at work in order to account for these increases which gradually level out in Fiscal Years 84 through 87. There are several possibilities for the dramatic increases during the early fiscal years as shown by the Treasury's chart. First, there could be a substantial increase in the use of POV's for charitable purposes. Second, there could be a substantial increase in the use of POV's for charitable purposes and a corresponding increase in the number of individuals claiming the charitable mileage deduction. And third, the number of charitable miles driven annually might remain constant and thus the increased allowance will simply reflect the added cost per mile allowed as well as an increased number of people claiming the deduction. But, even the maximum anticipated revenue loss of $159 million during FY 87 would represent an investment of less than two one-hundredths of one percent of the total federal expenditures for that year, based on current out year projections.

Assuming that the third possibility is representative of what will actually occur, then we are left with the perplexing problem of explaining the mammoth increases projected by the Treasury for FY 83, a rate which is double the projected increases for each of the remaining out years. Since, even nonitemizers are now permitted to claim a deduction for charitable mileage, the increase can not be attributed solely to an increase in the number of people claiming exemptions, unless there is a corresponding increase in the number of miles driven on behalf of charitable activities. If there is a corresponding increase in the number of miles driven on behalf of charitable activities then S. 1167 and S. 1579 will have been successful in increasing the level of private sector volunteer participation which, in turn, will further decrease the demand for federal revenues. More importantly, however, is the added support to America's communities and citizens in need that the enactment of S. 1167 and S. 1579 will help to bring forth.

Another argument that has been advanced in opposition to the increase in the volunteer mileage deduction is that "of the difficulty in identifying and quantifying the amount of indirect costs in operating POV's for charitable purposes that are properly attributable to the charitable endeavors". The problem with this argument, as we see it, is that it assumes a difficulty that would not, in fact, be present since the volunteer mileage rate deduction would be tied to the business/federal employee mileage deduction rate. Further, the terms identification and quantification imply some sort of rule making requirement on the part of the Treasury that would be difficult to develop. Yet, no such regulations would be necessary. Indeed, S. 1167 and S. 1579 will simplify the regulatory burden of the Treasury Department because there will be one rate and one formula to determine that rate. Likewise, arguments regarding "enforceability" are groundless unless it can be shown that volunteers are somewhat less honest than persons taking business related deductions for private automobile use. We doubt that such is the case since a 1981 survey by the Gallup Organization indicates that approximately 84 million Americans, 52 percent of the adult population, typically donate some part of their time as volunteers.

Moreover, arguments which argue current law, as opposed to arguments which examine the merits of the proposed change, are not really arguments but rather statements in support of the maintenance of the status quo. But, the status quo is currently sending the wrong message to volunteers. The current mileage deduction differential between business/government and volunteers is telling the men and women who support community based volunteer programs that their services are not as valuable as the services of business and government employees. Yet, the Gallup study referred to earlier revealed that the estimated value of goods and services attributable to non-profit organizations during 1981 was nearly $64 billion. In 1980 another survey, by a different organization, estimated the value of non-profit services and products at $45 billion. The magnitude of this increase, $20 billion in one year brings the contribution of the non-profit community into proper focus. Volunteers and volunteer organizations have not been content with maintaining the status quo, indeed, they are actively seeking to increase their commitments to America's needy. But they need help.

Clearly, Mr. Chairman, non-profit organizations through the use of volunteers, including the Legion, have responded to the President's call for increased assistance to Americans in need from the private sector.

But, Mr. Chairman, let's look for a moment at the maintenance of the status quo. In 1957, the year prior to the institution of the volunteer mileage tax deduction, the average cost of a gallon of gasoline in the United States was $.309, and the allowable tax deduction was $.07 per mile. During 1983 the average cost of a gallon of gasoline has been $1.27 and the allowable tax deduction is $.09 per mile.

Looking at these figures in another way, we see that during the last 25 years the allowable deduction for charitable POV use has increased by 28.6 percent. While, during the same period, motor fuel has increased by 241 percent. Likewise, in 1957, the allowable deduction represented 22.7 percent of the cost of a gallon of gasoline but by 1983 the allowable deduction represented only 7 percent of the cost of a gallon of gasoline. For today's driver to maintain parity with the volunteer driver of 1958, in terms of percentage of cost, he would need an allowable deduction of $.28 a mile.

But, Mr. Chairman, the volunteer community is not asking that the volunteer mileage deduction be raised to $.28 a mile. Instead, the volunteer community is only asking for parity with persons who, today, use their automobiles for govenment and commercial purposes. We believe that this is not only a fair request, but a responsible request as well.

TESTIMONY OF THE ASSOCIATION OF JUNIOR LEAGUES, INC. BEFORE THE SUBCOMMITTEE ON TAXATION AND DEBT MANAGEMENT OF THE SENATE COMMITTEE ON FINANCE IN SUPPORT OF S. 1579 AND S. 1167

SUMMARY

The Association of Junior Leagues urges the Subcommittee on Taxation and Debt Management of the Senate Committee on Finance to support S. 1579 and S. 1167, legislation which would allow volunteers to

take the same mileage deduction as businessmen or set the mileage deduction for volunteers at the rate allowed government employees as reimbursement when they use their vehicles for government business.

The Association's testimony is supported by the Independent Sector and the United Way of America.

I. The association

A. International women's voluntary organization.

B. 243 Junior Leagues; 148,000 individual members in the United States.

C. Promotes the solution of community problems through voluntary citizen involvement, and trains Junior League members to be effective voluntary participants in their communities.

II. Volunteer mileage deduction should be computed on the same basis as reimbursement granted government employees

A. Volunteers such as Junior League members contribute many hours to a wide range of valuable community projects, often traveling long distances to their volunteer assignments. The low mileage deduction allowed to volunteers is especially detrimental to the elderly—many of whom wish to volunteer but are living on a fixed income which restricts their financial activities.

B. The high costs of operating a car and the Internal Revenue Service's refusal to allow volunteers an adequate deduction for mileage costs have forced many volunteers to reduce their volunteer commitment, thus jeopardizing the existence of vital community projects.

C. Denying volunteers the same mileage deduction as that granted businessmen or the mileage reimbursement rate allowed government employees indicates that government does not consider volunteers' services to be of equal value to those provided by paid employees.

D. It is especially important at this time of federal funding cutbacks that government policies encourage, not discourage volunteer work.

I am Sandra Crawford, of Gladwyne, Pennsylvania, chairman of the Association of Junior League's Public Policy Committee and a past president of the Junior League of Philadelphia. I appreciate this opportunity to appear before you today to express the Association's strong support for S. 1579, sponsored by Senator William Armstrong (R-CO), and S. 1167, sponsored by Senator David Durenberger (R-MN), legislation which would recognize the contributions of volunteers by allowing volunteers to take the same mileage deduction as that allowed businessmen or setting the mileage deduction for volunteers at the rate allowed government employees as reimbursement when they use their vehicles for government business. We supported similar legislation in the last two sessions of Congress. We are here today to reaffirm our support of this legislation because it reflects the Association's belief in the importance of volunteer work and acknowledges the rising costs incurred by volunteers in providing their services. I also am submitting for the record letters from two other major voluntary organizations, Independent Sector and the United Way of America, in support of the Association's statement.

Junior League volunteers

The Association of Junior Leagues is an international voluntary organization with 243 member leagues in the United States, representing approximately 148,000 individual members. Junior Leagues promote the solution of community problems through voluntary citizen involvement and train their members to be effective voluntary participants in their communities. Every active Junior League member must make a commitment to a volunteer position. In addition, Junior Leagues develop projects and raise funds for community programs. During 1981–82, Junior Leagues sponsored 1,740 projects in their communities and netted more than $14 million from various benefits and ongoing money raisers such as thrift shops, cookbooks, auctions, and sponsorship of cultural and sporting events.

The money raised by these Junior League fundraisers is used to support projects in the community such as services to children and their families, adolescents, the aged and populations experiencing special problems, e.g., drug abusers, alcoholics and battered women, as well as programs concerned with the arts, urban conservation and the protection of the environment. These programs are made possible by Junior League volunteers who often drive long distances to their volunteer jobs.

In larger metropolitan areas, it is not uncommon for a Junior League member to make a 50-mile round trip to her volunteer assignment. However, Junior Leagues, like many other volunteer organizations, are finding that their members are increasingly reluctant to make firm commitments to regular volunteer placements which are many miles from their homes. High gasoline costs and the refusal of the Internal Revenue Service to allow volunteers an adequate deduction for mileage costs in computing their federal income taxes jeopardize the quality and, in some cases, the very existence of many vital programs. Faced with the high cost of driving, a volunteer may cut her involvement with a program from once or twice a week to once every two weeks or even once a month. This could harm programs such as Meals on Wheels or tutoring programs which require brief but frequent time commitments.

In fact, the difficulty in recruiting and keeping volunteers for the Meals on Wheels programs served as the catalyst for passage of Colorado's volunteer mileage deduction legislation. When the Junior League of Denver sought a sponsor for the legislation in 1981, it turned to State Representative Eunice Fine, a Republican from Greeley, Colorado, whose blind mother receives deliveries from Meals on Wheels. At that time, the Meals on Wheels program in Greeley was having difficulty recruiting volunteers because of the cost of driving and the low mileage deduction allowed volunteers. Representative Fine could not travel to Denver to attend sessions of the legislature unless her mother, who lives alone in Greeley, received her meals. Knowing firsthand the importance of the volunteer mileage deduction, Representative Fine agreed to sponsor the legislation. The decline in the number of drivers for Meals on Wheels also was a factor in the decision of the Volunteer Bureau of Des Moines, assisted by the Junior League of Des Moines, to launch its successful campaign for passage of state volunteer mileage deduction legislation in 1981. Junior Leagues in Arkansas, North Carolina and Maryland also supported the passage of volunteer mileage legislation in their states. The Junior League of Portland, Oregon, and the National Council of Jewish Women organized support for volunteer mileage deduction legislation in Oregon, but the bill was not reported out of committee.

Volunteers should receive equal consideration

The mileage deduction allowed volunteers is based on what the Internal Revenue Service considers out-of-pocket expenses, i.e., gasoline and oil. The mileage deduction allowed businessmen and the reimbursement rate granted government employees, however, are based on the computation of the average costs of depreciation, maintenance, repairs, tires, gasoline and its related taxes, motor oil, insurance and registration fees. Currently, businessmen are allowed a deduction of 20 cents per mile, and government employees are allowed reimbursement at the rate of 20.5 cents per mile. Volunteers, however, are only allowed to deduct nine cents per mile.

We believe that the volunteer mileage deduction should be computed on the same basis as that used for computing the deduction allowed businessmen or the reimbursement rate granted government employees. However, the Department of the Treasury refuses to do this because it considers volunteers' automobiles primarily personal vehicles and refuses to allow consideration of a proportionate share of general maintenance, general repairs, depreciation or fixed costs, such as insurance or registration fees, in computing the volunteer mileage deduction. Yet, we want to emphasize that gasoline and oil costs alone are not the sole cost of driving . . . even for the volunteer who already has a car.

The federal government's refusal to allow volunteers the same mileage deduction as that granted businessmen not only is a failure to focus on the actual costs of operating a car such as wear and tear on the tires, engine and exhaust system; it also indicates that the government does not consider the services of volunteers to be of equal value to society as those provided by paid employees. Furthermore, we believe the government's refusal to grant volunteers the same mileage deduction as that allowed businessmen is totally inconsistent with the Administration's stated policy of encouraging voluntarism.

Some justify the IRS position by pointing out that government officials and businessmen pay taxes on the salaries they earn while using their cars. However, volunteers make an equally important contribution to society: they provide their time without pay to those persons and institutions most in need. Discouraging volunteer work with such policies as refusing to increase the volunteer mileage deduction will only lead to increased costs for the public sector if it is forced to assume services now provided by unpaid volunteers. It is especially important at this time of massive cutbacks in federal funding for social services, the arts and education that volunteers be encouraged, not discouraged, to provide their valuable services.

It is true that increasing the volunteer mileage deduction would take away some revenue from the federal budget. The Association's response to this argument is that the cost of the volunteer mileage deduction is far outweighed by the value of the contributed time. Last year, for instance, the members of the Junior League of Minneapolis contributed 203,000 volunteer hours. At the minimum wage, this contribution was worth $682,500—certainly a great deal more than the amount of tax revenues that would be lost because of the volunteer mileage deduction.

High costs of operating a car

Although the price of gasoline has dropped in recent months, the rate set for the volunteer mileage deduction by the IRS is still lower than the estimates of operating costs provided by the American Automobile Association (AAA). The AAA estimates the operating costs to be 25.9 cents per mile for a six-cylinder standard car which is driven 15,000 or more miles per year. The cost per mile rises if the car is driven less—as many cars are. For example, the cost per mile for the same car would be 34.5 cents per mile if it is driven 10,000 miles a year.

Use of automobile

We also question the government assumption that all cars used for business or government purposes are solely business vehicles. Persons with part-time jobs may have purchased their cars well before becoming employed, yet all their business driving is calculated at the higher mileage deduction rate allowed businessmen or the reimbursement rate allowed government employees.

Furthermore, the Internal Revenue Service's policy regarding the volunteer mileage deduction discriminates against the volunteer who is not employed outside the home—housewives or retired persons of both sexes. Elderly persons on fixed incomes are especially adversely affected by the nine cent volunteer mileage deduction. The director of the Colorado Office of Voluntarism, which operates under the aegis of the governor's office, reports that the activities most directly affected by the refusal of the IRS to raise the volunteer mileage deduction are the Senior Volunteer, Foster Grandparent and Senior Companion programs. Many of the participants in these programs are eager to volunteer, giving of their time to assist others provides them with a sense of accomplishment and a meaningful way of using their empty hours. However, the low mileage deduction often makes it impossible for them to accommodate volunteering into their limited budgets. We know, from the Association's experience with Volunteers Intervening for Equity (VIE), a national project that organized and trained older volunteers for community service, that retired persons make effective, caring volunteers. In turn, volunteering gives them a sense of accomplishment and being needed by their communities.

The experience in Colorado with the volunteer mileage deduction also highlights the need for the deduction among all volunteer groups. Colorado's legislation is restricted to those volunteering in health, nutrition or medical endeavors. These volunteers are allowed to deduct an additional 11 cents per mile from their Colorado state income tax. The Office of Volunteers in Colorado reports that the volunteer campground groups, which act as hosts at the state parks, are having difficulty in recruiting volunteers. Prospective volunteers for the campground programs hesitate to pledge their time because of the high cost of traveling long distances coupled with the fact that the state mileage deduction is not available to them.

The Junior League of Denver also cites an adverse effect on volunteers in education. There has been a drop in school volunteers, especially in low-income areas and in urban areas such as Denver where mothers must drive across town to reach their children's schools. Today's high cost of living makes it necessary for many parents of young children to live on very tight budgets which allow little room for the costs of volunteering. It is important to recognize that there are additional expenses unrelated to driving connected with volunteering, such as child care, meals and telephone calls. The cumulative effect of these costs serves as a disincentive to voluntarism. This could be partially modified by the legislation being considered here today.

Last year, when we appeared before this committee, we cited a question posed by the Junior League of Eugene, Oregon, at a meeting of Junior Leagues in the northwest. We think that statement is still relevant:

"Will * * * voluntarism become a luxury that many of our members can no longer afford? Even as we sit here today we are confronted with the fact that our hours of labor donated to our communities are not evaluated on the same plane as the hours of labor put in by the businessman or businesswoman. While we altruistically give of our time the businessperson's time yields monetary gains. Mileage incurred on our "job" may be deducted at 9 cents per mile while the businessperson deducts 20 cents per mile. Child care comes straight from the pocket of the volunteer with young children while the businesswoman takes a tax credit for child care expenses incurred during her work day * * *."

The Association of Junior Leagues is committed to ensuring that voluntarism does not become a luxury for its members or any other member of our society. We believe our society would be gravely impaired by a loss of the sense of caring and serving that voluntarism encompasses. We urge this subcommittee to help the spirit of voluntarism flourish by recommending passage of legislation to make the volunteer mileage deduction equal to that granted a businessman or the reimbursement rate set for government employees who use their own cars on government business. We strongly believe that it is unfair for the federal government to place increasing demands on volunteers without providing recognition and support for their work. An adjustment in the volunteer mileage deduction is long overdue. We urge this subcommittee to take the leadership on this issue by reporting out the volunteer mileage legislation.

Thank you for this opportunity to appear before you today.

SANDRA CRAWFORD,
Chairman, Public Policy Committee,
The Association of Junior Leagues, Inc.

INDEPENDENT SECTOR,
JULY 28, 1983.

MS. DEBORAH SEIDEL,
Executive Director, Association of Junior Leagues, Inc., New York, N.Y.

DEAR DEBORAH: Independent Sector, on behalf of its 500 members which include national voluntary associations, foundations, and business corporations, strongly endorses the testimony of the Association of Junior Leagues, Inc. on S. 1167 (Durenberger, R-MN) and S. 1579 (Armstrong, R-CO). The legislation is important because it permits volunteers who use their private automobiles for charitable activities, to receive the same tax deduction that businesspersons or government employees recieve for use of their personal automobiles in business or government activities.

The need for this legislation is clear. Recent cuts in Federal funding have placed an enormous strain on nonprofit organizations to increase their services. The total reduction in federal dollars for human service programs over the five-year period FY82-86, will be $108 billion below 1980 levels, after adjusting for inflation. Of that amount, nonprofits stand to lose $27.8 billion, over the same time period. In the face of these massive cuts, many people are turning to nonprofit organizations for services which had formerly been funded by public dollars. However, voluntary groups are facing serious problems in recruiting volunteers to perform services which require those volunteers to use their private automobiles.

Several studies, one by Montgomery County, Maryland and the other by the National Center for Citizen Involvement, have documented the problem in recruiting volunteers to carry out activities where the volunteers are expected to use his/her private automobile. They have found that the $.09 per mile deduction permitted by current law to taxpayers who use their cars for volunteer work is wholly indequate. This is best illustrated by information from the American Automobile Association which estimates that per mile driving costs are $.32 per mile for those who drive under 10,000 miles per year and $.24 per mile for motorists driving 15,000 miles per year.

Volunteers contribute time which is valued at $64.5 billion each year. More than 84 million Americans volunteer each year in this nation. In view of the recent cuts in Federal funding of human service programs, it is exceedingly important that everything possible be done to continue encouraging people to volunteer their services. We strongly urge that volunteers be permitted the same deduction for the use of their private automobiles in carrying our volunteer activities, as is permitted government employees and businesspersons.

Sincerely,

BRIAN O'CONNELL,
President.●

H.R. 3549, A BILL TO AMEND THE BANKRUPTCY RULES WITH RESPECT TO PROVIDING NOTICE

Mr. THURMOND. Mr. President, H.R. 3549 is a simple measure designed to correct an inconsistency in one of the Bankruptcy Rules which went into effect on August 1, 1983.

Rule 2002(a) and rule 2002(b) involve the mailing of certain notices by the bankruptcy clerk. In both instances, the rules permit this function to be performed as well by "some other person as the court may direct." However, in connection with certain "other notices," rule 2002(f) mentions only the bankruptcy clerk and does not authorize mailing by "some other person as the court may direct." H.R. 3549 could correct this difference, which appears to be merely an inadvertent inconsistency, by adding language which would conform with that used in rules 2002 (a) and (b).

Mr. President, I have been advised that this change will facilitate cost-efficient operations by the bankruptcy courts. I am not aware of any objections to H.R. 3549 and I hope that we will be able to pass it promptly, just as the other body did this morning.

EXECUTION OF BAHA'IS IN IRAN

Mr. PERCY. Mr. President, once again the Government of Iran has

demonstrated its utter disregard and contempt for the most basic human rights. Sixteen members of the Baha'i community in Iran were executed by the Iranian Government on June 20. The reason given by the authorities for this vile act was that the victims refused to renounce their religious beliefs.

The civilized world should not and cannot remain silent as the Iranian Government systematically persecutes this peaceful religious minority that flourishes in scores of other countries including the United States, without harassment or fear of physical abuse against its members. Certainly, the Baha'is have had difficult times before, but the intolerance and cruelty of the present Iranian authorities cannot be condoned.

This disregard for international standards of decency is an unfortunate illustration of the way which the current Iranian Government conducts itself. It has repeatedly provided support for acts of international terrorism and appears to rule out no action, however ruthless, so long as it serves the Government's goals. The Ayatollah and his followers have interfered in the internal affairs of their neighbors and have brutally mistreated prisoners of war.

In Lebanon, many believe that the Iranian Government was associated with the bombing of our Embassy in which Americans and Lebanese died. Hundreds of Iranian Revolutionary Guards are now in the Bekaa Valley and on several occasions they have attacked units of the Lebanese Army.

Lebanon is not only country to suffer from Iranian interference. In Bahrain, more than 60 dissidents trained in Iran were arrested before they could carry out an attack on the central government. Car bombs, reportedly placed by Iranians or their agents, have killed or injured dozens of innocent people in several Middle Eastern cities. Acts of intimidation by Iranian agents against outstanding Iranian nationals opposed to Khomenini's brutal regime have occurred in the West.

In light of these abhorrent actions and the Iranian Government's basic disregard for principles of international law and comity, I strongly believe that the U.S. Government should reassess from the ground up its attitude toward Iran. For example, I was troubled to learn that Iran imported U.S. goods and services totalling more than $100 million last year, including spare parts for aircraft. While it is not the policy of our Government to encourage trade with Iran, we must ask ourselves whether it makes sense not to discourage trade that may contribute to the staying power of the current regime.

As my distinguished colleagues know, I am a firm supporter of increased open trade and the expansion of American markets abroad. But there are other considerations, one being a decent respect for the right to live one's life in peace and to practice the religion of one's choice without fear of death, injury, or harassment. Another consideration should be the willingness of the trading to develop and maintain acceptable relations with that country. The Government of Iran has failed on both of these counts. I am deeply concerned that by continuing the current level and kind of trade with Iran, it may perceived that we are willing to tolerate the criminal behavior of the Iranian Government.

The time also has arrived to reexamine the basis on which the Iranian Government maintains its interests section in this country. By the presence of Iranian Government officials in Washington, we appear to give legitimacy to their government's repugnant actions. Moreover, Iran and Libya are the only two countries on earth from which the U.S. representatives are without reciprocal privileges in those countries.

Given my concerns, I am writing to Secretary of State to ask him to undertake an official review of United States-Iranian relations in the context of Iran's disrespect for basic human rights and the rule of international law, and to call upon other countries to do likewise. I believe it is imperative that this matter be addressed at the highest levels in our Government to insure that present policy reflects the wishes of the American people and our strong interests in the stability of that troubled region of the world.

FORMER SENATOR LEN JORDAN

Mr. SYMMS. Mr. President, it has been just over 1 month since we learned of the death of a distinguished former Member of this body, Senator Len Jordan, but the tributes to his accomplishment as a public servant, to his strength and wisdom have not ebbed. I did not have the honor of working with him during his service as a Member of the Idaho congressional delegation, but those of us who were represented by him as a U.S. Senator, as a Governor, as a political counselor, know the great sense of loss we feel for this great man.

I have listened as my distinguished colleagues on both sides of the aisle have taken the floor of the Senate to eulogize Len Jordan, and to share their memories of him. Senator STENNIS remembered the inspiration and sustenance he received from the Jordans. Senator MATHIAS recounted his sense of right and wrong, exemplified by the courage he displayed in fending off a would-be attacker. Senator STEVENS, like many Members of this body, counted on his sound advice, good judgment, and admired his independence, determination, spirit, knowledge, and sense of public service. The senior Senator from Idaho (JIM MCCLURE) who was selected by the voters of Idaho to fill the shoes of a retiring Len Jordan, characterized him as being "what God meant for a man to be."

As a public servant, an able member of the armed service, or as an Idaho legislator, Governor, or U.S. Senator, Len Jordan displayed the exalted character, unfailing honesty, and indomitable courage for which he is so fondly remembered. He had a diligence and sense of integrity common to those who have lived off the land. No matter what task he undertook, whether it was digging post holes or mastering the intricacies of water issues, Len Jordan would tackle the task with the same sense of dedication. Idaho was fortunate to have a large chapter of its history dedicated to the talents and accomplishments of Len Jordan.

To his wife Grace, who is herself an inspiration, I offer my heartfelt condolences and my very best wishes. Len Jordan never accepted anything—whether it was the news of a victory at the polls, an award for outstanding service, or the praise of an admirer—without first sharing the credit with Grace. That is itself both a tribute to her contributions and support and to Len's humility and understanding.

We will all miss Len Jordan's courage and wisdom. He was a truly great man.

Mr. President, at this time, I ask unanimous consent that a number of editorials and articles on Senator Jordan be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Mountain Home News, July 7, 1983]

LEROY PAYS TRIBUTE TO LATE SENATOR JORDAN

(By David H. Leroy)

Only rarely does any state have so fine a private man and so forceful a public servant as Idaho found in Len Jordan. His words, his deeds, and the lives he touched are legacies from Len to the people of Idaho and the state he loved.

"He hammered endlessly for better roads, better government at less cost, return to the counties of some functions that the state has usurped, more flexibility in school reorganization, and more money for schools," in his 1950 campaign for governor, according to Grace, his wife, in her book The Unintentional Senator.

In his first message he told the legislature, "I am not a person who speaks in generalities; I shall tell you plainly what I think. . . . By their ballots, the people of this state have brought us in session here and have assigned to us the trust of conducting their government through these important and troubled times. May we be given the fortitude and the integrity to do what is right, in the best light that is granted us."

As he retired from the United States Senate, in 1972, he responded to the tributes of his colleagues by saying, "Will Rogers said he never saw a man he did not like, and that goes for me, too. In the world of politics a man is not better than his friends give him a chance to be."

In January of 1974, private citizen Jordan told the Idaho Newspaper Association that "most of the problems we have encountered in the past could have been better solved if proper planning had discovered the middle ground, and if we had been wise enough to follow it. Now I know that hindsight is the clearest vision we poor humans have, but I also know that men of wisdom can often have 20-20 foresight. . . . With the efforts of dedicated men in industry and government, with the cooperation of the American public, with the understanding of the press and respected community leaders, Idaho and America will work their way out from under the current problems. The inner environment, the places we live and work, will continue to be comfortable and adequate; while the outside environment which supplies us with all of our needs will remain to provide for our children. Such a world is within our power to achieve. I am convinced that we can and will achieve it!"

As a friend, as a father, and as a figure in public affairs, Len Jordan's position in Idaho history is secure. But of even greater importance to him and to us, he has influenced the future of this state permanently and positively.

(Len Jordan was co-chairman of both Leroy's 1978 Campaign for Attorney General and his 1982 effort for Lt. Governor. Dave and Helen Leroy named their daughter, now 3½ years old, "Jordan" in honor of Len and his wife Grace.)

[From the Independence Enterprise, July 6, 1983]

LEN JORDAN OF IDAHO

Len Jordan was one of the greatest!

As other political figures eulogized the former Idaho Governor and U.S. Senator as serving well his nation and the world, the west can proudly claim Len Jordan as their own. A native of Utah, he resided there, in Idaho and in Oregon. Yes, he became known nationally and internationally in his lifetime. But we will always remember the quiet man who, regardless of the size of a crowd, appeared to be speaking directly to each and every person.

His introduction to politics is reported to have been caused when he found votes could be bought and sold. Len Jordan didn't like that—so he ran for the legislature and won a seat. Never could it be said this man could be bought!

Jordan's life was characterized by honestly and integrity. He was a tower of strength and always sought to do the right thing for Idaho. He fought many battles for his adopted state—perhaps the greatest was to make Hells Canyon dam claims on water of the Snake, subordinate to upstream irrigation and domestic needs.

A long-time associate of Jordan's said the man's primary concern in determination of any issue was, "Is it honest? Is it right? Is it good for Idaho?"

In this day of modern politics where integrity and honesty are often lost in the shuffle, we can only wish that there were more men and women made in the mold of Len Jordan. The nation and the world could use a few.

[From the Parma (Idaho) Review, July 7, 1983]

FAREWELL WITH RESPECT AND AFFECTION

One of Idaho's truly outstanding citizens, former Governor and U.S. Senator, Len B. Jordan, was honored in memorial this week at funeral services held on Tuesday. He and his wife, Grace, are close to the hearts of people in both political parties. He was indeed, an example of the sincerety and dedication we would hope for in all who seek public office and his ability to work with members of both parties was a great gift.

Statements of admiration and respect have come from all who knew him including neighbors and friends along with those who have served with him in the highest political offices.

We, too, would add our sentiments, respect, and affection for the Jordans who were leaders in the Republican party in our younger years.

We need more of his quality in public office. The standards he set will be missed but his contributions will not be forgotten, as they have become a part of Idaho's history.

M.E.G.

[From the Lewiston Morning Tribune, July 2, 1983]

LEN JORDAN: AN ADMIRABLE POLITICIAN

Ask Cal Wright what he thinks of Len Jordan and he'll tell you that he has never met a more admirable man.

And if you had asked Len Jordan about Cal Wright, he would have told you the same.

What makes that mutual admiration society so remarkable is that Jordan and Wright ran against each other for governor of Idaho in 1950. Jordan won. And not only did they emerge from the campaign without the usual hard feelings and grudges but with a deepened respect for one another. Wright says it was an honor to be in the same campaign with Jordan. Of course, the comment says as much about Wright as about Jordan, but even between the best of candidates, that is most unusual. A campaign does not ordinarily cement a new friendship.

But others will understand how Len Jordan, who died Thursday, could produce so warm a response from an adversary. One who could is Frank Church. The two served together in the U.S. Senate for 10 years. Those were the salad days of the Idaho congressional delegation, the most impressive and effective that delegation has ever been. At one time, three of the four members of the delegation—Church, Jordan and Congressman Orval Hansen—were Phi Beta Kappa. More important, they quickly set aside the usual petty little wars within the delegation. And though Church was a liberal Democrat and Jordan a conservative Republican, they developed almost a father-and-son relationship.

Jordan and Church had a significant trait in common: They were both western individualists who read their own hearts far more often than their political labels in deciding how to vote. Church differed bluntly at times with the Democratic administration of Lyndon Johnson and Jordan with the Republican Nixon administration.

The product of the affection and admiration between those two competent legislators was practically anything they jointly asked for Idaho. Both were respected in the Senate but it added clout to their requests that they were working together from opposite sides of the aisle. They put the bipartisan stamp on a lot of legislation, not the least of which, in these parts, was the conservation of Hells Canyon.

And no man had more right to participate in the future of Hells Canyon. Jordan and his family gave nine years of their lives to a ranch in that hard and remote gash. And that canyon, with its Snake River, symbolized a lot of what Len Jordan was and would be. For instance, he had been denied an opportunity after college to go on with graduate work, partly because his professors dismissed his proposed thesis as a crackpot scheme. He had proposed a thesis that would outline a plan to build a series of navigation dams on the Columbia and Snake, making Lewiston-Clarkston a year-around seaport. What a silly notion that was.

And if nine years in the Snake's meanest canyon didn't tell the strength of Jordan's character then one incident did. Miles from relief for a rotten, throbbing tooth, he took a pair of pliers and pulled it himself. No wonder years later when attacked by a mugger in Washington, the old senator was able to defend himself, knocking the young thug to the ground with one punch.

Jordan scuffled more often with Lewiston. The town never forgave him his leadership role in closing Lewis-Clark State College. Moreover, he had an appallingly stingy record on financial support for the public schools. Indeed, the wonder about Len Jordan is that, by most yardsticks, he was one of the worst governors and one of the best senators in Idaho history. Perhaps that is because he was elected governor with a scant two years of government experience. He had been a one-term legislator. Not even that bright a man could learn enough that fast about an entire government.

But he learned and grew as a senator. And he became not only something of a power in the Senate, but a moral leader as well. He became the standard in the Senate for ethical conduct. And no one who ever served Idaho in the Senate has given the people of the state more reason to be proud.

Characteristically, Len Jordan ended his career in the Senate in an unconventional way—neither by defeat nor feet first. He voluntarily retired though there is little question that he would have been massively re-elected had he tried.

But he said he had seen too many of his colleagues hang on too long, deteriorating from great men to mumbling vegetables while still in office. Len Jordan said he wanted to retire on top, his reputation intact and his name well remembered. How well he succeeded in that goal.—B.H.

[From the Lewiston Morning Tribune, July 2, 1983]

LEN JORDAN IN RETROSPECT: CALL IT INTEGRITY

One of the state office buildings closest to Idaho's Statehouse is known to most people in the areas as the LBJ Building. In any other state, that would probably make visitors wonder why a state building is named after a former U.S. President.

It isn't, of course, and Idahoans don't need to be told that. It's a tribute to Len B. Jordan that a building named after him could be known by his initials only.

Now that the former legislator, governor and U.S. senator is dead, tributes are the order of the day. But because I didn't know him, I can't write one. And because many of

the others I have seen don't tell us much about Jordan's career, I talked Friday with a few people who are familiar with that career, and learned a few reasons behind the words of praise we now hear.

Had Jordan died before he went to the Senate, the praise might not be effusive. In Lewiston, for example, Governor Jordan was the man who presided over the temporary closure of what is now Lewis-Clark State College, which hardly earned him a spot in the hearts of many of his north central Idaho neighbors.

Residents of other communities also found reason to quarrel with the relatively inexperienced politician occupying the governor's office. As a Pocatellan, Perry Swisher once visited Jordan to seek some help with Pocatello's tax base, and returned unimpressed.

The problem, the current public utilities commissioner recalled, was that state law stripped the city's tax base by distributing its utility valuation. But when Swisher as a freshman legislator tried to seek Jordan's help, the governor told him he should be talking to local governmental officials instead.

"He missed the whole point, I felt, and that was charateristic," Swisher said.

When Sen. Henry Dworshak died in the summer of 1962, Swisher, then a Republican, was among those who opposed Jordan's nomination to succeed Dworshak at the state GOP convention.

"Anybody but Jordan was our approach," he said, explaining that to his forces Jordan's supporters were "fellows we thought of as the Boise Cascade gang."

That opinion changed after Jordan became a senator, and by the time he left the Senate, Swisher was so impressed he said Friday Jordan "may have been the sanest voice in the entire Senate on land use."

"He wasn't just a bright man," Swisher said. "He was way above average in intelligence and over time he just got better and better."

Intelligence alone didn't earn Jordan the respect of so many contemporaries. When Democrat Calvin E. Wright began campaigning against the one-term legislator for governor, Wright had not met his opponent. But the two candidates met often on the same platform, "and I was always favorably impressed," Wright said.

"We had a fine, high-level campaign," said Wright, who recalled that when it was over, Idaho Statesman Political Editor John Corlett wrote that the race was remarkable for its lack of acrimony.

Jordan won a narrow victory, with each candidate carrying 22 of Idaho's 44 counties. Wright said he thinks Jordan's concentration on issues probably contributed most to the outcome.

"I guess my campaign was more-or-less generalized, where he expressed himself more adequately than I did on the problems of the day," Wright said.

Corlett, now retired from the Statesman, said it wasn't oratory that sold the Jordan candidacy to voters, though.

"I can still see him on the campaign trail . . . with cards in his hand," Corlett said, "He spoke very softly and earnestly about the ideas he was trying to put across."

Ideas sometimes cross political lines, of course, and when they did, Jordan was willing to follow, even if it meant siding with his fellow Idaho senator, Democrat Frank Church.

"Philosophically, Church and Jordan were pretty far apart," Corlett said, but the two senators frequently voted together on issues ranging from diversion of Idaho water to the Southwest to conservation of the state's wild lands and rivers.

Corlett said when he visited Washington, Jordan would often invite him to a lunch or dinner party "and more often than not Frank Church was at these things."

"He had a lot of friends, and I considered him a friend," Corlett said.

Although Jordan was not one to make many enemies, his independence invited the wrath of those who were in power during the Nixon administration, remembered Jim Jones. Jones, now Idaho's attorney general, was Jordan's legislative assistant during his last three years in the Senate.

Although Jordan usually voted as a conservative Republican would be expected to, his personal study of issues at times led him to oppose Nixon's positions, Jones said. One of those times was during the confirmation battle over Clement Haynesworth's nomination to the U.S. Supreme Court.

"He took a lot of heat for that," Jones said, although many senators who criticized Jordan of opposing the nomination later conceded he was right.

Jordan also fought Nixon's impoundment of some monies already appropriated by Congress and his attempt at welfare reform known as the Family Assistance Plan. Jones said he was in Jordan's office when Elliot Richardson, secretary of Health, Education, and Welfare, called the senator to lobby for the plan.

"Mr. Secretary, I'll do anything I can for you," Jones recalls Jordan saying, "except vote for your plan."

Bill Hall, editorial page editor of the Lewiston Tribune, said he learned during a visit to Washington of what was jokingly referred to as the "Jordan rule."

The rule held that Idaho's junior senator would vote the opposite of the way he was being pressured to. It originated when Jordan objected to Vice President Spiro Agnew's practice of leaving his post as president of the Senate to lobby members just before an important vote.

Jordan had told Agnew, Hall said, that if he then voted the administration's position, he would appear nothing more than a puppet. That left the strong temptation to take the other side.

You could call it perversity, I suppose, but the people I talked to called it integrity.

Jordan's last act as a public figure was to retire voluntarily after one partial and one full term in the Senate, although he almost certainly would have been re-elected. Jones and Hall both think he wanted to run again, but decided against it because his age might begin to slow him down.

To Jones, who is no stranger to the lure of election fever, that may have been Jordan's toughest decision. As he said, "It takes a lot of will power to resist the temptation."

[From the Idaho Daily Statesman, July 1, 1983]

JORDAN REMEMBERED FOR INTEGRITY, COURAGE

(By John Corlett)

There was something about Len Jordan that attracted people to him. Those who became close to him learned fast that it was his integrity and a courage of his own convictions that made up part of the attraction.

As I look back to Len Jordan's advent into and continuation in public life, it is rather amazing how easy it was for him to win elections to the two highest offices the state offers.

I first remember him as a soft-spoken freshman representative out of Idaho County who learned fast, did his homework and speedily drew respect from his colleagues. That was 1947. His major interest was to improve the highways of the state.

Although he lost his bid for reelection in 1948 to a Democrat in a Democratic county, his friends remembered him in 1950, and at their urging he ran for governor. He won the Republican nomination over a strong field of party pros and went on to win election.

I reported on his administration during his four years as governor. Of his many activities, three bear the mark of historical perspective.

Firstly, he successfully guided through a stormy legislative session his recommendation to abolish the old normal schools at Lewiston and Albion.

As it turned out, Albion stayed closed and the Lewiston institution later was reopened as a satellite of the University of Idaho.

Despite bitter opposition from the environs of the two schools, and several newspapers, including The Idaho Statesman, he never wavered from his stand that the schools were costly and anachronisms.

Secondly, he opposed the federally funded high Hells Canyon Dam on the middle Snake River, a project dear to the heart of liberal Democrats nationwide. I heard him testify at congressional and other hearings that if Idaho Power Co.'s three dams were to be built, the water for power there must be subordinated to upstream domestic and irrigation purposes. His request prevailed.

Thirdly, as governor, he finally won from the Legislature creation of an Idaho Highway Board to take construction of roads out of politics.

I remember the trials of Len Jordan at the Republican National Convention in 1952. The Idaho delegation was committed to Sen. Robert Taft. He realized that Gen. Dwight D. Eisenhower had the inside track, but I can still see him casting the delegation's vote for Taft.

But Eisenhower got to know Jordan when he opened his campaign for the presidency on the Statehouse steps in August 1952, and when Jordan's term ended in 1955, Eisenhower appointed him as chairman of the U.S. section of the then-International Joint Commission.

Jordan gave up the IJC post after several years, and his public life was in limbo for a time.

But in 1962, he was appointed to the U.S. Senate when Sen. Henry Dworshak died. And his friends rallied to him during the primary election that year to complete Dworshak's term. Jordan won the GOP nomination at a meeting of the Idaho Republican state central committee at Pocatello.

His opponent in the general election was the immensely popular 1st District U.S. Rep. Gracie Pfost. Although she won the northern counties, Idaho's southern counties voted overwhelmingly for Jordan, and he won handily. That was for a four-year term, and he won a six-year term easily in 1966.

Jordan was no orator. He spoke at rallies almost conversationally. He had a gift of appearing to be talking one-on-one to the crowds who came to hear him. He was easy to interview. More important, I enjoyed talking with him person-to-person instead of reporter-to-governor and/or senator.

I wrote once that his public life was exemplary. The work applies, I think to his private life as well.

[From the Post Register, July 7, 1984]

SENATOR LEN JORDAN, A STATESMAN WHO SERVED THE PEOPLE

Although he spent 21 years as a public servant, Len Jordan did not fill the role of a career politician. He spent 11 of those years as a U.S. senator, a job he did not at first seek on his own—he was appointed by the Republican party and then Gov. Robert Smylie.

He grew up and ranched on the Snake River near Hells Canyon in Oregon and Idaho. And it was both the development and protection of the Snake River that combined to be one of Jordan's greatest contributions to Idaho. That and the development of the Idaho Highwey Board, the very reason he got into politics at the late age of 50 in the first place.

Jordan died last Thursday at 84. He was buried Tuesday with all the tributes that he so deserved, not only from relatives, friends, and state leaders past and present, but past presidents as well.

Jordan was a lot of things—among them a Phi Beta Kappa scholar, college football player, successful businessman, politician, sheep rancher and chairman of an international commission negotiating agreements with Canada. But he will be remembered most as a public servant and a statesman from Idaho.

Few others have been able to see both ends of the spectrum in the uses of the Snake River. Although he worked toward development of the river and protection of water resources, he fought against flooding the Middle Snake and Hells Canyon.

He and former Sen. Frank Church, D-Idaho, authored the 7-year moratorium preventing licensing of dams on the Middle Snake from Asotin, Wash., to the Hells Canyon Dam upriver.

The moratorium also prevented the building of the High Mountain Sheep Dam just above the mouth of the Salmon River and other dams proposed below the mouth of the Salmon River that would have further impeded and virtually stopped migrating fish runs. No dams have been built on that reach since.

On this, like on many other issues, he could find a common middle ground on which to work out solutions. He and Church proposed the Sawtooth National Recreation Area to "preserve and manage this outstanding area."

He wrote legislation to protect fragile terrain by restricting the use of bulldozers and other mechanized earthmoving equipment in mineral prospecting. He also came up with a plan requiring employers to make an approved basic health care plan available to their employees.

As governor, he fought for better roads and, despite opposition, for consolidation of higher education facilities in the state. Jordan ran for state representative because he did not like politics in the Idaho Legislature being mixed with Idaho road construction.

He said his greatest accomplishments as governor were in government reform and "moving away from the spoils system where the party in power cleaned the payrolls at every election." As a conservative and businessman, he wanted efficiency. He did that through commissions and through use of the merit pay system in state departments, notably the highway and fish and game departments.

Fittingly, Jordan was not defeated while in office. He retired and did not run for reelection.

He was neither flamboyant nor an orator. He was soft spoken and modest. But he was decisive and made judgments that will be beneficial to all of Idaho far into history.

Jordan played the role of a politician as most people would envision it should be played. He accomplished many of the things most Idahoans over the years have expressed they favored and left the state as they wanted it.

Out of politics for 10 years now, Jordan in his death could stand as a symbol of statesmenship and for the state as the majority of people would have it.

[From the Post Register, July 1, 1983]

IDAHO STATESMAN LEN JORDAN DIES AT AGE 84

BOISE.—Former Idaho governor and U.S. Senator Len B. Jordan died in a hospital here Thursday night after suffering a stroke two days before, hospital officials and family members said.

Jordan, 84, was battling cancer and coronary disease when he entered St. Luke's Regional Medical Center on June 17. He had originally been expected to leave the hospital by the end of this week. A hospital representative said he died at 7:25 p.m.

Funeral services are scheduled for 2 p.m. Tuesday at the First United Methodist Church of Boise.

Jordan spent 25 years in public life; as a member of the Idaho House of Representatives from 1947 to 1949; governor of Idaho from 1951 to 1955; as chairman of the U.S. Section, International Joint Commission from 1955 to 1957; as a member of the International Development Advisory Board from 1958 to 1959; and as a Republican U.S. Senator from Idaho from 1962 to 1973.

GREAT LOSS

"Idaho has lost a great, great leader—a great statesman," Idaho Gov. John Evans said in a telephone interview Thursday night. "His service to the people of Idaho in protecting their water resources and developing their natural resources will be remembered for generations to come."

Jordan was born May 15, 1899, in Mt. Pleasant, Utah, and grew up in Enterprise, Ore., near Hell's Canyon on the Idaho-Oregon border.

He graduated from high school at 16 and went to work as a ranch hand and laborer until the U.S. entered World War I. He enlisted in the Army at the age of 18 and earned an officer's commission during his service.

In 1919 he entered the University of Oregon on a football scholarship. He worked his way through his undergraduate years with summer jobs in lumber camps and on ranches. He played varsity halfback, earned a Phi Beta Kappa key and graduated in 1923 with a bachelor's degree in business administration.

He married Grace Edgington of Hood River, Ore., in 1924. He began graduate work in economics but gave it up for a job as an accountant in Portland.

He soon returned to ranching and was foreman of a large eastern Oregon ranching operation when the depression hit and wiped out his savings.

Boise insurance executive William S. Campbell was Jordan's political confidant and longtime personal friend.

"Len's personal qualities made him an extraordinary public servant and treasured personal friend."

Meanwhile, Idaho political leaders say Len B. Jordan was a man of integrity who exemplified what the West stands for.

The man who succeeded Jordan in the U.S. Senate 11 years ago, Sen. James McClure, R-Idaho, said, "Few will leave their mark on Idaho and the nation as did Len Jordan."

He described the former Senator as "a great man and a true pioneer."

"His service to all of us is immeasurable," he said.

Idaho's other U.S. Senator, Republican Steve Symms, said the state was fortunate to have Jordan.

"He had a diligence and sense of integrity common to those who have lived off the land," said Symms.

"He had a natural sense of ease about him. Len relished hard work, whether it was digging post holes or mastering the intricacies of water issues," Symms said.

THE ECONOMY AND THE BUDGET

Mr. DOMENICI. Mr. President, before we adjourn for the August recess, I would like to call to the attention of my colleagues the very fragile state of our Nation's economy. During the past few months, the economic news has been generally good, in fact, very good.

Perhaps, I should be more sanguine about these happy events but the fact is that I am deeply disturbed. I am disturbed because in the midst of all these blessings of economic growth is an unmistakable, significant, and persistent trend toward higher interest rates.

We have been down this long, discouraging road before. A burst of growth, a surge of optimism, some improvement in unemployment, all brought to a halt under the bridle of high interest rates. In early 1980 and again in 1981, economic expansion ran headlong into sharply rising interest rates.

Then, there was plenty of blame to go around: a new monetary policy experiment, a new fiscal policy experiment, an oil price shock, a decade of inflation, and so on.

Now, if we do not act to fulfill the promise of fiscal responsibility we set out in the current budget resolution, we will have no one to blame for the sorry consequences but ourselves. There is an old saying: once, shame on you; twice shame on me.

It is now apparent to all of us that the economy is growing more rapidly than anyone thought possible even a few months ago. Auto sales in July were at an annual rate of 7.2 million units, almost 40-percent higher than a year ago.

Sales of other durable goods are also up sharply. Retail sales, an important measure of consumer spending have risen rapidly through June. And con-

sumer confidence, an important indicator of consumer's willingness to spend, is near a postwar high.

In fact, the real economy, over all, grew 8.7 percent last quarter. This growth was 2 percentage points higher than Commerce Department analysts predicted in June. Seventy-five percent of this growth was accounted for by consumer spending. Consumer spending exceeded the growth in consumer income, and the personal savings rate fell to 3.3 percent in the second quarter, the lowest quarterly savings rate in the history of the data series.

Certainly, by all indications, this appears to be the beginning of a boom.

But let us look at the darker side.

Since the end of May, the 3-month Treasury bill rate has risen a full percentage point and the 10-year Treasury note rate is up almost 2 percentage points.

More important, mortgage interest rates are also up a full percentage point since May to 13.6 percent and commercial paper rates, an important measure of automobile financing costs, are up by more than a percentage point.

The harsh fact is, Mr. President, that when mortgage interest rates rise from 12 to 13 percent, the proportion of families who are able to afford even a mortgage of $40,000 drops from 48 percent or just under one-half, to 36 percent or slightly more than one-third. At 13-percent mortgage rates, only about one-quarter of all families can afford a mortgage of $50,000, roughly the mortgage necessary to buy a $67,000 house. This is about the national average selling price.

Rising interest rates are also devastating for car sales. Merrill Lynch Economics, Inc., estimates that a 1 percentage point increase in auto financing costs will reduce sales by 200,000 units per year. If interest rates go back up across the board, auto sales could fall by a million units or more.

Of course, I should also add that rising interest rates in the United States are also devastating to the world economy. Already the U.S. Government, together with several Western European nations, has had to intervene in foreign exchange markets to keep the U.S. dollar from moving still higher in value on the speculation that U.S. interest rates are going up. If U.S. interest rates are not brought back down, the dollar will remain very strong and other countries may, themselves, have to raise interest rates. A strong dollar and higher interest rates abroad would reduce world demand for U.S. exports just at the time when it appears that a recovery in world trade is at hand.

It is important to remember that 40 percent of the decline in real GNP during the recession just past was due to declining U.S. exports. Moreover, the total decline in GNP since 1980 is more than accounted for by the decline in exports during that period.

The United States cannot grow unless its trading partners also grow. The second quarter GNP data is a case in point. While the rest of the economy grew very rapidly, the foreign trade sector continued to deteriorate. Simply put, the weakening of exports and the increase in imports subtracted $10.3 billion from our Nation's output last quarter. If the foreign trade sector had held ground in the second quarter, that is, if the second quarter trade balance had been the same as the first quarter level, the real economy would have grown by over 11 percent instead of the 8.7 percent as reported.

Already, real interest rates in the United States are higher than our trading partners' rates and the recent increase in U.S. rates has taken them still higher. We cannot afford to intervene indefinitely. We cannot afford the losses in growth and jobs that come from a continued downtrend in our exports.

In short, we cannot afford higher interest rates at home. We cannot afford higher interest rates abroad.

Certainly, one reason interest rates are rising, is that monetary policy is now less accommodative than it was earlier in the year. As the recovery progresses, that is to be expected. But, both the statements and the actions of Chairman Volcker indicate that the Federal Reserve intends to move with caution. All of the indicators of monetary policy suggest that this is the case.

But it is also clear that the prospect of massive Federal deficits are pushing interest rates still higher. As Chairman Volcker indicated in his semiannual testimony before the House Banking Committee, "There exists the urgency of further action to reduce the budgetary deficit to make room for the credit needed to support growth in the private economy. Left unattended, the situation remains the most important single hazard to the sustained and balanced recovery we want."

This is not only an economic reality. It is a political reality. The American people understand that this country cannot grow under the burden of $200 billion budget deficits.

What should be done? The Congress has already laid the groundwork for the answer in passing the first budget resolution for fiscal year 1984. This budget plan cuts the structural budget deficits in half by fiscal year 1986.

But at the moment this budget resolution is only a plan. The actual implementation of this plan is contained in reconciliation instructions to five committees in the Senate and eight committees in the House to reduce spending and increase taxes. Congress must comply with these actual changes in law for future deficits to come down. More plans will not enhance the flexibility of the Federal Reserve to keep interest rates as low as prudently possible. We need action.

Now, I know there are some Members who are not happy with this budget plan. There are some Members who believe there should be more spending cuts. In fact, if I alone could construct a budget resolution along the lines of budget plans that I have proposed in the past, there would be more spending cuts in the current budget resolution.

But I, as one Senator, cannot work my will on the majority. During the debate of the current budget resolution, the majority of the Senate, whether right or wrong, rejected the notion of significantly deeper budget cuts by a margin of more than four to one. This is an unequivocal statement. While I personally may regret that result, I see nothing in the economic or political outlook to change it.

I say to you that savings prescribed by the current budget resolution will be hard enought to obtain. While Senate committees are now working on legislation to cut spending, House committees are working on legislative proposals to increase spending. I, for one, am deeply concerned that the Congress will fail to meet the commitment that it imposed on itself just 5 weeks ago to take legislative action to reduce future budget deficits.

Can this Congress stand by a commitment to fiscally responsible budget actions only in times of crisis?

Or is the current, crystal-clear warning from financial markets going to be enough? Because it is only a warning. But it is a clear warning of tough times to come.

It is a warning, very much like the warning I received recently with regard to my own health; that crisis is possible. In fact, without action, crisis is inevitable.

I say to my colleagues, what I have said to myself, personally, many times in the past 2 weeks. We have been given a chance. We have an economic recovery that holds more promise for growth, for jobs, and for stable prices, than many of us dared hope possible. But this chance is clearly threatened by high interest rates. These interest rates can be brought down and will stay down if we act responsibly. If we do not heed the warning, we have only ourselves to blame. Once shame on you, twice, shame on me.

Mr. President, I will conclude by saying we better reduce the deficit in the outyears. There is only one plan around, the budget resolution. We better do what it says, both on the spending and the tax side. If we do not want to, we better find another plan because without some significant commitment to deficit reduction, it need

not be this year or next, without some reduction, starting in the 1985-86 cycle, the part of my statement about there being a darker side might indeed become a reality.

The first time around, shame on you; twice around, shame on me. I apply that collectively to our legislative body.

CONGRESSIONAL AWARD APPOINTEES

Mr. BYRD. Today, as minority leader of the U.S. Senate and a member of the Joint Leadership Commission of the Congressional Award, it is my privilege to appoint four people to the Congressional Award Board of Directors. These outstanding Americans have agreed to work on behalf of the U.S. Congress to continue to fulfill the mission of Public Law 114, to make the Congressional Award available to all young Americans.

My appointees are: Shirley A. Chisholm, professor at Mount Holyoke College and former Member of Congress; Cathy Lee Crosby, president, CLC Productions, Inc., Beverly Hills, Calif.; Donald R. Keough, president and chief executive officer of the Coca-Cola Co., in Atlanta, Ga.; and S. Lee Kling, chairman of Landmark Bankshares Corp., St. Louis, Mo.

As the Congressional Award begins its national expansion, I would like to take this opportunity to thank the Founding Board for their efforts in guiding the program through its pilot phase. John G. McMillian, chairman, and W. Clement Stone, founding chairman, along with the rest of the Board have contributed their time and expertise to develop this program and I salute their continuing commitment to the Congressional Award.

MAJ. GEN. LEONARD HOLLAND: A CAREER OF EXCELLENCE

Mr. PELL. Mr. President, one of Rhode Island's most outstanding leaders, State Adj. Gen. Leonard Holland, will retire from public service on August 6 after 22 years as commander of the State National Guard. During this period, Major General Holland has been a key adviser to five different governors and has successfully coped with countless storms, strikes, and gasoline shortages as well as orchestrating State inaugurations and other public observances. General Holland is a consumate leader, equally proficient in his dual role as the State's director of emergency management and as the head of the 4,500-member Rhode Island National Guard.

Under his stewardship, former Navy land at Quonset Point has been developed into a 79-acre Army and Air National Guard facility, replacing what had been a 3½-acre facility at the State's airport. General Holland has greatly increased the professionalism of the National Guard, and will be particularly remembered for the literally thousands of young people he helped to nurture and train, and also helped to find jobs in industry as a result of the skills they learned in the National Guard. General Holland became the senior adjutant general in the 50 States, and is a recognized leader in Guard and Reserve affairs—one whose voice is frequently heard and vastly respected at the Pentagon.

The people of Rhode Island will never forget the strong presence and leadership he projected during a succession of blizzards, storms, power blackouts, and public employee strikes. As the State's top military man and also the director of emergency programs, General Holland, through the years, became a legendary, "larger than life" public figure. General Holland is one of those leaders who can never truly be replaced, but the people of Rhode Island will be very well served by his successor and long-time assistant, Brig. Gen. John W. Kiely, a former career Army officer.

Mr. President, General Holland best captured his own career when he said in announcing his retirement: "I've done everything I possibly can; I've visited with heads of state, I've met queens and all the Presidents we've had. I've been in the Oval Office discussing defense posture." As he leaves the public scene at the age of 67 to spend more time with his wife Bernice and his three sons, General Holland departs with the gratitude of the people of Rhode Island and the respect and trust of his fellow professionals in the military.

Mr. President, I ask unanimous consent that the text of an editorial entitled "The State's Top Military Man Steps Down," which appeared in the Providence Journal on June 21, 1983, be printed in the RECORD at this point, together with a feature article entitled "General Holland Salutes the R.I. Guard's Honor," written by Wayne Worcester, which appeared in the Providence Journal on August 3, 1983:

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE STATE'S TOP MILITARY MAN STEPS DOWN

Hardly anyone who knows Maj. Gen. Leonard Holland can picture him fading away, as old soldiers supposedly do. Nevertheless, the state's irrepressible adjutant general for the past 22 years has announced he will retire Aug. 6, to be succeeded by his assistant, Brig. Gen. John W. Kiely, who also will take over command of the Rhode Island National Guard. Capable though General Kiely, a former Army career officer, appears to be, he has an exceedingly tough act to follow.

During his long tenure, General Holland achieved almost legendary stature as the state's top military man. His reappointment since 1961 by a succession of governors of both parties was a tribute to the professionalism he brought to the two posts that previously had been part of the political patronage system. The general enjoyed respect at the Pentagon, too, not only as the senior adjutant general in the 50 states, but for his constant support of a strong national defense—a goal he advanced here by keeping up Rhode Island's Army and Air National Guard units.

The Guard's readiness was shown constantly when local emergencies occurred, such as blizzards, storms, power blackouts and public-employee strikes. Its vigorous response on these occasions mirrored that of its commanding officer. Whatever the crisis, General Holland's own wisecracking, cigar-smoking presence on the scene invariably made everything seem more manageable.

"He has no equal in his ability to handle all situations with humanity and with humor," Governor Garrahy said of him. "His has been a career of excellence." Now, at age 67, General Holland says he just wants to be with the family, play golf and tennis and dabble in real estate. If anyone has earned a more leisurely life, he has.

[From the Providence Journal, Aug. 3, 1983]

GENERAL HOLLAND SALUTES THE R.I. GUARD'S HONOR

(By Wayne Worcester)

PROVIDENCE.—The memorabilia was gone, not the memories.

In 22 years as Rhode Island's adjutant general and commanding general of the national Guard, Leonard Holland had collected enough awards, citations, commendations, plaques and mementoes to fill 35 cardboard boxes. His aides had packed and carried them off. In the general's big office inside the red-brick dinosaur of an armory up on North Main Street, all that remained now were a few charts, a couple of tables, a desk, three flags and the general himself. He is retiring Saturday, precisely 42 years after entering the military, and it's not particularly easy.

"I'm not sad," he said, and then he said it again, as if to convince himself. "I'm not sad. I'm happy, and I'm proud to have been a leader of men and women. The National Guard in Rhode Island has actually reached out and helped people.

"I've been in the company of governors and presidents and kings and queens, but I think one of the best moments of all came in 1979. There was a state employees' strike at the Institute for Mental Health, and the Guard went in there and ran everything for 10 days straight. We went in and took care of everybody. We did the cooking and the washing, you name it—everything. We bathed, fed and dressed the inmates and when the strike ws over it was like the 'Bogey March' scene from 'The Bridge on the River Kwai.'

"We gathered all the units outside the IMH to march off the grounds, and you know, every one of those inmates who could stand, walk or crawl came out to see us off, to say goodby. That was something.

"There was the blizzard of '78. We set up landing sites all over Rhode Island and brought in supplies and then helped the state dig out. I don't know how many dialysis cases we transported. I didn't know there were so many in Rhode Island.

"When parts of the state were without electricity, the Guard's been there with generators. When there's been a water problem, we've been there with the 'water buffaloes' bringing fresh water.

"I think the Guard has touched everyone in Rhode Island at one time or another. I'm happy and proud to have been a part of that."

Holland's public accomplishments as the leader of 4,400 people—3,000 in the Rhode Island Army National Guard, another 1,400 in the Air National Guard—have been thoroughly chronicled; the biggest will be commemorated Saturday in changing-of-the-guard ceremonies at the National Guard Base in Quonset, 79 acres which Holland, almost single-handedly, secured from the federal government for his people.

By virtue of his office and Pentagon contacts that he had cultivated and maintained, Holland wangled a Department of Defense level meeting with military and government officials and lawyers, walked into the room, locked the door behind him and announced. "Nobody gets out of here until we get an agreement for 79 acres." It took Holland 7½ hours, but he got his way—plus about $22 million to pay for the conversion of the property to an Air National Guard base.

No mean feat, to be sure. Yet, it is probably the smaller unheralded accomplishments for which he will be best, if quietly, remembered.

Some time ago, an elderly woman called to ask if Holland could do something to help her get a military funeral for her husband. He had wanted a military funeral, but he had never fought for the United States. He had served England in World War I, and been awarded the Victoria Cross. Holland called in some favors. When he was done, the man was buried with all of the military honors that the emissaries of two countries could muster.

There was the distraught woman who called him after her son had been paralyzed in an accident in New Hampshire. He needed to be rushed home for surgery. Could the National Guard help? It was "sort of a gray area" for the Guard, but not for Holland. He personally had the young man airlifted home.

Six months ago, a young woman who had completed her first year of Brown University's Program in Medicine walked into Holland's office and said she wanted to be an Army doctor. He checked her records, had them sent to Washington, and then called the Pentagon.

"What do you mean read her jacket?" the brass said. "We've got 2,500 jackets for about 25 scholarships."

"I don't care how many you've got," Holland said. "I'm telling you this woman wants to be an Army doctor, and her jacket is worth reading."

The young woman got a four-year scholarship.

Holland has served five governors, been in office longer than any state adjutant general in the United States, "and when Rickover retired, I became the oldest man in military uniform," he said.

I'm 67 . . . and a half, but I feel young," Holland said.

"If I have any regrets, it's not having spent enough time with my wife, Bernice, and my children in the early years. There have been long stretches when I've worked day and night. At one point, I'd worked 198 straight days, and 196 nights. I'm going to try to make up for that.

"You know," the general said, "it's a small state and you're supposed to be able to show up for everything. I guess I have, on my own and representing the governor, too. I've been to Newport three times in one day, sometimes. And I've been to thousands of funerals and listened to the eulogies, the nice things being said, and it has occurred to me that the person in the coffin can't hear them, and the person can't smell the flowers that have been sent, either. And I've thought, 'That's too bad.' I realized that I didn't want that for myself.

"I'm going out while I'm on top, when I can still hear the nice things being said, if they're appropriate—and while I can still smell the flowers."

R. BUCKMINSTER FULLER

Mr. PELL. Mr. President, Our "Spaceship Earth" lost a unique and truly original talent last month with the death of R. Buckminster Fuller.

Bucky Fuller, as he was known to all of us who were honored to be his friends, was perhaps best known for his invention of the geodesic dome as an architecturally efficient system for enclosing space. But he was much more than a builder or an engineer, or an inventor. He was also by his own reckoning a philosopher and poet, mathematician, and cosmogonist—and much more.

He was in fact a renaissance man and a universal man. After an unlikely beginning as a Harvard dropout, factory worker, Navy officer, meat packer, and sales manager, he paused to let his natural talents take over and devised his own theory of the universe. He became convinced that technology could solve all problems and that "There is absolutely nothing that cannot be done."

For all his eccentricities, Bucky Fuller's theories worked, and he became a prophet honored in his time. It is perhaps symbolic of his genius that he will be remembered for the technology of soaring geodesic domes to enclose ever increasing volumes of space: The 200 foot high dome pavillion of the U.S. exhibition at Expo 67; a 384 foot maintenance structure for railroad cars in Louisiana without a single interior support; a proposal for an air-conditioned dome covering 646 acres at the 1964 Worlds Fair in New York. And he had a vision of a dome 3 miles high covering most of Manhattan.

Bucky Fuller died suddenly at age 87 last month while visiting his wife of 65 years who was critically ill in a Los Angeles hospital. Within 36 hours, Anne Hewlett Fuller died also, ending a long partnership that not only pushed forward the frontiers of architecture but enlivened and enriched the climate of social thinking for several generations and more to come.

Mr. President, I ask unanimous consent that articles from the New York times of July 3, entitled "R. Buckminster Fuller, Futurist Inventor, Dies at 87" and "An Apostle of Technology," and from the New York Times of July 4, entitled "Anne Hewlett Fuller, 87, Dies; Widow of Futurists Architect," be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

R. BUCKMINSTER FULLER, FUTURIST INVENTOR, DIES AT 87

(By Albin Krebs)

R. Buckminster Fuller, the forward-looking inventor best known as the father of the geodesic dome, died of a heart attack Friday in Los Angeles at the Good Samaritan Hospital while visiting his wife, who is critically ill. He was 87 years old, and lived in Pacific Palisades, Calif.

As he put it himself, with his customary cheerful immodesty, Mr. Fuller was an "an engineer, inventor, mathematician, architect, cartographer, philosopher, poet, cosmogonist, comprehensive designer and choreographer."

He was also a thoroughgoing original, who for many years was dismissed by many as something of a crackpot. But by the 1950's, having stubbornly refused to abandon his beliefs that through technology "Man can do anything he needs to do" and that "man can create miracles," he had attracted a cultlike following.

Well into his 70's, Mr. Fuller yearly flew tens of thousands of miles, giving college lectures, some of which extended to a nonstop five or six hours. He was enormously popular among young people, whom he counseled to "reform the environment instead of trying to reform man."

"The young world," as he called modern youth, listened raptly as the somewhat disheveled, stockily built Mr. Fuller, his arms waving excitedly, his eyes flashing behind thick glasses, told of his dreams of a better tomorrow.

CALLED NAIVE BY DETRACTORS

And he gave this advice to the young: "Bite your tongue. Get a cinder in your eye. When you feel good, you feel nothing."

He ignored detractors who called him a megalomaniac, "an inspired child" and a naive romanticist, garrulously proclaiming his vision that man, through technology and planning, could become superman.

"The entire population of the earth," he would say, "could live compactly on a properly designed Haiti and comfortably on the British Isles."

Mr. Fuller envisioned mile-high floating cities that could house tens of thousands in an environment free of air pollution and noise. Mid-Manhattan, he predicted, would one day be covered by a huge plastic dome, three miles in diameter.

SOME IDEAS PRACTICABLE NOW

Those, he admitted, were projects for the future, but independent architects said timidity and lack of imagination in others prevented immediate adoption of some Fuller ideas that were practicable, such as his proposal to cover 646 acres of the 1964–65 New York World's Fair with an air-conditioned dome.

Although he had neither an architect's formal training nor an architect's license, and his geodesic dome blueprints had to be signed by a licensed associate, he was acclaimed by architects and designers. Nathaniel Owings, of Skidmore, Owings & Merrill, called him "the most creative man in our field."

But Mr. Fuller was much more than just an architect and builder. His ideas took in the whole of man's environment and experience and potentialities, and he believed with

crotchety single-mindedness that "there is absolutely nothing that cannot be done."

Frank Lloyd Wright called him "a man with more absolute integrity than any man I have ever known."

HELD MORE THAN 2,000 PATENTS

Mr. Fuller, who held more than 2,000 patents at his death, was elected in 1979 as one of the 50 members of the American Academy and Institute of Arts and Letters.

Earlier this year, President Reagan presented Mr. Fuller with the Presidential Medal of Freedom, saying he "reminds us that America is a haven for innovators."He had also been awarded 39 honorary doctorates in fields ranging from the fine arts to engineering.

Mr. Fuller was the author of 25 books, including three acclaimed volumes of free verse and "Operating Manual for Spaceship Earth," in which he compared the earth to a large mechanical device that, like an automobile, periodically must be tuned. He said each inhabitant must become familiar with its mechanics to keep it operating.

Two years ago, Mr. Fuller was given a surprise birthday party at the Science Museum of the Franklin Institute in Philadelphia. He had been drawn there under the pretext of taking Ellen Burstyn, the actress, on a private tour of a new exhibit.

When he opened the door, he was greeted by a crowd of journalists and friends, such as Merce Cunningham, the dancer; John Cage, the composer; Harris Wooford, the former president of Bryn Mawr, and Barbara Marx Hubbard, one of the country's leading futurists.

FINDING FUNDAMENTAL TRUTHS

During the celebration, which continued at the home of a curator of the museum, Mr. Fuller spoke of his discovery in his early 30's of certain fundamental truths that later guided his creativity, and said he had made a commitment never to use that knowledge for personal gain or power.

"My life has been, as a result, one miracle after another," he said.

In 1979, after four Pennsylvania universities had announced they could no longer afford the $80,000 a year they had been chipping in to help support Mr. Fuller's research projects in Philadelphia, he said, "I want people to get over the idea that I need some kind of charity."

He said that while he had to scramble for support money, he had grossed $250,000 in the previous year and expected to do the same in 1979.

Mr. Fuller was descended from a distinguished New England family. Born July 12, 1895, in Milton, Mass., a Boston suburb, he was the son of a Boston merchant, Richard Buckminster Fuller, after whom he was named, and the former Caroline Wolcott Andrews. He attended the Milton Academy, where he excelled in mathematics and science and did poorly in English and Latin.

Since there had been five generations of Harvard men in the family, Bucky Fuller, as he called himself, was expected to matriculate at Harvard, and he did, in 1913. But he said years later, "I cut classes and went out quite deliberately to get into trouble, and so naturally I got kicked out."

The Fuller family packed off its black sheep to Canada to work in a factory that made machinery. He found the experience exhilarating.

"It was an all-important phase of my life," he said. "I came to know shop foremen, molders, machinists and their respective tools and the beginnings of metallurgical procedures in general. Sometimes I succeeded in designing better parts. So well did I enjoy and therefore carry out my new phase of learning that I was invited to return to Harvard and quickly accepted. But I cut classes and got fired again."

After a variety of jobs in New York, Mr. Fuller joined the Navy and was sent to the Naval Academy in Annapolis, Md., for training in scientific methodology. He was commissioned an ensign and was a lieutenant (j.g.) on his discharge in 1919. For the next three years he worked for a meat packer and as sales manager for a trucking company.

Mr. Fuller, who had married the former Anne Hewlett in 1917, formed a company in the Middle West with his father-in-law, James Monroe Hewlett, an architect, to promote a building-block method of construction developed and patented by the two men. Soon after the business started in 1922, the Fullers' daughter, Alexandra, died on her fourth birthday.

Devasted emotionally, Mr. Fuller began drinking heavily. For the next five years he drank all night, he said years later, and worked 12 to 15 hours a day for the company. In 1927 his father-in-law was forced to sell his stock in the business, and the new majority stockholders dismissed Mr. Fuller.

This rock-bottom point in his career came shortly after the birth of his second daughter, Allegra. He began to believe that his life was such a mess that the only way out was suicide.

"YOU BELONG TO THE UNIVERSE"

He rejected the idea, however, and 1927 became the critical year of his life. He discovered, he said, that he had "a blind date with principle," and one night he found himself standing on the shore of Lake Michigan and telling himself: "You do not have the right to eliminate yourself. You do not belong to you. You belong to the universe."

"I made a bargain with myself that I'd discover the principles operative in the universe and turn them over to my fellow men," he said.

Mr. Fuller embarked on an intense program to completely reshape his thinking. He stopped drinking and cut himself off from his old associates.

For more than a year he did not speak ("even to my wife"), as he wished to teach himself to express ideas "without depending on modes of communication borrowed or absorbed from others." Ideas raced through his mind with such rapidity and insistence, he said, that he felt it necessary to learn to subsist with only two hours' sleep in 24, thus giving himself maximum time for thinking.

TECHNOLOGY TO "SAVE THE WORLD"

Technology, he soon became convinced, "could save the world from itself, provided it is properly used." Man's inventions and his industrial developments (such as strong new alloys) could enable him to improve his environment to a point where, ultimately, machines could take over all work and man could devote himself to learning still more ways of "doing more and more with less and less." In short, Utopia was not unattainable.

He concluded that the universe was governed by relatively few principles and that its essence was not matter but design. What gave the atom and therefore all matter its individual character was simply the patterning of its component protons and electrons. Man himself was "a complex of patterns," he said.

With the acceleration of technological expertise, Mr. Fuller reasoned, mankind was on the threshold of great achievements but was stymied because men were wedded to old molds of thinking. Change, he said, would have to become the norm.

DESIGNED DYMAXION HOUSE

He determined to turn his own new thinking toward the industry he knew best, building, and his first design was the Dymaxion House. It had rooms hung from a central mast and had outer walls of continuous glass. Independent of its location, it could be moved easily. The house was equipped with automatic vacuum cleaners and a shower that could use a quart of refiltering water for 10 minutes. A working model of the house was displayed in a Chicago department store.

In May 1928, Mr. Fuller offered to assign full proprietary rights to his patents covering the Dymaxion house to the American Institute of Architects. The institute rejected the offer, and at its annual meeting in 1929 it passed a resolution damning all prefabricated building concepts: "Be it resolved that the A.I.A. establish itself on record as inherently opposed to any peas-in-a-pod-like reproducible designs."

Mr. Fuller no doubt recalled that rebuff with some amusement when, in 1970, the institute presented him its gold medal for his contributions to architecture.

Three prototypes of the Fuller Dymaxion three-wheeled automobile were produced between 1933 and 1935. The auto could turn in its own length and reach a speed of 120 miles an hour, using a standard 90-horsepower engine.

In 1935, one of the cars collided with a sedan in Chicago, and both vehicles overturned. By the time reporters arrived, the other car, which belonged to a city official, had been towed away. The driver of the Dymaxion car was killed, and under headlines such as "Three-Wheeled Car Kills Driver," newspaper accounts did not mention that another car had been involved.

Even after the facts had been established several weeks later, interest in the three-wheeled car remained cool, and it was never put into production.

In 1943 Mr. Fuller designed the Dymaxion Airocean World Map, the first cartographic system to receive a United States patent. It was the first of his inventions to win the serious interest of other scientists. It showed the earth's entire surface in a single flat view without the visible distortion on other maps.

Mr. Fuller's Wichita House, a new version of the Dymaxion circular unit, went into prototype production in 1944, when the Federal Government agreed to release high-priority aluminium alloys for its deployment. The hope was that mass production of the houses, to sell at $6,600 each, would provide employment for workers no longer needed to build warplanes and would serve as a stopgap solution to the postwar housing shortage. But the building industry did not show interest, and the Wichita House was scrapped.

PATENTED GEODESIC DOME

The geodesic dome, which Mr. Fuller patented in 1947, was the discovery that brought him fame and wealth. For a time, all geodesic domes were manufactured by his two companies, Geodesics Inc. and Synergetics Inc., but some years ago he began licensing others to manufacture and assemble the domes under his patent.

Mr. Fuller's first commercial customer for a dome was the Ford Motor Company, which installed a 93-foot plastic and aluminum shell over the Rotunda Building in Dearborn, Mich., in 1952. In 1955 he began producing geodesic "radomes" to house the listening devices of the Air Force's Distant Early Warning Line, the 3,000-mile strip of radio installations along the northern edge of Canada and Alaska.

Thousands of Fuller domes have been erected throughout the world. They range in size from small living units, such as Mr. Fuller's plywood home in Carbondale, Ill., to a huge maintenance shed for tank cars in Baton Rouge, La., that is 384 feet in diameter, with not a single interior column.

KHRUSHCHEV WAS ENTHUSIASTIC

When Nikita S. Khrushchev, the Soviet leader, had his first look at Mr. Fuller's dome for the American National Exhibition in Moscow in 1959, he could not suppress his enthusiasm. "This dome is very interesting, very good, worth copying many times over in the Soviet Union," he said.

Referring to him as "J. Buckingham Fuller," Mr. Khrushchev said he "should come here to lecture our engineers on his invention."

The State Department responded quickly. Mr. Fuller was flown to Moscow for lectures under the lozenge-patterned mesh of his own roof.

Perhaps best-known and most admired of the Fuller domes is the one that housed the United States pavilion at Expo 67 in Montreal; it was given to the Canadian Government when the world's fair closed. Beautiful and colorful, it was also the most imposing structure on the fairgrounds.

The structure of the Fuller geodesic dome is basically a sphere composed of pyramid shapes with four sides, including the base, known as tetrahedrons. Encompassed in the design principle are two mathematical truths: (1) the sphere, of all geometrical forms, encloses the most space with the least surface and is strongest against internal pressure, and (2) the tetrahedron encloses the least space with the most surface and best withstands external pressure. Thus design, not weight, gives the domes their great strength.

In the realm of ideas, the man who called himself a "comprehensive thinker" jousted with long-entrenched theories.

He rejected the Malthusian concept of man's being in danger of reproducing himself so uncontrollably that eventually he would not be able to feed himself. And in an interview in 1970, he said those who warned of a world population explosion were "ignorant people."

"The world population will be stabilized without radical birth-control programs by 1985," he predicted then. "Besides, man has the capability, through proper planning and use of natural resources, to forever feed himself and house himself and live in workless leisure."

Mr. Fuller disapproved of modern educational methods on the ground that few learned anything by them.

"Every child is born by a genius," he said. "It is my conviction, from having watched a great many babies grow up, that all of humanity is born a genius and then becomes de-geniused very rapidly by unfavorable circumstances and by the frustration of all their extraordinary built-in capabilities."

In presenting his ideas, Mr. Fuller often resorted to coining words and phrases such as "livingry" and "killingry" and "toing and froing," because, he said, there were no existing words to convey his precise meaning.

In later life, the energetic Mr. Fuller did not seek a traditional retirement, but rather spent as much time as he could "toing and froing" about the world, preaching his optimistic gospel that man could save mankind.

Mr. Fuller is survived by his wife, his daughter Allegra and a grandson, Jamie Synder, according to Ruth Scott, the nursing supervisor of Good Samaritan Hospital.

Ron Landsman, a spokesman for the Friends of Buckminister Fuller Foundation, said yesterday that Mr. Fuller had asked to be buried in his family's plot in Cambridge, Mass. Mr. Landsman said that funeral services would probably be held there, but that the arrangements were incomplete.

AN APOSTLE OF TECHNOLOGY

(By Paul Goldberger)

R. Buckminster Fuller was a preacher as much as an architect, a town crier as much as a scientist. He was among this century's first minds to see that every aspect of man's physical environment was connected to every other; he believed that out of simple geometric truths we might build whole worlds, and he saw his mission as spreading the gospel of this realization.

To Mr. Fuller, technology could solve all problems, but he was a far cry from the technocrats of the modern industrial age.

Buckminster Fuller had no part in the vast corporate establishment. He was an original, who operated best on his own, by himself, thinking through problems with a remarkable mix of common sense and what can only be called a religious faith.

The religion he espoused was that of technology and rational planning, and it had even come to him in a kind of epiphany. He recalled that when his fortunes were low, in the 1920's, he pulled himself back from the brink of suicide by deciding "to discover the principles operative in the universe and turn them over to my fellow men."

FAITH IN SIMPLE PRINCIPLES

In numerous cases, Mr. Fuller's faith in simple principles led to works of genius. His Dymaxion House, of 1927, was as important a break with conventional architecture as any created by the modernist master architects. Indeed, it might be said that Mr. Fuller went further in one way than Frank Lloyd Wright or Le Corbusier, for he broke not only with the old styles of architecture but also with the very idea of building as it had been done before.

For where the houses of Le Corbusier were really conventionally made buildings intended to express the idea of modern technology, Mr. Fuller's creation actually used that modern technology to the fullest.

The Dymaxion House was prefabricated, a radical idea in the 1920's, and it was intended to be able to be erected anywhere. With rooms hung from a central mast and outer walls of continuous glass, it used a minimum of materials, and it was designed with an eye to energy efficiency.

Today, it still has a certain freshness—the taut, tensile form of the Dymaxion House seems to reverberate with confidence in a new world.

The problem with Mr. Fuller's architecture was that it worked as well as it did by ignoring so much of what architecture really was about. There was no room in the Dymaxion House, for example, for individual variation; private demands simply did not fit into Mr. Fuller's system-oriented thinking. One could not make a city of Dymaxion Houses, for these round, flying saucer-like objects, handsome as they were, did not come together to create the greater whole that all urban buildings must do.

SEARCH FOR ABSOLUTES

Architecture as art did not particularly interest Buckminster Fuller; there are no absolute truths there, and it was absolutes that Mr. Fuller sought. Still, his designs did manage to have a considerable beauty to them—there is great presence and spatial power to the 200-foot-high geodesic dome that served as the United States Pavilion at Expo 67 in Montreal for example, and numerous other Fuller-designed domes have succeeded as housings for equally specialized functions.

The geodesic dome, the dome made up of tetrahedrons assembled into a sphere, the design for which Mr. Fuller was to be best known, emerged out of crystal-clear logic of structure. But that logical structure, like that of the Dymaxion House, was neither very flexible nor very successful as a building intended to relate to other buildings.

Many of Mr. Fuller's designs worked best as critiques of the existing state of affairs, not as practical projects. For example, his proposed dome over midtown Manhattan, if technically possible, would have been absurd, rendering the city even more cut off from nature than it already is.

But what better way than this huge, all-encompassing dome to make the point that all of midtown, indoors and out, is really a kind of interior—and to criticize what Mr. Fuller surely saw as the helter-skelter quality of the city's overall design?

POTENTIAL OF "SPACESHIP EARTH"

In his last years, Mr. Fuller became even less the designer and even more the preacher, traveling about the world and talking ever more excitedly about the potential of life on "Spaceship Earth," as he liked to call the planet.

The phrase summed up his own thinking—to Buckminster Fuller, the earth was but a speck in a larger universe, capable of survival only if it organized itself with the rigor and discipline of a space capsule.

His belief in the value of rational planning made Buckminster Fuller a somewhat curious cult figure for this moment in history, when our culture has lost much of its faith in the ability to solve problems by any means, rational or otherwise. Mr. Fuller never gave up the faith—for more than half a century he saw salvation in the patterns of the universe, and he devoted his life to explaining those patterns to the world.

ANNE HEWLETT FULLER, 87, DIES; WIDOW OF FUTURIST ARCHITECT

(By Ari L. Goldman)

Anne Hewlett Fuller, the widow of the furturist, inventor and architect R. Buckminster Fuller, died early yesterday morning at Good Samaritan Hospital in Los Angeles, just 36 hours after her husband's death.

Mr. Fuller, the creator of the geodesic dome, was stricken with a fatal heart attack late Friday while visiting the bedside of his wife of 65 years. They both were 87 years old.

Mr. Fuller had been admitted to the hospital 10 day ago, after complications arose from a stomach operation. She was in a coma when her husband visited her Friday, according to a spokesman for the Friends of Buckminster Fuller Foundation.

"She did not know of his death," said the spokesman, Ron Landsman.

ANNIVERSARY JULY 12

The couple, who lived in Pacific Palisades, Calif., would have celebrated their 66th wedding anniversary July 12.

Mr. Fuller once observed: "When two people as diametrically different as Anne and I get married, it either cracks up right away, or it turns out to be fantastically good—the way it has been for us."

Mrs. Fuller dabbled in architecture. In the 1930's, she designed their home in Darien, Conn. In 1967, the couple spent their 50th wedding anniversary in Montreal at the opening of one of Mr. Fuller's creations—the geodesic dome at Expo 67.

Mrs. Fuller, the daughter of James Monroe Hewlett, an architect, was born in Brooklyn Heights Jan. 9, 1896. She married Mr. Fuller in 1917 at the Hewlett family residence, Rock Hall, in Lawrence, L.I.

CONSTRUCTION COMPANY FORMED

Soon after the marriage, Mr. Fuller and his father-in-law formed a company to promote a building-block method of construction developed and patented by the two men.

Often accompanied by Mrs. Fuller, the inventor traveled extensively promoting his creations and ideas.

Mrs. Fuller is survived by their daughter, Allegra Fuller Snyder, a professor of dance at the University of California at Los Angeles, and two grandchildren, Alexandra Snyder of New York and Jaime Snyder of Pacific Palisades. She also leaves three sisters, Lawrence Hewlett Bowker of Lloyd Neck, L.I., Hope Hewlett Watts of Del Rey Beach, Fla., and Hester Hewlett Stearns of Huntington, L.I.

The family was planning a joint funeral service for the couple. No date has been set, according to Mr. Landsman, but, at the family's request, the services will be private.

AMBASSADOR ADRIAN FISHER

Mr. PELL. Mr. President, over the past several weeks, I have worked on a number of arms control related matters. Tomorrow marks the 20th anniversary of signature in Moscow of the Limited Test Ban Treaty, which was the cornerstone of an arms control regime which endures to this day.

Many Americans have given much of their time, energy and talent in creating that arms control regime. Their experience should serve us to show that if we have the will and the perseverance we can move on in arms control until we have succeed in halting the nuclear arms race and reducing the threat of nuclear war. No public servant toiled more diligently and devotedly to the cause of arms control than Ambassador Adrian Fisher. The Ambassador died in March after long and successful work inside and outside the Government. With regard to his work in arms control, he helped draft the legislation that established the Arms Control and Disarmament Agency in 1961, and he was the Agency's first Deputy Director. He played a leading role in assisting Ambassador Averell Harriman in negotiating the Limited Test Ban Treaty in 1963. He was centrally involved in the negotiations of the Nuclear Nonproliferation Treaty of 1968.

In 1977, President Carter nominated, and the Senate confirmed, Butch Fisher to be Ambassador to the Conference to the Committee on Disarmament in Geneva where he brought his broad experience to bear on a number of issues of arms control in that major forum.

Mr. President, I came to know, respect and admire Ambassador Fisher. He appeared before the Committee on Foreign Relations on a number of occasions, and he was known for his ability to give thoughful and useful testimony. He was a man of wide-ranging interests and considerable depth, who was able to inform without being overbearing. He brought wit and grace to his quest for a world which might be freed from the threat of nuclear war.

Mr. President, I ask unanimous consent that the Ambassador's obituary in the March 19, 1983, New York Times be printed in the CONGRESSIONAL RECORD, together with a remembrance by Lucius Battle, which appeared last March in the Washington Post.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Mar. 19, 1983]

ADRIAN S. FISHER, 69, ARMS TREATY NEGOTIATOR

(By Philip Shenon)

Adrian S. Fisher, a leading arms control negotiator and former dean of the Georgetown University Law Center, died of cancer yesterday at his home in Washington. He was 69 years old.

Mr. Fisher was the first deputy director of the United States Arms Control and Disarmament Agency and a leading American negotiator of the 1963 Limited Test Ban Treaty, which barred nuclear testing in the atmosphere, in outer space and underwater.

He was appointed deputy director of the arms control agency by President Kennedy in 1961, the year the agency was formed.

In his eight years at the agency, which is an autonomous Government body that is required to coordinate its policies with the State Department, Mr. Fisher helped in numerous negotiations but perhaps none more important and more successful than the conferences that led to the Test Ban Treaty and the 1968 Treaty for the Nonproliferation of Nuclear Weapons.

SET TESTING RESTRICTIONS

The 1963 test ban treaty was eventually approved by 120 nations. It limited testing of nuclear weapons by prohibiting the release of detectable radioactivity beyond the national borders of the country conducting the tests. That restriction effectively limited the size of bombs that could be detonated.

In appearances before Congressional committees in 1963, Mr. Fisher was called on to defend the test ban. In an appearance in March of that year, Mr. Fisher said the United States had nuclear superiority over the Soviet Union and cautioned, "Unlimited testing without an agreement could facilitate Soviet 'equality' with the United States."

He also participated in negotiations in New York and Geneva that produced the nonproliferation treaty.

Mr. Fisher left the arms control agency in 1969 to become dean at Georgetown's law school, known as the Law Center, and a professor of international law.

As dean, Mr. Fisher was known for his efforts to improve the law school's financial situation and for recruitment of minority students and prominent faculty members.

In 1977, Mr. Fisher was given the rank of ambassador by President Carter and was appointed a member of the United States Mission to the United Nations. In the job, he directed the American delegation to the Geneva conference on disarmament, which was organized to control chemical weapons and produce a comprehensive test ban treaty.

Mr. Fisher's commitment to arms control lasted until his death. Just last August, Mr. Fisher was among six former arms negotiators who joined together to call on the Reagan Administration to resume talks with the Soviet Union on a comprehensive nuclear test ban.

From 1979 to 1982, Mr. Fisher was a law professor at George Mason University, in Fairfax, Va.

He held more than a dozen Government jobs in a career that began in Washington in 1938, when he became a Supreme Court law clerk to Justice Louis D. Brandeis. The following year he was named a clerk to Justice Felix Frankfurter.

Among his other Government posts: in 1944, assistant to the Assistant Secretary of War; in 1945 and 1946, technical adviser to the American judges at the Nuremberg trials; in 1947 and 1948, solicitor of the Department of Commerce; in 1949, general counsel of the Atomic Energy Commission, and from 1949 to 1953, legal adviser to the State Department.

Mr. Fisher was out of the Government during the Eisenhower Administrations, when he served as a member of the Washington law firm of Covington & Burling. He also was a vice president and counsel of The Washington Post Company in that time.

Adrian Sanford Fisher was born in Memphis on Jan. 21, 1914. At Princeton University, Mr. Fisher, 200 pounds and 6 feet, 1 inch tall, was a guard on the football team. He graduated from Princeton in 1934 and was a 1937 graduate of the Harvard Law School. He served in the Air Force as a navigator.

Surviving are his wife, the former Laura Graham, and their daughters, Laura Donelson Chandler, of Bethesda, Md., and Louise Sanford Fisher, of Pinecliffe, Colo.

[From the Washington Post, March 1983]

ADRIAN FISHER

(Adrian Fisher, diplomat, law school dean and one-time counsel for The Washington Post, died Friday at the age of 69. Here an old friend and colleague, Lucius Battle, remembers him:)

In a yet unsung era, the Truman-Acheson administration, it was my great fortune to share struggles and foxholes with Adrian Fisher. Reverence and nostalgia for that administration would come later. But it had not come thus far. We received more stones and arrows than bouquets. And the search for right answers on a day-to-day basis was unglamorous and sometimes rugged stuff. Adrian—we called him Butch—was a worthy associate. He searched doggedly for truth and clearly established the enemy, and the identity of both seemed apparent to him, even when it was we ourselves on whom he

turned the harsh lights. His was the cruel pursuit of the best in all of us. Some had much to give. Others not so much. He was one of those with much to give.

His judgment of his fellows was fair but firm and tough. He would not tolerate deceit or sham, and I never knew him to engage in either. There was simple honesty and humility about him found in few people.

Ambition, if it conflicted with a higher order of obligations, was not for him. He was always in the mainstream of the big events but happy to stay out of the limelight and off the top rung of history.

But he had a part in the Nuremberg trials, was a fighter of Joseph McCarthy, helped defend the presidency in the firing of Gen. Douglas MacArthur, struggled to fulfill the need for sensible disarmament, taught humane law, defended the oppressed and underpriviledged—not a bad agenda all that.

Butch was a special mixture of the grandeur and simplicity of the human spirit. He had a clear sense of direction, a set of consistent convictions, a remarkable mind, boundless energy. And was, above all, a loyal friend.

CENTRAL AMERICA

Mr. DODD. Mr. President, I wish to call the attention of my colleagues to an article by my good friend from Rhode Island and ranking Democrat on the Foreign Relations Committee, Senator PELL.

In an insightful essay, printed in the Los Angeles Times of July 29, Senator PELL exposes some of the contradictions in the Reagan administration's Central American policy and warns us of the dangerous possible consequences, while himself suggesting credible alternatives. Accurately, Senator PELL points out the incongruity of both supporting the mediation efforts of the Contadora group—a meritorious first step toward a negotiated, political settlement in Central America, and at the same time dispatching troops to the region—a decision which clearly suggests that the President has, in fact, opted for a policy of military intimidation.

I share with my colleague the concern that as a result, the Contadora group may despair of the peace process, and that anti-Sandinista guerrillas, encouraged by the size of the anticipated U.S. presence in Honduras, will step up its efforts to overthrow the Sandinista Government.

The unrest in Central America is fundamentally a function of the deplorable, indigenous economic, social, and political conditions which have existed far too long throughout most of the region. Military force is not a solution to the problems generated by these conditions. The way to effectively protect our interests in Central America is through a political and diplomatic process, but as Senator PELL notes, even the depth of commitment implied in the President's diplomatic efforts is "called into question by the administration's preference for saber-rattling." Senator PELL's approach, with which I agree, is the more realistic and practical one, calling for conciliatory gestures on both sides.

Mr. President, I ask unanimous consent that the complete text of Senator PELL's article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THERE IS A WAY OFF "THE SLIPPERY SLOPE"—LATIN AMERICA CRISIS NEEDS CONCILIATORY GESTURES ON BOTH SIDES

(By Claiborne Pell)

President Reagan's press conference Tuesday exposed a basic contradiction in his Administration's policy toward Central America that, if not corrected, will lead to the Americanization of the conflict in that area.

On the one hand, the President supported the mediation efforts of the so-called Contadora group (the governments of Mexico, Colombia, Venezuela and Panama), and said that he was "encouraged by some recent statements from Nicaragua and Cuba that seem to indicate that they, too, now recognize the merit to regional negotiations."

On the other hand, he defended the dangerous course of gunboat diplomacy on which he has embarked, and he refused to rule out the use of U.S. troops against Nicaragua.

Despite his rhetoric in support of a negotiated solution to the turmoil in Central America, the President's actions in dispatching ships and troops to the area suggest that in fact he has opted for a policy of military intimidation instead of diplomatic conciliation.

His show of military force can only be interpreted as a repudiation of the Contadora group's most recent proposal for negotiations and a dismissal of Nicaragua's willingness, for the first time, to engage in multilateral negotiations that would include discussion of arms flows to Salvadoran rebels. Two consequences harmful to U.S. interests are possible:

First of all, I fear that the Contadora group may quietly withdraw from the scene. And Nicaraguan hard-liners, sensitive to the thought of negotiating under the shadow of U.S. guns, may force a retraction of the Sandinista government's offer. Reviving the possibility of negotiations under those circumstances would be difficult, if not impossible.

Second, I fear that the presence of U.S. ships and 4,000 U.S. troops in Honduras could serve as a protective cover for a serious attempt, by force sympathetic to the former Somoza regime, to overthrow the Sandinista government. And one misstep at sea or on land could lead to direct involvement of U.S. forces in a conflict in which the American people clearly want no part.

Even if these dire consequences do not occur the Administration's show of force is unlikely to achieve anything except to raise questions about what the next U.S. military move will be and how long our friends in the region will tolerate such action.

However, it is one thing to criticize what the Administration is doing. It is quite another to present credible alternatives. So what is to be done?

Most immediately, the Administration should scale down the size of the planned exercises to conform more nearly to those that have taken place in the area since 1965. This should be the prelude for a test of the sincerity of Nicaragua and Cuba: an invitation to participate in a conference under the auspices of the Contadora group.

If this effort fails, the question of Nicaraguan transgressions and the appropriate regional response should be placed before the Organization of American States. That is what was done quite successfully during the Cuban missile crisis of 1962. We only court the enmity of our neighbors in the hemisphere by going it alone.

Similarly, in El Salvador, we should be fostering a totally unconditional dialogue between the government and the guerrillas—a dialogue not restricted to the question of participation in elections. In view of past U.S. actions to overthrow democratically elected Marxist governments in Chile and Guatemala, it would not be unreasonable for the guerrillas to want to talk about more than the details of elections.

In the longer term, we must face up to the fact that the basic security problems in Central America—and in all Latin America, for that matter—are primarily economic, social and political, not military. Furthermore, these problems are indigenous to each country in the area, and are not imposed from outside. Even the most diehard opponents of the Castro and Sandinista regimes cannot deny that they were internally nurtured responses to domestic problems.

The solutions to the region's problems are, logically, economic and social development, serious attention to human rights and political dialogue—including the resumption of formal diplomatic relations between the United States and Cuba. Even where there is external support for insurgency, as in El Salvador, the underlying problems are domestic, and no amount of military aid or adivsers can remove the problems on which the insurgents feed.

The Administration's Caribbean Basin Initiative and the Kissinger commission are welcome, although belated, responses to these problems. But the depth of commitment to the approaches implied in these initiatives is called into question by the Administration's preference for saber-rattling.

The need to shift the focus of U.S. policy in Central America does not mean that we should be blind to the external forces that are exploiting the misery and repression in the area for their own ends. There is a need, as the President has said, to provide a "shield of democracy."

But, as with Vietnam, the American people will not bear the burden for such a shield if the threat to democracy is exaggerated and if alternatives to military action have not been seriously pursued.

FAREWELL TO HOWARD LIEBENGOOD

Mr. STEVENS. Mr. President, when the Senate reconvenes in September, we will have a new Sergeant at Arms at the helm of the Senate. Howard Liebengood will be experiencing his last regular session day as Senate Sergeant at Arms this week. The Senate will miss him greatly and we owe him a debt for his service in his capacity as Sergeant at Arms over the past 3½ years.

Howard joins a select club of former Sergeants at Arms for the Senate. Since 1789, only 25 men have held that position. Without a doubt,

Howard Liebengood has held the position with effectiveness and dignity. He and his staff have consistently performed in a superior fashion during his tenure.

Our system of government holds in high regard the concept of open government. Only in rare circumstances does the Senate floor or a committee hearing become closed. In my opinion, one of the key reasons why this practice has carried throughout our history is because elected legislators feel safe in the performance of their duty, thanks to the Sergeant at Arms. Howard Liebengood has maintained the tradition of proper and adequate safety for the Members of the Senate, while maximizing the openness of the Senate to the public. His service has been exemplary.

Howard has had jurisdiction over many facets of the Senate that many times go unnoticed until we are faced with an emergency. The smooth operation of this body is a direct function of Howard's effective management and the implementation of his innovative ideas.

We will miss Howard Liebengood. But, I am certain we will still frequently see him in his new capacity in the private sector.

SECOND ANNUAL LAND OF LINCOLN CONFERENCE

Mr. PERCY. Mr. President, Illinois Republican leaders recently gathered in Springfield, Ill., for the second annual Land of Lincoln Conference. This conference, inspired by the Tidewater conference attended by many of my congressional colleagues, gave us an opportunity to debate important national issues in a relaxed setting.

As I did last year following the first Land of Lincoln Conference, I am communicating the texts of the resolutions passed by the participants to President Reagan and I am also sharing these with my colleagues in the Senate and in the House of Representatives.

In just 2 years this gathering has become an important way for our Illinois leaders to test consensus on issues vital to all citizens. Many participants who attended the first conference returned this year and many others joined us for the first time. Again, I was pleased to have the cosponsorship of Illinois Gov. Jim Thompson and State Party Chairman Don Adams.

The conference considered five draft resolutions prepared after polling Republican leaders on their choices for the key issues facing Illinois and the Nation. Presentations pro and con were delivered at the conference followed by informal discussions in small groups gathered around tables named for famous Illinois Republican leaders of the past. Amendments were ofered by spokespersons for the small groups and vigorous floor debate followed. While the final resolutions do not reflect the uncritical approval of every word by each participant, they do reflect a general consensus that provides us with a useful yardstick on how a cross-section of Illinois Republican leaders measure these issues.

A struggle to determine the proper role of government in the life of our Nation lies at the heart of resolutions on economic recovery, job opportunities, defense spending in Illinois, and social policies. There was strong feeling that Federal intervention is not always the best solution to these problems, that Government should encourage wherevery possible the hand of State and local government and the initiatives of private citizens. Where the Federal Government is involved, steps must be taken to assure that Americans get full value for their tax dollars and effective controls over costs.

The Land of Lincoln conferees also strongly reflected this year, as last year, a belief that the President has implemented sound fiscal policies that have started us well on the way to economic recovery. Interest rates are down, inflation has been drastically cut, more capital is flowing into investments that will spur growth and these trends must be sustained. They had a clear message for congressional leaders: tax indexing must be retained, the President's third year tax cut must stand, Federal spending is too high, and efforts must be made to bring the Federal budget into balance and reduce the high deficits.

I was especially encouraged by our consideration of the President's arms reduction proposals. I shared with the conferees President Reagan's letter to me about the nuclear build-down proposal and they solidly supported this concept in arms reduction. The United States and the Soviet Union must sharply reduce the level of arms, they said, and the renewed emphasis must be placed on finding ways to halt the proliferation of nuclear weapons to other nations.

Mr. President, I believe the party leaders attending the Land of Lincoln Conference made a substantial personal contribution to important national issues. I ask unanimous consent that the texts of the resolutions along with the names of the participants be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

RESOLUTIONS ADOPTED BY THE SECOND ANNUAL LAND OF LINCOLN CONFERENCE

RESOLUTION 1: SUSTAINING ECONOMIC RECOVERY

Whereas, inflation stood at 18 percent only three years ago but had been reduced to 3.9 percent in 1982 and to an annual rate of less than one percent during the first quarter of 1983; and

Whereas, the prime interest rate soared as high as 21.5 percent in 1980 but has been steadily reduced to approximately 10 percent and is forecast to continue this downward trend; and

Whereas, the tax burden that was reaching historic levels has been reduced from 21 percent of GNP to less than 19 percent of GNP in the last two years thereby freeing capital for private investment and job creation; and

Whereas, it is acknowledged that problems still exist in the level of interest rates and with unemployment

Whereas, Federal spending is too high despite two years of spending cut legislation; and

Whereas, Federal recession-related spending such as unemployment compensation will decline only as the recovery proceeds: Now, therefore, be it

Resolved, That the Congress should take steps to sustain the President's Economic Recovery Program that is now taking hold across the nation. Sustained recovery depends on retaining a moderate level of taxation, low inflation, incentives for savings and investment, and continued emphasis on lower spending rates at all levels of government. Tax indexing, set to start in 1985, should be retained as an historic government commitment to honesty and tax fairness for all Americans, especially low and middle income taxpayers. The third year of the personal tax cut—the final 10 percent of the 25 percent reduction—should be preserved for equity and to maintain the recovery's momentum. Government spending and deficits should be controlled by passage of the Balanced Budget Amendment, proposed by President Reagan, to insure a permanent rein on the tendency of Congress to spend and tax beyond our means. The Reagan Administration's debt collection efforts should be sustained and reinforced. Any turn away from these principles and policies will jeopardize re-establishment of a healthy economy for all Americans: Now, therefore, be it further

Resolved, That the American people, and particularly American business, to show their faith in our economy by moving forward with investment in a growing America.

RESOLUTION 2: EXPANDING DEFENSE SPENDING AND EXPORTS ILLINOIS DEFENSE SPENDING

Resolved:

1. That the State of Illinois and its Congressional Delegation in Washington adopt as an immediate, high-priority objective the achievement of a significant increase in the level of Federal defense dollars spent in the State.

2. The Illinois Congressional Delegation and State and local officials should collectively pursue a five-part strategy to achieve this goal, including:

a. Preserving, and wherever possible expanding, the military base structure in Illinois;

b. Direct intervention with Defense Department officials whenever a defense contact of significant benefit to Illinois is pending;

c. Sponsoring defense procurement conferences to educate Illinois businesses on how to compete and win in the defense marketplace;

d. Continuing efforts to communicate to high Administration officials the unacceptability of the current disparity in tax revenues paid by the State versus Federal defense dollars returned; and

e. Developing a "defense business" strategy in cooperation with business and labor leaders to address the problems caused by the migration of business to the Sunbelt through a comprehensive program of tax incentives, abatements, worker retraining, economic assistance, improvements in transportation infrastructure, and increased competitiveness in Illinois wage rates.

f. Expanding research and development programs undertaken at laboratories and universities throughout Illinois.

RESOLUTION 3: SOCIAL POLICY AND ENTITLEMENT PROGRAMS

Whereas, federal entitlement programs make up almost 50 percent of the total federal budget; and,

Whereas, total entitlement spending grew at an annual rate of 13 percent a year between 1976 and 1981, faster than the rate of inflation; and,

Whereas, entitlement spending rose from $65 billion in 1970 to $389 billion in 1983; and,

Whereas, 86 federal programs are indexed to rise with the cost of living and indexing accounted for about one-half the growth of the entitlement costs between 1970 and 1980; and,

Whereas, in a period of high interest rates of inflation the only group of citizens who are insulated from the ravages of inflation are the recipients of entitlement benefits, small business persons, wage earners and welfare recipients historically do not keep even with inflation, but entitlement recipients automatically are kept whole; and,

Whereas, the federal government is facing huge federal deficits in the decade ahead; and

Whereas, Congress cannot limit the costs of entitlement programs through the annual appropriations process: Now, therefore, be it

Resolved, That to maintain the integrity and insure equity within federal entitlement programs, Congress working with state and local officials should:

Vigorously pursue development of reforms in our health care programs—one of the fastest growing spending areas—that focus on isolating waste, denying payment for unnecessary care and most important, changing incentives to induce providers to offer services in an efficient way and to encourage beneficiaries to seek cost-effective care, without arbitrary service cutbacks or benefit restrictions, and to examine other methods by which the government adjusts for costs of health care;

Devise long-range strategies for alternative to costly institutionalization for those in need of long-term care, such as home health services and incentives for in-home care;

Reexamine the policy of automatically indexing federal programs to the increase in the cost of living, and consider among other alternatives indexing to the average wage increase paid;

Not consider at this time any expansion of existing entitlement programs, nor the creation of any new entitlement programs;

Gradually revise military retirement extending the pay in period beyond the present 20 years and eliminating receipt of retirement benefits until at least age 55;

Such changes be made in the law or the Constitution as would be necessary to subject all entitlement programs, except the social security system, to the Annual Appropriation Process;

Take steps to reduce federal entitlement program expenditures so that they do not exceed the percentage of the total federal budget which is spent on defense;

Strongly support the workfare concept and urge its increased use. Where community service jobs are not available or when retraining of displaced employees is desirable, education or retraining requirements should be employed as an extension of the welfare concept.

Require that scholastic qualifications be considered as well as in awarding educational assistance grants and loans and that beneficiaries maintain minimum grade levels for graduation;

Promptly restructure the public assistance program to reduce abuses and to encourage recipients to return to the mainstream including the aggressive pursuit of placement in the work force.

Encourage personal savings and investment programs in addition to those already existing by removing taxes which discourage those savings and investment programs, in order that individual citizens will be able and preserve resources to care for their medical and social needs;

Without affecting any existing federal personnel but only future employees extending the pay in period beyond the present 20 years and eliminate receipt of retirement benefits until at least age 55;

Expand personal retirement savings programs by annually indexing the contribution levels of IRAs.

RESOLUTION 4: NUCLEAR ARMS LIMITATIONS

To express the sense of the land of Lincoln Conference that the United States and the Soviet Union should engage in substantial, equitable, and verifiable reductions of their nuclear weapons in a manner which would contribute to peace and stability.

Whereas, a nuclear war would kill or injure millions and millions of people and threaten the survival of the human race;

Whereas, there can be no assurance that a nuclear war, once initiated, would remain limited in scope;

Whereas, there exists the ever-present risk that nuclear weapons might be employed through accident or miscalculation;

Whereas, the American people, who are people of peace, maintain nuclear armaments only in the defense of freedom and yearn for world conditions in which they could do far more to lift the burdens of human privation and despair;

Whereas, the current nuclear force imbalance is destabilizing and could increase the likelihood of nuclear war;

Whereas, sizeable and verifiable mutual reductions of Soviet and U.S. nuclear forces to an equal and far-lower level would enhance stability and the maintenance of peace; and

Whereas, President Reagan, on November 18, 1981, stated that the United States "will seek to negotiate substantial reductions in nuclear arms which would result in levels that are equal and verifiable": Now, therefore, be it

Resolved by the Land of Lincoln Conference assembled, That

1. We strongly support the President's efforts to achieve substantial reductions in the nuclear arsenals of the United States and the Soviet Union at the strategic and intermediate-range nuclear forces negotiations in Geneva;

2. The United States should propose to the Soviet Union in the context of the relevant negotiations that both sides conclude an agreement to a reciprocal builddown of nuclear warheads, subject to agreed procedures of verification and compliance;

3. The United States should propose to the Soviet Union a mutual and verifiable nuclear force freeze at equal and sharply reduced levels of forces;

4. The United States should propose to the Soviet Union practical measures to reduce the danger of nuclear war through accident or miscalculation and prevent the use of nuclear weapons by third parties, including terrorists;

5. The United States should challenge the Soviet Union to join in this historic effort to channel the genious of our two peoples away from the passing of nuclear armaments and to focus the energy and resources of both nations on attacking the ancient enemies of mankind-poverty, hunger, and disease;

6. The United States should continue to press month after month, year after year, to achieve balance, stabilizing the reductions, looking, in time, to the elimination of all nuclear weapons from the world's arsenals;

7. To maintain stability and continuity while these strategic arms reduction negotiations are conducted, the United States should propose to the Soviet Union that both Parties avoid actions that would under-cut previously negotiated SALT agreements;

8. The U.S. should propose that the people of the Soviet Union be heard on this issue;

9. The threshold Test Ban Treaty should be passed;

10. Means should also be found to control proliferation of nuclear weaponry in other countries capable of producing nuclear weapons; and

11. Research and development of conventional weaponry should be encouraged;

12. We strongly endorse the President's decision to pursue the research and development of a comprehensive Anti-Ballistic Missile System and encourage the Congress to make the research development of such a system possible.

RESOLUTION 5: JOB OPPORTUNITIES FOR THE 1980's

Whereas, the economy of the State of Illinois has historically been built on a broad-based foundation of agriculture, manufacturing, financial and service-related industries, and,

Whereas, traditional manufacturing industries of Illinois have grown slowly or even declined in recent years while the energy, high-tech, service areas have expended elsewhere, and,

Whereas, the strong position of Illinois Agriculture has suffered greatly as a result of past policies of embargo related disruptions of the market and the instability of interest costs to agricultural producers, and,

Whereas, the unemployment rates in the State of Illinois have recently exceeded the national rate, in part because of the recession's impact on traditional manufacturing, and,

Whereas, the slow-down and decline in traditional manufacturing have led to other undesirable consequences, including: involuntary displacement of highly skilled workers, shrinking local tax bases, and the deterioration of neighborhoods and larger areas,

Now therefore be it resolved that:

The Historic diversity of the Illinois economy and its job-creating capacity be restored and expanded; and,

The following be recommended and endorsed as being strategic for reducing unemployment and enhancing the Illinois economic base:

1. A continuation of the successful economic recovery program of the Reagan Administration;

2. Enactment of the proposed Enterprise Zone legislation;

3. Aggressive and creative pursuit by local officials of existing federal economic development programs such as the Urban Development Action Grants (UDAGs) which promote the successful partnership of locally devised economic development or redevelopment strategies with appropriate private sector investments;

3a. A massive publicity campaign be undertaken jointly by the educational community, private industry labor unions and all levels of government asserting the need for and means by which employees in traditional manufacturing industries can be and should participate in retraining programs to insure or secure continued employment in a changing work force;

4. Maximum use of training and retraining programs, which emphasize private sector involvement authorized by the Job Training Partnership Act signed by President Reagan last year, so that every effort is made to retain Illinois' pool of highly skilled workers as a resource;

5. Cooperation among parent-teacher organizations, local school boards, state and local governments and, where appropriate, the federal government, to guarantee that our educational system is adequately preparing students in the skills required by the job markets of the 1980's and 1990's to encourage minimal competancy exams for teachers in the secondary schools so they can provide the quality education necessary; test of achievement should be widely utilized throughout our State educational system to ensure levels of academic achievement as a requirement for advancement in the system;

6. Expansion of current efforts in the State to: (a) develop a high-tech corridor in Illinois; (b) expand foreign markets for Illinois exports; (c) increase the marketability of Illinois coal; (d) develop a greater demand for value added agriculture products abroad; (e) promotion of research for additional food and energy uses of agricultural products; (f) the maintaining of comparitatively low tax rates to insure the competitive advantage for Illinois versus other states in attracting new business; increase research, development and production defense contracts in Illinois; and,

7. Enactment of marginal "two-tier" minimum wage to encourage the employment and training of youth who are otherwise priced out of the market; improve the economic climate in Illinois by continuing to make workers' compensation and unemployment insurance benefits more competitive with other states, insist that appropriate federal expenditures to states be weighed in favor of states with higher unemployment and declining heavy industry.

Now therefore be it further resolved that:

Providing and attractive employment climate is the responsibility of all groups involved including federal and state government business and labor organizations.

RESOLUTION 6: CALL FOR THE NEXT LAND OF LINCOLN CONFERENCE

The conferees unanimously commended Senator Percy for calling the Second Annual Land of Lincoln Conference and recommended that planning for next year's Third Annual Conference commence as soon as possible.

RESOLUTION 7: APPRECIATION TO CONFERENCE ENTERTAINERS

The Conferees unanimously expressed their thanks to and praised the talent of Mr. Bob Berry, who played the organ Friday evening, and Mrs. Georgia Luttrell and the members of the Springfield Southeast High School Swing Choir, who performed Saturday evening.

CONFEREES: SECOND ANNUAL LAND OF LINCOLN CONFERENCE, MAY 13-14, 1983

Adams, Don, Chairman, Illinois Republican State Central Comm.

Alleman, Darrel, Chairman, Putnam Country Republican Central Comm.

Anderson, Gary, Mayor, City of Decatur, Illinois.

Anderson, Jane.

Armstong, Drexellen, Oak Park Township Committee woman.

Armstrong, David.

Aradt, Mary Jo, State Central Committeeman—6th District.

Askew, Homer, Chairman, Williamson County Republican Central Comm.

Askew, Mary.

Atwood, William, Vice Pres., Southern Illinois Univ.

Bartlett, Sandra I., Lake Villa, Illinois.

Benson, Regina, 1st VP, Illinois Federation of Republican Women.

Benson, Walter.

Bertini, Cathy, Cand. For Congress—1982.

Balsko, Joan, Springfield—Land of Lincoln Conference Page.

Bushnell, Mary, Chairman, Ogle County Republican Central Committee.

Campbell, Fritz, Chairman, Marshall County Republican Central Co.

Campbell, William (Sid), Chairman, Cass County Republican Central Committee.

Churchill, Robert W., State Representative.

Clark, Howard E., Chairman, Jasper County Republican Central Committee.

Coop, Louise, Chairwoman, Morgan County Central Committee.

Corcoran, Tom, Congressman, 14th District.

Dammeier, William, State Central Committeeman (11th) and Norwood Park Township Committeeman.

DeAngello, Lois, Illinois Republican Party.

Dunn, Ralph, State Representative.

Farris, Billy, Chairman, Moultrie County Republican Central Comm.

Findley, Hazel, Palos Township Committeewoman.

Follett, Robert, State Central Committeeman (7th).

Follett, Nancy.

Gassman, Henry, Chairman, Richland County Republican Central Committee.

Gassman, Pat.

Gibson, Camille, Chairman, Peoria County Republican Central Committee.

Gjertsen, Edward, Republican Nationalities Council.

Glynn, John, Candidate for State Senate—1982.

Glynn, Elizabeth.

Gravenhorst, Sugar, Republican State Central Committeewoman—10th Dist.

Grotberg, John, State Senator and Kane County Chairman.

Gustine, Frank, Chairman, Knox County Republican Central Committee.

Hahn, Ralph, University of Illinois Trustee.

Hahn, Jane.

Hale, Joseph, Republican State Central Committeeman—22nd District.

Hall, Harber, Republican State Central Committeeman—15th District.

Hall, Robert, President, Illinois Young Republican Organization of Illinois.

Harris, Nancy.

Harvey, Crete, Republican National Committeewoman for Illinois.

Hendron, Carter, Secretary of State's Office.

Hendron, Diane.

Hess, Judi, Champaign County Republican Chairwoman.

Hoellen, John, Republican Ward Committeeman—47th Ward.

Hoellen, Mary Jane.

Houston, Michael, Mayor for City of Springfield, Illinois.

Houston, Carolyn.

Huisman, Hannelore, Republican State Central Committeewoman—17th District.

Hurleg, Pat, Illinois Republican Party.

Jackson, Mary, Jacksonville, Illinois—Guest of Louise Coop.

Jones, Marvin, Chairman, Douglas County Republican Central Committee.

Jourdan, Albert, Chairman, McHenry County Republican Central Committee.

Jourdan, Carolyn.

Kerr, William, Young Republican Organization of Illinois, Cook County Chairman.

Killey, Frances, President, Illinois Federation of Republican Women.

Killey, Ralph, Former Chairman, Warren County Republican Central Comm.

Koehler, Judy, State Representative.

Landon, Virginia, Office of Senator John Grotberg.

Larson, Richard, Republican State Central Committeeman—14th District.

Larson, Irma.

LasCola, Susan, Republican Ward Committeewoman—11th District.

LasCola, James.

Lehr, Dorothy, Chairman, Union County Republican Central Committee.

Liddell, Charles, Republican Ward Committeeman—9th District.

Lindley, Maralee, Sangamon County Auditor.

Luck, Gale, Decatur, Illinois.

Luck, Sue.

Machado, Edward, Republican Hispanic Organization.

Manuel, Vernita, Republican Ward Committeeman—24th District.

Murray, Milly, 2nd Vice Pres., Illinois Federation of Republican Women.

Murphy, Deborah, Republican State Central Committeewoman—13th Dist. and Lyona Township Republican Chairwoman.

Myers, Ralph, Chairman, Alexander County Republican Central Committee.

Neumann, Gary, Member, Putman County Board.

Neal, Robert, Chairman, Lake County Republican Central Committee.

Neal, Pat.

Neff, Clarence, State Representative.

Nelson, Diana, State Representative.

Nystrom, Ron, Rockford, Illinois.

Oksas, Casimir, President, Republican Nationalities Council.

Paul, Becky, Chairman, Women's Division, Illinois Republican State Central Committee.

Percy, Charles H., United States Senator.

Percy, Loraine.

Peters, Connie, Wheeling Township Republican Committeeman.

Peters, John.
Peterson, Mark, Aide to Representative Churchill.
Peterson, William E., State Representative.
Ragsdale, Dr. Edward, Chairman, Madison County Republican Central Committee.
Ragsdale, Meredith.
Reilly, Jim, State Representative.
Rossetti, Marjorie, Chairwoman, Marshall County Republican Central Comm.
Scannell, William, Republican State Central Committeeman—2nd District.
Schell, Lois, Republican State Central Committeewoman—2nd District.
Schell, Herman.
Shafer, Earl T. "Buck", Chairman, Stark County Republican Central Committee.
Sharp, Sharon, Chairman, Women's Division, Cook County Republican Central Comm.
Seidel, Tom, Chairman, Bureau County Republican Central Committee.
Smith, Harold B., Jr., Republican National Committeeman for Illinois.
Smith, Ronald, Republican State Central Committeeman—13th District.
Sodaro, Dean, Oak Park Republican Township Committeeman.
Sodaro, Jean.
Spoor, Rick, Candidate for City Council, Normal, Illinois.
Stewart, William, Republican State Central Committeeman—1st District, and Republican Ward Committeeman—1st Ward.
Stokes, Inese, Republican Nationalities Council.
Street, Marceine, Republican State Central Committeewoman—1st District.
Tate, Michael, State Representative.
Thompson, George (Bud), Chairman, Whiteside County Republican Central Comm.
Thornton, Edmund, Chairman, LaSalle County Republican Central Comm.
Totten, Don, Schaumberg Township Republican Committeeman.
Vilar-Roth, Marlen, Republican Hispanic Organization.
Watt, Eleanor, Rich Township Republican Committeewoman and Republican State Central Committeewoman—4th Dist.
Wendt, Wilma, Niles Township Republican Committeewoman.
Wendt, George.
Wilson, Reed, Staff Assistant to Congressman Corcoran.
Wire, Lorraine, Republic State Central Committeewoman—21st Dist.
Wire, Richard.
Worthington, Glenn, Chairman, Brown County Republican Central Comm.
Worthington, Evalyn.
Yeates, Patricia, Republican State Central Committeewoman—4th District.
Zwick, Jill, State Representative.

STEEL MOVES WEST

Mr. PERCY. Mr. President, the administration recently acted to give the specialty steel industry some breathing space from imports. This was a welcome decision for the specialty steel community and for those of us in the Congress who had urged President Reagan to make this decision.

I should like to especially recognize my distinguished colleagues, the senior Senators from West Virginia and Pennsylvania, Senator RANDOLPH and Senator HEINZ, for their many hours of hard work on behalf of the specialty steel industry. I have enjoyed working on the Senate Steel Caucus with Senator HEINZ, who is Chairman of the Caucus, and with Senator RANDOLPH, who is Vice Chairman, and they are both to be commended for their efforts on the specialty steel initiative which is so important to the national security.

Illinois is a major center of specialty steel manufacturing, which is in turn a major component of the U.S. steel industry as a whole. It is about our steel industry, and especially its efforts in the Midwest, that I wish to talk today.

The American steel industry is one of our most important basic industries. According to 1980 figures, it employed 400,000 people. In 1981, the U.S. steel industry produced 120 million net tons of steel or more than 15 percent of total world production. The productive capacity maintained by the industry is also substantial and is absolutely essential to our national security and, by connection, to the defense of the entire free world.

However, as we all know, the steel industry is suffering from the combined effects of a recession, increased competitiveness from foreign steel, and a shortage of capital for investment and modernization.

But I believe that the steel industry is turning the corner toward revitalization. As in other American industries, the recession has led to cost cutting and increased productivity which will in the long run have a beneficial effect on the steel industry.

An especially encouraging development is the increased cooperation between management and labor which we have seen over the past 18 months. The collaboration between these two groups is a great achievement. Labor and management are working together to help solve the problems of the steel industry, problems which are of critical importance for the country as a whole.

In addition, the President's economic program has assisted the steel industry. The accelerated cost recovery system inaugurated under the Economic Recovery Tax Act, for example, has provided increased incentive for steelmakers to invest in their capital plants and to modernize operations. Further, the current economic recovery will give a strong boost to the steel industry as capital spending in the economy picks up and as sales rise in critical sectors such as automobiles.

One of the more remarkable developments in the American steel industry during the postwar years is its movement into the center of the country from the older eastern steelmaking areas. There is no doubt that the heart of American steelmaking is now solidly ensconced in the Chicago-Gary, Ind., district.

Mr. President, it is a little known fact, outside the iron and steel community, that the Chicago steel district, which includes the mills of northwest Indiana, is responsible for 30 percent of the Nation's iron and steel production. In fact, the production in the Chicago district equals the production of Pittsburgh, Cleveland, and Detroit combined. In the week ending July 9 of this year, the Chicago district produced 474,000 net tons of raw steel and steel products out of a total U.S. production for the week of 1,581,000 net tons.

Mr. President, I ask unanimous consent that a copy of national steel production statistics, provided to my office by the American Iron and Steel Institute, be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Steel production by district [1]

[Thousands of net tons of steel]

North east coast	156
Buffalo	32
Pittsburgh	179
Youngstown	81
Cleveland	137
Detroit	137
Chicago	474
Cincinnati	96
St. Louis	69
Southern	135
Western	85
Total	1,581

[1] For week ending July 9, 1983.

Mr. PERCY. Mr. President, the Illinois-Indiana Bi-State Commission, which has studied the Chicago steel area steel industry, notes that fully one-third of all U.S. steel employees are employed in the Chicago district, making it not only the steel production capital of the United States, but also our country's center of skilled ironworkers as well. In addition, the United Steelworkers of America estimates that for every worker involved in steelmaking, another three are employed in allied industries dependent on steel.

Anyone who has ever driven down the Skyway from Chicago into Indiana knows that the magnitude of the industrial complex which lines that road is truly awesome. It is the steel industry which forms the backbone of much of this manufacturing. Likewise, the strength and richness of the Chicago steel industry—and indeed of the city itself—can be seen if one goes down to Lake Calumet in South Chicago. Huge ships loaded with iron ore sail into Lake Calument to unload at the steel plants which line its shore.

The dominance of the Chicago area steel industry is due to a number of factors.

Geographically, the district is favored in several ways. Chicago's central location means that it can supply steel to our domestic markets with greater ease than other parts of the

Nation. The district is also close to the great iron ore sources to the north as well as the coal mines which ring it to the south. This coal supply—some of which also comes from Illinois—accounts for over 60 percent of the energy sources driving the steel mills of Chicago, steel executives tell me.

In addition, as everybody knows, Chicago is also the hub of the Nation's railroad system which allows area steelmakers unequaled access both to markets and to resources. As one of the leading manufacturing States in the Union, Illinois is itself a primary market for Chicago steel, along with the other States of the East North Central region.

An important and determining factor in the leadership of Chicago district steelmakers is due to initiative on the part of the steel producers themselves. The companies which make steel in the Chicago-Gary area have made special efforts to invest in and modernize their plants in the area. Firms such as United States Steel, Inland, Bethlehem, Republic, Jones & Laughlin, and Interlake, among others, have all made substantial improvements in many of the plants which they operate there. Over the past 4 to 5 years tens of millions of dollars have been invested in Chicago steel plants in a conscientious effort to retool and increase productivity.

For instance, Bethlehem Steel's Burns Harbor plant in Indiana is well known for being among the most modern plants in the world, employing the latest technology of basic oxygen furnaces. In 1980, Inland Steel dedicated its No. 7 blast furnace in East Chicago, the largest in the Western Hemisphere. United States Steel also announced several years ago that it will make every effort to invest in its South Works plant in South Chicago, and is planning to build a $30 million rail mill at the plant.

One final development which I would like to talk about is the continuance of entrepreneurship in the steel industry. Across the country, groups of investors have been purchasing old plants, installing new equipment, hiring steelworkers, and adding to America's steel strength.

One of these new plants is the E. C. Thomas Works in Lemont, Ill. It was founded by Mr. Robert Thomas who worked in the steel mill which he now owns soon after it was built in 1959. His father, Edwin C. Thomas, was vice president of the corporation which owned the mill before his death in 1979.

When the mill's former owners decided to sell or close the Lemont mill, Robert Thomas took action to save the jobs of his many friends and neighbors. He sat down with union leaders to come up with a plan to make the plant profitable. Then he sat down with the bankers to persuade them that he could operate a steel mill which would be a good investment. Mr. Thomas laid out a modernization scheme to install modern continuous casting equipment, and he outlined an aggressive marketing plan.

The result is that 300 people in Will County, Ill., are now working in the E. C. Thomas Works because of the efforts of Mr. Robert Thomas.

Mr. President, I believe that the example set by the E. C. Thomas Works is one which holds great meaning for those interested in the future of the steel industry in America. The steel industry does have many problems; and it is going to be a long road back to profitability and sustained growth. But, through the efforts of men like Robert Thomas, both in the big companies and the small; with the cooperation and assistance of the workers' unions; and, finally, with the help of government, the steel industry is coming back.

I commend the members of the American steel industry, and I am especially proud of the steel businessmen and steelworkers of the Chicago area, who have made our region the cutting edge of the indispensable manufacturing sector.

THE ODD COUPLE

Mr. SIMPSON. Mr. President, I should like to invite the attention of Senators to an occurrence that I find quite remarkable. We are all aware that there has been some rich degree of controversy generated from Secretary Watt's assertion that limited oil and gas development on wildlife refuges could be allowed to take place—if it has been determined by the professional land managers that such acitivities are compatable with other refuge uses. We are also aware of the sometimes shrill and vociferous attacks made on Secretary Watt by various environmental groups since Secretary Watt made this assertion.

As one who enjoys the political arena, I have come to appreciate—and enjoy—the ironies of political jousting. Something will always come back to bite you on the rump. I have had it happen. On this issue of oil and gas development in wildlife refuges, I have come upon what I consider to be a real classic.

I have been provided with a very interesting article from the Eastern Shore News that details how the Audubon Society has entered into an agreement with Conoco to develop an oil and gas well inside of its own private wildlife refuges in Louisiana. The article describes how the Audubon Society has leased 6,800 acres of prime wetlands for exploratory drilling. The Audubon Society has already received over $2,700,000 in rental and bonus payments from Conoco. That is good business.

I am certainly enamored by this scenario whereby the Audubon Society and the environmental defense fund are presently petitioning the Interior Department to reconsider oil and gas leasing activities on U.S. wildlife refuges while at the same time engaging in the same activity. This incident should demonstrate to reasonable people that oil and gas development can be compatible with other uses, even in areas with ultrasensitive wetland ecosystems. Why does a fine and well respected organization like the Audubon Society object to oil and gas rental fees, royalties, bonuses, and other revenues coming into the U.S. Treasury while the Audubon Society is engaged in receiving millions of dollars by participating in the very activity it publicly opposes? I trust that future criticism of the Secretary of the Interior might be tempered by the acknowledgment that the Audubon Society's very successful experience may lend support to what Secretary Watt is honestly trying to do.

I request unanimous consent that my remarks and the attached articles from the Eastern Shore News and the wall street journal be printed in the RECORD together with a copy of the letter from Secretary Watt to the society.

There being no objection, the material was orderd to be printed in the RECORD, as follows:

[From the Eastern Shore News, July 5, 1983]

CONOCO, AUDUBON ARE ODD COUPLE

(By Curtis Badger)

The conservation movement of the late 1960s and early 1970s produced many organizations whose goals were to preserve America's wildlife and natural resources. One of the best known conservation groups today is the Audubon Society which was active long before wildlife conservation became fashionable. Although the scope of the organization expanded in the 1970s—it is no longer just a society of birdwatchers—it remains one of the largest and most respected conservation organizations in the country. Thousands of people have joined its ranks, adopted the conservation pledge, and subscribed to the society's slick bimonthly magazine.

So how come the Audubon Society is traipsing hand-in-hand through the Louisiana bayou with one of America's largest producers of petroleum products?

Why is there a Conoco drilling rig six miles deep in the heart of Audubon territory, a place of wild marshlands preserved as a sanctuary for the thousands of waterfowl that winter in South Louisiana?

CONSERVATION GROUP LEASES WETLANDS FOR OIL DRILLING

The answer in a word is money. Conoco has leased 6,800 acres of prime Louisiana wetlands from the Audubon Society and has paid the organization $2,762,000 to date in rental and bonus payments. Conoco is drilling exploratory wells on the Audubon refuge, and if the wells go into production, the society stands to make even more

money through subsidiary production payments.

Oil exploration on an Audubon refuge? Has one of America's most respected conservation organizations sold out?

We get a lot of criticism because of our relationship with the oil company," admits Lonnie Lege, superintendent of the Audubon's Rainey refuge since 1963. "But the arrangement has benefited both the wildlife and the oil industry. The refuge is better off now than it was before the Conoco lease. There have been no problems."

It is, perhaps, naive to believe that conservation groups are above dealing in mondane matters such as business. but conservation of wildlife and resources costs money, and conservation organizations are increasingly filling their ranks with men and women with backgrounds in law and business administration.

"They call the process nitigation," says Lege, "but I call it good old fashioned horse trading. If an oil company comes in here and wants to drill a hole, we tell them, 'OK, if you bring your barge in here you're going to destroy three acres of wetlands. What are you going to give us in return?' "

In the case of Mardill No. 6, Conoco built about $40,000 worth of water control structures for the refuge, in addition to the lease payments it makes to Audubon, Conoco's rig took three acres," says Lege, "but with the water control structures they built we created 100 additional acres of wetlands."

Lege is a bear of a man, a Cajun well over six feet tall who grew up in the bayou 20 miles from the Audubon refuge. He has thick black hair and skin the color of weak tea. He speaks in the slow, high pitched, lilting dialect of the bayou, and he probably knows the marsh better than anyone in the parish.

"In any dealing with the oil company, we consider the critters and the habitat first," he says. "The wildlife won't lose. The critical word is prime habitat. We're trying to copy the system that mother nature created here 100 years ago."

Lege's plan is to make the marsh more productive by building water control structures and by digging ditches in critical areas of the marsh to link ponds. Although preservationists disagree with the plan to alter the natural process of the wetlands, Lege says the system works. "The marsh is more productive biologically because of the ditch system and the water control, but dues from society members couldn't have paid for what we're doing here. We have our critics, but we've made the marsh more productive, and Conoco has paid for it.".

[From the Wall Street Journal, Aug. 4, 1983]

RED-CRESTED DERRICKS?

Interior Secretary James Watt has just sent a letter to the chairman of the National Audubon Society, Thomas W. Keesee Jr., congratulating him for realizing "energy production and wildlife can exist side by side." Strangely enough, Audubon officials aren't pleased.

Mr. Watt discovered that the Audubon Society is tapping the energy reserves of its 26,000-acre Rainey Wildlife Refuge in Louisiana. Under leasing agreements with Audubon, Consolidated Natural Gas is producing gas and petroleum liquids on the property and Conoco recently conducted some exploration work that turned up a dry hole. Audubon is using the leasing revenues to maintain Rainey and other wildlife areas.

Of course, it's only natural for any landholder in the Louisiana wetlands to search around for possible oil or gas reserves. People who own land and have a need for income like to get some productive use out of their property. But, of course, the Audubon folks and others in the environmental movement haven't always been tolerant of others who want to put wild lands to more productive use. Certainly they haven't been tolerant of Mr. Watt's rather limited efforts to reduce restrictions on such use.

The latest issue of the Audubon magazine, for instance, carries a 43-page article, replete with photographs, about how Mr. Watt is trying to despoil the nation's wildlife refuges. "The refuge system," it says, "is in the hands of a development-oriented administration that seems determined to wring out every last dollar it can."

You would think that Mr. Watt would have been offended to hear such criticism from an organization that is itself wringing a few petrodollars out of its own wildlife habitats. But in his letter to the Audubon Society, Secretary Watt says he understands the belief that "there is something inherently incompatiable about allowing oil and gas activities in wildlife areas." In good spirit he adds; "In the real world, however, it is heartening to see, when self-serving politics are not exploited, that the National Audubon Society shows leadership in energy production when it realizes its economic self-interest and overall benefit to resources."

"As you recognize at the Rainey sanctuary," he says, "some refuge lands can safely and beneficially be opened to certain kinds of mineral uses and . . . be better off because of it."

Glen Paulson, Audubon Society vice president in charge of its sanctuaries, didn't much care for Mr. Watt's "cleverly written" letter, terming some parts "sophistry." The Audubon Society, he said, is looking only for gas and light petroleum liquids, which is not the same as searching for crude oil. He didn't say, and we didn't have the heart to ask, what the society would do if, in looking for gas, it accidentally discovered another Prudhoe Bay.

Mr. Paulson also differentiates between refuge areas, such as the ones in which Audubon conducts grazing, trapping and commercial energy production, and "wilderness," which environmentalists have argued should be locked up untouched by human hands for the benefit of posterity.

For example, he contrasts the "resiliency" of many environments in the lower 48 states, which presumably include the wetlands once described to us by environmentalists as fragile, with the tundra of "resource-rich" Alaska, where "the greatest threat of inappropriate resource exploitation looms." Mr. Paulson also insisted that Audubon puts care of the wildlife and the natural environment ahead of any commercial considerations and that Mr. Watt's priorities are the reverse.

But in his letter, Secretary Watt suggests the Audubon Society might take a lesson from the mighty strict federal environmental safeguards about energy development. "It would appear," he says, "that the standards for protecting the resources at Rainey are less stringent than those we employ on Federal lands." That ain't so, says Mr. Paulson.

Despite this difference of opinion, however, Secretary Watt pledged to Audubon Chairman Keesee that "I will join with others to defend you against executives of your own organization or any others who oppose your exploitation of the Rainey sanctuary for oil and gas production."

And in his best it-seems-only-fair manner, Mr. Watt adds, "I will appreciate your efforts to keep the National Audubon Society from criticizing the Reagan administration for policies it obviously so thoroughly embraces for itself."

Who wants to bet on the chances of that?

U.S. DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SECRETARY,
Washington, D.C., July 27, 1983.

Mr. THOMAS W. KEESEE, Jr.,
Chairman of the Board, National Audubon Society, New York, N.Y.

DEAR MR. KEESEE: I have just read an article which brought to my attention again the marvelous job you have done in successfully and safely developing an oil field in your Rainey Wildlife Refuge in Louisiana. Your realization that energy production and wildlife can exist side by side, and your commonsense understanding of how even fragile wetland areas such as Audubon's Rainey sanctuary can sometimes tolerate a variety of uses without harmful effects, are worthy of commendation and support. The July 5, 1983, Eastern Shore News story about Audubon leasing its Rainey sanctuary to Conoco is enclosed.

As you know, many people believe there is something inherently incompatible about allowing oil and gas activities in wildlife areas. In the real world, however, it is heartening to see, when self-serving politics are not exploited, that the National Audubon Society shows leadership in energy production when it realizes its economic self-interest and overall benefit to resources.

I will appreciate your efforts to keep the National Audubon Society from criticizing the Reagan Administration for policies it obviously so thoroughly embraces for itself.

We at Interior have not made and will not make a large scale use of national wildlife refuges for mineral development. Indeed, we are very cautious in determining precisely which lands may be open to any public or economic use. But, as you recognize at the Rainey sanctuary, some refuge lands can safely and beneficially be open to certain kinds of mineral uses and, as your refuge spokesman said in the Eastern Shore News article, be better off because of it.

I note that the oil revenues produced from your wildlife sanctuary are used to enhance the Rainey area and other Audubon lands. Federal revenues from public and economic activites on national wildlife refuges are distributed to benefit local governments as well as the refuges.

I am particularly proud of the outlook for the National Wildlife Refuge System because today's Federal refuge system has better operation and maintenance funding and management than at any time in history. At a time when government is being reduced, the National Wildlife Refuge System is enjoying substantial increases in funding. Morale is up, too, because Fish and Wildlife Service refuge managers realize that the Administration will never let the refuge system deteriorate.

The refuge system is the world's largest and most successful collection of lands devoted to wildlife, and I am determined to keep it that way. For that reason, I have asked Congress for an additional $22.7 million for fiscal year '84 to better care for the system.

Be assured that I will join with others to defend you against executives of your own

organization or any others who oppose your exploitation of the Rainey sanctuary for oil and gas production, even though it would appear that the standard for protecting the resources at Rainey are less stringent than those we employ on Federal lands.

I urge you to follow through on your wise decision to permit oil and gas activity on your Audubon sanctuary by inviting the public to visit Rainey in Louisiana to see first hand how properly managed economic activities can beneficially coexist with wildlife.

Sincerely,

JAMES WATT,
Secretary.

Enclosure.

POWELL MOORE

Mr. NUNN. Mr. President, this Friday the Government will be losing a remarkably skilled official: Powell Moore, the Assistant Secretary for Legislative and Intergovernmental Affairs. Powell is leaving the State Department to become vice president for legislative affairs of the Lockheed Corp.

His friends and associates know Powell Moore as an articulate and thoughtful man who harbors a profound respect for the democratic process. I have known Powell and his family for many years, and I know that he, like his predecessors and his forefathers, has the very best interest of this Nation as his guiding principle. His parents were extremely close to another American who shared that vision, my great-uncle Carl Vinson, also of Milledgeville, Ga.

As a graduate of the Henry W. Grady School of Journalism at the University of Georgia and as a former newspaper editor in my State, Powell is intimately familiar with the critical role that communication plays in Government decisionmaking. It is a measure of Powell's talent that in the last 17 years he has been the person both legislators and Presidents have called upon to facilitate this vital communication link.

In this administration, moreover, it was Powell Moore who President Reagan and Secretary Shultz entrusted with the important task of informing and consulting with Congress on foreign policy.

Powell's background equipped him well for the challenging tasks he encountered during his tenure with the Reagan administration. Powell first came to Washington as an aide to Senator Richard B. Russell of Georgia in 1966 after serving as a U.S. Army officer for more than 3 years. Senator Russell considered bipartisan statesmanship to be an inviolate principle, and Powell, while working closely with Senator Russell, absorbed this invaluable lesson at the same time he was learning the issues.

When Senator Russell died in 1971 Powell became the Deputy Director of Public Information for the U.S. Department of Justice. Powell's superior performance in this job brought him to the attention of President Nixon, and he joined the White House staff in the Office of Legislative Affairs. Both the Nixon and Ford administrations relied on Powell's exhaustive knowledge of the legislative process, and by the time Powell left the White House staff in 1975, he had risen to the position of Deputy Special Assistant to the President.

Powell returned to Government service in 1980 after working for 6 years as a private consultant on Government relations for various corporations and associations. As a member of the national campaign staff for Ronald Reagan, Powell was widely acknowledged among his associates as an expert on political Washington, and when President Reagan was first elected one of his earliest appointments to the transition team was Powell Moore as Assistant Director of Congressional Relations. The association became permanent with Powell's appointment as Deputy Assistant to the President for Legislative Affairs.

As the Assistant Secretary of State for Legislative and Intergovernmental Affairs, Powell Moore has played an instrumental role in fostering a spirit of bipartisanship in the conduct of our foreign policy. We face crucial challenges in this area, and an effective partnership between the executive branch and Congress is essential as we make vital decisions. Powell recognizes this tenet better than most people in Washington, and he has worked to develop the two-way street that is essential for the proper implementation and long-term continuity of a sound foreign policy. Powell's frequent contact and consultation with Congress has, I believe, assisted the development of this partnership, and our Nation is in debt to him for his dedication to his job.

I have worked closely with Powell Moore since I came to Washington, and I value his judgment highly. He has been a diligent representative of the Reagan administration, both as a White House staff member and in his present position. Powell's candor and integrity have made him a welcome presence on Capitol Hill, and, although the Government is losing a highly effective official, I am delighted that Powell and Kathy, his lovely wife, will stay in Washington. I note, too, that as Powell leaves the State Department another highly qualified and distinguished Georgian, Ambassador Tapley Bennett, will take his place. I congratulate Powell on his challenging new job, and I look forward to continued association with him.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, I think we are now ready to take up the other matters.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDING THE BANKRUPTCY RULES WITH RESPECT TO PROVIDING NOTICE

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate H.R. 3549, a bill to amend the bankruptcy rules with respect to providing notice.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 3549) to amend the bankruptcy rules with respect to providing notice.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 3549) was ordered to a third reading, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. DOMENICI. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF PROCEDURE

Mr. BAKER. Now, Mr. President, we are ready to proceed to the matters I spoke of earlier, Senate Joint Resolution 149, and then a subsequent measure, H.R. 3190. I believe the people involved in those matters are here.

TEMPORARY SUSPENSION OF AUTHORITY RELATED TO MILK PRICE-SUPPORT PROGRAM

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate Senate Joint Resolution 149.

The PRESIDING OFFICER. The joint resolution will be stated by title.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 149) to temporarily suspend the authority of the Secretary of Agriculture, under the Milk Price Support Program, to impose a second 50 cents per hundred weight deduction from the proceeds of the sale of all milk marketed commercially in the United States.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the joint resolution?

There being no objection, the Senate proceeded to consider the joint resolution.

Mr. COCHRAN. Mr. President, will the majority leader yield?

Mr. BAKER. I yield.

AMENDMENT NO. 2124

Mr. COCHRAN. Mr. President, I send an amendment to the desk, on behalf of Mr. HUDDLESTON and myself, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Mississippi (Mr. COCHRAN), for himself and Mr. HUDDLESTON, proposes an amendment numbered 2124.

Mr. COCHRAN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 1, line 2, strike out "November 1, 1983" and insert in lieu thereof "October 1, 1983".

Mr. COCHRAN. Mr. President, this simply changes the date in the joint resolution from November 1, 1983, to October 1, 1983.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2124) was agreed to.

Mr. HUDDLESTON. Mr. President, I am pleased that the Senate has agreed to consider Senate Joint Resolution 149, a measure I introduced along with several of my colleagues yesterday. The resolution will suspend the authority of the Secretary of Agriculture to collect the second 50-cent fee on all milk marketed, as authorized by the ominibus budget reconciliation act of 1982, until Congress has an opoportunity to complete action on S. 1529.

Many Senators and Members of the House have worked to achieve a compromise on dairy legislation that would reduce the amount of surplus production, lower the cost of the milk price support program, and provide some stimulus to consumption by lowering the support price. Unfortunately, it now appears likely that the compromise—embodied in S. 1529—will not come to a vote before the Secretary imposes the second of two 50-cent fees authorized by the 1982 Omnibus Budget Reconciliation Act.

I note that the Secretary has announced that he would begin to collect the second fee effective September 1. If he takes this action, the deduction from the proceeds of sale of all milk sold commercially would increase, to a total of $1 per hundredweight, beginning in September.

The Secretary's action to increase the deduction will require the department of agriculture to establish a refund program for milk producers who reduce commercial milk marketings. To qualify for refunds of the second 50-cent fee, producers must reduce commercial milk marketings for the period September 1, 1983, through September 30, 1984, by 8.4 percent from the average of the 2 marketing years that began October 1, 1980.

Mr. President, it would be unfortunate and costly if the Secretary were to proceed with his plan to collect the second 50-cent fee and Congress then repealed the authority for the fees, as would be the case if the pending dairy legislation—contained in S. 1529—were enacted shortly after the August recess.

Senate Joint Resolution 149 would delay the Secretary's action until congress has time to consider and vote on the dairy compromise bill. The dairy program authorized by S. 1529 would be more beneficial to both dairy producers and consumers than would be the imposition of a second 50-cent fee.

As introduced, the resolution would have prohibited the Secretary of Agriculture from implementing the second 50-cent fee prior to November, 1983. To meet possible objections to the resolution under the Budget Act, I will join Senator COCHRAN in an amendment to change the date to October 1, 1983.

Mr. President, this resolution will provide additional time for the consideration of pending dairy legislation. I urge my colleagues to support Senate Joint Resolution 149.

Mr. PRYOR. Mr. President, I am pleased to be a cosponsor of the resolution introduced by the Senator from Kentucky (Mr. HUDDLESTON) and I hope it can be quickly adopted by the full Senate. This resolution simply postpones the Secretary of Agriculture's authority to make the second 50-cent assessment under the dairy program until November 1, 1983. This delay, which is only temporary, will give us time to consider the dairy legislation after we return from the August recess.

Mr. President, it is unfortunate that we have not been able to consider the dairy legislation, which was overwhelmingly endorsed by the Senate Committee on Agriculture, Nutrition, and Forestry. The Subcommittee on Agricultural Production, Marketing and Stabilization of Prices, chaired by the Senator from Mississippi (Mr. COCHRAN) held hearings on the dairy program. I think it is safe to say that while the witnesses discussed a variety of options, they were united in one respect—all of them were opposed to the assessment authority contained in existing law. This authority, which was included in the Budget Reconciliation Act last year, has been used to impose a 50-cent assessment on milk marketings currently, and plans are underway to impose the second 50-cent assessment around September 1. This bill only delays that assessment for a 60-day period to allow us to pass a dairy bill when we return.

Mr. President, there is a real need for us to do something about the dairy program, and I hope that shortly after we return in September we can act on the bill which has been reported by the Senate Agriculture Committee. The dairy farmers of the State of Arkansas, and other States in this country, need to know what the program will be. They have plans to make, and I hope that we do not continue to delay once we return.

Therefore, Mr. President, I support this measure and I commend the Senator from Kentucky, the ranking Democratic member on the Agriculture Committee for bringing this before the Senate.

Mr. D'AMATO. Mr. President, I rise today to cosponsor this joint resolution expressing the concern of the Congress over the imminent imposition of the second 50-cent assessment on milk. It would be a devestating blow to the rural economy of this country and my State if the onerous 50-cent assessment were to be doubled because Congress was unable to approve a substitute plan before it adjourned this summer.

The dairy industry is the only segment of the agricultural community being asked to bear a real cut under the farm programs now being considered by the two Houses of Congress. It would be adding insult to injury to collect this assessment while the almost certain prospect of that further cut looms on the horizon. I urge my colleagues to adopt this joint resolution.

Mr. DOMENICI. Mr. President, I commend the sponsor of this joint resolution on the change that was made. With the 2 months as previously stated, it is my assessment that it would be subject to a point of order under the Budget Act. For 1 month, however, since it lies all in fiscal year 1983, it is not. Therefore, I will not object and will not raise the point of order. In fact, I join in supporting the amendment.

The PRESIDING OFFICER. The joint resolution is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the joint resolution.

The joint resolution (Senate Joint Resolution 149) was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. J. RES. 149

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That, prior to October 1, 1983, the Secretary of Agriculture may not implement, under the provisions of section 201(d)(3) of the Agricultural Act of 1949, a second deduction of 50 cents per hundredweight from the proceeds of sale of all milk marketed commercially by producers.

Mr. BOSCHWITZ. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. COCHRAN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AN IMPROVED PROGRAM FOR EXTRA LONG STAPLE COTTON

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Agriculture be discharged from further consideration of H.R. 3190, the Extra Long Staple Cotton Act of 1983, and I ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered, and the committee is discharged.

The clerk will state the bill by title.

The assistant legislative clerk read as follows:

A bill (H.R. 3190) to establish an improved program for extra long stable cotton.

The Senate proceeded to consider the bill.

Mr. HELMS. Mr. President, I support enactment of H.R. 3190, the Extra Long Staple Cotton Act of 1983. The purpose of this measure is to provide producers of extra long staple cotton a more market-oriented program, reduce Government costs, reduce Government-held inventory, and restore our overseas competitiveness for this product.

Extra long staple cotton is a specialty-type cotton with an individual fiber length of at least 1⅜ inches. The only extra long staple cotton grown in this country is American pima cotton. Recently ELS cotton has been grown only in three States—Arizona, New Mexico, and Texas—with annual production, for last year, totaling 99,000 bales. This compares to last year's upland cotton production of 11.9 million bales.

The current extra long staple cotton program is entirely different from the upland cotton program because production is strictly controlled through acreage allotments and marketing quotas. The loan level is currently established at a minimum of 175 percent of the upland cotton loan.

The carryover from the 1982 crop is estimated to be 104,000 bales which is the largest carryover since 1969. Approximately 45,000 bales of this amount are uncommitted CCC inventory. Since CCC cannot sell its stocks of ELS cotton at less than 115 percent of the loan rate plus carrying charges, stocks are likely to continue to build and Government outlays will increase.

Mr. President, under existing law, the 1984 ELS cotton national marketing quotas and national acreage allotment must be determined and proclaimed by not later than October 15, 1983. In order to give the public time to comment on these items a notice of the proposed determination needs to be filed in the Federal Register by not later than August 15, 1983.

If this legislation is not enacted prior to the scheduled August recess, USDA will have to proceed with these public rulemaking procedures. Then, if legislation is enacted after the recess but prior to October 15, USDA would have expanded its limited resources in a very unproductive exercise. If the legislation was not enacted prior to October 15, USDA would have to proclaim the 1984 quota and allotments and then rescind them if the new bill is later passed. In addition to being burdensome and time consuming, this situation would be very confusing to producers and under current market conditions would be extremely disruptive.

It is due to these factors and others that I agree that the Committee on Agriculture, Nutrition, and Forestry should be discharged from further consideration of H.R. 3190 in order for the Senate to favorably act on the measure prior to the scheduled August recess.

H.R. 3190 would reduce the 1984 loan level for ELS cotton substantially—from 96.25 cents per pound to 82.50 cents per pound for the 1984 crop. Equally important the measure authorizes the sale of CCC owned ELS cotton for unrestricted use at such price levels as the Secretary of Agriculture determines appropriate to maintain and expand domestic and export markets. Since this provision would be effective upon enactment some 45,000 bales of CCC owned ELS cotton would be available for immediate sale at competitive prices. This is another compelling reason for the Senate to pass the bill prior to the pending recess.

Mr. President, the current ELS program has resulted in U.S. ELS cotton prices which are not competitive in world markets. This has resulted in substantially increased imports of foreign grown ELS cotton and, we are finding correspondingly larger forfeitures of U.S. ELS cotton to the CCC. The demand for ELS cotton now exceeds current supply available at competitive prices in the United States and additional imports of lower priced foreign cotton are inevitable if we fail to complete action on this legislation prior to the August recess. I have already heard from several mills in North Carolina that this will happen if we do not enact H.R. 3190.

Although the original version of H.R. 3190 that was proposed by the administration did not include a target price provision, the administration indicated during House hearings they would not oppose a reasonable target price level. I believe that the target price provisions found in H.R. 3190 are reasonable. They will provide a measure of income stability that is needed for producers as they adapt to program changes.

Mr. President, this legislation has the potential to enhance both international and domestic demand for ELS cotton grown in the United States. It will provide producers the opportunity to better respond to changing market conditions, it will reduce Government interference, and bring a savings to the Federal Government of almost $27 million over the next 5 years. H.R. 3190 is fully supported by ELS cotton growers, the textile industry, and the administration. I know of no opposition to the measure, and I urge my colleagues to adopt this measure.

Mr. President, I ask unanimous consent to have printed in the RECORD at the conclusion of my remarks a letter from USDA Secretary John R. Block supporting H.R. 3190, a brief explanation of the bill, a congressional budget office cost estimate, and a section-by-section analysis of H.R. 3190.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

BRIEF EXPLANATION OF H.R. 3190

Effective for the 1984 and subsequent crops of ELS cotton, the bill:

1. Repeals provisions for marketing quotas and acreage allotments for extra long staple cotton.

2. Lowers the minimum loan rate from 175 to 150 percent of the upland cotton loan rate.

3. Establishes a 10-month loan period with an optional 8-month extension at the discretion of the Secretary, similar to upland cotton.

4. Establishes a target price for ELS cotton at 120 percent of the ELS loan rate. The target price would be used to compute deficiency payments, which would be subject to the overall $50,000 limit on payments as under the programs for wheat, feed grains, upland cotton, and rice.

5. Provides the Secretary with discretion to make advance deficiency payments to producers who agree to comply with the acreage limitations program. Advance payments cannot exceed 50 percent of the projected payment rate as under the upland cotton program.

6. Provides for farm program acreages, derived from a national program acreage, and farm program yields to be used to determine deficiency payments, but limits payments to the acreage actually planted to the crop. These are similar to provisions for upland cotton.

7. Authorizes an acreage limitation program, if needed, for ELS cotton, similar to upland cotton, in which case producers must comply with the acreage limitation program to be eligible for program benefits.

8. Provides for the acreage limitation to be achieved by applying a uniform percentage reduction to an acreage base for the farm equal to the average acreage planted and considered planted to ELS cotton for harvest in the three crop years immediately preceding the year previous to the year for which the determination is made.

9. Establishes an acreage base reserve for each of the 1984, 1985, and 1986 crops equal to five percent of the total of the farm acreage bases established for such crops. The reserve would be used by county committees for making adjustments to correct inequities and to prevent hardships, and for establishing bases for farms on which no ELS cotton was planted during the preceding four years.

10. Authorizes a paid land diversion program, similar to upland cotton, if needed. Such payments would be included in the overall $50,000 payment limitation.

11. Authorizes, effective upon enactment, the sale of CCC-owned ELS cotton for unrestricted use at such at such price levels as the Secretary determines appropriate to maintain and expand export and domestic markets for such cotton. Currently, the minimum sale price is 115 percent of the loan rate plus carrying charges.

DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, D.C., July 29, 1983.

Hon. JESSE A. HELMS,
Chairman, Senate Committee on Agriculture, Nutrition and Forestry, United States Senate, Washington, D.C.

DEAR JESSE: H.R. 3190, The Extra Long Staple Cotton Act of 1983, a bill to establish an improved program for ELS cotton is now pending before your Committee. Recent developments reflect a new urgency in the need for this legislation.

It is my understanding that domestic mill demand for ELS cotton now exceeds the supply available at competitive prices in the U.S. and that additional imports of lower priced foreign growths are inevitable if Congress fails to complete action on the proposed legislation prior to the August recess.

As you know, the current price support program for ELS cotton establishes a minimum loan level at 175% of the loan rate for upland cotton. Loans at this level have resulted in U.S. ELS cotton prices which are not competitive in world markets or with synthetic fibers. As a result, imports of foreign growths have increased and large volumes of U.S. ELS cotton have been pledged as collateral for price support loans and are being forfeited to CCC.

Current law prohibits the resale of CCC owned ELS cotton at less than 115% of the loan rate plus carrying charges and thus precludes the sale of this cotton in the present situation.

H.R. 3190 would lower the loan level for 1984 crop ELS cotton from 175% to 150% of the upland cotton loan rate or from 96.25 cents per pound to 82.50 cents per pound—a level we believe to be competitive. But more important to the immediate problem, H.R. 3190 would upon enactment authorize the sale of CCC owned cotton for unrestricted use at such prices as the Secretary determines appropriate to maintain and expand domestic and export markets for ELS cotton.

The 1984 ELS cotton national marketing quota and national acreage allotment must be determined and proclaimed by not later than October 15, 1983. In order to give the public time to comment on these items a Notice of Proposed Determination needs to be filed in the Federal Register by not later than August 15. If new legislation is not enacted by mid-August, USDA will have to proceed with the public rulemaking procedures. Then, if new legislation is enacted prior to October 15, another notice would need to be published reflecting the new legislation. Or, if the new legislation was not enacted until after October 15, USDA would have to proclaim the 1984 quota and allotment then rescind it after the new bill was passed. In any event, in addition to being burdensome and time consuming, this would be very confusing to producers and the industry. It could be avoided by prompt consideration and action by the Senate.

In light of these developments, I urge the Committee to discharge the legislation so the Senate can act prior to the August recess.

Sincerely,

JOHN R. BLOCK,
Secretary.

CONGRESSIONAL BUDGET OFFICE

COST ESTIMATE

JUNE 21, 1983.

1. Bill number: H.R. 3190.

2. Bill title: The Extra Long Staple Cotton Act of 1983.

3. Bill status: As ordered reported by the House Committee on Agriculture, June 16, 1983.

4. Bill purpose: This bill lowers the loan rate for extra long staple (ELS) cotton and the price at which the Secretary of Agriculture may sell Commodity Credit Corporation-owned ELS cotton stocks. It also establishes target prices and authorizes deficiency payments for producers. The Secretary is authorized to establish acreage limitation as a condition for deficiency payments and loan eligibility, and to make diversion payments to further reduce acreage.

21. Estimated cost to the Federal Government:

[By fiscal years, in millions of dollars]

	1984	1985	1986	1987	1988
Estimated budget authority	−12	−7	5	−5	−2
Estimated outlays	−12	−7	−5	−5	−2

These savings fall within budget function 350.

Basis of estimate: Estimated budget impact is based on Department of Agriculture estimates. The following table shows estimated changes in net commodity lending, storage costs, receipts from the sale of CCC-owned inventory, and deficiency payments.

[By fiscal years, in millions of dollars]

	1984	1985	1986	1987	1988
Net lending	0.8	−2.3	−4.9	−1.5	
Sale of inventory	−15.8	−6.2	−2.1	−1.6	
Storage	−0.6	−0.9	−1.0	−1.4	
Deficiency payments	3.7	2.3	2.5	2.2	
Total	−11.9	−7.1	−5.5	−2.3	

Beginning in fiscal year 1986, net commodity lending is projected to fall below baseline levels under H.R. 3190, because the bill would reduce the loan rate from 96.25 cents per pound to 82.5 cents per pound. However, net commodity loan outlays are expected to increase in fiscal year 1985 in anticipation of lower loan rates for the subsequent crop years. No sales of CCC-owned stocks are projected under current law; however, the lower sale prices authorized by H.R. 3190 would permit the sale of an estimated 40 thousand bales in crop year 1985, 15 thousand bales in 1986, 5 thousand bales in 1987, and 4 thousand bales in 1988. This reduction in inventories would result in reduced storage costs, as CCC inventories of ELS cotton are projected to decline by 59,000 bales below the baseline levels bay the end of fiscal year 1988.

6. Estimated cost to State, and local governments: None.

7. Estimate comparison: None.

8. Previous CBO estimate: None.

9. Estimate prepared by: Howard Conley (226-2860).

10. Estimate approved by: James L. Blum, Assistant Director for Budget Analysis.

[From House Report 98-256]

SECTION-BY-SECTION ANALYSIS

Section 1. This section provides that the bill may be cited as the "Extra Long Staple Cotton Act of 1983".

Section 2. This section repeals section 347 of the Agricultural Adjustment Act of 1938 and section 101(f) of the Agricultural Act of 1949 effective beginning with the 1984 crop of extra long staple cotton. Section 347 of the 1938 Act contains provisions relating to marketing quotas and lease and transfer of acreage allotments for extra long staple cotton, while section 101(f) of the 1949 Act contains current provisions of law relating to price support for extra long staple cotton.

Section 3. This section makes the following sections of the Agricultural Adjustment Act of 1938 inapplicable to the 1984 and subsequent crops of extra long staple cotton: Section 342—National Marketing Quota: Section 343—Marketing Quota referendum; Section 344—Acreage Allotments; Section 344a—Sale, Lease and Transfer of Allotments; Section 345—Farm Marketing Quotas; Section 346—Marketing Quota Penalties; and Section 377—Preservation of Unused Acreage Allotments.

Section 4. This section amends section 103 of the Agricultural Act of 1949 by adding a new subsection (h) to provide a new program for extra long staple cotton beginning with the 1984 crop.

Subsection (h)(1) defines extra long staple cotton as cotton (i) produced from pure strain varieties of the Barbadense species or any hybrid thereof, or other similar types of extra long staple cotton, designated by the Secretary, (ii) having characteristics needed for various end uses for which American upland cotton is not suitable and grown in irrigated cotton-growing regions of the United States designated by the Secretary or other areas designated by the Secretary as suitable for the production of such varieties or types, and (iii) ginned on a roller-type gin or, if authorized by the Secretary, ginned on another type gin for experimental purposes. This is the same definition as contained in the current program for extra long staple cotton.

Subsection (h)(2) requires the Secretary, upon presentation of warehouse receipts reflecting accrued storage charges of not more

than sixty days, to make available to producers nonrecourse loans a term of ten months from the first day of the month in which the loan is made at a level which is not less than 50 per centum in excess of the loan level established for each crop of Strict Low Middling one and one-sixteenth inch upland cotton (micronaire 3.5 through 4.9) at average location in the United States. It also authorizes the Secretary, upon request of the producer during the tenth month of the loan period for the cotton, to extend the loan for an additional eight-month period. The loan level for any crop of extra long staple cotton must be announced by the Secretary not later than November 1 of the calendar year preceding the marketing year for which such loan is to be effective and such level may not thereafter be changed.

Subsection (h)(3)(A) provides for target price payments for each crop of extra long staple cotton on the same basis as under the upland cotton program. The payment rate would be equal to the amount by which the higher of—

(i) the average market price received by farmers for extra long staple cotton during the first eight months of the marketing year for the crop, or

(ii) the loan level for the crop, is less than the target per pound. The payment would be computed by multiplying (i) the payment rate, by (ii) the farm program acreage for extra long staple cotton (but in no event on a greater acreage than the acreage actually planted to extra long staple cotton for harvest), and by (iii) the farm program payment yield for extra long staple cotton.

Subparagraph (B) provides that the target price for each crop of extra long staple cotton shall be 120 per centum of the loan level.

Subparagraph (C) provides that if the Secretary establishes an acreage limitation program for a crop of extra long staple cotton and determines that deficiency payments will likely be made for such crop, the Secretary may make advance deficiency payments for the crop available to producers who agree to participate in the acreage limitation program. Any such advance payments must be made available to producers as soon as practicable after the producer files a notice of intention of participate in the acreage limitation program and in such amount as the Secretary determines appropriate to encourage adequate participation in such program. The advance payments may not exceed an amount determined by multiplying (i) the estimated farm program acreage for the crop, by (ii) the farm program payment yield for the crop, by (iii) 50 per centum of the projected payment rate, as determined by the Secretary. In any case in which the deficiency payment payable to a producer for a crop, as finally determined by the Secretary, is less than the amount paid to the producers as an advance deficiency payment, the producer must refund an amount equal to the difference. If the Secretary determines that no deficiency payments are due producers on a crop, the producers who received advance payments on such crop must refund the payments received. If a producer fails to comply with the acreage limitation program requirements after obtaining an advance deficiency payment, the producer must immediately repay the amount of the advance, plus interest in such amount as the Secretary prescribes.

Subsection (h)(4) requires the Secretary to establish for each crop of extra long staple cotton a national program acreage on the same basis as for upland cotton. The national program acreage must be announced by the Secretary not later than November 1 of the calendar year preceding the year for which such acreage is established. The Secretary may revise the national program acreage so announced for the purpose of determining the allocation factor under paragraph (5) if the Secretary determines it necessary based upon the latest information. The Secretary must announce the revised national program acreage as soon as it has been made. The national program acreage is established as the number of harvested acres the Secretary determines (on the basis of the estimated weighted national average of the farm program payment yields for the crop for which the determination is made) will produce the quantity (less imports) of extra long staple cotton that the Secretary estimates will be utilized domestically and for export during the marketing year for the crop. The national program acreage is subject to such adjustment as the Secretary determines necessary, taking into consideration the estimated carryover supply and the stocks not accounted for by official domestic consumption and export data, so as to provide for an adequate but not excessive total supply of extra long staple cotton for the marketing year for the crop for which such national program acreage is established. In no event may the national program acreage be less than 60,000 acres.

Subsection (h)(5) requires the Secretary to determine a program allocation factor for each crop of extra long staple cotton by dividing the national program acreage for the crop by the number of acres that the Secretary estimates will be harvested for such crop.

Subsection (h)(6) sets forth the method for computing the individual farm program acreage for each crop of extra long staple cotton on the same basis as for upland cotton. It is to be determined by multiplying the allocation factor by the acreage of extra long staple cotton planted for harvest on each farm for which individual farm program acreages are required to be determined. The farm program acreage may not be reduced by application of the allocation factor if the producers reduce the acreage of extra long staple cotton planted for harvest on the farm from the acreage base established for the farm by at least the percentage recommended by the Secretary in the announcement of the national program acreage. The Secretary must provide fair and equitable treatment for producers on farms on which the acreage of extra long staple cotton planted for harvest is less than the acreage base established for the farm, but for which the reduction is insufficient to exempt the farm from the application of the allocation factor. In establishing the allocation factor for extra long staple cotton, the Secretary may make such adjustment as the Secretary deems necessary.

Subsection (h)(7) provides for determination of the farm program payment yield for each crop of extra long staple cotton on the same basis as for upland cotton. It would be determined on the basis of the actual yields per harvested acre on the farm for the preceding three years, except that the actual yields must be adjusted by the Secretary for abnormal yields in any year caused by drought, flood, or other natural disaster, or other condition beyond the control of the producers. In case farm yield data for one or more years are unavailable or there was no production, the Secretary must provide for appraisals to be made on the basis of actual yields and program payment yields for similar farms in the area for which data are available. The Secretary must, however, take into account the actual yields proved by the producer, and neither such yields nor the farm program payment yield established on the basis of such yields may be reduced under other provisions of this paragraph. If the Secretary determines it necessary, the Secretary may establish national, State, or county program payments yields on the basis of historical yields, as adjusted by the Secretary to correct for abnormal factors affecting such yields in the historical period, or, if such data are not available, on the Secretary's estimate of actual yields for the crop year involved. If national, State, or county program payment yields are established, the farm program payment yields must balance to the national, State, or county program payment yields.

Subsection (h)(8) authorizes an acreage limitation program as a condition of eligibility for program benefits and a paid diversion program. Subparagraph (A) authorizes the Secretary to establish a limitation on the acreage planted to extra long staple cotton if the Secretary determines that the total supply of extra long staple cotton, in the absence of such limitation, will be excessive taking into account the need for an adequate carryover to maintain reasonable and stable prices and to meet a national emergency. Such limitation is to be achieved by applying a uniform percentage reduction to the acreage base for each extra long staple cotton-producing farm.

The subsection provides that producers who knowingly produce extra long staple cotton in excess of the permitted acreage for the farm would be ineligible for extra long staple cotton loans and payments with respect to that farm.

The acreage base for any farm for the purpose of determining any reduction required to be made for any year as a result of an acreage limitation program is the average acreage planted on the farm to extra long staple cotton for harvest in the three crop years immediately preceding the year prior to the year for which the determination is made. For this purpose, acreage planted to extra long staple cotton for harvest would include any acreage which producers were prevented from planting to extra long staple cotton or other nonconserving crops lieu of extra long staple cotton because of drought, flood, or other natural disaster or other condition beyond the control of the producers. The Secretary may make adjustments to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base.

This subsection establishes for each of the 1984, 1985, and 1986 crops an acreage base reserve equal to 5 percent of the total of the farm acreage bases established for the crop. The reserve would be in addition to the total of the farm acreage bases and would be used by the county committees, in accordance with regulations of the Secretary, for making adjustments of farm acreage bases to correct inequities and prevent hardship, and for establishing bases for farms on which no extra long staple cotton was planted during the preceding four years.

The subsection also requires, as in the case of upland cotton, that there be devoted to conservation uses, in accordance with regulations issued by the Secretary, to assure protection of such acreage from weeds and wind and water erosion, a number of acres

on the farm determined by dividing (1) the product obtained by multiplying the number of acres required to be withdrawn from the production of extra long staple cotton times the number of acres actually planted to such commodity, by (ii) the number of acres authorized to be planted to such commodity under the acreage limitation program. The Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of the reduced acreage to be devoted to sweet sorghum, hay and grazing, or the production of guar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, rye, or other commodity, if the Secretary determines that such production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price support program, and will not affect farm income adversely. If an acreage limitation program is announced for a crop of extra long staple cotton, paragraphs (4), (5), and (6) of subsection (h) would not be applicable to such crop, including any prior announcement which may have been made under such paragraphs with respect to such crop. The individual farm program acreage is the actual acreage planted on the farm to extra long staple cotton for harvest within the permitted extra long staple cotton acreage for the farm as established under this paragraph.

Subparagraph (B) authorizes the Secretary to make land diversion payments to producers of extra long staple cotton, whether or not an acreage limitation program for extra long staple cotton is in effect, if the Secretary determines that land diversion payments are necessary to assist in adjusting the total national acreage of extra long staple cotton to desirable goals. Land diversion payments would be made to producers who, to the extent prescribed by the Secretary, devote to approved conservation uses an acreage of cropland on the farm in accordance with land diversion contracts entered into by the Secretary with such producers. The amounts payable to producers under land diversion contracts may be determined through the submission of bids for such contracts by producers in such manner as the Secretary may prescribe or through such other means as the Secretary determines appropriate. In determining the acceptability of contract offers, the Secretary must take into consideration the extent of the diversion to be undertaken by the producers and the productivity of the acreage diverted. The total acreage to be diverted under agreements in any county or local community must be limited so as not to affect adversely the economy of the county or local community. The provision is comparable to the provision contained in the upland cotton program.

Subparagraph (C) authorizes the reduced acreage and the diverted acreage to be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies. The Secretary may pay an appropriate share of the cost of practices designed to carry out this purpose. The Secretary may provide for an additional payment on such acreage in an amount determined by the Secretary to be appropriate in relation to the benefit to the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm, as the Secretary may prescribe, by the general public, for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

Subsection (h)(9) requires an operator of a farm desiring to participate in the target price program to execute an agreement with the Secretary providing for such participation not later than a date as the Secretary may prescribe. The Secretary may, by mutual agreement with the producers on the farm, terminate or modify any such agreement if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

Subsection (h)(10) requires the Secretary to provide for the sharing of payments under this subsection for any farm among the producers on the farm on a fair and equitable basis.

Subsection (h)(11) requires the Secretary to provide adequate safeguards to protect the interests of tenants and sharecroppers.

Subsection (h)(12) provides that if the failure of a producer to comply fully with the terms and conditions of the extra long staple cotton program precludes the making of loans and payments, the Secretary may, nevertheless, make loans and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure. The Secretary may authorize the county and State ASC committees to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet such other requirements does not affect adversely the operation of the program.

Subsection (h)(13) authorizes the Secretary to issue such regulations as the Secretary determines necessary to carry out the provisions of this subsection.

Subsection (a)(14) requires the Secretary to carry out the program through the Commodity Credit Corporation.

Subsection (h)(15) makes the provisions of subsection 8(g) of the Soil Conservation and Domestic Allotment Act (relating to assignment of payments) applicable to payments made under the extra long staple cotton.

Subsection (h)(16) prohibits the Secretary from requiring compliance on a farm with the terms and conditions of any other commodity program as a condition of eligibililty for loans or payments under this subsection.

Subsection (h)(17) requires the Secretary to make recourse loans available to producers of extra long staple cotton on seed cotton in accordance with authority vested in the Secretary under the Commodity Credit Corporation Charter Act.

Subsection (h)(18) provides that references made in sections 402, 403, 406, 407, and 416 of the Agricultural Act of 1949 to the terms "support price", "level of support", and "level of price support" shall be considered to apply as well to the level of loans for extra long staple cotton under this subsection; and references to the terms "price support", "price support operations", and "price support program" in such sections and in section 401(a) shall be considered as applying as well to the loan operations for extra long staple cotton under this subsection.

Section 5. This section amends section 407 of the Agricultural Act of 1949 to provide that beginning upon the date of enactment of the bill, the Commodity Credit Corporation may sell extra long staple cotton for unrestricted use at such price levels as the Secretary determines appropriate to maintain and expand export and domestic markets for such cotton. Under current law, such sales may not be made at less than 115 percent of the current loan rate plus reasonable carrying charges.

Section 6. This section amends section 1101(1) of the Agriculture and Food Act of 1981 to all extra long staple cotton to the $50,000 payment limitation on payments that a person may receive under one or more of the annual programs under the Agricultural Act of 1949 for wheat, feed grains, upland cotton, and rice.

Mr. COCHRAN. Mr. President, I introduced in the Senate S. 1548, the original administration proposal for a new extra long staple cotton program. This proposal establishes a production-marketing program far more sensitive to market supply and demand conditions than the current program. Furthermore, in doing so it will reduce Government costs of the extra long staple cotton program.

This legislation is widely supported. It has strong backing by the administration, producers, and users. At this time however, the most important consideration is for this legislation to move forward and be signed into law so the Department of Agriculture and the ELS cotton industry can have the benefits of a much improved and more efficient program this marketing year. The means available to accomplish this objective is for the Senate to consider and move to final passage H.R. 3190, a House-passed version of the administration proposed legislation. The one difference in H.R. 3190 and the administration proposal is a target price provision that the administration has indicated they would not oppose. The target price provision included in H.R. 3190 is reasonable and I believe will serve to stabilize producer income.

Passage of H.R. 3190 by the Senate before the August recess is very important for continued growth of ELS cotton production in the United States. Currently, domestic mill demand for ELS cotton exceeds domestic supply available at competitive prices. Since foreign ELS cotton is available at lower prices, domestic mills will be forced to import their additional needs. This legislation will allow the Secretary of Agriculture to competitively price CCC owned ELS cotton and thereby make domestic cotton available to U.S. mills. If the Senate fails to complete action on H.R. 3190 prior to the August recess the Government will lose a great opportunity to begin reducing excessive stocks of ELS cotton.

Since its formation in 1953, the ELS cotton growers association, Supima Cotton Association of America, has financed through annual contributions of $3 per bale by grower members, an extensive research and promotion program. The association is currently involved in the most aggressive and potentially effective promotion program since it started. Also, several domestic mills currently have promotion programs for extra long staple cotton products. As a result of the combined

efforts of the promotions conducted by growers and mills there is a significant increase in the demand for U.S. grown ELS cotton. Mr. President, I see no other way to satisfy this demand with U.S. grown ELS cotton on a timely and competitive basis than the Senate moving to final passage of H.R. 3190 before the August recess. This legislation will allow the Secretary of Agriculture to reduce the Government cost of the ELS program in general and specifically by reducing CCC inventory currently owned. I urge my colleagues to support passage of H.R. 3190.

Mr. DECONCINI. Mr. President, first, Mr. President, I would like to thank the chairman of the Senate Agriculture Committee, Senator HELMS, for his assistance in bringing H.R. 3190, the Extra Long Staple Cotton Act of 1983, to the Senate floor in such an expeditious manner. This legislation is vital to the extra long staple (ELS) cotton producers in my State and I am most appreciative of the chairman's help and support.

As you may know, ELS cotton is a specialty cotton which is grown in Arizona, New Mexico, and west Texas. Historically, it has been used in sewing thread and for military fabrics. However, recently its use has been expanded to include high quality knits, sheets, towels, and fine home furnishings. The existing ELS cotton program has worked well over the years. However, a number of factors have coalesced to render the program ineffective and increasingly expensive for the Government to operate—the recession, the strong U.S. dollar, reduced exports, and the decision of the Governments of Egypt and Sudan—our major competitors—to reduce the price of their ELS cotton by 25 to 30 percent.

Current law provides for acreage restrictions through allotments, quotas and penalties and price support by means of nonrecourse loans. In addition, current law prohibits the Commodity Credit Corporation from selling its surplus stocks of ELS cotton at less than 115 percent of the loan rate plus carrying charges. At that rate, ELS cotton is noncompetitive. It will prevent the sale of this surplus cotton far into the future, resulting in ever-increasing Government outlays. Clearly, the current program is in need of an overhauling.

The legislation before us today will resolve our existing ELS cotton surplus problems, will establish a more market-oriented program and will reduce Government outlays. It is supported by the administration and producers alike.

The bill, effective for the 1984 and subsequent crop years of ELS cotton, will:

First, repeal authority for marketing quotas.

Second, suspend provisions relating to acreage allotments and penalties.

Third, lower the minimum loan rate from 175 to 150 percent of the upland cotton loan rate.

Fourth, establish a 10-month loan period with an optional 8-month extension at the discretion of the Secretary, similar to upland cotton.

Fifth, establish a target price for ELS cotton at 120 percent of the ELS loan rate. The target price would be used to compute deficiency payments, and would be subject to the overall $50,000 limit on payments under the programs for wheat, feed grains, upland cotton and rice.

Sixth, provide the Secretary with discretion to make advance deficiency payments to producers who agree to comply with the acreage limitation program. Advance payment cannot exceed 50 percent of the projected payment rate as under the upland cotton program.

Seventh, provide for farm program acreages, derived from a national program acreage, and farm program yields to be used to determine deficiency payments, but limit payments to the acreage actually planted to the crop. These are similar to provisions for upland cotton.

Eighth, authorize an acreage limitation program, if needed, for ELS cotton, similar to upland cotton.

Ninth, provide for the acreage limitation to be achieved by applying a uniform percentage reduction to an acreage base for the farm equal to the average acreage planted and considered planted to ELS cotton in the three crop years immediately preceding the year previous to the year for which the determination is made.

Tenth, establish an acreage base reserve for each of the 1984, 1985, and 1986 crops equal to 5 percent of the total of the farm acreage bases established for such crops.

Eleventh, authorize a paid land diversion program, similar to upland cotton, if needed. Such payments would be included in the overall $50,000 payment limitation.

Twelfth, authorize, effective upon enactment, the sale of CCC-owned cotton for unrestricted use at such price levels as the Secretary determines appropriate to maintain and expand export and domestic markets for such cotton.

This legislation will result in increased demand for ELS cotton both at home and abroad, will reduce Government inventories and outlays, and will provide income protection to producers. It has been very carefully crafted and I am convinced that it will be an effective program. I urge my colleagues to adopt it.

Again, Mr. Chairman, I would like to reiterate my thanks for your assistance and support.

The PRESIDING OFFICER. If there are no amendments, the question is on the third reading of the bill.

The bill was ordered to be read a third time, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. COCHRAN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CORRECTIONS IN THE ENROLLMENT OF H.R. 3190

Mr. BAKER. Mr. President, I send to the desk a concurrent resolution to make corrections in H.R. 3190, and I ask that it be stated by the clerk.

The PRESIDING OFFICER. The clerk will state the resolution by title.

The assistant legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 63) directing the Clerk of the House of Representatives to make corrections in the enrollment of the bill (H.R. 3190).

Mr. BAKER. Mr. President, I ask for the immediate consideration of the concurrent resolution.

The Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The resolution (S. Con. Res. 63) was agreed to, as follows:

S. CON. RES. 63

Resolved by the Senate (the House of Representatives concurring), That in the enrollment of the bill (H.R. 3190) to establish an improved program for extra long staple cotton, the Clerk of the House of Representatives shall make the following corrections:

(1) In the eleventh sentence of the proposed subsection (h)(8)(A) of section 103 of the Agricultural Act of 1949, contained in section 4 of the bill, strike out "such provision" and insert in lieu of thereof "such production".

(2) In proposed subsection (h)(9) of section 103 of the Agricultural Act of 1949, contained in section 4 of the bill, strike out "paragraph (3)" and insert in lieu thereof "paragraph (8)".

Mr. BAKER. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, there may be a few other odds and ends we can deal with, but while those things mature, if they do, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. NUNN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

A TRIBUTE TO ATLANTA PHYSICIANS

Mr. NUNN. Mr. President, I would like to take a few minutes today to share with my Senate colleagues the unique contributions of a group of dedicated physicians from Atlanta, Ga., to the people of the Caribbean Island of Haiti.

Since 1956, the members of the Peachtree Orthopaedic Clinic have been providing orthopedic care in Haiti through a unique cooperative program with three institutions on the island. Each of the partners of the Peachtree Orthopaedic Clinic has spent 12 to 15 days every 4 months holding clinics, performing surgery and providing other consultative orthopedic services to these institutions.

Dr. James Funk, senior partner of the Peachtree Orthopaedic Clinic, initiated this cooperative program in 1954 when he visited St. Vincent's School, a school for children with visual, hearing, and orthopedic handicaps. At this time, Dr. Funk met with Sister Joan Margaret, an Episcopal nun and professional physical therapist who founded the school, and assisted in the development of a brace shop and an outpatient treatment program for orthopedically handicapped children.

On a return visit the following year, Dr. Funk met with Dr. and Mrs. W. L. Mellon who were planning the development and construction of the Albert Schweitzer Hospital in the Artibonite Valley, a medically underserved area about 90 miles from Port au Prince. This hospital was opened in 1957 and is now a full-service, 50-bed institution that offers a wide range of outpatient services as well as an intensive community health and preventive medicine program. The Mellons live at the hospital and direct its activities.

On the north shore of Haiti is the House of Hope, the third of the cooperating institutions. This convalescent facility for children with postoperative conditions was founded by Miss Caroline Bradshaw, a Baptist missionary and nurse.

The orthopedic conditions treated at these institutions include tuberculosis of the bone, delayed effects of infections, unusual congenital abnormalities, and some complications of trauma that are not commonly seen in orthopedic practice in this country.

Dr. Joseph H. Dimon, III, Dr. Jeffrey T. Nugent, and Dr. Robert E. Wells have worked with Dr. Funk in providing the three-times-per-year rotation to these institutions.

This unique program offers a rewarding opportunity for these dedicated professionals to provide specialized care in a corner of the world where the need is unusually great. I commend and thank these physicians for their unselfish service to the people of Haiti and for the example they have set for all of us.

CENTRAL AMERICA: THE REAL LEGACY OF VIETNAM

Mr. QUAYLE. Mr. President, critics of President Reagan's Central American policy warn, with increasing urgency, that he is leading us down the same bloody, unwinnable, tragic road that we experienced in Southeast Asia nearly 20 years ago.

Certainly some broad comparisons can be made between Southeast Asia then and Central America now. In both instances we were faced with societies torn apart by war, afflicted with grinding poverty and bereft of democratic institutions and democratic traditions. In both instances democratic forces have tried against immense odds to gain a foothold while a brutal left and a brutal right, caught up at least in part in great power politics, struggle for control of the country and the souls of the people.

But, variations on this theme have been present in many Third World upheavals since the end of World War II and we better resign ourselves to the fact that they will be present and threatening to American interests for a long time to come. None of this means that all roads necessarily must end in the same place. The strengths and variety of the contending forces, the proximity of the upheavel to the United States and U.S. interests, the type and level of outside support, the degree of support contending forces have within the population, the terrain, resources, commitment, intelligence and many other variables make a significant difference.

Mr. President, the legacy of Vietnam is not that we are necessarily doomed to repeat the same tragedy in Central America. The real legacy of Vietnam is that it has so paralyzed our thinking that rational debate is virtually impossible. Vietnam has made us paranoid, it has terrorized us, it has blinded us to our own interests. We are afraid, halfhearted, unable to act in our own self interest and the interests of our friends. Mostly because of Vietnam we have all but lost the ability to use the principal tools of policy formation—economic, political, diplomatic, and military tools—with finesse and judiciousness as well as with determination and purpose.

Does this mean that Vietnam and Southeast Asia have nothing to teach us about Central America? Certainly not. We have, or should have, learned many things. We should have learned that economic reform, pacification of the countryside, social justice, and the establishment of democratic institutions cannot be accomplished overnight. In short, Mr. President, we should have learned that nation building, especially in the Third World, is a long, tedious, agonizing process. We should have learned, too, that even if—or when—we tire of the challenge, the flow of refugees will not stop or the hunger, killing, disenfranchisement, and terror will come to an end. In fact, if the triumph of totalitarianism in Southeast Asia has taught us anything, it has taught us exactly the opposite. The refugee camps have swollen, hunger stalks the landscape, killing is commonplace, disenfranchisement is the political reality, and terror is rampant. Somehow, Mr. President, when the comparisons between Southeast Asia and Central America are made, this aspect is conveniently forgotten.

We have deep and abiding interests in Central America, not only to help arrest the spread of Communist revolution, but to help foster the growth of democratic institutions, encourage improvements in human rights and social justice, and aid in economic development. Our goals must be clearly laid out and clearly understood. But, Mr. President, we cannot help foster a better life in Central America on the cheap. Shortcuts will not work. We must be prepared to use all the foreign policy tools at our disposal. We cannot take up the challenge blindly or halfheartedly. We must not provide just enough economic diplomatic and military aid to assuage our consciences and not enough to do the job properly. That is a prescription for disaster in Central America and a sure way to catapult us into another Vietnam. We must recognize that the problems we face in Central America will require a long-term, demanding commitment. We must not tire of the challenge halfway through and then recoil into isolationism cloaked as pious, self righteous indignation. That is exactly what our enemies in Central America, Cuba, and the Soviet Union expect. And, why not? History and the American political process give them good reason to hope.

Mr. President, we need the military shield in Central America—used properly it is a legitimate foreign policy tool. Let us not be naive, the military pressure is critical, without it the incentive to negotiate is greatly reduced. This applies not only to the exercises off the coast of Nicaragua and in Honduras, but also aid to the anti-Sandinista rebels and to the friendly governments in the area. The military pressure has just begun to work—Nicaragua, Cuba and the insurgents in El Salvador seem to be more amenable to negotiations now than any time in the

past. That, Mr. President, is exactly why the action by the House of Representatives to cut off aid to anti-Sandinista rebels earlier this month is so terribly ill-timed and ill-conceived. What signal does it send? Even if the Senate holds firms, the House action is not only a political and psychological defeat for the administration, more importantly it could set back chances for a negotiated settlement throughout the area. The House action must give Managua and Havana pause to wonder—"maybe if we hang tough, maybe if we string the Americans along they will tire of the challenge, maybe they will lose their nerve over the long haul." Certainly the precedent is there, and the House's action has reinforced it. And, unfortunately, Mr. President, the Boland amendment is a woefully inadequate substitute. The $80 million it provides over 2 years in overt aid is a drop in the bucket; it will have little effect in aiding friendly governments to interdict the flow of arms to the insurgents in El Salvador. Once again, Mr. President, a prescription for failure—just enough money to assuage our consciences, but not enough to do the job. If anything will drive us toward another Vietnam, it will be exactly this kind of action. The Department of Defense estimates that it would cost $300 million the first year and $100 million every year thereafter to interdict arms effectively over so large an area.

In the final analysis, however, the question is no longer overt aid versus covert aid. Once covert aid is publicly known, it ceases to be covert. The real question, Mr. President, is whether or not we are going to supply aid to those forces that are in the best position to interdict arms and help pressure the Sandinista Government and the insurgents in El Salvador to come to the negotiating table. If these are indeed our goals, then clearly we as legislators must continue for the time being not only to support friendly governments in the area but to support rebel forces in Nicaragua and our own maneuvers. Not only does an adequate military shield provide the best chance for negotiations, it may provide the only chance we have to persuade Cuba and Nicaragua to stop exporting revolution, to encourage political and social reform, and to make large scale economic aid viable.

The PRESIDING OFFICER (Mr. EAST). The majority leader.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I have two matters which have been considered by the minority leader and he has indicated to me that they meet with his approval. I will state them now for the consideration of other Members.

TO PROVIDE FOR THE OPERATION OF CERTAIN FOREIGN-BUILT VESSELS IN THE COASTWISE TRADE OF ALASKA

Mr. BAKER. Mr. President, I ask unanimous consent that the Commerce Committee be discharged from further consideration of H.R. 1372, and I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 1372) to provide for the operation of certain foreign-built vessels in the coastwise trade of Alaska.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 1372) was ordered to a third reading, was read a third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. MATSUNAGA. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORITY FOR THE COMMITTEE ON ARMED SERVICES TO FILE A REPORT ON AUGUST 15 TO ACCOMPANY S. 675

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Armed Services have from 9 a.m. until 3 p.m. on August 15 to file a conference report to accompany S. 675, the DOD authorization bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. I thank the Chair.

FLOOR MANAGEMENT OF FARM BILL

Mr. HELMS. Mr. President, as we move to recess, I want to express my appreciation to those Senators who have assisted in the management of the farm legislation which we had hoped to pass during this past week.

Of course, I as chairman and Senator HUDDLESTON as ranking minority member of the committee share the principal duty for the management of the bill. But, as is our usual practice with farm bills involving a number of commodities, Senators with a particular interest in one commodity or the other have taken major responsibilities for management of that section of the bill.

The senior Senator from Kansas (Mr. DOLE) and the senior Senator from Indiana (Mr. LUGAR) are the two ranking majority members of the Agriculture Committee and they have a strong interest in legislation and policies relating to wheat and feed grains. The senior Senator from Iowa (Mr. JEPSEN) is one of the principal authors—along with Senator HUDDLESTON—of the target price compromise embodied in the committee amendment which we were unable to consider. All three of these Senators have a strong interest in this kind of legislation, and I am pleased at the major role they have played in dealing with these matters.

I might say parenthetically, Mr. President, this is the procedure we have followed throughout my tenure as chairman of the Agriculture Committee and prior to that when the distinguished Senator from Georgia Mr. Talmadge was chairman.

The Senator from California (Mr. WILSON) offered in committee that part of the bill relating to the cotton PIK program, and the Senator from Mississippi (Mr. COCHRAN) expressed strong support for that provision of the bill.

The senior Senator from Minnesota (Mr. BOSCHWITZ) and the Senator from Vermont (Mr. LEAHY) have demonstrated significant leadership in dealing with the dairy issues, and as principal authors of the dairy compromise embodied in the bill, we are pleased at their able assistance in handling dairy matters.

Senator HUDDLESTON and I have authored the tobacco provisions in close association with our colleagues in the House of Representatives and we were prepared to handle all details relating to tobacco in this bill, which was delayed in its consideration.

It goes without saying all of these Senators and the other members of the committee have had an active interest in the entire bill, and I will say with deep gratitude, Mr. President, that no chairman of any committee in the Senate is blessed with a more conscientious and able membership than is the Senator from North Carolina. I am grateful to each member of the committee. I will say to them, thank you for your teamwork, and, when we return here in September, we will resume our efforts to enact the legisla-

tion which we were not able to have considered this week.

Mr. President, I yield the floor and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. JEPSEN). Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I have discussed with the minority leader the procedure that I am about to suggest to deal with the House passed bill, H.R. 3409, which is at the desk after first reading and pending second reading in the next legislative day pursuant to the provisions of rule XIV.

Mr. President, I believe that this matter is cleared on both sides, and is is my intention in a moment to ask that the Chair lay before the Senate H.R. 3409.

It is my understanding that at that time the distinguished Senator from Kansas (Mr. DOLE) who has been in negotiations with the chairman of the committee, with the Senator from Ohio (Mr. METZENBAUM) and with goodness know how many others for the last hour and a half, will offer an amendment to this bill to the House passed bill which will incorporate certain provisions of the bill on our calendar.

As far as I can tell we have cleared our whole process and are ready to proceed in that way.

FEDERAL SUPPLEMENTAL COMPENSATION ACT AMENDMENTS

Mr. BAKER. Mr. President, at this time I ask unanimous consent that the Senate turn to the consideration of H.R. 3409, which is at the desk.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 3409) to amend the Federal Supplemental Compensation Act of 1982 with respect to the number of weeks of benefits paid in any State.

There being no objection, the Senate proceeded to consider the bill.

AMENDMENT NO. 2126

Mr. DOLE. Mr. President, I send an amendment to the desk in the nature of a substitute and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE), on behalf of himself, Mr. HEINZ, and Mr. BOSCHWITZ, proposes an amendment numbered 2126.

Mr. DOLE. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out subsections (a) and (b) of the bill, redesignate subsection (c) as subsection (d), and insert in lieu of subsections (a) and (b) the following:

(a) Subparagraph (B) of section 602(e)(2) of the Federal Supplemental Compensation Act of 1982 is amended to read as follows:

"(B) If the applicable limit for a State, as determined under clause (ii) of subparagraph (A), for the week beginning July 24, 1983, was a number equal to or less than such State's applicable limit for the week beginning March 27, 1983, under this paragraph (as in effect for such week) reduced by four, the applicable limit for such State shall not be less than the applicable limit for the week beginning July 24, 1983, for any week after the week beginning after July 24, 1983.

(b) The amendment made by subsection (a) shall apply to weeks beginning after July 24, 1983.

(c)(1) In the case of an account established before the week beginning June 5, 1983, the applicable limit under section 602(e)(2)(A)(ii) of the Federal Supplemental Compensation Act of 1982 shall in no event be less than the number of weeks applicable to such State for the week beginning March 27, 1983, under section 602(e)(2) of such Act (as in effect for such week) reduced by four.

(2) Paragraph (1) shall apply only to compensation for weeks of unemployment beginning on or after the date of the enactment of this Act.

In subsection (d) as so redesignated, insert "or the provisions of subsection (c)" after "the amendment made by subsection (a)" each place it appears.

SEC. . Effective October 1, 1983, the Temporary Emergency Food Assistance Act of 1983 (title II of Public Law 98-8; 97 Stat. 35 and 36) is amended by—

(1) in section 201, striking out "the Act" and inserting in lieu thereof "this Act";

(2) inserting, after section 201, a new section 201A as follows:

"ELIGIBLE RECIPIENT AGENCIES

"SEC. 201A. As used in this Act, the term 'eligible recipient agencies' means public or nonprofit organizations that administer—

"(1) activities and projects providing nutrition assistance to relieve situations of emergency and distress through the provision of food to needy persons, including low-income and unemployed persons;

"(2) school lunch programs, summer camps for children, and other child nutrition programs providing food service;

"(3) nutrition projects operating under the Older Americans Act of 1965, including congregate nutrition sites and providers of home-delivered meals;

"(4) activities and projects that are supported under section 4 of the Agriculture and Consumer Protection Act of 1973;

"(5) activities of charitable institutions, including hospitals and retirement homes, to the extent that needy persons are served; or

"(6) disaster relief programs;

and that have been designated by the appropriate State agency, or by the Secretary, and approved by the Secretary for participation in the program established under this Act.";

(3) amending section 202(a) to read as follows:

"SEC. 202. (a) Notwithstanding any other provision of law, in order to complement the domestic nutrition programs, make maximum use of the Nation's agricultural abundance, and expand and improve the domestic distribution of price-supported commodities, commodities acquired by the Commodity Credit Corporation that the Secretary of Agriculture (hereinafter referred to as the 'Secretary') determines, in his discretion, are in excess of quantities needed to—

"(1) carry out other domestic donation programs,

"(2) meet other domestic obligations (including quantities needed to carry out a payment-in-kind acreage diversion program),

"(3) meeting international market development and food aid commitments, and

"(4) carry out the farm price and income stabilization purposes of the Agricultural Adjustment Act of 1938, the Agricultural Act of 1949, and the Commodity Credit Corporation Charter Act,

shall be made available by the Secretary, without charge or credit for such commodities, for use by eligible recipient agencies for food assistance.";

(4) in section 202(b)—

(A) in the first sentence, striking out "shall" and inserting in lieu thereof "may"; and,

(B) in the second sentence, striking out "December 1, 1983" and inserting in lieu thereof "October 1, 1985";

(5) inserting, after section 203, new sections 203A, 203B, and 203C as follows:

"INITIAL PROCESSING COSTS

"SEC. 203A. The Secretary may use funds of the Commodity Credit Corporation to pay costs of initial processing and packaging of commodities to be distributed under the program established under this Act into forms, and in quantities, suitable, as determined by the Secretary, for use in individual households when such commodities are to be consumed by individual households or for institutional use, as applicable. The Secretary may pay such costs in the form of Corporation-owned commodities equal in value to such costs, except that wheat from the Food Security Wheat Reserve may not be used to pay such costs. The Secretary shall ensure that any such payments in kind will not displace commercial sales of such commodities.

"FEDERAL AND STATE RESPONSIBILITIES

"SEC. 203B. (a) The Secretary shall, as expeditiously as possible, provide the commodities made available under this Act in such quantities as can be used without waste to State agencies designated by the Governor or other appropriate State official for distribution to eligible recipient agencies, except that the Secretary may provide such commodities directly to eligible recipient agencies and to private companies that process such commodities for eligible recipient agencies under sections 203 and 203A of this Act.

"(b) State agencies receiving commodities under this Act shall, as expeditiously as possible, distribute such commodities, in the quantities requested (to the extent practicable), to eligible recipient agencies within their respective States. However, if a State agency cannot meet all requests for a particular commodity under this Act, the State

agency shall give priority in the distribution of such commodity to eligible recipient agencies providing nutrition assistance to relieve situations of emergency and distress through the provision of food to needy persons, including low-income and unemployed persons.

"(c) Each State agency receiving commodities for individual household use under this Act shall distribute such commodities to eligible recipient agencies in the State that serve needy persons, and shall, with the approval of the Secretary, determine those persons in the State that shall qualify as needy persons eligible for such commodities.

"ASSURANCES; ANTICIPATED USE

"SEC. 203C. (a) The Secretary shall take such precautions as the Secretary deems necessary to assure that any eligible recipient agency receiving commodities under this Act will provide such commodities to persons served by the eligible recipient agency and will not diminish its normal expenditures for food by reason of the receipt of such commodities. The Secretary shall also take such precautions as the Secretary deems necessary to assure that commodities made available under this Act will not displace commercial sales of such commodities or the products thereof. The Secretary shall not make commodities available for donation in any quantity or manner that the Secretary, in the Secretary's discretion, determines may, substitute for the same or any other agricultural produce that would otherwise be purchased in the market.

"(b) Commodities provided under this Act shall be distributed only in quantities that can be consumed without waste. No eligible recipient agency may receive commodities under this Act in excess of anticipated use, based on inventory records and controls, or in excess of its ability to accept and store such commodities.";

(6) in section 204—

(A) designating the last sentence as subsection (c);

(B) inserting, after the first sentence, a new subsection (b) as follows:

"(b) There are hereby authorized to be appropriated $50,000,000 for each of the fiscal years ending September 30, 1984, and September 30, 1985, for the Secretary to make available to the States for storage and distribution costs of which not less than 20 percent of the amount appropriated under this subsection in any fiscal year shall be made available for paying or providing advance payments to cover the actual costs incurred by charitable institutions, food banks, hunger centers, soup kitchens, and similar nonprofit eligible recipient agencies providing nutrition assistance to relieve situations of emergency and distress through the provision of food to needy persons, including low-income and unemployed persons: *Provided*, That in no case shall such payments exceed five per centum of the value of commodities distributed by any such agency."; and

(C) in subsection (c), as so designated by subclause (A) of this clause, striking out "this appropriation" and inserting in lieu thereof "appropriations made or authorized under this section";

(7) in section 205—

(A) amending the heading to read as follows:

"RELATIONSHIP TO OTHER PROGRAMS";

(B) inserting "(a)" after the section designation; and

(C) adding, at the end thereof, a new subsection "(b)" as follows:

"(b) Except as otherwise provided in section 203A of this Act, none of the commodities distributed under this Act shall be sold or otherwise disposed of in commercial channels in any form.";

(8) amending section 209 to read as follows:

"SEC. 209. Section 5(a)(2) of the Agriculture and Consumer Protection Act of 1973 (7 U.S.C. 612c note) is amended by striking out "amount appropriated for the provision of commodities to State agencies" and inserting in lieu thereof "sum of (A) the amount appropriated for the commodity supplemental food program and (B) the value of the additional commodities donated by the Secretary to State or local agencies for use in such program which are provided without charge against funds appropriated for such program and are included in food packages distributed to program participants";

(9) in section 210—

(A) inserting "(a)" after the section designation; and

(B) adding, at the end thereof, new subsections (b) and (c) as follows:

"(b) In administering this Act, the Secretary shall minimize, to the maximum extent practicable, the regulatory, recordkeeping, and paperwork requirements imposed on eligible recipient agencies.

"(c) With respect to the commodity distribution program under this Act in effect during the fiscal years ending September 30, 1984, and September 30, 1985, the Secretary shall, not later than October 1, 1983, publish in the Federal Register an estimate of the types and quantities of commodities that the Secretary anticipates are likely to be made available during the first twelve months of the program; and, prior to the beginning of the fiscal year ending September 30, 1985, the Secretary shall publish in the Federal Register an estimate of the types and quantities of commodities that the Secretary anticipates are likely to be made available during the second twelve months of the program under this Act: *Provided*, That the actual types and quantities of commodities made available by the Secretary under this Act may differ from the estimates."; and

(10) inserting, after section 210, new sections 211 and 212 as follows:

"FINALITY OF DETERMINATIONS

"SEC. 211. Determinations made by the Secretary of Agriculture under this Act and the facts constituting the basis for any donation of commodities under this Act, or the amount thereof, when officially determined in conformity with the applicable regulations prescribed by the Secretary, shall be final and conclusive and shall not be reviewable by any other officer or agency of the Government.

"PROGRAM TERMINATION

"SEC. 212. The provisions of this Act, with the exception of 207, shall terminate September 30, 1985.".

SEC. . Section 4(c) of the Agriculutre and Consumer Protection Act of 1973 is amended by inserting "Temporary" before "Emergency Food Assistance Act of 1983".

Mr. DOLE. Mr. President, do I have listed as cosponsor the distinguished Senator from Ohio (Mr. METZENBAUM).

The PRESIDING OFFICER. He is not listed.

Mr. DOLE. First, let me yield to the distinguished Senator from North Carolina.

Mr. HELMS. I thank the Senator.

Mr. President, this amendment is, in essence, the same as that which passed the Senate on March 15. At that time, Senator HATFIELD and Senator DOLE offered an amendment which I supported to consolidate the thrust of S. 17 which had been reported from the Committee on Agriculture, Nutrition, and Forestry with funding provided for such activities in the emergency jobs bill appropriation.

The Senate amendment provided for a program in both fiscal years 1983 and 1984. However, House conferees insisted on eliminating the fiscal year 1984 authority, thereby leaving all authority for a mandatory distribution expiring at the end of the present fiscal year, September 30, 1983.

This amendment again adopts that consolidated approach. I have agreed with the prime sponsors of the concept to agree to reducing the amount of money provided from $100 million annually in the earlier version to $50 million. Simultaneously, I have agreed to include an authorization for both fiscal years 1984 and 1985. This is consistent with our committee's budgetary concerns. Obviously, the net cost is the same. Of course, unlike the earlier amendment, no appropriation is included.

While this legislation goes a bit further than that approved by the committee, as I noted in March, it is consistent with the desires of both committees to improve the distribution system for surplus commodities.

Additionally, the Secretary's discretionary use of the food security wheat reserve has been changed such that he may use not more than 300,000 metric tons of wheat rather than 500,000 metric tons.

In other respects, the provision is very similar to that which earlier passed the Senate. It provides for a continuation of that effort, and I commend it to the Senate as a part of this package.

Mr. President, I ask unanimous consent to have printed in the RECORD a section-by-section summary of the legislation as well as a description from the Senate report accompanying S. 17.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SECTION-BY-SECTION ANALYSIS OF TEMPORARY EMERGENCY FOOD ASSISTANCE ACT OF 1983, AS AMENDED BY COMMODITY DISTRIBUTION AMENDMENT TO H.R. 3409

SHORT TITLE

Section 201 provides that the Act may be cited as the "Temporary Emergency Food Assistance Act of 1983".

ELIGIBLE RECIPIENT AGENCIES

Section 201a defines eligible recipient agencies as public or nonprofit organizations that administer—

(1) activities and projects, including those operated by charitable institutions and food banks, providing nutrition assistance to re-

lieve situations of emergency and distress through the provision of food to needy persons, including low-income and unemployed persons;

(2) school lunch programs, summer camps for children, and other child nutrition programs providing food service;

(3) nutrition projects operating under the Older Americans Act of 1965, including congregate nutrition sites and providers of home delivered meals;

(4) activities and projects that are supported under section 4 of the Agriculture and Consumer Protection Act of 1973;

(5) activities of charitable institutions, including hospitals and retirement homes, to the extent that needy persons are served; or

(6) disaster relief programs; and that have been designated by the appropriate State agency, or by the Secretary, and approved by the Secretary for participation in the program established under the Act.

AVAILABILITY OF CCC COMMODITIES

Section 202(a) provides that the Secretary of Agriculture shall make certain Commodity Credit Corporation commodities available, without charge or credit, for use by eligible recipient agencies for food assistance. Those commodities which shall be made available are those acquired by the Commodity Credit Corporation which the Secretary determines, in his discretion, are in excess of quantities needed during the fiscal year to—

(1) carry out other domestic donation programs,

(2) meet other domestic obligations (including quantities needed to carry out a payment-in-kind acreage diversion program),

(3) meet international market development and food aid commitments, and

(4) carry out the farm price and income stabilization purposes of the Agricultural Adjustment Act of 1938, the Agricultural Act of 1949, and the Commodity Credit Corporation Charter Act.

Section 202(b) provides that, if wheat stocks acquired by the Commodity Credit Corporation are not available for purposes of the Act, the Secretary may use up to 300,000 metric tons of wheat from the food security wheat reserve for purposes of the Act. Any wheat from the food security wheat reserve used for this purpose must be replenished with an equivalent quantity of wheat in accordance with the provisions of section 302(b) of the Food Security Wheat Reserve Act of 1980 by such date as is practicable, but before October 1, 1985. Under section 302(b) of the Food Security Wheat Reserve Act of 1980, the reserve may be replenished through designation of existing stocks of wheat acquired by the Commodity Credit Corporation or through purchases. However, use of funds for purchases of wheat to replenish the food security wheat reserve must be authorized in appropriation Acts.

PROCESSING AGREEMENTS

Section 203 provides that, whenever a commodity is made available without charge or credit under any nutrition program administered by the Secretary, the Secretary shall encourage consumption thereof through agreements with private companies under which the commodity is processed into end-food products for use by eligible recipient agenices, with the expense of the processing to be borne by the recipient agencies.

INITIAL PROCESSING COSTS

Section 203A provides that the Secretary may use funds of the Commodity Credit Corporation to pay costs in initial processing and packaging of commodities to be distributed under the program established under the Act into forms, and in quantities, suitable, as determined by the Secretary, for use in individual households when such commodities are to be consumed by individual households or for institutional use, as applicable. The Secretary may pay such costs in the form of Corporation-owned commodities equal in value to such costs, except that wheat from the Food Security Wheat Reserve may not be used to pay such costs. The Secretary shall ensure that any such payments in kind will not displace commercial sales of such commodities.

FEDERAL AND STATE RESPONSIBILITIES

Section 203B(a) provides that the Secretary shall, as expeditiously as possible, provide the commodities made available under the Act in such quantities as can be used without waste. These commodities shall be provided to State agencies designated by the Governor or other appropriate State official for distribution to eligible recipient agencies, except that the Secretary may provide such commodities directly to eligible recipient agencies and to private companies that process such commodities for eligible recipient agencies under Sections 203 and 203A of the Act.

Section 203B(b) provides that each State agency receiving commodities under the provisions of the Act shall, as expeditiously as possible, distribute those commodities in the quantities requested to eligible recipient agencies within the State. If a State agency cannot meet all requests for a particular commodity distributed to it under the Act, the State agency shall give priority to requests from nonprofit organizations that relieve situations of emergency and distress through the provision of food to needy persons, including low-income and unemployed persons.

Section 203B(c) provides that each State agency receiving commodities for individual household use under the Act shall distribute such commodities to eligible recipient agencies in the State that serve needy persons, and shall, with the approval of the Secretary, determine those persons in the State that shall qualify as needy persons eligible for such commodities.

ASSURANCES; ANTICIPATED USE

Section 203C(a) provides that the Secretary shall take such precautions as the Secretary deems necessary to assure that any eligible recipient agency receiving commodities under the Act will provide such commodities to persons served by the recipient agency and will not diminish its normal expenditures for food by reason of the receipt of such commodities. The Secretary shall also take such precautions as the Secretary deems necessary to assure that commodities made available under the Act will not displace commercial sales of such commodities or the products thereof. The Secretary shall not make commodities available for donation in any quantity or manner that the Secretary, in the Secretary's discretion, determines may substitute for the same or any other agricultural produce that would otherwise be purchased in the market.

Section 203C(b) provides that commodities provided under the Act shall be distributed only in quantities that can be consumed without waste. No eligible recipient agency may receive commodities under the Act in excess of anticipated use, based on inventory records and controls, or in excess of its ability to accept and store such commodities.

AUTHORIZATIONS AND APPROPRIATIONS

Section 204(a) appropriates for the period ending September 30, 1983, $50,000,000 for the Secretary to make available to the States for storage and distribution costs. Of this amount not less than $10,000,000 shall be made available for paying the actual costs incurred by charitable institutions, food banks, hunger centers, soup kitchens, and similar nonprofit organizations providing nutrition assistance to relieve situations of emergency and distress through the provision of food to needy persons, including low-income and unemployed persons. The section also provides that in no case shall such payments exceed five percent of the value of commodities distributed by any such agency.

Section 204(b) provides that there are authorized to be appropriated $50,000,000 for each of the fiscal years ending September 30, 1984, and September 30, 1985, for the Secretary to make available to the States for storage and distribution costs. Of this amount not less than 20 percent of the amount appropriated under this subsection in any fiscal year shall be made available for paying or providing advance payments to cover the actual costs incurred by charitable institutions, food banks, hunger centers, soup kitchens, and similar nonprofit eligible recipient agencies providing nutrition assistance to relieve situations of emergency and distress through the provision of food to needy persons, including low-income and unemployed persons. The section also provides that in no case shall such payments exceed five percent of the value of commodities distributed by any such agency.

The levels authorized are to be made available for paying the actual costs incurred by charitable institutions, food banks, hunger centers, soup kitchens, and similar nonprofit organizations providing nutrition assistance to relieve situations of emergency and distress through the provision of food to needy persons. However, such payments shall not exceed 5 percent of the value of the commodities distributed by any such agency. The remainder of the authorization would be available only for the costs of the States in storing and distributing such commodities to these "emergency relief" organizations. Thus, it is a continuation of the authority initiated in the jobs bill, Public Law 98-8.

Section 204(c) provides that the value of the commodities made available under this Act and the funds of the Commodity Credit Corporation used to pay the costs of initial processing, packaging (including forms suitable for home use), and delivering commodities to the States shall not be charged against appropriations made or authorized under this section.

RELATIONSHIP TO OTHER PROGRAMS

Section 205(a) provides that section 4(b) of the Food Stamp Act of 1977 shall not apply with respect to the distribution of commodities under the Act. Section 4(b) prohibits, with certain exceptions, the distribution of federally donated foods to households in jurisdictions where the food stamp program is in operation.

Section 205(b) provides that, except as otherwise provided in section 203A of the Act (relating to payment by the Secretary using Commodity Credit Corporation funds of the costs of initial processing and packag-

ing of commodities to be distributed under the program), none of the commodities distributed under the Act shall be sold or otherwise disposed of in commercial channels in any form.

COMMODITIES NOT INCOME

Section 206 provides that, notwithstanding any other provision of law, commodities distributed under the Act shall not be considered income or resources for any purposes under any Federal, State, or local law.

PROGRAM SAFEGUARDS

Section 207(a) provides that the Secretary shall obtain such assurances as the Secretary deems necessary that any eligible recipient agency receiving commodities under the Act will provide such commodities to persons served by the recipient agency and will not diminish its normal expenditures for food by reason of the receipt of such commodities. The Secretary shall also obtain such assurances as the Secretary deems necessary that commodities made available under the amendment will not displace commercial sales of such commodities or the products thereof.

Section 207(b) provides that commodities provided under the Act shall be distributed only in quantities that can be consumed without waste. No eligible recipient agency may receive commodities under the Act in excess of anticipated usage, based on inventory records and controls, or in excess of its ability to accept and store such commodities.

RELATIONSHIP TO THE FOOD STAMP ACT OF 1977

Section 208 provides that section 4(b) of the Food Stamp Act of 1977 shall not preclude the commodity distribution program authorized under the Act. Section 4(b) prohibits, with certain exceptions, the distribution of federally donated foods to households in jurisdictions where the food stamp program is in operation.

COST REIMBURSEMENT LIMITATION

Section 209 of the Act amends section 5(a)(2) of the Agriculture and Consumer Protection Act of 1973 to provide that, for fiscal years 1984 and 1985, the reimbursement of administrative costs incurred by State and local agencies in the operation of the commodity supplemental food program shall be no more than 15 percent of the sum of (A) the amount appropriated for the commodity supplemental food program and (B) the value of the additional commodities donated by the Secretary to State or local agencies for use in such program which are provided without charge against funds appropriated for such program and are included in food packages distributed to program participants. Previously, the reimbursement limit was set at no more than 15 percent of the amount appropriated for the provision of commodities to State agencies.

REGULATIONS

Section 210(a) requires the Secretary to issue regulations to implement the Act within 30 days.

Section 210(b) provides that the Secretary, to the maximum extent practicable, minimize the regulatory, recordkeeping and paperwork requirements imposed on eligible recipient agencies.

Section 210(c) requires that no later than October 1, 1983, the Secretary publish in the Federal Register an estimate of the types and quantities of commodities he anticipates are likely to be available during the first twelve months of the program and that prior to the beginning of fiscal year 1985, he publish an estimate of the types and quantities he anticipates are likely to be available during the second twelve months of the program. The section specifies that the actual types and quantities of commodities made available may differ from the Secretary's estimates.

FINALITY OF DETERMINATIONS

Section 211 provides that determinations made by the Secretary of Agriculture and facts constituting the basis for any donation or amount of donation, when officially determined in conformity with applicable regulations prescribed by the Secretary, shall be final and conclusive and not reviewable by any other officer or agency of the Government.

PROGRAM TERMINATION

Section 212 provides that all the provisions of the Act terminate on September 30, 1985 except for section Sec. 207 which specifies penalities for misuse of commodities.

TECHNICAL CORRECTION

Section 4(c) of the Agriculture and Consumer Protection Act of 1973 is amended by inserting "Temporary" before "Emergency Food Assistance Act of 1983."

Mr. HELMS. Mr. President, as I said earlier, I am pleased to cooperate with the distinguished Senator from Kansas, Senator DOLE, in expediting Senate consideration of this amendment.

Obviously, the Senate has already adopted this general approach previously, during the consideration of the so-called jobs bill.

The Senator from Kansas has done an excellent job in introducing this legislation, and shepherding it through the committee process. He has held hearings on the subject, including followup hearings very recently. He has a concern that the program work well.

I believe he shares my concern that this is a temporary answer to a temporary situation. We simply cannot establish a permanent program—neither because of the costs to the taxpayers nor because of the implications for dampened farm prices that such an action would imply.

Under the amendment, the substance of S. 17, as reported by the Committee on Agriculture, Nutrition, and Forestry, is incorporated into the bill.

The amendment is really a repeating of the earlier Senate action. The Senate amendment to the jobs bill provided for commodity distribution in both fiscal years 1983 and 1984. However, House Appropriation Committee conferees limited the provisions to fiscal year 1983. This action will therefore restore the previous Senate position for fiscal year 1984 and add fiscal year 1985.

Under the amendment, $50 million is authorized to provide administrative funding to assist in commodity distribution for States and various organizations that have been designated by State agencies, or the Secretary of Agriculture, and which have been approved by the Secretary.

The amendment includes the provision recommended by the Appropriations Committee during jobs bill consideration to specify that organizations that provide food assistance to low-income and unemployed persons—such as food banks, soup kitchens, and church related, and other private initiatives to help the poor—would receive priority in receiving the surplus commodities. A specified amount of 20 percent of appropriated funds is set aside to assist such organizations with local distribution costs. However, in no event may such reimbursements exceed actual costs; nor may they exceed 5 percent of the value of the commodities.

The remainder of the funds are to be available to pay for the State costs in distributing the commodities. He is required, however, to provide funding only for the emergency relief outlets cited above, although the commodities themselves will be available to all eligible organizations.

Mr. President, I think this amendment is a fair, comprehensive approach. I did not support some of the provisions included in this consolidated approach when the Agriculture Committee considered this legislation. Standing on their own, I would oppose some of them. However, the amendment, as a whole, is a responsible approach. It will complement the efforts initiated by President Reagan and Secretary of Agriculture John Brock.

I supported the use of these surpluses for foreign humanitarian purposes, and I think this amendment establishes a fine domestic program to distribute these temporary surpluses.

I would emphasize that all these donations are temporary. We must strengthen American agriculture and simultaneously encourage exports of farm products not sold in domestic markets.

I believe the amendment's focus is appropriate with its emphasis on assistance to organizations serving the poor. I have been impressed and gratified by the efforts of so many Americans who have volunteered to assist their fellow citizens, disadvantaged by temporary economic conditions. These efforts should be encouraged.

I ask unanimous consent that the following excerpts from the Senate Report 98-21 to accompany S. 17 be printed at this point in the RECORD to outline the background and explanation of the new commodity distribution program to be established.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

BACKGROUND

Commodities available.—Although commodities used in various commodity donation programs are popularly spoken of as one broad category, there are two distinct types of commodities which are distributed by the U.S. Department of Agriculture.

These types of commodities are acquired and donated under different authorities.

The first category of commodities are those which are acquired under the price support programs of the Department. These are the commodities affected by S. 17, as reported by the Committee. The Department of Agriculture uses two principal methods of supporting farm prices: (1) nonrecourse loans to farmers and (2) Government purchases of commodities. In the case of nonrecourse loans, price-supported commodities are acquired by the Commodity Credit Corporation (CCC) when a farmer forfeits the crop used as collateral for the loan (generally when market prices are below the amount of the loan plus accrued interest).

The following are commodities which are "price supported" through nonrecourse loans and which may be acquired by the CCC: wheat, rice, barley, corn, grain sorghum, oats, rye, soybeans, honey, upland and extra long staple cotton, peanuts, tobacco, and sugar. (Only price-supported commodities which can be used for food use are covered by S. 17.) Section 416 of the Agricultural Act of 1949 authorizes donation of price-support commodities acquired by the CCC.

The second method of supporting commodity prices—through direct Government purchases in the market—is used primarily to support the price of milk.

In recent years, actual CCC acquisitions of price-supported commodities have been primarily dairy products. Approximately 67 percent of the $5 billion value of CCC stocks at the beginning of fiscal year 1983 were dairy products. Rice, wheat, corn, grain sorghum, soybeans, honey, and some nonfood commodities (e.g., cotton) comprised the remaining existing stocks held by the CCC. A substantial portion of price-supported commodities, especially corn and wheat, are held in farmer-held reserves and are not available to the CCC for donation.

The following table outlines commodities (currently committed and uncommitted) held by CCC for the week ending February 25, 1983:

CCC COMMODITY INVENTORY ACTIVITY [1] FOR WEEK ENDING FEBRUARY 25, 1983

Commodity/million units [2]	Feb. 23, 1983		Committed	CCC-owned inventory		Total
	Outstanding under loan	Farmer-owned reserve		Unavailable for disposition [3]	Available for disposition	
Butter (pound)	0	0	45.2	([4])	430.7	475.9
Cheese (pound)	0	0	64.9	([4])	783.3	848.2
Nonfat dry milk (pound)	0	0	179.5	([4])	1,163.0	1,342.5
Barley (bushel)	33.1	82.2	[5] 2.7	0.3	2.1	5.1
Corn (bushel)	307.2	2,600.1	[5] 44.3	14.4	401.1	459.9
Grain sorghum:						
(Bushel)	15.9	453.2	[5] 28.0	1.4	18.5	47.9
(Hundredweight)	(8.9)	(253.8)	(15.7)	(0.6)	(10.3)	(26.6)
Oats (bushel)	5.4	4.3	0	0	0.7	0.7
Rye (bushel)	1.3	0	0	0	0.04	0.04
Soybeans (bushel)	378.0	0	0	1.1	16.0	17.1
Wheat (bushel)	95.5	1,109.5	[6] 147.0	5.3	34.1	186.4
Rice (hundredweight)	55.3	0	0	3.0	16.8	19.8
Honey (pound)	86.6	0	0	0	26.0	26.0
Upland cotton (bale)	6,987,900	0	0	0	86,576	86,576
ELS cotton (bale)	75,300	0	0	0	4,013	4,013
Peanuts (pound)	[7] 175.5	0	0	0	0	0
Tobacco (pound)	[7] 767.7	0	0	0	0	0

[1] Open-market purchases for specific donations excluded.
[2] Cotton in single units.
[3] In transit, etc.
[4] Not available.
[5] Disaster Reserve.
[6] Food Security Wheat Reserve.
[7] As of Feb. 18, 1983.

The second category of commodities donated by the Department are perishable agricultural commodities. The commodities in this category are primarily meat, poultry, fruits, and vegetables. Under section 32 of the Act of August 24, 1935, the Secretary of Agricultural is permitted to purchase perishable commodities to remove surpluses of those commodities in the markets. These commodities are subsequently donated, under section 32 and other authorities, to schools for use in the national school lunch program and to certain other regular Department of Agriculture feeding programs. These commodities are often described as "section 32 commodities" or "surplus removal" commodities, and are not affected by the provisions of S. 17, as reported, although it is intended that the existing policy of purchasing and donating specific surpluses under section 32 authority will continue.

The existing system.—Commodity donations for two types of outlets are mandated by law. The National School Lunch Act (section 6) requires that a minimum level of commodities (or, in some limited instances, cash in lieu of commodities) be provided to child nutrition programs. In fiscal year 1982, the minimum mandated level of commodity support for school lunch and child care food programs was 11 cents per meal served. Total Federal commodity support amounted to approximately $440 million in fiscal year 1982 (including approximately $30 million in cash in lieu of commodities). This was in addition to approximately $2.8 billion in cash assistance to the various child nutrition programs.

(Note: Section 8 of the Child Nutrition Act of 1966 also specifically authorizes donation of commodities to schools. Section 14(a) of the National School Lunch Act permits the use of section 32 and CCC funds to purchase commodities for the school lunch program.)

In addition, section 311 of the Older Americans Act of 1965 requires that a minimum level of commodity support (or, cash in lieu of commodities) be provided to elderly nutrition projects assisted under that Act. In fiscal year 1982, the support level was 51.5 cents per meal served, and Federal assistance of this type totaled approximately $94 million, with the majority ($85 million) made up of cash in lieu of commodities.

Regular commodity support for other types of outlets is authorized by section 4 of the Agriculture and Consumer Protection Act of 1973. Under this authority, the Department of Agriculture is authorized, using direct appropriations, to purchase commodities to maintain traditional levels of commodity support for Indians, commodity supplemental food programs (serving women, infants, children, and the elderly), charitable institutions, summer camps for children, the Trust Territory of the Pacific Islands, and disaster areas. Section 32 of the Act of August 24, 1935, and section 416 of the Agricultural Act of 1949 supplement this authority by authorizing donations to these outlets of commodities acquired through surplus removal of price-support operations. Approximately $180 million in regularly programmed commodities were provided to these outlets in fiscal year 1982, including certain dairy donations to charitable institutions not charged to appropriations.

The commodities provided to these regular outlets are a mixture of section 32 commodities described earlier and those price-supported commodities acquired by the Commodity Credit Corporation. In fiscal year 1982, some 80 percent of the mandated commodities to schools and those provided to the outlets described above—$400 million of the $500 million total—was made up of section 32 commodities while the remainder was composed of price-supported commodities, such as dairy products, (wheat) flour, peanut butter, rice, and soybean oil, made available under section 416 of the agricultural Act of 1949.

Commodities furnished under these authorities are usually referred to as mandated or entitlement commodities, particularly with reference to the commodities provided for the child nutrition programs, such as the national school lunch program.

In addition to the authorities requiring commodity donations, the Secretary has discretionary authority to donate what are termed "bonus commodities". These bonus commodities may consist of both section 32 commodities or those acquired by the CCC through its price-support activities.

Historically, the Secretary of Agriculture has chosen to donate bonus commodities to the same types of outlets or organizations

that receive commodities under the mandated programs (i.e., schools and elderly nutrition projects) and those described as section 4 outlets—Indian tribes, the commodity supplemental food program, summer camps for children, disaster areas, and the Trust Territory of the Pacific Islands. As noted earlier, most mandated commodities are furnished from section 32 commodities. Most bonus commodities are furnished from price-supported commodities.

Section 1114 of the Agriculture and Food Act of 1981 provides additional authority to donate CCC-acquired commodities to child and elderly nutrition programs and to a new category of outlet: food banks serving needy persons.

Section 1335 (a) of the same Act amends section 5 of the Agriculture and Consumer Protection Act of 1973 to provide for the establishment of two pilot projects to distribute food commodities to low-income elderly persons via the commodity supplemental food program.

Finally, section 116 of the Omnibus Budget Reconciliation Act of 1982 amended section 416 of the Agricultural Act of 1949 to allow the Secretary to donate CCC-held dairy products for aid to needy persons without regard to the type of outlet.

During fiscal year 1982, bonus commodity donations in excess of regularly programmed or mandated levels of support totaled about $800 million in value—over 500 million pounds of commodities. Approximately $300 million in bonus commodities (primarily section 416 commodities) were donated to regularly supported types of outlets schools, elderly nutrition projects, etc. An additional $500 million in CCC-held dairy products (primarily cheese and butter) were donated to food banks, soup kitchens, and other outlets serving needy persons.

(Note: Section 769 of the Food and Agriculture Act of 1965 authorizes the Secretary to use CCC funds to purchase sufficient supplies of dairy products for schools and certain other organizations when there are no surplus CCC dairy stocks. However because of large surpluses of CCC dairy stocks in recent years, the authority is not being used.)

The donation of bonus CCC commodities, whether to regular outlets or to new special outlets such as food banks, is, as a practical matter, discretionary with the Secretary of Agriculture. Release of commodities held by the Commodity Credit Corporation under section 416 authority depends on the Secretary's judgment as to the potential for waste if they are not disposed of in normal channels or sold abroad, the possibility of displacing normal food purchases, and the effect this would have on the need for further price support acquisitions. Release of commodities held by the CCC under section 1114 of the Agriculture and Food Act of 1981 is required, but only for those CCC stocks of commodities that are, in the Secretary's judgment, not likely to be sold or otherwise used in programs of commodity sale or distribution.

In effect, the Secretary has much discretion over when bonus commodities are donated, and the types and amounts to be donated, under the various provisions of present law.

In addition, discretionary authority for the Secretary to pay for processing, packaging, storing, and transporting bonus commodities is provided in the various authorizing laws. The Secretary has discretion over how much money will be spent for these purposes and typically pays for initial processing (e.g., wheat to flour), packaging (into usable sizes appropriate to the outlet), and storing and transporting to State-designated receiving points. The Secretary does not usually pay for end-product processing and packaging (e.g., flour to bread) or the storage and transportation costs within a State, unless large volumes of commodities are going to a particular final destination.

The Secretary's discretion to specify the types of outlets that may receive various bonus CCC commodities is controlled by legislation. Under the various laws authorizing commodity donations, CCC commodities of all types can, in effect, go to any type of outlet, regardless of whether the outlet is a meal-service program (e.g., schools, elderly nutrition projects, soup kitchens) or an outlet distributing food (not meals) directly to needy persons. However, section 4(b) of the Food Stamp Act of 1977 has the effect of dictating which outlets can get which commodities.

Section 4(b) prohibits the direct distribution of CCC commodities (as opposed to the institutional provision of commodity-supported meals) in areas where the food stamp program is in operation—i.e., virtually everywhere in the United States and its possessions. The prohibition has been waived by legislation only for (1) Indian reservations; (2) disaster relief projects; (3) commodity supplemental food programs; (4) food banks; and (5) dairy product distribution.

Recent efforts.—The special dairy product distribution program was initiated by President Reagan on December 22, 1981, to reduce surplus, inventories of cheese and butter in CCC storage. Under that program, cheese and butter are donated to needy persons through food banks and other outlets. State distribution agencies for the program determine the eligibility of the agencies carrying out the distribution and also the eligibility criteria for persons receiving the foods.

The initial allocation of cheese for the program was 30 million pounds. This amount was increased by 70 million pounds on March 9, 1982, and by another 120 million pounds on June 15, 1982, for a total of 220 million pounds in calendar year 1982. In addition, 50 million pounds of butter was authorized for similar distribution on July 23, 1982.

The special dairy product distribution program has been extended through calendar year 1983. The amount of cheese authorized for distribution in the program has been increased to 500 million pounds and the amount of butter authorized for distribution has been increased to 125 million pounds.

Through January 28, 1983, 183.3 million pounds of cheese—valued at $248 million—had been distributed since the program began. Another 101 million pounds has been ordered for distribution. Orders for distribution and actual deliveries account for 57 percent of the total cheese—500 million pounds included in the announced distribution.

Again, through January 28, 1983, some 24.4 million pounds of butter had been distributed, valued at $39 million; an additional 56.9 million pounds had been ordered for distribution. Orders and deliveries account for 65 percent of the total reserved for distribution.

Three States—Washington, Minnesota, and Florida—have been participating in the nonfat dry milk distribution pilot program. Recently, distribution was expanded to include Wayne County (Detroit), Michigan. The Secretary has been analyzing data collected from the pilot areas to determine what effects the distribution of nonfat dry milk may have on local milk markets.

It is these kinds of efforts that the Committee intends S. 17 to expand.

PURPOSE AND NEED

Need to expand domestic commodity distribution

The purpose for this legislation is to establish an effective program to increase the amount of commodities owned by the Commodity Credit Corporation that are distributed for domestic nutrition purposes, particularly to emergency relief organizations providing assistance to needy persons.

The cornerstone of the program is to use existing surpluses as supplemental food assistance for needy persons during the current economically distressed period and for other nutrition programs historically assisted through commodity donations.

At the same time, the Committee emphasizes that this is a temporary program to utilize only those commodities that are in temporary surplus. It should not be the policy of the Federal Government to encourage the acquisition of surpluses that will dampen farm prices or to establish an expectation that such surpluses will be available in future years for distribution to organizations, though worthwhile, that are defined as eligible recipient agencies under the bill. During fiscal years 1983 and 1984, the program is meant to supplement the other feeding and nutrition programs operated by the Department of Agriculture, which are to remain the primary means of permanent Federal support for nutrition.

The program is designed to build upon existing, discretionary authority which the Secretary has been exercising in attempting to reduce the amount of commodities held by the CCC.

The Committee commends the voluntary and local public commitment that has been so important to the success of the special dairy product distribution program, and wants to provide for further expansion of these efforts with existing surplus commodities, including dairy.

Requirement for increased commodity donations

Concerns about the Secretary of Agriculture's existing discretionary authority to release CCC bonus commodities have centered around the contention that more and different commodities could be made available and distributed, especially to organizations and agencies serving the needy.

As noted earlier, approximately two-thirds of the commodities held by the Commodity Credit Corporation at the beginning of fiscal year 1983 were dairy products—cheese, butter, and nonfat dry milk.

S. 17, as reported by the Committee, outlines a priority system which the Secretary of Agriculture is to use in determining whether stocks of a particular commodity are in excess of quantities needed during the fiscal year, and therefore are required to be made available for purposes of domestic commodity distribution.

Under the bill, the Secretary is to assess the domestic obligations that are likely to be incurred during the fiscal year that will require use of CCC held commodities.

On January 11, 1983, the Secretary of Agriculture announced a payment-in-kind (PIK) land diversion program for the 1983 crops of wheat, corn, grain sorghum, cotton, and rice. Under the program, a farmer who

takes additional acres out of production over and above those which he agrees to take out under existing programs will receive, as payment, a certain amount of the commodity he would be expected to have grown on those PIK acres. Commodities for the PIK program will come from farmer-owned reserve, regular loan, or CCC-owned stocks.

The bill requires that the Secretary take into account a PIK land diversion program before determining what commodities are in surplus.

Additionally, the Secretary is to take account of the likely requirements of existing commodity distribution programs, such as those outlined in the background portion of this report.

Further, the Secretary is to assess the international market development commitments that may require the use of CCC-held commodities. For instance, the Secretary recently announced the sale of 1 million tons of wheat flour to Egypt. The sale arrangement involves the use of approximately 36 million bushels of CCC-owned wheat to reduce the effective price of the flour. The committee marked up several bills on March 2 and 3 which contained export payment-in-kind provisions. These are the types of market development uses of commodities which would be encompassed in the Secretary's assessment.

The Secretary is to assess the international food aid commitments requiring CCC-held commodities. These would include commitments under P.L. 480.

Those commodities which the Secretary determines will not be needed to fulfill the obligations and commitments discussed above would be required to be made available for distribution under the provisions of S. 17. The Committee expects that S. 17 will result in an expansion of the types and amounts of commodities held by the Commodity Credit Corporation that are donated for domestic distribution.

S. 17 also permits the Secretary to process and distribute up to 500,000 tons of wheat from the food security wheat reserve if the CCC is unable to provide other wheat stocks for use for the commodity distribution program established by the bill. The food security wheat reserve currently contains 4 million tons of wheat which may be used for international humanitarian purposes.

If the Secretary does use wheat from the food security wheat reserve, the reserve must be replenished before October 1, 1984. The reserve may be replenished through designation of stocks of wheat acquired by the CCC or through purchase. However, if purchasing of wheat is the method used to replenish the reserve, use of funds for such purposes must be authorized in appropriations acts.

Eligible recipient agencies

S. 17, as amended, provides that public or nonprofit organizations may be eligible to receive the available surplus commodities if such organizations administer—

(1) Activities and projects providing nutrition assistance to relieve situations of emergency and distress through the provision of food to needy persons, including low-income and unemployed persons;

(2) School lunch programs, summer camps for children, and other child nutrition programs providing food service;

(3) Nutrition projects operating under the Older Americans Act of 1965, including congregate nutrition sites and providers of home delivered meals;

(4) Activities and projects that are supported under section 4 of the Agriculture and Consumer Protectin Act of 1973 (these include the commodity supplemental food program as well as commodity distribution for the U.S. Trust Territory of the Pacific Islands and Indians);

(5) Activities of charitable institutions, including hospitals and retirement homes, to the extent that needy persons are served; or

(6) Disaster relief programs.

In addition to meeting the criteria outlined above, the organizations or agencies must be designated by the appropriate State agency, or by the Secretary, and be approved by the Secretary for participation in the commodity distribution program established in the bill. The Secretary may establish such approval criteria as he deems relevant for administration of the program. Designation or approval may be withdrawn from any agency which fails to meet, or fails to maintain, the established criteria.

Priority consideration in the distribution of commodities under the bill is to be given to organizations that administer activities and projects providing nutrition assistance to relieve situations of emergency and distress through the provision of food to needy persons, including low-income and unemployed persons. This is to be accomplished by requiring State agencies that coordinate commodity requests to give priority consideration to such organizations. Such organizations include nonprofit food banks, soup kitchens and churches and other private initiatives that serve needy persons.

As noted earlier, there is an extensive food distribution system already in place for the distribution of commodities authorized by other statutes. It is intended that existing State food distribution systems be used to the extent they can be used efficiently, rather than setting up a separate system for the additional commodities provided and distributed under the bill.

Generally, the commodities will be furnished to State agencies designated by the Governor or other appropriate State official for distribution to eligible recipient agencies. However, the Secretary may provide the commodities directly to the recipient agencies. . . .

FEDERAL COSTS

Commodities acquired by the Commodity Credit Corporation that the Secretary determines are in excess of other needs designated in the bill, and thus eligible for distribution under the bill, are typically in a form suitable for bulk storage. Some commodities are stored in the form the farmer produces them—that is, unprocessed grains. Dairy products are delivered to the Commodity Credit Corporation in forms suitable for bulk storage—e.g., cans of butter, 40 pound wheels of hard cheddar cheese, and 10 pound bags of nonfat dry milk. These commodities cannot be distributed for domestic consumption without some degree of processing or packaging.

According to the Department of Agriculture, the costs of processing or packaging dairy products, the major bonus commodity donated up to this point, into forms suitable for donation have averaged about 12.5 cents per pound. Some examples of the processing of dairy products include the processing and packaging of cheddar cheese into smaller packages of processed cheese, and the processing and packaging of nonfat dry milk into smaller packages of instantized nonfat dry milk which can be mixed with water for immediate use.

In existing commodity distribution programs, the Department has usually given away the commodity in processed form. However, this has not always been the case, and the Department has not been required to process the commodity before giving it away. S. 17, as reported, requires that the Department provide the commodities which are to be given away in forms suitable for institutional or home food use and to pay for the necessary processing. To the extent that the commodities are to be used by institutions, such as schools, the commodities shall be furnished in forms suitable for institutional use. At the option of those organizations that provide food assistance to needy persons, including low-income and unemployed persons, the Department will be required to process or package such commodities into units suitable for home use. The Department will also pay these processing or packaging costs. The following table outlines recent costs of CCC commodities.

FEDERALLY SUPPORTED COMMODITIES AND ASSOCIATED PROCESSING COSTS

	Repackaging or reprocessing cost (dollars)
Cheddar cheese	0.12 per lb.
Butter	0.05 per lb.
Nonfat dry milk	0.14 per lb.
Wheat	4.50 per cwt. for 5/10/25 lb. bags.
Corn	4.50 per cwt. for 5/10/25 lb. bags.
Rice	4.50 per cwt. for 5/10/25 lb. bags.
Honey	15 cents per lb. (5 lb. can).
Soybeans	12 cents per lb. (1 gal. can).

Source: U.S. Department of Agriculture.

The Secretary of Agriculture is also to pay the costs of transporting the commodities to State-designated distribution points for subsequent distribution to eligible recipient agencies. The Agricultural Stabilization and Conservation Service (ASCS) estimates that under the current commodity distribution programs the Department spends about 5 cents for the transportation of each pound of CCC commodities which is delivered to the States. . . .

According to the Department, storage costs amount to approximately .7 cents per pound per year.

Under existing commodity distribution programs, including the special dairy distribution and section 416 commodity donations to schools, the Department of Agriculture typically ships surplus food commodities to central distribution points in States at no cost to the States. Under S. 17, this procedure would continue. State distributing agencies which have been designated by the State Governor, the State legislature, or by proper Federal authorities, and approved by the Department, enter into agreements with the Department whereby they arrange for further storage, transportation, and distribution to the eligible recipient agencies within the States. These further costs are generally borne by the States or the recipient agencies.

S. 17, as introduced would have established a formula for providing Federal payment of the costs of distribution within the States. During mark-up of the bill, Deputy Secretary of Agriculture Richard Lyng, representing the Administration, voiced opposition to the suggestions that the Department be required to assume these costs. He pointed out that States and volunteer organizations have responded well to the special dairy product distribution program, in which they bore the costs of distribution within the States. Several Committee mem-

bers expressed concern that additional bureaucracy would result from the introduction of Federal funding for local distribution costs. They also indicated that local agencies, including volunteer agencies, were doing a commendable job which should be encouraged and continued.

Secretary Lyng pointed out that the Department pays for the commodity provided, the initial processing, and the transportation to the States, and he stated further that this should be a sufficient Federal contribution. Secretary Lyng noted that, in the special dairy product distribution, it is the Department's current practice to deliver without charge, a full truckload of cheese, which is comprised of 36,000 pounds, to individual recipient agencies that can handle that quantity. He noted that the Department "probably would deliver 18,000 or 12,000 pounds" to such individual agencies. He also pointed out that Federal assumption of the costs for distribution within the States would reduce the amount of money available to pay for processing of the commodities made available under the bill. Several Senators stated that the $100 million should be used, to the maximum extent possible, to pay for processing and distributing commodities to the States, in order to maximize the amount of commodities which could be made available for distribution . . .

The Secretary may use funds to pay the costs associated with transporting large quantities of commodities to individual participating agencies or organizations, as he does in other commodity distribution programs. Additionally, the Secretary may, in his discretion, use . . . funds not needed for Federal costs or that he determines appropriate . . . to make payments to States and eligible recipient agencies for storage and distribution expenses incurred within the States.

[The following description was not included in the Committee report on S. 17, but reflects the content of the amendment:

The amendment to H.R. 1718 incorporates a concept included in the Appropriations bill, but not by the Agriculture Committee, which would set aside $10 million specifically for local distribution costs of nonprofit organizations that serve low income and unemployed individuals. This would provide funding for such worthwhile volunteer organizations as food banks, soup kitchens, and other church and private initiatives to assist in feeding low income individuals.

The amendment provides that the Secretary may pay up to an amount equal to five percent of the value of the commodities received by such organizations for this purpose. This provision should provide sufficient funds and sufficient flexibility to allow the Secretary to pay some of the distribution costs incurred by these agencies.]

SUBSTITUTION OR DISPLACEMENT IMPACT

An important purpose of S. 17, in addition to providing food to needy persons, is to assist in reducing Government stocks of price-supported commodities by distributing such commodities to outlets, and ultimately to individuals, who would not otherwise purchase them. Several safeguards have been included in the bill to ensure that the commodity distribution program meets this objective, rather than resulting in the displacement of food which would otherwise be purchased. If displacement or substitution occurs, there will be no net reduction in Government held stocks.

For example, if a recipient agency or individual recipient that currently purchases $40 worth of a commodity per month were provided the same amount of the commodity, and this is the only amount of the commodity that is desired, the program merely supplants normal market purchases of the commodity. Because the CCC stands ready to buy future dairy surpluses or to acquire other commodities through price-support activities, the Government may simply give away commodities with one hand and be forced to purchase or acquire additional stocks with the other.

The impact on agriculture of donating surplus commodities to needy households and organizations depends upon (1) whether donated commodities displace commodity purchases by the intended recipients or (2) whether the donated commodities increase the food consumption of recipient households and organizations.

Displacement of commercial sales of commodities distributed under S. 17 is a concern of the Committee. The bill requires the Secretary to obtain such assurances as he deems necessary that recipient agencies will not diminish their normal expenditures for food by reason of the commodity donations made under the bill. The Secretary is also to obtain such assurances as he deems necessary that commodity donations (to organizations or through organizations to individuals) will not displace commercial sales of such commodities or the products thereof.

Under a provision of the bill requiring the Secretary to pay for processing the commodities into a form suitable for institutional or home food use, the Secretary is permitted to pay for such processing "in kind"—that is, through payment in commodities to the processors. However, in so doing, the Secretary is to ensure that such payments-in-kind will not displace commercial sales of such commodities. The Committee accepted assurances from the Department of Agriculture that it would continue to move cautiously in providing payment-in-kind to commodity processors.

WAIVER OF FOOD STAMP ACT PROHIBITIONS

Under the Food Stamp Act of 1977, a commodity distribution program may not operate in areas in which the food stamp program is in effect. As noted in the background portion of this report, this situation has been waived by legislation only in the cases of Indian reservations, disaster relief, commodity supplemental food programs, food banks receiving CCC commodities, and the special dairy product distribution program, thereby limiting the types of outlets that may participate in commodity distribution activities.

S. 17 includes a provision to exempt this new program from the prohibition contained in the Food Stamp Act of 1977 and, in so doing, expands the types of outlets that may receive bonus commodities. Under the bill, commodities furnished to individuals may be granted in addition to any available food stamp benefits. As noted earlier, the Committee intends that this new program be a temporary complement to existing programs, including the food stamp program.

In addition, the bill includes language, similar to that in the Food Stamp Act of 1977, which states that the commodities received shall not be treated as income or resources under any Federal, State, or local law.

PENALTIES FOR WRONGDOING

During mark-up of the bill, several Senators expressed concern that commodities distributed under the bill would not reach the intended eligible recipients, but rather might be diverted for financial gain by agencies and other individuals. Concerns were expressed that abuses exist in the present special dairy distribution program.

As reported by the Committee, S. 17 contains antifraud criminal penalties to discourage this type of abuse and to penalize those who might engage in it. The penalties applicable to commodities distributed under the bill are the same as those applicable to other commodity distribution programs operated by the Secretary of Agriculture. These penalties are included within the Agriculture and Consumer Protection Act of 1973, as amended by the Agriculture and Food Act of 1981.

These penalties include a fine of up to $1,000 or imprisonment for up to 1 year, or both, for wrongdoing in obtaining or using commodities valued at less than $100 and a fine of up to $10,000 or imprisonment for up to 5 years, or both, for wrongdoing in obtaining or using commodities valued at $100 or more.

PROCESSING AGREEMENTS

In most States, State agencies that receive commodities on behalf of existing recipient agencies, primarily schools, enter into inventory agreements or contracts with companies that process the commodities received into a more usuable end product.

For example, cheese distributed to the agency can be processed, in combination with other ingredients, for use in the school lunch program into the form of pizza or tacos, according to testimony received by the Nutrition Subcommittee.

However, some States have not established such processing agreements. In the absence of such agreements, commodities often are not requested, or if requested, the commodities are delivered to the State agencies which then distribute them to the schools. Schools in these States have sought to enter into such inventory agreements with the Federal Government. Under such contracts, the commodities could be delivered first to the processor, thereby saving transportation and storage costs currently incurred by the States or the schools.

The Secretary of Agriculture announced his intention to implement such a plan in May of 1982. However, regulations to permit such processing agreements have not been issued. The Committee supported the establishment of such agreements in legislation, S. 3074, last fall, which did not pass the Senate during the post-election session of the 97th Congress.

Such agreements may be used at the option of the State agency, with the processing costs to be borne by the recipient agencies. Such processing agreements would provide schools, and institutions with additional options for using free, bonus commodities, including, but not limited to, those provided under S. 17. The provision places no obligation on individual schools or States. It is expected that this system will result in an expansion of surplus commodity usage and would benefit many participants in all the Department's food assistance programs.

Mr. HELMS. Mr. President, I would like to give a summary of the provisions which were not contained in either S. 17, as reported, or the appropriations bill, as reported.

STATE CHARGES

The amendment also addresses a concern raised by Senator BOREN after

the markup of S. 17, regarding charges by States to recipient agencies.

I have concerns about including this provision in the pending amendment, but will not object at this time.

Under the Boren provision, States would be prohibited from charging any recipient agency more than the costs associated with storing and transporting the commodities to the recipient agencies less any amount the Secretary may choose to provide the States for the costs of storing and transporting such commodities.

Under current practice, some States charge some recipient agencies for the costs relating to delivery of commodities from State distribution points to individual agencies, such as schools.

The Nutrition Subcommittee heard testimony from the representative of the American School Food Service Association opposed to this practice, specifically with concern to schools. However, neither the subcommittee nor the full committee have had an opportunity to hear from the States on the basis for these charges or to examine whether, in fact, the charges currently made are unreasonable.

Indeed, we have no information that any State that currently charges for distribution would be affected by the provision. As far as I know, States have portrayed these charges as those necessary to cover transportation and storage costs within their States. These State charges, if assessed, vary a good deal, as I understand it, depending on a number of factors.

Also if there are legitimate charges other than those necessary to cover storage and transportation, we may find that States will not make requests for commodities, because to do so would cause the States to incur costs which they would be prohibited from passing on to the ultimate recipient agencies.

Additionally, we may need to monitor the situation on charges. I am concerned that though the intent of the author is to limit charges, the exact opposite may be the result—that is, that States not now assessing a charge may opt to do so in the future.

Because of these concerns, I would urge that this provision be accepted only on a tentative basis. Our committee may need to hear from States, in order to learn their position on the Boren provision, especially if any of the current charges, in fact, do exceed those necessary for storage and transportation of the commodities.

COMMODITY SUPPLEMENTAL FOOD PROGRAM

Mr. President, also included in this amendment is a provision offered on behalf of Senator LEVIN. This provision would modify the administrative funding formula for the commodity supplemental food program by amending section 5(a) of the Agriculture and Consumer Protection Act of 1973.

The commodity supplemental food program provides commodities to women, infants, and children who are likely to suffer from malnutrition because of low income and poor health conditions. The participants in the program receive one of five available food packages. Each package is geared to meet the nutritional needs of its target group—either infants, children, or women, the food packages includes infant formula, rice cereal, canned juice, milk, canned meat or poultry, egg mix, dehydrated potatoes, peanut butter, or dry beans.

"Bonus" commodities have been made available by USDA to the commodity supplemental food program projects. Bonus commodities are those made available to CSFP projects in addition to the commodities purchased with funds appropriated for the program. Some of the bonus commodities are a part of the USDA approved commodity supplemental food program food package and others are not. Those that are part of the food package will be included in determining administrative funding under this amendment.

The administrative funding formula for the commodity supplemental food program is determined according to the amount of funds appropriated for the program. However, the donation of commodities by USDA over and above those purchased with appropriated funds has increased the amount of commodities handled by projects receiving the bonus commodities.

This provision would modify the administrative funding formula to take into account the value of the bonus commodities being distributed by CSFP projects which are a part of the approved food package. An amount not to exceed 15 per centum of the value of commodities donated by USDA for use in the commodity supplemental food program as part of the food package will be made available to CSFP projects.

Based on fiscal year 1982 data, this amendment would make approximately $500,000 available for additional administrative expenses resulting from the donation of bonus commodities. The amount of funds available for food purchases for use by the commodity supplemental food program will be reduced by this amount. The appropriation level is unaffected.

In fiscal year 1982, the commodity supplemental food program operated in 12 States at 26 local sites. Those States operating a commodity supplemental food program were: District of Columbia, one site; Colorado, six sites; Iowa, one site; Nebraska, six sites; South Dakota, one site; Michigan, one site; Minnesota, one site; Kentucky, one site; Tennessee, five sites; North Carolina, one site; Louisiana, one site; and California, one site.

Participation in the commodity supplemental food program is heavily concentrated in five cities—Denver, Detroit, New Orleans, San Francisco, and Washington, D.C. For fiscal year 1981, these areas accounted for approximately 67 percent of the entire participation in the commodity supplemental food program and approximately 68 percent of the costs. Detroit represented 30 percent of the program in that year.

During fiscal year 1982, the total value of commodities distributed in the commodity supplemental food program was $29.44 million. Of this total, commodities valued at $22 million were purchased from funds appropriated to the program and commodities valued at $7.44 million were purchased using other funds. Of these "bonus" commodities, cheese represented $4.090 million of the total value and nonfat dry milk represented $3.353 million of the total value. Nonfat dry milk is a component of the CSFP food package; cheese is not. Applying the proposed administrative cost formula in fiscal year 1982, $502,950 would have been available for administrative funding, in addition to payments made to distributing agencies totaling $3.82 million.

Under the new legislation passed by the Senate today; the Secretary's discretion is final.

The legislation includes a provision designed to protect the Secretary's discretionary authority. His decisions with respect to such things as the amount of commodities to be made available, the eligibility of recipient agencies, the criteria for participation, and distribution of Federal funds among the States are solely at his discretion. This is to insure that this program is not subject to extensive litigation.

DISPLACEMENT PRECAUTIONS STRENGTHENED

Like all Government programs, this one is not without its problems. I understand that some States have been lax in setting criteria for those eligible to receive commodities. This has resulted in the distribution of some commodities—particularly cheese—to those who are not in need. When nonneedy can receive cheese for the price of a brief stand in line, they will not purchase cheese products from their local grocery store. This results in displacement of regular retail market sales of cheese. Even more importantly, this impact on retail sales ultimately affects purchases of dairy products by the Commodity Credit Corporation—financed by the taxpayers. Obviously, it does little good to give away millions of pounds of cheese—or other commodities—with one hand if, in doing so, we consequently displace, and therefore buy through the CCC, millions more with the other hand.

It should be emphasized that the issue of displacement carries with it the clear implication that nonneedy individuals are being served. Obviously, if the poor were the sole recipients, there would be little displacement. However, it is when higher income citizens—who might otherwise buy the product—begin participating that displacement becomes a counterproductive influence.

For instance, in my own State of North Carolina at one time individuals over age 60 were eligible for the commodities without regard to their income status. I have had countless stories told to me of very well-off citizens who decided to take advantage of the free cheese precisely because there were no income standards for participation.

Because of these concerns about displacement, I have asked the General Accounting Office to prepare a report on the extent of the displacement factor—and particularly to include an analysis of displacement relative to eligibility criteria in the various States being examined.

Because of these concerns about displacement, a provision was added to require States to determine which persons in the State shall qualify as needy persons eligible for such commodities. The Secretary maintains ultimate discretion to approve or disapprove the State's submissions of criteria.

I want to emphasize that the States should have sufficient flexibility to establish appropriate eligibility guidelines to insure that the poor are the ones served by this program. We have already received complaints about the lack of a means test for income in some areas. This has held up the program to ridicule and criticism.

Additionally, it is implicit in the legislation that the Secretary of Agriculture has the authority to establish some maximum eligibility criteria for distribution. If he deems it necessary, he has the authority by regulation to define needy persons. For instance, during recent hearings it was suggested that perhaps those who met food stamp eligibility guidelines should be served, but not those with income above that level. Such a restriction, it was suggested, would not require that individuals participating in commodity distribution be on the food stamp program, but that at a minimum they have incomes within food stamp eligibility.

I hope that the States will administer this program in a responsible way.

We have already had complaints that loose eligibility criteria have resulted in considerable commercial displacement—indicating that more than just the poor are participating in the program.

The legislation contains explicit language instructing the Secretary to take appropriate safeguards to insure against displacement. A key component of the program is the desire to reduce CCC surplus commodities. If displacement occurs in commercial markets, the CCC simply buys more surplus commodities and there is no net reduction in commodities held by the CCC.

PUBLIC PERCEPTION

One last point that needs to be made. There seems to be a widespread perception that USDA storehouses are bulging with surplus commodities—as is so often stated in the media and elsewhere.

The problem is that, to the extent there are any bulges, they are almost exclusively in dairy products—cheese, butter, and nonfat dry milk. There simply are not surpluses of many other farm commodities. There is some rice and cornmeal, and these are being made available by USDA.

But the notion that somehow there are massive quantities of commodities being withheld from the American people is absolutely false. Those who spread such information—knowing it to be false—are doing a great disservice to the American public—taxpayers, and recipients alike.

PRIORITY FOR NONPROFIT ORGANIZATIONS

As noted previously, it should be clear that this legislation does not provide any mandatory reimbursement for distribution costs of various organizations except food banks, soup kitchens, and other emergency relief organizations. Those outlets that have traditionally participated in surplus commodity distribution—such as schools—may receive the commodities made available, but may not receive Federal reimbursement for their distribution cost. They have historically borne the costs of such distribution, and this legislation does not alter that system.

Only organizations that are clearly intended to help exclusively the needy are those that are to be assisted with distribution cost. Additionally, State costs associated with delivering such commodities to these emergency relief organizations may be reimbursed, but not State costs associated with other organizations.

This is the approach for administrative funding that was adopted in the jobs bill and is the one this bill intends to maintain. The purpose is clearly to assist private, nonprofit organizations, not governmental or public organizations.

Mr. President, let me commend the Senator for his initiative. I am particularly pleased that the distribution costs provided at both the local and State level is restricted to costs associated with food banks, soup kitchens, and other charitable organizations serving the needy. The Department's current regulations have done a good job in insuring that these are the organizations that are eligible for such funding, rather than other outlets which have historically participated in the program.

Mr. DOLE. I agree with the Senator that this is a limited temporary program. It is for the needy. Funding for participation is not to be used on behalf of organizations and agencies that have traditionally requested and received commodities at their own expense. Rather, it is targeted to those agencies and organizations that provide assistance to low-income and unemployed persons.

Mr. HELMS. Again, let me commend the Senator from Kansas (Mr. DOLE) for his outstanding leadership on this issue.

He has identified a need and a solution in a responsible way. I am pleased to be able to accommodate his initiative.

While I recognize that this is being added to a bill under the jurisdiction of the Finance Committee, it is my hope that the House will concur with the bill as passed without the need for further deliberations.

I thank the Chair, and I thank the Senator from Kansas for yielding to me.

Mr. DOLE. Mr. President, I thank the distinguished chairman of the Agriculture Committee for his cooperation with regard to the commodities portion of this amendment. The legislation has been cleared for consideration at this time. I understand the Senator from Colorado has some questions he may wish to ask. He is on his way to the Chamber.

There are a number of cosponsors to be added to the amendment for the commodities portion and for the unemployment portion. Let me first discuss very briefly the unemployment compensation provision.

Mr. President, this amendment provides needed relief to States which have experienced prolonged unemployment but whose insured unemployment rates (IUR) have dropped very rapidly. The amendment reduces the cost of the House-passed bill substantially, from $208 to $56 million. Basically, the amendment limits the weeks of unemployment compensation supplemental benefits which may be lost due to falling insured employment rates in the various States. For example, under current law, if the benefit duration in a State had been 14 weeks prior to the week of July 24, 1983, as a result a falling IUR, the State's unemployed workers could have been entitled to only 8 weeks of benefits the very next week. That State's benefit duration would be 10 weeks; in other words, a loss greater than 4 weeks could not occur. This provision will be especially helpful in States in which the extended benefits program has

triggered off while long-term unemployment persists.

The amendment also restores weeks of benefits to the individuals in States affected by an earlier Department of Labor erroneous interpretation of the original grandfather clause contained in the Social Security Amendments of 1983. As many of my colleagues know, for a number of weeks the Department applied the grandfather clause incorrectly, causing some individuals to anticipate the receipt of more weeks of benefits than they actually could have received. The amendment allows such individuals to receive the extra benefits on a retroactive basis, provided they are still unemployed as of the date of enactment of this bill.

That is the extent of the Federal supplemental compensation amendment.

ADDITIONAL COSPONSORS

Mr. President, I want to comment briefly on what we have included in the bill, which was, at one time, S. 17. I ask unanimous consent to have added as cosponsors a number of names of Senators on both sides of the aisle who are cosponsoring this legislation. It is a total of some 37 Members of the Senate.

Cosponsors of commodity distribution amendment:

Senators DOLE, HUDDLESTON, HATFIELD, EAGLETON, DANFORTH, LEAHY, BOSCHWITZ, PRYOR, JEPSEN, BOREN, DOMENICI, HOLLINGS, ANDREWS, GORTON, METZENBAUM, SPECTER, RIEGLE, LEVIN, MATSUNAGA, DIXON, PRESSLER, WILSON, CHAFEE, HART, PERCY, DECONCINI, ABDNOR, FORD, STAFFORD, BENTSEN, LUGAR, HEINZ, BUMPERS, and PELL.

Cosponsors of Federal supplemental compensation amendment:

Senators KENNEDY, METZENBAUM, and BOSCHWITZ.

The PRESIDING OFFICER. Without objection it is so ordered.

INTRODUCTION OF SUBSTITUTE TO S. 17

Mr. DOLE. Mr. President, as part of the Senate amendment we are including a substitute to S. 17, the Domestic Commodity Distribution and Food Assistance Act of 1983. S. 17, as it stands on the calendar, was reported from the Agriculture Committee last March, and the Temporary Emergency Food Assistance Act, modeled after the original bill as introduced, went into effect as a Hatfield-Dole amendment to the jobs bill. The current program expires at the end of September, and there is strong bipartisan support in the Congress to extend this program beyond the end of this fiscal year.

It seems very important that we pass this bill before the recess so that those who depend on these supplies will know that there is going to be a continuation of the program.

EXTENSION OF JOBS BILL PROGRAM

Because the jobs bill program represented a different approach to domestic commodity distribution than S. 17 as reported from committee, it is thought advisable to extend a program that would essentially reflect the basic structure of the temporary emergency food assistance program enacted under the jobs bill.

Although the Senator from Kansas realizes that the Secretary of Agriculture is making a good-faith effort to distribute surplus agricultural commodities to soup kitchens, food banks, and other eligible recipient agencies who provide food assistance to needy Americans, there is also a strong feeling in the Congress that there should be legislation to provide certain guidelines under which the administration should carry out this kind of commodity distribution program.

PROVISIONS OF SUBSTITUTE

Mr. President, this substitute to the provisions of S. 17, as reported from the Agriculture Committee, would essentially provide for a more detailed and improved program to continue the Temporary Emergency Food Assistance Act, passed under the jobs bill last March, it would require the Secretary of Agriculture to distribute surplus commodities that he determines are in excess of domestic and foreign commitments. The types of commodities that are available are about 90 percent dairy products, like cheese, butter, and nonfat dry milk, but there is also wheat, corn, rice, soybeans, and honey available—or whatever stocks the commodity credit corporation has in storage. The jobs bill legislation expanded the category of bonus commodities to include things other than dairy products. Although the Secretary is required to announce estimates of what commodities he expects will be available for any given 12-month period, in order to help States with their planning, the Secretary is not required to issue the release of market-sensitive information.

Like the jobs bill, this legislation would also include an authorization for appropriations of $50 million in administrative funds to go to the States to help them pay for intrastate distribution and storage costs. At least $10 million of this would be set aside to help local recipient agencies with their distribution and storage expenses.

This substitute would authorize a 2-year extension of the commodity distribution program. It is not the intent of the Senator from Kansas, in introducing this substitute to S. 17, to create a new entitlement, but it certainly makes a lot of sense to give surplus commodities, which are in excess of our other foreign and domestic commitments, to soup kitchens, food banks, and other charitable organizations that are engaged in efforts to feed the poor.

This amendment should in no way reduce the amount of bonus commodities that schools and other traditional commodity outlets would otherwise receive. Also, this program is not intended to replace efforts of other existing food programs. It is merely intended to complement the food stamp, child nutrition, and WIC programs.

NEED FOR PROGRAM

Just recently, the Subcommittee on Nutrition held an oversight hearing to determine whether or not there is really a need to extend the Temporary Emergency Food Assistance Act beyond September, and whether the current program is effective in providing food assistance. Although there have been problems with the logistics involved in distribution and even with some market displacement in certain areas, there seems to be a general consensus that this kind of commodity distribution program is definitely worthwhile in addressing hunger problems in local communities.

Mr. President, while the rate of unemployment remains high, despite other signs indicating that the economy is headed for recovery, there is still a lot of suffering around the country as a result of the economic climate. Soup kitchens are feeding more people than ever before, and food banks are also doing a lot of business. In addition, the food stamp program is serving more households than at any time in its history—23.4 million households are participating in the program, as opposed to the late 1970's when participation was under 21 million.

Because of the assets limits and other food stamp elegibility requirements, it is possible that many recently unemployed persons cannot qualify for food stamps. What often happens in these instances is that people spend most of their available income on housing and energy costs, and there is not enough left over for adequate food. Under these circumstances, families and individuals are able to receive food assistance from churches and other local charitable organizations which fill a vital need in communities throughout this country.

FEDERAL NUTRITION PROGRAM NETWORK

Certainly the food stamp program is a good economic barometer. Every 1 percent rise in unemployment adds about $600 million in food stamp program expenditures. More Federal dollars are now being spent on this program than ever before—a total of about $12 billion. Back in 1979, food stamp costs totalled about $7 billion, and total Federal food program expenditures were about $11 billion. The Federal Government is now spending about $17 billion on nutrition programs.

Mr. President, in addition to the food stamp program, there are many child nutrition programs, as well as

the special supplemental food program for women, infants, and children, known as WIC. There are also separate programs that serve the nutritional needs of the elderly—like the congregate meals program and Meals on Wheels. Given this comprehensive nutrition program structure, we hope that, somehow, some part of it will be able to reach a majority of individuals who need food assistance. Still, regrettably, there continue to be individuals who seem to fall between the cracks of the regular nutrition program structure, and a commodity distribution program that helps soup kitchens and other local organizations who feed the needy can be very helpful. There are people who are homeless who cannot qualify for food stamps, because they simply have no address. Soup kitchens and churches play a valuable role in these cases.

PROBLEMS ENCOUNTERED IN PROGRAM ADMINISTRATION

Mr. President, as with the implementation of any new program, there are always certain aspects that may not go as smoothly as we would wish. In a program like a nationwide commodity distribution program, the logistics involved are very complex. The Department of Agriculture's capacity to process commodities in time to keep up with the demand is limited, and this inevitably results in delays in delivering processed commodities to the States. This legislation would permit States to request unprocessed commodities, and make their own arrangements for processing at the State level. Secretary Block, on August 1, made an announcement that the Department would be very willing to increase the quantities of commodities released, and provide funds to the States to help them process more commodities. Iowa has already had a lot of experience in this area, and has actually saved money by this approach.

Additionally, there have been reports of commercial market displacement in certain areas, which most likely has been caused by Government-distributed cheese getting into the hands of the nonneedy. However, this market disruption has not occurred on a nationwide basis, and the problem could probably be solved by improved monitoring and State administration of the program in areas where market displacement has been noticed.

PARADOX IN LAND OF PLENTY

Mr. President, there is a serious need for food assistance within our society due to the hardship created by the prolonged nature of the economic recession from which we are beginning to recover. Last January, on the first legislative day of the 98th Congress, this Senator introduced S. 17, the Domestic Commodity Distribution and Food Assistance Act of 1983. At that time, and for many months previous to that, the Senator from Kansas had been deeply concerned about the huge quantities of agricultural surpluses which the Government was paying millions of dollars to maintain in storage, while there were increasing reports of hunger programs on the rise in this country.

It made little sense then, and it makes little sense now, to keep these commodities in storage while people in local communities are in need of food. We still have huge quantities of surpluses in storage—especially dairy products like cheese, butter, and nonfat dry milk. In addition, there is wheat, rice, corn, soybeans, and even some honey, which people might find useful as food products.

While the Commodity Credit Corporation continues to maintain these huge supplies, there is no reason why charitable organizations who are engaged in community efforts to feed the needy should not be able to utilize them. We have always been a generous Nation, and in times of need, our people have always responded to the best of their ability. We are currently facing a paradox in this land of plenty, where two serious needs should be linked together. Our agricultural surpluses provide ample evidence of this Nation as a major world food producer. For this reason, it is intolerable to most Americans that there are people going hungry in this country while agricultural surpluses are overloading our capacity to store them. At the same time that this country has the potential to feed the world, we are having problems making certain that Americans have enough food to eat.

While these agricultural surpluses exist, in excess of our foreign and domestic commitments, we should continue to make them available to low-income and unemployed Americans who are in need of food through local organizations such as food banks, soup kitchens, and other charitable groups.

Mr. President, 37 of my colleagues have joined me in this effort, representing broad-based bipartisan support. A similar bill, H.R. 1590, passed the House by a vote of 389 to 18, under the distinguished leadership of Congressmen PANETTA and EMERSON. I ask my colleagues to support a continuation of this very worthwhile commodity distribution program that was initiated in the jobs bill as the Temporary Emergency Food Assistance Act.

Mr. President, I just want to make certain that the Senate understands the importance of expediting this legislation, because the authority does expire in September. This legislation provides a 2-year extension. The package before us, I might say, has been very carefully crafted in order to get the full support of the administration. We have also been working with Members on the House side, particularly the distinguished Congressman from California (Representative PANETTA) who shepherded similar legislation through the House. He concurs in the changes we have made.

I will say one thing we do not want to create with the surplus commodity program is another entitlement program. We want the American farmer to stop producing surpluses for that purpose. I believe, and others believe, that the food stamp program, as the basic Federal nutrition program, if properly administered and fully funded, will serve the needs of people in distress and that we should not initiate another food program, on a permanent basis. We have more than 10 different food programs now.

I would also say that an area that Representative PANETTA was concerned about was the so-called "hold harmless" clause which would protect schools and other traditional outlets who receive bonus commodities. That is not in the language itself. I have included that in my statement. But this amendment should in no way reduce the amount of bonus commodities that schools would otherwise receive.

Also, the program is not intended to replace the efforts of other food programs.

We have provided, as suggested by the House, for advanced funding to recipient agencies so the program can be carried out. I think that is a constructive change.

Mr. President, I suggest that there is a need for this program. We appreciate the cooperative efforts made by the administration. We appreciate the good faith efforts made by the Secretary of Agriculture just a couple of days ago, indicating his willingness to add more commodities. We have tried to allow one Secretary adequate discretion. We are trying to avoid lawsuits—everybody taking the Secretary of Agriculture to court because they may think he does not distribute certain amounts of commodities. We want a surplus distribution program, but we are not trying to tie the hands of the administration, or make the program more bureaucratic. We hope we have left enough flexibility for the Secretary to make certain that those in need will receive the benefits this kind of program will provide.

Mr. President, I ask the forebearance of Senators not to tamper with the package.

As the primary sponsor of this legislation, I believe that it does carry out original purposes intended in S. 17, as introduced, and with that reported by the Senate Committee on Agriculture, Nutrition, and Forestry.

I am hopeful that the House will be able to concur with this language before the recess.

This is a responsible package, and I urge its adoption by the Congress at this time. It has taken so many

months to come this far, and I thank my colleagues for their continued support.

Mr. President, I yield to the Senator from Ohio.

Mr. METZENBAUM. Mr. President, let me first commend the distinguished Senator from Kansas, without whose leadership and effort in connection with this matter there would be no bill before us this evening. He has worked diligently and arduously to bring up this package, and kept the Senate in session long enough so it might be enacted.

At the same time, I wish to commend the majority leader, whose patience has gone beyond what would normally be expected. He had indicated very strongly that he expected to put the Senate out by 6 o'clock this evening. I guess he is rather impatiently waiting for us to conclude these remarks so he can, indeed, do just that.

I do want to say that I cannot think of any more appropriate measure that could bring the Senate to a close before the August recess than this one. What we are doing is combining legislation to help unemployed workers in 14 States from losing weeks of unemployment benefits.

Mr. President, the bill that extended the FSC program last April provided that no State should suffer more than a 4-week reduction in benefit weeks. Initially the Department of Labor interpreted the language to mean that no State could ever lose more than 4 weeks of benefits from the levels they were receiving prior to April. Then, on June 10, the Department reinterpreted the legislative language and decided that it only applied to States that would lose more than 4 weeks immediately on April 1.

Now there still is a difference of opinion as to what the conference committee that inserted that language intended. But the fact is that many States with high levels of unemployment have lost, or will soon lose, more than 4 weeks of benefits from the levels they received on April 1.

Since April, Ohio's unemployment rate has remained fairly constant, just below 13 percent. But unfortunately the number of weeks of unemployment benefits that Ohioans are eligible to recieve has dropped and dropped and dropped.

In April 653,000 Ohioans were eligible to recieve 53 weeks of benefits.

On May 14, the number of Ohioans unemployed rose to 664,000 but the weeks of benefits were reduced by 15.

In June, yet another 8,000 Ohioans joined the unemployment lines, while Ohio lost another 2 weeks of benefits.

Although Ohio's unemployment rate is expected to remain at about 12.8 percent, Ohio will soon lose yet another 2 weeks of benefits.

This measure before us will not do all that it should, Mr. President.

Unless Congress acts before September 30, the Federal supplemental compensation program will expire, and Ohio will lose an additional 8 weeks of benefits. In fact, as of October 1, Ohio, with unemployment hovering around 13 percent, will qualify for no Federal unemployment benefits at all.

Mr. President, I believe that Congress will reauthorize the Federal supplemental benefits program before it expires. I certainly hope that by that time, a program will be developed that will eliminate the anomaly that permits States with increasing unemployment to suffer reductions in unemployment benefits. But, in the mean time, I believe that it is unfair to permit States like Ohio to suffer yet further reductions in benefit levels.

The measure before the Senate will prevent further reductions in benefits in Ohio and in other States which have already lost substantial weeks of benefits.

This measure is combined with the amendment of the Senator from Kansas, of which I am a cosponsor, to provide $50 million for further distribution of surplus agricultural products stored in this country. Hopefully, more and more of the cheese, butter, and other commodities that are available will be made available to feed hungry Americans. What could be more appropriate as the final act of this body before we go into our August recess?

● Mr. KENNEDY. I am pleased to join with Senator DOLE and Senator METZENBAUM in this important measure to help the unemployed in Massachusetts and 13 other States across the country.

An unfortunate error by the Department of Labor resulted in a broken promise to thousands of Massachusetts workers. These men and women were told, when they came into the unemployment office, early last June, that they could count on an unemployment check for the next 10 weeks. Then the Department of Labor discovered their mistake and corrected it. But fixing their mistake cost the workers of Massachusetts 2 weeks of benefits.

The bill we are considering today restores those benefits and mends the broken promise.

I applaud this action and commend the leadership of the Senators from Kansas and Ohio for their efforts to make that possible.

I look forward to working with them to consider further extension of the supplemental benefits program which expires in September.●

● Mr. HUDDLESTON. Mr. President, I urge adoption of the amendment. The amendment amends and extends the Temporary Emergency Food Assistance Act of 1983. It provides similar authorities to those contained in S. 17, a bill I cosponsored with Senator DOLE and several of our colleagues. S. 17 was reported by the Committee on Agriculture on March 9. The amendment will provide food assistance to jobless workers and other citizens in need. This legislation will assure continued assistance for families experiencing economic difficulty.

The amendment contains provisions similar to those of the emergency jobs bill, Public Law 98-8 enacted by Congress earlier this year. Under the amendment, the authority for such provisions would be extended through fiscal year 1985. Too, the amendment is similar to the bill, H.R. 1590, that passed the House of Representatives June 16.

Under the amendment, the Secretary of Agriculture will facilitate the distribution of surplus agricultural commodities to the needy.

Needy individuals and families, farmers, and all taxpayers will benefit from the distribution of Government-owned surplus food that is currently filling warehouses and costing millions of dollars in storage fees.

With today's double digit unemployment and growing numbers of people depending on soup kitchens and food banks, the Nation needs a practical and effective program to provide emergency food aid to the jobless, low income elderly, and other citizens in need.

Also, farmers will benefit from the program because commodity prices will improve if the record level of surplus food commodities is reduced.

While there are indications that the economy is beginning to recover from the severe recession of the last year and a half, millions of U.S. citizens remain out of work and are in need of temporary emergency assistance as provided by the amendment.

We must do everything we possibly can to stimulate the creation of jobs; and we must provide food and other humanitarian aid to jobless workers and other citizens in need. The amendment accomplishes these objectives and I urge my colleagues to support it.●

● Mr. HEINZ. Mr. President, I support this amendment, which will provide additional funding to expand the commodity distribution program. I believe this program is an important and essential part of this Nation's national food policy.

We have all read the accounts of hungry Americans standing in line for food. At a time when this country is paying millions of dollars in storage fees for surplus commodities, it is unconscionable that Americans are suffering from hunger. It is imperative that Congress make every effort to see that these surplus commodities are

provided to the needy in an efficient and equitable manner.

I have supported the commodity distribution program since its inception because of its significant impact on those Americans devastated by unemployment and the recession. As chairman of the Special Committee on Aging, I am especially concerned that the elderly of our country, who have worked their whole lives, not suffer from the indignities of hunger.

In 1981, the dairy distribution program was initiated to give cheese and butter to the needy by utilizing the surplus inventories stored in the Commodity Credit Corporation (CCC) facilities. Under this program, each State determines their need and demand for the surplus; the actual distribution is carried out by food banks, soup kitchens, and other emergency relief organizations. Although the Emergency Jobs Act of 1982 provided additional funds for the needy, this emergency food program expires on September 30, 1983.

The passage of this amendment insures that the most vulnerable of our society will have access to our agricultural abundance. Not only will dairy products be given away, but now the program will expand to include wheat, rice, corn, and other surplus commodities. This 2-year program will be funded at $50 million per year. The Secretary of Agriculture is given the authority to use the funds to pay for transporting commodities to individual participating agencies. In addition, the Secretary may use the CCC funds to make payments to the States and eligible recipient agencies for storage and distribution expenses incurred within the States.

It is my hope that this proposal will help alleviate conditions of hunger that continue to plague our inner cities and rural areas.

At this time, I would also like to point out that Pennsylvania is among the leading States in furnishing butter and cheese to its needy citizens. Over a million families in Pennsylvania have benefited from this program through the assistance of selfless volunteers from charity and nonprofit organizations. I would like to take this opportunity to commend the praiseworthy achievements of these volunteers. Without their commitment, the success of the program in Pennsylvania would not have been possible.●

Mr. METZENBAUM. Mr. President, I would like to have a very brief colloquy with the distinguished manager of the bill on the question of Secretary Block's management of the surplus commodities program.

Under this measure, we are not giving the Secretary the right to cut back if he can show some displacement anywhere in the United States. I understand there is nothing in this measure or in this amendment that would in any way authorize any cutbacks of surplus commodities by the Secretary of Agriculture.

Mr. DOLE. The Senator is correct.

Mr. METZENBAUM. I thank the Senator from Kansas. Again I commend him for his leadership in bringing about this result in the last hours of this session before we recess.

Mr. DOLE. Mr. President, I thank the Senator from Ohio.

Let me state to those who have an interest in doing this that, first of all, I would assure the Senators on both sides that we have been working very closely with a number of people who have been directly interested in this and with the administration as recently as 4 o'clock. I then had a phone discussion with the distinguished Director of the Office of Management and Budget, David Stockman. I really believe that we have been able to fashion a program on the commodity side that will make it flexible, that will take out some of the rigidity and make certain that we are not tying the hands of the Secretary or anyone else.

But I am also advised that if we do not move quickly on the Senate side, the House is about ready to leave their Chamber. I would hope that we could pass this legislation as quickly as possible.

Mr. METZENBAUM. Mr. President, just one further word.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. I would like to publicly acknowledge the cooperation that the Senator from Massachusetts, Senator KENNEDY, gave us in connection with drafting the unemployment parts of this measure. As the Senator from Kansas knows, he, the Senator from Massachusetts, and I did meet on this subject yesterday.

Mr. DOLE. I also want the RECORD to reflect that without the approval of the Senator from North Carolina, Senator HELMS, and his staff we would not be on the floor right now with this proposal. So I think there has been a display of good will all around the Chamber.

Again, I would suggest that what we have done is to reduce the cost of the House-passed unemployment bill from $208 million to $56 million. We have reduced not the thrust of the commodity program but the expense of the commodity program substantially. I think it is a good proposal and should be passed.

Mr. MELCHER addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana.

Mr. MELCHER. Mr. President, I commend Senator DOLE and all the cosponsors of this legislation for using our commodities which are available to help people who are hungry and who can use the food. I think the provisions of his proposal are not only needed, are not only well-thought-out, but are a great step forward in fulfilling our obligation to share the abundance of food we have here in America with those who are unfortunate enough not to have enough to eat.

This proposal carries with it the opportunity for all the various nutrition groups throughout the United States to participate in the use of the commodities.

I particularly want to take note in its passage that it is doing not only a good thing to help all these nutrition programs and the individuals who participate in them, but we are helping to do the neighborly thing in utilizing our churches and our good will organizations—the Salvation Army and many others—which donate so much of their time and energy to helping the less fortunate people.

I very much endorse the bill. I very much applaud its passage.

Mr. PRYOR. Mr. President, enactment of this amendment is a vital step in our efforts to provide food and other humanitarian aid to jobless workers and other citizens in need.

The amendment has provisions similar to both H.R. 1590 and S. 17. I cosponsored S. 17 along with Senator DOLE, Senator HUDDLESTON, and many of our colleagues, and the measure was reported favorably by the Senate Agriculture Committee in March. H.R. 1590 passed the House of Representatives by an overwhelming margin on June 16. Clearly the provisions of this amendment have widespread support.

Too, the emergency jobs bill, Public Law 98-8, provided for implementation of activities specified in S. 17.

The amendment is designed to use our surplus agricultural commodities to the fullest extent possible and to improve the domestic distribution of the surplus and price-supported commodities. The amendment would make available all Government-owned food commodities such as dairy products, rice, soybeans, and honey, at no cost, to eligible State and local agencies through the Commodity Credit Corporation.

In addition, the amendment would provide administrative money to assist States in the distribution of the commodities and provide administrative money to food banks and other nonprofit organizations to help with the distribution, transportation, processing, and storage of donated commodities.

The $50 million in funds will be made available to carry out the program, of which not less than 20 percent will be made available for paying the actual costs incurred—by charitable institutions, food banks, hunger centers, soup kitchens, and similar nonprofit organizations providing nutrition assistance—in addressing situations of emergency and distress through the provisions of food to

needy persons, including low-income and unemployed persons.

I believe that farmers and taxpayers—as well as the needy—can be winners in this instance. Using our abundant supplies to help needy people is far preferable to simply storing the commodities in Government warehouses. Moreover, millions of dollars in storage costs would be saved.

I urge my colleagues to support this amendment. It will help our farmers as well as the needy of our country.

Mr. BOSCHWITZ. Mr. President, I am cosponsoring this bill because I feel very strongly that the surplus stocks owned by the Federal Government should be used to help the needy.

The Nutrition Subcommittee that Senator DOLE chairs and that I am a member of has taken a long, hard look at the problems of hunger in America. We have also looked hard at the programs designed to alleviate hunger.

Unforunately, although it seems incomprehensible that with the most efficient and productive agriculture in the world, we still find example after example of hungry, undernourished, or poorly nourished Americans. Clearly, we must take steps to reverse this.

That is why this bill is so important. By continuing the surplus commodity distribution program for 2 more years and by providing funds to assist communities or emergency food centers with transportation and storage costs, we can continue helping people battle back from the recession.

Earlier this year I introduced a resolution entitled "Preventing Hunger at Home" to express my commitment to insure adequate funding levels for the Federal nutrition programs. My resolution attracted 58 cosponsors who recognized as I did that we need to fund these programs at a level that allows them to effectively respond to the nutritional needs of Americans.

Today, we have another opportunity to recognize these needs. The surplus commodity distribution program, while experiencing some problems I think we can work out—such as displacement of American cheese, has overall done an excellent job of servicing low-income people and the unemployed. We are coming out of the recession, but the problems of hunger and nutrition will linger on. It only makes good sense to continue to use surpluses to help these people out.

Mr. President, the cost involved is very small, only $50 million, compared to the good that has been and will be accomplished. Well over 400,000 Minnesotans have been aided by this program and contributions of time and resources by volunteers has been extraordinary.

I strongly support this program and this bill and I urge my colleagues to do the same.

Mr. BOREN. Mr. President, I rise in support of this amendment, offered by my distinguished colleague from Kansas, Senator DOLE. This amendment would provide for a 2-year extension of the commodity distribution program which was authorized temporarily in Public Law 98-8, the Emergency Jobs Supplemental Appropriations Act, earlier this year. Under this program, the Secretary of Agriculture distributes surplus agricultural commodities to eligible domestic recipient agencies, food banks, schools, churches, and other organizations that provide food to low-income and unemployed persons.

The problem of hunger continues to be a great concern of many of us in the Senate. Over the past year, the demand for food aid has increased dramatically as a result of the overall economic condition in our economy. In a recent study by the Center on Budget and Policy Priorities, the number of persons served by 181 soup kitchens, food pantries, and other emergency food programs increased by more than 50 percent from February 1982 to February 1983. Additionally, the study showed that a larger number of unemployed individuals, families with children, and those whose food stamps had run out sought aid from these programs than in the previous year. This study shows that the problem of hunger continues to be a problem for many in this country.

At a time when we are storing in this country 60 percent of the world's surplus food, it saddens me to think that we are allowing some people in this Nation to go hungry. Yet, this is occurring despite the social programs that were set up years ago to combat this problem.

Mr. President, this amendment will allow for the continuation of the commodity distribution program that has been implemented to attempt to fill a gap that has surfaced in our traditional nutrition programs. This amendment will allow us to continue to channel our commodity surpluses to those who are truly in need of food.

I want to commend the Senator from Kansas for all his efforts to insure that all Americans receive an adequate diet.

I have been concerned about the limited amount of commodities that have been made available, and ask unanimous consent that at the conclusion of my remarks, the recent letter which I sent to Secretary Block concerning the commodity distribution program be inserted in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., July 22, 1983.

Hon. JOHN R. BLOCK,
Secretary of Agriculture, U.S. Department of Agriculture, Washington, D.C.

DEAR MR. SECRETARY: The recent cutback in the level of cheese and butter being given to the States for distribution has had an adverse effect on many Oklahomans who are truly needy.

The Oklahoma Department of Human Services has recently been notified that its allocation of cheese and butter for the remainder of the fiscal year has been cutback dramatically. On an average, the Oklahoma department had been distributing 1.5 million pounds of cheese and 800,000 pounds of butter per month. The notification the department received it that its allotment of cheese for the remainder of the fiscal year was cutback to a mere 345,390 pounds, and butter was reduced to 210,000 pounds.

I recognize the concerns that USDA has expressed that the dramatic increase of cheese and butter distribution has had an adverse effect on usual sales of these products. However, the average number of persons unemployed in the fourth quarter of 1982 in Oklahoma was 95,000. During the same quarter, 390,575 persons had an income below the poverty level. Clearly, the amount of cheese and butter now provided to the State of Oklahoma for distribution for the remainder of the fiscal year is inadequate to distribute to the truly needy persons in Oklahoma. At best, the Oklahoma department estimates that only 32,000 persons, with incomes at or below the poverty level, will be able to be served with the current allocaton.

I would appreciate receiving information as to how this specific allocation cut was determined for Oklahoma and why such a small amount was given to the State of Oklahoma when the unemployment figures and numbers of persons living beneath the poverty level are so high. I would also like to know what USDA's current plans are for future allocations of cheese and butter, and whether any figures are available on whether actual displacement of cheese and butter sales has occurred anywhere in Oklahoma.

It seems incomprehensible that persons, not having the money to purchase cheese and butter, are not given these commodities at a time when the storage of cheese and butter is costing the government millions of dollars.

I strongly believe that the cutback in cheese and butter distribution should not be nationwide. If there appears to be displacement or fraud in some areas, then those areas should be monitored carefully to ensure that only the truly needy receive the free commodities.

I urge you to quickly reverse your previous decision in this matter.

Sincerely yours,

DAVID BOREN,
U.S. Senator.

● Mr. RIEGLE. Mr. President, as an original cosponsor of S. 17 and a strong supporter of the temporary commodity distribution program that was contained in the emergency jobs appropriations of 1983, I heartily support the amendment to extend the commodity distribution program offered by my distinguished colleague from Kansas to this target support bill. The value of this program has

been proven and it deserves to be continued.

Included last March in the Senate passed version of the emergency jobs bill was language to require the USDA to provide administrative funding for the commodity supplemental feeding program (CSFP) for distributing bonus commodities. Prior to enactment of the emergency jobs bill, CSFP operators did not receive administrative funding for these bonus commodities and, as a result, were incurring large operating deficits through no fault of their own. Language contained in the jobs bill corrected this situation, but only until the end of this fiscal year.

Today, included as a part of the Dole amendment is language to extend the requirement that the USDA provide administrative funding for the distribution of bonus commodities by CSFP operators. Without this amendment, beginning in fiscal year 1984, CSFP operators will once again face staggering operating deficits, not of their own making, simply because they accept and distribute bonus commodities. This amendment addresses this potential problem.

I wish to again reiterate as I have on many previous occasions, that the commodity supplemental feeding program is a Federal program that works—and works well. It is deserving of our continuing support, and I urge my colleagues to support this amendment.●

● Mr. JEPSEN. Mr. President, I was an original cosponsor of my good friend and colleague Mr. DOLE's bill, S. 17, the Domestic Commodity Distribution and Food Assistance Act. I now fully support this amendment now being offered as an amendment to the Federal Supplemental Compensation Amendments of 1983.

The thrust of this legislation is to put more surplus farm commodities on the plates of those in genuine need of food. I supported the original bill during markup in the Senate Agriculture Committee. The bill we reported out of committee is a good bill.

This great Nation of ours is a land of plenty. But at the same time, in the midst of this, there are those who are going hungry. This should not be occurring.

This legislation is designed to divert our surplus commodities to those in need—to those suffering from hunger.

These surpluses will be given to food banks, churches, and other organizations already providing some food to low income and unemployed persons.

We need to supplement nutrition programs already on the books. This legislation will fill the gap, assuring that those in need receive food assistance.

This amendment is a commonsense piece of legislation. We have surpluses we need to get rid of and people in need of a better diet.

I am pleased that the Department of Agriculture plans to resume distribution of cheese and other commodities to the needy. I am also pleased that President Reagan has appointed a task force to produce a no-holds-barred study on food assistance programs to determine whether they are meeting the needs and how they can be improved.●

Mr. DOLE. Mr. President, I ask unanimous consent that a letter from Senator DOMENICI in support of this legislation be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON THE BUDGET,
Washington, D.C., August 3, 1983.

THE PRESIDENT
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: I congratulate you on your recent announcement creating a Task Force on Food Assistance. I understand it will examine America's hunger problem, determine those factors that may be responsible for the apparent increase in hunger, and most importantly, develop specific recommendations to combat hunger. This comes at a critical time with reports of increasing hunger in America, and the latest Census Bureau report showing increased persons in poverty last year.

It is my firm belief that, to the extent hunger exists in this country, it is both deplorable and without justification. A bountiful country that can afford to reduce agriculture production on 80 million acres this year, cannot at the same time permit any child or adult to go to bed hungry. I stand ready to serve you in this endeavor.

I support the administration's recent decision to increase the distribution of surplus agricultural products. I note, however, that even with the proposed increases, the federal government will continue to purchase butter at nearly five times the distribution rate (12 million pounds distributed versus approximately 60 million pounds purchased monthly). While I believe direct commodity distribution programs may not be the most efficient means to feed poor people, with nearly 500 million pounds of butter, 1.0 billion pounds of cheese, and 1.2 billion pounds of nonfat dry milk in government storage, we should at least expand our current commodity distribution programs to reduce these burdensome stocks. I also suggest that the government, working with private industry, develop procedures to process dairy and grain stocks into more palatable food products.

A bill introduced by Senator Dole and myself earlier this year provided fiscal year 1983 funds to state and local governments for the transportation, storage, and processing of surplus agricultural products. I was pleased that this bill became a major component of the Emergency Jobs Act (P.L. 98-8). It is imperative that we continue to fund these commodity distribution activities next year. Your support of our legislative efforts in this regard would be appreciated.

In his latter years, Thomas Jefferson wrote his friend, and earlier enemy, John Adams, "I hope we shall prove how much happier for man the Quaker policy is, that the life of the feeder is better than that of the fighter . . . let this be our office." We obviously cannot remove ourselves from budget constraints and often competing policy objectives. Within the imprecise arena of balancing priorities, however, we can heed Jefferson's call to look to our responsibility to provide food assistance to all needy Americans. I again congratulate you on this leadership and stand ready to support you in this most important activity.

I have the honor of remaining.

Most respectfully yours,

PETE V. DOMENICI.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2126) was agreed to.

Mr. BOSCHWITZ. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. METZENBAUM. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

● Mr. EAGLETON. Mr. President, with warehouses filled with surplus commodities and with a persistent problem of hunger existing in our country that has been compounded by the recent recession, I am pleased that we are today acting on legislation to extend the commodity distribution assistance program of the jobs bill. It makes absolutely no sense to continue to spend hundreds of millions of dollars to store surplus commodities when those commodities can be put to use helping to feed the hungry of our Nation.

Mr. President, the legislation before us requires the Secretary to make available surplus commodities for food assistance that are not needed for mandatory domestic donation programs, other domestic obligations and for international market development and food aid commitments. In addition, it authorizes a 2-year extension of payments to States and local food distribution programs for the costs they incur in storing and distributing surplus commodities.

I agree with the President that no American should have to go hungry, that hunger should not be an issue in our country and that if even one American is denied the dignity of proper nutrition, it is a national tragedy. It is ironic, however, Mr. President, that at the same time the Reagan administration is embarking on their public effort to address hunger, those of us who are involved in trying to get an appropriations bill enacted to fund the current nutrition programs are having to deal with an administration which believes that we are spending too much for feeding the hungry.

We have been told that we are proposing too much for the special supplemental feeding program for women, infants, and children (WIC), too much for child nutrition, too much for the

elderly feeding program, and too much for the food stamp program.

If the President is sincere about his effort to address hunger, he should amend his fiscal year 1984 budget to provide for full funding of the nutrition programs including no reduction in participation in the WIC program.

The distribution of surplus commodities cannot substitute for the basic Federal nutrition programs, but it can certainly help fill in the gaps—gaps that have been caused largely by the recent recession and the reductions made in these programs over the past 2 years.

I urge my colleagues to support this legislation.●

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

Mr. ARMSTRONG. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

If there be no further amendments, the question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The question is, Shall the bill pass?

The bill (H.R. 3409) as amended, was passed.

Mr. METZENBAUM. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ADJOURNMENT UNTIL MONDAY, SEPTEMBER 12, 1983

Mr. BAKER. Mr. President, no other matter is cleared for action by either side. The time for the transaction of routine morning business has long since expired, as has the patience of most Senators.

In view of that, Mr. President, I move, in accordance with the provisions of House Concurrent Resolution 153 the Senate now do adjourn until September 12 at 12 noon.

The motion was agreed to; and the Senate, at 7:03 p.m., adjourned until Monday, September 12, 1983, at 12 noon.

NOMINATIONS

Executive nominations received by the Senate August 4, 1983:

Department of State

Robert Hopkins Miller, of Washington, a career member of the Senior Foreign Service, class of Career Minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Ivory Coast.

In the Army

The following-named Army Medical Department officers for appointment in the U.S. Army to the grades indicated under the provisions of title 10, United States Code, sections 611(a) and 624:

To be permanent brigadier general

Col. Thomas M. Geer, xxx-xx-xxxx, Medical Corps, U.S. Army.
Col. Philip K. Russell, xxx-xx-xxxx, Medical Corps, U.S. Army.
Col. Darryl H. Powell, xxx-xx-xxxx, Medical Corps, U.S. Army.
Col. Connie L. Slewitzke, xxx-xx-xxxx Army Nurse Corps, U.S. Army.
Col. Girard Seitter III xxx-xx-xxxx, Medical Corps, U.S. Army.

CONFIRMATIONS

Executive nominations confirmed by the Senate August 4, 1983:

African Development Bank

Donald T. Regan, of New Jersey, to be Governor of the African Development Bank for the term of 5 years.

Department of Energy

William Patrick Collins, of Virginia, to be Under Secretary of Energy.

Department of Housing and Urban Development

Warren T. Lindquist, of Maine, to be an Assistant Secretary of Housing and Urban Development.

Department of State

Thomas Ostrom Enders, of Connecticut, a career member of the Senior Foreign Service, class of Career Minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Spain.

Thomas R. Pickering, of New Jersey, a career member of the Senior Foreign Service, class of Career Minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to El Salvador.

Department of Education

A. Wayne Roberts, of Massachusetts, to be Deputy Under Secretary for Intergovernmental and Interagency Affairs, Department of Education.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

U.S. International Trade Commission

Seeley Lodwick, of Iowa, to be a member of the U.S. International Trade Commission for the term expiring December 16, 1991.

Environmental Protection Agency

Howard M. Messner, of Maryland, to be an Assistant Administrator of the Environmental Protection Agency.

Alvin L. Alm, of Massachusetts, to be Deputy Administrator of the Environmental Protection Agency.

Nuclear Regulatory Commission

Frederick M. Bernthal, of Tennessee, to be a member of the Nuclear Regulatory Commission for the term of 5 years expiring June 30, 1988.

The Judiciary

James F. Merow, of Virginia, to be a judge of the U.S. Claims Court for a term of 15 years.

Robert J. Yock, of Virginia, to be a judge of the U.S. Claims Court for a term of 15 years.

Marvin Katz, of Pennsylvania, to be U.S. district judge for the eastern district of Pennsylvania.

James McGirr Kelly, of Pennsylvania, to be U.S. district judge for the eastern district of Pennsylvania.

Thomas N. O'Neill, of Pennsylvania, to be U.S. district judge for the eastern district of Pennsylvania.

Department of the Treasury

Thomas J. Healey, of New Jersey, to be an Assistant Secretary of the Treasury.

In the Army

The U.S. Army Reserve officers named herein for appointment as Reserve Commissioned Officers of the Army, under the provisions of title 10, United States Code, sections 593(a), 3371 and 3384:

To be major general

Brig. Gen. Robert O. Bugg, xxx-xx-xxxx.
Brig. Gen. James E. Harrell, xxx-xx-xxxx.
Brig. Gen. Walter K. Tagawa, xxx-xx-xxxx.

To be brigadier general

Col. James D. Ball, xxx-xx-xxxx.
Col. Edwin Cox, xxx-xx-xxxx.
Col. Jackson L. Flake, Jr., xxx-xx-xxxx.
Col. Daniel W. Fouts, xxx-xx-xxxx.
Col. Rudolph E. Hammond, xxx-xx-xxxx.
Col. Jefferson S. Henderson, II, xxx-xx-xxxx.
Col. Alvin W. Jones, xxx-xx-xxxx.
Col. John W. Knapp, xxx-xx-xxxx.
Col. Michael A. Schulz, Jr., xxx-xx-xxxx.
Col. Robert P. Sy, xxx-xx-xxxx.
Col. Robert L. Wick, Jr., xxx-xx-xxxx.

The Army National Guard of the United States officers named herein for appointment as Reserve Commissioned Officers of the Army, under the provision of title 10, United States Code, sections 593(a), 3385, and 3392:

To be major general

Brig. Gen, William J. Jefferds, xxx-xx-xxxx.
Brig. Gen, Lawrence A. Keller, xxx-xx-xxxx.
Brig. Gen, Edward W. Waldon, xxx-xx-xxxx.

To be brigadier general

Brig. Gen, Dayle E. Williamson, xxx-xx-xxxx.
Col. Robert L. Blevins, xxx-xx-xxxx.
Col. Robert C. Dechert, xxx-xx-xxxx.
Col. James D. Delk, xxx-xx-xxxx.
Col. Larry H. Della Bitta, xxx-xx-xxxx.
Col. Averill E. Hawkins, xxx-xx-xxxx.
Col. Robert L. Helmer, xxx-xx-xxxx.
Col. John V. Hoyt, xxx-xx-xxxx.
Col. Dan E. Karr, xxx-xx-xxxx.
Col. Joseph G. Martin, Jr., xxx-xx-xxxx.
Col. Patrick J. McCarthy, xxx-xx-xxxx.
Col. James M. Miller, xxx-xx-xxxx.
Col. Curtis W. Milligan, xxx-xx-xxxx.
Col. Robert B. Pettycrew, xxx-xx-xxxx.
Col. James A. Ryan, xxx-xx-xxxx.
Col. Harry R. Taylor, xxx-xx-xxxx.
Col. Teddy E. Williams, xxx-xx-xxxx.

Col. Bobby G. Wood, [redacted].

IN THE AIR FORCE

Air Force nominations beginning Howard L. Alford, and ending Philip M. Young, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on July 25, 1983.

IN THE ARMY

Army nominations beginning Robert O. Abney, and ending Carl Sundstrom, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on July 28, 1983.

IN THE NAVY

Navy nominations beginning Steven C. Cox, and ending Peter L. Washburn, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on July 25, 1983.

Navy nominations beginning Johnny F. Barfield, and ending William A. Wood, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on July 25, 1983.

HOUSE OF REPRESENTATIVES—*Thursday, August 4, 1983*

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

We gather in grateful appreciation for the opportunities we have to serve in this place. We thank You, O God, that we can use our abilities in ways that contribute to the common good, that we can do our best to discover the path of truth, and that we can use all our talents as good stewards of Your many priceless gifts. We are grateful for this forum for discussion and we pray that our actions may be guided by Your Spirit, that we may truly be servants of justice and partners in peace. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. BATEMAN. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. BATEMAN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 342, nays 42, answered "present" 8, not voting 41, as follows:

So the Journal was approved.

The result of the vote was announced as above recorded.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the amendment of the House to the bill (S. 46) entitled "An act to revise, consolidate, and enact certain laws related to vessels and seamen as subtitle II of title 46, United States Code, 'Shipping'."

The message also announced that the Senate agrees to the amendments of the House to the amendments of the Senate to the bill (H.R. 2355) entitled "An act to establish an emergency program of job training assistance for disabled veterans and veterans of the Vietnam era."

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 505. An act to designate the Federal building to be constructed in Savannah, Ga., as the "Juliette Gordon Low Federal Building";

S. 1148. An act to provide for the use and distribution of funds awarded the Assiniboine Tribe of the Fort Belknap Indian Community, Montana, and the Assiniboine Tribe of the Fort Peck Indian Reservation, Montana, in docket numbered 10-81L by the U.S. Court of Claims, and for other purposes; and

S. 1625. An act to amend the District of Columbia Retirement Reform Act.

EDUCATION, HOUSING AND WELFARE OF PAGES

(Mr. MINISH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MINISH. Mr. Speaker, I address the House today on the important issue of our pages.

The pages who come to the House of Representatives are entrusted to us by their parents for their educations, housing and welfare. This is a special trust.

The House Page Board, since its creation last November, has taken great strides to honor that special trust. With the full support of the Speaker and the rest of the House leadership, the most dramatic and—the Board believes—the most beneficial changes in the page program since it began in the early 1800's have been implemented.

To respond to the problem of after-hours supervision of the pages, the Page Residence Hall was established in Annex No. 1 and opened on February 1. The Residence Hall provides the pages for the first time with a model dormitory facility. The Board also put into effect a code of conduct for the pages.

No system can guarantee that problems will never occur, but the Board sincerely believes every reasonable step has been taken to provide for after-hours supervision of the pages and their general well-being.

The final step in improving the page program is to guarantee every page a quality education.

To this end, the Board held education hearings and established a permanent education task force to advise the Board on educational matters. The task force is composed of Mr. WHITEHURST of Virginia, designated by the Board as the chairman, the executive directors of the National Association of State Boards of Education, the National Association of Secondary School principals, and the Association for Supervision and curriculum development and the Doorkeeper, the manager of the majority cloakroom and the minority chief page.

The task force's report to the Board, as well as past evaluators, have criticized the Capitol Page School. Evaluators have found among other things that the pages' SAT scores have declined and are now the lowest in the metropolitan area.

Consequently, in June the Board unanimously adopted a new page education program recommended by the task force and the Board unanimously decided that from now on the Board would provide educational services for the pages as the best way to implement the new page educational program and monitor page education to insure its quality. To carry out these decisions, the House was requested to adopt House Resolutions 234 and 279 and did so.

The House of Representatives Page School has now been established and classes will begin on September 6. The principal, Dr. Robert F. Knautz was hired last week. Dr. Knautz is from Illinois and has impressive academic credentials and extensive experience as an educator. I have absolute confidence that Dr. Knautz will do an excellent job as the leader of the House Page School.

I want to thank the members of the Board and the task force for their dedication and contributions to improvement of the page program.

In closing, let me state that the objective of the Board and, I believe, all concerned, is that the living conditions and education of our pages be exactly what we would want for our own children. The Board has never deviated from that objective and everyone should be on notice that we never will.

COMMENDING DR. ALICE MITCHELL RIVLIN FOR HER SERVICE AS DIRECTOR OF THE CONGRESSIONAL BUDGET OFFICE

Mr. JONES of Oklahoma. Mr. Speaker, I send to the desk a concurrent resolution (H. Con. Res. 154) to commend Dr. Alice Mitchell Rivlin for her service as Director of the Congressional Budget Office, and ask unanimous consent for its immediate consideration.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore (Mr. MURTHA). Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 154

Whereas Dr. Alice Mitchell Rivlin has served with dedication and distinction as the first Director of the Congressional Budget Office since 1975;

Whereas under the leadership of Dr. Rivlin, the Congressional Budget Office has become an indispensable, professional, nonpartisan organization that has consistently supplied Congress with timely and objective forecasts of economic conditions, projections of Federal spending and revenues, options for reducing the Federal deficit, and objective analyses of important public policy issues;

Whereas the direction by Dr. Rivlin of the Congressional Budget Office has fulfilled the intent of the framers of the Congressional Budget Act to create a capability within Congress to analyze budgetary information independently from the executive branch, thereby making the Office a vital support agency of the Congress;

Whereas Dr. Rivlin is nationally recognized as an eminent authority on economic and budgetary issues, has earned the respect and admiration of her colleagues in business and Government, and has brought credit to herself, the Congressional Budget Office and the Congress: Now, therefore, be it

Resolved by the House of Representatives, (the Senate concurring), That the Congress of the United States expresses gratitude to Dr. Alice Mitchell Rivlin for her dedicated service as Director of the Congressional Budget Office and wishes her continued success.

SEC. 2. The Clerk of the House shall transmit a copy of this resolution to Dr. Alice Mitchell Rivlin.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Oklahoma (Mr. JONES).

Mr. JONES of Oklahoma. Mr. Speaker, this resolution is being offered on behalf of the gentleman from Ohio (Mr. LATTA), the ranking Republican on the House Committee on the Budget, and myself. An identical resolution is being offered in the other body by Senator CHILES, the ranking Democrat of the committee, and Chairman DOMENICI of the Senate Budget Committee.

As is pointed out in the resolution, Dr. Rivlin was the first and only Director of the Congressional Budget Office. She is now leaving that position and will be replaced by Dr. Rudolph Penner, who was recently appointed by the Speaker and the President of the Senate.

Dr. Rivlin has brought great credit to this position and has supplied indispensable, independent information to the Congress and has launched this particular office in a very professional way that has been a credit to public service.

This resolution merely expresses our gratitude and commends her for this performance.

● Mr. DERRICK. Mr. Speaker, today, the House of Representatives approved House Concurrent Resolution 154 commending Dr. Alice M. Rivlin on her outstanding service to the Congress as the first Director of the Congressional Budget Office and wishing her well in her new endeavors.

I want to take this opportunity to express my personal best wishes and thanks to Dr. Rivlin for her tireless dedication in insuring that the Congressional Budget Office provided such excellent, bipartisan information and support to the Congress on economic and fiscal policy matters since CBO's beginnings. This independent analysis organization has gained a reputation for fairness and responsibility

due in large measure to Alice Rivlin's conscientious leadership.

Her competence and integrity will long serve as an example to those who follow in providing direction to this agency so vital to the congressional budget process. Her guidance will certainly be missed and she is most deserving of our gratitude and applause for a job well done.●

● Mr. FAZIO. Mr. Speaker, I rise in tribute to Alice Rivlin, Director of the Congressional Budget Office. It is with mixed feelings that I stand before you, for while I know that Ms. Rivlin is leaving this post to join the prestigious Brookings Institution, it is with regret that we see her leave CBO.

As the first Director of the Congressional Budget Office, she has been instrumental in making the congressional budget process a credible one. She took a fledgling entity and molded it into an effective and highly reputable organization. This is evidenced by the fact that time and again during these recently tumultuous political years, it has been CBO, under Alice Rivlin's directorship, which have made the soundest economic projections.

Prior to my appointment to the House Budget Committee, I had occasion to work with Ms. Rivlin in my capacity as chairman of the Legislative Branch Subcommittee of the House Appropriations Committee. As this subcommittee is responsible for the CBO budget, I have watched the method in which Ms. Rivlin has grappled with sometimes difficult budget and policy matters. She has always handled these issues in a professional manner and has been highly successful in improving the overall operation of CBO.

As she departs to pursue other career opportunities, she can point with pride to her accomplishments. She leaves behind a strong, viable, and respected organization. She will be missed.●

● Mr. DONNELLY. Mr. Speaker, I join my colleagues today in commending Alice Rivlin of the Congressional Budget Office for her outstanding work in her tenure as CBO Director. Dr. Rivlin's tenure as Director of the Congressional Budget Office has been marked by her nonpartisan professionalism, competency, and acumen. The work of the Congressional Budget Office under Alice Rivlin has been invaluable, not only to the Budget Committee, but to the entire Congress.

It is in large part due to Dr. Rivlin's leadership that the Congressional Budget Office has been able to establish its reputation as a credible organization of impeccable integrity. It has been a pleasure to have the opportunity to work with Alice Rivlin. She has served Congress admirably, and we will miss her.

I congratulate Dr. Rivlin on her new position at the Brookings Institution, and I am confident that due to her proven ability she will be most successful there. I wish her the very best as she moves into the next phase of her remarkable career.●

● Mr. MINETA. Mr. Speaker, I rise in enthusiastic support of House Concurrent Resolution 154, which expresses the gratitude of the Congress to Dr. Alice Mitchell Rivlin for her outstanding and dedicated service as Director of the Congressional Budget Office.

As a member of the House Budget Committee for 6 years, I was fortunate to have the opportunity to work closely with Dr. Rivlin. Her economic analysis and projections were indispensable to me and all of the Congress.

As the first Director of the CBO Dr. Rivlin was faced with the awesome challenge of creating an independent source in Congress for economic and bubget analysis. Dr. Rivlin was an unqualified success in meeting this challenge. As a result of Dr. Rivlin's work the CBO quickly gained a reputation as probably the Nation's most respected source for U.S. budget and economic projections. It's hard to comprehend how quickly we all took the expert assistance of the CBO for granted and that CBO did not even exist 10 years ago. The fine tradition Dr. Rivlin established at CBO is proof that Government organizations can work efficiently and effectively. Also, as this resolution attests to, the CBO is a living testament to one of this Nation's greatest public servants, Dr. Alice Mitchell Rivlin. Dr. Rivlin has made an important contribution to this Nation through her work at CBO and she deserves the sincere thanks and best wishes of all Americans.

On a personal note, I would like to thank Dr. Rivlin for her assistance to me and extend to her my best wishes for her work in the future.●

● Mr. LEHMAN of Florida. Mr. Speaker, it gives me great pleasure to join with my colleagues in recognizing the many accomplishments of Dr. Alice M. Rivlin as the first Director of the Congressional Budget Office and in thanking her for her excellent service to Congress.

It is hard to imagine the CBO without Alice Rivlin at the helm, but the fine staff she assembled and the high standards she set for professional and nonpartisan economic and budgetary analysis assure that Congress will continue to receive first-rate information to guide our policy and funding decisions. Her successor, Rudy Penner, is highly qualified, but he will find Alice a hard act to follow.

I first came to know Alice Rivlin when I served on the Budget Committee; she has since provided information and testimony to the Subcommittee on Transportation Appropriations, which I chair, on some of the critical issues which face us, particularly the Federal Aviation Administration's national airspace system plan. I have the highest regard for Alice as an economist, but I am also privileged to count her among my friends.

Mr. Speaker, I congratulate Alice Rivlin on a job very well done, and on her MacArthur Foundation grant, which she richly deserves. I wish her all happiness and success at the Brookings Institution, and I hope she will not become a stranger on the Hill.●

The SPEAKER pro tempore. The question is on the concurrent resolution.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. JONES of Oklahoma. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks in conjunction with the resolution expressing our gratitude to Dr. Rivlin.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

REAGAN AND WOMEN

(Ms. FERRARO asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. FERRARO. Mr. Speaker, our President has done it again—put his foot right into the gender gap. Speaking to the International Federation of Business and Professional Women's Clubs yesterday, he astonished 1,200 women with a lame attempt at humor about women's place. He was greeted with well-deserved silence.

The White House likes to pretend that the gender gap—the greater opposition of women to Reagan policies—is a creation of raving, radical women—not mainstream American women. They are wrong.

I have spoken in recent months to women in sales, to advertising women, to home economists. None of these very mainstream groups feel women are getting a fair shake from this administration.

Just the other day, I saw an American Bar Association poll on how lawyers feel about Mr. Reagan.

The poll showed that 51 percent of male lawyers think the President is doing a good job. But just 24 percent of female lawyers agreed with them. That is not just a gap. It is a chasm.

As the former president of a women's bar association, I also know that until very recently our members simply did not become involved in politics. All that is changing now and I for

one hail this new consciousness. Women's place in our society is everywhere.

□ 1030

INTRODUCTION OF LEGISLATION TO ASSIST LOCALITIES BURDENED BY TAX-EXEMPT PROPERTIES

(Mr. SISISKY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SISISKY. Mr. Speaker, today I am introducing legislation to help localities which are significantly burdened by the presence of Federal facilities and installations within their jurisdictions.

Real property taxes are the core of local tax bases—they account for 78 percent of all local taxes collected. Yet the country's largest real property owner, the Federal Government, is exempt from local property taxes. Contrary to popular belief, 75 percent of these holdings consist of buildings and structures located in nonopen spaces within local jurisdictions and not in parks or open lands.

A Federal Government presence does bring benefits to localities, but we should remember that the Federal Government enjoys essential and significant benefits from local services. Often, there is an imbalance and local governments suffer as a result.

For example, the city of Portsmouth, Va., loses 51 percent of its total assessed property value to Federal tax-exempt real property. At the same time, 63 percent of the 16,000 Federal employees who work in Portsmouth live elsewhere.

Inequities as substantial as these must be addressed. Help is needed and it is needed now. I am not proposing that we need or should require a Federal payment in lieu of taxes for all Federal real property. We cannot afford that nor should we expect it.

But we can and must help those localities which suffer from a substantial loss in their tax base. That is what this legislation will do and I ask your support for it.

DISCRIMINATORY PRACTICES ALLEGED AGAINST BRITISH FIRM IN NORTHERN IRELAND

(Mr. BIAGGI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BIAGGI. Mr. Speaker, I wish to bring to the attention of my colleagues a serious matter which may involve the British Government misleading the Congress of the United States.

The specific matter involves a British-run company, Short Bro., Ltd., of Belfast Northern Ireland. They are expected to file a formal bid with the Air Force for a $40 million contract for 18 transport aircraft. I and other members of the Ad Hoc Congressional Committee for Irish Affairs as well as the Irish National Caucus have been opposed to this sale because of Short Brothers record of discrimination against Catholic employees.

In an effort to defuse these concerns, the British Ambassador to the United States, Mr. Wright, in a May 10 letter to certain Members of Congress contended among other things that Short Brothers had in place an affirmative action hiring program. However, in response to a letter from Father Brian Brady from Northern Ireland—the chairman of the Fair Employment Agency of Northern Ireland said that as of June 30 the Short Brothers affirmative action plan was still in the discussion stage.

That is a big discrepancy and since the final decision on the contract is imminent, an investigation is needed to get the real facts. It would be patently wrong for our Government to do business with any firm which practices discrimination—and with any government which would try and deceive the fact that they permit such discrimination.

CONTINUED BIPARTISANSHIP URGED TOWARD PASSAGE OF MARTIN LUTHER KING BIRTHDAY HOLIDAY BILL

(Mr. GARCIA asked and was given permission to address the House for 1 minute.)

Mr. GARCIA. Mr. Speaker, on Tuesday of this past week, in one of the rare moments of true bipartisanship spirit, Republicans and Democrats joined together and passed the Martin Luther King holiday bill. I think it was symbolic, because we take this floor so often and attack each other because we are of different parties or because we believe this or that.

I just want to make it very clear to my colleagues on both sides of the aisle that there were some eloquent statements made that day, and I think the gentleman from Arkansas (Mr. BETHUNE), the gentleman from New York (Mr. KEMP), the gentleman from California (Mr. LUNGREN), and the gentleman from New Jersey (Mr. COURTER), were very clear and concise in their feelings about Martin Luther King.

I would hope that we would be able to take what we have done in this House and transpose that same feeling to the Senate so that we can get a bill passed over there and so that the President would then have an opportunity to sign it.

Mr. Speaker, for all of those Members who supported our provision and even for those who may have had a difference of opinion, we are deeply appreciative because it was truly bipartisan and in the true spirit of America.

CENTRAL AMERICAN CRISIS RAISES POSSIBILITY OF CALLING CONGRESS BACK

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute, and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, as everyone knows, hopefully today we will adjourn for the August break. I think all of us are ready for this. I must say that I leave for adjournment with mingled emotions.

I very, very much want during the August break to be able to spend time with my own children in a little more civilized manner, and yet, as we see this escalation of activity in Central America, I have grave feelings about what is going to happen down there during this interim period.

My understanding is that we no longer adjourn subject to the call of the Chair because the other body would not accept that arrangement.

The 500-plus parents of the young people called out of Fort Carson, Colo., to go to Honduras, yesterday are very worried about this adjournment. I hope the leadership will assure them that if something happens in Central America we will be called back into session.

We owe it to America's young people, to the parents of this country, and to everyone else to say that we do not want to see that escalation of exercises in Central America get out of control while we are out of town.

AMERICA'S PROGRESS TOWARD CIVIL RIGHTS REFORM

(Mr. PATTERSON asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. PATTERSON. Mr. Speaker, on Tuesday, the House voted overwhelmingly to honor the birthday of Martin Luther King. Were Dr. King here today to witness our consideration of H.R. 2230, I wonder if he would be encouraged by our progress over the past two decades in civil rights reform.

Today, when we consider this bill to reauthorize and extend the authority of the Civil Rights Commission, I hope all of my colleagues will consider the amendment to be offered by the gentleman from California (Mr. EDWARDS). This is a compromise amendment to try to depoliticize this very important Commission.

Mr. Speaker, I urge the Members to oppose all amendments to weaken the Edwards compromise and to vote to extend the life of the Civil Rights Commission for the next 5 years. It is very important, and we owe that to

our country and to Dr. King's memory.

HEALTH INSURANCE FOR THE UNEMPLOYED

(Mr. DURBIN asked and was given permission to address the House for 1 minute.)

Mr. DURBIN. Mr. Speaker, yesterday the House passed a bill creating a program of health insurance for the unemployed.

Under existing programs, we subsidize or provide health care for the elderly and poor in our country. Through tax policy, we subsidize health insurance for middle-income families. Health care is no longer considered a luxury in our country or a benefit which should depend on a person's wealth.

If we were to rewrite our Bill of Rights today, does anyone doubt that the right of access to quality health care would be high on the list of things Americans value the most?

With hospital insurance for the unemployed, we make a step in the right direction to help the helpless, but both sides of the aisle should concede that we are walking backward into a consistent and reasonable national health policy.

We in Congress can no longer ignore the need for a national debate on health care. We avoid this issue at the expense of our own budget and at the expense of ignoring an item of major concern to our Nation.

THE COMMUNIST PRINTING PRESS IN LATIN AMERICA

(Mr. RUDD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RUDD. Mr. Speaker, a constituent of mine recently wrote and asked me what our country is doing about Soviet publications on communism in Latin America. She noted that the Soviets spread their propaganda literature all over the world.

The U.S. Information Agency responded to my inquiry with some startling figures on the full-scale public opinion war being waged against America in our own hemisphere.

For instance, in book form alone, some 12.5 million copies of anti-American, pro-Communist literature are published in Spanish in the Soviet Union each year. That does not include the Soviet support to indigenous publishers, and the many leaflets and pamphlets we know about.

Our Government has a modest program, but it is grossly inadequate by comparison. The U.S. Information Agency has expressed to me its interest in expanding these efforts, and Congress should do its part to support this outreach to our neighbors in Latin America.

If we fail to get the truth across about America, the other side will gladly shape our image for us.

THE LONE RANGER AND TONTO

(Mr. HOPKINS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HOPKINS. Mr. Speaker, my colleague from Massachusetts has seen fit to draw an analogy between the President of the United States and the Lone Ranger and has further stated on national news that he is not going to be his Tonto. I want to assure an uneasy Nation that my colleague from Massachusetts is not being considered for that position.

I further want to say that I remember the Lone Ranger, and he selected a member of the minority, and together they stamped out untruth in this country, and they protected those who were unable to protect themselves.

So to the modern-day Lone Ranger, I would say, "Hi-yo, Silver! Keep up the good work, Kemo Sabe." To my colleague from Massachusetts, I would recommend that he consider talking his mentor, a Member of the other body, into reconsidering running for President, if they are so unhappy with the policies of this country. In that unlikely event, because of the overwhelming lack of support, I would humorously suggest that they consider putting a bill in to withdraw Massachusetts as a member of this Union so that they would secede from this country, which I believe I would support and which I think would have overwhelming support in this country.

COMMITTEE ACTION ON COAL LEASES IN MONTANA AND NORTH DAKOTA

(Mr. MARLENEE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MARLENEE. Mr. Speaker, your party apparently is not content with its 100-vote majority, not content with having the chairmanship of all the committees, and not content with stacking the committees without regard to the party ratios.

Must the Democrats resort to altering committee records to look good? Must your party disregard the rules of the committees? Must you manipulate parliamentary procedures?

Yesterday, the committee chairman of the House Interior Committee and the committee Democrats passed a resolution to immediately withdraw leases to be sold for coal development in the Fort Union area of Montana and North Dakota.

Out of fear of embarrassment, they limited debate and instead engaged in a flimflam. The action they took was capricious. The action may be unlawful. They subverted, distorted, and circumvented due process.

The chairman, and the Democrats insulted the general public because they did not allow the Representatives of the people to speak or legislate.

A sad day for the credibility of the Interior Committee. A commentary on the abuse of dictatorial power to achieve a very, very partisan end. A sad day for the people of this country.

□ 1045

SUMMER INTERNS

(Mr. FISH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FISH. Mr. Speaker, each summer the Congress is fortunate to welcome as interns many fresh young faces to its Members' offices. I look forward to their arrival and am grateful for the energy, diligence, and creativity they display during the short time they spend with my staff.

Many interns arrive with little knowledge of the work that is done here. Some, political science or government majors, know in theory how the entire process is supposed to work. I think that very few leave without finding out something of the reality, complexity, and delicacy of the machinery of our Government. This is an invaluable lesson which they learn. It will serve them throughout their future careers.

I take this opportunity to state how thankful I am to the six young men and women who provided much-needed assistance in my office. I hope they all enjoyed the opportunity to spend part of their summer vacations on the hill.

Lisa Auerbach, Lisa Kim Davis, Blair Effron, Carol DeMilo, Timothy Foster, and Beverly Lindh all contributed importantly, and I trust each received an interesting insight into the workings of our Government. I hope that when they are back home or at their respective campuses, they will occasionally reflect on their time here and be as well pleased as I am with their jobs well done.

VOTE AGAINST DOD CONFERENCE REPORT AND NERVE GAS

(Mr. BETHUNE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BETHUNE. Mr. Speaker, we hear that the DOD conference report will include the authorization for nerve gas. We do not need the artillery

shells. That has been established. DOD has even admitted we do not need those until 1990. The only other item under consideration is the Big Eye bomb and tests show that it does not blow up on the enemy, it blows up on us; so these are weapons that we do not need. These are weapons that do not work. It does not make sense.

If the conference report does come here and does have that in it, there are those of us who are going to fight it. I intend to object, and others do, to any request for early consideration of the conference report; but if it does come here and if it does have that in there, then all Members should know that it will be their opportunity to stand up and vote for the conference report and then go home and say, "I voted for everything that President Reagan asked for in the defense budget," because this is the only weapons system that he has asked for that he has not gotten; so if you vote for that conference report, you are then saying to the public that you support everything that he has asked for, every weapons system that he has asked for, and you could not even find one to cut out, even one that does not work and one that we do not need. If you cannot cut one like that out that will save $6 billion, what are you going to cut out?

NATIONAL DRUNK AND DRUNK DRIVING AWARENESS WEEK DECEMBER 11 THROUGH 17

(Mr. HANSEN of Utah asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HANSEN of Utah. Mr. Speaker, today Congressman BARNES and I are introducing a resolution to make the week of December 11 through 17 National Drunk and Drunk Driving Awareness Week. The resolution enjoys the support of 240 cosponsors.

Last year's awareness week was an enormous success. According to the National Safety Council, the number of traffic deaths over the 3-day New Year holiday was the lowest since 1949, with 282 deaths as compared to 338 deaths for the same period in 1981.

I believe the efforts of Congress have a strong influence on the reduction in fatalities. We hope to make this awareness week an annual event.

Over 26,000 Americans are killed by drunk drivers each year and 750,000 receive permanent injuries. With strict enforcement and increased public awareness, other nations have been able to reduce drunk driving deaths and injuries by almost half.

I firmly believe that if we put our minds to it, Americans can prevent the deaths of 13,000 of our fellow Americans each year. We must give this our best efforts in this struggle to obtain this goal.

THE CAGEY BEES ARE IN REALITY KGB'S

(Mr. LEACH of Iowa asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEACH of Iowa. Mr. Speaker, this morning the U.S. Representative to the United Nations has submitted to the Secretary General further evidence of the usage of tricothecene toxin in Southeast Asia.

This evidence based on blood samples of victims irrefutably undercuts one of the least credible scientific hypothesis ever presented by the American scientific community—the notion that innocent Third World citizens are dying because of the effects of bee excrement rather than Soviet supplied biochemical agents.

If there ever were a scientific theory deserving of nomination for a Nobel Prize in reverse, it is the bee excrement hypothesis. The bee excrement theorists of 1983 are the skeptics who might have sat next to Isaac Newton five centuries ago and suggested that just because the apples in Newton's lap had fallen down, that did not mean that the apples in an adjoining tree might not fall up.

Science, to be respected, cannot be divorced from morality. It may be true that the effects of chemical and biological warfare have a tendency to be exaggerated by those who have witnessed its use, but paradoxically it appears to be ignored by civilized people who have difficulties facing up to uncivilized behavior.

It might be unfair to make analogies to World War II, but as much as decent people in America and on the Continent mobilized almost unanimously against Hitler, few believed or at least faced up to the scale of inhumanity implied by Auschwitz and Buchenwald. So, too, with biochemical warfare today. Ironically, we have by quantum magnitudes more information about the genocide of Southeast Asians such as H'mong than that of Polish Jews in 1944. But where are America's campus humanists?

The perspective that defies skepticism is that a number of biochemical agents have been experimented with in remote parts of the world in recent years. Among the agents are three-independently identified tricothecene toxins. One is a blood, one is a blister, and the third is a vomit agent. Their effects on living creatures cannot be described without asking what modern science has wrought, what man is willing to do to other men.

The reality is that the cagey bee alleged to exist in Southeast Asia today by several U.S. scientists is actually a three letter ministry—the K.G.B., and we have no choice but to take note.

Now we're faced with another enormously expensive arms race that no one can win. At the risk of presumption, my advice to scientists in America today is to put their wits to developing techniques for verifying chemical and biological weapons conventions rather than new sophistries for denying tragic truths. There are times countries need to reap the fruits of positivism rather than dwell on the seeds of skepticism. This is one.

CONGRESS MUST TAKE PRESIDENT'S LEAD ON ORGAN DONOR PROGRAMS

(Mr. GUNDERSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GUNDERSON. Mr. Speaker, as we debate the many controversial issues of this past week, I think the news of the lifesaving liver transplant surgeries last week in four infants has brought the light of hope into the lives of many people around our Nation. Certainly we must applaud President Reagan's urgent pleas alerting all citizens to the critical situations facing several children.

But we cannot forget the plight of those familes who have not yet found donors. Last year alone, some 450 children died from severe liver ailments, while more than 1,000 youngsters lost their lives in traffic accidents. Surely, a coordinated organ donor system could have saved the lives of those afflicted children.

I think it is now up to us in the Congress to take the President's lead in focusing national attention on organ donor programs. Several options can and must be explored.

Almost each and every one of us, as adults, through our State's driver's license has the option on the back of that license to sign a universal donor program. That does not help us, however, to solve the problem of young children.

During the recess I would call upon each of my colleagues and all people throughout this country: First, to call attention to the universal donor program; and second, to work with me and my office in developing some method of providing a similar automatic donation of organs by our young minors.

DESIGNATING POST OFFICE IN OSHKOSH, WIS., AS THE WILLIAM A. STEIGER POST OFFICE BUILDING

(Mr. PETRI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PETRI. Mr. Speaker, today I am introducing legislation which would designate the post office in Oshkosh, Wis., as the William A. Steiger Post Office Building.

Congressman William Steiger, my predecessor, passed away on December 4, 1978, at the age of 40. I was a personal friend of Bill's for over 20 years. He was a fine family man and a true statesman. Bill had a reputation in Congress as being bright, honest, full of energy, and very personable. These qualities were acknowledged from both sides of the aisle.

Bill may be most remembered for spearheading the drive to reduce taxes on capital investments and capital gains. He also played major roles in proposing legislation aimed at providing for workers' safety on the job, reforming the House committee system, establishing a voluntary army, and helping poor people to gain fair access to our court system.

As a humble tribute to a great man, I believe it is fitting to name the post office building in Bill's hometown as the William A. Steiger Post Office Building.

ABANDONMENT OF DEMOCRATIC PROCESS FOR TOTALITARIAN TACTICS

(Mr. BROWN of Colorado asked and was given permission to address the House for one minute and to revise and extend his remarks.)

Mr. BROWN of Colorado. Mr. Speaker, yesterday the House Interior Committee passed a resolution cutting off coal leasing. The action was taken without permitting testimony on the subject, without permitting amendments, without permitting debate, without even permitting some Members to make opening remarks. Valid points of order were denied. Proper motions were not even accorded the courtesy of a vote.

Mr. Speaker, there were no winners yesterday. The abandonment of our democratic process in exchange for totalitarian tactics makes all of us poorer.

All Americans, both Democrats and Republicans, both conservatives and liberals, have sacrificed for this country's democratic process. Let us not cast it aside for blind partisanship.

THE DEMOCRAT'S LANGUAGE PROBLEM

(Mr. LUNGREN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.

Mr. LUNGREN. Mr. Speaker, today's Washington Post reports that a Democratic Presidential candidate, the senior Senator from my home State, has apologized for calling President Ronald Reagan a tyrant.

While this apology should be accepted, it should be pointed out that his remark is in the Jimmy Carter tradition.

You might recall that during the presidential campaign of 1980, Carter indulged in abusive language about Ronald Reagan. It became so bad that Carter had to suffer the ultimate indignity: He was publicly scolded by Barbara Walters on national television.

I can understand Senator CRANSTON's frustrations. The economy is improving, President Reagan's popularity is up and the Senator's candidacy is not exactly soaring in the polls.

But this is no excuse for a repeat of Carterisms.

May I suggest that at each debate of the Democratic candidates the moderator comes equipped with a bar of soap to wash out the mouth of each candidate who indulges in Carterisms. That should keep the rhetoric clean.

IF YOU LIKE LAWS AND SAUSAGE, DON'T WATCH EITHER BEING MADE

(Mr. COURTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COURTER. Mr. Speaker, it was said about a hundred years ago, "If you like laws and sausage, don't watch either of them being made."

I did not intend to go to the well this morning to speak, but after having heard the gentleman from Arkansas holding the defense department authorization bill up to a higher standard than all others, I was compelled to do so. The gentleman is suggesting that unless you agree with every single system in that legislation, you should vote against it.

I think if we held all pieces of legislation, whether it be environmental, health, whether it be related to the Justice Department of the State Department, up to that standard of perfectability, we would be in essence casting away the legislative process, the give and take that must occur in this body and this body would be reduced to anarchy.

MORE DELAY ON THE IMMIGRATION REFORM AND CONTROL ACT

Mr. MAZZOLI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MAZZOLI. Mr. Speaker, we have reached the eve of our summer recess and I would like to extend to each and every one of my colleagues a very happy recess and fine times with their families. That is the happy note.

The sad note is that we have reached this point in the development of the legislative history of the 98th Congress without having taken under consideration the Immigration Reform and Control Act. This represents the third year that the gentleman from Kentucky and other Members of the Judiciary Committee and the Congress on both sides of the Capitol have worked on this bill.

We have had no opportunity, at this point, to consider the question of the exploitation of the undocumented workers which continues. We have had no consideration of the unemployment of U.S. citizens because of competition from undocumented workers. That continues.

We have not taken into consideration the detention of true refugees and the freeing of economic migrants, which continues. All these things are dealt with in the Immigration Control and Reform Act.

I would suggest and recommend and hope that the House will upon its return to duty in September release to the floor for consideration the Immigration Reform and Control Act.

In the words of Father Theodore Hesburgh, who chaired the panel on the subject of immigration reform, "Unless the back door is closed, and that is the door through which the undocumented enter, the front door, which is the door through which the immigrants and the refugees enter, will not be kept open."

□ 1100

AMENDING THE BANKRUPTCY RULES WITH RESPECT TO PROVIDING NOTICE

Mr. GLICKMAN. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of the bill (H.R. 3549) to amend the Bankruptcy Rules with respect to providing notice, and ask for its immediate consideration in the House.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kansas?

There was no objection.

The Clerk read the bill, as follows:

H.R. 3549

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That rule 2002(f) of the Bankruptcy Rules, as proposed by the United States Supreme Court in the order of April 25, 1983, of the Court, shall take effect on August 1, 1983, except as otherwise provided in section 2.

SEC. 2. (a) Rule 2002(f) of the Bankruptcy Rules, as proposed by the United States Supreme Court in the order of April 25, 1983, of the Court, is amended by inserting ", or some other person as the Court may direct," after "clerk".

(b) The amendment made by subsection (a) shall take effect on August 1, 1983.

The SPEAKER pro tempore. The gentleman from Kansas (Mr. GLICKMAN) is recognized for 1 hour.

Mr. GLICKMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 3549 would merely modify rule 2002(f) of the bankruptcy rules to clarify that the present system of issuing notices in bankruptcy cases can continue to be used. Under the current system, the clerks of the bankruptcy courts have used contract work for issuing notices required in bankruptcy proceedings. Using that approach, the cost of issuing notices has been covered from the estates in question. If the present rules go into effect, the clerks will have no choice but to issue the notices themselves and that would have to be paid from tax dollars.

Over 400,000 bankruptcy cases are filed each year requiring anywhere from 10 to 1,000 notices. Paper alone for the issuance of each notice is approximately 8 cents per notice according to one of those who does the processing now, not to mention the additional staff that the clerks would have to hire to carry out this new workload.

H.R. 3549 does not mandate that the clerks use contract services; it merely clarifies that they have that authority.

Mr. FISH. Mr. Speaker, will the gentleman yield?

Mr. GLICKMAN. For purposes of debate only, I yield to the gentleman from New York (Mr. FISH).

Mr. FISH. Mr. Speaker, H.R. 3549 is simply designed to perfect an inconsistency in the proposed bankruptcy rules which went into effect August 1. Proposed rule 2002(a) permits the bankruptcy clerk, "or some other person as the bankruptcy court may direct," to notify interested parties in a bankruptcy matter of the scheduled date for a meeting of the creditors.

Likewise, the language "or some other person as the court may direct," is contained in the requirement in subsection (b) of rule 2002 that the clerk notify all interested parties of the closing date for objections to any proposed repayment plan under chapter 13 of the Code.

Unfortunately, proposed subsection (f) of rule 2002 omits "or some other person as the court may direct" from the parallel requirement that the bankruptcy clerk notify interested parties regarding other elements of the bankruptcy case, such as the order of relief, a possible dismissal of the case, and other matters which might directly affect them. This bill merely adds the quoted language to proposed rule 2002(f) and thereby permits the clerk to assign this responsibility to a third party, just as the proposed rules permit him to do under subsections (a) and (b).

Since this bill amends rules which go into effect this week, it is necessary to consider now, today, under unanimous consent. We on this side of the aisle have no objection to the adoption of H.R. 3549. Similar action was taken on June 9 in the Senate, also under unanimous consent, and has been incorporated in the supplemental appropriations.

Mr. GLICKMAN. Mr. Speaker, I move the previous question on the bill.

The previous question was ordered.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CIVIL RIGHTS COMMISSION ACT OF 1983

The SPEAKER pro tempore. Pursuant to House Resolution 273 and rule XXIII, the Chair declares the house in the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 2230.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 2230) to amend the Civil Rights Act of 1957 to extend the life of the Civil Rights Commission, and for other purposes, with Mr. UDALL in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole rose on Wednesday, August 3, 1983, all time for general debate had expired.

The Clerk will read.

The Clerk read as follows:

H.R. 2230

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Civil Rights Commission Act of 1983".

EXTENDING LIFE OF COMMISSION

SEC. 2. Section 104(c) of the Civil Rights Act of 1957 (42 U.S.C. 1975c(c)) is amended by striking out "1983" and inserting "1998" in lieu thereof.

AUTHORIZATION LEVELS

SEC. 3. Section 106 of the Civil Rights Act of 1957 is amended—

(1) by striking out "$12,600,000" and inserting "$13,000,000" in lieu thereof;

(2) by striking out "1981" and inserting "1984" in lieu thereof; and

(3) by striking out the period at the end and inserting ", and such sums as may be necessary for the fiscal year ending September 30, 1985, and the succeeding fiscal year.".

Mr. EDWARDS of California (during the reading). Mr. Chairman, I ask unanimous consent that the bill be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

COMMITTEE AMENDMENT

The CHAIRMAN. The Clerk will report the committee amendment.

The Clerk read as follows:

Committee amendment: Page 2, line 8, strike out "$12,000,000" and insert in lieu thereof "$12,600,000".

The CHAIRMAN. The question is on the committee amendment.

The committee amendment was agreed to.

AMENDMENT OFFERED BY MR. EDWARDS OF CALIFORNIA

Mr. EDWARDS of California. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. EDWARDS of California: Page 2, line 2, insert "(a)" after "SEC. 2".

Page 2, line 4, strike out "1998" and insert "1988" in lieu thereof.

Page 2, after line 4, insert the following:

(b) Section 104(c) of the Civil rights Act of 1957 (42 U.S.C. 1975c(c)) is amended by adding at the end the following: "During the period which begins on the date of the enactment of the Civil Rights Commission Act of 1983 and ends on September 30, 1988, the President may remove a member of the Commission only for neglect of duty or malfeasance in office.".

Mr. SENSENBRENNER. Mr. Chairman, pursuant to the rule, I demand a division of the question.

The CHAIRMAN. The question can be divided at the proper time, the Chair will say to the gentleman from Wisconsin.

PARLIAMENTARY INQUIRY

Mr. SENSENBRENNER. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. SENSENBRENNER. When would that time be?

The CHAIRMAN. The gentleman has made his demand, and at the time the question is put, we will be alert to protect the gentleman's rights.

The gentleman from California (Mr. EDWARDS) is recognized for 5 minutes in support of his amendment.

Mr. EDWARDS of California. Mr. Chairman, this amendment would shorten the extension of the Commission from the 15 years currently in H.R. 2230 to 5 years, which is the same length of time given the Commission in the previous three extensions. The amendment would also insert a provision that a Commissioner may only be removed "for cause."

I will address the two provisions of the amendment separately and will begin with the proposal to extend the Commission for 5 years.

When the Commission was created in 1957, it was established for a period of 2 years. In 1961, it was given a 2-year extension and in 1963, its life was continued for only 1 year. Its first extension for a longer period of time was in 1964 when it was granted an additional 4-year continuance. It was not until 1967 that the Commission received its first 5-year extension. Since that time it has been granted two additional 5-year continuances.

The 15-year extension in H.R. 2230 was proposed as a way of sending a signal to the Nation of our continuing commitment to the important work of the Commission. The need for a long-term extension was one that was shared by civil rights groups and by the President.

However, the current attempt to remove sitting Commissioners has raised serious, bipartisan concern regarding the ability of the Commission to maintain the independence crucial to its mission. This concern has not been raised previously because the Commission's independence and integrity has been respected by all Presidents, both Democrats and Republicans, since it was created in 1957.

Many Members of both parties have suggested various ways in which the current crisis might be addressed. Since H.R. 2230 would extend the life of the Commission by 15 years, it has been suggested that we set specific, or staggered, terms for the Commissioners so that future Presidents would not feel compelled to remove Commissioners in order to to name their own nominees.

While the intent of those raising this proposal is to be commended, any suggestions for amending the Commission's charter raises serious questions for the committee and for civil rights advocates. Such a proposal would alter the historical structure and integrity of the Commission without strong evidence of the need for such a change. Thus, rather than proceed with the plan to give the Commission its longest extension, we believe it is best to amend the bill to provide for a 5-year extension. As mentioned earlier, the 5 years provided by this amendment would equal the length of continuance given the Commission during the previous three extensions.

By accepting this amendment, the need for specific or staggered terms is eliminated.

The second provision of the amendment would state that during the 5-year extension period, the President may only remove a Commissioner for "neglect of duty or malfeasance in office." Mr. Chairman, I propose this amendment only because in our view it does not in any way change the structure or integrity of the Commission. While it is true that the Commission's charter does not explicitly address the issue of removal, the U.S. Supreme Court has stated that a power of removal cannot be inferred from the mere fact that a position is filled by Presidential appointment since under the Constitution, all officers of the United States must initially be chosen or nominated by the President. *Buckley* v. *Valeo*, 424 U.S. 1, 120-37 (1976).) Where the statute creating a Commission or other public office is silent regarding the President's removal power, the Court has stated that that question must be resolved in light of the congressional purpose in establishing that agency or function.

A review of the legislative history of the Commission's legislation and of confirmation hearings for nominees to the Commission will show clearly that Congress intent has always been that the Commission be an independent, factfinding body.

Although I believe that the President does not currently have the legal authority to remove sitting Commissioners, I recognize the concerns of those who believe this position should be made clearer. Accordingly, this amendment makes explicit that which many of us believe has been implicit throughout the history of the Commission.

Mr. SENSENBRENNER. Mr. Chairman, I rise in opposition to the amendment.

(By unanimous consent Mr. SENSENBRENNER was allowed to proceed for 5 additional minutes.)

Mr. SENSENBRENNER. Mr. Chairman, I would urge the Members of the Committee of the Whole to vote down both parts of the amendment that has been offered by the gentleman from California.

Rather than strengthening the Commission and preserving its independence, as the gentleman from California claims, the adoption of this amendment will weaken the Commission, politicize its actions even more than the present time, and perhaps even jeopardize the continued existence of the Commission, which will go out of business unless this legislation is enacted into law prior to September 30, 1983.

The original bill introduced by the gentleman from California (Mr. EDWARDS) and others, providing for a 15-year extension of the life of the Civil Rights Commission. President Reagan's recommendation was for a 20-year extension of the life of this Commission.

However, the amendment of the gentleman from California reduces the 15 years to 5 years.

When Ralph Neas, the executive director of the Leadership Conference on Civil Rights, spoke before the Subcommittee on Civil and Constitutional Rights on March 24, 1983 he stated as follows:

> Mr. Chairman, the Leadership Conference also believes that the proposed 15-year extension would help guarantee the effectiveness and independence of the Commission. It would allow the Commission to plan ahead and provide a needed continuity with respect to its long-range problems.
>
> Perhaps more importantly, such a 15-year extension would send a strong signal to the entire country that the Congress recognizes the problems of discrimination that still exist and that it remains totally committed to the Nation's goal of providing equal opportunity for all its citizens.

After those ringing words from the spokesman of the premier civil rights organization that 15 years is necessary to preserve the independence of the Commission, and to send a strong message to the country, my friend from California has introduced an amendment to chop that down to 5 years which, using Mr. Neas' own words, would not preserve that independence and would send the message to the country that we are not as firm in our resolve for civil rights as the Leadership Conference on Civil Rights itself advised the subcommittee last March.

But perhaps more disturbingly is that part of the gentleman from California's amendment that provides for removal only for neglect of duty or malfeasance in office. This is a not too subtle attempt to grandfather and grandmother in the existing Civil Rights Commissioners whose replacements have been nominated by the President of the United States, and whose confirmation is pending in the other body.

To try and dictate to the President of the United States, any President of the United States, who will be appointed to executive branch agencies is an infringement on executive power that any President of the United States would not put up with. And if this provision ends up being put in the bill that is sent to the President, we are inviting a Presidential veto, and since the life of the Commission expires on September 30, 1983, jeopardizing the very existence of this useful Commission that has received support on both sides of the aisle.

I will tell my friends who support this amendment that if you do not like the three nominees the President has made to replace existing Commissioners, fight that battle out in the other body when those nominees are up for confirmation. Do not interject this issue into the extension legislation, given the fact that this Commission has less than 2 months to go before its expiration date, and the Congress will be in recess for 5 weeks out of that period of time.

I would point out, Mr. Chairman, that the history of the Civil Rights Commission very clearly indicates that every time there has been a change of administration, in the first years of the Commission the members of the Commission automatically tendered their resignations to the incoming President.

When Lyndon Johnson assumed the Presidency in 1963 those resignations were submitted and Mr. Johnson asked that the Commissioners stay on in office. Upon his reelection in 1964 to a full term Mr. Johnson requested the resignations of all of the members of the Civil Rights Commission.

□ 1115

One was hesitant in submitting that resignation but, nonetheless, the rest of the commissioners complied with the request of the newly elected President of the United States.

Was there a hue and cry that the Commission's independence was being jeopardized at that point in time? My friend from California was in Congress then. I do not recall anything about it.

So, I do not think what President Reagan is doing is unusual, given what Lyndon Johnson did, both in 1963 and in 1964.

Finally, I point out that any attempt to attempt to bring in the issue of the nominees into the extension of the life of the Civil Rights Commission is going to bring bipartisan condemnation as well as bipartisan praise.

I have in my possession a letter dated July 15 from Albert Shanker, president of the American Federation of Teachers, AFL-CIO, to Senator BIDEN which states in part:

Rarely have I been as outraged at the behavior of a fellow Democrat as I was watching you on the evening news Wednesday. Your performance at the Senate Judiciary Committee hearings on the Civil Rights commission nominees may as well have been bought, paid for and delivered by the Republican National Committee. Do you really believe, Senator Biden, that Democrats or fair minded people anywhere are going to think you a fit representative for telling the nation that you've made up your mind how you're going to vote on a nomination before you've heard one word of testimony from the nominees? Do you think that blacks in Wilmington are going to imagine you a hero by refusing to even listen to a man who stood side-by-side with Martin Luther King, Jr., when to do so risked his very life and the safety of his family?

I would like to see control of the Senate returned to the Democrats next year. I think fairness is going to be a very big issue in that election. The President is going to be campaigning with a lot of voters who helped elect him last time on a perception gap platform. The American public doesn't like to see its president treated with disrespect. When you come on television and tell people that you—the junior Senator from Delaware—are going to dictate to the President of the United States whether or not he has the right to nominate people to an executive branch commission, you lose thousands of votes for all Democrats in the next election.

Your anti-quota and anti-busing rhetoric at the hearing will not mask your action on these nominations. I can imagine no finer candidates for the Civil Rights Commission than Morris Abram, John Bunzel and Robert Destro—your only complaint against them must be their opposition to quotas and some forms of busing. You could not have more clearly revealed the true basis of your opposition than when you announced to the press that you also intended to vote against confirmation of Linda Chavez, my assistant, to be staff director. No one is being removed so that Chavez can take office; she fills a vacant post. But Chavez, like Abram, Bunzel and Destro, opposes quotas, even though she endorses affirmative action to recruit and train minorities and women, and she has serious reservations about busing. I would think that with your own experience with busing, you would be eager to have pro-civil rights advocates on the Commission who could understand what the people of Wilmington and elsewhere have had to go through. The current commissioners, whom you are doing all in your power to retain, have made it clear that they think that "the mandatory reassignment of students" (read busing) is "the most effective remedy for desegregating the public schools."

Senator Biden, you have before your committee four excellent nominees with impeccable civil rights credentials. You will irreparably harm yourself and other Democrats next year if you insist on obstructing action on these nominees. You give Ronald Reagan an excellent issue on which to run next year if you and your colleagues insist on protecting the pro-quotas, pro-busing interests and attacking staunch civil rights veterans like Abram, Bunzel, Destro and Chavez.

Now what this amendment that the gentleman from California (Mr. EDWARDS) is proposing is to grandfather in and grandmother in the people that Mr. Shanker, the president of the American Federation of Teachers, and who is no member of the Republican Party, is writing Senator BIDEN about.

I would urge that we protect the integrity and the independence of the Civil Rights Commission, protect this bill from a veto by voting down both parts of the Edwards amendment.

Mr. Chairman, I yield back the balance of my time.

Mr. RODINO. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, as an original sponsor of the Civil Rights Commission legislation, one who sat on the committee during its hearings, its deliberations and participated in debate, I can attest to the fact that one thing we wanted to be assured of was that the Commission would be an independent factfinding body that would make recommendations and that would oversee the enforcement of the Civil Rights laws of our country.

I believe that it is incumbent upon us as members of the committee which has responsibility in this area, to clarify any question that there may be in the minds of any as to whether or not we were looking to assure the independence and the integrity of the Commission.

I believe that the gentleman from California is to be commended for bringing to the attention of this body the need to support this clarifying amendment, so that we will have a 5-year extension which is in keeping with the previous extensions of this Commission, and then to assure that any President, does not remove from office without cause. I think the words that are written into this amendment, "because of failure to exercise proper duty or malfeasance of office," to describe when a person may be removed are proper. To do otherwise would be to weaken the structure of a Commission that has served this country so well. I think all this amendment does is clarify the initial congressional intent and strengthen the purposes of this Commission.

The Commission should not be undermined in any way. I think it would be undermining the independence of the Commission if its members felt that a President who did not agree with some of the statements made or with some of the views expressed by Commissioners might then be in a position to remove them.

I do not think this was the intent of the original legislation, nor should it be the intent of the legislation that we now consider.

This Commission has always been a source of objective factfinding. It has done a job of which we can all be proud.

It has been strongly supported in a bipartisan manner, by Republicans, Democrats and Independents.

Certainly no one thought that when a President was given the power to appoint that he might willy-nilly remove someone because he disagreed with them. As a matter of fact, if one were to look back at the hearings that took place back in 1958 before a committee of the other body, the questions were expressly put, and that committee stated explicitly that the nominee to that Commission was to understand that he would not be removed and that when he was appointed he would be an independent voice.

All members of the Commission were appointed with that kind of an understanding. And I believe that this amendment certainly deserves the support of all of those who are interested in preserving the life of this Commission in a manner that will permit it to act with integrity, with independence and to preserve the high standards that it now enjoys.

Mr. SENSENBRENNER. Mr. Chairman, will the gentleman yield?

Mr. RODINO. I yield to the gentleman.

Mr. SENSENBRENNER. I thank the gentleman from New Jersey for yielding.

Mr. Chairman, I listened with interest to his comments about the Commission. How then does the gentleman from New Jersey comport that statement with the fact that following the 1964 election, President Johnson demanded and received the resignations of all of the existing members of the Civil Rights Commission? There was one of the members who was a little reluctant to go along with that, but nonetheless the commissioners did tender resignations and the resignations were rejected.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. SENSENBRENNER and by unanimous consent, Mr. RODINO was allowed to proceed for 2 additional minutes.)

Mr. RODINO. I thank the gentleman.

I respond to the gentleman by saying that during the formative years of the Commission and up through the end of the term of office which President Johnson filled out after President Kennedy's assassination, the Commissioners routinely submitted their resignations as a formality. The resignations were routinely not accepted except for personal reasons. Resignations were never sought and this is the important part to remember, for political purposes or because of ideological differences.

So, I am not going to try to determine, to look into the minds of any of the individuals who may have asked for resignations or may in the future consider asking for resignations. I think it is our responsibility to make clear what the law is to be and should be and what the original intent of the legislation was and that this Commission should be an independent body, maintain that kind of independence and only be removed for cause, for neglect of duty.

Mr. SENSENBRENNER. Mr. Chairman, will the gentleman yield further?

Mr. RODINO. I yield to the gentleman.

Mr. SENSENBRENNER. In other words, what the gentleman is saying is that the first President that did not request the resignation of the existing Commissioners was Richard Nixon and following that every incoming President has followed the Nixon example in not requesting resignations of the entire Commission when he took office?

Mr. RODINO. As I told the gentleman; I am merely calling to the attention of this body what it now needs to do because of circumstances that have arisen and in order to insure the integrity and independence of this body we should write this language into this Commission's authority that they should not be removed except for lack of duty or malfeasance of office.

Mr. McCAIN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of H.R. 2230. When the Commission on Civil Rights was created, it was charged with the duty of objectively monitoring the civil rights policies of the Federal Government. I need not remind this body of the excellent work the Commission has done to educate the public regarding the problem of discrimination in the United States and more importantly the attainment of equal rights for all Americans. The Commission has served as a voice constantly calling for equity and justice.

Since the creation of the Commission over 25 years ago, Congress has wisely extended the Commission's life and expanded the class of protected persons under its jurisdiction. The Commission has done a great deal to raise the consciousness of American society to the problems facing black Americans. It is, however, imperative that the Commission recognize the need to focus more attention on the civil rights problems confronting this Nation's fastest growing minority, Hispanics, and this Nation's most overlooked minority group, the Indians.

With regard to the Hispanic community, I believe it is important to note that the committee report on this bill calls on the Commission to focus more attention on the problems faced by Hispanics. Between 1970 and 1980 the U.S. Census Bureau reports that the Hispanic community increased by 61 percent. Accompanying this significant population growth was a growth in the civil rights concerns of Hispanics.

The population growth mentioned brings with it growing opposition to Hispanics from American society. As has historically been the reaction to immigrants, particularly non-Anglo groups, Hispanics are encountering major civil rights problems. Due to the ignorance most Americans have of Hispanics and to the general neglect shown to Hispanic concerns, we have a major population group which feels removed from the mainstream of society. This must be changed.

I would like to commend the Commission on the efforts it has made to date regarding Hispanic concerns, but I would like to emphasize that this work must be followed up with additional efforts. Areas which should be pursued are school segregation studies, discrimination in higher education, and the constant civil rights violations of migrant farmworkers. This is not an all inclusive list but rather examples of what must be considered if American society is to benefit from the full participation of the Hispanic community.

In addition, I am pleased to note that the Civil Rights Commission has in recent years done fine work concerning one of the least understood minorities in our society; American Indians. In June 1981, the Commission issued a report entitled Indian Tribes: A Continuing Quest for Survival." This report provides a cogent summary and analysis of situations which have exacerbated existing civil rights problems of Indian citizens, particularly those who live on or near the more than 260 reservations in the United States. While the report has provided a basis for constructive actions by the executive and legislative branches of Government, it has, I think more importantly, served to enhance the understanding of everyone who has read it, such work by the Commission has and should continue.

By permitting the Commission to continue to focus public attention on the important issues affecting the freedoms of Indians, Hispanics, and other minorities in the United States, whose conditions and problems are not well understood by the majority of Americans, we pay respect to the wisdom of Thomas Jefferson, who stated, "If a nation expects to be ignorant and free, in a state of civilization, it expects what never was and never will be."

□ 1130

Mrs. SCHROEDER. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Edwards amendment.

Mr. Chairman, I really want to compliment both the full committee chairman and the subcommittee chairman, the gentleman from New Jersey (Mr. RODINO) and the gentleman from California (Mr. EDWARDS) on their support of the Edwards amendment. And I think all Members should understand that this amendment is the way we preserve the Civil Rights Commission, the way it has evolved, and the way we want it to remain.

Let us go back and look at the history, because that is what people have been talking about.

As we know, when the Commission first started up, it was a new idea. And, of course, when you impliment a new idea lots of lots of time is spent trying to find out what it should do and how it should function.

The Commission has never had enforcement powers. It has been considered a regulatory agency. It has always been considered an independent agency that would do much of what we would want a camera to do, takes a picture of us, shows the facts as they are. Now we all know as politicians sometimes cameras make us mad for showing the facts as they are. And we would like to change the camera. And I think sometimes the Civil Rights Commission has made Presidents in both parties mad because they have reported facts the way they are. But that is a very, very, very vital function and the only function that it has in this society. And we certainly do not want to jeopardize the Commission's independence, for it would be like trying to change lenses of a camera so that things look rosier or better.

We really want to make sure the Commission remains firm and strong and independent. This amendment does that.

There is no question during the early formative years of the Commission sometimes resignations were routinely submitted, but the very important point to make is that no one has

ever been fired before by any President. No one. And even at the time in 1964 when President Johnson requested resignations, one of the Commissioners and one of the most distinguished Commissioners this country has ever had, Dean Irwin Griswold of the Harvard Law School said he felt requesting resignations was a mistake, that to do that would be to acknowledge that they were not an independent agency, but merely a part of a Presidential staff, holding office at the President's pleasure. He said he did not think that was factual or the legal situation. After 1964 and Commissioner Griswold's statement that was the last time a President asked for routine resignations.

Even in 1964 Commissioners were asked for a routine resignation. No one was fired. No one has ever been fired. And in 1964, when that transpired, Dean Irwin Griswold did the legal and factual analysis saying he did not think that was what the Congress intended, that ended the routine requests for resignations.

In the Edwards amendment we are agreeing with Griswold that resignations are not what the Congress intended. It had never intended it and it does not intend it now. The Commission is an independent agency and that is the vision that they had back in 1964.

I point out, too, that the 5-year extension makes an incredible amount of sense because it continues the tradition that was started in 1967. Again in 1967 we decided that every 5 years we should reappraise and renew and look at the Commission again. In the Edwards amendment we continue the 5-year approach.

So I urge Members to move to do this. This is terribly important. The country needs it very much.

We had an eloquent speech about the plight of native Americans, Hispanics, Asians, blacks, women, children, all sorts of people that the Civil Rights Commission has done an excellent job of reviewing their status and reminding this country that we must continue on to work to make sure that opportunities are open for all and that there are equal chances for everyone to excel.

That has been the Commission's mission in the past, that should be its mission in the future. And it will only be its mission if we see to it that it remains independent and remains vigorous.

Mr. COLEMAN of Texas. Mr. Chairman, will the gentlewoman yield?

Mrs. SCHROEDER. I yield to the gentleman from Texas.

Mr. COLEMAN of Texas. Mr. Chairman, I would like to associate myself with the gentlewoman's remarks. I think the amendment is extremely important.

Mr. Chairman, I rise in support of H.R. 2230, the U.S. Civil Rights Commission extension, and ask unanimous consent to revise and extend my remarks.

Mr. Chairman, the protection of civil and constitutional rights is one of our paramount duties as Members of Congress. The U.S. Commission on Civil Rights, established by Congress as an independent, bipartisan, factfinding agency of the Federal Government, was established under the Civil Rights Act of 1957. It assists this body in the furtherance of protection of freedoms by investigating deprivations of those rights, by serving as a clearinghouse of information in respect to denials of equal protection of laws, and by evaluating the laws and policies of the Federal Government concerning discrimination. The Commission reports its activities, findings, and recommendations to Congress and to the President.

Discrimination on the basis of color, race, religion, sex, age, handicap, or national origin is still pervasive in American society and around the world. The issues of human rights and political, social and economic self-determination of a person or class of people are central to our foreign policy. It is therefore incumbent upon us to insure that these issues are at the forefront of our domestic policy.

In supporting this legislation, I also wish to join my colleagues in expressing my support for the independence of the Commission by objecting to the President's recent efforts to replace members of the Commission. While I do not question the integrity or qualifications of the President's nominees, I oppose the attempt to subvert criticism of the administration's record on civil rights.

The effectiveness and continued success of the Commission can only result from its ability to carry forth its congressional mandate without fear of retribution. I submit that the movement to reconstitute the Commission's makeup would seriously compromise the agency's independent oversight responsibility and would establish a dangerous precedent for all independent Federal agencies.

I am particularly distressed that the President's action would remove the only Hispanic member of the Commission. These sentiments have been echoed by a number of my constituents in the Southwest.

Continuation of the Commission is especially critical today with the current administration's constant neglect of the civil rights of the poor, the elderly, women, and the minority groups of this country.

I urge my colleagues to join me in reaffirming our responsibility for maintaining the civil and constitutional rights of all people in this country.

Mr. CLINGER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, on July 19, I, along with 17 Republican colleagues, wrote a letter to the President to state that we would be proposing an amendment to the Civil Rights Commission authorization bill.

We did this out of a variety of concerns. We were concerned about what we perceived to be the increasing politicalization of the Commission, the controversy surrounding the appointment of three new Commissioners and the firing of three others. We did it because we felt that there was a need to resolve apparent ambiguities about th terms, about the grounds, on which members could be asked to resign or be fired.

And, finally, frankly, because we felt that this President was perhaps being somewhat unfairly stigmatized as a racist or bigot or insensitive to civil rights concerns.

So we wrote the President indicating that we were going to offer an amendment to call for staggered terms and to provide standards for the removal of Commissioners.

Since that time, I think it has become increasingly apparent that the overriding priority with regard to this Commission is to insure that it is indeed reauthorized, and the need I think to act promptly to achieve that reauthorization.

I happen to believe that staggered terms deserves consideration in a restructuring of the Commission, but I think that to involve a debate over the staggered term provision at this point in time could jeopardize reauthorization of the Commission, which is clearly not in the interests of the country. It is clearly not the objective of this Congress. We do want to see a reauthorization of the Commission.

Consequently, we will not offer the amendment that we had written to the President about.

Instead, I rise in support of the proposed amendment to H.R. 2230, the Civil Rights Commission Act of 1983, being offered by the gentleman from California, the distinguished chairman of the Subcommittee on Civil and Constitutional Rights, Mr. EDWARDS. He has shown strong leadership in bringing this important legislation to the floor before the August recess, thereby giving the Senate and the President sufficient time to act on the reauthorization before the Commission's statutory authority expires on September 30.

As you know, Mr. Chairman, in 1957, President Eisenhower created the Commission on Civil Rights for the express purpose of monitoring and investigating, in an objective manner, the civil rights policies of the Federal Government. The legislative history which

surrounds the initial establishment of the Commission reflects a strong desire on the part of Congress that the Commission be an independent, factfinding agency. As a result, I believe the Edwards amendment, which establishes appropriate legislative standards for the removal of members of the Commission by the President, provides the Commission members the necessary environment to carry out its congressional mandate. The issue of fixed terms of office for the Commissioners to act as a safeguard for the Commission's independence should be addressed; however, I believe it should be debated in a deliberative manner, rather than in a hasty, heated exchange here on the House floor.

I urge my colleagues to defeat the Sensenbrenner amendment and support the Edwards amendment which insures the integrity of a vitally important component of this Nation's commitment to equal justice for all.

□ 1140

If I might, I would ask the distinguished chairman if he would enter into a colloquy about some of the intent.

Given the recent controversy surrounding the structure and independence of the Civil Rights Commission, I would like to ask the gentleman some questions.

As I understand it, the gentleman's amendment would extend the life of the Commission for 5 years and provide it with a 3-year authorization; is that correct?

Mr. EDWARDS of California. If the gentleman will yield, the gentleman is correct. The amendment also clarifies the fact that a Commissioner may only be removed for cause, that is, for neglect of duty or malfeasance in office.

Let me add that I also wish to thank the gentleman from Pennsylvania and his colleagues on that side of the aisle for their efforts in assuring a bipartisan bill which reinforces the independence of the Commission.

Mr. CLINGER. I thank the gentleman.

The Civil Rights Commission, over the years, has provided the Congress, as well as the executive branch, with an objective view of the discriminatory impact which our programs may have.

In light of the concerns that many of us on both sides of the aisle have about the continued independence and effectiveness of the Civil Rights Commission, I would ask the subcommittee chairman if his subcommittee would examine the structure of the Commission, including the concept of fixed or staggered terms, and make appropriate recommendations upon the expiration of the Commission's authorization under H.R. 2230.

Mr. EDWARDS of California. In response to the gentleman's inquiry, I will say that the gentleman's points are well taken. I concur with the gentleman's remarks that it is necessary to preserve not only the Commission's survival, but also its ability to function as a truly autonomous, factfinding agency.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. CLINGER) has expired.

(On request of Mr. EDWARDS of California and by unanimous consent, Mr. CLINGER was allowed to proceed for 1 additional minute.)

Mr. EDWARDS of California. In view of this exchange, I will recommend to the subcommittee that oversight hearings be held prior to the next reauthorization of the Commission.

Mr. CLINGER. I thank the chairman.

Mr. SENSENBRENNER. Mr. Chairman, will the gentleman yield?

Mr. CLINGER. I yield to the gentleman from Wisconsin.

(On request of Mr. SENSENBRENNER and by unanimous consent, Mr. CLINGER was allowed to proceed for 2 additional minutes.)

Mr. SENSENBRENNER. I thank the gentleman from Pennsylvania for yielding.

Mr. Chairman, the subcommittee did study the issue of fixed staggered terms during the course of this reauthorization. And I am going to be proposing an amendment in the nature of a substitute at the proper time to do just that. This is not my idea. This was the suggestion that was made, again, by Ralph Neas, the executive director of the Leadership Conference on Civil Rights at the subcommittee hearing on March 24.

He says:

The one major gap in assuring the independence of the agency is in the failure of Congress to provide fixed terms of office, as it does with regulatory agencies. Because the agency was viewed as temporary, no terms were specified, and the Commissioners have served at the pleasure of the President.

Now, it seems to me that unless we address this issue here and now, we are going to go on for 5 years or 15 years or 20 years, or whatever comes out of this, without addressing the real fundamental problem, and that is that under the present law, the President can get rid of them all in one fell swoop, and the only way to address that problem is to provide for fixed terms of office on a staggered basis so that the terms of two commissioners expire every 2 years.

Now, again, this is not my idea or the idea of the minority. This was the idea of the Leadership Conference on Civil Rights, as was the 15-year extension. And I think it is really strange that the gentleman from Wisconsin has been fighting for what the Leadership Conference on Civil Rights told us to do in the hearing on March 24, and my friends from California and New Jersey and, regrettably, from Pennsylvania, have been going against everything Mr. Neas said.

Mr. CLINGER. I thank the gentleman for his comments. I can only say that I am sympathetic to the objectives that the gentleman seeks to achieve. I happen to believe that staggered terms definitely deserve consideration in the restructuring of the Commission. I am, however, persuaded that to include those provisions in the authorization bill at this time would in fact jeopardize the chances for reauthorization of the Commission by the deadline.

Mrs. SCHROEDER. Mr. Chairman, will the gentleman yield?

Mr. CLINGER. I yield to the gentlewoman from Colorado.

Mrs. SCHROEDER. I think one of the important things we ought to point out in all this is that the testimony we keep hearing about was really in answer to questions by the committee, and there were other alternatives he threw out.

And, second, that testimony was made before all the controversy about the firings and the new appointments.

So I think this is an evolutionary process where if the gentleman being quoted were here today, he would be in total agreement with the Edwards amendment. It is only fair to point that out for the record.

Mr. SENSENBRENNER. Mr. Chairman, will the gentleman yield again?

Mr. CLINGER. I yield to the gentleman from Wisconsin.

Mr. SENSENBRENNER. Just very briefly, the quotes that I made just recently, and also during the course of my prepared remarks, were from the prepared statement that Mr. Neas filed with the subcommittee prior to the hearing on March 24. It was not in response to a question.

Mr. GARCIA. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mrs. SCHROEDER. Mr. Chairman, will the gentleman yield?

Mr. GARCIA. I yield to the gentlewoman from Colorado.

Mrs. SCHROEDER. I just wanted to clarify that the March hearing of the subcommittee was held before the firing of the Commissioners on the Civil Rights Commission. And before all of this transpired. I want to make that perfectly clear for the record. The statements being given were made at a hearing before all this transpired.

I thank the gentleman from New York for letting me interfere in his time.

Mr. GARCIA. Mr. Chairman, I rise in support of the amendment offered by the gentleman from California (Mr. EDWARDS).

Historically, for 25 years, the U.S. Civil Rights Commission has not been the handmaiden of either political party, whether in or out of power. I think the gentleman's amendment will continue this tradition. Each President now has the opportunity to appoint new members to the Commission. Mandating fixed terms would politicize the period of time for which Commissioners serve. The long tradition of independence which has enabled Commissioners to speak without fear or favor when criticizing shortcomings or praising progress in the field of civil rights would be ended.

Unlike most other Federal agencies, a majority of appointees may not by law be from a single party: they do not resign when administrations change.

This unique character of the Commission stemmed from a recognition by Congress in 1957 that race discrimination was a deeply entrenched national problem that called for unusual and creative Government action. I believe that the Commission's record over the years has vindicated this judgment and has demonstrated why it cannot be a part of any administration.

There is no need for further legislation simply because one administration disagrees with the current legislation and its legislative history. The Commission now operates independently because the inherent prohibition against Commission stacking is already law. The Commission has functioned smoothly and efficiently for 24 years: the questions of tenure have only been raised because the administration has attempted to circumvent the current process.

The Nation today needs a U.S. Commission on Civil Rights with the unshackled ability to conduct its own factfinding and to speak its mind, about what should be done to make equal opportunity a living reality. I urge my colleagues to make sure that this need is met by voting against any effort to bring the Commission under the control of the executive branch.

Ms. SNOWE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment offered by the gentleman from California, Mr. EDWARDS. The May 25 firing of three Civil Rights Commissioners has drawn attention away from the Commission and the reauthorization at hand, and centered public debate on the Commissioners themselves. At the heart of this matter, has been, and remains, the independence of the Civil Rights Commission and not the qualifications of the three administration appointees. As the Republican cochair of the Congressional Caucus on Women's Issues, I have worked with my colleagues to keep this distinction clear. I want to commend Mr. EDWARDS for his efforts to address the valid concerns raised by our colleagues on both sides of the aisle, and urge this body to vote in favor of the amendment he is offering here today.

Since its inception in 1957, the Civil Rights Commission has served the administration, the Congress, and the people of this country as the only bipartisan, independent agency in the Federal Government primarily responsible for overseeing civil rights enforcement. Of foremost importance has been its continual appraisal of Federal laws and policies to insure the absence of discrimination in their enactment and enforcement. We have come far in the struggle to protect the rights of all Americans over the past 25 years, but let me assure you, this struggle is far from won. At a time when hard-won gains for women and minorities are being challenged, today's reauthorization of the Civil Rights Commission is as critical as at any time in its long and proud history.

The recent firings have unfortunately turned what should have been a reaffirmation of the important work of the Civil Rights Commission into a political debate on the Commissioners. With the objective of insuring that this type of politicization of the Civil Rights Commission does not reoccur, a number of measures have been proposed to establish terms for the Commissioners. However, this type of restructuring of the Commission was already rejected by the Judiciary Committee during consideration of H.R. 2230. While such restructuring may in fact be advisable at some point in the Commission's future, I believe such debate should be separate from the politics of the day. Therefore, I urge my colleagues to vote in favor of the Edwards amendment to reauthorize the Commission for 5 years, the length of time given in each of the three previous extensions, and to explicitly provide that the President may only remove a Commissioner for cause.

□ 1150

Mr. RICHARDSON. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. ANDREWS of Texas. Mr. Chairman, will the gentleman yield?

Mr. RICHARDSON. I yield to the gentleman from Texas.

Mr. ANDREWS of Texas. I thank the gentleman for yielding.

Mr. Chairman, I rise in support of the Edwards amendment. President Reagan's recent firing of three members of the U.S. Civil Rights Commission for opposing his policies on affirmative action and busing mocks the original purpose of the Commission. The U.S. Civil Rights Commission was established in 1957 as the only bipartisan independent body in the Federal Government with the exclusive role of overseeing the enforcement of our civil rights laws. But not only is the Commission a bipartisan body—of its six members, three must be Democrats, and three Republicans—past Presidential support of the Commission has been bipartisan as well, that is, until Ronald Reagan came to office.

The very reason why this body is so indispensable to the Congress—and should be to President Reagan—is precisely because it does provide an independent and informed appraisal of the policies and laws we generate and implement. Apparently, the President values the Commission only insofar as its members reinforce his own beliefs. Mr. Chairman, the Civil Rights Commission was not established to tell us what we want to hear.

That is why we should support the Edwards amendment to the Civil Rights Commission Extension bill. The amendment, in addition to extending the Commission the usual 5 years and authorizing funds for its operations for 3 years, specifies that the President can only remove a member for neglect of duty or malfeasance in office. The amendment is a bipartisan one and will guarantee against the politization of this vital independent voice.

The Reagan administration has failed to measure up to its task as the guardian of our civil rights statutes. The President speaks against bigotry and sexism, yet fails to vigorously enforce many of the laws which protect against them. He has repeatedly failed to encourage the Department of Justice to prosecute civil rights violations. A telling example of the administration's thinking is its decision last year to allow tax credits to schools that practice racial discrimination as a matter of policy. Another is the administration's so-called constructive engagement policy which has been ineffective against South Africa's systematic repression of its people and its aggression against its neighbors. Still another is the administration's reversal of past bipartisan policy on the interpretation of title IX of the 1972 educational amendments, allowing discrimination on the basis of sex in an educational program within a federally funded institution if that program itself does not receive Federal funds.

These are only a few of the many good reasons why it is so important to insure the Civil Rights Commission's independence. I urge my colleagues to vote for the Edwards amendment.

Mr. CONYERS. Mr. Chairman, will the gentleman yield?

Mr. RICHARDSON. I yield to the gentleman from Michigan.

Mr. Chairman, I rise in strong support of the amendment to H.R. 2230 offered by my distinguished colleague from California, Mr. EDWARDS, to extend the U.S. Commission on Civil

Rights for 5 years and to provide that the President may only remove Commissioners for neglect of duty or malfeasance in office. I commend my colleague for offering this important amendment to preserve the integrity and independence of the Civil Rights Commission.

President Reagan recently fired three Civil Rights Commissioners because he did not like what they had to say. He did not want to hear that his policies were turning back the hands of time on the progress we have achieved in the area of civil rights. His chosen replacements are not an issue—they are fine candidates. The issue is the continued independence of the Commission. The Edwards amendment will simply make certain that the Commission's statements are unbiased and impartial observations of the status of civil rights in this Nation and not colored by the administration's political views.

For 26 years, Hispanics, native Americans, and other minorities have looked to the Commission as the only independent, nonpartisan Government agency that works to protect their civil rights and to assure that they are afforded the same privileges as all Americans. I am hopeful the Commission will adhere to the language in the committee report on this bill and not only continue to take special notice of civil rights violations against Hispanics but to also incorporate Hispanic concerns in studies which more generally examine discrimination against women and minorities.

Mr. Chairman, it may be disheartening to some in the White House that we have a long way to go before we reach the goal of equality under the law for every American. But this Nation will not realize its true potential for greatness until this goal is achieved. Without a strong, free, unbiased, and independent U.S. Commission on Civil Rights, I am not confident we can achieve our ultimate goal.

Earlier this week, we voted to make Dr. Martin Luther King's birthday a national holiday. With that vote we sent a message across this Nation and around the world that America wants to make Dr. King's dream of equality come true. I urge my colleagues to vote for the Edwards amendment so that this dream can have a chance of becoming a reality.

Mr. LUKEN. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment offered by the gentleman from California (Mr. EDWARDS).

Mr. Chairman, I will not take the full 5 minutes, by any means, but I do rise to congratulate the gentleman from California (Mr. EDWARDS) on working out an amendment here which has the general support, I believe, bipartisan support, of the Members of Congress. I know it has taken a great deal of effort and consultation in arriving at it.

Mr. Chairman, I rise in support of the bipartisan amendments to H.R. 2230, the Civil Rights Commission Act of 1983. In my view this is a major step forward in our efforts to restore the independence of the Civil Rights Commission from the executive branch of Government. That historic independence has been threatened ever since President Reagan attempted to oust three members of the Commission without cause.

Following the President's action earlier this year, I and many other Members responded by offering a legislative solution to make the Commission truly independent. Thirty House Members cosponsored my bill to provide for firing for cause only and to fix terms for Commissioners. In addition, my legislation would attempt to retain the seats of the sitting members of the Commission.

This amendment serves to provide some insulation from political pressures for the Commissioners by making clear that the President cannot remove them except for neglect of duty or malfeasance in office. Thus, the Commissioners do not have to shy away from taking a difficult or controversial stand on an issue for fear of losing their positions and can feel free to call them as they see them. After all, that is the very purpose of this institution, to serve as the American conscience on matters dealing with civil rights. People serving on such an entity should not have to look over their shoulders to make sure that their jobs are not in jeopardy every time they speak their minds.

Independence for the Commission has never been a partisan issue. It's been supported by every President since Eisenhower and has not been threatened seriously before this administration. That is why I am particularly pleased that this amendment is offered as a bipartisan effort to provide some measure of protection for incumbent Commissioners from arbitrary firing.

By reducing the extension of the Commission's charter to 5 years from 15 years in the original bill, the author of the amendment guarantees that there will be a thorough review of this issue following enactment of this year's authorization. We will then have the opportunity to consider other possible formulations for setting the terms of office for Civil Rights Commissioners.

It is imperative that this Congress go on record as supporting a Commission which retains independence from the President. There is no purpose served by an institution which serves as a mere rubberstamp for any administration's policies. There are enough people within the bureaucracy doing that already.

Mr. SENSENBRENNER. Mr. Chairman, will the gentleman yield?

Mr. LUKEN. I will be glad to yield to the gentleman from Wisconsin.

Mr. SENSENBRENNER. I thank the gentleman for yielding.

Mr. Chairman, is the gentleman from Ohio aware of the fact that, in effect, we are locking in people who are presently serving on the Commission for over 5 years, until September 30, 1988, regardless of what they may do, unless they should voluntarily resign?

Mr. EDWARDS of California. Mr. Chairman, will the gentleman yield?

Mr. LUKEN. I would be glad to yield to the author of the amendment, the gentleman from California, for a response.

Mr. EDWARDS of California. I thank the gentleman for yielding.

Mr. Chairman, nobody is being locked in by this bill. If the nominations over in the Senate go through before the effective date of this bill, then the present selections will go through.

Mr. SENSENBRENNER. If the gentleman will yield further, what if they do not? What if a hold is placed on the nominees over in the other body and this bill makes it through prior to September 30?

Mr. EDWARDS of California. In the event the Senate, which is controlled by the other party, I believe, does not complete the confirmations by the time this becomes law, then at least two or three of the members will not be able to be removed except for cause, which I think is entirely proper.

Mr. LUKEN. That was my impression. I just wanted to make sure that that was the author's intent. I have no problem. As a matter of fact, I would like to grandfather in those members that the President has attempted to discharge arbitrarily.

Mr. SENSENBRENNER. If the gentleman will yield to me further, I have a copy of a letter that Mr. Shanker, the president of the American Federation of Teachers, sent to the junior Senator from Ohio (Mr. METZENBAUM), and I would like to read at last a paragraph of it.

> The AFT union gave massive support to your reelection last year. I was profoundly disappointed at your behavior at the Senate Judiciary Committee hearings on Wednesday. How am I to explain to my members in Ohio that the person we helped reelect prefers Mary Berry to Morris Abrams?

Then Mr. Shanker goes on and quotes that many AFT members remember Mary Berry for her famous China speech.

Mr. LUKEN. Mr. Chairman, I would like to reclaim my time. I am familiar with Mr. Shanker's position and I respect his position, but what we want to accomplish is not to determine the relative qualifications of these members,

but by this action to guarantee some independence for the Commission.

That is the important thing that the President has threatened, and if he is allowed to carry it off without our taking action, the independence of the Commission will be totally shorn away?

Mr. SENSENBRENNER. If the gentleman will yield further, I think one of the things that has characterized the civil rights movement in the past is that it has risen above personalities and has risen above partisan politics. I do not equate the independence of the Commission with three individuals whose nominations for replacement have been sent in to the other body. I think that debate ought to go on in the other body on the confirmation of the new nominees, rather than attempting to change the law on a Commission that expires at the end of next month, to say that if this bill passes before the other body takes action on those nominees, then the nominees that the President has sent up are out of luck. Let us confine the debate to those people over there.

Mr. LUKEN. Mr. Chairman, if I may reclaim my time, the gentleman can get his own time.

Mr. Chairman, if the nominees the President sends up are out of luck, that is perfectly fine with me. I have introduced legislation and have stated that the purpose of that legislation would be to grandfather in these current members.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. LUKEN) has expired.

(By unanimous consent, Mr. LUKEN was allowed to proceed for 1 additional minute.)

Mr. LUKEN. Mr. Chairman, I think the members who are now serving who have been arbitrarily relieved of duty by the President should continue, and I do not think we want to get into personalities, and that is why I am not going to respond to Mr. Shanker. I am afraid Mr. Shanker has gotten into personalities in supporting one of those who has been nominated by the President.

But those considerations should be aside. I think the important thing is the independence of the Commission. I think the amendment offered by the gentleman from California will provide a modicum of independence and will attempt to reverse what the President has done, and that is what I want to do.

Mr. DIXON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman and Members, if we listen to the debate on the floor today, it is clear on three things.

One, the amendment offered by the gentleman from California has bipartisan support, supported by the Black Caucus, the Women's Caucus, the Hispanic Caucus, and many of the Republicans.

Two, it would certainly make clear the independence of the Commission, and that members could only be discharged for cause.

Three, it is a 5-year term, which is consistent with other reauthorization legislation, which will give us plenty of time to examine suggestions and testimony that has been given about terms.

Mr. Chairman, I urge an "aye" vote.

□ 1200

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. EDWARDS).

The Chair will inquire, does the gentleman from Wisconsin (Mr. SENSENBRENNER) ask for a division of the question?

Mr. SENSENBRENNER. Mr. Chairman, I ask for a division of the question.

The CHAIRMAN. The Chair would point out to the gentleman that the amendment really contains three parts, the second being, on page 2, line 4, to strike out "1998" and insert "1988".

The first part is, on page 2, line 2, to insert "(a)" after "SEC. 2."

Then the third part is the insertion of a new subsection (b) dealing with the removal of commissioners before the term of office.

The Chair would propose to put the question first only on the date change, and then on the remainder of the amendment which constitutes in effect one proposition.

Mr. SENSENBRENNER. That is fine, Mr. Chairman.

The CHAIRMAN. The question now is on that portion of the amendment offered by the gentleman from California (Mr. EDWARDS) dealing with the date change from "1998" to "1988."

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. SENSENBRENNER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 400, noes 24, not voting 9, as follows:

□ 1220

The Clerk announced the following pairs:

Mr. LEWIS of California changed his vote from "aye" to "no."

Messrs. PARRIS, SKEEN, and CHAPPIE, and Mrs. JOHNSON changed their votes from "no" to "aye."

So that portion of the amendment dealing with the date change from "1998" to "1988" was agreed to.

The result of the vote was announced as above recorded.

PARLIAMENTARY INQUIRY

Mr. LEVITAS. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. LEVITAS. Mr. Chairman, I understand the vote that was just taken was on the first part of a divided question. My inquiry is: Is it in order at this time for there to be any further debate on the second portion of the question that has been divided?

The CHAIRMAN. The Chair will advise the gentleman that further debate would be in order under the 5-minute rule until the Chair puts the question.

Mr. LEVITAS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment. I only regret that it could not be made retroactive.

I think that the recent performance of the President in dismissing the members of the Civil Rights Commission because they did not agree with his philosophy is totally inappropriate and defeats the entire purpose of a Civil Rights Commission. If the Commission were an enforcement or regulatory Commission I would feel differently. But that is not the case. What is the Commission? If it is to be anything, it is to be the gadfly of the conscience, not only of an administration, but of the entire Nation on matters of this sort.

When we are comfortable with what we are hearing from the Commission, then it probably is not doing the job it ought to be doing.

I do not happen to agree with the philosophy expressed by the Commission in many areas, but I do think we need to have those views heard from this forum.

We do not need a group of trained seals on a Civil Rights Commission. While the new appointees may not be simply trained seals, they should not give the appearance of being so by accepting these appointments under the circumstances of their predecessors' firings. In fact, I agree with views of some of the new nominees, and they have good civil rights records. But the circumstances of their appointment is wrong. It is for that reason that I would support the amendment.

I only wish it could be made retroactive.

Ms. OAKAR. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I am happy to yield to the gentlewoman from Ohio.

Ms. OAKAR. Mr. Chairman, I want to congratulate the gentleman on his remarks and I simply would like to associate myself with the gentleman's remarks in the spirit of this amendment.

Mr. LEVITAS. I yield back the balance of my time.

Mr. SENSENBRENNER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I am going to take about 30 seconds just so that the membership is clear. This is the second part of the Edwards amendment that in effect states that the members of the Civil Rights Commission can be removed only for cause.

If this legislation containing this language is enacted into law prior to the time the other body votes on the confirmation of the three nominees the President sent up a couple of months ago, the President will be effectively precluded from appointing those three individuals to the Civil Rights Commission.

I think that if this part of the amendment is adopted, this bill is going to become prime veto bait because, in effect, the Congress will be telling the President who is to serve on an executive branch Commission.

Since the Commission's life expires on September 30, 1983, this is a game of chicken that I do not think we should play, since if no legislation is passed the Commission will go out of business completely.

I ask for a no vote and yield back the balance of my time.

Mr. LUNGREN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would ask for a no vote on this for one very important reason. There seems to be some criticism of some of the President's actions with respect to the appointment of three people on the Commission and a new executive director.

There does not seem to be much disagreement, at least in the hearings that have been held in the other body, with respect to the qualifications of those three appointees. In fact, some in the other body have said that it is irrelevent whether those people are qualified or not.

The question I think becomes very important for this reason: It seems to me that for too long a period of time we have somehow equated those who support civil rights goals with one particular political philosophy and one particular agenda for achieving those goals. I speak of questions such as busing, affirmative action, quotas, and so forth.

I think that does a disservice to all of us who have a commitment to civil rights. It seems to me one of the things we should wish to have happen with respect to the Civil Rights Commission is that they have people whose commitment to the goal of civil rights is unquestioned but who might have some differences of opinion with respect to the achievement of those goals. In that way, we might have some dialog, we might have some enlightened argumentation with respect to how we achieve those goals. Thus we might move this country a little further on the path toward achieving those goals.

I would suggest that if we follow this amendment we will reject an opportunity to do that and perhaps not move anywhere closer to where we all want to be.

Mr. Chairman, I must say the intolerance of some Members to even discuss this issue ought to be a sore point with the general membership here. This is an important issue. It deals with an important question, the question of how we achieve civil rights in this country.

If we are going to say that one party or one political philosophy has the corner on the achievement of those goals we are doing a disservice to the American people because we are saying to a great number of American people who may not happen to agree with busing, who may not happen to agree with specific quotas or certain types of affirmative action, "You are cut out of the process of civil rights in this country."

I think that puts us in a wrong position and makes it far less likely that

we will achieve the goals to which we all ascribe.

The CHAIRMAN. The question is on the remaining portion of the amendment offered by the gentleman from California (Mr. EDWARDS).

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. SENSENBRENNER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 286, noes 128, answered "present" 1, not voting 18, as follows:

[Roll No. 323]

Mr. NICHOLS changed his vote from "aye" to "no."

Mr. LENT changed his vote from "no" to "aye."

So the remaining portion of the amendment was agreed to.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. WALKER

Mr. WALKER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WALKER: On page 2, after line 15, add the following new section: Section 4. It is the Sense of the Congress that the Civil Rights Commission should undertake a study of minority youth employment opportunities. Such a study shall attempt to define whether federal programs, laws, regulations or rules are having an adverse or negative impact on the creation and maintenance of minority youth employment opportunities. The Commisison should, not later than September 30, 1984, report back to the Congress on the results of the study, together with its recommendations on how to increase minority youth employment opportunities by reducing or eliminating any adverse impact of Federal programs, laws, regulations or rules.

Mr. EDWARDS of California. Mr. President, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from California.

Mr. EDWARDS of California. I thank the gentleman for yielding.

Mr. Chairman, this amendment suggests to the Civil Rights Commission that they undertake a study of minority youth employment opportunities.

We have examined this amendment on this side. It is a recommendation. It does not order the Civil Rights Commission to do anything.

We have no objection to it on this side. We compliment the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman from California.

Mr. SENSENBRENNER. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Wisconsin.

Mr. SENSENBRENNER. Mr. Chairman, the minority accepts this amendment. It is a constructive addition.

Mr. WALKER. I thank the gentleman and I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. WALKER).

The amendment was agreed to.

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. SENSENBRENNER

Mr. SENSENBRENNER. Mr. Chairman, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. SENSENBRENNER: Strike out all after the enacting clause and insert in lieu thereof the following:

That this Act may be cited as the "Civil Rights Commission Reauthorization Act of 1983".

ESTABLISHMENT OF TERMS FOR MEMBERS OF THE COMMISSION

SEC. 2. Section 101 of the Civil Rights Act of 1957 (42 U.S.C. 1975) is amended by adding at the end thereof the following:

"(f)(1) Upon vacancies in the Commission after the date of the enactment of this subsection, members of the Commission shall be appointed for a term of six years except

that, of the members first appointed to such vacancies—

"(A) two, not affiliated with the same political party, shall be appointed for a term of two years;

"(B) two, not affiliated with the same political party, shall be appointed for a term of four years;

"(C) two, not affiliated with the same political party, shall be appointed for a term of six years.

"(2) After the date of the enactment of this subsection, an individual appointed to fill a vacancy occurring other than by the expiration of a term of office shall be appointed to the unexpired term of the member such individual succeeds.

"(g) A commissioner may be removed by the President only for inefficiency, neglect of duty, or malfeasance in office.".

EXTENDING THE LIFE OF THE COMMISSION

SEC. 3. Section 104(c) of the Civil Rights Act of 1957 (42 U.S.C. 1975c(c)) is amended by striking out "1983" and inserting "2003" in lieu thereof.

AUTHORIZATION OF APPROPRIATIONS

SEC. 4. Section 106 of the Civil Rights Act of 1957 (42 U.S.C. 1975e) is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 106. There are authorized to be appropriated to carry out this Act $13,000,000 for the fiscal year ending September 30, 1984, and such sums as may be necessary for each of the following nineteen fiscal years.".

Mr. SENSENBRENNER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

□ 1250

Mr. SENSENBRENNER. Mr. Chairman, this amendment greatly strengthens the manner in which the Civil Rights Commission will operate if it is reauthorized.

My amendment would extend the life of the Commission for 20 years, which is 5 years longer than H.R. 2230; would provide that future members of the Civil Rights Commission be appointed for specific 6-year staggered terms as is currently the case with the EEOC, the Federal Election Commission, and similar agencies; and would provide that future Commissioners be removed for inefficiency, neglect of duty or malfeasance in office. This is boiler plate language which governs the Merit System Protection Board in addition to other boards and commissions.

The fixed term and removal for cause provisions insure the independence of the Civil Rights Commission, whose duties are to make recommendations to Congress and the executive branch on civil rights policies and laws. Fixed terms would insure the infusion of new ideas and approaches for solving civil rights problems. Fixed terms would regularize the period of time for which Commissioners serve. In the past, some members have served for periods as short as 1 year; others have served for periods as long as 17 years. A 6-year term is the average length of time that the 23 Commissioners who have been appointed since 1957 have served. A 6-year term would also preserve the continuity of policymaking by providing for only two vacancies at any one particular time. It would insure the infusion of new ideas and approaches for solving civil rights problems. It would give each President the opportunity to appoint new Commissioners on a regularized basis.

Fixed terms and a long extension period are both concepts whose time have come. The removal for cause provision provides an extra layer of insulation to preserve independence.

My amendment suggests a better approach than the Edwards amendment, which only provides for a 5-year extension with a removal for cause provision. Let us not kid ourselves about the need for a long-term authorization for the Civil Rights Commission. Four months ago, the gentleman from California and the civil rights community supported extending the Commission for 15 years. Now they are slashing this figure by 10 years. If the need to extend the Commission for 15 years existed 4 short months ago, it still exists today. My amendment is the only approach which is realistic. It recognizes the Commission is not a temporary agency but a semipermanent one. A 20-year extension, with staggered terms and removal for cause recognizes reality.

I strongly urge your support for this amendment. It is the best approach for insuring continuity, independence, and lack of political pressure.

ANNOUNCEMENT BY THE CHAIRMAN

The CHAIRMAN. Before recognizing another Member to speak, the Chair would like to make a statement.

Regardless of the effect that pending legislation may have on proceedings in the other body, reference to actions or proceedings in that body or remarks critical of Members of that body are not in order under the rules and precedents of the House.

Mr. EDWARDS of California. Mr. Chairman, I rise in opposition to the amendment.

Mr. CONYERS. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of California. I yield to the gentleman from Michigan.

Mr. CONYERS. I thank the gentleman for yielding to me.

Mr. Chairman, it seems that we are now in the situation—and tell me if I am correct—that after we voted down the 15-year term, we now have a substitute that would go to a 20-year term?

Mr. EDWARDS of California. Nineteen years.

Mr. CONYERS. Nineteen years.

Mr. EDWARDS of California. That is correct. We have already voted against a 15-year term, and now the gentleman from Wisconsin is asking us to approve a 19-year term.

Mr. CONYERS. And that would mean that the budget would go to a 20-year period?

Mr. EDWARDS of California. That is correct.

Mr. CONYERS. I thank the chairman.

Mr. RODINO. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of California. I yield to the distinguished chairman of the Judiciary Committee.

Mr. RODINO. I thank the gentleman for yielding.

Mr. Chairman, the House has already voted and expressed its sentiment regarding this legislation. This is absolutely inconsistent with the action that has already been taken. For the very reasons that we recited in adopting the Edwards amendment, which provided for 5 years and for removal for cause, which was overwhelmingly supported by the House, I would suggest that the House turn down this amendment.

Mr. EDWARDS of California. I thank the gentleman.

Mr. OBERSTAR. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of California. I yield to the gentleman from Minnesota.

Mr. OBERSTAR. I thank the gentleman for yielding.

Mr. Chairman, I rise in opposition to the Sensenbrenner amendment and in support of the Edwards amendment.

Mr. Chairman, in a perfect world, we would not need to be considering this legislation. Discrimination would not exist. We would not need a Civil Rights Commission to oversee the enforcement of civil rights in the United States.

That perfect society does not exist, and even in today's more enlightened society, sensitive and responsive to the needs and rights of minorities, we do need an independent Civil Rights Commission.

The independence and integrity of the Commission, its freedom from political pressures, are all the more important because the Commission has no enforcement power, except that of public exposure of injustice. Its independence and its 25-year-old reputation for impartially and for accuracy give the Commission its influence.

President Reagan wants to replace five of the six Commissioners. If he succeeds, he will destroy the Commission's independence, which is the source of much of its effectiveness.

Apparently, the President does not like the message of the Commission. Change the Commissioners, change the message. The Commission, however, does not develop policies. It does

not choose among options. It reports the realities of discrimination in the United States. If the President does not like the reports of the Commission, he should work to eradicate the discrimination which exists in this country, and which is the subject of more reports.

I support the Edwards-Fish bipartisan amendment to insure the Commission's independence. The amendment is reasonable. It provides for a limited 5-year reauthorization, rather than the 15-year reauthorization provided in the original bill. I support the Edwards amendment which limits the authority of the President to remove Commissioners for only two causes: Malfeasance in office or neglect of duty.

If there are structural problems with the Commission, Congress can consider carefully necessary changes at a later time. We must not allow, this President, or any President to reverse historical precedent and reconstitute the Commission by firing five of the six Commissioners. President Reagan should never have questioned the independence of the Commission. Having done so, he has required Congress to act forcefully to reaffirm that Commissioners should be fired only for cause.

I urge an overwhelming vote for the bipartisan amendment and for final passage of the reauthorization.

Mr. EDWARDS of California. Mr. Chairman, I rise in opposition to the amendment. The gentleman from Wisconsin's amendment would fundamentally alter the structure of the Commission absent evidence of a need for such a change. For this reason, I oppose my colleague's amendment.

Underlying my strong opposition to the proposed amendment is its provision for 6-year staggered terms for the Commission's members. The question is not "what's wrong with setting terms," but rather "what is the need to set terms?" Currently, the Commission's members have open-ended terms, but historically their tenures have averaged 6 to 7 years. This natural turnover has afforded the Commission a certain amount of continuity and stability, while at the same time allowing for new and fresh perspectives to be added. Thus, because the current system has worked well over the 25 years that the Commission has been in existence, we see no need to modify an already well-functioning process. This view is reflective of the majority of the witnesses who testified before our subcommittee who urged caution in making any changes to the Commission's statutory authority. As the gentleman from Wisconsin has himself recognized in his "Dear Colleague" of July 28, the need for fixed and staggered terms has not demonstrated itself in the past because of the length of the extension periods of the life of the Commission.

A 5-year extension is in keeping with the congressional intent of a strong and independent Commission; it is also consistent with the time period given the Commission in the previous three extensions. To change the historical nature and structure of the Commission in the absence of evidence that such a change is needed is inappropriate.

The staggered terms concept has also been promoted as a way of guaranteeing that the Commission maintain the independence which the Congress intended it to have. However, this issue of independence has only become a problem because this administration has made it so. The Commission's independence has been respected by both Democratic and Republican Presidents since 1957. This administration has taken the unprecedented step of attempting to replace five of the six Commissioners.

Similarly, I oppose the open-ended authorization for 19 years, as outlined in the proposed amendment, because it denies the Judiciary Committee a role in the Commission's budget process and eliminates any element of fiscal accountability.

Lastly, the gentleman's amendment calls for the removal of Commission members for inefficiency, neglect of duty or malfeasance in office. While we support the objective standards of neglect of duty and malfeasance in office, inefficiency is a subjective standard subject to political use, and thus is contrary to Congress intent that the Commission remain an independent, bipartisan body.

In sum, then, because the proposed changes are unnecessary and inappropriate, I urge rejection of this amendment.

Ms. FERRARO. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chariman, the most critical consideration in establishing guidelines for the operation of the Civil Rights Commission is that we maintain the independence of the Commission. Since its formation the Commission has built a reputation for providing solid documentation of discrimination in our society. Its work has been pivotal in advancing the cause of civil rights.

My reason for opposing the Sensenbrenner substitute is that I fear its adoption would undermine the independence which has made the Commission so effective. I certainly support the language barring any President from removing any Commissioner except for cause, and on first glance, the idea of fixed 6-year terms sounded sensible as well.

On closer inspection, however, I concluded that fixed terms may substantially compromise the independence of Commissioners whose terms were set to expire. We all know too well that the pressures of election year cause us to give greater weight to political considerations in making decisions. Just this morning, a radio reporter, in giving a wrapup of this session of Congress so far, made the point that when Congress returns in September, the pressures of a Presidential campaign season, and I would add our own reelection campaign, will dictate much of what happens here.

I am concerned that if this amendment passes, Commissioners who are up for reappointment will be looking over their shoulders to see whether the President might approve of this or that action. Even if Commissioners did not alter their views or tone down reports of injustice, their actions would be more subject to interpretation in light of their interest in being reappointed which would cast a political pall over the Commission's activities.

The progress that this country has made on civil rights in the last quarter century is one of the proudest chapters in our history, and the Civil Rights Commission has played an heroic role in the struggle. I urge my colleagues to vote for the continued independence of the Commission, and to oppose the amendment offered by the gentleman from Wisconsin.

Mr. DEWINE. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I would like to engage the author of the amendment in a colloquy.

Would the gentleman tell us where the idea originated for lengthening the authorization extension?

Mr. SENSENBRENNER. If the gentleman will yield, it originated in the White House. The President of the United States sent a message to the Congress earlier this year, specifically asking for a 20-year extension.

Mr. DEWINE. Was the gentleman present when any testimony was taken in the Judiciary Committee or the Judiciary Committee Subcommittee concerning what groups supported lengthening of the term?

Mr. SENSENBRENNER. As I quoted in my remarks during the debate on the rule last night and on the Edwards amendment today, Ralph Neas, the executive director of the Leadership Conference on Civil Rights, specifically endorsed the 15-year term as necessary to preserve the long-range planning capability of the Commission, so they would not have to be dropping everything they did very frequently to determine whether their life would be extended by an act of Congress.

Mr. DEWINE. So the support at that point at least came from persons in the civil rights community.

Mr. SENSENBRENNER. Yes.

Mr. DEWINE. Moving to another area, I want to make sure I understand the actual status of the bill now if the gentleman's amendment is not in fact approved. I have looked through this, but I may be misunderstanding.

Is it my understanding that if the current status of the bill goes through without the gentleman's amendment, people appointed on the Commission would have life tenure?

Mr. SENSENBRENNER. If this bill is signed before the other body takes action on the President's nominations, then the existing members of the Commission would remain in office unitl September 30, 1988, which is the expiration date of the Commission under the Edwards amendment, and could only be removed for malfeasance in office or neglect of duty. That is an effective grandfathering or grandmothering in of the existing Commissioners.

Mr. DEWINE. But irrespective of when the bill is signed, looking at this thing prospectively, is it my understanding that without any fixed terms and with the change that has been proposed, we would have, basically, life tenure, that a person could only be removed for cause?

Mr. SENSENBRENNER. The gentleman is correct.

□ 1300

Mr. DEWINE. Is there any precedent for this, other than Federal judges, which is written into the U.S. Constitution; any other precedent for life tenure?

Mr. SENSENBRENNER. Not to my knowledge.

Mr. CARPER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the Chair has recently made the following statement:

> Regardless of the effect that pending legislation may have on proceedings in the other body, references to actions or proceedings in that body, or remarks critical of Members of that body, are not in order under the rules and precedents of the House.

I simply want to rise to thank the Chair for that statement and to express my own regret over the insertion in the RECORD earlier today of a harshly worded letter from American Federation of Teacher's president, Albert Shanker, to U.S. Senator JOSEPH R. BIDEN, of Delaware.

It is my belief, sir, that the insertion represents a technical violation of the rule of comity. I simply wanted to rise to be on record to express my regret that it was inserted.

The CHAIRMAN. The question is on the amendment in the nature of a substitute offered by the gentleman from Wisconsin (Mr. SENSENBRENNER).

The amendment in the nature of a substitute was rejected.

● Mr. FAUNTROY. Mr. Chairman, I urge support of H.R. 2230 and the amendment by my colleague, Congressman DON EDWARDS, which would extend the Civil Rights Commission for 5 years, and provide that the President may only remove a Commissioner for "cause" such as neglect of duty or malfeasance in office.

This legislation is necessary if the Commission is to remain independent and function with integrity as our Nation's conscience on civil and human rights.●

● Mr. KOGOVSEK. Mr. Chairman, I rise in support of the Edwards-Clinger amendment which in my opinion underscores the legislative history and intent of the U.S. Commission on Civil Rights as an independent entity. It was intended to be free of executive and legislative interference and had managed to remain in this situation until recently. It is truly unfortunate that because the Commission has complied with its mandate of providing independent and objective monitoring of civil rights in this country, its independence is being undermined. I believe this bipartisan amendment is explicit in its intent that Commissioners were not and are not to be removed without just cause.

In addition, I believe that over the 5-year reauthorization period cooler heads will prevail and a thorough discussion, analysis, and assessment can and will be made as to whether structural changes; that is, fix terms, stronger terms, national subpena, et cetera, in the Commission will either enhance the Commission's independence and objectivity or result in the erosion of these important traits. I believe this is a very prudent way to go and perhaps Mr. EDWARDS' Subcommittee on Civil and Constitutional Rights can even hold field hearings on the subject.

In closing, I was pleased to know that the Judiciary Committee report indicated a concern that the Commission establish better outreach and assessment of the civil rights conditions facing Hispanics. I believe the Commission has and should do the best it can for all population groups facing difficulties. However, I was especially pleased that Hispanics were mentioned for they are the fastest growing population group in this country, a phenomenal growth of 61 percent from 1970 to 1980. As a native of Colorado and of the Southwest I have a strong sensitivity and interest in the plight of Hispanics in this country.●

● Mr. STARK. Mr. Chairman, I support the efforts of the gentleman from California (Mr. EDWARDS) to minimize the Reagan administration's damage to the Civil Rights Commission.

But I fear that the President's assault on the independence of the Commission is just one of the many-pronged attacks on the entire concept of civil rights and the duties of the National Government.

The President has said that he is not a racist. In last Thursday's Washington Post, Mr. William French Smith, the Attorney General, attempted to defend the President's civil rights record. He did it, not by any substantive explanation to the contrary, but by a vitriolic attack on "politically motivated criticisms and irresponsible journalism."

Our colleague from New York, Mr. GARCIA, was good enough to point out in his House speech on that same day the sum total of what Mr. Reagan has done against the cause of freedom in this country—a list so depressing I need not repeat it.

I should just like to point out what Mr. Thomas Atkins, general counsel for the NAACP said in May, speaking before the House Subcommittee on Civil and Constitutional Rights. He asked them to abolish the Civil Rights Division of the Justice Department. Testifying in concert with Mr. Atkins was Mr. William Taylor, who represented the Leadership Conference on Civil Rights, a coalition of 165 organizations representing women, minorities, labor, the handicapped, and civic groups.

At first I thought I was reading a misprint, Mr. Speaker, and indeed, I wish I had. But Mr. Atkins pointed out, in all seriousness, that to allow the Justice Department to continue putting its "policy of defiance of the law into action" is an insult to the victims of discrimination.

It seems the leaders of our Nation's most respected civil rights groups have decided that if the foxes have seized the henhouse, then we would all be better off if we just burned the whole henhouse down.

Indeed, we have a Justice Department which opposes school busing, and encourages school desegregation even in communities where the issue has long been settled. The Justice Department has not filed a new school desegregation suit since President Reagan took office, nor has it brought one lawsuit involving a mental health or mental retardation facility in more than 2 years.

And we have an Assistant Attorney General, Mr. William Bradford Reynolds, who not only opposes affirmative action, but refers to it as "morally wrong."

Well, Mr. Speaker, I find it morally reprehensible that the Federal agency charged with insuring justice is unjust.

Mr. Atkins went on to say that he deemed it a tragedy that he could not think of a single civil rights matter in

which he would welcome the participation of the Justice Department.

Mr. Speaker, Mr. Atkins is right. It is a tragedy. But even worse for America, it is a predictable tragedy. For the sullying of the U.S. Justice Department is just one more ugly metamorphosis in which heretofore decent Government agencies have become corrupt under Mr. Reagan's administration.

After the scandal and resignations at the EPA, in light of the misconduct of Anne Burford and company, and not forgetting the continuing escapades of Secretary Watt and his "fire sale" mentality when it comes to our natural resources and wonderlands, what more are we to expect?

More of the same, unfortunately.

We can forgive the errant Dr. Jekyll a time or two, but when Mr. Hyde becomes his dominant ego, something must be done. The Federal Government, under Mr. Reagan, is turning into the embodiment of Mr. Hyde.

Among the latest straws which have broken any remaining faith in the good will of this administration toward equal rights have been the President's Freudian slips about "the place of women" and additional "token" appointments of women, and his defense of Thomas Ellis as a man with a "reputation for honor that (he) has always possessed." The word "honor" should turn to ashes in the mouth when used to describe a leading American supporter of the South African "slavocracy," one who funded research seeking to prove racial inferiority, and who distributed racist literature against President Ford in support of Mr. Reagan.

Ms. Kathy Wilson is an honorable woman. And a staunch Republican. Ms. Wilson grew up in a Republican family, married a Republican, and plans to stay a Republican. She is also chair of the National Women's Political Caucus. She has some advice for what Mr. Reagan can do to help women: he should not run for reelection.

When it comes to women's rights, said Ms. Wilson, Mr. Reagan is a "dangerous man." She pointed out in Sunday's Washington Post the farcical state of Mr. Reagan's alleged attempts to resolve the gender gap in his administration. The task force on legal equality doesn't even have a staff or authority. "They simply present what they believe to be discriminatory laws—most of which has been better done in a Civil Rights Commission study in 1978," she said.

Ms. Wilson also had little praise for Mr. Reagan's "50 States program," in which women's groups were promised a State-by-State approach toward equality. "The only thing that's been done," she said, "is a review of the discriminatory statutes of the States, but to further demonstrate the futility of the program, 40 States had already done so anyway. The trick had never been in identifying the discriminatory statutes. The trick has been in getting legislators to do something about them."

Ms. Wilson's frustrations and the ineptitude of the Reagan administration was most cogently addressed in her summation: "If we'd gone State-by-State for the vote, women in Mississippi would still not be voting."

The Congress may legislate until it is blue in the face on the issue of civil rights, but if the heart of the administrators of the law is against the law, there will be little justice in the land.●

● Mr. EVANS of Illinois. Mr. Chairman, I rise in support of H.R. 2230, the bill to extend the life of the Civil Rights Commission. For the past 26 years, this Commission has played a vital role in bringing to the foreground discrimination in employment and in all sectors of our society.

Since its inception in 1958, the Commission has provided a great service to the entire country by investigating discrimination claims and recommending suitable solutions to those problems. That voice for equal rights must remain strong and independent, despite attempts to regulate its action by the arbitrary dismissal and appointment of Commission members.

The U.S. Commission on Civil Rights was established with the intent that it remain an independent, bipartisan, fact-finding agency. Recent events have demonstrated the need to maintain the independence of the Commission. In its efforts to replace three Commissioners, the Reagan administration has only reminded us of the need to remain ever vigilant against encroachments on the objectivity and independence of this Commission.

The Civil Rights Commission should take orders from no one. President Reagan has violated the spirit of the Civil Rights Commission by firing Commissioners Saltzman, Berry, and Ramirez. In order to build enough conservative support to carry out the administration's policies President Reagan appointed more conservative members. The Reagan administration is clearly trying to stack the deck in its favor by influencing the recommendations of this important Commission.

Our Nation has a commitment to equal protection and treatment of all its citizens. The Commission on Civil Rights serves as a symbol of the U.S. Government's determination to meet that commitment. It also serves as an active monitoring agency of potential civil rights issues, informing both the President and the Congress of public views on these issues.

We must recognize the imperative need for continued independent operation of this body. With our ever-growing population, civil rights problems will surely continue to confront more and more areas of jurisdiction. The continuation of a bipartisan makeup is essential in order to maintain the commitment of this Nation to guarantee and protect equal rights for all Americans.

All of us are affected by civil rights violations regardless of our sex, religious beliefs, or race. The Civil Rights Commission was designed to be a representative body, which would investigate areas of major concern and monitor the developments of various civil rights matters.

The Commission has served as an important voice for equal rights in this country, a voice in support of an equitable and just system of representation. The issues handled by this Commission are not going to disappear. In fact, I think we can safely assume that they may be ever more prominent in the future. We must assure American citizens of our continued commitment to equal rights by voting to extend the life of the Civil Rights Commission, and by remaining vigilant toward attempts to damage its independence.●

● Mr. BROWN of California. Mr. Chairman, I rise in support of H.R. 2230, extending the life of the Civil Rights Commission, and in support of the bipartisan amendment sponsored by Mr. EDWARDS.

The Civil Rights Commission prefaces each of its reports with the following explanation of its duties: "The U.S. Commission on Civil Rights is a temporary, independent, bipartisan agency established by Congress in 1957 * * *." H.R. 2230 and the Edwards amendment conform to this description. They retain the Commission as temporary—authorized for 5 years—independent—providing for removal of Commissioners only "for cause"—and bipartisan.

Our colleague, Mr. SENSENBRENNER, is sponsoring an amendment that would extend the authorization for 20 years. This proposal, indicating strong congressional support for the Commission, would also entail creating fixed terms for the Commissioners. This step has not been necessary in the past because of the Commission's limited authorization term. Since we have had succcess in the past with the 5-year authorization cycle, with 23 Commissioners serving an average of 6½ years, the need to extend authorization to 20 years and implement fixed terms seems somewhat questionable.

The Commission's express purpose is to objectively monitor and investigate the Federal Government's civil rights policies. Since its creation, it has provided over 700 reports. Congress has given serious consideration to Commission reports in civil rights legislation. The Commission has functioned during seven administrations, including the Eisenhower, Johnson, and

Nixon. Until now, its independence has never been questioned. Although congressional intent insures the Commission's independence, the Edwards amendment would clearly define the conditions for removal of a Commissioner, in language less broad than Mr. SENSENBRENNER'S.

Mr. Chairman, this body just passed legislation commemorating the birthday of the Nation's greatest civil rights leader, Dr. Martin Luther King, Jr. Due to the work of Dr. King and others like him, and due to private and Government Commissions like the Civil Rights Commission, we have made significant strides toward Dr. King's dream. It would be sadly inappropriate to turn our backs on civil rights now. In Dr. King's words:

It is a dream deeply rooted in the American dream that one day this nation will rise up and live out the true meaning of its creed—we hold these truths to be self-evident, that all men are created equal. Now is the time to make real the promises of democracy.

Now is the time. I urge my colleagues to support the Edwards amendment to H.R. 2230.●

● Mr. FRENZEL. Mr. Chairman, I rise in support of H.R. 2230, reauthorizing the Civil Rights Commission. I also rise in support of the Edwards amendment, limiting the authorization to 5 years, and allowing removal of Commissioners for cause. The NAACP, the Leadership Conference on Civil Rights, and many other groups support the Edwards amendment as the best way to continue the autonomy of the Commission.

Currently, Mr. Chairman, the equal opportunity oversight authority in the Federal Government is divided amongst many Federal agencies. In my judgment, Mr. Chairman, an effort to coordinate these efforts under one agency, perhaps under the Civil Rights Commission, would be a worthwhile endeavor. For now, I commend H.R. 2230, and urge its passage.●

● Mr. SIMON. Mr. Chairman, I rise in support of the bill, H.R. 2230, the Civil Rights Commission Act of 1983. It is essential that the Commission on Civil Rights be extended and that its independent status be retained. I support the amendment which my friend and colleague from California, the distinguished chairman of the Subcommittee on Civil and Constitutional Rights, will offer to extend the life of the Commission for 5 years and to provide for the removal of the members of the Commission only when neglect of duty or malfeasance in office has been demonstrated.

The latter amendment is particularly crucial because the President is attempting to replace three current members of the Commission because he disagrees with the Commission's position on several issues. Establishing the Commission as an independent, bipartisan, factfinding agency was a deliberate act of the Congress. The Commission reports to both the Congress and the President. The President does not have to agree with the findings and recommendations of the Commission, nor does the Congress. Whether we agree or disagree with the Commission is not the issue. Whether we have an independent adviser on civil and human rights issues is. If the President has his way, the independence of the Commission will be violated and forever destroyed.

My colleague from California and I have recently seen the benefit and contribution of having it perform its role as investigator of civil rights issues, gadfly and conscience of the executive branch and Congress, and adviser to the Nation on where we ought to be going and what we ought to be doing to insure the civil rights laws and the individual rights of all Americans are enforced and respected. His subcommittee and the Subcommittee on Postsecondary Education, which I chair, held joint hearings on the administration's enforcement of the Civil Rights Act of 1964—title VI—title IX of the Education Amendments of 1972 sex discrimination, and section 504 of the Rehabilitation Act of 1973. These hearings provided us with a unique opportunity to hear from the Justice Department and the Education Department civil rights officials and from the U.S. Commission on Civil Rights on Federal civil rights enforcement in higher education. It is not the first time Commission members and staff have contributed to the work of our committee on important issues.

The Commission's work is respected and responsible. Let us keep them in business. I urge my colleagues to vote aye on H.R. 2230.●

The CHAIRMAN. Are there further amendments to the bill?

If not, under the rule, the Committee rises.

Accordingly, the Committee rose; and the Speaker pro tempore (Mr. BROWN of California) having assumed the chair, Mr. UDALL, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 2230) to amend the Civil Rights Act of 1957 to extend the life of the Civil Rights Commission, and for other purposes, pursuant to House Resolution 273, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. SENSENBRENNER

Mr. SENSENBRENNER. Mr. Speaker, I offer a motion to recommit with instructions.

The SPEAKER pro tempore. Is the gentleman opposed to the bill?

Mr. SENSENBRENNER. In its present form, I am, Mr. Speaker.

The SPEAKER pro tempore. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. SENSENBRENNER moves to recommit the bill, H.R. 2230 to the Committee on the Judiciary with instructions the Committee report the bill back forthwith with an amendment as follows:

"On page 2, after line 4, insert the following after "duty" on line 6 of the amendment of Mr. EDWARDS of California, "inefficiency"."

The SPEAKER pro tempore. Does the gentleman desire recognition on his motion?

Mr. SENSENBRENNER. I yield back the balance of my time, Mr. Speaker.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER pro tempore. The question is on the passage of the bill.

The bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. EDWARDS of California. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

HAZARDOUS WASTE CONTROL AND ENFORCEMENT ACT OF 1983

Mr. BEILENSON. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 274 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 274

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the

Union for the consideration of the bill (H.R. 2867) to amend the Solid Waste Disposal Act to authorize appropriations for the fiscal years 1984 through 1986, and for other purposes, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Energy and Commerce, the bill shall be considered for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Energy and Commerce now printed in the bill as an original bill for the purpose of amendment under the five-minute rule, and all points of order against said substitute for failure to comply with the provisions of clause 5(a), rule XXI are hereby waived. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

□ 1310

The SPEAKER pro tempore. The gentleman from California (Mr. BEILENSON) is recognized for 1 hour.

Mr. BEILENSON. Mr. Speaker, for the purposes of debate only, I yield the customary 30 minutes to the gentleman from Tennessee (Mr. QUILLEN), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 274 provides for the consideration of H.R. 2867, the Hazardous Waste Control Enforcement Act of 1983. The resolution allows 1 hour of general debate, to be equally divided and controlled by the chairman and the ranking minority member of the Committee on Energy and Commerce. This is an open rule, allowing any germane amendment to be offered under the 5-minute rule. At the conclusion of the bill's consideration, a motion to recommit with or without instructions is in order.

The rule makes the committee amendment in the nature of a substitute in order as original text for amendment purposes. The resolution also waives points of order under clause 5(a) of rule XXI against consideration of the substitute. This largely technical waiver was granted because the nature of the Superfund authorized under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 involves reprograming of funds already appropriated.

Mr. Speaker, H.R. 2867 reauthorizes and amends the principal law governing the disposal of solid and hazardous waste—the Solid Waste Disposal Act commonly known as the Resource Conservation and Recovery Act.

The bill authorizes $154 million in fiscal year 1984, $162 million in fiscal year 1985, and $168 million in fiscal year 1986, to carry out the responsibilities under the Solid Waste Disposal Act. The bill also amends the act to require the Environmental Protection Agency to promulgate a variety of standards within statutorily set deadlines. The bill addresses several loopholes that exist in the Resource Conservation Recovery Act—specifically: Small quantity generators; land disposal of hazardous waste; and, the injection of hazardous waste in or around drinking water supplies. In addition, the bill confers on citizens a limited right to sue to abate an imminent and substantial endangerment. This right can only be exercised if the Administration fails to file an action.

Mr. Speaker, this legislation was sequentially referred to the Judiciary Committee for its review of several sections contained in the bill. As reported from the Energy and Commerce Committee, EPA investigators are granted the authority to: Carry firearms; execute, and serve warrants, summons, and subpenas; administer oaths; and make arrests without warrants for offenses against the United States committed in their presence, and for felonies if they have reasonable grounds to believe that the person to be arrested has committed or is committing a felony. In addition, the Administrator of the EPA is directed to request the Justice Department to file and represent the EPA in civil enforcement actions under RCRA. Once a referral has been made by the Administrator, the Attorney General would have 30 days to initiate action. If the Attorney General does not do so, the Administrator can appoint EPA attorneys to represent the Agency in civil enforcement action. The Judiciary Committee reported out committee amendments to strike these last mentioned sections of the legislation. I would like to point out that this open rule affords the Judiciary Committee the opportunity to offer the amendments which were reported from the Judiciary Committee to these sections.

Mr. Speaker, H.R. 2867 addresses several important issues regarding the disposal and management of hazardous wastes. I urge my colleagues to adopt this open rule, House Resolution 274 so that the House may consider the Hazardous Waste Control Act of 1983.

Mr. QUILLEN. Mr. Speaker, I yield myself as much time as I may use.

Mr. Speaker, this is a controversial bill, but I know of no controversy on the rule itself.

I would like to point out that there is a provision in the bill that regulates small generators of waste. This provision could affect 1,400,000 small businesses, which produce a small amount of waste for disposal. I think that provision is most bureaucratic. All it is going to do is throw a bigger burden on EPA and make them add more staff to do the investigation and enforcement of the act. Something should give, and an amendment which will be offered, should be adopted to lessen that effect.

Mr. Speaker, there is also a section in the bill which provides that any officer or employee of EPA shall be authorized to carry firearms, make arrests, serve warrants, and administer oaths. We can imagine this horde of EPA employees going into place with two guns on their hips and intimidating our people. I understand there is going to be an amendment to limit that, and I hope the amendment passes.

Mr. Speaker, as I said, I know of no opposition to the rule. We all know that this act has to be extended. I think in the end, after it is amended, that the House will agree.

Mr. Speaker, I have no requests for time, and I reserve the balance of my time.

Mr. BEILENSON. Mr. Speaker, we have no requests for time, and I move the previous question on the resolution.

The resolution was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. Pursuant to House Resolution 274 and rule XXIII, the Chair declares the House in the Committee of the Whole on the State of the Union for the consideration of the bill, H.R. 2867.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 2867), to amend the Solid Waste Disposal Act to authorize appropriations for the fiscal years 1984 through 1986, and for other purposes, with Mr. BARNARD in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from New Jersey (Mr. FLORIO) will be recognized for 30 minutes, and the gentleman from New York (Mr. LENT) will be recognized for 30 minutes.

The Chair recognizes the gentleman from New Jersey (Mr. FLORIO).

Mr. FLORIO. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the House today considers H.R. 2867, the Hazardous Waste Control and Enforcement Act of 1983. This bill, if enacted, would reauthorize and substantially strengthen the Resource Conservation and Recovery Act (RCRA), the statute which governs the treatment, storage, transportation,

and disposal of hazardous wastes and which regulates, to a large degree, the recycling and disposal of solid wastes.

Last year, the House overwhelmingly passed an RCRA reauthorization bill, H.R. 6307, with many of the same provisions contained in this year's measure. Unfortunately, the other body, under considerable pressure from the administration, failed to pass any bill, depriving Congress of the early opportunity to correct the deficiencies in the current law. The casualties of the year's delay have been the American people, who are afraid, legitimately afraid, of toxic contamination resulting from improper disposal of hazardous waste.

Hearings before my subcommittee both last year and this year have confirmed that toxic waste threatens the health of millions of Americans across this country. Each year, we generate about 250 million tons of hazardous waste—over 2,000 pounds for every man, woman, and child in America.

The disposal of much of this waste is unregulated. Improperly disposed hazardous waste threatens the air, surface water, and drinking water. The threat to ground water is especially acute. Americans depend upon ground water for their drinking water, often using wells without any treatment equipment whatsoever. One EPA study of underground drinking water supplies in 954 cities showed contaminated water in almost 300 municipalities, each with a population over 10,000.

Not surprisingly, one of the major causes of contaminated ground water is America's continued reliance on land disposal in landfills or in pits, ponds, and lagoons. This is a shortsighted approach since it is virtually impossible to build a land disposal facility that can contain waste for as long as that waste threatens public health. My subcommittee, during extensive hearings on March 22 and 24 of this year, learned that safer alternative forms of disposal are available and their capacity is underutilized. We must create incentives to shift disposal from the land to other technologies.

It has also come to light that many land disposal facilities do not even comply with current law. A recent EPA study found that 109 of 171 sites studied were violating RCRA regulations.

Recently, much attention has been focused on the Superfund law and the problems it was designed to solve, namely, what to do with abandoned hazardous waste facilities that threaten public health. Yet, without improvements in current law, we are creating tomorrow's Superfund sites today.

The Office of Technology Assessment has concluded that cleaning up a leaking dump and compensating its victims could cost 10 to 100 times the cost of disposing of the waste safely. According to EPA, the current cost of disposing of hazardous waste in accordance with RCRA is $90 per ton. On the other hand, the cost of cleaning up improperly disposed waste is approximately $2,000 per ton. More significantly, once an aquifer becomes contaminated by hazardous waste, it can never be cleaned up.

This bill will help prevent these expensive and, as in the case of aquifers, sometimes irreparable problems. Among other things, H.R. 2867 will ban some of the most toxic wastes—such as arsenic and cyanide—from land disposal. In addition, the bill provides for greater enforcement powers, including stiffer criminal penalties for those who deliberately violate RCRA.

Because the American public has lost faith in the ability of its Government agencies to protect them from hazardous waste, it is practically impossible to build new hazardous waste facilities without incurring tremendous and often overwhelming public opposition. By improving RCRA, we can begin to restore the public trust and get on with the task of proper treatment, recycling, and disposal.

This is one of the most important environmental bills the House will consider in this Congress. It provides protection against improper disposal of hazardous waste that is desperately needed, and strengthens the ability of EPA and citizens to prohibit improper disposal. I urge my colleagues to support the bill.

□ 1320

Mr. LENT. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in general support of H.R. 2867, the Hazardous Waste Control and Enforcement Act of 1983, which reauthorizes the Resource Conservation and Recovery Act. This measure substantially strengthens RCRA in a number of important respects.

While, on balance, I believe that H.R. 2867 deserves the support of this body, there is one provision which in my view needs revision. That is section 3 which will, for the first time, bring over 600,000 small businesses, such as dry cleaners and service stations, under the RCRA regulatory system. The way section 3 is currently drafted, it carries with it the strong potential to seriously disrupt the ongoing RCRA regulatory program by forcing these small businesses to comply with a confusing and potentially unenforceable system of regulations.

Therefore, Congressman SHELBY and I will be offering an amendment to section 3 of H.R. 2867 which adopts, word for word, a compromise agreement arrived at earlier this year by major environmental and small business organizations such as:

Environmental Defense Fund; Sierra Club; National Audubon Society; American Council on Education; American Retail Federation; Chamber of Commerce of the United States; Furniture Manufacturers Associations; National Association of Manufacturers; National Oil Jobbers Council; and Printing Industries of America.

Our amendment does two things: First, it removes the hammer now contained in section 3 which requires small generators to comply with regulations designed for much larger, more sophisticated generators if EPA fails to act in a timely fashion. Second, our amendment raises from 25 kilograms per month to 100 kilograms per month the requirement that small generators notify transporters that their waste is hazardous.

Since the EPA rarely, if ever, meets congressionally imposed deadlines, why should small businesses be penalized by EPA's inefficiency? Our amendment will insure that these small businesses are not unfairly penalized by having to comply with complex and costly larger generator regulations. At the same time, our amendment requires that the small generator waste be manifested and sent to a hazardous waste disposal facility if EPA fails to act. Thus, our amendment insures environmental protection without inflicting undue punishment on the small business community.

On the notification provision, I believe that leaving the notification at 25 kilograms per month presents a greater environmental threat than raising it to 100 kilograms per month. Why? Simply because of this: When a landfill discovers that the waste it is receiving is hazardous, I think the landfill will turn it away at the gate. If there were thousands of permitted subtitle C or hazardous waste facilities in this country, I do not think we would have a problem. But there are very few of these facilities and will likely be even fewer in the future. So what is a small businessman to do if the nearest facility willing to take his 25-kilogram carton is several hundred miles away in another State?

I hate to say it but I think I know the answer, and the answer is a real threat to public health. The material will go down a drain, off a bridge, or into a field or a river. There will be massive resistance to the regulations we are writing. And the threats to public health and the environment will grow, not diminish. And that we should all be very concerned about today.

So I urge your support for the Shelby-Lent amendment when it is offered and urge your opposition to any amendments which may be offered to it.

As I said earlier, I believe that, with the exception of section 3, H.R. 2867 is on balance a very worthwhile measure.

It provides important new safeguards for human health and the environment, including an agency review of practices of burning and blending of hazardous waste which may be dangerous; a ban on the underground injection of hazardous wastes into or above underground sources of drinking water; and a prohibition on the disposal of bulk liquids in landfills, an extremely dangerous practice.

Further, H.R. 2867 calls on the EPA to begin reviewing certain hazardous wastes for the purpose of determining whether they should be banned from one or more methods of land disposal. For too many years in this country, we have permitted the practice of dumping hazardous wastes in the land to go virtually unchecked. Even now that the EPA is requiring landfills to be lined, I do not feel confident that these liners will remain secure in the long term. Therefore, I believe it is appropriate for the Congress to intervene at this time and to establish a new policy which calls for a review of known hazardous wastes and a determination whether these wastes are appropriate for land disposal.

In sum, I would reiterate that, on balance, H.R. 2867 is worthy of this House's endorsement. However, it does need to be changed in one important respect—to section 3. I urge your support for the Shelby-Lent amendment to section 3.

Mr. FLORIO. Mr. Chairman, I yield 3 minutes to the gentleman from New Mexico (Mr. RICHARDSON), a member of the subcommittee, who has been very helpful in the formation of this bill.

Mr. RICHARDSON. Mr. Chairman, I rise in strong support of H.R. 2867, the Hazardous Waste Control and Enforcement Act of 1983. This bill, of which I am a cosponsor, would reauthorize the Resources Conservation and Recovery Act of 1976 and in doing so would close or reduce many of the loopholes that exist in the current law.

Mr. Chairman, this bill is a product of several days of hearings held in March in the Commerce, Transportation and Tourism Subcommittee, chaired by the gentleman from New Jersey (Mr. FLORIO). At our hearings, we learned that RCRA is not functioning properly to carry out its stated purpose of regulating hazardous waste from the cradle to the grave. In fact, RCRA, as implemented by the Environmental Protection Agency, is leaking like a sieve. EPA has dragged its feet on the listing of hazardous wastes. RCRA was passed in 1976, yet it was not until the week before our hearings began that EPA began to list any wastes. In the meantime, 7 years had passed. That is unconscionable.

The current law is full of structural loopholes. Untreated hazardous wastes, for example, may be dumped into an industrial drain that is hooked up to a municipal sewer system without regard for whether the municipal sewer system has the technology to treat the waste properly before they dump the waste as sludge. There are many more examples, Mr. Chairman, but I will simply summarize by pointing out that a recent Office of Technology report on hazardous waste found that 255 to 275 million tons of hazardous wastes are generated each year but only 40 million tons of that waste is currently subject to Federal regulation.

The bill currently before the House makes important progress in making RCRA what it should be: a comprehensive Federal regulatory concept that really does control hazardous wastes at every step in the industrial process. This bill authorizes needed funds so that EPA can carry out our mandate. It prohibits injection of hazardous waste into underground sources of drinking water; requires EPA to issue regulations within 6 months to prohibit the landfilling of noncontainerized wastes. The bill gives EPA exclusive authority over civil enforcement actions when the Justice Department fails to act, and the criminal penalties under RCRA have been beefed up.

These are important improvements of current law, Mr. Chairman, but the most important provision in this bill is the section dealing with small generators. Under current law, those generators producing 1,000 kilograms of hazardous wastes each month are exempt from regulation. This exemption, which is supposed to benefit small business, is actually open to anyone. And large corporations are lobbying just as hard as anyone to keep the current exemption. The point, however, is not whether the beneficiary is large or small. The point is that the waste is just as hazardous and harmful if it is generated at a rate of 1,000 kilograms a month than if it was generated at 1 million kilograms a month.

This bill takes an important step toward eliminating that loophole by reducing the level of generation for the exemption to 100 kilograms a month. Those above the 100 kilogram level would now be subject to regulation. Those generating more than 25 kilograms a month would have to provide certain labeling information for offsite shipment and disposal.

Mr. Chairman, I do not wish to suggest that the bill would completely eliminate hazardous wastes being placed in landfills, where there is substantial likelihood of seepage into the ground and possibly the groundwater table. Certain types of hazardous wastes will still end up in landfills under this new bill.

It is for this reason that I introduced H.R. 2627, a bill to place a tax on hazardous waste generators to provide a direct economic incentive not to landfill the wastes, but rather to dispose of the waste through proper and safe and effective methods of incineration or chemical treatment. The bill would also reauthorize and extend the life of Superfund, something which will clearly be needed if we do not close all of the loopholes.

Let me conclude, Mr. Chairman, by commending the gentleman from New Jersey for his important work in this area. H.R. 2867 is an important step in the right direction, but I must tell my colleagues that I believe we need to go further in this area and I suspect we will have to revisit this question in the near future.

□ 1330

Mr. LENT. Mr. Chairman, I yield 3 minutes and 30 seconds to the gentleman from Indiana (Mr. HILER).

Mr. HILER. Mr. Chairman, I thank the ranking minority member for giving me this time.

Mr. Chairman, I rise in basic support of the bill but in opposition to section 3, the small generator provisions as they currently exist.

We are on the verge of promoting a tremendous amount of regulation, needless regulation, I think, on nearly 700,000 to 800,000 small businesses in our country.

To give you an idea of who the type of businesses are that would come under the legislation as it is currently written, we would have garden supply stores, paint stores, retail nurseries, general merchandise stores, automotive dealers, grocery stores, motorcycle dealers, fuel and ice dealers, boat dealers, hotels, motels, laundry, dry cleaning and garment services, shoe repair and cleaning, electrical repair, museums, newspaper or any printing industry, furniture, metal plating, plastics.

As you can see, it is a wide variety of businesses that are going to be affected.

Under the current small generator provision as it stands in the bill, within 18 months if EPA has not put forth new regulations for small generator businesses, the types of businesses I just mentioned, they will come under the full effect of RCRA, which is where duPont and Dow and the other major chemical companies fall, all in an effort to try to regulate an extremely small percentage of the hazardous wastes that are generated on an annual basis.

I am in support of the Shelby-Lent amendment and I think it is absolutely necessary that we pass that amendment so that we can give EPA time to complete their survey of over 50,000 businesses so that they can put forth regulations that will meet the needs of the small business community.

I intend to offer an amendment to the Shelby-Lent amendment which

would phase in the reporting requirements for those generators of hazardous wastes between 100 kilograms and 1,000 kilograms.

My amendment would say that 270 days after the bill becomes law, all small business generators who generate between 250 and 1,000 kilograms would begin to report their hazardous wastes; and then 570 days after enactment of the bill those generators who generate between 100 kilograms and 250 kilograms would then have to report.

What this amendment does is it gives these paint stores and garden supply stores and drug stores and service stations time to understand what the bill is so that they can meet the law, which is what they all want to do.

Mr. THOMAS of California. Mr. Chairman, will the gentleman yield?

Mr. HILLER. I yield to the gentleman from California.

Mr. THOMAS of California. Mr. Chairman, I have great concerns about H.R. 2867.

I want to identify two provisions of this bill that cause my constituents in the land disposal business a great deal of concern.

First, they are greatly disturbed by the stringency of the section 5(d). The maximum of 54 months given to EPA for assessment of the list of over 500 suspected toxic materials creates a significant amount of difficulty for the U.S. waste disposal businesses.

Unless adjustments are made in this legislation, EPA will be forced, under 5(d), to ban land disposal of a large number of materials about which little is known. The problem is one of technology. My constituents inform me that, as professionals, they do not believe EPA has the technology needed to decide on the safety of the items on this list. By forcing EPA to ban disposal because the Agency cannot meet its burden of proof under the deadlines by H.R. 2867, Congress would be guaranteeing that the industries which produce these materials must be shut down because alternative disposal technologies are either prohibitively expensive or nonexistent.

The second problem stems from the statutory requirements on land disposal that are found in section 21(k)(1). Examining these provisions, one finds that Congress would be requiring land disposal operations to be double-lined. My constituents note that such procedures may be desirable in the Eastern United States, but that conditions may justify other, more cost-effective control techniques in other parts of the country. For example, one disposal site in my district sits 600 feet above the water table in a region that receives minute amounts of rainfall each year. Given the possibility of establishing sound control criteria without requiring EPA to be inflexible on the strategies it must adopt, it would seem better to grant EPA the discretion to adjust disposal site requirements according to the facts and circumstances governing individual sites. More important, giving EPA clear discretion would allow the agency to encourage new, superior control techniques that could be utilized as technology develops. There is no reason to discourage new control techniques by identifying one approach as superior as a matter of law.

Mr. FLORIO. Mr. Chairman, I yield 3 minutes and 30 seconds to the gentleman from Louisiana (Mr. TAUZIN).

Mr. TAUZIN. Mr. Chairman, 1975 was an important year in my life. It was the year that I became chairman of the natural resources committee in the Louisiana State Legislature. It was also a year as chairman of that committee when we made a startling discovery in Louisiana. It was that our State was a net importer of hazardous wastes.

We also learned why that condition existed. It existed because our State was absent any regulations whatsoever governing the diposition and handling, storage and disposal of hazardous wastes within our borders.

In 1975 we commissioned a special subcommittee chaired by a State representative, Mannie Fernandez of St. Bernard Parish in Louisiana, and that subcommittee produced one of the first pieces of hazardous waste legislation I think this country saw.

In 1975 we adopted in Louisiana a comprehensive piece of legislation governing the handling, storage, disposal of hazardous wastes from the generator through transportation, eventually to the disposal site.

Since 1975 we have experienced problems with that act. We have had to come back and amend it and revise it again in order to close loopholes and to correct deficiencies in the act.

One of the glaring deficiencies we noticed was that in fact the Nation needed a comprehensive national program that would complement each individual State's effort in controlling this serious and troublesome problem in our environment.

Additionally we discovered, as we went along, that we had to do something about the problem of existing disposal sites containing numerous and unknown hazardous materials.

It was not long after passage of our act, for example, while disposing some materials into a current site one of our young citizens was overcome by fumes and died as a result. This heightened in the minds of our citizens their anxiety over hazardous waste disposal, and I think in a large measure contributed to our efforts to revise and improve upon our act.

I want to compliment the chairman of our subcommittee, the gentleman from New Jersey (Mr. FLORIO) for his ongoing efforts to improve upon the 1976 actions of this Congress in adopting a comprehensive national system for controlling hazardous wastes.

The effort has been ongoing. The chairman has been relentless in his pursuit of making sure the act is comprehensive and covers all of the problems that are envisioned by our citizens. This current bill proposed by him and the subcommittee is I think a very far-reaching and very important step in the direction of making sure the national act works well and works to complement the efforts of our various States in controlling this problem.

There are some areas in this bill today where we hope to improve upon the act. The small generator problem is one that we will address and which I will have other comments on.

I will be offering two additional amendments, one to deal with the special situation of mines and the disposition of materials left over from the mining process, mainly rock and other materials, and the other to deal with the problem with impoundments of liquid hazardous wastes in land disposals, which is a serious one.

Under current conditions we can only find out that a leak is occurring in one of these impoundments when it has impacted upon a water system or when it has already done something harmful to drinking water supplies.

The amendment I will propose will require EPA to do a better job of determining when in fact those leaks occur, before a water supply is contaminated.

I again wish to add my voice in great support for the action of the gentleman from New Jersey (Mr. FLORIO) and the subcommittee.

Mr. LENT. Mr. Chairman, I yield 5 minutes to the gentleman from Pennsylvania (Mr. RITTER.)

□ 1340

Mr. RITTER. Mr. Chairman, I agree that the Resource Conservation Recovery Act (RCRA) enacted in 1976 is in definite need of revision. We need to close existing loopholes in the law in an effort to further protect the American people, the environment; and there are many provisions in H.R. 2867 which address those concerns.

However, I do not agree with all the means used to accomplish those ends. As a member of the Commerce, Transportation and Tourism Subcommittee I have spent a fair amount of time on the legislation.

I voted in subcommittee and in full committee to pass this legislation although I did have serious reservations which were expressed in the minority views which accompanied the bill. Let me outline a few. They are founded on a basic concept. I feel strongly that we should not here in this Congress, mostly lawyers and politicians, be in the business of regulation. Congress

should provide adequate guidelines to the executive branch to enable compliance with the law, but Congress should not write detailed instructions on how to comply with the regulations in legislation. The means of accomplishing the goals set forth in the law should be left to the experts.

Two examples of regulation via legislation contained in 2867 are the provisions for small generators of hazardous waste and the complete prohibition of land disposal of hazardous waste. The small generators provision in section 3 regulates by imposing the full weight of the RCRA program on small companies if EPA fails to act within a specified time.

The second example, land disposal provision, section 5, presents provisions which automatically prohibit waste from all forms of land disposal if the Administrator has not made a negative finding, again within a certain period of time.

I submit these are unprecedented provisions and they set precedents of requiring negative findings and they contain absolute deadlines by which the agency must act or prohibitions take place by law.

This can be referred to as "regulation by operation of law." The interest in promoting regulation statutorily if deadlines are missed has come about because if and when Congress set unrealistic guidelines in administrative laws then we have in this body delayed and delayed in so many different cases or even sometimes when the deadlines were realistic and EPA failed to meet them. The result was that affected industries, workers and products are punished with a legislative requirement that lacks technical basis, when the culprits might really be Congress and/or EPA. I am reminded of a similar approach to legislation which was attempted, not successfully, in the last Congress in the proposed amendment to section 112 of the Clean Air Act dealing with hazardous air pollutants. It also required negative findings and contained absolute deadlines by which the agency had to act or prohibitions would have taken place by operation of law.

The problem is that science and the development of a science base to these regulations is not as neat and as tidy as we politicians or lawyers would like them to be.

The Administrator in this case was required to determine whether or not each of 37 listed pollutants was a harzardous pollutant. There was a lot of questions about where these 37 came from. If such a determination was not made within a year, it was to be listed as a hazardous waste by operation of law and the full regulatory structure would have to come into play. This type of approach to legislation is dangerous because politicians are assuming the role of technical and medical scientific experts in drafting legislation. And I submit we in Congress do not have the technical expertise to declare such prohibitions merely because EPA is missing an arbitrary deadline.

We have go to give the expert agency guidelines and then flexibility to address the important questions.

I do not feel the affected industries, in any event, whatever we may think about the performance of EPA, I do not feel industries should be penalized by effective prohibition when a technical basis is lacking because Congress set certain deadlines that EPA has not met, whether it is on a technical or otherwise basis.

My colleagues, we have a chance in these very controversial subjects to take a view which understands that we are in the 20th century, we are very much involved with the products of the 20th century and we must not turn off individually, one by one, those valves, one of them is a vital chemical industry in this country, those valves which provide the basis of our prosperity.

Mr. FLORIO. Mr. Chairman, I yield 3 minutes to the gentlewoman from Maryland (Ms. MIKULSKI).

Ms. MIKULSKI. Thank you very much, Mr. Chairman.

Mr. Chairman, I rise in support of this legislation to reauthorize the Resource Recovery Act. I would like to compliment the subcommittee chairman, the gentleman from New Jersey, as well as the ranking minority, the gentleman from New York, in arriving at this bipartisan improvement of the recovery resource legislation.

Ladies and gentleman of the House, we often hear a lot about the horror stories and disasters that focus on the inappropriate disposal of hazardous waste. We are all familiar with the horror stories of the Love Canals and the Times Beaches. We also then know the enormous amount of resources that goes into Superfund cleanups when the law is either deliberately not obeyed, or ignored.

The resource recovery legislation is a framework of prevention. It is one of the most important pieces of legislation that we have in terms of the environmental issues before us. It provides the framework for preventing disasters, for preventing those horrible situations that end in Superfund cleanups, that are both costly in terms of the financial resources of our Government, as well as costly in terms of its human impact.

This legislation does close the loopholes which have emerged in the past. We also make some very important steps forward. We limit the opportuities for midnight dumpers to endanger our communities and we provide the framework for appropriate monitoring of the sunshine unloaders to make sure they comply with the laws. One particular aspect that I am very proud this legislation includes a mechanism for EPA to be involved with the citizens in a responsible way.

One of the things which emerged in our hearings is that often the people who have been affected in communities with hazardous waste are treated as if they are the problem, rather than the midnight dumpers and those who improperly dump hazardous waste.

This legislation sets up a one-stop shop in EPA where citizens can go with their concerns, with their complaints, for answers based on a scientific inquiry about whether dangers exist in their community or not.

This legislation provides a good framework for business to be able to comply and yet at the same time protect our public safety and allow citizens the opportunity, the right to know the conditions in their community.

I am going to vote for this legislation. I look forward to the passage of this bill.

I yield back the balance of my time.

Mr. LENT. Mr. Chairman, I yield 4 minutes to the gentleman from New York (Mr. FISH).

Mr. FISH. Mr. Chairman, during consideration of H.R. 2867 in June, following sequential referral from the Committee on Energy and Commerce, the Judiciary Committee made a couple of significant changes which we on our side believe should be adopted by the whole House. Chairman RODINO and the Democratic membership of the Judiciary Committee feel likewise.

First, in subcommittee, we struck section 11(d) from the bill. This section would have set up specific timeframes within which the Attorney General would have to file a civil action in Federal court upon the request of the Administrator of the Environmental Protection Agency (EPA). If the Attorney General fails to notify the Administrator of his or her intention to file within 150 days after the transmittal of the request, the EPA would then have the exclusive authority to commence and conduct litigation, except in the Supreme Court of the United States.

We believe that while the concern which brought about section 11(d) is understandable, it is a move which sets an unfortunate precedent and represents an enormous overreaction to last fall's problems. Even current EPA Administrator William Ruckelshaus, who well knows the interrelationship between the Department of Justice and the EPA, having served in top positions within both agencies, vigorously opposes the shift in litigation control which H.R. 2867 would permit. In testimony during his recent Senate confirmation hearings, and again in a letter to Chairman RODINO, dated June 14, 1983, Mr. Ruckelshaus under-

scored the importance of "centralized and coordinated litigation by the Department of Justice of all matters to which the United States is a party." If this section remains intact, it will doubtless be a signal to others to follow suit, and efficient management of Government litigation will no longer exist.

Mr. Ruckelshaus has consistently pledged to make the EPA an effective environmental voice in this country once again, and I have great faith in his ability to follow through in his promise. I also have no doubt that if the transfer of litigating authority were necessary to achieve this goal, he would be the first to encourage it. In fact, he has done just the opposite, and I believe that the House should follow his judgment in so important a matter.

In sum, I believe it is significant that EPA is not requesting this shift in authority, and that every one of the witnesses who testified before the Subcommittee on Monopolies and Commercial Law opposed the inclusion of section 11(d) in the bill. The timetable which section 11(d) sets forth creates deadlines which are arbitrary, in the opinion of both agencies, and would be unworkable and unrealistic in the context of normal litigative procedure. Moreover, not one witness has come forward to indicate that the Department of Justice has performed in other than a professional manner with respect to EPA's referrals.

The subcommittee also struck the law enforcement authority which the bill would grant to EPA agents. Section 11(e) provides that any officer or employee of the EPA would be authorized to carry firearms, execute and serve warrants, subpenas and summonses, make arrests without warrants, and administer oaths. Needless to say, the Department of Justice opposes this provision as well. If the EPA believes it has any difficulties with being able to make arrests at toxic waste sites, arrangements can always be made with the Department of Justice to designate EPA officials as temporary deputy U.S. marshals.

It is noteworthy that EPA's concerns about the safety of its officers has been the topic of discussion in meetings held by FBI Director William Webster. He and the Bureau have made it clear that they intend to cooperate fully with the EPA and its mission. We simply cannot allow each independent agency in the Government to have its own police force, with all the authority associated thereto. If we do, we are asking for complete and utter chaos, and effective law enforcement, which is what we say we want, will inevitably suffer.

Both of these amendments were adopted by voice vote in the subcommittee, and seconded by the full committee. When the time comes, I will urge my colleagues to endorse them on the floor of the House as well.

Last, my colleague, TOM KINDNESS, offered a clarifying amendment to the criminal sanctions contained in section 11(h). The Committee on Energy and Commerce has for some unexplained reason failed to include the word "knowing" in some, but not all, of the violations enumerated in section 11(h), thereby leaving the impression that knowledge of the alleged offense would no longer be necessary in some instances. The Kindness amendment clarifies the law, and I support it also.

□ 1350

Mr. FLORIO. Mr. Chairman, I yield 5 minutes to the gentleman from Louisiana (Mr. BREAUX).

Mr. CORRADA. Mr. Chairman, will the gentleman yield?

Mr. BREAUX. I yield to the gentleman from Puerto Rico.

Mr. CORRADA. Mr. Chairman, I commend the gentleman from New Jersey (Mr. FLORIO) and the gentleman from New York (Mr. LENT) for this bill and I urge passage by the House.

Mr. Chairman, the legislation pending before us today is of great importance to our Nation.

Public interest and concern over the health problems created by hazardous wastes continues unabated. H.R. 2867 will reauthorize the Solid Waste Disposal Act through 1986. It also makes a number of changes to the law in order to address these concerns.

No one can dispute that the purpose of the Solid Waste Disposal Act is a solid one; that is, the establishment of a safe and reliable method of providing tracking and disposal of hazardous wastes. If this goal is achieved, we can be reassured that the health and well-being of our people from the dangers of hazardous wastes is being protected.

This bill provides authorization levels of $154 million for fiscal year 1984; $162 million for fiscal year 1985 and $168 million for fiscal year 1986. H.R. 2867 deals with three major concerns: First, the fact that approximately 40 million metric tons a year of hazardous waste escapes the existing provisions of the law. Second, the need to provide incentives to develop alternatives to land disposal of these wastes. Third, a recognition that the nature of the problem requires swifter action by EPA against violators.

Although this legislation is controversial because of its scope and severity in dealing with the disposal of hazardous wastes, who amongst us would question it if there were imminent danger to our families and neighborhoods? The quantities of wastes which are considered hazardous continue to grow each year. We must insure that the danger to the public health and safety resulting from hazardous wastes is controlled to the maximum extent possible.

In Puerto Rico the danger presented by hazardous waste is compounded by our condition as an overpopulated, industrialized island. Funding under the Resources Conservation and Recovery Act has allowed the Puerto Rico Environmental Quality Board (EQB) to carry on its work insuring the well-being of our population.

For fiscal year 1983, the EQB will receive $486,371 for the purpose of developing programs, issuing permits and compliance enforcement. In addition, we have submitted to EPA our State plan under section 3012 of the law. The application is for $88,000 during fiscal year 1983 to allow us to inventory and establish priorities among sites to be cleaned up. The EPA is in the process of evaluating the application and I am confident that it will be approved in the near future.

For these reasons, I urge my colleagues to support H.R. 2867, the Hazardous Waste Control and Enforcement Act of 1983.

Mr. BREAUX. Mr. Chairman, I would first like to commend the chairman of the subcommittee, the gentleman from New Jersey (Mr. FLORIO), for the outstanding work that his committee has done in bringing this bill to the floor. It indeed is a marked improvement over the previous RCRA regulations that we have enacted in the Congress.

I would also like to commend the gentleman from New York (Mr. LENT) for the work that they have done and for working together to bring this bill to the floor.

I would also like to personally mention the gentleman from Ohio (Mr. ECKART) for the work that he has done in coming up with a good plan.

Mr. Chairman, it is with pleasure and a sense of great anticipation that I rise in support of the bill before the House, H.R. 2867, providing authorizations for fiscal year 1984, 1985, and 1986 for title III of the Solid Waste Disposal Act. The law that this bill amends, commonly referred to as the Resource Conservation and Recovery Act of 1976 or RCRA, has been, for a number of years, the primary Federal regulatory program for the disposal of this Nation's hazardous waste.

As has become abundantly clear during the past several months, however, a number of problems have arisen with respect to the current regulatory scheme and its implementation by the Environmental Protection Agency. To their credit, the leadership of the Committee on Energy and Commerce, particularly the chairman of its Subcommittee on Commerce, Transportation and Tourism, Mr. FLORIO, the ranking minority member of the subcommittee, Mr. LENT, and Mr. ECKART, have devoted the greater part

of 3 years in an effort to amend this basic statute to better protect the health and welfare of the American people and our environment.

Generally, the bill currently before the House is a sound piece of legislation and deserves its full support. As the distinguished floor manager, Mr. FLORIO, has indicated, the bill before us would:

First, require EPA to regulate hazardous waste from those generators, currently exempted from coverage under RCRA, that manufacture a total quantity between 100 and 1,000 kilograms of hazardous waste per month;

Second, require EPA to regulate fuels derived from hazardous waste;

Third, correct several deficiencies in the existing statute concerning the regulation of interim status facilities including limitations on the amount of allowable growth under existing permits, basic permit duration and the implementation of reasonable schedules for final permit submissions by industry and permit decisions by EPA;

Fourth, require the Administrator to regulate the use, reuse, recycling, and reclamation of hazardous waste;

Fifth, decrease the required contribution for Superfund sites owned by States from 50 percent to 10 percent;

Sixth, amend the provisions for listing and delisiting of hazardous waste to deal with deficiencies identified in the existing EPA program;

Seventh, establish a fixed reference date for a State wishing to be authorized to show that the State program is equivalent to the Federal program; and

Eighth, specify the inspection frequency for landfills and other privately owned and operated treatment, storage, and disposal facilities.

The bill also strikes new ground with respect to the problem of managing the treatment and ultimate disposal of hazardous waste, particularly liquid hazardous waste. Among the provisions contained in the bill are two that would: First, prohibit the injection of hazardous waste into or above underground sources of drinking water; and second, require EPA to promulgate final regulations to both minimize the disposal of containerized liquid hazardous waste into landfills and prohibit the landfilling of bulk liquid hazardous waste.

While these provisions go a long way to address some of the concerns that the American public has expressed over our current waste management practices, I believe that more stringent guidelines for the placement of liquid hazardous waste into certain types of land storage, treatment, and disposal facilities are fully justified. When one reviews the list of Superfund sites and the accompanying documentation pointing out the inherent health dangers caused by the migration of such wastes, we cannot justify the continued placement of liquids into these facilities.

As the Members are aware, Mr. FORSYTHE and I introduced legislation earlier this year, H.R. 1700, cosponsored by a number of other Members of the House, which would have banned, at the end of a 5-year period, all forums of land and ocean disposal of liquid hazardous waste. During the interim period, it would have been incumbent upon the generator of these hazardous wastes to prove to the satisfaction of EPA that no technologically feasible alternative exists for the disposal of such wastes, or if there were such an alternative, that it was less protective of human health and the environment than the method of land disposal proposed by such generator.

We believed that such a dramatic change in Federal disposal policy for liquids was necessary if we are to force the full development of alternative waste management technologies currently in existence, but which are vastly underutilized. These alternatives include chemical fixation, biological treatment, neutralization, stabilization, and thermal conversion, to name just a few.

It became evident during the course of hearings on this bill before the Subcommittee on Fisheries and Wildlife Conservation and the Environment, which I chair, that many experts agree that a phased reduction in the land disposal of hazardous waste, with a definite cutoff point in the future, is the correct approach for our Nation to adopt.

In point of fact, the bill before the House contains language developed by Congressman ECKART which would accomplish, in large measure, many of the same goals sought by H.R. 1700. Thus, section 5 would prohibit the land disposal of 12 specific waste streams, all but one of which are liquid hazardous waste, within 12 months of enactment unless the Administrator determines that the prohibition on one or more land disposal method with respect to a particular waste is not necessary to protect human health and the environment.

Section 5 of the bill also requires EPA to develop a schedule for reviewing all other hazardous wastes, both liquid and solid, to determine whether a prohibition on the land disposal of these wastes is warranted. A waste so reviewed shall be prohibited from one or more method of land disposal—

If it may reasonably be anticipated that such method of land disposal may not be protective of human health and the environment for as long as the waste remains hazardous, taking into account the long-term uncertainties associated with land disposal, the goal of managing waste in an appropriate manner in the first instance, and the persistence, toxicity, mobility, and propensity to bioaccumulate of such hazardous wastes and their toxic constituents.

All reviews and determinations are to be completed within 4½ years of enactment.

If the Administrator of EPA fails to make a determination on any waste within the specified time, such waste shall automatically be prohibited from all means of land disposal. The provision also allows the Administrator to delay the effective date of any prohibition for up to 42 months in the event adequate capacity for alternative management is not available. In the case of prohibitions for which an effective date is not extended due to lack of alternative capacity, the Administrator may grant a case-by-case variance for up to 6 months, renewable twice, upon a showing by the generator of severe economic hardship.

Mr. Chairman, I would submit this phased reduction in traditional land disposal practices is entirely defensible and should be supported by every Member of this body. In fact, there are many of us, including myself, who would have argued for an even shorter timeframe—as was proposed in H.R. 1700. While I am willing to yield to the judgment of my colleagues on the Energy and Commerce Committee that this provision will accomplish our common objective, I do not believe that the House should accept any weakening of this schedule when it conferences this bill with the one being developed in the other body.

Further, I will be offering, at the appropriate time, an amendment that is designed to address my concerns with this section of the bill. Generally, the amendment would further limit the discretion of the Administrator in certain instances and statutorily prohibit the placement of liquid hazardous waste into certain land facilities. Specifically, the amendment would:

First, ban, not later than February 1, 1984, the placement of containerized liquid hazardous waste into salt dome formations, underground mines or caves. The amendment would also prohibit, by February 1, 1984, the placement of bulk or noncontainerized liquid hazardous waste into unlined landfills, salt dome formations, underground mines and caves. I believe this action, which is consistent with current EPA policy, should be statutorily proscribed by Congress;

Second, ban, effective 6 months after the date of enactment, the placement of bulk or noncontainerized liquid hazardous waste into any landfill. EPA has admitted that all landfills leak. This provision would allow generators and/or disposers of these wastes 6 months to clean all liquids out of their existing landfills;

Third, require the Administrator of EPA to develop regulations minimizing, to the extent technologically feasible, the placement of containerized liquid hazardous waste. This provision

is intended to allow the continued landfilling, until such time as alternative management capacity is available, of small containers, commonly referred to as lab packs, that result from ongoing research at medical and other educational institutions;

Fourth, ban, effective 1 year after enactment, the placement of any liquid, whether hazardous or not, into a landfill containing hazardous waste. It makes no sense for EPA or the Congress to determine that the placement of liquid hazardous waste into landfills is a bad practice because of the problems associated with the migration of such wastes and not to proscribe the commingling of solid hazardous waste with other liquids; and

Fifth, establish a timeframe for the issuance of final permits to existing interim status surface impoundments. Such final permits must contain a compliance schedule for the retrofitting of those impoundments that do not meet the double liner standard established for new surface impoundments by section 21 of the reported bill.

The amendment also prohibits the placement of nonliquid hazardous waste into salt dome formations, underground mines or caves until the Administrator of EPA issues permit standards for the placement of these hazardous wastes into such facilities and the facility receives a permit pursuant to such standards.

As I indicated, current EPA policy generally prohibits the placement of bulk hazardous waste containing free liquids into unlined landfills and containerized bulk waste containing free liquids into any landfills. Thus, the amendment stipulates that until EPA has time to promulgate final regulations defining the term liquid hazardous waste, as set forth in the amendment, or promulgate final regulations minimizing the placement of containerized liquid hazardous waste in landfills, the existing regulations will remain in effect.

Mr. Chairman, as I indicated, the committee reported bill also contains a mechanism by which the Administrator of EPA can decide to allow specific liquid hazardous waste to be placed in certain land disposal facilities. It is my understanding that the intent of the committee was not to allow the Administrator to overturn its determination concerning liquids in landfills. I certainly share that belief and have included in my amendment a provision that would so restrict the Administrator's discretion.

Mr. Chairman, there are three other significant provisions to the amendment that I will offer that should be noted at this time. They are:

First, a provision that will restrict the ability of Government agencies to obtain the so-called capacity waiver for alternative waste management to a period no longer than 18 months, rather than the 42 months allowed private industry. Unanimous testimony received by our committee indicates the appropriateness of having the Federal Government lead the way to the full utilization of alternative waste management practices;

Second, a provision that requires EPA to promulgate air emission monitoring and control regulations within 2 years for land storage, treatment and disposal facilities; and

Third, require Federal agencies, within 1 year, to undertake annual inspections of their land storage, treatment and disposal facilities.

This provision has been carefully drafted to fill in the remaining gaps of a generally comprehensive bill that will, as I have previously indicated, go a very long way to insuring the long-term health of the American people and their environment.

The issue of hazardous waste disposal is one that should be, as we are doing today, fully and openly debated in the House. It is certainly well past the time that all of us should come to understand the extent of the problem we have created by the existing out-of-sight, out-of-mind philosophy with respect to liquid hazardous waste. We must understand that if it is at all possible, and it is, to destroy or treat the hazardous waste that we are generating, we must do so.

Mr. LENT. Mr. Chairman, I yield 3 minutes to the gentleman from Alabama (Mr. SHELBY).

Mr. SHELBY. Mr. Chairman, many Members of this body and I agree that we should do the best we possibly can to protect human health and the environment from the potential mismanagement of hazardous wastes. We should approach this task, however, in a fair-minded and evenhanded fashion bearing in mind that overregulation ill serves the interests of all parties involved—from those who regulate, to those who are regulated, to the public at large.

I have several concerns about H.R. 2867, section 3, relating to generators of small quantities of hazardous waste. The gentleman from New York, (Mr. LENT), and I will be offering an amendment to section 3 of the bill designed to bring into better balance the needs of environmental protection and the need to maintain a reasonable regulatory and financial cost to small business.

Mr. Chairman, our Nation's small businesses are the backbone of American society; they are the source of the greatest number of jobs and they are the key to a sustained economic recovery. In this light, it is vital that we look very closely at the potential negative ramifications on small business embodied in the bill before us. It has been estimated that some 1.4 million small businesses will be affected by new requirements in H.R. 2867 which significantly alter their liabilities for the proper disposal of hazardous waste; 1.4 million small businesses—this is a terrific number of enterprises to bring under the Environmental Protection Agency's police power. Are EPA's limited resources adequate to meet the demands of such increased regulatory powers? Are small businesses, including dry cleaners, auto dealers, schools, hospitals, and hardware stores prepared to meet their responsibilities for managing this waste? Can they devote an adequate amount of their productive time to compliance measures without incurring extensive losses? Will they even be educated as to what the new Federal requirements are, at what stage dramatically new and onerous Federal regulations will apply to them? All of these questions must be answered with a resounding yes before provisions as called for in the Florio bill should stand as written.

We do not feel that these questions have been appropriately dealt with and we feel that section 3 is an overzealous attempt to regulate businesses who produce at most 7 percent of the total quantity of hazardous waste generated in this country. The EPA even questions their own ability to regulate such generators under RCRA and is currently conducting a study of alternative methods for regulating small quantity generators of hazardous waste—due to be completed in June 1985.

At the time Mr. LENT and I offer our amendment, I will delve further into the merits of our amendment to section 3 regarding small generators. Until that time, I urge my colleagues to remember that in pursuing our worthy goal of managing hazardous waste—overregulation of enterprises which cannot physically bear the burdens may result in no regulation at all. The balance must be struck, or we all suffer the consequences.

□ 1400

Mr. FLORIO. Mr. Chairman, I yield 2 minutes to the gentleman from Nebraska (Mr. DAUB).

Mr. DAUB. I appreciate the distinguished and capable chairman of the subcommittee for yielding, and I would like to take this time to enter into a colloquy with the gentleman.

My State has urged me to ask for the committee's definition of "equivalency" as utilized in section 3006(b) of the Resource Conservation and Recovery Act.

It is my understanding that this yardstick by which States are judged to be eligible for authorization is currently being interpreted by the Environmental Protection Agency as being synonymous with "identical."

Since little report language on floor debate addressed this important crite-

rion during the 1976 and 1980 consideration of this act, I am interested in the chairman's interpretation.

Mr. FLORIO. Mr. Chairman, the gentleman's inquiry is certainly welcome. I, too, have detected confusion surrounding this word. As you know, regardless of which word Congress might have chosen to gage a State's program against the Federal program for authorization, a word with no congressional guidance could be misunderstood.

For that reason, I would like to take a few moments to clarify the committee's intent.

States offer a unique set of experiences in the practical administration of this Nation's hazardous waste program. As evidenced by amendments under consideration today, State programs have evolved over the years into more sophisticated programs in response to issues and problems raised by hands-on experience. For example, 20 out of 45 States recently surveyed already regulate small generators more stringently than EPA.

Moreover, California's ban on land disposal of certain chemicals serves as a prototype for this bill.

This realm of experience should be brought to bear in the hazardous waste program under subtitle C of RCRA, rather than removed from its consideration.

Mr. DAUB. I have an additional question: How is the administration to forge unique State program elements with the Federal program?

Mr. FLORIO. State provisions can differ as long as they address the Federal program requirements, and include State requirements at least as stringent as those of the Federal program. State requirements should be equivalent in overall effect to the Federal program, without the necessity of showing point-by-point equivalence.

Certainly, the committee agrees with the Environmental Protection Agency's statement in the Final Authorization Guidance Manual released June 10, 1983, that section 3006(b) does not mean that States have to implement their programs in exactly the same way that EPA does. It was not Congress intent to require States to Zerox the Federal programs.

Mr. DAUB. Mr. Chairman, the gentleman's answers are most appreciated because I had spent, in my own right, 2 years on the environmental control board in our State, and having dealt with this very difficult problem of deciding how our State could be in compliance has been a problem. I appreciate the definition that the record will now show on this point, and I want to again express my appreciation to the chairman of the subcommittee for his colloquy.

Mr. FLORIO. I thank the gentleman.

Mr. Chairman, I yield 2 minutes to the gentleman from Ohio (Mr. SEIBERLING).

Mr. SEIBERLING. Mr. Chairman, I want to commend the gentleman from New Jersey (Mr. FLORIO), for the commitment and energy he has devoted to getting this bill before the House today. I think there is general agreement that illegal and unregulated hazardous waste disposal is one of the most serious and shocking threats which exist to the public health today, and without the leadership of the gentleman from New Jersey, we would not have a Federal program to address this nationwide problem.

I want to also thank the gentleman for taking the time last year to spend a day in Ohio and examine a novel situation where PPG Industries proposed to convert a 2,000-foot deep abandoned limestone mine as a permanent disposal site and also a temporary storage site for hazardous wastes.

With respect to the legislation before us today, is it the intent of the committee to the maximum extent feasible to require treatment or processing of wastes so that they are reduced to their least hazardous form before they are permanently stored or disposed of?

Mr. FLORIO. Mr. Chairman, if the gentleman will yield, the gentleman is correct. That is the clear intent of this legislation so as to discourage inappropriate disposal means. At the site the gentleman refers to, we saw a good example of a hybrid system that combined storage and disposal for which there is really no clear regulatory system; so the gentleman is correct. Circumstances such as the proposed underground minesite require specific standards for facility operation and restrictions on the types of wastes that can be placed in the facility.

Mr. SEIBERLING. I support the legislation before the House today, but I would like to address another issue to the gentleman from New Jersey with respect to the types of disposal which would be regulated by this legislation under RCRA. By land disposal did the committee intend to include any and all forms of land disposal, including disposal in underground mines and caverns?

Mr. FLORIO. If the gentleman would yield, the clear intent of this legislation is to apply the full array of land disposal regulation to all forms of land disposal, including disposal in deep minesites and natural underground caves and caverns.

Mr. SEIBERLING. So if any such facility were to be developed, to be eligible for a permit as a land disposal facility, would it have to comply with all the public health and safety regulations, including the regulations which govern the method of disposal and which limit the types of waste which could be disposed of in such an underground land disposal facility?

Mr. FLORIO. The gentleman is correct.

Mr. SEIBERLING. I thank the gentleman for clarifying this point.

Mr. LENT. Mr. Chairman, I yield 3 minutes to the gentleman from North Carolina (Mr. BROYHILL), the distinguished ranking minority member of the Committee on Energy and Commerce.

Mr. BROYHILL. I appreciate the gentleman yielding.

Mr. Chairman, there are several provisions of this bill which I think could be amended to make more workable. One of the concerns I have in a bill of this kind is that we are throwing too much at the agency all at once, and we have already found that in the reorganization of the agency, that we are finding problems with not only carrying out the laws that are on the books but in doing this in a timely fashion. It does concern me that we may be, here again, throwing far more on their regulatory table.

One of the sections of the bill that I have concerns about is section 3. This would for the first time bring hundreds of thousands of small businesses, such as retail stores and service stations, under the waste management system. I do not think anyone can argue with the fact that we are going to have to do this eventually. I think what the concern is, is that we are forcing small businesses in a very short time to comply with a very confusing system of regulations. We are also forcing the agency to take from its valuable resources those resources necessary to revise the regulations or to write the regulations that will be applicable to these hundreds of thousands of businesses.

Now, we do know for a fact that 95 percent of the waste is being generated by larger businesses, and we are only talking about 5 percent of the waste in this particular circumstance. I would hope that the House would join us in supporting an amendment that is going to be offered by the gentleman from Alabama (Mr. SHELBY) and the gentleman from New York (Mr. LENT). This compromise amendment maintains the essential environmental elements of a sound hazardous waste program. It would regulate small business, but it would do so in a far more reasonable way.

There are other concerns I have about this bill. I understand that the gentleman from New York (Mr. FISH) has addressed some of these concerns. One is the enforcement authority under RCRA which has been granted to the Environmental Protection Agency. The Department of Justice is now the central litigation agency for the U.S. Government, and I feel that

they should maintain the primary litigation authority under RCRA.

The bill contains some unrealistic deadlines about which I am concerned that EPA is not going to be able to meet. There are many technical requirements. There is a great deal of time required for adequate public participation. My understanding is that a compromise will be offered here, and I would urge its adoption.

I would like to point out for my colleagues some of the provisions of the bill which are objectionable and in need of amendment.

Most significant of these is section 3 of the bill which will, for the first time, bring hundreds of thousands of small businesses, such as retail stores and service stations, under the Federal hazardous waste management system. Unfortunately, as currently drafted, section 3 contains the strong potential to seriously disrupt the ongoing RCRA program as well as the affairs of these small businesses by forcing them to comply with a confusing, unenforceable system of regulations.

I urge my colleagues to join me in supporting an amendment to this section of the bill which will be offered by Mr. SHELBY and Mr. LENT. This compromise amendment, which was worked out between representatives from small business and national environmental organizations protects small businesses from overly burdensome Federal regulation, while maintaining the essential environmental elements of a sound hazardous waste program. It is crucial that businesses regulated under this amendment be treated consistently; therefore, I also urge you to reject the Florio amendment to Shelby-Lent, lowering notification requirements.

A second area of the bill which must be amended concerns enforcement of RCRA. There are two objectionable provisions in this area: The first grants enforcement authority under RCRA to the Environmental Protection Agency. The Department of Justice is the central litigation agency for the U.S. Government and should maintain primary litigation authority under RCRA. Both EPA and DOJ oppose this shift of authority. The second provides EPA criminal investigators with full law enforcement authority including the use of weapons and arrest powers. EPA does not want these additional authorities for its investigators and has stated that no need for these authorities has been demonstrated at this time. I urge my colleagues to support an amendment which will be offered by members of the Judiciary Committee which will delete these two provisions.

Finally, the bill contains several unrealistic deadlines which EPA cannot possibly meet because of the complex issues involved, technical requirements, and the time required for adequate public participation. I understand that the two primary sponsors of the bill, Mr. FLORIO and Mr. LENT, have been working with EPA on this issue and an amendment extending deadlines will be offered. I commend the two gentlemen for taking this action.

Mr. Chairman, these and other concerns have been raised by the administration in its statement of policy on H.R. 2867. I urge my colleagues to support the amendments I have discussed and I hope that the other concerns raised by the administration can be resolved in conference.

□ 1410

Mr. FLORIO. Mr. Chairman, I yield 3 minutes to the gentleman from Missouri (Mr. SKELTON).

Mr. SKELTON. I thank the gentleman for yielding this time to me.

Mr. Chairman, I wish to engage in a colloquy with the gentleman from New Jersey. I wish to ask two questions.

One of my greatest concerns in section 3 has been the impact this legislation could have on small businesses. As the gentleman from New Jersey is aware, the Subcommittee on Energy, Environment and Safety of the Small Business Committee, which I chair, held a hearing on this subject a little over a week ago. The testimony indicated that in most cases and for most purposes, the so-called Shelby-Lent amendment satisfied small businesses who are willing to do more than their share to protect the environment. One industry, however, would be particularly hard hit by the possible interpretation of the legislation before us. I refer the gentleman to the testimony presented to the subcommittee by the Cleaning and Laundry Association Executives Association and the Laundry Cleaning Council.

They provided us with a clear and convincing statistical analysis showing that drycleaning pricing is price inelastic. By this I mean that the consumer considers drycleaning a luxury and has in the past cutback on drycleaning use as the price rises. The drycleaners, which average about six employees per plant, cannot then simply pass along the increased cost of waste disposal to their customers.

They also provided testimony which tends to prove that their costs will increase from $4,000 to $7,000 to dispose of 2 to 3 gallons of actual hazardous material per year. This is because the bulk of their waste is inert and only a small portion is actually hazardous. Some of the waste, for example, is contained in a cartridge filter, similar to an oil filter in a car. If this weight is included, then I fear that we are placing a heavy, and perhaps unjustifiable burden on the drycleaners.

I would, therefore ask the gentleman, what is the basis for regulatory action here?

Mr. FLORIO. If the gentleman will yield to me, it is my understanding that EPA does not include the weight of the container in determining the total weight of a generator's monthly hazardous waste production. Thus, in the industry you mentioned, the weight of the drycleaning solvent rather than the cartridge, container, or other inert, nonhazardous material would determine whether section 3 of the bill would apply to an individual drycleaner.

I would add further that we should direct the Administrator to pay particular attention to the drycleaning industry to see what the concentrations of the liquid hazardous waste really are and to take those concentrations into account in his recommendation for regulation.

I would also note that in a directive suggested and forwarded to me from the Neighborhood Cleaners Association, Mr. Seitz, the director, indicates that:

> Although our organization supports the Shelby/Lent amendment to section 3 of your bill, we also support your amendment requiring generators who produce hazardous waste in quantities of more than 25 kilograms per month to provide notice that their waste is hazardous.

Mr. SKELTON. Under section 5, wastes such as the perc which is used extensively throughout the dry cleaning industry, must in all probability be disposed of in an EPA approved incinerator. Since this compound is a halogenated organic, the banning of land disposal would take place in 12 months. However, the Administrator would be empowered to exempt the drycleaners' solvents for up to 42 months more if an alternative to land disposal did not exist. The drycleaners testified before the subcommittee I chair that the United States currently does not have the capacity to incinerate this waste in anything close to a cost-effective manner. This is especially true for those dry cleaning establishments which, because of transportation costs do not have access to any approved alternative. I ask the gentleman if the intent of the exemption authority which his bill confers on the Administrator is broad enough, so that situations, such as this one which will be created for the drycleaners, can be dealt with. In other words, can EPA be flexible enough to take in to account the particular problems of an industry, such as drycleaners, while still performing their job to protect the public health?

Mr. FLORIO. In response to the gentlemen's question, the answer is "yes."

What we call "California wastes" in other words, those wastes which are extremely hazardous and are banned

by law in California would be banned by the law we now have under consideration in 12 months after its enactment. Halogenated organics constitute one of the waste streams on the California list. The gentleman is correct, however, that the Administrator is given the flexibility to delay this ban for up to 42 months so that he can take in to account the realistic needs of the industry and the capacity available for alternative disposal. In the case of the drycleaners, I would recommend that the Administrator pay special attention to the ability of these small businesses to meet the requirements of the law and to take cognizance of their efforts to solve their waste problems.

Mr. LENT. Mr. Chairman, I yield myself 1 additional minute to ask a question of the subcommittee, the gentleman from New Jersey. I was interested in the colloquy that just took place with respect to container weight, that container weight was not included in the weighing or the total consideration of the package.

Can I ask the gentleman if he has checked with EPA on that, because it is my understanding that in many instances the weight of the container is included in the overall weight determination for purposes of regulation.

Mr. FLORIO. Mr. Chairman, if the gentleman will yield, EPA currently permits the placement on landfills of specially designed lab packs containing liquid waste. These are the containers in this particular field.

The gentleman's previous question was with regard to containers in the drycleaning field. It is my understanding that the policy of EPA is not to compute the weight of the nonhazardous container in evaluating whether someone qualifies under the small generator exemption.

Mr. LENT. It is true that in some instances, is it not, the weight of the container is included in the determination of the overall weight? It is indistinguishable from the hazardous waste.

Mr. FLORIO. If the gentleman would yield, it is our understanding that EPA has a policy of not computing the weight of containers if the containers themselves are nonhazardous.

Mr. LENT. Mr. Chairman, I would like to inquire how much time I have remaining on this side.

The CHAIRMAN. The gentleman from New York (Mr. LENT) has 5½ minutes remaining, and the gentleman from New Jersey (Mr. FLORIO) has 3 minutes remaining.

Mr. LENT. Mr. Chairman, I yield myself such time as I may consume to engage in a colloquy with the distinguished chairman of the subcommittee on the issue of lab packs.

I have a concern about the impact of the prohibitions on land disposal in section 5 on the ability of colleges, universities, and high schools to dispose of laboratory wastes. Would these laboratories be allowed to continue to use lab packs? Laboratories produce small quantities of many different wastes. The recycling or treatment options for these laboratory wastes are uniquely limited by both their diversity and the very small volumes of each type of waste produced. Many laboratories place their waste in lab packs which are then sent to secure landfills. A lab pack, as you know, consists of small containers of wastes, both solid and liquid, packed inside a sealed large drum with sufficient compatible absorbent material to absorb any spills resulting from breakage of the inside containers.

Mr. FLORIO. Mr. Chairman, if the gentleman will yield, despite a general restriction on land disposal of containerized liquid hazardous waste now in effect, EPA currently permits the placement in landfills of specially designed lab packs containing liquid wastes, including those that contain hazardous waste in the categories specifically restricted under section 5(c) and 5(d) of our bill. For those wastes specifically restricted, the Administrator is directed under section 5(e) to set the effective date for prohibition of land disposal on the basis of the earliest date on which adequate capacity for alternative management will be available. Because lab packs may contain many different kinds of waste, the availability of alternatives is uniquely dependent upon an infrastructure to manage such a large diversity of waste, such as bulk handling and transfer facilities. To extend the effective date beyond the 12-month period after enactment which is specified in section 5(c)(2), the Administrator may make a finding that the existing system or infrastructure does not allow for alternative management of those wastes. In any case, the effective date cannot be later than a total of 54 months after enactment of this act.

Mr. LENT. Mr. Chairman, I am also concerned that section 104(c)(3)(C)ii of Superfund is being interpreted to mean that a 50-percent cost share is required for the following types of releases: Discharging PCB's along roadways in North Carolina; accumulation of PCB's or heavy metals in harbors; and State and Federal permitted releases of heavy metals and other hazardous substances into streams, rivers or other bodies of water. As one of the primary authors of Superfund, can the gentleman from New Jersey clarify the application of section 104(c)(3)(C)ii under these types of circumstances?

Mr. FLORIO. If the gentleman will yield further, section 104(c)(3)(C)ii's intent is that the required State cost share is 10 percent for those facilities which were owned by the State, but not used primarily for treatment, storage, or disposal. When State land is contaminated with hazardous materials, and that land was primarily used for treatment, storage, or disposal, the cost share is 50 percent. The fact that the State permitted a specific release to water does not make that facility a 50-percent State cost share. State-owned land that was not permitted to accept hazardous substances such as municipal landfills, but which is nevertheless creating an environmental problem, still requires a 50-percent State cost share.

Mr. LENT. I thank the gentleman.

Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. FLORIO. Mr. Chairman, I yield 1 minute to the gentlewoman from Tennessee (Mrs. LLOYD).

Mrs. LLOYD. I thank the gentleman for yielding.

Mr. Chairman, I have a question for the chairman of the committee, and I would like to commend him for bringing this legislation to the floor. I do rise in support of this legislation, and also the amendment offered by the gentleman from Pennsylvania (Mr. EDGAR).

I would like to ask the chairman a question. Is it the intent of this legislation that Federal agencies comply with the regulations enforced by this legislation?

Mr. FLORIO. If the gentlewoman will yield, the answer is unequivocally yes.

Mrs. LLOYD. I thank the gentleman for his comment.

Mr. Chairman, one of the more insidious problems with toxic waste disposal is the potential for contamination of important underground aquifers which are used by many people for drinking water, irrigation, and for other domestic purposes.

In my own district in Tennessee, as in many other locations throughout our nation, we have a potential problem from groundwater contamination that should be studied and evaluated in terms of the impact on public health and safety. My Subcommittee on Energy Research and Production recently held a hearing near the site of the Oak Ridge National Laboratory in Tennessee. This hearing brought attention to potential groundwater contamination problems from the use of out-moded pollution control measures at the Oak Ridge complex. We will make recommendations regarding these problems in a forthcoming report which I hope will be considered by the committee in September.

If we need national policies to address this potential pollution problem, then this groundwater commission will help in recommending them to the Congress and the administration. I, therefore, urge my colleagues to join me in supporting this amendment.

□ 1420

The CHAIRMAN. The time of the gentlewoman from Tennessee (Mrs. LLOYD) has expired.

The gentleman from New Jersey (Mr. FLORIO) has 2 minutes remaining.

● Mr. MARKEY. Mr. Chairman, I rise today to support H.R. 2867, reauthorizing the Resource Conservation and Recovery Act. I rise today to support a bill this country needs to insure protection of our environment. This bill contains tough language for hazardous waste generators and disposers. This language is needed and I urge my colleagues to support H.R. 2867 and defeat any weakening amendment to this much needed bill.

As a member of the Engery and Commerce Committee, I have worked closely with the sponsor of this legislation, my friend and colleague, JIM FLORIO, to establish a comprehensive system to address the hazardous waste problem. The Resource Conservation and Recovery Act forced many firms to dispose of their waste in an appropriate manner, ending some of the hazardous waste disposal practices which endanger many communities. This body should be proud to have enacted such tough and enlightened legislation on hazardous waste before the issue was on page 1 of the newspapers.

RCRA established a cradle-to-grave system for hazardous waste generated by large producers. This law has pushed many generators to incorporate the environmental and social cost of hazardous waste into their business decisions. As a result, we have seen more firms doing just what the law states: Recovering and conserving their hazardous resources. Consequently, our disposal problem is not as severe as it would be if this body had not had the foresight to enact RCRA. My colleague from New Jersey deserves some credit for that success, and today we consider legislation which completes the cradle-to-grave system. We should pass this legislation and show the same fortitude and foresight this body exercised when passing RCRA.

Many Members have expressed concern about the provisions affecting small waste generators. These groups contend that the provisions of H.R. 2867 present an unfair burden on these small quantity generators. The problem with this argument is that hazardous wastes can be dangerous in any amount, and up to 1,000 kilograms represents a substantial threat to people as well as the environment. I support the move to include generators of wastes between 100 and 1,000 kilograms under the purview of RCRA. I want to call the attention of my colleagues to the carefully constructed language of the bill. By giving the EPA 18 months to draft regulations uniquely appropriate to small quantity generators, the bill recognizes the position of small quantity generators and defers to the EPA on the proper regulations. The bill does, however, not just depend on the good will of the EPA to promulgate such regulations. By subjecting small quantity generators to the tough provisions affecting large generators, if there are no EPA regulations in 2 years, there is clear incentive for small quantity generators and EPA to expeditiously draft small quantity generator regulations. In plain terms, the carrot and stick system is established, matching incentives with interest.

Mr. Chairman, there are two other important provisions I want to call to the attention of my colleagues. The first is the provisions on enforcement. In many conversations with chemical and waste generators, the one thing I hear repeated is that we do not need new laws; we just need better enforcement.

Well, I cannot say that I agree with them on the former point, but the argument that we need better enforcement cannot be denied. EPA needs increased enforcement powers, and EPA needs the ability to take offenders to court if the Justice Department does not act quickly. It is important to keep some enforcement power with the EPA, for frequently the Justice Department has been slow or unwilling to act. In those circumstances, the EPA, if the case warrants it, can move forward on their own with a suit.

We should not tie the hands of the EPA on enforcement. As a member of the Energy and Commerce Subcommittee on Oversight and Investigations, I have witnessed claims that EPA would act on a suit, but they cannot without the Justice Department. Some of the cynical among us may suggest that the Justice Department presented a convenient answer for EPA employees. I will not draw any such conclusions. I do know that the next time the situation arises, this provision will enable this Member to ask, Where is the suit?

In addition, the bill grants EPA employees investigative and enforcement powers. If we expect EPA to be thorough and diligent in enforcing the provisons of RCRA, as I am confident all Members do, then we must give EPA employees the powers to carry out their charge. To deny investigators the power to execute and serve warrants or summons, or to make arrests for offenses is a disservice to the EPA employees and creates illusory enforcement at best.

The other important provision of the bill I want to comment on, Mr. Chairman, is the restrictions on land disposal of hazardous waste. Landfills, waste piles, and impoundment ponds are ugly monuments to our inefficient, if not dangerous handling of hazardous wastes. In a nation with as much open land as we enjoy, I think many people believe that all you have to do is take your trash a few miles out into the country and dump it on some empty lot, and it won't hurt anybody. Incredibly enough, dumping hazardous substances in open pits or in some empty fields has been the accepted practice of industry for the past 100 years. This practice has produced sites which emit such a stench no one will move near, and produced leaks into water supplies no one will drink. The original RCRA language moved us toward more environmentally sound disposal of hazardous wastes. But it did not go all the way. This bill will close many of the loopholes left open by RCRA and will begin phaseout dumping in landfill and waste piles.

In conclusion, Mr. Chairman, I want to urge my colleagues in the strongest terms to support this legislation and oppose any weakening amendments. This bill is a matter of the utmost urgency, and we must see that hazardous wastes no longer threaten our citizens. As a member of the Energy and Commerce Subcommittee on Oversight and Investigations, I was involved in a most thorough investigation of the EPA and their mismanagement of the hazardous waste program. I am convinced more than ever that we must enact tough standards for hazardous waste generators, and we must give EPA the ability to carry out the law. This bill closes many of the loopholes in RCRA, and gives EPA the power to enforce the law we have passed. This bill deserves the support of my colleagues for it offers enforcement of present law and tough restrictions on unsound dumping. The past several months have demonstrated to all Members the seriousness of our hazardous waste problem and the potential for abuse. I urge my colleagues to support this bill and make a strong statement for control of hazardous wastes.●

● Mr. FRENZEL. Mr. Chairman, continued reliance on land disposal of hazardous wastes is a dangerous policy which threatens the health of Americans now and in the future.

As more and more contaminated sites are being discovered and people are displaced from hometowns such as Times Beach and Love Canal, the mandate for legislative and administrative action to set forth guidelines for the disposal of hazardous wastes becomes clearer and clearer.

H.R. 2867, the Hazardous Waste Control and Enforcement Act of 1983, outlines a plan for managing the country's 250 million tons of hazardous waste generated each year. In my judgment, the bill is a good start, but there are some provisions with which I take issue.

Dry cleaners, gas stations, hospitals, painters, and other small generators of wastes will be severely burdened and

perhaps put out of business if we allow them to be subjected to the regulations now governing larger generators just because the EPA failed to write the small generator regulations within the statutory deadline. The hammer provision should be removed from section 3 of the bill. The Shelby-Lent amendment would provide for the removal of the hammer. It should be supported.

Requiring notification manifests for 25 kilogram/month producers while the regulation requirement threshold is 100 kilogram/month is confusing and burdersome. The enforceability of the manifest provision is questionable. Representatives SHELBY and LENT should be supported in their attempt to readjust the requirement so that both the manifest requirement and the generation provision will be consistent at 100 kilogram/month.

Mr. Chairman, the members of the House Energy and Commerce Committee and the House Judiciary Committee are to be commended for their work on this bill. Hazardous waste management is not an issue that is easily resolved.

I intend to support the bill, whether or not it is improved by the Shelby-Lent amendment. This bill is too important and too long overdue. It must be passed now.●

● Mr. FAUNTROY. I rise in support of H.R. 2867, the Hazardous Waste Control and Enforcement Act of 1983.

H.R. 2867 reauthorizes and enhances the Resource Conservation and Recovery Act (RCRA) which governs the treatment, storage, transportation, and disposal of hazardous waste.

Toxic waste is a threat to the health and well-being of all Americans in our great Nation. Each year, our industries generate approximately 250 million tons of hazardous waste. Alarmingly, the disposal of a great proportion of this waste is unregulated.

Mr. Chairman, on December 16, 1982, my colleague, the distinguished chairman of the Subcommittee on Commerce, Transportation, and Tourism of the Committee on Energy and Commerce, and I requested the General Accounting Office to determine the correlation between the location of hazardous waste landfills and the racial and economic status of the surrounding communities.

We asked them to focus their review on offsite landfills—those not part of or contiguous to an industrial facility—found in the eight Southeastern States comprising the Environmental Protection Agency's Region IV. We also asked for information on site location standards, public participation requirements for siting offsite hazardous waste landfills, and EPA's class permit proposal which addresses the permitting, as a group, less complex waste management facilities such as storage tanks.

The General Accounting Office found that:

There are four offsite hazardous waste landfills in Region IV's eight States. Blacks make up the majority of the population in three of the four communities where the landfills are located. At least 26 percent of the population in all four communities have income below the poverty level and most of this population is black.

This study confirmed our suspicion that those who are both poor and black are being forced more than others to live with the potential health risks posed by hazardous waste landfills.

This is yet another example which illustrates that the problems which affect all Americans are most acutely reflected in the black experience.

There is a compelling national interest in improving strong legislation such as that before us that would make the land disposal of hazardous waste inappropriate.

No one—black, white, Hispanic, or Native American, poor or affluent—should be forced to live near a hazardous waste landfill. There is no such thing as a "safe" hazardous waste landfill.

I am in agreement with the holding of H.R. 2867 that safer alternative forms for disposal are available and their capacity is being underutilized. Incentives must be created to shift disposal from the land to other technologies. Most disturbing is the finding that many land disposal facilities do not even comply with current law. A current EPA study found that 109 of 171 sites examined were in violation of RCRA regulations.

Mr. Chairman, H.R. 2867 is deserving of support because it conveys "a clear and unambiguous message to the regulated community and the Environmental Protection Agency: Reliance on land disposal of hazardous waste has resulted in an unacceptable risk to human health and the environment."

Under this legislation, land disposal would be authorized only as a last resort and only under conditions which would insure the full protection of human health and the environment.

I urge support of this most important legislation.●

● Mr. UDALL. Mr. Chairman, I appreciate the cooperation of the gentleman from Pennsylvania (Mr. EDGAR) and the manager of the bill, the gentleman from New Jersey (Mr. FLORIO) in considering my concerns with respect to the National Groundwater Commission.

The amendment which Mr. EDGAR sponsored would establish a National Groundwater Commission. The Commission is assigned the duty of examining 21 specific matters relating to ground water quality and quantity which are listed in subsection 26(b). The Commission is to report to the President and each House of Congress its findings and recommendations for legislation and administrative actions no later than October 30, 1985.

Some of the matters which the Commission will address, and relating to which it may be expected to recommend legislation, are matters which are within the legislative jurisdiction of the Committee on Interior and Insular Affairs.

For example, the Commission is to assess generally the engineering and technological capability to recharge aquifers.

I would call your attention to the fact that the House has recently passed and sent to the Senate H.R. 71, a bill which would establish a program within the Department of the Interior for the construction of demonstration plants to test various techniques for ground water recharge. H.R. 71 was reported to the House by the Committee on Interior and Insular Affairs.

The Committee on Interior and Insular Affairs has jurisdiction over interstate compacts relating to water. The Commission will have the duty to assess the use and effectiveness of interstate compacts to address ground water protection from contamination.

Water research programs have traditionally been within the legislative jurisdiction of the Committee on Interior and Insular Affairs, and the Commission is to assess the adequacy of ground water research and determine future research needs.

The Committee on Interior and Insular Affairs also has jurisdiction over the U.S. Geological Survey which has an ongoing program of assessing the amount and locations of the Nation's ground water resources. The amendment would assign a similar duty to the Commission.

In fact, of the 21 duties assigned to the Commission, at least 8, numbers 1, 6, 7, 8, 12, 19, 20, and 21, listed in subsection 26(b) in the amendment, are matters which would fall within the legislative jurisdiction of the Committee on Interior and Insular Affairs.

As originally drafted, I noted that the Commission, which would consist of 17 members, would have included 4 members appointed by the Speaker of the House, 2 of whom were to be members of the Committee on Public Works and Transportation, and 2 of whom shall be members of the Committee on Energy and Commerce. In view of the interests of the Committee on Interior and Insular Affairs, which I have pointed out, I felt that this committee should also be represented on the Commission. I am pleased that my colleagues agreed to modify this amendment to include two members from the Committee on Interior and Insular Affairs and I thank them for their courtesy in considering this change.●

● Mr. LAFALCE. Mr. Chairman, I rise in support of H.R. 2867, the Hazardous Waste Control and Enforcement Act of 1983.

Although we have several amendments to debate before we vote final passage, I believe that the resulting legislation will be a significant improvement over current law.

H.R. 2867, and amendments thereto, does away, I believe, with the presumption that the landfill disposal of hazardous wastes is protective of human health and the environment. As we have seen over and over again at hazardous waste sites thoughout the country, we cannot guarantee—scientifically or politically—that the hazardous wastes disposed of in the ground will remain safely segregated from the environment for extended periods of time.

H.R. 2867 prohibits the landfill disposal of noncontainerized liquid hazardous wastes and requires that the land disposal of containerized liquid hazardous wastes be minimized to the extent technologically possible. The bill also directs EPA to review the safety of all hazardous wastes regulated under RCRA and to issue regulations regarding the landfill disposal of such wastes. If EPA fails to meet this deadline, all methods of land disposal would be prohibited. This so-called hammer provision is, in light of EPA's past record in promulgating regulations under RCRA, most important.

H.R. 2867, as amended by the Shelby-Lent amendment, will bring small quantity generators under RCRA's regulatory umbrella. Presently, generators producing less than 1,000 kilograms of hazardous waste per month are exempted from RCRA requirements. Under Shelby-Lent, those that generate between 100 and 1,000 kilograms per month will be subject to special regulations designed to safely handled such wastes while taking into account the economic effect of regulation on the small business community.

Mr. Chairman, the Shelby-Lent compromise amendment provides a workable solution to the small quantity generator problem, one that is supported by both the environmental and business communities.

I would also like to note my strong support for an amendment that will be offered by the gentleman from New York (Mr. LENT) to restore the original congressional intent of enabling a State that received credit for its expenditures prior to enactment of Superfund to apply that credit toward the State share of Superfund-related costs at other abandoned hazardous waste dumpsites.

What this amendment says is that we will stop punishing States that moved forward to clean up abandoned hazardous waste sites before the Federal Superfund scheme was in place. And that we will allow these States to use funds spent before Superfund was enacted to meet the State share requirements of the Superfund law.

I will also support an amendment to be offered by the gentleman from Pennsylvania (Mr. EDGAR) to establish a National Ground Water Commission. As a cosponsor of his bill, and a Member whose district is the focus of an extensive EPA-sponsored ground water monitoring study, I can attest not only to the need to protect our ground water resources, but also to the need to have a rational program to protect this vital resource. The Commission will fill a troublesome void in our environmental protection effort.

I also want to voice my support for the provisions of the bill that extend EPA's enforcement powers. H.R. 2867 gives EPA exclusive authority over civil enforcement actions. EPA is empowered to litigate civil cases if, and let us not forget this if, the Department of Justice fails to act in a timely fashion. The bill also authorizes EPA criminal investigators to carry firearms, execute and serve warrants, summonses, and subpenas, administer oaths, and make arrests without warrants for offenses committed in the investigator's presence or for felonies.

The bill also contains provisions that would allow citizens the right to sue, if EPA fails to do so, to stop actions that present an imminent and substantial endangerment to health and the environment.

Mr. Chairman, these two provisions, coupled with Congress' continuing oversight responsibilities, will provide sufficient checks to insure that our hazardous waste management laws are brought to bear on real problems without the delay and confusion that has characterized action to date.

In summary, we have before us a bill that strengthens our Federal hazardous waste management program. I urge all my colleagues to support H.R. 2867; to breathe renewed life into our attack on the improper management of the hazardous wastes that abound in our society.●

● Mr. WALGREN. Mr. Chairman, I am pleased to support the Hazardous Waste Control and Enforcement Act which will require further progress in containing hazardous waste. We should not have to live in fear that Love Canal or Times Beach could happen in our own community. We must do all we can to keep hazardous substances out of the food and water we depend on.

Without this bill, an estimated 4 million tons of hazardous waste are disposed of each year with no accounting or control. As a result of this kind of practice, EPA now estimates that there are as many as 34,000 sites in the country that are a threat to human health, from dumps to playgrounds. The types of substances this bill addresses are clearly toxic to people like arsenic, cadmium, chromium, lead, mercury, and PCB's. H.R. 2867 will close the gaps in coverage of the present law, that will push industries to better contain or neutralize wastes, and will give the Environmental Protection Agency more effective authority to assure proper disposal of hazardous wastes.

In my view, our society should seriously question the continued land disposal of hazardous wastes. If we can find ways to dispose or neutralize hazardous waste instead of dumping it in the ground, we should. Ground disposal is inherently dangerous because subsequent contamination of liners in landfills can be penetrated with underground water. There are other ways to dispose of wastes that we should turn to like incineration, chemical fixation, and biological treatment and stabilization. This bill moves us in that direction.

In the past several years, two highly visible incidents have roused public awareness on hazardous waste problems. In the Love Canal area near Niagara Falls uncontrolled disposal of dioxin and other contaminants, like benzene, DDT, chloroform, arsenic, and mercury, forced widespread evacuation.

In Times Beach, Mo., the soil was contaminated with dioxin, from material sprayed on unpaved streets for dust control. EPA has now agreed to pay to move the town, a rather costly cleanup.

Chemicals are a part of everyday life in a modern society. Yet as chemicals become more ever present, our measures to contain them must become more absolute. The EPA Superfund has started some cleanups, but progress has been slow. I hope that EPA, with its new leadership, will move faster in implementing environmental laws. But, as always, we should emphasize prevention. In that sense, the direction of this bill is most important.●

● Mr. SCHAEFER. Mr. Chairman, I wish to take this opportunity to express my full support for the amendment offered by my colleagues on the House Subcommittee on Government Activities and Transportation. As the representative of thousands of residents who live near a hazardous waste disposal site that has been closed since July 12, 1982, because it is unsafe, I am well aware of the consequences of improper handling of toxic materials. Today, we still do not know the severity of the situation at Lowry, although it is currently being studied.

What we do know about other waste sites used by illegal transporters of waste products may be even more dangerous. According to the record generated by our subcommittee hearings, practically any citizen could be ex-

posed to the risks associated with improper disposal of all types of hazardous wastes. We have learned that materials are dumped in vacant city lots and on rural backroads with impunity. One of the major reasons for this problem is the assumption of honesty, which lies beneath our transportation enforcement statues.

The American people have every right to Federal protection against both willful and unknowing violators of Federal laws governing the transportation of hazardous materials. While the Environmental Protection Agency and the Department of Transportation do have enforcement programs, honest officials in both agencies admit that they do not even know for sure what firms are involved in transporting hazardous wastes.

It is while these substances are in transit that they represent the most serious threat to public health and safety. At generator and disposal sites there is an awareness of the types of material and the associated risks. However, on the road, these wastes can be dumped illegally for large profits.

The amendment before us is an attempt to establish a better working relationship between DOT and the EPA. It is designed to heighten the awareness of agency officials of the role of transportation in the problems we are attempting to address through passage of this bill. Without higher standards and greater responsibility in the waste transportation industry, our overall goals will be thwarted.●

● Mrs. SCHNEIDER. Mr. Chairman, I rise in strong support of H.R. 2867, the reauthorization of the Resource Conservation and Recovery Act that provides cradle to grave Federal management of the generation, transportation and disposal of hazardous wastes. The bipartisan leadership of the House Energy and Commerce Committee has labored long and hard to produce a bill that all of us should be proud to support. In particular, the leadership of Mr. FLORIO and Mr. LENT, the chairman and ranking minority member, respectively, of the House Commerce and Transportation Subcommittee deserve our recognition and gratitude for guiding this important legislation to the floor.

The bill takes strong steps in improving the current law by bringing hitherto unregulated hazardous wastes under Federal management; by pressing the Environmental Protection Agency to identify those wastes unsuited to land disposal; and by increasing the Agency's enforcement powers. I urge my colleagues' support for the provisions in H.R. 2867 that drop the floor on Federal regulation of hazardous waste from 1,000 to 100 kilograms per generator per month. My own State of Rhode Island is one of five out of six New England States that regulate hazardous wastes in amounts at least as low as 100 kilograms per month. We have had no serious complaints of excessive redtape from Rhode Island's small businesses, which have been particularly conscientious in complying with the State law. The amount of waste produced by small generators—about 4 million tons per year—is simply too large to leave unmanaged.

If we support the Shelby-Lent amendment, which gives the EPA more reasonable deadlines by which to implement the new requirements affecting companies generating between 100 and 1,000 kilograms per month, we will have put in place a small generator program that is both flexible and realistic. The Shelby-Lent amendment should, however, be strengthened first by striking its provision waiving the notification requirements for companies generating more than 25 kilograms per month. The notification requirement simply asks the generator to identify the type and quantity of hazardous waste shipped to disposal sites—no additional regulation is required unless the company produces more than 100 kilograms per month. Too many waste disposal workers have been injured—burned by hydrochloric acid in unmarked containers, for example—to allow this situation to continue without at least a labeling requirement.

I am pleased to join Mr. BONIOR in offering an amendment to authorize $10 million to subtitle D of the RCRA program, which requires the States to develop solid waste management plans. Half of the 115 abandoned waste sites identified by the EPA as the worst in the country were former solid waste landfills, into which hazardous materials had been diverted. The Congress has insisted with good reason on the development of State solid waste management plans to prevent city or county dumps from becoming loopholes for anyone seeking to avoid the stricter regulations established for hazardous waste disposal facilities. Unfortunately, congressional concern has not extended to providing funding for subtitle D. The $10 million authorized by the Bonior amendment will enable the States to resume work on the open dump inventories that are the first step in devising solid waste management plans.

While RCRA provides for safer management of hazardous waste, it has not acted to discourage the land disposal of hazardous waste. The bill before us today attempts to tighten regulations in a way that promotes the safer, more permanent disposal of hazardous waste, through alternatives such as recycling, incineration, and stabilization. These regulatory efforts deserve our support, but according to the Office of Technology Assessment, they do not provide the one element missing in our Federal hazardous waste management program: a direct economic disincentive for the land disposal of hazardous waste.

It is a fact that 4 out of every 5 tons of hazardous waste our society generates is headed for a landfill, because it remains the cheapest disposal option. Clearly, RCRA's strong regulatory framework for the management of hazardous waste must be supplemented by economic incentives that encourage alternatives to land disposal.

That is why Congressman WYDEN and I have joined 80 of our colleagues in sponsoring H.R. 3129, the Hazardous Waste Reduction Act. By establishing a fee system on the land disposal of hazardous waste, H.R. 3129 provides a direct, bottom-line pocketbook incentive for those who generate hazardous waste to employ recycling, incineration, or process changes—all of which are exempt from the fee—to produce less waste.

A recent Wall Street Journal article notes that disposal experts doubt that even the best of today's landfills will be up to the job. Though plastic sheeting and clay are the most common barriers used to keep hazardous waste from seeping into our water supplies, as one corporate manager admitted:

> An impermeable, thick clay barrier is "probably OK" but admits to squeamish feelings about "depending on plastic membranes for eternity." Landfills can also settle, cracking or breaking the clay seal.

H.R. 3129 offers a deceptively simple solution. Why not reauthorize the Superfund through a fee on the land disposal of hazardous waste? Toxic waste would be taxed at $75 per ton and nontoxic hazardous waste at $25 per ton. Alternatives to land disposal, such as recycling, treatment, or incineration would not be taxed.

The revenues raised under the waste-end fee would be used to continue the Superfund cleanup of abandoned waste sites and to fund EPA's grants to States for hazardous waste enforcement. The Office of Technology Assessment estimates that economic disincentives, such as those established by H.R. 3129 could reduce the landfilling of hazardous waste by as much as 50 percent.

Mr. Chairman, in addition, I am pleased to join today with my distinguished colleague from Michigan (Mr. BONIOR) in offering an amendment to strengthen H.R. 2867 by increasing funding for subtitle D, a small but vitally important component of the RCRA program. Briefly summarized, subtitle D, as authorized in 1980, provides funding to assist the States in developing the solid waste management plans mandated by the RCRA statute. Why are the States so important? Half of the 115 abandoned hazardous waste sites identified by the EPA as the most immediately threat-

ening to the public health were once solid waste facilities. These sanitary landfills often operated as county or municipal dumps that received significant quantities of hazardous waste as part of their solid waste stream. Subtitle D was intended—with good reason—to give States the means to inventory their solid waste facilities to find out how many more had been used as a dumping ground for hazardous waste, and to develop statewide management plans to minimize the diversion of hazardous substances into solid waste facilities in the future.

If there is one thing we should have learned after 13 years of environmental regulation, it is that hazardous waste, like water running downhill, will follow the path of least resistance. If we cannot keep hazardous waste from being diverted to the city or county dump, then we will have left a potentially serious loophole in the Federal laws that guide the disposal of hazardous waste. As the Federal funding for subtitle D has gradually been eliminated over the past 3 years, the State's open dump inventory has essentially stopped, and State management plans are on hold. The Bonior amendment, which authorizes $10 million for subtitle D for each of the next 3 fiscal years, will restore the States to full partnership with the Federal Government in the management of hazardous wastes.●

Mr. FLORIO. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. All time has expired.

Pursuant to the rule, the Clerk will now read the substitute committee amendment recommended by the Committee on Energy and Commerce now printed in the bill as an original bill for the purpose of amendment.

The Clerk read as follows:

H.R. 2867

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE AND TABLE OF CONTENTS

SECTION 1. (a) This Act may be cited as the "Hazardous Waste Control and Enforcement Act of 1983".

TABLE OF CONTENTS

Sec. 1. Short title and table of contents.
Sec. 2. Authorization for fiscal years 1984 through 1986.
Sec. 3. Small quantity generator waste.
Sec. 4. Interim control of hazardous waste injection.
Sec. 5. Land disposal of hazardous waste.
Sec. 6. Burning and blending for energy recovery.
Sec. 7. Interim status; permits.
Sec. 8. Reuse, recycling, and reclamation.
Sec. 9. Size of certain facilities.
Sec. 10. Hazardous waste facilities owned by States or political subdivisions.
Sec. 11. Enforcement.
Sec. 12. Findings and objectives of Solid Waste Disposal Act.
Sec. 13. Listing and delisting of hazardous waste.
Sec. 14. Recovery and recycling of used oil.
Sec. 15. State authorization.
Sec. 16. Effective date of regulations.
Sec. 17. Prior releases.
Sec. 18. State operated landfills.
Sec. 19. Availability of information.
Sec. 20. Ombudsman.
Sec. 21. Design and performance standards.
Sec. 22. Management of used oil.
Sec. 23. Use of recovered materials by Federal agencies.
Sec. 24. Mandatory inspections.
Sec. 25. Clerical corrections.

(b) Except as otherwise expressly provided in this Act, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be a reference to a section or other provision of the Solid Waste Disposal Act.

The CHAIRMAN. Are there any amendments to section 1?

If not, the Clerk will read.

The Clerk read as follows:

AUTHORIZATIONS FOR FISCAL YEARS 1984 THROUGH 1986

SEC. 2. (a) GENERAL AUTHORIZATION.—Section 2007(a) is amended by striking out "and $80,000,000 for the fiscal year ending September 30, 1982" and substituting $80,000,000 for the fiscal year ending September 30, 1982, $57,000,000 for the fiscal year ending September 30, 1984, $61,000,000 for the fiscal year ending September 30, 1985, and $61,000,000 for the fiscal year 1986.".

(b) STATE HAZARDOUS WASTE PROGRAMS.—Section 3011(a) is amended by striking out "and $40,000,000 for the fiscal year 1982" and substituting "$40,000,000 for the fiscal year 1982, $50,000,000 for the fiscal year 1984, $55,000,000 for the fiscal year 1985, and $60,000,000 for the fiscal year 1986".

(c) HAZARDOUS WASTE SITE INVENTORY.—Section 3012 (relating to the hazardous waste inventory) is amended by—

(1) redesignating such section (and the corresponding reference thereto in the table of contents) as "Sec. 3012A."; and

(2) by striking out "$20,000,000" in subsection (c)(2) and inserting in lieu thereof "$25,000,000 for each of the fiscal years 1984 through 1986".

(d) DEVELOPMENT AND IMPLEMENTATION ASSISTANCE.—Section 4008(a)(1) is amended by striking out "and $20,000,000 for fiscal year 1982" and substituting "$20,000,000 for the fiscal year 1982, and $10,000,000 for each of the fiscal years 1984 through 1986".

(e) IMPLEMENTATION ASSISTANCE.—Section 4008(a)(2)(C) is amended by striking out "and $10,000,000 for fiscal year 1982" and substituting "$10,000,000 for fiscal year 1982, and $2,000,000 for each of the fiscal years 1984 through 1986".

(f) SPECIAL COMMUNITIES.—Section 4008(e)(2) is amended by striking out "and $1,500,000 for each of the fiscal years 1981 and 1982" and substituting "$1,500,000 for each of the fiscal years 1981 and 1982, and $500,000 for each of the fiscal years 1984 through 1986".

(g) ASSISTANCE TO STATES FOR RECYCLED OIL PROGRAMS.—Section 4008 is amended—

(1) by redesignating the second subsection (f) (relating to assistance to municipalities for energy and materials conservation and recovery planning activities) as subsection (g); and

(2) in paragraph (4) of subsection (f) (relating to assistance to States for discretionary programs for recylcled oil) by striking out "and $5,000,000 for fiscal year 1983" and substituting ", $5,000,000 for fiscal year 1983, and $5,000,000 for each of the fiscal years 1984 through 1986".

(h) DEPARTMENT OF COMMERCE FUNCTIONS.—Section 5006 is amended by inserting after "1982" the following "and $1,500,000 for each of the fiscal years 1984 through 1986".

(i) CRIMINAL INVESTIGATORS.—Section 2007 is amended by adding the following new subsection at the end thereof:

"(e) CRIMINAL INVESTIGATORS.—There is authorized to be appropriated to the Administrator $3,246,000 for the fiscal year 1984, $2,408,300 for the fiscal year 1985, and $2,529,000 for the fiscal year 1986 to be used—

"(1) for additional officers or employees of the Environmental Protection Agency authorized by the Administrator to conduct criminal investigations (to investigate, or supervise the investigation of, any activity for which a criminal penalty is provided) under this Act; and

"(2) for support costs for such additional officers or employees.".

AMENDMENT OFFERED BY MR. BONIOR OF MICHIGAN

Mr. BONIOR of Michigan. Mr. Chairman, I offer an amendment to section 2.

The Clerk read as follows:

Amendment offered by Mr. BONIOR of Michigan: Page 4, line 7, strike out "$2,000,000" and substitute "$10,000,000".

Mr. BONIOR of Michigan. Mr. Chairman, I would like to commend the members of the Energy and Commerce Committee for their hard work and their fine result, H.R. 2867, the reauthorization of the Resource Conservation and Recovery Act.

With the gentlewomen from Rhode Island (Mrs. SCHNEIDER), and the gentlemen from New York (Mr. DOWNEY and Mr. MOLINARI), I am offering an amendment to strength H.R. 2867 by increasing funding of subtitle D assistance to States and smaller units of government from $2 to $10 million from 1984 to 1986. Subtitle D provides funds to implement solid waste management plans and conduct inventories of active and abandoned open landfills, among other activities.

I want to commend all involved for the bipartisan effort reflected in this amendment. As I understand it, there is no opposition to the amendment from either side of the aisle.

This Nation has long realized the problems we face in addressing landfills and identifying abandoned dumpsites. Furthermore, for decades we have been trying to establish healthier and sanitary methods for disposing of municipal wastes. While the solutions to these problems must be developed by individual communities, Congress has previously established these communities' right to depend on financial and technical assistance from the Federal Government.

Funding was authorized and appropriated under RCRA for this purpose in fiscal year 1978 through fiscal year 1982. In 1982, money was zeroed out of

the budget. The Association of State and Territorial Waste Management Officials conducted a survey in May of 1983 to determine the impact of this cut. The States have simply not been able to meet the funding gap.

In Michigan, 150 or more illegal dumps continue to operate. Nationally, 3,000 such dumps are estimated to be in operation. Their implications for our future are disturbing. Of the original 115 interim priority Superfund sites, 65 were open landfills—precisely the focus of this funding.

If we fail to address sites now, the cost of cleaning them up later will be astronomical. The health consequences will be overwhelming. We do have an alternative, and a cost effective alternative, to poisoned ground water. It is contained in subtitle D.

The amendment is supported by the Association of State and Territorial Solid Waste Management Officials, the Sierra Club, the Natural Resources Defense Council, the Environmental Defense Fund, and the National Audubon Society.

Mr. FLORIO. Mr. Chairman, will the gentleman yield?

Mr. BONIOR of Michigan. I yield to my colleague, the gentleman from New Jersey.

Mr. FLORIO. Mr. Chairman, I would just commend the gentleman from Michigan (Mr. BONIOR). He obviously recognizes the important interrelationship between solid waste and hazardous waste. A good percentage of the hazardous waste dump sites that are Superfund sites were formerly solid waste sites.

So the gentleman's amendment is very good, I support it, and I believe the minority does also.

Mr. LENT. Mr. Chairman, if the gentleman will yield, the minority has looked at this amendment, and we have no objection to it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan (Mr. BONIOR).

The amendment was agreed to.

The CHAIRMAN. Are there any other amendments to section 2?

If not, the Clerk will read.

The Clerk read as follows:

SMALL QUANTITY GENERATOR WASTE

SEC. 3. Section 3001 is amended by adding the following at the end thereof:

"(d) SMALL QUANTITY GENERATOR WASTE.—(1) Effective twenty-four months from the date of enactment of the Hazardous Waste Control and Enforcement Act of 1983, hazardous waste generated by any generator generating a total quantity of hazardous waste greater than one hundred kilograms but less than one thousand kilograms during a calendar month shall be subject to the same requirements under this subtitle as hazardous waste produced by a generator in amounts greater than one thousand kilograms during a calendar month, until the standards referred to in paragraph (2) of this subsection have become effective.

"(2) Not later than eighteen months after the date of enactment of the Hazardous Waste Control and Enforcement Act of 1983, the Administrator shall promulgate standards under sections 3001, 3002, 3003, and 3004 for hazardous waste generated by a generator generating a total quantity of hazardous waste greater than one hundred kilograms but less than one thousand kilograms during a calendar month. Except as provided in paragraph (3), such standards, including standards applicable to the legitimate use, reuse, recycling, and reclamation of such wastes, may vary from the standards applicable to larger quantity generators but must be sufficient to protect human health and the environment.

"(3) Standards promulgated under paragraph (2) shall at a minimum provide that—

"(A) onsite storage of hazardous waste generated by a generator generating a total quantity of hazardous waste greater than one hundred kilograms but less than one thousand kilograms during a calendar month, may occur for up to one hundred and eighty days without the requirement of a permit;

"(B) all other treatment, storage, or disposal of hazardous wastes generated by such generators shall occur at a facility with a permit under this subtitle; and

"(C) any hazardous waste generated by such generators which is shipped off the premises on which such waste is generated, shall be accompanied by a manifest, except that the specific requirements for entries on such manifest may vary from those applicable to the manifest required for larger quantity generators.

"(4) No later than ninety days after the enactment of the Hazardous Waste Control and Enforcement Act of 1983, any hazardous waste which is part of a total quantity generated by a generator generating greater than twenty-five kilograms but less than one thousand kilograms during one calendar month and which is shipped off the premises on which such waste is generated shall be accompanied by a copy of the Environmental Protection Agency Uniform hazardous waste manifest form signed by the generator. This form shall contain the following information:

"(A) the name and address of the generator of the waste;

"(B) the United States Department of Transportation description of the waste, including the proper shipping name, hazard class, and identification number (UN/NA), if applicable;

"(C) the number and type of containers;

"(D) the quantity of waste being transported.

If subparagraph (B) is not applicable, in lieu of the description referred to in such subparagraph (B), the form shall contain the Environmental Protection Agency identification number, or a generic description of the waste, or a description of the waste by hazardous waste characteristic. Additional requirements related to the manifest shall apply only if determined necessary by the Administrator to protect human health and the environment.

"(5) Except as provided in paragraphs (1) through (4), nothing in this subsection shall be construed to affect or impair the validity of regulations of the Administrator promulgated prior to the date of enactment of the Solid Waste Disposal Act Amendments of 1983 with respect to hazardous waste generated by generators of less than one thousand kilograms per calendar month.

"(6) The Administrator may promulgate regulations under this subtitle which establish special standards for, or exempt from regulations, hazardous wastes which are generated by any generator who does not generate more than one hundred kilograms of hazardous waste per calendar month.

"(7) Nothing in this subsection shall be construed to affect or impair the validity of regulations promulgated by the Secretary of Transportation pursuant to the Hazardous Materials Transportation Act.

"(8) Nothwithstanding the last sentence of section 3010(b), no regulation promulgated by the Administrator as provided in this subsection may take effect before the date twenty-four months after the date of the enactment of this subsection.".

Mr. SHELBY (during the reading). Mr. Chairman, I ask unanimous consent that section 3 be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was not objection.

AMENDMENT OFFERED BY MR. SHELBY

Mr. SHELBY. Mr. Chairman, I offer an amendment to section 3, and I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The text of the amendment is as follows:

Amendment offered by Mr. SHELBY: Page 5, strike out line 20 and all that follows down through line 11 on page 9 and substitute:

SMALL QUANTITY GENERATOR WASTE

SEC. 3. Section 3001 of the Solid Waste Disposal Act is amended by adding the following at the end thereof:

"(d) SMALL QUANTITY GENERATOR WASTE.—(1) Effective 30 months from the date of enactment of the Hazardous Waste Control and Enforcement Act of 1983, unless the Administrator promulgates standards as provided in paragraph (2) of this subsection prior to such date, hazardous waste generated by any generator in a total quantity greater than one-hundred kilograms but less than one-thousand kilograms during a calendar month shall be subject to the following requirement until the standards referred to in paragraph (2) of this subsection have become effective:

"(A) in addition to the notice requirements of paragraph (4) of this subsection the information provided in the form shall include the name of the waste transporters and the name and address of the facility designated to receive the waste;

"(B) except as provided in paragraph (3)(A) of this subsection, the treatment, storage or disposal of such waste shall occur at a facility with interim status or a permit under this subtitle;

"(C) generators of such waste shall file manifest exception reports as required of generators producing greater amounts of hazardous waste per month except that such reports shall be filed by January 31, for any waste shipment occurring in the last half of the preceding calendar year, and by July 31, for any waste shipment occurring in the first half of the calendar year; and

"(D) generators of such waste shall retain for three years a copy of the manifest

signed by the designated facility that has received the waste.

Nothing in this paragraph shall be construed as a determination of the standards appropriate under paragraph (2).

"(2) Not later than eighteen months after the date of enactment of the Hazardous Waste Control and Enforcement Act of 1983, the Administrator shall promulgate standards under sections 3002, 3003, and 3004 for hazardous waste generated by a generator in a total quantity of hazardous waste greater than one-hundred kilograms but less than one-thousand kilograms during a calendar month. Except as provided in paragraph (3) of this subsection, such standards, including standards applicable to the legitimate use, reuse, recycling, and reclamation of such wastes, may vary from the standards applicable to larger quantity generators but must be sufficient to protect human health and the environment.

"(3) Standards promulgated paragraph (2) shall at a minimum provide that:

"(A) on-site storage of hazardous waste generated by a generator generating a total quantity of hazardous waste greater than one-hundred kilograms but less than one-thousand kilograms during a calendar month, may occur for up to 180 days without the requirement of a permit;

"(B) all other treatment, storage, or disposal of hazardous wastes generated by such generators shall occur at a facility with interim status or a permit under this subtitle; and

"(C) any hazardous waste generated by such generators which is shipped off the premises on which such waste is generated, shall be accompanied by a manifest, except that the specific requirements for entries on such manifest may vary from those applicable to the manifest required for larger quantity generators.

"(4) No later than 180 days after the enactment of the Hazardous Waste Control and Enforcement Act of 1983, any hazardous waste which is part of a total quantity generated by a generator generating greater than 100 kilograms but less than one-thousand kilograms during one calendar month and which is shipped off the premises on which such waste is generated shall be accompanied by a copy of the EPA Uniform Hazardous Waste Manifest form signed by the generator. This form shall contain the following information:

"(A) the name and address of the generator of the waste;

"(B) the Department of Transportation description of the waste, including the proper shipping name, hazard class, and identification number (UN/NA), if applicable;

"(C) the number and type of containers; and

"(D) the quantity of waste being transported.

If subparagraph (B) is not applicable, in lieu of the description referred to in such subparagraph (B), the form shall contain the Environmental Protection Agency identification number, or a generic description of the waste, or a description of the waste by hazardous waste characteristic. Additional requirements related to the manifest form shall apply only if determined necessary by the Administrator to protect human health and the environment.

"(5) Except as provided in paragraphs (1) through (4), nothing in this subsection shall be construed to affect or impair the validity of regulations of the Administrator promulgated prior to the date of enactment of the Hazardous Waste Control and Enforcement Act of 1983 with respect to hazardous waste generated by generators of less than one-thousand kilograms per calendar month.

"(6) the Administrator may promulgate regulations under this subtitle which establish special standards for, or exempt from regulations, hazardous wastes which are generated by any generator who does not generate more than one-hunded kilograms of hazardous waste per calendar month.

"(7) Nothing in this subsection shall be construed to affect or impair the validity of regulations promulgated by the Secretary of Transportation pursuant to the Hazardous Materials Transportation Act.

"(8) The last sentence of section 3010(b) shall not apply to regulations promulgated under this section.

"(9) The Administrator shall undertake activities to inform and educate the waste generators of their responsibilities under this section during the period within thirty months after the enactment of this section to help assure compliance.".

Mr. SHELBY. Mr. Chairman, the single most critical factor in the shaping of our hazardous waste laws has been the element of balance—a balance between the need to protect human health and the environment from the potential mismanagement of hazardous waste and the need to keep down excessive societal expense for controlling too little of that waste. Given the public policy significance of this balance, Congress has a responsibility to base its laws on a design that has the best potential for keeping the scales even. A vital part of this responsibility relates to how much complex regulation should be required of small business as part of the overall balance.

Mr. Chairman, many of us are concerned with the very real possibility that thousands of small businesses from drycleaners to small manufacturers will have to comply with RCRA regulations designed for the sophisticated, large generators of hazardous waste. Under section 3 of H.R. 2867, EPA has 18 months within which to formulate and issue new regulations for generators that produce between 100 and 1,000 kilograms of hazardous waste per month. These are the small generators, businesses which, because of their low production levels, are now exempt from the full force of RCRA regulations. Small generators are required to meet standards tailored to their characteristics.

In the language of H.R. 2867, if EPA fails to issue new rules for small generators within 18 months, then at the 24th month, all existing large generator regulations would fall upon any generator over 100 kilograms/month. EPA created these stringent regulations to govern the hazardous waste management of giant enterprises because they produce 95 percent of the total amount of hazardous waste in this country. That leaves somewhere between 1 to 7 percent of the remainder of hazardous waste generated is done so by small business. When EPA originally promulgated the small generator and large generator regulations, it proceeded under a cost-benefit guideline and concluded that the enormous number of small generators, if brought entirely within the regulatory system, would far outstrip the limited resources available to effectively implement the act. The administrative and economic burden of managing the small amount of waste from these generators was seen to be simply impractical, inefficient and counterproductive.

EPA has yet to meet a statutory deadline. Odds predict that they cannot possibly meet the 18 month deadline for crafting and issuing such complex and far-reaching regulations. Hence, section 3 holds small business hostage to EPA's ability to meet regulatory deadlines. Not only do we believe it implausible that EPA will act quickly to promulgate new regulations, but we feel it unlikely that the small generators will have time within the 24-month period to inform themselves of the intricacies and complexities of the RCRA laws. A small businessperson does not have the extensive manpower, resources or time to even attempt to comply with large generator regulations. Regulatory excesses of this degree do not serve the purpose for which they were intended.

EPA is having trouble policing the 70,000 or so large generators of hazardous waste now, H.R. 2867 adds an additional 130,000 more generators to EPA's checklist. The results will likely be sporadic enforcement and ineffective results.

H.R. 2867 also requires small business to complete manifests before shipping hazardous waste offsite. Within 90 days after enactment, any establishment generating more than 25 kilograms/month must identify themselves and provide a written list of their hazardous wastes to the collector. If residential dwellings were not now covered by separate waste regulations, this requirement could easily apply to your home and mine. Conceiveably, this provision could affect any business that produces about 2 pounds of hazardous waste a day. While the manifest requirement may be less inclusive than those required by the large generator, there is the potential that EPA could require information that may be beyond the ability of a small businessperson to provide without incurring in appropriate costs and consuming disproportionate amounts of time.

Mr. Chairman, the amendment I offer along with my colleague from New York (Mr. LENT) is a compromise approach and a far more reasonable and workable alternative. Small business and environmental groups have combined efforts in a unique attempt to achieve the elusive balance of often competing interests. This amendment satisfies the need to protect the envi-

ronment without so encumbering small enterprises with needless regulation as to sap their profitability.

Our amendment retains the notice requirement in H.R. 2867 for businesses generating between 100 kilograms and 1,000 kilograms per month of hazardous waste, but eliminates the applicability of the notice requirement down to 25 kilograms per month. The notice/manifest requirement is effective 180 days after the bill's enactment, instead of 90 days. Our amendment, like H.R. 2867, directs EPA to develop new regulations for small generators, but allows EPA a total of 30 months within which to do so, instead of 24. Most importantly, the Shelby-Lent amendment removes the possibility of sophisticated, large generator regulations falling on small generators because of EPA's failure to act. Certain additional requirements including biannual exception reporting and 3-year recordkeeping will be imposed upon small generators should EPA fail to issue rules within 30 months.

Lastly, our compromise amendment includes a vital feature missing from the committee bill—a provision calling on the EPA to engage in education activities that will help the small quantity generators learn what their responsibilities are.

I urge my colleagues to look closely at the potential for great harm to small business and likely adverse consequences for public health and the environment, encouched in section 3 of H.R. 2867. I urge your support of a consistent, enforceable system of regulation for small quantity generators which provides maximum environmental protection as represented in the Shelby-Lent amendment.

Mr. SKELTON. Mr. Chairman, will the gentleman yield?

Mr. SHELBY. I am glad to yield to the gentleman from Missouri.

Mr. SKELTON. Mr. Chairman, I rise in support of the Shelby-Lent amendment to H.R. 2867. Ten days ago, the Energy, Environment and Safety Subcommittee of the Small Business Committee which I chair held a hearing on H.R. 2867. At the hearing it was established that the Environmental Protection Agency estimates that 130,000 businesses would come under regulation if the threshold for the small quantity waste generation exemption is dropped from 1,000 kilograms/month to 100 kilograms per month. Both Shelby-Lent and the Florio bill lower the threshold to this level. The Florio bill, however, provides a reporting requirement for hazardous waste generators down to a level of 25 kilograms per month. EPA estimates that an additional 560,000 generators would fall under this provision but that only one-fourth of 1 percent of all hazardous waste produced would be added to the control system. Most testifying businesses felt that this is too much regulation for too little benefit. The EPA already has jurisdiction to lower the threshold where a danger exists—down to zero kilograms per month if need be—and has exercised this jurisdiction for certain ultrahazardous wastes.

The Florio bill also provides that the promulgation of special regulations for new small quantity generators by EPA must take place within 18 months or the full weight of the Resource Conservation and Recovery Act regulations would be applied to small generators at 24 months. EPA informed us that they could not meet this deadline regardless of the manpower employed. Our small businesses felt that it was unfair for them to be expected to pay the price for EPA's inabilities and to force them to meet the same technical reporting and disposal requirements that major chemical companies—for example—must comply with. The Shelby-Lent amendment provides the EPA with the additional time they requested to identify and study the best ways to regulate individual small quantity generator waste streams. We feel this follows the best intentions of the Regulatory Flexibility Act and therefore endorse this approach.

The Shelby-Lent amendment is still not a panacea. It still provides very tough environmental standards. Indeed, some of the businesses who presented testimony felt the standards were too tough and unenforceable. On the other hand, others felt that they were too lenient and that the Florio bill should prevail. We applaud the Shelby-Lent compromise as an effort by environmentalists to reach an acceptable middle ground with industry. Most of the witnesses that testified at our hearing—even if they offered their own perfecting amendments to Shelby-Lent—believed that it was a step in the right direction.

Small businesses have been in the forefront of environmental concern and scientific advancements to solve our waste problems, and are best served, we feel, by the Shelby-Lent amendment.

The CHAIRMAN. The time of the gentleman from Alabama (Mr. SHELBY) has expired.

□ 1430

Mr. LENT. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, I rise to join in offering the Shelby-Lent amendment to section 3 of H.R. 2867.

This amendment will protect hundreds of thousands of small businesses from facing a confusing, complex, and costly system of regulation, while insuring a high level of environmental protection for the American people.

Section 3 now contained in H.R. 2867 will, for the first time, bring over 600,000 small businesses such as drycleaners and service stations under the RCRA regulatory system. These businesses generate only between 1 to 3 percent of the hazardous waste in this country. Unfortunately, the way section 3 is drafted, it carries the strong potential to seriously disrupt the ongoing RCRA regulatory program by forcing these small businesses to comply with a confusing and potentially unenforceable system of regulations. It does this in the following way.

Under current regulations, all those who generate in excess of 1,000 kilograms per month of hazardous waste are subject to the full RCRA regulatory system. Those generating less than 1,000 kilograms per month are exempted from RCRA regulations, except for acutely hazardous wastes which are regulated to one kilogram per month. Section 3 of H.R. 2867 lowers the small generator exemption from 1,000 kilograms per month to 100 kilograms per month and directs the Environmental Protection Agency to write regulations tailored to smaller generators of hazardous waste. However, section 3 also says that if the EPA fails to act within the prescribed statutory deadline the small generators are automatically subject to the large generator regulations. The small generators accurately characterize this provisions as "the hammer" because it hits them hard if the EPA fails to act in a timely fashion. Since EPA rarely meets statutory deadlines, I do not believe it is right for the Congress to hold small businesses hostage against EPA's inability to meet arbitrary legislative deadlines.

Another problem with section 3 is that it requires any business that generates more than 25 kilograms per month of hazardous waste to manifest such waste, for purposes of notification to transporters only, each time it is shipped offsite. One industry is pushing this notification requirement, the solid waste disposal industry. Over 500,000 additional businesses, covering numerous industries, would be affected such as hardware, grocery, and retail stores, colleges and universities, high schools, photofinishing operations, amusement parks, bowling alleys, car washes, horse tracks, carpet cleaners, barber shops, painting contractors, and many other. It makes no sense to bring hundreds of thousands of additional small businesses into the Federal regulatory process at the request of one industry. Furthermore, the amount of waste generated by these over-500,000 additional businesses is less than three-tenths of 1 percent of the total hazardous waste generated in this country.

Finally, and most importantly, this notification requirement down to 25 kilograms per month will have adverse environmental and health effects. Why? First of all, many solid waste

transporters may refuse to pick up materials that are accompanied by a form stating they are hazardous. Second, even if picked up and carried to a sanitary landfill, the landfill operator may very likely refuse to accept the waste, especially in these times of high awareness of the problems of land disposal of hazardous wastes.

If there were thousands of permitted subtitle C hazardous waste facilities in this country, this would not be a problem. The waste would simply be disposed of in another nearby location. But that is not the way RCRA works. There are very few subtitle C facilities and I expect there will be even fewer in the future. What is the small businessman to do if the nearest facility willing to take his 25 kilogram carton is several hundred miles away in another State? I hate to say it, but I think I know the answer, and the answer is a real threat to public health. The material will never get packaged. It will never be turned over to a transporter. It will never get to a landfill. It will go down a drain, or into a ditch or off a bridge. There will be massive resistance to the regulations we are writing. They will be largely ignored. And the threats to public health and the environment will grow, not diminish.

Mr. Chairman, read in its entirety, with notification down to 25 kilograms per month and regulation to 100 kilograms per month, section 3 creates a confusing, unworkable and unenforceable regulatory program. It will likely adversely affect public health and the environment.

However, Mr. Chairman, balancing proper environmental controls on the hazardous waste from small generators with a reasonable regulatory and financial cost to small business is possible. The Shelby-Lent amendment to section 3 achieves this result. Let me describe how:

First, it removes the hammer from section 3 but provides that small generator waste be disposed of properly if EPA fails to act in a timely fashion. Thus, it retains the essential environmental protection elements of RCRA but relieves the small generators from many of the burdensome and costly requirements designed for larger, more sophisticated hazardous waste generators.

Second, it raises the notification level from 25 kilograms per month to 100 kilograms per month so that the regulatory requirements on small generators will be more consistent and less confusing. Illegal or midnight dumping will be discouraged.

In my view, this amendment will insure a workable, enforceable and environmentally sound program.

Mr. Chairman, the Shelby-Lent amendment adopts word for word a compromise agreement arrived at earlier this year by major environmental, business and academic organizations such as:

Environmental Defense Fund.
Sierra Club.
National Audubon Society.
American Council on Education.
American Retail Federation.
Chamber of Commerce of the United States.
Furniture Manufacturers Associations.
National Association of Manufacturers.
National Oil Jobbers Council.
Printing Industries of America.

These groups felt the language of our amendment was reasonable and workable. I agree with them and see our amendment as the logical next step in regulating small generators of hazardous waste. It dramatically increases environmental protection while not overburdening the RCRA regulatory system to the point that it breaks down entirely.

Once we get this next step in effect and allow some time for the system to absorb these new responsibilities, we then can look to see if further Federal regulation is necessary or appropriate. In any event, the Shelby-Lent amendment preserves EPA's authority to regulate generators who generate less than 100 kilograms per month as they see fit for protection of human health and the environment.

Also, in order to prevent further environmental disasters such as that in Times Beach, Mo., the EPA has proposed to list dioxin contaminated waste as an acutely hazardous waste. Once regulated, which should be very shortly, dioxin contaminated waste will be strictly regulated in quantities greater than 1 kilogram per month—RCRA's tightest level of control. Therefore, any small generator notice requirement under RCRA would not apply to dioxin contaminated waste.

The CHAIRMAN. The time of the gentleman from New York (Mr. LENT) has expired.

(By unanimous consent, Mr. LENT was allowed to proceed for 2 additional minutes.)

Mr. LENT. In sum, I believe that the Shelby-Lent amendment offers you a chance to support our Nation's small business community while insuring a high level of environmental protection for the American people. The amendment preserves a delicately balanced compromise agreement reached by the environmental community and the small business community. I urge you to vote for the Shelby-Lent amendment and against any amendments which seek to change it.

AMENDMENT OFFERED BY MR. FLORIO TO THE AMENDMENT OFFERED BY MR. SHELBY

Mr. FLORIO. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. FLORIO to the amendment offered by Mr. SHELBY: Page 3, strike out line 23 and all that follows down through line 22 on Page 4 and [Paragraph (4) of the Shelby amendment] and substitute:

"(4) No later than 180 days after the enactment of the Hazardous Waste Control and Enforcement Act of 1983, any hazardous waste which is part of a total quantity generated by a generator generating greater than 25 kilograms but less than 1,000 kilograms during one calendar month and which is shipped off the premises on which such waste is generated shall be accompanied by a copy of the Environmental Protection Agency Uniform Hazardous Waste Manifest form signed by the generator. This form shall contain the following information:

"(A) the name and address of the generator of the waste;

"(B) the United States Department of Transportation description of the waste, including the proper shipping name, hazard class, and identification number (UN/NA), if applicable;

"(C) the number and type of containers; and

"(D) the quantity of waste being transported.

If subparagraph (B) is not applicable, in lieu of the description referred to in such subparagraph (B), the form shall contain the Environmental Protection Agency identification number, or a generic description of the waste, or a description of the waste by hazardous waste characteristic. Additional requirements related to the manifest form shall apply only if determined necessary by the Administrator to protect human health and the environment. In the case of the most ignitible, corrosive, reactive, or toxic types of hazardous wastes identified or listed under section 3001, where such waste is part of a total quantity generated by a generator generating 25 kilograms or less during one calendar month and shipped off the premises on which such waste is generated, the Administrator shall promulgate regulations requiring appropriate notice (including a description of the waste and the identity of the generator) to be provided to the transporter and to the owner or operator of any treatment, storage, or disposal facility to which such waste is transported.

Page 5, in line 7 [Paragraph (6) of the Shelby amendment] after "exempt from regulations" insert "(other than regulations under paragraph (4))".

Mr. FLORIO (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

Mr. BROYHILL. Reserving the right to object, Mr. Chairman, I am not sure which amendment this is. I just want some clarification.

Mr. FLORIO. Mr. Chairman, if the gentleman will yield, this is my notification amendment to the Shelby-Lent amendment. It has not been printed in the RECORD.

Mr. BROYHILL. Is this the one where it requires notification down to zero?

Mr. FLORIO. No, no, 25 kilograms.

Mr. BROYHILL. As I understand the amendment that I saw, if it is the same one, it would go down from 25 kilograms or less, where it is saying it is down to zero.

Mr. FLORIO. Mr. Chairman, if the gentleman will yield, I will be happy to explain the amendment.

Mr. BROYHILL. I just want to make sure this is the right amendment.

Mr. FLORIO. Yes, that is the amendment.

Mr. BROYHILL. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey (Mr. FLORIO) that the amendment be considered as read and printed in the RECORD?

There was no objection.

□ 1440

Mr. FLORIO. Let me at the outset commend the gentleman from Alabama (Mr. SHELBY) and the gentleman from New York (Mr. LENT) for their amendment. Their amendment is good, but with one exception.

I am convinced that this amendment will perfect their amendment in a way that will make it possible that all can easily support their amendment.

I think it is important to note that the opponents of the small generator exemption removal last year have come a long way because they have acknowledged that the small generator exemption is totally inappropriate, that we should be dealing with this problem that involves 10 percent of the total amount of toxic wastes that are generated in this country.

The amendment offered by the gentleman from Alabama (Mr. SHELBY) and the gentleman from New York (Mr. LENT) is a good amendment with this one proviso.

I would say, by the way, that one of the concerns that we have about what is in the committee bill is the thought that after a certain period of time, if the regulations that the EPA says that they want to put into effect are not put into effect, the fact of the matter is that the full scope of the regulations would go into operation, the so-called hammer that was put into this bill from last year and earlier in this year when many of us expressed publicly our concern about the performance at EPA under previous leadership.

That leadership obviously has changed.

I am prepared to accept the Shelby-Lent amendment if modified with this amendment because I just last week met with the new Administrator, Mr. Ruckelshaus. He has provided me with the assurances that he will make a good faith effort to comply with the terms of the committee draft which is identical to the Shelby-Lent amendment.

I am willing to accept the new administrator's representation that he will make a good faith effort. So I am convinced that this is a good change, with one provision in it that this amendment embodies.

I would now just like to take a minute to address what my amendment does.

The deficiency in the Shelby-Lent provision is that it removes the notification provisions which are in the committee bill.

The Shelby-Lent amendment removes this key provision which is necessary to protect the public from improper disposal of hazardous waste. Under the Shelby-Lent amendment, small generators are not required to provide notification that their waste is hazardous if they generate less than 100 kilograms—220 pounds—per month. The public is put at risk because these toxic, and sometimes explosive, wastes will be disposed of in any way the generator chooses without anyone knowing that the waste is hazardous—until it is too late. My amendment provides that they must notify where they are putting it.

The Shelby-Lent proposal assumes that there is no safety problem presented by waste generated in this quantity. That is simply not the case.

The contamination of Times Beach, Mo., was caused by the disposal of under 50 pounds of dioxin. Under the Shelby-Lent amendment, that could go on today, and the generator would not even have to tell anyone it was dioxin. My amendment would require a simple disclosure that the waste is hazardous. Five weeks ago, three solid waste workers in Lexington, Ky., were hospitalized from the effects of breathing fumes from a 5-gallon container of hydrochloric acid. Bottles of potassium hydroxide, another toxic chemical that EPA lists as a hazardous waste, were found nearby. Over 35 such incidents have been reported in 1983 alone, jeopardizing hundreds of lives.

A simple notice provided by the generator would have prevented each of these incidents. I would like to ask whether any of the opponents of this provision—if they could put themselves, for a moment, in the position of a transporter or a solid waste landfill operator—whether they would rather know, or not know, whether the wastes they are handling are toxic? The most basic considerations of safety, to the workers involved in this business, should compel us to retain this provision.

As importantly, this waste is being dumped in landfills and other places, and no one even knows it is being put there. There is an obvious harm to the environment which we will pay the price for in years to come. At least, we should require generators to notify others that their waste is hazardous.

I would like to mention one other element of the notification provision, the paperwork burden. For each shipment of hazardous waste, the generator would have to fill out one simple form. The information is limited to:

First, name and address of generator.

Second, identification of the waste. This can usually be done by a single number of the hazard classification or a generic description of the waste.

Third, the number and type of containers.

Fourth, the quantity of waste.

This is not a burdensome, time consuming obligation, particularly when you consider the health and safety of thousands of sanitary landfill workers and transporters, and the protection of the public from disposal in landfills which were never designed for hazardous waste. Without this amendment, we are jeopardizing our environment, the lives of those exposed to these wastes, and the public. I urge you to perfect the Shelby-Lent amendment by voting for this amendment.

The CHAIRMAN. The time of the gentleman from New Jersey (Mr. FLORIO) has expired.

(By unanimous consent Mr. FLORIO was allowed to proceed for 3 additional minutes.)

Mr. MOLINARI. Mr. Chairman, will the gentleman yield?

Mr. FLORIO. I will be happy to yield to the gentleman from New York.

Mr. MOLINARI. I thank the gentleman from New Jersey for yielding.

I think we get a little confused when we talk about kilograms. A lot of us have been raised in the old system and we do not know what kilograms are.

But the gentleman mentioned 48 pounds of dioxin. I think we all know what happened in Times Beach, Mo., with 48 pounds of dioxin.

Will the gentleman be able to tell us what in kilograms 48 pounds of dioxin amounts to?

Mr. FLORIO. Let me just put it this way: The threshold we are talking about, below which there would be no need for notification at all, is 100 kilograms; 100 kilograms is 220 pounds per month, which on an annual basis is 1 ton. That means 1 ton of dioxin on a yearly basis could be disposed of, and as you point out, 48 pounds of dioxin caused the whole problem in Times Beach, Mo.

Mr. LENT. Mr. Chairman, will the gentleman yield?

Mr. FLORIO. I yield to the gentleman from New York.

Mr. LENT. Would the gentleman clarify on the 48 pounds of dioxin, or 48 kilograms of dioxin, or whatever it was? Maybe it was 42 pounds.

Mr. FLORIO. Forty-eight pounds, not kilograms.

Mr. LENT. It is my understanding that the amount of waste that was involved at Times Beach was far in excess of even the 1,000 kilogram per month large quantity generator limit, currently established by EPA regulations. Therefore lowering this cutoff to 25 kilograms a month would have had no effect whatsoever on the Times Beach situation.

That is because while there may have been 42 pounds of dioxin at Times Beach, that dioxin existed in the parts per million level in wastes from the production of 2,4,5 TCP, trichloralphenol; is that not correct?

The CHAIRMAN. The time of the gentleman from New Jersey (Mr. FLORIO) has again expired.

(On request of Mr. LENT and by unanimous consent, Mr. FLORIO was allowed to proceed for 3 additional minutes.)

Mr. FLORIO. Let me respond to the gentleman's question with regard to Times Beach. And I will defer to those from the State of Missouri who will tell you that the whole problem in the State of Missouri flowed from 48 pounds of dioxin that was mixed in waste oil and spread across the roads of a number of different towns. So this amount that we are talking about certainly would be under the threshold of 100 kilograms per month and therefore there would be a need for notification under my amendment.

Mr. LENT. If the gentleman will yield further, the 42 pounds of dioxin was mixed in with over 100,000 kilograms of waste from the production of 2,4,5 TCP; is that not correct?

Mr. FLORIO. The waste oil per se is not hazardous. What we are talking about, and another part of the bill deals with that particular problem, we are talking about hazardous wastes—and no one disputes the fact that dioxin is a hazardous waste—not being required to be reported were in fact mixed in this waste oil and spread across the roads.

Mr. WYDEN. Mr. Chairman, will the gentleman yield?

Mr. FLORIO. I yield to the gentleman from Oregon.

Mr. WYDEN. Mr. Chairman, I rise in support of the amendment offered by the gentleman from New Jersey.

This amendment simply calls for small generators of hazardous waste to notify the waste disposer that they are in fact disposing of hazardous waste, albeit a small quantity.

Small quantities do not lessen the potential hazard to the public and in particular to the waste disposers. If the waste disposer knows that it is hazardous waste being disposed of, then he or she can take the necessary precautions. Absent any simple notification requirement, the horror stories of explosions, fires, acid spills, and water contamination in ordinary sanitary landfills will continue.

This amendment does not impose recordkeeping or reporting requirements on small generators. It simply requires that offsite shipments of hazardous waste be accompanied by the EPA uniform hazardous waste manifest form.

The information required of the small generator only requires the generator's name and address, a description of the waste, the number and type of containers and the quantity of the waste being transported. There is certainly nothing onerous in that.

The amendment proposes what most of us must certainly consider an eminently reasonable expectation—that those generating waste inform those who are disposing of it what it is they are handling.

I urge adoption of the gentleman from New Jersey's amendment.

Mr. SHELBY. Mr. Chairman, will the gentleman yield?

Mr. FLORIO. I am happy to yield.

Mr. SHELBY. I know the distinguished chairman of the subcommittee is familiar with the EPA proposed rule that was first noticed in the April 4 Federal Register that would list dioxin-contaminated waste as an acutely hazardous waste, and it would be strictly regulated in quantities greater than 1 kilogram per month.

□ 1450

In other words, it is my understanding that dioxin, assuming that EPA goes through what they are doing, would not be subject to RCRA anyway.

Mr. FLORIO. If the gentleman would yield, the gentleman is pointing out a very important thing. As of this moment while we stand here dioxin is not a hazardous waste according to EPA. The regulatory process has not gone forward. I think that violates common sense and medical and scientific knowledge.

That makes all the more important the fact that we have these notification provisions, not just for dioxin but for all the other materials that are by definition hazardous and detrimental to the environment and to public health. That is what the amendment would do, would notify us.

Mr. SHELBY. Mr. Chairman, would the gentleman yield further?

Mr. FLORIO. I yield to the gentleman.

Mr. SHELBY. Would not this EPA regulation on dioxin go ahead and preempt this? In other words, would any small generator notice requirement not apply to dioxin-contaminated waste?

Mr. FLORIO. If in fact that regulation ever goes into effect that is the case with regard to dioxin. But as the gentleman knows there is a very long list of equally and in some respects more hazardous contaminants that are not covered by regulation that we would have some ability to know where it is that they are going to.

Mr. SHELBY. If the gentleman will yield further, I believe it is going into effect at EPA, we have some real leadership in EPA now.

Mr. FLORIO. Well, I am sure you do. And that is why I am inclined to support the gentleman's amendment if we can have this additional provision in it.

(On request of Mr. VOLKMER and by unanimous consent, Mr. FLORIO was allowed to proceed for 2 additional minutes.)

Mr. VOLKMER. Mr. Chairman, would the gentleman yield to me?

Mr. FLORIO. I yield to the gentleman.

Mr. VOLKMER. I would just like to ask a couple of questions so I understand completely what the gentleman's amendment applies to as small generators of hazardous waste. This means that they have to keep a record of who they give the hazardous waste to to transport?

Mr. FLORIO. My particular amendment would require there be notification as to what it is that was sent, what hazardous wastes were given and who they were given to.

Mr. VOLKMER. Right.

Mr. FLORIO. And that is all.

Mr. VOLKMER. So, if I can follow it up, later we would know in the event it became necessary to determine where that hazardous waste went to, we could determine that?

Mr. FLORIO. That is correct. I think it is important to say that it may very well be some would say "Does that mean we are notified where it went to; but if somebody wanted to dump it in the street you would not know about it?"

The answer is, unfortunately, this provision from 100 kilograms per month down does not require appropriate disposal. All it requires is that we know where it is going.

Mr. VOLKMER. That is necessary because as you mentioned in my State the dioxin problem, the dioxin occurs not only in Times Beach, that is where it got a lot of notoriety, but it is spread all over various and sundry parts of Missouri, that dioxin.

For that reason I think we should have your amendment because we need to know. That has been one of the big problems in the State of Missouri because we cannot find out where all of it went to. It has been like looking for a needle in the haystack to find out where the dioxin went. So I would support the gentleman's amendment.

Mr. FLORIO. I thank the gentleman for his comments. And again, I would just conclude by saying that this is an extremely modest amendment, that is the minimum amount of awareness

that we should have with regard to where these materials are going.

Mr. VOLKMER. I would like to point out that in my own State of Missouri, the State of Missouri right now, for this purpose, for notification, is zero. In other words, in our State we say if you do any, you have to notify us.

Mr. FLORIO. Let me close by saying I would like to emphasize that point. Some would say this is a radical new thing. There are 20 States in the Union that already have regulations far in excess in terms of restrictions, more than EPA does.

(On request of Mr. BREAUX and by unanimous consent, Mr. FLORIO was allowed to proceed for 1 additional minute.)

Mr. BREAUX. Mr. Chairman, will the gentleman yield?

Mr. FLORIO. I yield to the gentleman from Louisiana.

Mr. BREAUX. Mr. Chairman, I thank the gentleman for yielding.

I just say that while we can talk about all the problems that the small generators of toxic hazardous wastes are going to have if we regulate them, I know that Louisiana has no exemption for small generators. No one is crying, no one is coming to us saying they absolutely need it to stay in business. They have learned to live with it. The community and the health of the country is a lot better as a result of it. No one has gone out of business. We have had no exemption whatsoever for small generators.

Mr. FLORIO. I would thank the gentleman for his comments. New Jersey is in the same situation as are 18 other States; no dry cleaners are closing, no service stations are closing.

(On request of Mr. LENT and by unamimous consent, Mr. FLORIO was allowed to proceed for 2 additional minutes.)

Mr. LENT. Mr. Chairman, will the gentleman yield to me?

Mr. FLORIO. I yield to the gentleman.

Mr. LENT. I thank the gentleman for yielding.

Mr. Chairman, I ask the gentleman from Louisiana (Mr. BREAUX) if he can give us his assurance that all of the small generators in Louisiana are aware of these regulations and are complying with these regulations.

Mr. FLORIO. I yield to the gentleman from Louisiana.

Mr. BREAUX. I would be glad to respond. I am not sure whether they are or not. I know there is no exemption. They are bound by it. Of course, enforcement is a separate issue.

Mr. LENT. We are advised that these regulations are not well observed, not well-known about and they have absolutely no beneficial effect insofar as the environment is concerned.

I would like to get back to the 42 pounds of dioxin that was involved in Times Beach, Mo., because the gentleman cites that as his main reason for proposing this amendment.

It is my understanding, and I would ask the gentleman to straighten me out if I am wrong, that 42 pounds of dioxin existed in parts per million level in wastes from the production of 2,4,5 TCP, which is called trichlorophenol, of which there was over 100,000 kilograms and that the 100,000 kilograms, containing 42 pounds of dioxin, was then mixed in waste oil and that was what contaminated the area in Times Beach. The point is that the gentleman's amendment would not have any bearing whatsoever here because the waste at Times Beach already was covered as a large generator of hazardous wastes, over 1,000 kilograms.

Mr. FLORIO. The gentleman almost makes my point. Let us assume the gentleman is correct and I do not believe he is, the people from Missouri seem to be emphasizing 48 pounds as the appropriate number, but if we get down to 48 pounds, what I am suggesting is that the notification provisions included in my amendment would require that we know where that 48 pounds went to. If we do not have those notification requirements, there would be no ability to track that and to know where it went.

Mr. GRAMM. Mr. Chairman, would the gentleman yield?

Mr. FLORIO. I yield to the gentleman from Texas.

Mr. GRAMM. The point that Mr. LENT is making is there never was a 48 pounds, you have basically created the impression here that we had 48 pounds of dioxin and that that was mixed with other waste and spread on the streets. The point is it was a residual pollutant in byproducts used for that purpose. No one ever mixed 48 pounds of dioxin with anything because it was never refined out. It was never a pure product. That creates a very misleading interpretation in the total debate.

Mr. FLORIO. If the gentleman will yield so that I may respond to the gentleman, I have been working under the assumption that everyone knows dioxin itself is a byproduct of a process, particularly for making herbicides and pesticides. So the product dioxin is a waste byproduct. Is that amount of dioxin that has resulted in the problem we have by virtue of mixing those wastes and spreading them along the roads of Missouri.

Mr. BROYHILL. Mr. Chairman, I move to strike the requisite number of words.

If I may have the attention of the gentleman from New Jersey, the gentleman from New Jersey knows full well that pure dioxin has never been made except in the laboratories. Dioxin is only an unwanted trace contaminant found in the manufacture of certain products. So pure dioxin has never been manufactured nor made, it is only found in some other product that might be manufactured. As far as I know, no products are being manufactured that contain dioxin today.

Now the gentleman well knows too that the EPA is proposing regulations to regulate those products that might contain dioxin are those waste sites that may contain trace elements of dioxin.

The gentleman also knows that dioxin is also a byproduct of combustion of coal, combustion of wood. So dioxin comes from a number of sources.

Mr. FLORIO. I would be happy to respond to the gentleman if he would yield.

The gentleman talks about traces of dioxin. The EPA and all other health authorities have said that any amount of exposure to dioxin in excess of 1 part per billion is hazardous to health.

Mr. BROYHILL. No, it does not say that.

Mr. FLORIO. What we are talking about is that by staying under this restriction contained in Shelby-Lent, you can generate and dispose of as a waste product or a byproduct up to 220 pounds per month and not be required to tell anybody where you are putting it. I do not think that is a good situation.

□ 1500

Mr. BROYHILL. The gentleman is comparing apples and oranges because when you are talking about parts per billion you would have to have literally hundreds of thousands of pounds of a material to be able to generate mathematically that type of size. As far as I know, no one has ever seen that kind of quantity of dioxin. You may have eye droppers full that have been made in a laboratory, but the gentleman does not know that. I would be glad to send him the literature on this.

Mr. FLORIO. If the gentleman will yield further, EPA felt the exposure of 500 parts per billion was of sufficient gravity to spend $33 million to buy a whole town in Missouri.

So I think we are talking about small amounts that constitute a great hazard. And the amendment of the gentleman from Alabama would allow up to 220 pounds per month of this material to be disposed of without notice to anyone.

Mr. BROYHILL. That is the point that I am trying to make is that no one is talking about disposing of any 25 pounds of dioxin because there is nothing that I know of, any products that are made in that kind of quantity, it is infinitesimally small.

Mr. Chairman, I will yield to the gentleman from Pennsylvania (Mr. RITTER), who is far better able than I

to explain this from the standpoint of his background in science.

Mr. RITTER. I thank the gentleman for yielding.

I doubt if I am going to cure anybody of their fanciful flights today.

The dioxin we are dealing with is a byproduct of pesticide manufacture. Those wastes are already—and particularly in the case of Times Beach—that waste, in the hundreds of thousands of kilograms—I think over 100,000 kilograms—is already covered under the 1,000 kilogram threshold.

In addition, it was mixed in with waste oils which increased the weight of the dioxin containing hazardous waste.

So the example is not a correct example for the disposal of less than 25 kilograms.

The only potential correct item of the gentleman from New Jersey is that if the 25 kilograms contained a part per billion of dioxin, potentially it would then be covered under his amendment, which on the second page, actually is going to cover the most so-called ignitable, corrosive, reactive or toxic types of hazardous wastes identified or listed under section 3001, where such waste is part of a total quantity generated by a generator generating 25 kilograms or less.

Now, this has not yet come out as to the tune of the gentleman from New Jersey's amendment, but this amendment could cover just about everything that qualifies under the current definition of hazardous waste down to zero.

The CHAIRMAN. The time of the gentleman from North Carolina (Mr. BROYHILL) has expired.

Mr. RITTER. Mr. Chariman, I move to strike the requisite number of words.

Mr. Chairman I would like to, just for the sake of an intelligent debate, separate out the definitions here. People are using the term "toxic" and "hazardous" interchangeably. Now that is incorrect. I know it makes a good of a rhetorical point to do that, but it is simply not correct. There are four categories in the hazardous waste characterization.

One is flammable. If it burns, it is hazardous. It may or may not be toxic.

Two, it is corrosive, which means if it rusts something it is hazardous. That is not necessarily toxic. A corrosive liquid can behave like vinegar.

Three, it is reactive, which means there can be some kind of chemical activity with its surrounding's.

And four, it is hazardous it is toxic. And I would appreciate it if my colleagues would not use the terms toxic and hazardous interchangeably because that clouds the issue. And before we lump all things that burn, or corrode, or that react with something, as being toxic, that we go back to the original definition of hazardous.

Mr. HILER. Mr. Chairman, will the gentleman yield?

Mr. RITTER. I yield to the gentleman from Indiana.

Mr. HILER. I thank the gentleman for yielding.

Let me see if I can get this correct. The gentleman said that there are four classifications of hazardous wastes: ignitable, corrosive, reactive, and toxic?

Mr. RITTER. Yes, that is true.

Mr. HILER. So essentially in reading the second page of this amendment that has been offered, then that would say that all hazardous waste would then come under the 25-to-0 kilogram level.

Mr. RITTER. It would conceivably. The language used on line 6 of page 2, is that in the case of most ignitable, corrosive, reactive, or toxic types of hazardous wastes less than 25 kilograms would be regulated.

But there is going to be an enormous amount of judgment calls here. We are going to end up, not with 500,000 additional businesses, which is what is going to be covered from 100 to 25 kilograms, we are going to conceivably end up with just about any installation that has anything to do with any kind of chemical whatsoever, perhaps an additional 500,000 notices.

Ms. MIKULSKI. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the Florio amendment.

I just want to make three basic points. First of all, I would like to remind my colleagues that the Florio amendment is supported by the League of Women Voters, the Cleaning and Laundry Executives Association, the National Association of Solid Waste Management and the League of Cities. So it enjoys substantial support.

The amendment would create no regulations or a paperwork burden. It is simply a notification. This requirement is neither confusing nor burdensome.

And last, but not at all least, many States, such as California, Rhode Island, Missouri, and Massachusetts, already require some form of notice for these quantities of hazardous waste and in no way have impeded the flow of commerce, profitmaking or the ability to run your business the way you want.

It does require this particular notification.

I would urge the adoption of the Florio amendment.

Mr. HILER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I am extremely concerned that when we take the notice requirement from 100 kilograms to 25 kilograms we are imposing a burden upon hundreds of thousands of small businesses in this country that they will not be able to meet.

Recently a subcommittee of the Small Business Committee conducted a hearing on this very bill and on section 3 addressing the kind of issue that the particular Florio amendment addresses.

Mr. Lee Thomas, the Assistant Administrator for Solid Waste Emergency Response at the U.S. Evnironmental Protection Agency, a new appointment, made these remarks.

We agree with the goal of informing waste handlers such as transporters and disposal site personnel about the hazardous nature of the wastes they are handling. However, we oppose the application of this requirement to generators of between 25 and 100 kilograms per month because we feel that it will be impossible to educate the hundreds of thousands of affected generators as to their reporting responsibilities.

□ 1510

He goes on to say:

The most important aspect of implementing this provision is fostering voluntary compliance through a broad educational campaign, working with the trade associations to alert the affected community of their duties and responsibilities. We believe that many of the affected generators will likely be small businesses which in the past have had little familiarity with the RCRA regulations. These businesses may not even be aware that they are generators of hazardous waste, much less be able to identify their wastes sufficiently for purposes of completing the notice.

We will depend heavily on education to obtain compliance with this requirement. We envision taking enforcement actions when we receive reports of non-compliance from waste handlers. To conduct occasional inspections of even a small percentage of small quantity generators will be very resource intensive for EPA and the States given the enormous size of the regulated community. Some States may, of course, have the capability to undertake a more aggressive enforcement program.

What EPA is saying is that they are not going to have the capability to: First, enforce the notification of generators between 25 to 100 kilograms; and second, it is going to take a major educational effort to notify these people.

Now, with this amendment we not only go to 25, but we go from 25 down to zero for a broad-based classification of hazardous waste.

Mr. FLORIO. Mr. Chairman will the gentleman yield?

Mr. HILER. I yield to the gentleman from New Jersey.

Mr. FLORIO. Mr. Chairman, I will just say that the concern the gentleman has with regard to the potential authority to go down to zero is unfounded because the EPA already has the authority under existing law to go down to zero for certain types of highly hazardous wastes.

Mr. HILER. Which are not the wastes that the gentleman lists.

Mr. FLORIO. The gentleman is pointing to the fact that there is the potential authority to go down to zero.

I am suggesting that EPA has the ability as it sees fit, to define what constitutes particularly hazardous waste, and go all the way down to zero.

The gentleman's concerns about education are going to be addressed——

Mr. HILER. If I may reclaim my time, if in fact, then—and there is no question—EPA has that ability now, let us just strike page 2 because there is no need for it. In fact, what the gentleman's amendment does, it broadens that classification of hazardous waste to such an extent that EPA is going to be hamstrung by an inability, with such a large mass, to try to enforce.

Mr. FLORIO. If the gentleman will yield for just one additional moment, the difficulty is, what we are talking about is by definition "hazardous waste." Everything that is being dealt with under this law EPA has already determined to be hazardous.

If the gentleman's main concern is education of the small business people, the vast majority of whom will undoubtedly abide by the law, the gentleman from Missouri (Mr. SKELTON) is going to have a proposal, which I am prepared to accept, which provides for an educational funding program to get this information out. I think that should resolve the problem.

Mr. HILER. I do not think it will resolve the problem. I intend to offer an amendment after the Florio amendment is taken care of that will extend the time period before this law takes effect. But the fact of the matter is, if EPA already has the ability to do what the gentleman would like to do in the second page of his amendment, let us just strike the amendment. In fact, the gentleman is asking EPA, requiring EPA, to do far more than what currently exists under RCRA.

Mr. SHELBY. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the Florio amendment.

Mr. Chairman, there is an inclination, when speaking of hazardous waste management in this country, to lose sight of the big picture, to become emotionally submerged in the cause of regulating every potentially dangerous form or degree of hazardous waste in existence. In this instance, I feel it critically important that Members pause and take a step back from the emotionalism of small generators' management of hazardous waste and look at the possible ramifications of imposing such requirements on over half a million small businesses.

First of all, the Florio amendment would create a confusing dual system of notification and regulation for generators which produce under 1,000 kilograms per month of hazardous waste. The amendment would create a scheme whereby the small generator of 100 kilograms per month or less would be subject to simple notification requirements, and those generators between 100 and 1,000 kilograms per month would fall under a different compliance schedule for regulations. What would emerge from the dual compliance standards is an entirely unworkable situation.

The Florio amendment seems to say that within just 3 months of the bill's enactment, hundreds of thousands of small businesses across the country, from retail and grocery stores to car washes, barbershops and painting contractors will, with the wave of a hand, know their full responsibilities when it comes to manifesting as little as 2 pounds of hazardous waste a day. The amount of waste generated by these under 100 kilograms per month generators is less than three-tenths of 1 percent of all the hazardous waste generated in this country. Members should know that many small generators are not regulation-free on the State level and it has been shown that they are, by and large, unfamiliar with their own State hazardous waste regulations. How can they possibly be expected to comply with federally imposed regulations if they are not receiving word now of their State responsibilities?

The answer is they will not comply—No. 1, because Government nor industry will be able to educate these hundreds of thousands of additional small businesses on these requirements. Even if it is possible to inform some small percentage of these businesses of their duties, many generators will resist the formal manifesting because they simply cannot devote the precious, productive time nor manpower to compliance duties. As a result, instead of placing the hazardous waste material in the trash to be taken to a landfill, the waste will never even get to a transporter, and will end up in a ditch or down some river. We risk the potential of illegal dumping to such a degree as this country has never experienced. The adverse consequences on the environment and public health, precisely what we wish to protect, are staggering.

Many solid waste transporters may refuse to pick up materials that are manifested as "hazardous." Then what happens? Even if the labeled waste is picked up, where will it be taken? Will the landfill operator accept it? If not, what is the alternative? Is there a close-by subtitle C facility to handle these small amounts of hazardous wastes? Many of these questions cannot be answered affirmatively or definitively—we owe the public answers to these questions before we act hastily on this amendment.

Both the Environmental Protection Agency and the Association of Solid Waste Management Officials have testified before Congress in support of the 100 kilograms per month limit as a reasonable limit at this time. EPA already has the authority, if they choose, to regulate waste at any level they deem appropriate. However, they have concluded that the enormous number of small generators if brought entirely within the regulatory system would far outstrip the limited resources available to effectively implement the act. Apart from this determination, EPA makes no distinction in applying RCRA requirements to generators of acutely hazardous waste. The full weight of RCRA regulations apply to any generator that produces more than 1 kilogram of acutely hazardous waste per month. EPA is in the process of issuing a rule under this authority for the regulation of dioxin contaminated waste.

Mr. Chairman, we must approach this issue from a rational, not emotional perspective. Bringing hundreds of thousands of small businesses into the Federal regulatory process in one fell swoop, under the flimsy premises provided, is simply no way to create regulatory policy. I urge my colleagues' opposition to the amendment.

Mr. LENT. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in strong opposition to the amendment of the gentleman from New Jersey (Mr. FLORIO). One of the principal purposes of the Shelby-Lent amendment is to establish a single system of notification and regulation of small generators of hazardous waste. This is done by requiring that all generators of 100 kilograms per month or more of hazardous waste comply with RCRA regulations to be promulgated by EPA. Current law exempts all generators below 1,000 kilograms per month.

Mr. FLORIO's amendment would destroy this consistent system of regulation.

That is why a large number of organizations, including environmental organizations, have gone on record in support of the exact language of the Shelby-Lent amendment. They do not want it tampered with. And I am including the Environmental Defense Fund, I am including the Sierra Club, the Audubon Society, as well as a number of business organizations.

I would like to detail for my colleagues the reasons why this amendment is ill-advised. Further, I wish to comment on the arguments in favor of the amendment which were included in an extension of remarks published by Mr. FLORIO on July 29.

The Florio amendment to Shelby-Lent would create a confusing dual system which would be unworkable and unenforceable. It would do this by requiring any business that generates more than 25 kilograms per month of hazardous waste to manifest such

waste, for purposes of notification to transporters, each time it is shipped offsite. Different compliance schedules, therefore, would be established for notice—down to 25 kilograms per month—and regulations—down to 100 kilograms per month.

When I finally saw the amendment of Mr. FLORIO today, I realize that it requires notification for generators below 25 kilograms a month, as well. If a generator's waste is ignitable, corrosive, reactive, or toxic, that generator will have to notify the waste transporter that his waste is hazardous, even if it is below 25 kilograms a month—down to zero kilograms a month.

One industry is pushing this amendment, the solid waste disposal industry. Over 500,000 additional businesses, covering numerous industries, would be affected such as hardware, grocery, and retail stores, colleges and universities, high schools, photofinishing operations, amusement parks, bowling alleys, carwashes, horse tracks, carpet cleaners, barbershops, painting contractors, and many others.

It makes no sense to bring hundreds of thousands of additional small businesses into the Federal regulatory process at the request of one industry. Furthermore, the amount of waste generated by these over-500,000 additional businesses is less than three-tenths of 1 percent of the total hazardous waste generated in this country.

Finally, and most importantly, this notification requirement down to 25 kilograms per month will have adverse environmental and health effects. First, many solid waste transporters may refuse to pick up materials that are accompanied by a form stating they are hazardous. Second, even if picked up and carried to a sanitary landfill, the landfill operator may very likely refuse to accept the waste, especially in these times of high awareness of the problems of land disposal of hazardous wastes. There will likely then be no other place for the waste to go. There are very few subtitle C facilities in the country. What is the small businessman to do if the nearest facility that will accept his waste is hundreds of miles away?

We can easily guess what will happen. The material will never get manifested, will never get to a transporter and will never get to a landfill. It will be poured down a drain, or into a ditch, or off a bridge. There will be massive resistance to these regulations, and neither Government nor industry will be able to educate these hundreds of thousands of additional businesses on these requirements. The threats to public health and the environment will grow, not diminish.

A close examination of the arguments used in support of the Florio amendment shows further that the amendment is ill-advised. The first example that Mr. FLORIO uses to support his amendment is an incident in Kentucky where three refuse workers were hospitalized after picking up a 5-gallon container of hydrochloric acid. This incident is unfortunate, but in no way could it be prevented by Mr. FLORIO's amendment.

Twenty-five kilograms is approximately 55 pounds. Five-gallons of hydrochloric acid is approximately 40 pounds, which is less than 25 kilograms. So the Florio amendment would not address the problem here, the hydrochloric acid involved would not be covered.

Turning to the list of examples of problems with small quantities of waste that was compiled by the National Solid Waste Management Association (NSWMA), the same observation can be made. This list compiles a vague picture of purely anecdotal evidence of unfortunate instances due to hazardous wastes, but the vast majority of these instances would not be helped by the Florio amendment. Where the quantities are even known in these examples, most are either under 25 kilograms or over 100 kilograms, therefore, they are either not regulated by Florio or will already be regulated under Shelby-Lent.

It is also interesting to note that there is no consistent pattern to these instances. In 3 years time, only 44 instances were reported out of millions of pounds of disposed hazardous waste. The nature of the solid waste disposal industry is to haul away items that people do not want. Haulers have a contractual relationship with customers and can negotiate safeguards. Many everyday trash items are potentially dangerous; there must be a limit on how far the Federal Government should go to regulate these practices.

□ 1520

Mr. RITTER. Mr. Chairman, will the gentleman yield?

Mr. LENT. I am happy to yield the gentleman from Pennsylvania.

Mr. RITTER. I thank the gentleman for yielding.

Mr. Chairman, the calculation of 500,000 or 600,000 additional businesses being covered under the reduction from 100 kilograms to 25 kilograms is changed by this Florio amendment.

Mr. LENT. So the point the gentleman is making is that it would be more than 500,000 businesses.

Mr. RITTER. If the gentleman will yield further, we do not know, having read the language, that notice must be given perhaps to amounts well below 25 kilograms, perhaps even down to zero. I submit that that is not necessarily the intent of the gentleman from New Jersey, but that is exactly what the language says.

The language says, "In the case of the most ignitable, corrosive, reactive or toxic types of hazardous waste, the notification would have to occur," and I paraphrase, at less than 25 kilograms. Now, at which point does this amendment cut off? I submit, there is no cutoff; 500,000 businesses may seem like a small number in comparison to the reality of how many are covered.

Mr. LENT. In conclusion, Mr. Chairman, I do not believe that we should regulate over one-half million additional small businesses by adopting the Florio amendment, based on limited anecdotal evidence submitted by one industry. I am also bothered that this evidence was not presented for the record to the Energy and Commerce Committee. On closer inspection of this evidence, one can see why it was not submitted. Of the 35 incidents cited in 1983, the quantities of waste involved breaks down as follows. In only two incidents, was the quantity involved between 25–100 kilograms, the quantity covered by the Florio amendment. The rest were either below 25, over 100—covered by Shelby-Lent—unknown or too vague to say. This is hardly a record on which to build an amendment.

Furthermore, in testimony before the Small Business Committee, NSWMA did not even know if workmen's compensation claims for its members had dropped in States with a lower notification requirement.

You can see why the Florio amendment is not appropriate. I urge my colleagues to support a consistent, enforceable system of regulation for small quantity generators which provides maximum environmental protection. I urge you to support the Shelby-Lent amendment as drafted, and reject the Florio amendment to bring over half a million additional businesses under Federal regulation.

Mr. ECKART. Mr. Chairman, I rise in support of the Florio amendment.

Mr. Chairman, let me try to address a couple of issues that have been raised in the recent debate.

First of all, it is important to underscore that the authority to go to zero already exists in current law. This is not a new provision; it is a restatement of existing law.

Second, we have not heard the tales of woe that have been predicted in the course of this debate on the Florio amendment yet this afternoon about problems occurring in Missouri, California, Louisiana, New Hampshire, Massachusetts, or Rhode Island where this notice provision already exists. There has been no demonstrable evidence that any of the small businesses, the woes of which have been predicted for them with the adoption of this amendment, have suffered in these other States which already have similar or more stringent provisions.

The issue is one perhaps of a paper trail. It is best probably to reflect

upon how we got where we are with this bill today.

We do not know where this stuff comes from, we do not know where it is going, and we do not even know how many dumps we have in the United States, and that is partly because we have failed to have provisions such as this which can at least create the kind of evidence that can give us a sound basis for sound decisionmaking in the future.

One of the problems in hazardous waste management has been the unknown, and with the Florio notification amendment we will eliminate that problem.

Let us take a look at one of the proponents of the Shelby-Lent substitute suggested, and I support every other provision of it, and particularly would be supportive of it if the Florio amendment and my amendment is included.

Landfills may refuse to accept this waste if they know what is in their trucks. I think nothing speaks more eloquently in favor of a notice requirement than that simple statement. The reason they might not accept it is because they would realize that they are accepting dangerous, hazardous substances for which they, under other provisions of the law, might very well be liable. In this instance, the opponents of the Florio amendment wish to tell you that silence is golden. Well, it may be golden for those who wish to profit from other people's misery and to continue to provide for the unmitigated dumping, in no matter what quantities we are talking about, of substances that are dangerous, and which have caused injury and harm to untold people across this Nation.

This is not a small-business-against-the-EPA bill. If anything, perhaps the Florio amendment could also be properly named the Garbage Collection Protection Amendment of 1983. There are literally dozens of people who collect solid waste in this Nation. There are literally dozens of municipalities that dispose of this waste that are fearful of the accumulation of these substances, the synergistic effects of which can threaten ground water and pose untold hazards for us in the future.

The question is not only one of amount, but type, and the ability of the people of this Nation, of residential communities that are near these dumpsites, to make an informed, intelligent decision about what goes into the ground in their neighborhoods and communities. Without the Florio amendment, we cannot do that.

I urge adoption. Let us discover any more of these things by accident.

Mr. FLORIO. Mr. Chairman, will the gentleman yield?

Mr. ECKART. I would be happy to yield to gentleman from New Jersey.

Mr. FLORIO. I thank the gentleman for yielding.

Mr. Chairman, I thank the gentleman for his very learned evaluation.

Let me point out one additional thing. As I indicated before, there are 20 States that already have small-generator modifications below the Federal law. A number of States already have the notification provisions that we are advocating having on a uniform national basis—Rhode Island, Massachusetts, Louisiana, Missouri, New Hampshire, California, and so on. I do not know how many individuals in any of those States can oppose this effort to apply that uniformly, because, as we know, one of the things we are trying to protect is ground water, and to the degree that aquifers do not know State boundaries, we can have my State or your State doing the right thing, and not having the adjacent States, with notification requirements, allowing for inappropriate disposal, having those chemicals work their way into the ground water that is polluting the State that does require notification. This is a national problem that requires a national uniform response, and a minimum response is to know where toxic materials are going.

Mr. LENT. Mr. Chairman, will the gentleman yield?

Mr. ECKART. I would be happy to yield to my friend, the gentleman from New York.

Mr. LENT. I thank the gentleman for yielding.

Mr. Chairman, did I understand the gentleman to indicate that the Florio amendment simply restates existing law, that the EPA Administrator would promulgate regulations governing the transport of hazardous waste?

Mr. ECKART. It has the authority under existing law to go down to zero.

Mr. LENT. I think the gentleman is correct that the EPA Administrator does have that authority. My point is that he is not mandated under existing law.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. ECKART) has expired.

(On request of Mr. LENT and by unanimous consent, Mr. ECKART was allowed to proceed for 2 additional minutes.)

Mr. LENT. But the Florio amendment would direct the EPA Administrator to promulgate regulations down to zero. My point is that the Florio amendment does go further than what is presently in the law. It directs the EPA to promulgate regulations.

Mr. MOLINARI. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Florio amendment.

Mr. Chairman, I think the debate on both amendments here has been very good. There have been good reasons raised on both sides of the argument.

We have heard the questions of the burdens that would be put upon businesses, and I am concerned about that. We have also heard about the difficulty of compliance, and whether indeed it is possible to be able to effectuate compliance with this RCRA bill as amended by the Florio amendment.

□ 1530

I suggest this to you, that while it may be difficult to effectuate compliance, that if we were to be able to get say 25 percent compliance within 1 year or 2 years, look at the progress that we would have made. I do not suspect that we are ever going to get 100 percent compliance or anywhere near it.

The question that we have to look at is where is the country today? We do know that there are responsible people out there, responsible small businessmen and there are the others. I think they are the ones that we are attempting to reach today with this amendment.

We talk about the classifications of hazardous substances and, yes, indeed, the gentleman from Pennsylvania (Mr. RITTER) listed the four categories. We must remember that the one I guess we are most concerned about is the one that deals with toxic chemicals.

I think the time has come that we have to face up to the problem. If it causes an additional burden to the businesses of this community, the small businesses, I think that is a price that we are going to have to pay in society for what we hope to gain. We only look back to the last year or two and study the record. I must say that at hearings we held by the small business committee in New York about a year or a year-and-a-half ago, we heard horror story upon horror story about what was occurring in the small business industry.

Mr. Chairman, I urge strong support for the Florio amendment.

Mr. MACKAY. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, like most Members of the freshman class, I have not felt it appropriate to become involved on every issue that has come before this Chamber. However, I have substantial background on the hazardous waste issue, and hope that the insights I have gained from that experience may be of assistance to other Members in considering the impact of this legislation in their own districts.

I served for 2 years as chairman of the Governor's Hazardous Waste Policy Commission in Florida, and have studied and helped deal with numerous hazardous waste crises which occurred during that time.

In working at both the State and local levels, I have discovered a number of surprise endings in the effort to manage the hazardous waste problem. It is my belief that there are

a number of lessons to be learned from our experience to date with RCRA and I believe the Shelby/Lent amendment will enable us to avoid repeating in the 1980's the mistakes we have already made in hazardous waste management in the 1970's.

The hazardous waste (HW) issue is a clear example of a Federal policy that mandated a massive new set of responsibilities on State government, and then failed to follow through with either the technical or the monetary assistance necessary to enable the States to comply with these mandates. The result has been delay, confusion, and unnecessary ill will.

States' hazardous waste programs are relatively new and many are still in the process of getting EPA certification. In Florida, our department of environmental regulation is only now getting its program in place under RCRA. At the same time, it is contending with an escalating series of crises from weekly discoveries of uncontrolled dump sites, and polluted water supplies.

Today, with the proposal to substantially eliminate the "Small Generator" exemption, we run the risk of doing the very same thing to small businesses in the 1980's, as the original RCRA legislation did to State governments and big business in the 1970's.

One of the first surprises is who the small generators are. In contrast to large-quantity generators, which are almost entirely from the manufacturing sector, over 89 percent of the small generators are from the nonmanufacturing sector. They are basically our small business constituencies, operating in such diverse areas as construction, printing, schools, automobile repair garages, and any number of other areas not normally associated with hazardous waste.

Nationwide, it is estimated that businesses now exempt as small generators account for less than 10 percent of the hazardous waste being generated. But that statistic, like many others, is not accurate across the board. In States like Florida, which are not heavily industrialized, small generators account for a far greater percentage of the total hazardous waste problem. The best estimates in Florida are that the small generator is responsible for a quarter to a half of all our hazardous waste. I believe those statistics are typical of nonindustrial States.

We knew at the outset that small businesses do not have the financial and technical resources to comply with RCRA. What we discovered, however, is that there are no permitted sites in which they can legally dispose of thier hazardous wastes.

It has thus far not been politically possible to establish new hazardous waste disposal sites in Florida. So, there are only a few sites, hundreds of miles apart. This means small businesses could not comply even if they wanted to, unless they are prepared to haul their wastes hundreds of miles.

Small businesses are unable to achieve economies of scale by hauling in truckload lots, but Florida has not permitted transfer stations to enable these small shipments to be pooled before transferring them long distances.

I have mentioned Florida a great deal, but testimony from EPA indicates Florida is typical of most other nonindustrial States. Shelby-Lent deals with these problems by allowing treatment, storage, and disposal at interim facilities, and by providing a realistic amount of time to get permitted facilities in place.

Further, Shelby-Lent adopts realistic timeframes to allow time to educate local governments and small businesses as to their responsibilities, and it directs EPA to undertake education programs for local governments and small businesses.

In summary, Mr. Chairman, unless we adopt the Shelby-Lent amendment, we are on the verge of putting small businesses in a classic double bind. They will face enormous new responsibilities with no realistic way to comply with the law.

The lesson of the 1970's is that an unrealistic law creates an unnecessarily adversary atmosphere, and strong incentives toward illegal dumping. It is my hope that we will not have to learn that same lesson again in the 1980's.

The Shelby-Lent amendment is a reasonable step toward regulating and educating small generators without placing excessive burdens on State and local governments. I urge my colleagues to support its adoption.

Mr. GRAMM. Mr. Chairman, I move to strike the requisite number of words. I rise in opposition to the Florio amendment.

Mr. Chairman, I think it is important that this point be answered about how can it hurt things if we promulgate new regulations, if we pass a law. It is argued that most people are law abiding and some people will comply with it. Even if 25 percent comply with it, are we better off than we are now?

It seems to me that is the real question we are talking about here. That is, at what point do we optimize the degree of environmental protection that we are getting?

Now, clearly, if your objective is to have good environmental laws on the books, rather than a good environment, then you want to support the Florio amendment because you are going to be able to open the lawbooks, should this become law, and there it will be. On the books we are going to be able to regulate down to zero the actions of small business in disposing of hazardous wastes in some circumstances, down to 25 kilograms in others.

But the real questions are whether this proposal is feasible, whether the law is enforceable, and whether or not its passage will help the environment.

Now, what the Shelby-Lent amendment does is make a substantial change in current law. We are going down from 1,000 kilograms to 100 in our level of regulation. We are asking small business to adjust to this. Now, forget the cost to small business for a moment. That argument has been made over and over. It is an argument that ought to carry a lot of weight here, but it does not.

The point is this: For people to be law abiding, No. 1, the law must be feasible to comply with, and No. 2, people have got to believe that it is reasonable. If we reach the point where the people who are required to comply with the law do not believe it is reasonable, if they cannot find disposal sites at prices they can afford to pay, what is going to happen? Yes; maybe we will get 25 percent who find it feasible to comply. But what if we induce a situation where a substantial number of people simply take the hazardous wastes and flush them down the toilet? Are we not worse off then than we are now, at least the waste is now going to landfills.

We are finally getting people to view the new requirements we are imposing as being reasonable. We are trying to educate them in terms of being concerned about the impact of waste generation, but if we move so far that they view the requirements as being ridiculous, then we are going to induce them to be more irresponsible than they currently are being under existing law. Whether we are, in fact, better off with tighter standards depends on the behavior those standards trigger.

I submit that with the Florio amendment we are likely to trigger very irresponsible behavior. We are likely to discover this waste, not in the local dump where we have chemical reactions and the waste dissipates before it leaks through, but scattered through our communities. We may create a situation where the local laundry, the local college, or local car wash simply has the guy who normally does the job say, "Oh, the hell with it. I'll flush it down the toilet."

I submit that there is a very real danger here.

Second, we are not going to commit the whole Treasury of the United States of America to the EPA. I am sure there are those who would like to do that and there are many here who know no bottom line in the expenditure of the taxpayers' money, but that is not going to happen. We have a lot of other political groups who are not going to allow that to happen because they want the money.

So what do we do by imposing these constraints? We take the limited resources EPA has and rather than using those resources to try to deal with big problems, we force them to run around trying to look inside every can at every filing station in America.

I submit that this is not a reasonable policy. I think, quite frankly, that the gentleman from Alabama (Mr. SHELBY) and the gentleman from New York (Mr. LENT) have taken this move about as far as it is prudent to take it at this point and that their proposal makes a great deal more sense. Can we not move from a thousand kilograms to a hundred, monitor the result, begin the education process, allow EPA—which everyone agrees has got the power to do these things now—to accumulate data and decide where we go from there?

Mr. Chairman, I urge my colleagues to look at two points, quite aside from the cost to small business:

First, are we going to induce people to disregard law because they think it is unreasonable?

Second, do we really have or are we going to commit to EPA the resources that would really make it possible for us to enforce this proposed law?

Surely it is a well-known principle to those who serve in the Congress that in order for a law to produce desirable results, it must be perceived as reasonable. I submit that this proposal will not be perceived as reasonable and that we are going to induce businesses in the best of conscience to act irresponsibly because they are going to think that we have been unreasonable, arbitrary, capricious, and plain stupid. I am concerned, quite frankly, that they are going to be right, but I am also concerned they are going to react in a way that might be harmful to us all.

□ 1540

Mr. GORE. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I rise in support of this amendment. I think it is fair to say this is the key vote on this bill this year. This is the key hazardous waste vote in this Congress.

The issue is pretty simple. Are we going to allow someone who is dumping 1 ton of dioxin per year to be able to do it without even telling anyone where it has been dumped?

If you are for that, then vote against the amendment. If you are against that, and you want to at least know where it has been dumped, then vote for the amendment.

My colleague who has just spoken, my respected and esteemed colleague, the gentleman from Texas (Mr. GRAMM) has said that if this amendment is passed we might see a wave of violations on the part of small business throughout this country. I just think that is wrong.

We have laws in 20 States already relating to small generators. We have five State laws which are much tougher than this proposed amendment, and there is no evidence that small business is violating them. They are not irresponsible. They are going to abide by this law.

In fact, there is a growing awareness all through this country that the time for talk and rhetoric about hazardous waste has long passed. People want us to get serious about this problem. They want to see it solved and they know there are some trade offs involved.

They know it is going to be tough to solve this problem.

But this is the key vote. Are we interested in solving the problem or are we interested in just talking about it and agreeing when our constituents say yes, this is a terrible problem?

If you want to help solve the problem, vote for the Florio amendment.

Mr. GRAMM. Mr. Chairman, will the gentleman yield?

Mr. GORE. I will be glad to yield.

Mr. GRAMM. I would just like to make two points.

First of all, we have been debating for an hour here before the gentleman came on the floor about this use of 1 ton of dioxin. The point we have tried to make over and over again is that those kinds of quantities of dioxin in 100 percent form do not exist anywhere except in laboratories, so those kinds of examples are misleading at best.

Mr. GORE. Reclaiming my time for a moment, first of all, the dioxin that was dumped at Times Beach amounted to less than 50 pounds. Second of all, you could use several different examples. Someone could be dumping 1 ton of cyanide per year and you would not even have that person be required to tell where he is dumping the cyanide.

Mr. GRAMM. Will the gentleman yield further?

Mr. GORE. I will be glad to yield.

Mr. GRAMM. In fact, in the Times Beach case the 42 pounds of dioxin was contained in 100,000 kilograms of a byproduct of 2-4-5 TCP and never existed in a pure form to be mixed.

The second point I wanted to make was that in fact we have had surveys in the States that have passed these tight laws and these surveys tend to show that small business is not even aware that the standards exist.

So I do not buy the idea that we have clear evidence yet as to what is going on in these States. I think it is important that we know what we are doing if we are going to jump from 1,000 kilograms to zero all at once when we have a reasonable, moderate, rational proposal before us to go from 1,000 to 100.

Mr. GORE. Reclaiming my time, the gentleman and I have had the opportunity to debate this issue on several occasions and before the debate became framed around this narrow dispute over the Florio amendment the gentleman has opposed every single suggestion from the majority side to try to get at this problem.

Before it got down to this near compromise on the Florio amendment the gentleman as opposed to doing anything about it.

Mr. GRAMM. Will the gentleman yield?

Mr. GORE. I yield to the gentleman.

Mr. GRAMM. I am here today supporting the amendment of the gentleman from Alabama (Mr. SHELBY), from the Democratic side, to drop the requirements form 1,000 to 100.

Mr. FLORIO. Will the gentleman yield?

Mr. GORE. I yield to the gentleman from New Jersey.

Mr. FLORIO. I would just like to commend the gentleman from Texas who since last year has developed a great sense of sophistication. I recall last year the gentleman was opposing any modification to the small generator exemption and asking that we study it. So I am very pleased to welcome him to the idea that the small generator exemption is against the public interest.

I think the gentleman has moved forward dramatically.

Mr. GORE. Reclaiming my time, I would just add that I would hope the gentleman would come one more reasonable step further and support the Florio amendment which will give the American people the right to know where hazardous waste is being dumped.

Mr. TAUZIN. Mr. Chairman, I move to strike the requisite number of words and I rise in support of the Florio amendment.

Mr. Chairman, I think it is important that we view the Florio amendment in connection with the Shelby-Lent amendment which I also support.

Absent the Shelby-Lent amendment and the Florio amendment added to it, the condition of the bill would provide for an extensive application of regulations upon small generators.

Not only would small generators have to meet a notice requirement; that is, to fill out a form as to what the chemicals would be, what would be transported and disposed of from their generation facility, be it a retail outlet or what have you, but also that generator would be subject to another number of other EPA requirements provided under RCRA.

In fact, absent Shelby-Lent, absent the EPA doing its jobs, as sometimes it has failed to do, and to meet the deadlines of this Congress, absent meeting their requirements to promulgate reg-

ulations within I believe 18 months, the full weight of RCRA requirements would fall upon the small generator, the full regulatory burden of the Federal Government would fall upon the small generators.

Now, the gentleman from Alabama (Mr. SHELBY) and the gentleman from New York (Mr. LENT) have cured that. The hammer of the full weight of the RCRA requirements falling on small generators has been removed by Shelby-Lent, and I hope we support it for that reason.

Additionally, Shelby-Lent makes sure that in regard to those regulations that would fall on small generators, including the separation of materials and intricate regulations of that nature, are not imposed upon the small generator from 100 kilograms down to 25. The limit is 100, and I applaud the Shelby-Lent effort in that regard.

What the gentleman from New Jersey, (Mr. FLORIO) is suggesting is that in this minimum area of notice, in this minimum area of providing that a generator simply notice the disposition of hazardous materials above 25 kilograms a month, in this minimum area that would be the only case between 100 kilograms and 25 kilograms of generation that the EPA regulations would apply.

The the gentleman from New Jersey, (Mr. FLORIO) does one additional thing. He does mandate the EPA promulgate regulations in regard to the most toxic of all chemicals that have been identified under RCRA. He does require that that be done.

The opponents of the Florio amendment will tell you that that means that EPA must therefore regulate down to zero in these categories. That is not so.

It means that EPA must in fact promulgate regulations and the current law allows EPA to go to zero.

But the Florio amendment, as I understand it, does not mandate that EPA regulate down to zero. It can regulate anywhere in between, but it must promulgate regulations in regard to the most toxic of chemicals identified, and must do so, and has the authority to go to zero if it so chooses. That is our interpretation of the Florio amendment and I believe that is correct.

Let me say something in regard to why I think this simple requirement of notice on the generation of materials, 25 kilograms or more, is important.

Louisiana has an act similar to RCRA. We are a qualified State under the Federal program, which means that we have a program which is as stringent or more stringent than the Federal program.

Our laws require notice at that level, and our laws require even additional regulations below the level of 100 kilograms.

How well that law is being enforced is something we have been debating in Louisiana at this time. But no one has appealed to the Louisiana Legislature to change that law. No one has asked us to raise those limits because it is driving them out of business. No one has asked us, in effect, to repeal that law that would protect the public by simply giving notice of what chemicals are being produced and where they are being sent.

The chairman of the subcommittee has made an awfully valid point and that is when an underground aquifer is polluted it is polluted forever. We have lost it forever.

We in Louisiana have several important underground aquifers. Some of them flow from Arkansas into our State. Some flow from Mississippi. One of the largest ones flows from Mississippi.

It is important, in my view, and in the view of many of us here that we have a national standard in regard to knowing where hazardous wastes are going. It does not matter whether the hazardous waste is accumulating in large groups or small groups. If it is accumulating somewhere and has the potential prominently of permanently polluting or contaminating invaluable water supplies in our Nation then it deserves national attention; it deserves a program that insures in every State surrounding a State with a program, that there will be similar requirements and similar protections for the public.

That is why the Florio amendment is important.

□ 1550

Let me say again, the Florio amendment added to the Shelby amendment will not impose a whole generation of regulations upon the small generators. It will not do so. If it did so, I could not support it, because that would certainly be unreasonable and certainly that would probably require small generators to have less than the proper respect for the law. But all we are doing is saying if Shelby-Lent passes that massive regulation is not applicable to small generators; if it passes with the Florio amendment, the small generator simply has to notice. Let me show you the form.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. ECKART and by unanimous consent, Mr. TAUZIN was allowed to proceed for 1 additional minute.)

Mr. TAUZIN. This is a form, a one-page form. It requires the name of the company, an identification of the chemical that is being disposed of and generated from that facility. It is not as complicated as an IRS form, not even the simplest of IRS forms, it is the simple paper that identifies hazardous waste going out somewhere in somebody's community and may in fact 1 day accumulate to damage someone's environment or their life, because we have lost life in our State at a hazardous waste site. There is nothing more impressive, I think, to the people of our State and this Nation when a young boy had to die when we did not do our job in past years in regulating this area. It does not matter whether it accumulated in large groups or small groups, that young man died because we did not do our job. I think we have to do our job today. In doing our job by requiring a small notification it seems to me is the least we can do.

Mr. RITTER. Mr. Chairman, will the gentleman yield?

Mr. TAUZIN. I yield to the gentleman.

Mr. RITTER. I thank the gentleman.

Is the gentleman aware of the coverage that is extended when the threshold is lowered from 1,000 to 100?

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. RITTER and by unanimous consent, Mr. TAUZIN was allowed to proceed for 2 additional minutes.)

Mr. RITTER. Mr. Chairman, will the gentleman yield?

Mr. TAUZIN. I yield to the gentleman.

Mr. RITTER. I thank the gentleman for yielding further.

Is the gentleman from Louisiana aware of the extent of coverage of businesses and organizations, institutions that are covered by the decrease in the threshold from 1,000 to 100 kilograms?

Mr. TAUZIN. If the question is, if I am aware of the number of businesses that would be affected, yes, indeed, I am. We have those businesses in our State. We have had no threshold limit in our State.

Mr. RITTER. OK. There is 130,000 to 140,000 new institutions that are covered.

Now, that in an EPA that is trying to get its act together, to move forward, to do the job, that is a powerful and substantial addition to their workload.

Is the gentleman aware, with the additional number of covered institutions under the 1,000 to 25 and really to zero, is the gentleman aware of the numbers that we are talking about there, that we are talking 5 to 600,000 additional covered institutions just to go to 25 kilograms and, Lord knows, what we are talking about go from 25 to 0.

Mr. TAUZIN. Let me reclaim my time.

Not only does the Lord know what we are talking about, I think this House knows what we are talking

about. We are talking about the notice requirement, not the full application of the EPA regulation. So, if you want to cite numbers to me, which generate between 1,000 and 25 kilograms of hazardous materials who are not now notifying us of the fact that they are doing it, my answer is we ought to know, this House and this country and citizens of this country ought to know.

Having them fill out a one-page form saying who they are and what they are sending into our communities, it seems to me not a difficult burden for EPA to administer.

Mr. RITTER. Mr. Chairman, will the gentleman yield?

Mr. TAUZIN. I yield to the gentleman.

Mr. RITTER. I thank the gentleman.

We are talking here now, to go down to 25 kilograms, talking about retail stores, grocery stores, hardware stores, photofinishing, colleges and universities, elementary and high schools, amusement parks, horse tracks.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. RITTER and by unanimous consent, Mr. TAUZIN was allowed to proceed for 2 additional minutes.)

Mr. RITTER. Will the gentleman yield further?

Mr. TAUZIN. I yield to the gentleman.

Mr. RITTER. I thank the gentleman.

Bowling alleys, car washes, auto body shops, printers, copying services, barber shops, beauty salons, carpet cleaners, drycleaners, construction and paint contractors, landscaping and horticultural services. I think what we are talking about every month, if it is just to 25 kilograms, is an additional half-million forms. Now the forms go from the generator to the shipper, they go from the shipper to the disposal. We are talking, just to go to 25 kilograms of a humongous new impact of forms. This is just a half-million. But if you go from 25 to zero, what happens in the household, what happens with your kid's chemistry lab?

Mr. TAUZIN. Reclaiming my time.

Mr. RITTER. If we are going to have 1 million forms a month.

Mr. TAUZIN. If you are asking me to consider the fact that we are talking about 500,000 new forms that will travel between the generators of hazardous waste, the transporter and the disposer of hazardous waste, I would ask you in turn to consider the 500,000 times 25 kilograms of hazardous material that is now at least 25, maybe up to 1,000, times 500,000 generators that is now flowing through out society from generators through transporters to heaven knows where. We simply do not know about them. Multiply 500,000 times 100, 150, perhaps 999 kilograms of hazardous materials that is now floating through our society that we do not know how it is being generated or where it is being generated, more importantly where it is being disposed of and may ultimately do damage to our citizens.

Then I am more concerned, I assure you, than I am worried about 500,000 pieces of paper.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. FLORIO and by unanimous consent, Mr. TAUZIN was allowed to proceed for 1 additional minute.)

Mr. FLORIO. Mr. Chairman, will the gentleman yield?

Mr. TAUZIN. I yield to the gentleman.

Mr. FLORIO. I think we have to come back to reality. If the cutoff point for the notification is 100 kilograms, I defy anyone in this room to describe the barber shop as a business that is generating a ton a year of hazardous waste, or the small mom and pop drycleaner that is generating a ton a year of hazardous waste. That is just a fantasy, that is just not happening.

Mr. HILER. Mr. Chairman, will the gentleman yield?

Mr. TAUZIN. I yield to the gentleman.

Mr. HILER. In terms of the mom and pop drycleaner today, the average dry cleaner generates 125 kilograms per month. So there would be no question that they would fall under this provision.

Mr. BROWN of California. Mr. Chairman, I move to strike the requisite number of words and I rise in support of the Florio amendment.

Mr. Chairman, I am not enthusiastic about getting into this debate because I do not have the expertise of the previous speakers who are mainly members of the committee. But I have listened intently to the facts recited here, to the fact that we are talking about possibly another 500,000 to 600,000 small businesses that might be involved in a reporting requirement, and to the rather substantial amount of wastes involved which I think probably is in the order of several hundred thousand tons per year of toxic chemicals of one sort or another that would be regulated. I want to make just a couple of points: Of this 500,000 to 600,000 small businesses that would be involved, this several hundred thousand tons of toxic chemicals that would be involved, 10 percent of those are in the State of California, 50,000 to 60,000 of those businesses and a very large number of tons of toxic waste are being disposed of in California, which I have the privilege to represent.

I can assure the gentlemen who have expressed concern about the adverse impact upon small business, that California, which has this program in effect now, is not experiencing that kind of results.

Of all of the problems that small businessmen come to me with, this is the least. I have had zero complaints from small business about the application of these regulations.

We are very sensitive to this kind of regulatory problem in California, just as we are sensitive to the problems of environmental contamination.

I will speak on that point a little bit later on in the debate.

So, I would say to my friends who are concerned about the possible political impact stemming from this overreaching of regulation that if our experience in California is any indication, you have nothing to worry about here. Small businessmen have other things far more important to worry about, such as whether they stay in business or not, than whether or not they have to report the amount of toxic waste which they are generating.

□ 1600

There is one other point that I would like to make. Some of the speakers on this subject have acted as if they were resisting an unnecessary regulatory evil, that they had to maintain the sanctity of the right of small business to dispose of a certain amount of toxic waste on into the future.

Believe me, that is not the case. We are not going to be able to continue to dispose of toxic chemicals into the environment, no matter how small the quantities, for very much longer into the future. We are now in the process of developing the technologies which are involved in neutralizing or disposing or handling these wastes in more satisfactory ways than disposing of them into the environment.

There are new businesses, new industries, being created to do this and it is absolutely essential that we prepare to face the fact that we are no longer going to be able to dispose of these toxics into the environment. There are just too many facts indicating that this is one of the factors which is endangering the future of America's health and that we are not going to be able to continue to do it.

So for these reasons I am urging that we support the Florio amendment. I do not think it is onerous. I do not think it has political penalties. I think it is inevitable that we move down this course and I would think that this rather modest step, which the gentleman from New Jersey (Mr. FLORIO) is proposing, is the next reasonable step to take.

Mr. LEVITAS. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Florio amendment.

Mr. Chairman, I have studied this amendment and I am as concerned as

others here are about what additional burdens there may be imposed in terms of filling out the short, one-page form that the gentleman from Louisiana has called to our attention.

On the other hand, after he made his comments, I did a little calculation. And found out that what we are talking about is not knowing where 12,500,000 kilograms of hazardous waste material would be going in this country.

And if that is the case I really wonder what the debate is about. What is the alternative that the opponents of the Florio amendment offer us? Is it to remain in doubt; is it not to know; is it to let these hazardous materials accumulate until they explode or become ignited or poison our communities? I do not think anybody wants that. Small businessmen are at least as concerned about their communities as anyone else. I am sure nobody wants that.

I could not support this bill without the Shelby-Lent amendment attached thereto because it significantly strikes a balance between relieving the burdens on small business and providing adequate regulation of the disposal of hazardous waste. But for us to adopt the policy, a conscious and deliberate policy of saying we do not want to know where 12,500,000 kilograms of hazardous waste go each year, borders on the absurd.

And it is for that reason and for the reason that on balance the burden of filling out a form saying where the waste comes from and what it is, is not onerous when compared to the deadly consequences on the basis of burden and risk assessment, I come out in favor of the Florio amendment and in strong support of the Shelby-Lent amendment. And I urge my colleagues to adopt both of them.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey (Mr. FLORIO) to the amendment offered by the gentleman from Alabama (Mr. SHELBY).

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. LENT. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 236, noes 180, not voting 17, as follows:

[Roll No. 324]

Mr. STRATTON and Mr. HYDE changed their votes from "aye" to "no."

Mr. MOORE changed his vote from "no" to "aye."

So the amendment to the amendment was agreed to.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. HILER TO THE AMENDMENT OFFERED BY MR. SHELBY, AS AMENDED

Mr. HILER. Mr. Chairman, I offer an amendment to the amendment, as amended.

The Clerk read as follows:

Amendment offered by Mr. HILER to the amendment offered by Mr. SHELBY as amended: Page 4, after line 22, insert:

"(45) Nothwithstanding paragraph (4)—

(A) no later than 270 days after the enactment of the Hazardous Waste Control and Enforcement Act of 1983, any hazardous waste which is part of a total quantity generated by a generator generating greater than 250 kilograms but less than 1,000 kilograms during one calendar month and which is shipped off the premises on which such waste is generated shall be accompanied by a copy of the Environmental Protection Agency Uniform Hazardous Waste Manifest form signed by the generator;

(B) no later than 540 days after the enactment of such act, the same requirement shall apply to generators generating greater than 100 kilograms but less than 1,000 kilograms during one calendar month; and

(C) no later than 810 days after the enactment of such Act, the same requirement shall apply to generators generating greater

than 25 kilograms, but less than 1,000 kilograms during one calendar month.

Mr. HILER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. HILER. Mr. Chairman, what this amendment does is enable the small business community a sufficient amount of time to become aware of the regulation and to become aware of what the requirements of the regulation are. It does not change the amendment that was just passed in the sense that the 25 kilogram notice requirement is maintained.

What the amendment does is phase in the notice requirements over a period of 810 days, as opposed to the 180 days in the Florio amendment as just passed.

What would happen is that those generators of hazardous waste that exceed 250 kilograms but are less than 1,000 kilograms would have 270 days to begin compliance. Those generators of between 100 and 250 kilograms would have 540 days, and those generators of greater than 25 kilograms and less than 100 kilograms of hazardous waste would not come into effect for 810 days.

The reason this amendment is offered is because to a very substantial extent it is going to require voluntary compliance for this measure to be met by small business.

I would once again like to read a statement that was given by Lee Thomas, the Assistant Administrator for Solid Waste and Emergency Response, in a hearing on July 26 before the Subcommittee on Energy and the Environment on special issues affecting small business:

The most important aspect of implementing this provision"—and we are talking about the notice provision—"is fostering voluntary compliance through a broad educational campaign, working with the trade associations to alert the affect communities of their duties and responsibilities. We believe that many of the affected generators will likely be small businesses which in the past have had little familiarity with the RCRA regulations. These businesses may not even be aware that they are generators of hazardous waste, much less be able to identify their waste sufficiently for purposes of completing the notice.

We will depend heavily on education to obtain compliance with this requirement. We envision taking enforcement actions when we receive reports of noncompliance from waste handlers. To conduct occasional inspections of even a small percentage of small quantity generators will be very resource-intensive for EPA and the States, given the enormous size of the regulated community. Some States may, of course, have the capability to undertake a more aggressive enforcement program.

□ 1630

What my amendment would do would be to allow a sufficient amount of time for that educational process to take place. I think it is an amendment that is necessary if we are to have any measure of compliance with the 25 and 100 kilogram notice requirements.

Mr. FLORIO. Mr. Chairman, I rise in opposition to the amendment.

Mr. FLORIO. Mr. Chairman, I think it is sufficient to say that the gentleman is going to substantially modify the terms of the agreement that has been entered into with the gentleman from Alabama (Mr. SHELBY), the gentleman from New York (Mr. LENT), and all of the various groups that have signed on to the Shelby-Lent agreement; the gentleman is stretching out the delay for notification from 180 to 270 days, all the way up to 1,000 kilograms.

I think it is appropriate to note that everyone who is affected by this has already signed on and agreed that 180 days is feasible.

Mr. Chairman, I am happy to yield to the gentleman from New York (Mr. LENT), who I trust feels his agreement is something that is not required to be modified in the way the gentleman from Indiana is modifying it.

Mr. LENT. Mr. Chairman, I thank the gentleman for yielding, since my name was mentioned as one of the coauthors of the Shelby-Lent amendment and I have not spoken to my colleague from Alabama; but I can say that with the passage of the Florio amendment, the Shelby-Lent amendment insofar as the notice provision, as opposed to regulation, is completely modified.

I want to commend the gentleman from Indiana. I think this is a very reasonable approach. It gives the small businessmen more time to work out their problems.

Mr. FLORIO. Reclaiming my time, Mr. Chairman, the gentleman knows that my amendment had nothing to do with 250 kilograms to 1,000 kilograms, and yet that is what is being modified, among other things, and stretching out the compliance time from 180 days to 270 days; so the amendment of the gentleman dramatically modifies the essence of what the Shelby-Lent agreement involves.

Mr. HILER. Mr. Chairman, will the gentleman yield at that point?

Mr. FLORIO. I am happy to yield.

Mr. HILER. Now, I certainly cannot speak for probably any of the groups that worked to put this Shelby-Lent amendment together; but when one of the groups appeared before our Small Business Committee—that is, the Chamber of Commerce—they were categorically opposed to the 25 kilogram notice.

Now, the gentleman has added that into the Shelby-Lent with this amendment. It would seem to me that as soon as that provision was added, the house of cards is going to start to fall.

Mr. FLORIO. Mr. Chairman, if I can reclaim my time, the point of the gentleman's amendment is that the vast majority of toxic waste that is covered by the full small business general exemption modification is in the range of 250 kilograms to 1,000 kilograms. A thousand kilograms, by the way, is a ton a month.

What the gentleman is doing is substantially expanding the Shelby-Lent amendment by allowing an extension of time for that category of the greatest volume of waste covered by this whole subject.

Mr. HILER. Mr. Chairman, if the gentleman will yield once again, it would seem to me that the agreement that was reached on Shelby-Lent fell apart when it was offered by the gentleman's amendment, because of the 25 kilogram notice, and somehow to say that now this amendment is against the spirit of Shelby-Lent is to defy the fact that the gentleman's amendment is against the spirit of Shelby-Lent.

Mr. FLORIO. Well, I would reclaim my time and just indicate that that is not my perception. I do not think that under any reasonable view that what was done in any way violates what Shelby-Lent accomplishes from 100 to 1,000 kilograms.

The gentleman's amendment does, in fact, substantially modify what Shelby-Lent has done between 100 and 1,000 kilograms; accordingly, I oppose it.

Mr. HILER. Mr. Chairman, will the gentleman yield further?

Mr. FLORIO. Certainly.

Mr. HILER. Reasonable men can disagree.

Mr. FLORIO. Yes.

Mr. RITTER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I think we should all recognize the irony here. To criticize the gentleman from Indiana for violating the spirit of Shelby-Lent, when the Florio amendment completely changes the meaning and the acceptability of Shelby-Lent, I would just like to point out to the Members who are here and those watching on television that if they think that their small business community is beyond Shelby-Lent as modified by Florio, I think they have got another guess coming. I urge them to check, because what Florio does to Shelby-Lent is to completely change its emphasis by adding the new requirements.

Let me point this out that while the amendment does change the amount of time that small business has to deal with certain quantities above the 100-kilogram threshold, those businesses also deal with substances below 100 kilograms and 25 kilograms and below as well.

I say to the gentleman from New Jersey that small businesses are going to be bollixed up by his amendment and perhaps the amendment of the gentleman from Indiana is relevant to simply give some time and additional capacity to deal with what is a very, very different charge coming out of Shelby-Lent as amended by Florio.

Mr. STENHOLM. Mr. Chairman, I move to strike the requisite number of words.

I will not take my entire 5 minutes, but I do want to clarify one major point of disagreement in this amendment.

I think in light of the Florio amendment, which passed, but which no one, at least not this Member, had strong opposition to the intent of—what we are now saying in the Hiler-Stenholm amendment is that we need additional time in order to implement the amendment of the gentleman from Missouri, which I certainly will support, in recognizing the need for education of our small businesses in order to comply with the much-needed environmental rules of this country today.

This amendment purely says that we have additional time for those many thousands of additional businesses that must now come into compliance with the Florio amendment to the Shelby-Lent amendment.

All we are saying is recognize the needed extra time to gain compliance and then everyone will comply with Shelby-Lent, as amended by Florio. It is strictly saying give time to the small businesses to come into compliance after being educated to the law.

Mr. ECKART. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Very briefly, what is trying to be passed off here as an amendment to protect small businesses really is a giant trapdoor through which the entire protection envisioned by this section would disappear. By extending waivers and extending time limits to over 2½ years to a business that can generate over 1 ton of hazardous waste a month, no longer is the debate around a few kilograms of waste a month, but generating almost 1 ton of waste a month would allow thousands of businesses that are generating untold amounts of hazardous waste to slip through a gigantic loophole for which this provision was never intended.

This is a mischievous amendment. It would do untold harm to the section. I urge its rejection.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Indiana (Mr. HILER) to the amendment offered by the gentleman from Alabama (Mr. SHELBY), as amended.

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. HILER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 218, noes 192, not voting 23, as follows:

[Roll No. 325]

□ 1650

Messrs. McCURDY, VOLKMER, and SCHEUER changed their votes from "aye" to "no."

Messrs. ALBOSTA, LEVITAS, MOODY, BARNARD, and ZSCHAU changed their votes from "no" to "aye."

So the amendment to the amendment, as amended, was agreed to.

The result of the vote was announced as above recorded.

The CHAIRMAN. For what purpose does the gentleman from New Jersey (Mr. FLORIO) rise?

Mr. FLORIO. Mr. Chairman, for the information of the body, it is the intention of myself and Mr. LENT to complete section 3, which would entail

two or three, I believe, noncontroversial amendments, and at that point to rise.

I thank the Chair.

AMENDMENT OFFERED BY MR. SKELTON TO THE AMENDMENT OFFERED BY MR. SHELBY, AS AMENDED

Mr. SKELTON. Mr. Chairman, I offer an amendment to the amendment, as amended.

The Clerk read as follows:

Amendment offered by Mr. SKELTON to the amendment offered by Mr. SHELBY, as amended: Page 5, line 20, after the period in paragraph 9 of the Shelby-Lent amendment insert: "There is authorized to be appropriated for purposes of this paragraph, $500,000 for each of the fiscal years 1984 through 1986".

Mr. SKELTON (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

PARLIAMENTARY INQUIRY

Mr. LENT (during the reading). Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. LENT. Mr. Chairman, have we had a vote on the Shelby-Lent amendment?

The CHAIRMAN. The Chair will inform the gentleman that that vote is still pending.

Mr. SKELTON. Very briefly, Mr. Chairman, this deals with the authorization of $500,000 to support the education.

I would like to propose two amendments to Mr. SHELBY and Mr. LENT's compromise.

I would like to amend that section requiring EPA to develop and implement a program to educate waste generators about their responsibilities. During a hearing held last week in my small business subcommittee, we found that all small businesses were concerned about the health of our environment and are willing to assume the responsibilities of proper disposal. Since most of these small quantity generators are mom and pop shops such as paint stores, drycleaning establishments, and service stations, most do not know they produce hazardous waste or how to properly dispose of it. Most will not know until they are either educated or caught for noncompliance and fined. That is why the education of waste generators is so important. I commend Mr. SHELBY and Mr. LENT for including instructions to the Administrator to educate these small businesses. But, I feel that in the case of small businesses, just having someone available is not enough. You have to publicize the requirements, you have to reach out and instruct them on what is required of them. For this reason I feel that $500,000 should be authorized to EPA for the establishment of a small quantity generator education program. With this money they could start a small program perhaps with seminars or newsletters or some effective means to inform small quantity generators about what will be expected of them and how to comply with the law. Without this program I am afraid that EPA will be unable to allocate staff and resources to get the job done.

While asking for compliance of laws placed on small businesses I feel it is equally our responsibility to provide for education of those requirements since most do not have easy access to the information they need to meet the requirements. The only time they will learn that they are breaking the law is when they are caught and punished. If we are going to hold them to these strict standards we owe it to them to provide them with the knowledge of what they are going to be expected to do.

□ 1700

Mr. FLORIO. Mr. Chairman, will the gentleman yield?

Mr. SKELTON. I yield to the gentleman from New Jersey.

Mr. FLORIO. I thank the gentleman for yielding.

Mr. Chairman, the gentleman's amendment is very important. It has already been referred to in previous discussions about educational opportunities for small businessmen.

Mr. Chairman, I accept the amendment.

Mr. BEDELL. Mr. Chairman, will the gentleman yield?

Mr. SKELTON. I yield to my friend from Iowa.

Mr. BEDELL. Mr. Chairman, for quite some time now, I have been involved with the Resource Conservation and Recovery Act. Throughout my involvement, I have worked to seek a reasonable balance between environmental protection and the special concerns of small generators of certain hazardous wastes.

In February of last year, the Small Business Committee's Energy and Environment Subcommittee, which I chaired at that time, held hearings on the subject of waste oil recovery. We sought to learn why more used oil is not being recovered in this country. A great amount of used oil is being burned indiscriminately, emitting harmful pollutants into the environment. This is particularly distressing considering the incredible potential for conservation by recycling this waste oil.

Recognizing the significant health and safety problems caused by improper disposal of waste oil, we investigated just what EPA was doing about this problem. Unfortunately, we discovered that EPA had not yet formulated certain waste oil regulations that were required by law to have been issued by October 1981. As you all know, EPA has yet to issue these regulations and, in fact, will not be required to issue them until 24 more months after this legislation we are discussing is enacted. That is 4 years later than the regulations were supposed to have been issued. In the meantime, EPA's failure to act promptly has left those in the waste oil reprocessing and lubricant manufacturing industries in limbo. Tens of millions of dollars in investments are being held up while the industry waits for EPA to issue its regulations. these businesses can play a vital role in our efforts to encourage the recycling of waste oil. It is a shame that they are being penalized by EPA's tardiness.

Everybody wants these regulations—the used oil recycling industry, the waste oil generators, State and local regulators, the Congress, and even other Federal agencies—everyone wants EPA to issue regulations and clarify what will be the Federal rules for proper handling and disposal of waste oil.

From our hearing, I became aware of a very important program at the National Bureau of Standards which is necessary for the encouragement of the recycling of waste oil in the United States. I feel it is in our best interests to continue the funding for this program.

Working together with Mr. WALGREN's Science and Technology Subcommittee, I sought the continuation of the program at NBS to set uniform test standards for re-refined waste oil. Recent environmental disasters, including the one involving dioxin in Missouri, demonstrated that the worst can happen if waste oil remains unregulated.

Last year, the administration proposed to discontinue the NBS research even though it was in its final and most crucial phase. Completion of this research, which includes base stock consistency, equivalency and verification studies, is of vital importance to the oil recovery industry and to the oil consuming public. Unless verification of crucial engine sequence tests is completed, past research and development tests will not be proven and past funding of $6.2 million will have been wasted.

I am pleased to report that the House Science and Technology Committee approved the NBS funding for the program until the end of fiscal year 1984, which is when the program is expected to be completed.

During the consideration of the RCRA bill last year, I engaged in a colloquy with Mr. FLORIO about the need to encourage the recycling of certain wastes with inherent value. At that

time, we agreed that when used oil collected by service stations is properly recycled and adequate invoice records are kept, these stations are not intended to be subject to additional reporting requirements under RCRA. I am pleased to see that this year's bill also recognizes the value of recyclable wastes and encourages their collection to the fullest extent possible.

The record last year showed that service stations do not function as generators in the usual sense with regard to used batteries and solvents. Many service stations employ commercial cleaning services that in most cases retain title to the materials and solvents that they use in cleaning the service station. As is the case with waste oil, it is the collectors of these waste products that will be deemed responsible for complying with the rules of RCRA. The service station need only keep a copy of the contract it has with a licensed collector or reprocessor, plus records of when and how much of the waste actually changes hands. I am glad to see that this is also the case in this year's bill.

I have been working on RCRA this year with Mr. FLORIO's subcommittee of the House Energy and Commerce Committee. It is important that we do not discourage the important role in the recycling process of service station operators by imposing burdensome recordkeeping requirements on them. Service stations, acting as collection points for used waste oil, batteries, and solvents, have shown their good faith by properly recycling these wastes and not disposing of them in an improper manner.

Additional pressure should be put on EPA by the committee to issue their long-awaited waste oil regulations. It is simply outrageous that we have had to wait this long.

I would also like to commend my colleague, Congresswoman MIKULSKI from Maryland, for her efforts regarding section 22 of this bill. Her efforts to encourage the recycling of used motor oil, while at the same time, minimizing the regulatory burden on the small generator who contracts for its proper disposal, are greatly appreciated. This constructive approach won the support of many in the small business community.

I must say that I am quite pleased with the final version of H.R. 2867. The bill strikes an appropriate balance between environmental protection and the needs of smaller generators of certain wastes. I would expect that EPA's rules for small quantity generators will include a short, one-page manifest requirement to minimize small businesses' notification requirements.

I want my colleagues to know that I plan to enter into a colloquy with Mr. FLORIO during the debate on the reauthorization of RCRA. We hope to clarify certain provisions of the bill regarding solvents, waste containers, and onsite burning of waste oil by service stations.

At present, some service stations use commercial space heating units to burn waste oil on premises. Two years after enactment of H.R. 2867, the EPA is required to: One, promulgate standards regulating facilities which burn hazardous waste; and two, develop standards for commercially marketed equipment like those space heaters. In the meantime, existing equipment can remain on the market. Once the standards are issued, older units may have to be upgraded or replaced.

We will also clarify the intent of H.R. 2867 to exclude the weight of containers which carried the waste when calculating the weight of the hazardous waste for regulatory purposes. This is a very important issue with many small quantity generators, and I am particularly thankful to Mr. FLORIO and his subcommittee staff for their cooperation on this and other matters.

In summary, there are three points I would like to make. First, we realize that the materials we are discussing here have already been identified as hazardous. Second, it is reasonable to expect in the final RCRA bill that all hazardous waste are to be disposed of in federally permitted facilities. And third, recordkeeping requirements must be kept at a minimum for small generators. Some degree of regulation is in the best interests of small quantity generators. Without a doubt, in the next decade, there will be many lawsuits against hazardous waste generators. It is important for small business to satisfy some Federal requirements to prove they have been complying with state-of-the-art methods to dispose of their waste.

Mr. Chairman, I urge the support of H.R. 2867 because it provides an excellent vehicle by which this country can govern the disposal of hazardous waste in a safe and sensible manner from "cradle to the grave". This bill shows that it is possible to balance environmental controls on the hazardous waste from small generators with acceptable regulatory and financial cost to small business.

Mr. SHELBY. Mr. Chairman, will the gentleman yield?

Mr. SKELTON. I yield to the gentleman from Alabama.

Mr. SHELBY. Mr. Chairman, I have no objection to the amendment to my amendment.

I urge its support.

Mr. LENT. Mr. Chairman, will the gentleman yield?

Mr. SKELTON. I yield to the gentleman from New York.

Mr. LENT. I thank the gentleman for yielding.

Mr. Chairman, we have no objection on this side and support the amendment.

PARLIAMENTARY INQUIRY

Ms. FIEDLER. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentlewoman will state her parliamentary inquiry.

Ms. FIEDLER. Mr. Chairman, some of the Members are on very tight schedules trying to catch planes and they were wondering whether or not the comments made a moment ago by the gentleman from New Jersey (Mr. FLORIO) meant they do not expect any further recorded votes between now and the conclusion of the session today.

The CHAIRMAN. The Chair will advise the gentlewoman that that is not an inquiry the Chair can answer.

The question is on the amendment offered by the gentleman from Missouri (Mr. SKELTON) to the amendment offered by the gentleman from Alabama (Mr. SHELBY), as amended.

The amendment to the amendment, as amended, was agreed to.

AMENDMENT OFFERED BY MR. SKELTON TO THE AMENDMENT OFFERED BY MR. SHELBY, AS AMENDED

Mr. SKELTON. Mr. Chairman, I offered an amendment, to the amendment as amended.

The Clerk read as follows:

Amendment offered by Mr. SKELTON to the amendment offered by Mr. SHELBY, as amended: Add the following new paragraph to the Shelby amendment:

"( ) The Administrator shall cause to be studied the existing manifest system for hazardous wastes as it applies to small quantity generators and recommend within 30 months of the date of enactment of the Hazardous Waste Control and Enforcement Act of 1983 whether the current system shall be retained or whether a new system should be introduced. The study shall include an analysis of the cost versus the benefits of the systems studied as well as an analysis of the ease of retrieving and collating information and identifying a given substance. Finally, any new proposal shall include a list of those standards that are necessary to protect human health and the environment.".

Mr. SKELTON (during the reading). Mr. Chairman, I ask unanimous consent that the amendment to the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. SKELTON. Mr. Chairman, I am offering an amendment to the Shelby-Lent amendment that I believe should be acceptable to most everyone. My amendment calls for the EPA to study and make recommendations whether to keep the current manifest system or establish a new manifest system.

I think this is vitally important to the integrity hazardous waste control. At the moment, we are creating so much paper and so much confusion that no one will know what to fill out, how to fill it out, and then who to give

it to. Once they are filed, my subcommittee has found in its investigations that it is virtually impossible to dig the information out of the hundreds of thousands of papers that are stored.

Keeping track of these wastes is very important. My subcommittee has heard from State governments, witnesses, and the CRS that there are better ways to keep track of such information. They are easier, less expensive, and provide the capability to retrieve and collate the required information quickly. Most importantly, if we are asking small businesses to comply with these new reporting requirements, we must come up with a system that they can use easily and that we can get information from quickly when needed.

I do not pretend to have the expertise to pick the best system for EPA. My amendment, which does not authorize any funds, merely directs the Administrator to conduct a search, if you will, for a better system that is easier to use, provides more benefits relative to the cost and still protects human health and the environment. There are such systems out there. This is not beyond our capability.

Mr. SHELBY. Mr. Chairman, will the gentleman yield?

Mr. SKELTON. I yield to the gentleman from Alabama.

Mr. SHELBY. I thank the gentleman for yielding.

Mr. Chairman, we have no objection to the amendment. We have read it.

Mr. LENT. Mr. Chairman, will the gentleman yield?

Mr. SKELTON. I yield to the gentleman from New York.

Mr. LENT. I thank the gentleman for yielding.

Did I understand the gentleman to say his amendment provides for a no-cost EPA study of the manifest system?

Mr. SKELTON. It calls for a study of the manifest system—I cannot say it is a no-cost.

Mr. LENT. Mr. Chairman, I have no objection. I think it is a good amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri (Mr. SKELTON) to the amendment offered by the gentleman from Alabama (Mr. SHELBY), as amended.

The amendment to the amendment, as amended, was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Alabama (Mr. SHELBY) as amended.

The amendment, as amended, was agreed to.

AMENDMENT OFFERED BY MRS. COLLINS

Mrs. COLLINS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mrs. COLLINS: Page 9, line 11, strike out the closing quotation marks and period.

Page 9, after line 11 insert:

"(9) Not later than 18 months after the enactment of the Hazardous Waste Control and Enforcement Act of 1983, the Administrator, in conjunction with the Secretary of Transportation, shall prepare and submit to the Congress a report on the feasibility of easing the administrative burden on small quantity generators, increasing compliance with statutory and regulatory requirements, and simplifying enforcement efforts through a program of licensing hazardous waste transporters to assume the responsibilities of small quantity generators relating to the preparation of manifests and associated recordkeeping and reporting requirements. The report shall examine the appropriate licensing requirements under such a program including the need for financial assurance by licensed transporters and shall make recommendations on provisions and requirements for such a program including the appropriate division of responsibilities between the Department of Transportation and the Environmental Protection Administration.".

Mrs. COLLINS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentlewoman from Illinois?

There was no objection.

Mrs. COLLINS. Mr. Chairman, Mr. FLORIO and his subcommittee are to be commended for attempting to address the improper disposal of hazardous waste by unregulated companies and individuals.

The Government Activities and Transportation Subcommittee, which I chair and of which Mr. MCGRATH is ranking minority member, has been holding oversight hearings on the enforcement of hazardous materials transportation regulations. We are aware of the grave need that exists for regulation of small quantity waste generators.

As currently written, H.R. 2867, reduces the threshold for manifest requirements from 1,000 kilograms-per-month to 100 kilograms-per-month. Now, this may sound like the easy answer, but in fact, it is not. This provision in H.R. 2867 is flawed because it is unenforceable.

Currently, 50,000 generators are regulated under RCRA. The proposed RCRA reauthorization would bring an additional 200,000 companies under regulation, a 400-percent increase in the size of the regulated community. The proposed legislation for regulating small-quantity generators gives no indication as to how the law is to be carried out.

My judgment is that the new class of regulated generators would clog the manifest system with an avalanche of paper. H.R. 2867, if unchanged, could hamper enforcement efforts. The manifest system is a valuable tool to the EPA and should be protected.

Studies have shown that in States which have laws with lower small-quantity thresholds on their books, compliance is lax. Most small-quantity generators are not even aware of the law. Those few who have no fear of it because enforcement is so weak.

Compliance with this bill's provisions will be difficult primarily because there is no industry in existence which is capable of the wastes of small-quantity generators that exists.

If the small-quantity generator provision is passed without amendment, thousands of additional inspectors to enforce the law will be needed. If these newly regulated companies complied with the law, the Government would be inundated with millions of notifications, manifests, annual reports, exception reports, inspection reports, et cetera.

Do we really intend to give EPA not only thousands of inspectors but also an army of clerks and a computer budget equal to that of the Social Security Administration? Are we really going to allow our many small business constituents to be harassed with the complex RCRA regulations with which even the largest corporations have difficulty in understanding and complying?

I am sure we intend nothing of the kind. We want to avoid writing yet another meaningless law—one that creates 200,000 violators and does nothing for the environment.

This amendment will help to make H.R. 2867 workable.

The amendment mandates the study of the feasibility of creating a class of licensed hazardous waste haulers to specialize in handling the waste of small-quantity generators. These licenses would be issued by EPA which would write regulations governing their issuance and withdrawal. These regulations would cover: First, the character of the hauler; second, bonding to assure compliance with the law; third, the condition of the vehicle; and fourth, requirements for knowledge of hazardous waste and the law.

The program I envision is that small-quantity generators would not be required to turn its waste over to a licensed hauler. However, by doing so, it would be relieved of complying with all other provisions of RCRA. Notifications, manifests, annual reports, and all other reports would be handled by the licensed hauler who would make the decision as to where to bring the waste. He would be responsible for keeping all records ordinarily maintained by the small-quantity generators.

This amendment is the necessary first step in creation of a class of licensed haulers who will have a vested interest in seeing that small-quantity

generators comply with the law. Haulers in turn will be bonded to insure that they comply with the law. In this way we regulate a few thousand haulers instead of a few hundred thousand small businesses. Although the small businessman will have to pay the cost of adequate disposal of his hazardous waste, he will be spared any other hassle.

I urge my colleagues to support the Collins-McGrath amendment.

Mr. McGRATH. Mr. Chairman, will the gentlewoman yield?

Mrs. COLLINS. I yield to the gentleman from New York.

Mr. McGRATH. Mr. Chairman, I thank the gentlewoman for yielding.

Mr. Chairman, I wish to echo the sentiments expressed by the distinguished chairwoman of the Government Activities and Transportation Subcommittee. The efforts of the gentleman from New Jersey, to improve public health and safety, through this legislation are commendable. I fully realize the difficulties in seeking the broad consensus necessary for approval of this legislation. Chairman FLORIO, and my colleague from New York, have persisted in this difficult task, to produce this important bill.

I would like to briefly comment, on the findings of our Government Operations Subcommittee, as they relate to the issue before us today. In a hearing held July 18, in New York, on hazardous materials transportation, which includes hazardous wastes, the fire marshall of Nassau County, made a comment I found most troubling. He stated that his office had been contacted on several occasions, to assist in handling spills, or other emergencies involving hazardous wastes. When asked to recommend a qualified firm to remove the material, he was at a loss to name one, and he replied, "There are 'people' in New Jersey who 'take care' of those problems."

In testimony provided by the National Tank Truck Carriers, for our Washington hearing on hazardous materials transportation, the Department of Transportation, is criticized for failing to enforce authority, over intrastate carriers of hazardous materials, particularly hazardous wastes, which are often handled by small firms, with lax safety compliance, and sometimes total disregard, for Federal transportation and environmental laws and regulations. Closer investigation—would probably show—that these firms do cross State lines.

Congress has given the Department of Transportation, authority to regulate these intrastate carriers, in the Hazardous Materials Transportation Act of 1975, however, it is not exercised. By designating the Department of Transportation as the enforcement arm for certain sections of the Resource Conservation and Recovery Act, the Environmental Protection Agency at least recognizes that a potential for serious environmental consequences exists if hazardous wastes are improperly handled, or illegally disposed, during transportation. A sound knowledge of the transportation industry, and familiarity with shipping documents, are needed to track the movement of hazardous wastes. Our staff investigators, have seen firsthand, the manner in which unscrupulous firms take wastes from a generator acting in good faith, illegally dump them, and substitute similar materials, which are disposed under the original generator's manifest. This type of abuse must be halted, and a coordinated effort by DOT and the EPA, must be undertaken to address the situation.

Until our investigation was initiated, EPA had not even provided its list of waste carriers to DOT, even though the latter agency was supposed to play a major role in enforcement effort. This failure to provide the most basic inforcement tool, a list of regulated firms, was inexcusable.

Our amendment is aimed at establishing a higher standard in the waste disposal industry to protect the public. The language before us, is not strong as I would have liked; but it is an attempt to get the EPA and DOT to realize and address their responsibilities to protect the public, while hazardous wastes are transported.

While both agencies will say that the States have enforcement capabilities, and regulations, to bolster Federal efforts, a look at the industry, and compliance with State laws, indicates a strong Federal presence is necessary, if we are serious about solving the problems caused by illegal transporters.

Again, referring to our subcommittee hearing, the chairman of the New York State Senate Select Committee on Crime, brought out a typical example of the interstate nature of hazardous waste transportation. A load of a chemical known as MEK or methyl ethyl ketone began a trip from New Jersey, to a West Virginia disposal site, according to the shipping manifest, required under Federal and State law. That truck mysteriously wound up in a Long Island parking lot, where it overturned with the hatch covers opened, in the middle of the night. The chemical polluted Long Island's aquifer, the sole source of drinking water for nearly 3 million people. For those of you unfamiliar with the geography of the Northeast it was necessary to go approximately 50 miles east from New Jersey, crossing three bridges to reach Long Island, and that same trip would have to be repeated, to get back on the road to West Virginia.

This is only one example, of incidents uncovered during our investigations, which covered Baltimore, Chicago, and the New York metropolitan area, and it underscores the need for continued Federal involvement.

No enforcement mechanism is perfect, however, the EPA and DOT have a lot of work to do, to improve the current situation. I hope our amendment will emphasize—what I see as a need for greater supervision over transporters of hazardous wastes.

Mr. FLORIO. Mr. Chairman, will the gentlewoman yield?

Mrs. COLLINS. I yield to the gentleman from New Jersey.

Mr. FLORIO. Mr. Chairman, the gentlewoman's study which is authorized here is very important. It is something that we have discussed.

Mr. Chairman, I support it and I urge support for the amendment.

Mrs. COLLINS. I thank the gentleman.

Mr. LENT. Mr. Chairman, will the gentlewoman yield?

Mrs. COLLINS. I yield to the gentleman from New York.

Mr. LENT. Mr. Chairman, I thank the gentlewoman for yielding.

Mr. Chairman, we have no objection and accept the amendment.

Mrs. COLLINS. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentlewoman from Illinois (Mrs. COLLINS).

The amendment was agreed to.

The CHAIRMAN. Are there further amendments to section 3?

Mr. FLORIO. Mr. Chairman, I have no further amendments to section 3.

Mr. CHAIRMAN. The Clerk will read section 4.

The Clerk read as follows:

INTERIM CONTROL OF HAZARDOUS WASTE INJECTION

SEC. 4. (a) NEW SECTION 7010.—Subtitle G is amended by adding the following new section at the end thereof:

"INTERIM CONTROL OF HAZARDOUS WASTE INJECTION

"SEC. 7010. (a) UNDERGROUND SOURCE OF DRINKING WATER.—No hazardous waste may be disposed of by underground injection—

"(1) into a formation which contains (within one-quarter mile of the well used for such underground injection) an underground source of drinking water; or

"(2) above such a formation.

The prohibition established under paragraph (2) shall not apply if the person injecting such hazardous waste establishes to the satisfaction of the Administrator, or the State in the case of a State which has assumed primary enforcement responsibility under the Safe Drinking Water Act (title XIV of the Public Health Service Act) for enforcement of such prohibition, that the injection will not cause hazardous waste to migrate into drinking water sources or otherwise endanger drinking water sources. The prohibitions established under this subsection shall take effect six months after the enactment of this section except in the case of any State in which identical prohibitions are in effect before such date under the Safe Drinking Water Act.

"(b) ENFORCEMENT.—Except as provided in subsection (c), the prohibitions established under subsection (a) shall be enforced by the Administrator under section 3008 and 7003 of this Act and shall be treated (for purposes of section 7002) as requirements which have become effective pursuant to this Act.

"(c) SAFE DRINKING WATER ACT.—The prohibitions established under paragraphs (1) and (2) of subsection (a) shall be enforceable only under the Safe Drinking Water Act in any State—

"(1) which has adopted indentical prohibitions under part C of the Safe Drinking Water Act and which has assumed primary enforcement responsibility under that Act for enforcement of such prohibitions; and

"(2) in which the Administrator has adopted identical prohibitions under the Safe Drinking Water Act and is exercising primary enforcement responsibility under that Act for enforcement of such prohibitions.

"(d) The terms 'primary enforcement responsibility', 'underground source of drinking water', 'formation' and 'well' have the same meanings as provided in regulations of the Administrator under the Safe Drinking Water Act.".

(b) TABLE OF CONTENTS.—The table of contents for such subtitle G is amended by inserting the following new item at the end thereof:

"Sec. 7010. Interim control of hazardous waste injection.".

Mr. FLORIO (during the reading). Mr. Chairman, I ask unanimous consent that section 4 be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. FLORIO. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. BARNARD, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 2867) to amend the Solid Waste Disposal Act to authorize appropriations for the fiscal years 1984 through 1986, and for other purposes, had come to no resolution thereon.

APPOINTMENT AS MEMBERS OF DELEGATION TO ATTEND CONFERENCE OF INTERPARLIAMENTARY UNION IN SEOUL, REPUBLIC OF KOREA

The SPEAKER. Pursuant to the provisions of 22 U.S.C. 276A-1, as amended by Public Law 95-45, the Chair appoints as members of the delegation to attend the Conference of the Interparliamentary Union to be held in Seoul, Republic of Korea on October 4 through October 12, 1983, the following Members on the part of the House:

Mr. PEPPER of Florida, chairman;
Mr. HAMILTON of Indiana, vice chairman;
Mr. HAWKINS of California;
Mrs. BOGGS of Louisiana;
Mr. LEVITAS of Georgia;
Mr. HALL of Ohio;
Mr. SMITH of Florida;
Mr. PRITCHARD of Washington;
Mr. HYDE of Illinois;
Mr. MCGRATH of New York;
Mr. BATEMAN of Virginia; and
Mr. BOEHLERT of New York.

ADDITION OF NAME OF MEMBER AS COSPONSOR TO H.R. 1758

Mr. CLAY. Mr. Speaker, I ask unanimous consent that my name be added as a cosponsor to H.R. 1758.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

PERSONAL EXPLANATION

(Mr. EDGAR asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EDGAR. Mr. Speaker, on Monday, August 1, 1983, I was unavoidably absent when the House was considering H.R. 1646, the Railroad Retirement Solvency Act of 1983. Had I been present, I would have voted in favor of this important legislation, which averts a drastic benefit cut by means of a compromise between rail labor and management to insure the solvency of railroad retirement.

H.R. 1646 is crucial for preserving the retirement benefits of many senior citizens and the future benefits of railroad employees; I would have joined the vast majority of my colleagues in voting for it.

PROVIDING FOR CONSIDERATION OF H.R. 3520, EXTENDING AND IMPROVING THE REHABILITATION ACT OF 1973

Mr. BONIOR of Michigan. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 283 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 283

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3520) to extend and improve the Rehabilitation Act of 1973, to provide for the operation of the Helen Keller National Center for Deaf-Blind Youths and Adults, to create a select commission on Federal assistance to disabled Americans, and to increase certain authorizations of appropriations for programs within the jurisdiction of the Committee on Education and Labor, and the first reading of the bill shall be dispensed with. All points of order against the bill for failure to comply with the provisions of section 303(a)(4) and section 402(a) of the Congressional Budget Act of 1974 (Public Law 93-344) are hereby waived. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Education and Labor, the bill shall be read for amendment by titles instead of by sections, and each title shall be considered as having been read. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

□ 1710

The SPEAKER. The gentleman from South Carolina (Mr. DERRICK) is recognized for 1 hour.

Mr. DERRICK. Mr. Speaker, I yield the customary 30 minutes, for the purposes of debate only, to the gentleman from Tennessee (Mr. QUILLEN), and pending that, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 283 is an open rule providing for the consideration of H.R. 3520, a bill to extend and improve the Rehabilitation Act Extension of 1973, to provide for the operation of the Helen Keller National Center for Deaf-Blind Youths and Adults, to create a select commission on Federal assistance to disabled Americans, and to increase certain authorizations of appropriations for programs within the jurisdiction of the Committee on Education and Labor. The rule provides for 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on Education and Labor. It also provides that the bill shall be read for amendment by titles instead of by sections, and each title shall be considered as having been read.

House Resolution 283 also waives points of order against consideration of H.R. 3520 for failure to comply with section 303(a)(4) or section 402(a) of the Congressional Budget Act of 1974. Section 303(a)(4) of the budget act prohibits consideration of a bill providing new budget authority which becomes effective in a fiscal year for which the first concurrent resolution on the budget has not been adopted. H.R. 3520 is technically in violation of this section because the level of the basic vocational rehabilitation state grant entitlement is increased in fiscal year 1985 and the 3 subsequent years and these increases technically constitute new entitlements for these years.

Section 402(a) of the Budget Act prohibits consideration of bills or resolutions authorizing appropriations for a fiscal year unless the legislation is

reported by May 15 prior to the start of that fiscal year. Since H.R. 3520 authorizes appropriations for fiscal year 1984 but was not reported by the Committee on Education and Labor until July 14, 1983, section 402(a) must be waived to allow consideration of this legislation.

Finally, House Resolution 283 provides for one motion to recommit.

Mr. Speaker, H.R. 3520 extends and revises a number of Federal efforts to help provide vocational rehabilitation services for handicapped Americans. Central to these efforts is the basic program of grants to States. These grants have helped State agencies provide a broad range of rehabilitation services since the adoption of the Smith-Fess Act in 1921. I know of few programs which have so completely fulfilled the potential for a true partnership between Federal and State Governments, and few programs which have provided as much benefit to the citizens of this Nation. H.R. 3520 extends the authorization for this State grant program for 5 years and increases the funding level to $1.04 billion in fiscal year 1984 and to $1.43 billion by fiscal year 1988.

Besides providing for the extension of this State grant program and for a number of other rehabilitation programs, H.R. 3520 institutes steps to improve the Federal effort in the rehabilitation area by establishing a national commission to review and make recommendations to the President and Congress on the whole array of Federal programs which assist persons with disabilities.

The bill also removes the national council on the handicapped from the administrative jurisdiction of the Department of Education so that the council will be better able to meet its congressional mandate to serve as an independent source of advice to the President and Congress on all matters in the Government affecting handicapped individuals.

In addition to these and other provisions relating to Government efforts to assist individuals with disabilities, H.R. 3520 increases the authorization level for fiscal year 1984 for a number of other programs within the jurisdiction of the Committee on Education and Labor.

Mr. SPEAKER, I think most members know there has been some controversy over whether the amendment to increase the authorization levels for these programs was properly considered and reported by the Committee on Education and Labor. I do not want to get into that controversy except to point out that it is not relevant to the rule we are considering here today. The controversy concerned an amendment to H.R. 2461, while this rule provides for the consideration of H.R. 3520 which, without question, has been properly considered and reported by the Committee on Education and Labor.

Mr. Speaker, I hope my colleagues will confine themselves here to the merits of this rule and adopt House Resolution 283 so that the House may proceed to the consideration of the important substantive policies addressed in H.R. 3520.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the rehabilitation section of this bill is most important. We all know that we must take care of those who need help, and we should always lend a helping hand. We must always be human, we must always be considerate. Nothing should be spared in this regard.

However, there are other sections of the bill which need a lot of scrutiny. For instance, the whole cost of this bill, when it is debated on the floor, should it pass, is $3.4 billion over the President's request—budget busting—to say the least.

I think it can be honed into a useful bill we all can support. It is controversial, and I sense that there is some controversy developing on the rule.

For that reason, I yield 5 minutes to the gentleman from Illinois (Mr. ERLENBORN).

Mr. ERLENBORN. Mr. Speaker, I would like to take this opportunity to inform my colleagues about H.R. 3520.

H.R. 3520 reauthorizes the Rehabilitation Act which is due to expire September 30, 1983. If the sole purpose of H.R. 3520 had been to extend rehabilitation programs which assist handicapped Americans achieve more independence, enter our work force, and become taxpayers, this bill may have already passed the House. In fact, it may have already been signed into law by the President. However, the inclusion of title IV in H.R. 3520 under the euphemism "Other Authorizations, Modification of Certain Reconciliation Act limits," threatens the timely enactment of the Rehabilitation Act reauthorization. We may be dangerously close to October 1, or even passed that date before we have final resolution on this measure.

Title IV increases the fiscal year 1984 authorization ceilings for 10 programs, totally unrelated to rehabilitation, by about $1.6 billion over the fiscal year 1984 ceilings for these programs set in the Omnibus Reconciliation Act of 1981. The 10 programs in title IV of H.R. 3520 are: Chapter I of ECIA, (Education Consolidation and Improvement Act), impact aid, education for the handicapped, vocational education, adult education, arts and humanities, museum services, low-income energy assistance, and WIC (women, infants and children feeding program). The combined increase for fiscal year 1984 for these 10 programs represents 15 percent more than their fiscal year 1983 appropriations. Compared to the combined fiscal year 1984 level for these programs in the Omnibus Reconciliation Act, the increase represents a 17 percent jump. Since the Congressional Budget Office estimated that approximately a 5-percent inflation factor should be used to calculate the maintenance of current levels for function 500 programs in fiscal year 1984, a 15- to 17-percent increase appears excessive. OMB Director Stockman concurs. He indicated in a letter of July 12, 1983, that if the Rehabilitation Act reauthorization bill contains title IV, he will recommend that the President not sign it.

The inclusion of title IV in H.R. 3520 establishes a negative precedent that we should not tolerate or condone, a negative precedent which transcends a threat to the Rehabilitation Act, and a negative precedent that challenges the integrity of the legislative process and the institutional order of this House. If we allow title IV to remain in H.R. 3520, we will be saying that:

It is no longer necessary to consider programs on their individual merits when the aim is to increase authorization ceilings of several programs.

Challenges to germaneness may be put aside if a legislative vehicle is available for expeditious consideration of such increases.

It is appropriate to use every means available to restore the pre-1974 power of the authorizing committees, and to circumvent the constraints imposed by the Congressional Budget Act.

As Members of this House, we must work together to insure that programs continue to be considered on their individual merits, that omnibus legislation remains a special-case legislative vehicle; and that provisions of the Budget Act be honored and preserved.

During its 63-year history the Rehabilitation Act has benefited from strong bipartisan support. Republicans and Democrats have recognized its cost effectiveness and its value in human terms.

It is very refreshing to me when Republicans and Democrats can work in a spirit of bipartisan cooperation on a piece of legislation. Such cooperation was reflected in the subcommittee markup of the reauthorization of the Rehabilitation Act. I was very distressed, however, when that spirit was disregarded in a cavalier fashion by the unwarranted addition of title IV, accomplished through a blatantly partisan rollcall vote in full committee. Later when objections were raised to title IV on grounds of nongermaneness, the legislation was reintroduced with title IV, so that objections based on nongermaneness could no longer be raised.

We have a responsibility, and an obligation to restore H.R. 3520 to its original intent by striking title IV. The open rule that is before us today will

allow us to do just that. States receive 80 percent of their rehabilitation funds through Federal appropriations. If we do not strike title IV from H.R. 3520, State Vocational Rehabilitation Agencies, that serve 1 million handicapped Americans a year, will be faced with an unparalleled fiscal crisis on October 1 of this year. I do not want that on my conscience. Do you? When H.R. 3520 is up for floor consideration, I hope you will support an amendment to strike title IV.

□ 1720

Mr. DERRICK. Mr. Speaker, I yield 5 minutes to the gentleman from Oklahoma (Mr. JONES) for purposes of debate only.

Mr. JONES of Oklahoma. I thank the gentleman for yielding this time to me.

Mr. Speaker, I would like to take this opportunity to discuss the importance of the point of order under the Budget Act which would apply to H.R. 3520 if it were not waived by this rule.

My concern, and that of other Members, is that the bill violates a seldom-waived provision of the Budget Act, section 303(a)(4). This section is designed to enhance Congress control over spending by prohibiting the creation of new entitlement programs or an increase in existing entitlement programs for future fiscal years. The theory of this provision is that Congress should not lock in new entitlements before it has decided on a budget plan in some future year, because to do so would further reduce the area of budget control we have over the appropriations process.

Mr. Speaker, this provision is so important that it has rarely been waived in the history of the Budget Act. The situations in which the budget committee has supported these waivers fall into 4 categories:

First, technical waivers to allow an amendment to be offered which cures the Budget Act violation;

Second, waivers for certain agriculture bills because the peculiarities of price support programs, which relate to crop years rather than fiscal years, make technical compliance impossible;

Third, waivers for legislation for a fiscal year in which the House has adopted the budget resolution but where final action on the conference report has been delayed; and

Fourth, waivers for entitlement legislation which due to its nature requires leadtime for regulations to be developed implementing the program or for legislation which in total cost actually reduces entitlement spending in future fiscal years.

But in all cases in which the Budget Committee has supported waivers of section 303(a)(4) the spirit of the provision has been adhered to. Regrettably, H.R. 3520 falls outside the spirit of the above exceptions.

To put my concern in perspective, and why we are concerned in this particular instance, approximately three-quarters of Federal spending is uncontrollable by the annual budget and appropriations process. Entitlement and other mandatory programs constitute the bulk of that amount. The remaining one-quarter of Federal spending is the only portion which Congress controls through its annual appropriations process, and half of that amount is devoted to national defense. As presently drafted, H.R. 3520 would increase the so-called uncontrollable portion of the budget by expanding an entitlement in the future years.

I am very supportive of the vocational rehabilitation program and recognize the positive influence it has had on handicapped individuals throughout the country. In fact, the recently adopted budget resolution provides substantial increases over amounts provided in fiscal year 1983 in budget authority for programs which assist the handicapped. However, H.R. 3520 expands this entitlement program for each of the next 3 fiscal years by approximately twice the increases in the Consumer Price Index assumed in the budget resolution. Therefore, increases in entitlement spending beyond congressional control would be built into the spending base for fiscal year 1985 through 1988. Therefore I oppose this rule because of the Budget Act waiver.

But, if the rule is adopted I will be offering an amendment for myself and several members of the Budget Committee to H.R. 3520 which would make the bill consistent with the Budget Act and the assumptions contained in the recently adopted budget resolution.

Mr. QUILLEN. Mr. Speaker, this measure is so important to the handicapped people of this Nation, I hope that the bill itself can be honed into a satisfactory measure where it can be signed into law.

With that in mind, keep in mind, all of you, that it is an open rule; that these controversies can be debated on the floor of the House when the measure is taken up.

At this time, Mr. Speaker, I yield 5 minutes to the gentleman from Texas (Mr. BARTLETT).

Mr. BARTLETT. Mr. Speaker, I rise with a certain urgency to call to the attention of this House the dangerous precedent that would be set by the adoption of title IV in the Rehabilitation Act. I suppose the rule may be technically correct to put title IV in order, but in fact title IV would be setting an extremely dangerous precedent for this House and would be jeopardizing the lives of approximately 1 million Americans who could be and would be otherwise assisted by the Rehabilitation Act.

What title IV does is to impose 10 unrelated other programs of additional spending of $1.3 billion, programs that are totally unrelated to the Rehabilitation Act, even though the act itself spends less than $1 billion in authorizations.

I might bring the House up to date. As we all know, the Rehabilitation Act itself is a 63-year-old piece of legislation that has served this country well, that is bipartisan, that, until this session, has always been bipartisan in nature.

The Rehabilitation Act serves over 1 million Americans who are disabled and it assists them in leading productive and satisfying lives in getting back into the work force. It has a 25-percent-plus effective rate in bringing people back into productive lives.

When this bill comes before the House, there will be an attempt, there will be a necessity, to strike title IV from the bill. If title IV is left in the bill, it indeed threatens the passage of the 63-year-old bipartisan Rehabilitation Act. There is no question in my mind or anyone's mind that the Rehabilitation Act would already have been passed and signed into law.

□ 1730

It was passed out of committee in May and we are still dealing with it and now we have to put off until after the recess. There is no doubt that those 1 million Americans would have been saved if it were not for the inclusion of the extraneous, though perhaps technically germane nature of title IV.

What is especially sad, Mr. Speaker, is that the Rehabilitation Act contains no forward funding, so if this House is still debating and the Congress has not acted and we do not have the Rehabilitation Act enacted into law, October 1, those 1 million Americans will not have forward funding and will not be included in the law at that point.

Further, Mr. Speaker, title IV in this act in its present form violates both the intent and the letter, as the chairman of the Budget Committee has said, of the Budget Act. If at any time the House wishes, for example, to increase funding for museum services or community services or any of the other 10 programs, this House could do so at any time with ample opportunity, but we should not do so at the expense of disabled Americans.

Most importantly, Mr. Chairman, not as important as the jeopardy of a rehabilitation act, but this House needs to consider the dangerous legislative precedent that would be set here, because if title IV is not removed from the bill, then any committee with a shifting majority from day to day could simply adopt nongermane additions to any bill before that committee, pass it out of committee in a nongermane form and then reintro-

duce the bill, technically germane, containing clearly extraneous matter.

If you believe in the Rehabilitation Act, if you believe that this Nation can and ought to continue to help those 1 million disabled Americans per year that this act helps, if you believe in the legislative process of this House, I would urge this House to strike title IV when this bill comes before it.

Mr. QUILLEN. Mr. Speaker, I have no further requests for time, and I reserve the balance of my time.

Mr. DERRICK. Mr. Speaker, I yield 4 minutes to the gentleman from Pennsylvania (Mr. MURPHY).

Mr. MURPHY. Mr. Speaker, I ask support for the rule providing for the consideration of H.R. 3520, the Rehabilitation Act Amendments of 1983.

The purpose of this measure is to extend and strengthen existing programs under the Rehabilitation Act that have proven themselves extraordinarily successful. In the case of the basic State grant program—which is a capped entitlement—our chief objective is to restore a level of funding which more adequately meets the needs of millions of disabled persons who wish to be taken off of support roles and put onto employment roles.

Congress has been consistent in its bipartisan support for the vocational rehabilitation program, throughout its 63-year history. In the past 2½ years, with help from both sides of the aisle, we have rejected proposals to put the program into a block grant and have maintained its funding, rather than decreasing it by as much as 30 percent, as the administration proposed.

But we must recognize that we have lost ground over the past several years, and that the number of handicapped persons we were able to rehabilitate last year was actually lower than it has been in 14 years. Since 1979, the loss in purchasing power of this program—due to both inflation and actual cuts, including sharp reductions in the SSI and SSDI rehabilitation dollars available to the program—has been more than 31 percent.

In addition, the last two times it has renewed this legislation, Congress has made the rehabilitation of the most severely handicapped a priority. It cost 2½ times as much to rehabilitate a severely handicapped individual. Because persons with severe handicaps are more dependent on public support and far less likely to find employment without rehabilitation services, it is important to maintain this priority. But, we must also provide adequate resources so the law may be implemented as Congress intended—so that handicapped persons need not be placed on indefinite waiting lists for services, or be told that there are only enough funds to purchase services for those with the most severe handicaps, as is happening in Pennsylvania and many other States today.

Since fiscal year 1979, the drop in both severely and nonseverely handicapped cases being served shows a clear decline in States' ability to serve eligible applicants. In an effort to reverse that decline, the funding levels for the basic State grant program in H.R. 3520 phase in, over a 4-year period, the amounts necessary to restore the purchasing power the program had in fiscal year 1979.

As it has been since 1954, this program remains a capped entitlement, with specific ceilings set by Congress. To the best of my knowledge, in only 3 years since 1954—years in which there were continuing resolutions—has Congress failed to provide the full amount of the entitlement. This would indicate a strong recognition of the extremely important Federal responsibility in this area.

The entitlement provision enables State legislatures—including those with biennial sessions—to plan their budgets to match these Federal dollars. It also allows the State to work with its private and public agencies to develop the capacity to serve the State's handicapped population. Without the knowledge of funding availability over an extended period of time, planning—the most critical element in the effective delivery of services to persons with handicaps—is not possible.

The 1980 census shows that more than 12 million adult Americans describe themselves as having a work disability; about 8 million of these persons are not working. Yet nationwide, the vocational rehabilitation program last year was able to provide services to fewer than 1 million of these potentially employable persons. I would ask my colleagues to consider the wasted human potential, as well as the cost to all forms of government represented by these figures, when we know that the total cost of the entire rehabilitation program is repaid within 4 years, and that the benefits in terms of client earnings are more than $10 for every $1 expended.

Although there have been objections raised to provisions of this resolution it is subject to votes on any amendment. I ask support for this rule and for the provisions of H.R. 3520, in order that we may reverse the downward spiral of available rehabilitation resources for the many Americans who need them.

Mr. DERRICK. Mr. Speaker, I yield 2 minutes to the gentleman from Kentucky (Mr. PERKINS).

Mr. PERKINS. Mr. Speaker, I rise in support of the rule for consideration of H.R. 3520. This legislation has two purposes: To extend the Rehabilitation Act and to raise the authorization of appropriations for certain other education and social programs to conform them to the budget resolution.

Mr. Speaker, for both of these reasons, this legislation is absolutely essential. First, we must extend the Vocational Rehabilitation Act beyond this fiscal year so that we might continue helping disabled Americans become employable. Currently this program serves over 226,000 disabled persons, over half of whom are severely disabled. Vocational rehabilitation is also one of the most cost-effective Federal programs; for each dollar spent, we get a return of approximately $11 from each individual who becomes employed.

So, it is vital that we sustain and expand this program in future years, since right now we are serving only about 1 of 20 disabled Americans.

Second, it is crucial that we raise the authorization ceilings for 10 of the programs within the jurisdiction of the Committee on Education and Labor, if we are to carry out the budget resolution already adopted by both Chambers.

The first concurrent budget resolution for fiscal year 1984 includes additional funding of $1 billion for education programs. It also calls for increases in other social programs under the Education and Labor Committee's jurisdiction. However, unless we take further action to raise these authorizations, the Appropriations Committee will not be able to provide additional funding for many of these programs.

This is because of the Omnibus Budget Reconciliation Act of 1981, known as "Gramm-Latta II," placed limits on the authorizations for certain programs for fiscal years 1982, 1983, and 1984. In general, these limits allowed for little or no growth above the 1982 funding levels, and in some cases were lower than actual spending in previous years.

The provision which I added to this bill would authorize the following amounts for the following 10 programs:

Chapter 1 program for disadvantaged children: $3,830,000,000.

Education for the handicapped: $1,500,000,000.

Impact aid: $505,000,000.

Vocational education: $825,000,000.

Adult education: $112,000,000.

Arts and humanities: $273,900,000.

Museum services: $10,800,000.

Community services: $398,000,000.

Low-income energy assistance: $2,250,000,000.

Special feeding program for women, infants, and children: $1,360,000,000.

All of these are worthy programs that deserve a fair share of the increases targeted in the budget resolution. But without this provision, we cannot fulfill our commitment to restore the funds that were cut from these programs, and the budget resolution will be an empty shell. Without this provision, the hands of the Appro-

priations Committee will be tied by the ropes of Gramm-Latta II.

I urge my colleagues to join with me in supporting this open rule, so that we might steer this necessary piece of legislation to passage.

□ 1740

Mr. DERRICK. Mr. Speaker, I have no further requests for time and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 251, nays 137, not voting 45, as follows:

□ 1750

Messrs. PHILIP CRANE, ANDREWS of Texas, CAMPBELL, SAWYER, GEPHARDT, and YOUNG of Florida changed their votes from "yea" to "nay."

Mr. TAUZIN changed his vote from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 3502

Mr. PETRI. Mr. Speaker, I ask unanimous consent that my name be removed as a cosponsor of H.R. 3502.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

PROVIDING FOR CONSIDERATION OF H.R. 3391, TRADE ACT OF 1974 AMENDMENTS

Mr. LONG of Louisiana. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 299 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 299

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3391) to improve worker training under the Trade Act of 1974, and for other purposes, the first reading of the bill shall be dispensed with, and all points of order against the bill for failure to comply with the provisions of sections 401(b)(1) and 402(a) of the Congressional Budget Act of 1974 (Public Law 93-344) and clause 5(a) of rule XXI are hereby waived. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means, the bill shall be considered as having been read for amendment under the five-minute rule. No amendment to the bill shall be in order except the following amendments: (1) amendments recommended by the Committee on Ways and Means, which shall not be subject to amendment except the amendment printed in the Congressional Record of September 12, 1983, by, and if offered by, Representative Frenzel of Minnesota, which shall be debatable for not to exceed thirty minutes, to be equally divided and controlled by Representative Frenzel and a Member opposed thereto, and all points of order against the amendments recommended by the Committee on Ways and Means now printed on page 9 of the bill for failure to comply with the provisions of clause 5(a), rule XXI are hereby waived; (2) the amendments printed in the Congressional Record of September 12, 1983, by, and if offered by, Representa-

tive Frenzel of Minnesota, and said amendments shall not be subject to amendment but shall each be debatable for not to exceed thirty minutes, to be equally divided and controlled by Representative Frenzel and a Member opposed thereto. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

□ 1800

Mr. FRENZEL (during the reading). Mr. Speaker, I ask unanimous consent that the resolution be considered as read and printed in the RECORD.

The SPEAKER. The Chair will advise the gentleman that the Clerk is reading the resolution and he has to presume that other Members are reading the resolution along with him. Some of them probably out loud.

Mr. FRENZEL. Mr. Speaker, I withdraw my unanimous-consent request.

The SPEAKER. The gentleman from Louisiana (Mr. LONG) is recognized for 1 hour.

Mr. LONG of Louisiana. Mr. Speaker, as is the custom, I yield 30 minutes, for the purpose of debate only, to the gentleman from Tennessee (Mr. QUILLEN), and pending that, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 299 provides for the consideration of H.R. 3391, the worker and firm trade adjustment assistance program. Trade adjustment assistance has provided important aid over the years to workers and firms which have been directly and adversely affected by changes in U.S. trade policy resulting in increased imports or in the relocation of U.S. firms abroad.

To proceed to the consideration of H.R. 3391 in an orderly and efficient manner, House Resolution 299 provides for a modified closed rule, allowing 1 hour of general debate. After debate has ended, the bill will be considered under the 5-minute rule and is to be considered as read.

The Committee of the Whole will then consider amendments to be offered by the Committee on Ways and Means. Although the rule does not specify the order of consideration of amendments, under the rules of the House, committee amendments are the first item of business in the amendment process.

Under the rule, the Ways and Means Committee amendments will not be subject to amendment themselves except by an amendment offered by Representative FRENZEL and printed in the CONGRESSIONAL RECORD of September 12, 1983. This amendment maintains the special account in section 7 of the bill, but reduces the funding provided. The Frenzel amendment will be debatable for 30 minutes. The time will be equally divided between Representative FRENZEL and a Member who is opposed.

House Resolution 299 makes in order additional amendments to be offered by Representative FRENZEL and printed in the RECORD on September 12, 1983. Representive FRENZEL testified before the Rules Committee that he wished to offer three additional amendments. Each of these is an amendment to the bill, rather than to the committee amendments. They include an amendment which deletes the special account in section 7 of the bill and replaces it with a direct authorization; an amendment which also deletes the special account and replaces it with a direct authorization, but retains the existing entitlement with respect to cash benefits; and an amendment which expands eligibility to workers in secondarily impacted firms. None of these amendments is amendable. Each shall be debated for a period of time not to exceed 30 minutes, and again, the time will be equally divided and controlled by Representative FRENZEL and a Member who is opposed.

In addition, the rule waives section 401(b)(1) of the Congressional Budget Act, which prohibits new entitlement authority from taking effect prior to October 1 of the year in which the bill is reported. Section 1 of the bill would amend secton 222 of the Trade Act of 1974 to expend the coverage of workers who may be certified as entitled to receive entitlement payments. An expansion of an existing entitlement creates new entitlement authority for purposes of the Budget Act. Therefore, since the bill was reported in calendar year 1983 and since the provision technically could be effective prior to the first day of fiscal year 1984, the bill would violate section 401(b)(1) of the Congressional Budget Act.

The rule further waives section 402(a) of the Budget Act which prohibits the consideration of authorizing legislation if that measure is not reported by May 15 of the calendar year preceding the fiscal year in which it is to be effective. Various sections of the bill would authorize the enactment of new budget authority for fiscal years 1983 and 1984. Since the bill was not reported by the May 15 deadline for either fiscal year, it would violate section 402(a) of the Budget Act.

The rule waives all points of order against the bill for failure to comply with clause 5(a), rule XXI, which prohibits appropriations in a legislative bill. The waiver is necessary because section 7 provides for a special account into which revenues from Customs duties will be appropriated. Also, section 9 sets up an account into which loan repayments from firms will be paid. Therefore, this is considered an appropriation and requires a waiver. In addition, the bill waives points of order against both the Ways and Means Committee amendments and amendments to be offered and printed in the RECORD by Representative FRENZEL to these committee amendments, for violations against clause 5(a), rule XXI. The waiver against the amendments is necessary because they change the amount of appropriations contained in section 7 of the bill.

Finally, the rule provides for one motion to recommit.

Mr. Speaker, H.R. 3391 extends the authorization of the trade adjustment assistance program for workers and firms for 2 years, and it shifts emphasis of the program toward worker retraining.

The bill extends benefits to two new groups of workers—to those who have been laid off from firms supplying key inputs to import-damaged industries, and to those who lost their jobs due to the relocation of production overseas.

The bill further encourages greater participation in retraining programs by creating an elective voucher system to pay for on-the-job training by adding supplemental assistance of $15 a day for workers in training who are not eligible for other benefits and by removing bureaucratic obstacles that would deny or shorten training due to a lack of program funds or administrative delays in approving training. Under the bill, displaced workers would receive more assistance in their job search and relocation efforts.

H.R. 3391 also provides assistance to firms and industries suffering from increased import competition. These firms would receive both technical and financial assistance. They would retain the current, less restrictive standard which states that imports need only be important—but not the most important—contributor to the firm's decline.

Mr. Speaker, the need for this program is even greater now, in the mid-eighties than it was in 1962 when it was created. We are experiencing a transformation into an international economy, and our domestic industries are being confronted by a whole new host of international competitors.

If we believe that free trade is good for this country, then, unless we are willing to overlook large segments of the American work force, we must be willing to assist the workers who are caught in this transition. During debate on the floor of the House just this past week, we heard from several Members representing regions where the unemployment rate remains significantly—and stubbornly—above the national average.

The outlook for these unemployed workers is grim. Many of the smokestack industries which have been responsible for a great many of the unemployed, have permanently shrunk in the face of the new competitive re-

alities. These workers lost their jobs for the economic good of the entire Nation, and we cannot abandon them now.

Mr. Speaker, I urge my colleagues to adopt this rule and move forward to consider H.R. 3391, the Worker and Firm Trade Adjustment Assistance Act.

Mr. KAZEN. Mr. Speaker, will the gentleman yield?

Mr. LONG of Louisiana. I yield to the gentleman from Texas.

Mr. KAZEN. Mr. Speaker, I just wanted to call to the gentleman's attention the fact that he said that the Frenzel amendments were printed in the RECORD of September 15, 1983. I do not think the gentleman meant September 15. I just wanted the gentleman to correct the RECORD.

Mr. LONG of Louisiana. I think I said——

Mr. KAZEN. September 15.

Mr. LONG of Louisiana. I said May 15 when I was speaking of the Budget Act and perhaps I did say it.

Let the record show that the date is September 12, 1983.

Mr. KAZEN. May 12, 1983. Not September 12.

Mr. LONG of Louisiana. I am talking about the amendments. They will be printed in the RECORD on that day. That is what the rules provides.

Mr. KAZEN. My understanding is that this bill will be debated on Monday, the 12th of September.

□ 1810

Mr. LONG of Louisiana. It will be debated on the 12th, and that is the day that they will be printed in the RECORD.

Mr. KAZEN. All right, Mr. Chairman, if that is what you mean.

Mr. QUILLEN. Madam Speaker, I yield myself such time as I may use.

Madam Speaker, I would like to have seen an open rule granted on this measure because the bill is controversial.

H.R. 3391 reauthorizes for 2 years the trade adjustment assistance programs for workers and firms under the Trade Act of 1974 with a greater emphasis on the retraining of displaced workers.

Members should be aware that the administration is firmly opposed to this bill for a variety of reasons. As this bill comes to the House floor, it is a likely candidate for a Presidential veto.

There are serious objections to this bill because it expands substantially the eligibility criteria and benefits. This is compounded by other provisions in the bill which create an entitlement by specifying conditions under which benefits must be provided to workers.

Finally, the bill creates a special trust fund out of customs duties. This reinforces the entitlement aspect and could remove the programs from the appropriations process.

Madam Speaker, I yield 4 minutes to the gentleman from Indiana (Mr. COATS).

Mr. COATS. Madam Speaker, I rise in support of this resolution to provide for consideration of H.R. 3391, a bill to improve worker training programs under the Trade Act of 1974.

Just yesterday, my office received new evidence of the desperate need to modify the trade adjustment assistance program. We were advised by the Department of Labor that the employees of the Corning Glass Works plant ins Bluffton, Ind., have been denied eligibility to apply for worker adjustment assistance. As some of my colleagues are aware, the Bluffton Corning plant was closed last month, due in large part to the influx of color television imports from Japan, Taiwan, and South Korea. The plant was shut down despite an affirmative finding of dumping against the Japanese in the early 1970's. More than 500 people have been affected by this closing.

I should explain that the Bluffton Corning plant manufactured the glass envelopes which are made into color television picture tubes. Needless to say, their business was directly and adversely affected by the importation of fully assembled foreign-made color TV sets.

Under existing trade assistance law, however, the Department of Labor cannot take into consideration this cause-and-effect relationship. It is confined by law to consider only articles, "like or directly competitive with" articles produced by the employees who are applying for trade adjustment assistance. Thus, the Department of Labor could only have granted the application for trade adjustment assistance if they had found significant imports of glass envelopes, otherwise called faceplates and funnels. But we know that there were not significant imports of glass envelopes because most color televisions are being imported with their picture tubes fully assembled.

I would like to share with my colleagues just two short paragraphs from the Department of Labor's decision.

> Petitioners allege that increased imports of color television sets and color television picture tubes have contributed importantly to declines in sales, production and employment at the Bluffton plant of Corning Glass Works. Although imported color television sets incorporate picture tubes which utilize faceplates and funnels in their manufacture, imports of the whole product are not like or directly competitive with their component parts. Imports of faceplates and funnels must be considered in determining import injury to workers producing those products at the Bluffton plant of Corning Glass Works.
>
> A Department of Labor survey revealed that customers purchasing the predominant portion of the Bluffton plant's sales did not purchase imported faceplates or funnels. Customers accounting for a minor portion of sales reported some import purchases. However, these customers either reduced their import purchases in 1982 compared to 1981 and in the first quarter of 1983 compared to the same quarter in 1982, or imports comprised a negligible portion of the customer's total faceplate and funnel purchases.

It goes without saying that the former employees of the Bluffton Corning Glass Works are frustrated and angry, and I share their frustration. We are prevented by legalities from addressing the obvious and severe effects of foreign imports. Obviously, we cannot provide trade assistance to every concern which has the least little connection with color television picture tubes. But this should not stop us from assisting those whose product is unique and uniquely affected. I know that H.R. 3391 contains certain modifications to the current trade assistance standard which we have just discussed and I am anxious for the full House to have the chance to consider these changes.

I, therefore, urge adoption of the rule.

Mr. LONG of Louisiana. Madam Speaker, I yield 1 minute to the gentleman from Pennsylvania (Mr. KOSTMAYER).

Mr. KOSTMAYER. Madam Speaker, there may be a congressional district in the country that needs this measure more than mine, but it seems unlikely. I represent the largest facility, the United States Steel Corp., the Fairless Works, in Bucks County, Pa. The little bit of money we have left that was not cut in 1981 ends on September 30.

Madam Speaker, I rise in support of the rule on H.R. 3391, and want to commend the gentleman from Ohio (Mr. PEASE) for his diligence and hard work on the Ways and Means Committee in bringing this important legislation out of committee in a timely fashion. The trade adjustment assistance program is an important source of protection for workers and their families who are impacted by imports.

Since 1974 trade adjustment assistance has been available for any industry where imports make an "important contribution" to injury to the industry. The trade adjustment program paid a supplement to unemployment benefits for displaced workers and also provided funds for retraining and job hunting.

This assistance has been particularly important in my congressional district, Madam Speaker, where unemployed workers in the steel industry—most from the Fairless Works in Fairless Hills—are currently certified by the Labor Department as being affected by imports.

Unfortunately, the Gramm-Latta budget reconciliation bill passed by

the Congress in 1981 slashed trade adjustment assistance by over 90 percent and phased it out entirely as of September 30, 1983. It is therefore important that the House act expeditiously on H.R. 3391, which extends the program for an additional 2 years, and makes numerous important improvements in the training sections of the program. Earlier this year I introduced legislation, H.R. 2870, which calls for a 5-year extension of the program. While I would have preferred that the Ways and Means Committee approve an extension longer than 2 years, I support this bill because I realize that lack of support from the Reagan administration requires compromises.

The important point, Madam Speaker, is that imports are having a devastating impact in certain industries, and the innocent victims, the workers and their families need this help. I urge my colleagues to support this rule, and to support H.R. 3391, so that unemployed workers in import sensitive industries are given this import protection.

Mr. QUILLEN. Madam Speaker, I yield 7 minutes to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Madam Speaker, when the Clerk was reading this resolution, I suggested that we might abandon reading it. The reason that I did so was because no printed copy of it was available until about an hour ago in the House. I was not sure that anyone was interested in reading the resolution. It is as described by the distinguished gentleman from Louisiana (Mr. LONG).

However, I think the description needs some amplification. Hearings on this resolution in the Rules Committee were not announced until the very end of last week. At that time I was asked to come to the Rules Committee and to provide a few amendments for a bill so that the Rules Committee could vote out a closed rule.

That was a bit of a shock to me, since the Ways and Means Committee had voted to ask the Rules Committee for an open rule without waivers, and the chairman of the Ways and Means Committee had written the Rules Committee with that request.

Nevertheless, the Rules Committee met on Tuesday. At that time the chairman of the Ways and Means Committee repeated his request. However, at the request of the distinguished gentleman from Ohio (Mr. PEASE), who has been a persistent and extraordinarily effective advocate of the legislation in question, the Rules Committee instead of giving what the Ways and Means Committee asked for, which was an open rule, which many Members of this House always ask for too, decided to grant a closed rule. It made in order four amendments which by that time I had hastily put together, at least in concept, to try to amend this bill to a point where it would make some sense to those who believe that fiscal order and discipline still ought to be the rule in this House.

The Rules Committee granted the rule, that is, a closed rule which allows for four amendments. However, worse than the closing of the rule and the restricting of the debate is the feature in this rule that waives rule XXI, clause 5, that is, appropriating on a legislative bill.

This bill sets up a brandnew entitlement without a cap, sets up a separate trust fund, and, in fact, appropriates from the revenues of the United States into a special account which cannot be spent for any other purpose than the purpose of this act.

In addition, there are two waivers required to the Budget Act. I do not specifically object to those, except that in general I think it is bad practice to waive the Budget Act at any time in this House.

So, Madam Speaker, we have a situation where we have two waivers of the Budget Act, two waivers that destroy the appropriations process, and will in fact give this House the opportunity to create a new entitlement program which will further erode whatever vestiges of fiscal discipline may remain in this House.

Therefore, I urge the Members to vote against the rule if they have any respect for the procedures of this House.

Over the last couple of weeks we have been engaged in a set of procedures which must seem very unusual to those who watch our proceedings on television. We have voted on amendments without debate and without understanding. We have shifted from one item of business to another in an apparently whimsical fashion. When this rule has been dispatched, we will probably consider some items, by unanimous consent, that most of us have not seen. In this case, we are going to vote on a rule which waives the most fundamental and fiscally important rules of this House.

I would like to talk a little bit about the bill, Madam Speaker. I have indicated that the bill creates a new entitlement program. It appropriates certain customs revenues from the general fund of the Treasury into a trade adjustment assistance special account. Now, expenditures from that account would be subject to appropriation. Nevertheless, the moneys in that account, as specified in the bill, could not be used for any other purpose during the year.

Under such an arrangement, we would be obliged to borrow more money because those reserved funds would not be available for regular spending. Clearly, it is appropriating on a piece of legislation. That is why the Rules Committee found it necessary to grant a waiver.

If we accept this particular rule, we bless another new entitlement. And again, I would point out that the entitlement has no cap to it. Whoever turns up to be available for these benefits will get them as a matter of right.

Mr. CONABLE. Madam Speaker, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from New York.

Mr. CONABLE. I would just like to say that I think the gentleman from Minnesota (Mr. FRENZEL) is making a very important and strong statement. His position is correct. I want to support him all the way on it. I hope the Members will listen to him.

Mr. FRENZEL. Madam Speaker, I thank the gentleman for his support. If the membership listens to me on this item, they will be repudiating a precedent strongly set in the last week.

Madam Speaker, if I may continue, we are establishing a new entitlement program and one that has no cap. If we underestimate the number of claimants, we will simply have to pass additional supplemental appropriations to make up the difference.

We are creating a new trust fund. We are undoing the reconciliation efforts of the last 2 years to achieve a special purpose here. It is a worst mistake to spend extra, duplicative money at a time when the country is beginning the tortuous process of struggling back to economic recovery and economic prosperity.

It will require the expenditure of several hundred millions of dollars of the taxpayers' money for purposes that we decided we did not need over the past 2 years. Worse, it duplicates the benefit of the Partnership Training Act for which the administration has asked $220 million for fiscal year 1984. This bill asks us to double up on that amount and to do it in an entitlement.

Madam Speaker, I believe that the House would be well advised not to agree to the waivers provided in the rule, not to agree to appropriate on a legislative bill, and to defeat the rule.

□ 1820

Mr. LONG of Louisiana. Madam Speaker, I yield 3 minutes to the gentleman from Minnesota (Mr. OBERSTAR) for purposes of debate.

Mr. OBERSTAR. I thank the gentleman for yielding this time to me.

Madam Speaker, the arguments of my colleague from Minnesota fall a little hollow on the question of this rule. A couple of weeks ago when the rule on the Caribbean Basin Initiative came up as a closed rule, the gentleman made no objection and fully supported it. This week the rule provides for him alone to offer amendments to

correct those very deficiencies which he sees in the bill and to which he has addressed himself, so there will be opportunity for the body to address the concerns that the gentleman from Minnesota has proclaimed.

This legislation is vital if we are going to sustain a trade policy that the country now has in effect and which has been in effect since the Kennedy round of negotiations. If we are to open our doors to goods from other countries, to participate fully in free international trade, then we have to provide some means for protecting those who will fall victim to unfair competition from abroad, which has struck our shores in a wide gamut of commodities ranging from steel to shoes.

If we are to avoid an overprotectionist policy of trade that defends every last item produced in the United States, when we must provide some cushion for those whose jobs will be affected, those industries will be affected by that kind of open and vulnerable trade policy.

This Trade Adjustment Assistance Act, which has been in effect since 1962, had not worked well until the amendments of 1974, and has literally fallen by the wayside since the Reconciliation Act of 1981. This legislation will correct those deficiencies and put us on a sound track.

Mr. GIBBONS. Madam Speaker, will the gentleman yield?

Mr. OBERSTAR. I yield to the gentleman from Florida.

Mr. GIBBONS. I thank the gentleman for yielding.

Madam Speaker, I agree with the gentleman from Minnesota (Mr. OBERSTAR).

Mr. GEPHARDT. Madam Speaker, will the gentleman yield?

Mr. OBERSTAR. I yield to the gentleman from Missouri.

Mr. GEPHARDT. I thank the gentleman for yielding.

Madam Speaker, I agree with his every comment and ask for support.

Mr. GAYDOS. Madam Speaker, will the gentleman yield?

Mr. OBERSTAR. I yield to the gentleman from Pennsylvania

Mr. GAYDOS. I thank the gentleman for yielding. Madam Speaker, I fully support the gentleman.

Mr. OBERSTAR. Madam Speaker, this trade adjustment assistance is mediocre and puny in comparison to the trade adjustment assistance provided by the European Economic Community to workers in those countries which were rebuilding their industry after World War II. They provided for a far greater range of assistance and protection, job training, relocation assistance and compensation for people whose jobs were lost. We ought to do at least as much. This bill will put us on the road toward that goal.

I urge support of the rule.

Mr. LONG of Louisiana. Madam Speaker, I yield 1 minute to the gentleman from Ohio (Mr. PEASE).

Mr. PEASE. I thank the gentleman for yielding this time to me.

Madam Speaker, I rise in support of this bill and will be very brief because I know that time is short.

If we have a policy of free trade in this country, there are going to be victims who lose their jobs because of imports. This bill helps those thousands of people in the industries of autos, steel, textiles, and shoes with retraining opportunities. It is a very important part of our process of trying to help victims of free trade policy.

It is not an unusual rule. It allows amendments by the gentleman from Minnesota (Mr. FRENZEL) so he can express his opinion on the bill in amendment form.

I urge very much support of the bill.

Mr. KASICH. Madam Speaker, will the gentleman yield?

Mr. PEASE. I yield to my colleague, the gentleman from Ohio.

Mr. KASICH. I thank the gentleman for yielding.

Madam Speaker, I would like to associate myself with the remarks of my colleague from Ohio.

In Ohio we are in a very unique situation, with tremendous structural unemployment problems and we are in great need of this kind of assistance.

Again, I would support my colleague in his efforts.

Mr. LONG of Louisiana. Madam Speaker, I yield 1 minute for purposes of debate to the gentleman from Texas (Mr. SAM B. HALL, JR.)

Mr. SAM B. HALL, JR. I thank the gentleman for yielding.

Madam Speaker, I would like to associate myself with the sentiments and statement of the gentleman who just spoke from Ohio.

In my area of Texas, we have many problems facing the manner in which we are talking about trying to help these people get retrained. It is something that they are looking forward to. It is something that they have been led to expect that they would have, and I think this is the proper time and place to carry out the promise that we have for the structurally unemployed people.

So I certainly join with the gentleman from Ohio and hope that this matter goes in this direction.

Mr. LONG of Louisiana. Madam Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore (Ms. FERRARO) announced that the ayes appeared to have it.

Mr. FRENZEL. Madam Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 233, nays 132, not voting 68, as follows:

[Roll No. 327]

□ 1840

The Clerk announced the following pair:

On this vote:

Mr. Addabbo for, with Mr. McCollum against.

Messrs. HERTEL of Michigan, SAWYER, and NEILSON of Utah changed their votes from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

TRIBUTE TO RALPH VINOVICH

(Mr. MICHEL asked and was given permission to address the House for 1 minute.)

Mr. MICHEL. Madam Speaker, in keeping with my respect for the good backup support we have here in the Congress, both in the House and Senate, from some of our distinguished professional staff members, I would be remiss if I did not make mention of the fact that my chief of staff, Ralph Vinovich, will retire after 16 years of service in the House tomorrow after a total of nearly 30 years of service on Capitol Hill.

Ralph has long been known on both sides of the aisle and both sides of the Capitol as a man whose personal qualities of dedication and integrity have made him one of the most valued members of our House family.

Neither Ralph nor I go for public displays of emotion, so I am going to make it very short and sweet.

Ralph, we are going to miss you around here. From the days you served as a key aide to our old mentor, the late Senator Everett McKinley Dirksen, to this very day you have really helped define the word "class."

There are volumes more to be said, but Ralph's career of service to this House and this country says it all.

May your tee shots be right down the middle of the fairway, and your putts most always roll straight for the cup.

I am sure all our Members will join me in wishing you all the best Ralph, in all that you choose to do.

Mr. OBERSTAR. Madam Speaker, I, too, would like to join in the tribute by the minority leader to Mr. Vinovich, with whom I had the pleasure of serving for several years as a member of the staff of this august body.

I wish him well in his new endeavor.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment bills, a joint and a concurrent resolution of the House of the following titles:

H.R. 1372. An act to provide for the operation of certain foreign-built vessels in the coastwise trade of Alaska;

H.R. 2895. An act to designate the Federal Building and U.S. Courthouse at 450 Golden Gate Avenue, San Francisco, Calif., as the Phillip Burton Federal Building and U.S. Courthouse;

H.R. 3190. An act to establish an improved program for extra long staple cotton;

H.R. 3232. An act to amend title 28 of the United States Code to authorize payment of travel and transportation expenses of newly appointed special agents of the Department of Justice;

H.R. 3549. To amend the Bankruptcy Rules with respect to providing notice;

H.R. 3677. An act to amend title XVIII of the Social Security Act to increase the cap amount allowable for reimbursement of hospices under the medicare program;

H.J. Res. 297. Joint resolution providing for appointment of Jeannine Smith Clark as a citizen regent of the Board of Regents of the Smithsonian Institution; and

H. Con. Res. 154. Concurrent resolution to commend Dr. Alice Mitchell Rivlin for her service as Director of the Congressional Budget Office.

The message also announced that the Senate had passed with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 2840. An act to provide for the orderly termination of Federal management of the Pribilof Islands, Alaska.

The message also announced that the Senate had passed bills, joint resolutions and a concurrent resolution of the following titles, in which the concurrence of the House is requested:

S. 268. An act to authorize the Secretary of the Interior to construct, operate, and maintain hydroelectric powerplants at various existing water projects, and for other purposes;

S. 1008. An act to make certain technical amendments to improve implementation of the Education Consolidation and Improvement Act of 1981, and for other purposes;

S. 1015. An act to clear certain impediments to the licensing of the vessel La Jolie for employment in the coastwise trade;

S. 1186. An act to clear certain impediments to the licensing of the yacht Dad's Pad for employment in the coastwise trade;

S. 1192. An act to authorize appropriations for the purpose of carrying out the activities of the Department of Justice for fiscal year 1984, and for other purposes;

S. 1365. An act entitled the "Harry Porter Control Tower";

S. 1465. An act to designate the Federal Building at Fourth and Ferry Streets, Lafayette. Ind., as the "Charles A. Halleck Federal Building";

S. 1689. An act to clear certain impediments to the licensing of the vessel Endless Summer for employment in the coastwise trade;

S. 1724. An act to designate the Federal Building in Las Cruces, New Mexico as the "Harold L. Runnels Federal Building";

S. 1797. An act to name the U.S. Post Office Building to be constructed in Fort Worth, Tex., as the "Jack D. Watson Post Office Building";

S.J. Res. 136. Joint Resolution to recognize "Volunteer Firefighters Recognition Day" as a tribute to the bravery and self-sacrifice of our volunteer firefighters;

S.J. Res. 149. Joint resolution to temporarily suspend the authority of the Secretary of Agriculture, under the milk price support program, to impose a second 50 cents per hundredweight deduction from the proceeds of sale of all milk marketed commericially in the United States; and

S. Con. Res. 63. Concurrent resolution directing the Clerk of the House of Representatives to make corrections in the enrollment of the bill (H.R. 3190).

REQUEST FOR PERMISSION FOR COMMITTEE ON ENERGY AND COMMERCE TO HAVE UNTIL 5 P.M. WEDNESDAY, AUGUST 31, 1983, TO FILE REPORT ON H.R. 2755, AUTHORIZING APPROPRIATIONS FOR THE FEDERAL COMMUNICATIONS COMMISSION

Mr. WIRTH. Mr. Speaker, I ask unanimous consent that the Committee on Energy and Commerce may have until 5 o'clock p.m. on Wednesday, August 31, 1983 to file a report to

accompany the bill, H.R. 2755, to authorize appropriations for the Federal Communications Commission.

The SPEAKER pro tempore (Mr. GRAY). Is there objection to the request of the gentleman from Colorado?

Mr. DANNEMEYER. Mr. Speaker, I object.

Mr. WIRTH. Mr. Speaker, it has been cleared with the gentleman's side of the aisle, I would say to the gentleman from California.

Mr. DANNEMEYER. Mr. Speaker, reserving the right to object, this Member from California objects.

The SPEAKER pro tempore. Does the gentleman reserve the right to object?

Mr. DANNEMEYER. The Member from California objects.

The SPEAKER pro tempore. Objection is heard.

AUTHORIZING THREE ADDITIONAL ASSISTANT ADMINISTRATORS OF THE ENVIRONMENTAL PROTECTION AGENCY

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 1696) authorizing three additional Assistant Administrators of the Environmental Protection Agency, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

Mr. FRENZEL. Mr. Speaker, reserving the right to object, I do so for the purpose of asking the distinguished chairman whether this is the bill requested by the Administrator of EPA for three assistants and whether this has been cleared with the minority on the gentleman's committee.

Mr. FORD of Michigan. Will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman.

Mr. FORD of Michigan. We are doing this at the request of the White House and Mr. Ruckelshaus, and I understand that it has been cleared by both sides. All five committees of jurisdiction over here have cleared it.

Mr. Speaker, S. 1696, a bill to authorize three additional Assistant Administrators of the Environmental Protection Agency, is legislation which was requested by the administration.

Today the EPA is headed by an executive level II Administrator, current salary $69,800. He is assisted by a level III Deputy Administrator, $68,400 and seven level IV Assistant Administrators, $68,400. This bill would authorize three additional level IV Assistant Administrators. These three new positions would be designated Assistant Administrator for Planning and Evaluation, Assistant Administrator for Enforcement, and Assistant Administrator for Research and Development.

We are all too familiar with the problems which have beset the EPA during this administration. Although the Committee on Post Office and Civil Service, generally, would not permit legislation such as this to be taken up until it had been considered by the committee in the normal legislative process, an exception is warranted in this case in order that the new EPA Administrator can get on with the task of setting the EPA back on course to address the significant environmental issues which face us today.

The bill has been cleared by the ranking member of my committee (Mr. TAYLOR) and by the chairman of the subcommittee with legislative jurisdiction over executive level positions (Mr. ALBOSTA). I am advised that the other committees with legislative and oversight jurisdiction over the EPA have no objection to the consideration of the bill.

Mr. FRENZEL. Mr. Speaker, I thank the gentleman, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1696

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the President, by and with the advice and consent of the Senate, may appoint three Assistant Administrators of the Environmental Protection Agency in addition to—

(1) The five Assistant Administrators provided for in section 1(d) of Reorganization Plan No. 3 of 1970 (5 U.S.C. Appendix) (hereinafter in this Act referred to as the "Reorganization Plan.");

(2) The Assistant Administrator provided by section 25(g) of the Toxic Substances Control Act (15 U.S.C. 2625(g)); and

(3) The Assistant Administrator provided by section 307(b) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 6911a).

(b) Each Assistant Administrator appointed under subsection (a) shall perform such duties as the Administrator of the Environmental Protection Agency may prescribe.

SEC. 2. (a)(1) Section 5313 of title 5, United States Code, is amended by adding at the end thereof the following new item:

"Administrator of the Environmental Protection Agency.".

(2) The second sentence of section 1(b) of the Reorganization Plan is amended by striking out ", and shall be compensated at the rate now or hereafter provided for Level II of the Executive Schedule Pay Rates (5 U.S.C. 5313)".

(b)(1) Section 5314 of title 5, United States Code, is amended by adding at the end thereof the following new item:

"Deputy Administrator of the Environmental Protection Agency.".

(2) The first sentence of section 1(c) of the Reorganization Plan is amended by striking out ", and shall be compensated at the rate now or hereafter provided for Level III of the Executive Schedule Pay Rates (5 U.S.C. 5314)".

(c)(1) Section 5315 of title 5, United States Code, is amended by adding at the end thereof the following new items:

"Assistant Administrator for Toxic Substances, Environmental Protection Agency.

"Assistant Administrator, Office of Solid Waste, Environmental Protection Agency.

"Assistant Administrators, Environmental Protection Agency (B).".

(2)(A) Section 26(g)(2) of the Toxic Substances Control Act is amended by striking out "(A)" and ", and (B) be compensated at the rate of pay authorized for such Assistant Administrators".

(B) Section 307(b) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 is amended by striking out ", and shall be compensated at the rate provided for Level IV of the Executive Schedule pay rates under section 5315 of title 5, United States Code".

(C) Section 1(d) of the Reorganization Plan is amended by striking out ", and shall be compensated at the rate now or hereafter provided for Level IV of the Executive Schedule Pay Rates (5 U.S.C. 5315)".

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NAMING U.S. POST OFFICE BUILDING IN FORT WORTH, TEX., THE "JACK D. WATSON POST OFFICE BUILDING"

Mr. YOUNG of Missouri. Mr. Speaker, I ask unanimous consent for the immediate consideration of the Senate bill (S. 1797) to name the U.S. Post Office Building to be constructed in Fort Worth, Tex., as the "Jack D. Watson Post Office Building."

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

Mr. FORD of Michigan. Mr. Speaker, reserving the right to object, and I shall not object, I would ask the gentleman from Missouri to explain the bill.

Mr. YOUNG of Missouri. Mr. Speaker, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman from Missouri.

Mr. YOUNG of Missouri. Briefly, Mr. Speaker, Jack Watson has hired as a temporary employee with the Postal Service in 1945. He rose through the ranks with the Postal Service and, until his retirement in 1980, served for 14 years as postmaster of the Fort Worth Post Office.

Mr. Speaker, title I of this bill is identical to H.R. 3151 which was passed by the House on June 13, 1983.

Mr. Speaker, the Senate added one other provision to the bill which would allow a member of a postal governing board to stay on for another year providing no successor is appointed.

Mr. COURTER. Mr. Speaker, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman from New Jersey.

Mr. COURTER. I understand that our side does not have an objection but I would feel more comfortable if through the noise I could hear what the unanimous-consent request is or what the resolution does.

Mr. FORD of Michigan. The first part of the resolution names a post office in Fort Worth, Tex., for a former postmaster who is deceased.

The second part, and that is the reason for the joint jurisdiction for our committee, is an amendment put on in the other body by Senator STEVENS for the postmaster and the Postal Board of Governors.

Mr. COURTER. I thank the gentleman for his explanation. We have no objection, Mr. Speaker.

Mr. FORD of Michigan. I want to express my support for this bill which will name the U.S. Post Office Building to be constructed in Fort Worth, Tex., as the "Jack D. Watson Post Office Building". This bill originally was introduced by the distinguished majority leader, Mr. WRIGHT, and it is through his diligence that this legislation is before us today.

The other body has added a provision which addresses a problem the Postal Service has experienced since its creation. Under existing law, a Presidentially appointed Governor of the Postal Service may not serve beyond his designated term even if a successor has not been appointed and qualified. This often causes a situation where there will be vacancies on the Board and, as the Members can understand, the lack of a full Board membership can greatly inhibit the ability of the Board of Governors to perform its functions.

The provision which has been added would insure that such situations cannot occur in the future. Similar provisions apply with respect to many other boards and commissions. This provision permits a Governor to continue in office for not more than 1 year until a successor is available to take his or her place. The 1-year limitation is identical to the language in section 3601(b) of title 39 which provides for holding over by Postal Rate Commissioners until their successor qualifies. A successor has qualified under the meaning of this language when he or she assumes the office, after being nominated and confirmed and after the formal appointment is issued.

I think the provision is extremely worthwhile, and I am pleased to see this problem being addressed.

Mr. FORD of Michigan. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri,

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1797

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the United States Post Office Building to be constructed in Fort Worth, Texas, at the intersection of Meacham Boulevard and the Mark IV Parkway, shall hereafter be named and designated the "Jack D. Watson Post Office Building." Any reference in a law, map, regulation, document, record, or other paper of the United States to such building shall be held to be a reference to the Jack D. Watson Post Office Building.

SERVICE OF GOVERNOR UNTIL SUCCESSOR QUALIFIES

SEC. 2. Section 202(b) of title 39, United States Code, is amended by adding at the end thereof the following sentence: "A Governor may continue to serve after the expiration of his term until his successor has qualified, but not to exceed one year."

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. YOUNG of Missouri. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

□ 1850

GENERAL LEAVE

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on S. 1696, the Senate bill passed earlier.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY ON WEDNESDAY, SEPTEMBER 14, 1983

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule may be dispensed with on Wednesday, September 14, 1983.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

AUTHORIZING THE SPEAKER TO ACCEPT RESIGNATIONS AND APPOINT COMMISSIONS, BOARDS, AND COMMITTEES, NOTWITHSTANDING ADJOURNMENT

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that, notwithstanding any adjournment of the House until Monday, September 12, 1983, the Speaker be authorized to accept resignations, and to appoint commissions, boards, and committees authorized by law or by the House.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

HOUR OF MEETING ON TUESDAY, SEPTEMBER 13, 1983

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that when the House adjourns on Monday, September 12, 1983, it adjourn to meet at 10 a.m. on Tuesday, September 13, 1983.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

TEMPORARILY SUSPENDING CERTAIN AUTHORITY OF THE SECRETARY OF AGRICULTURE RELATIVE TO THE MILK PRICE SUPPORT PROGRAM

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate joint resolution (S.J. Res. 149) to temporarily suspend the authority of the Secretary of Agriculture, under the milk price support program, to impose a second 50 cents per hundredweight deduction from the proceeds of sale of all milk marketed commercially in the United States, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

Mr. MICHEL. Mr. Speaker, reserving the right to object, in order that we might expedite proceedings here, I am quite sure this gentleman from Illinois knows what the gentleman from Texas is attempting to do here is do the Senate resolution that would for all practical purposes delay the imposition of that second 50 cents per hundredweight tax that would, under the current law, go into effect September 1, delay it until October 1, the theory being that while Members of the Congress are away, and no opportunity to either affirm or turn that decision around, it would go into effect.

Now, our problem here is that we bring these agriculture bills up here

under suspension one at a time, nickel-and-diming us.

Now you got another bill here that is going to cost you $60 million in 30 days, $60 million. And the point is the whole theory of that last agricultural act was to get these milk people around to accepting a lower price support than what we have currently prevailing.

We want to see an agriculture bill our here under an open rule where the House can work its will and we can debate this thing and quit nickel-and-diming us with these agriculture bills, whether it is cotton, tobacco or what under suspension on a piecemeal basis. We have to deal with this thing in the aggregate and I get a little distressed with what I see going on here that is why I reserved the right to object.

Does the gentleman want me to yield?

Mr. JEFFORDS. Will the gentleman yield briefly?

Mr. MICHEL. I yield to the gentleman.

Mr. JEFFORDS. I would just like to point out that the Agriculture Committee itself passed a bill out of here in May. It was requested by the administration in order that they could try to put together a bill in the Senate putting various parts together, including the most desired aspect, from their perspective, of a target price freeze on grains. The dairy bill has been waiting there, over there in the Senate.

Unfortunately, the administration was unable to attain their desired goal. Thus, the dairy bill was unable to get over here in time for people to work their will on it. I personally have requested a rule that would allow people to work their will on it. I am hopeful that when we come back in September, an opportunity will be given to people to work their will on that bill.

On the other hand, to put this bill—not to allow this to go, we would have the whole process go into effect and then, regardless of who wins on working their will, that would have to be undone in October and would create chaos and would provide a hardship on the dairy farmers and confusion in the whole system. So, I would urge the gentleman that he not object because I am confident myself because of the pressure that will be put on us when we get back by the October first deadline that we will have a bill that we can work our will on, I will support that effort and I believe Members have an opportunity to do so.

Mr. MICHEL. Further reserving the right to object, Mr. Speaker, and I take the remarks of the gentleman in good faith; I know there are some Members here who have actually tried, in good faith, to do what is the right thing. It kind of burns me that, however, the whole process is being sidetracked from time to time by coming up piecemeal through this suspension process. And I just have to express my resentment at that kind of consideration, haphazardly, of agriculture bills.

I am happy to yield to my friend from Illinois (Mr. MADIGAN) under my reservation.

Mr. MADIGAN. I thank the gentleman for yielding.

I think the point that we want to be sure is clear here is that there is no argument with the gentleman from Vermont that the Agriculture Committee reported a bill but they reported it to the floor here under suspension. And I think the point the distinguished minority leader is making is that he wants to know when a bill is coming to the floor under an open rule that will allow people some opportunity to offer alternative suggestions as to a resolution of this dairy problem. And I am sure that the gentleman from Illinois would like to have some assurances from the managers of these bills as to the prospect for having on the floor perhaps early in September when we come back here a bill under an open rule that would give us an opportunity to legislate.

Mr. JEFFORDS. If the gentleman will yield.

Mr. MICHEL. I yield to the gentleman.

Mr. JEFFORDS. I would point out that you know the complications this bill has undergone which are totally unrelated to the problems of dairy which have made it very difficult for this bill to come to the House floor. That is that the administration's approval is conditioned upon, an attachment of the unrelated matters relative to grain. If that aspect can be straightened out such that it can go on its own merits and not have that complicating factor, I am sure that we could get to the bill on the floor expeditiously as an open rule. And I would hope that would occur.

Mr. MADIGAN. Mr. Speaker, will the gentleman yield further?

Mr. MICHEL. I am happy to yield to the gentleman.

Mr. MADIGAN. If a dairy bill comes out and deals only with dairy, then the Parliamentarian has advised us that no amendment would be in order other than an amendment dealing with dairy.

Now if the bill comes here under an open rule that deals only with dairy, no attempt can be made to attach something to that dealing with feed grains. That is my understanding of what the Parliamentarian has said.

What is at issue here is whether or not we can have an open rule on a dairy bill that would allow gentlemen on both sides of the aisle some opportunity to offer alternative suggestions with regard to dairy. And that is the point of the minority leader.

And I think with all due respect to the gentleman, perhaps the managers of the bill on the majority side of the aisle would like to respond to the minority leader about the schedule in September for this particular question.

Mr. MICHEL. That raises a very good question. I have to ask the distinguished chairman of the committee if perchance there were no objection raised to this movement at this time, and then we are up to October 1, then what is the scenario? What do we expect to happen? Because this is a temporary stay of that 50 cents per hundredweight tax, I recognize that. What would happen after that?

Mr. DE LA GARZA. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I am happy to yield to the gentleman.

Mr. DE LA GARZA. The plan is of course to move the legislation which has been approved by the committee. Needless to say, it is a very fragile compromise because this is a very complicated issue.

The reason, as has been mentioned, that we have not moved it is because the administration insisted on tying other matters to it.

We thought the matter could be resolved in the Senate so we waited. The Senate was not able to resolve the issue. This is what they have sent back which takes care for the immediate future something that will transpire when we are not here, the extra 50 cents assessment. The legislation repeals that. Now, I know the gentleman, both my friend from Illinois, all I can tell you is that our committee has been responsive to the will of the Members. I cannot make an omnibus bill out of a tobacco bill if that is the only thing we have before us. And I hope as a good legislator I have tried to expeditie, as a good chairman, to use the most feasible, expeditious manner in which to pass legislation, which has been passing the committee unanimously. And that is the reason for utilizing the suspension system; no other reason. But if we have a bill which requires a rule then all I can say is that we are subject to whatever rule we get from the Rules Committee. But I have no objection to an open rule or to in any way to frustrate the ability of a Member to exert his influence or to offer alternatives. We have no objection to that.

□ 1900

I would like to tell the distinguished minority leader that in this issue related to target price freeze and the dairy, we invited, in an usual move, in the midst of markup, the Secretary of Agriculture to come and again present his view. The committee did not approve it.

As much as I would like to accommodate my distinguished colleague from Illinois, the minority leader, the votes

were not there and no one frustrated the effort except the number of votes that were cast yea and nay.

But the gentleman has my assurance, one, that in no way have I as chairman or any other Member spoken to me about frustrating the effort of any Member, except that a chairman is trusted to move legislation from his committee in the most expeditious manner.

Mr. MICHEL. Further reserving my right to object, Mr. Speaker, that we might proceed here and recognizing some of those nuances that go on in that Agriculture Committee, but certainly not all of them, but knowing the character of the gentleman from Illinois, who now serves as our ranking member, a very conciliatory member, one who has been noted for being able to forge a compromise and to work with members of the opposition, I would trust to his good judgment and I want to yield to the gentleman here to respond, if he would like in any way, to the remarks that the chairman of the committee has just made.

Mr. MADIGAN. I appreciated very much the gentleman yielding.

And I want again to try to emphasize that what we are talking about here is not tying different things together. What we are talking about is whether or not the dairy bill reported from the Agriculture Committee is going to be considered on the floor of the House with an open rule.

And specifically what I suggest that the gentleman from Illinois is interested in is whether or not the gentleman from Texas can make some commitment to the Members of the House here this evening about whether he would be willing to ask the Rules Committee to report an open rule for that dairy bill and get it on the floor here early in the month of September, when we come back from our recess.,

Mr. MICHEL. And I have to say to the gentleman that is what we have got to have. And that is what this dialog is all about. In the absence of it, we just maybe have no recourse but to object.

Now is the time to fish or cut bait. You mean what you say, or are we going to get horsed around again when the time comes?

Mr. DE LA GARZA. Mr. Speaker, if the gentleman will yield to me, there has never been any attempt to horse around or to get around the gentleman from Illinois or the other gentleman from Illinois.

Mr. MICHEL. I was using a figure of speech.

Mr. DE LA GARZA. As a matter of fact, now that the gentleman has——

Mr. MICHEL. In this case it was just cowing around a little bit. Then there is some bull attached once in a while.

Mr. DE LA GARZA. We are all being cowed around. They are just pumping more milk than we can handle. That is why we are here tonight.

The very masterful presentation of the distinguished gentleman, the minority leader, we will avail ourselves of the mastery of my distinguished minority ranking member in a conciliatory process and so on at every available opportunity.

All I can say is that we move the legislation in the most expeditious manner possible. If the members of the committee want an open rule, we ask for an open rule. If they want a modified, we ask for a modified.

The gentleman knows that a chairman no longer has the authority of years past and you have to work with consensus and within the art of the possible. A chairman is instructed basically by his committee and I can assure the gentleman of one thing that I will ask the advice and consent of the full committee as to what route they wish to take when we go to the Rules Committee on this dairy legislation, which I hope is promptly after we reconvene in September. And that is all of the assurances that I can give the gentleman within my discretion.

Mr. MOORE. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Louisiana.

Mr. MOORE. I thank the gentleman for yielding.

I think this has been an interesting discussion. I for one would support an open rule. I want to support an amendment that is going to be offered by the gentleman from New York (Mr. CONABLE) that will do precisely what the gentleman from Illinois, our minority leader, is suggesting, that we reduce the price support. I want to support that.

That is not really the issue before us right now. And I say to my distinguished minority leader and to any other of my colleagues who are contemplating objecting, the whole point in the 50-cent assessment was to reduce the amount of milk being produced. It has not worked. The Secretary of Agriculture in my presence has said publicly, and there are other Members here on the floor who can ascribe to that fact, it has not worked. As a matter of fact, it has caused dairy farmers to produce more milk to offset the tax that they are paying.

He has then stated that the real value in this assessment is to keep our feet to the fire, since that is not a good program and our farmers do not like it, to force the Congress to come to terms with the issue and come up with something better.

Therefore, that is what we are talking about, is using this 50-cent assessment, and now a second 50-cent assessment that will go into effect while this Congress is not in session. We are using that to force the Congress to come to terms to meet the issue head on. It is not fair to make the poor farmer back home pay the additional 50 cents when his Congress and Congressman are not in session and cannot meet the issue head on.

It is not the farmers who have been dragging their feet, it is the Members of the House and Senate who have not come to grips with the issue.

And therefore, I do not think it is right during a recess to up the ante on them, the farmer. Let us come back here in September. If we cannot address the issue then the second 50 cents will go into effect on October 1. But let us not beat the farmer down. Let us give the Congress a chance in September to address the issue. If they do not, then OK, up the ante to the second 50 cents.

So I would ask the gentleman or any gentleman who is contemplating objecting not to object because the farmer cannot do anything in this situation and we are leaving here tonight. Nobody else can do anything in this situation until we get back here in September.

Mr. MICHEL. The gentleman from Louisiana makes a good point. I have always had some reservations about moves that take effect while the Congress is not in session, where normally they would be so sensitive as to get an immediate response out there in the country when the effective date takes place and Members of Congress would be so notified. I have a reservation about that.

I might be willing to go along with another 30 days, but I will tell you that issue has then got be joined on October 1 and what I am saying again is, we want that opportunity to fully aerate that subject at that time. And admit it. I know the gentlemen who have so much dairy farming in their district. Under no circumstances can they be for anything but an increase support price and all the rest. Now some of them may have a reservation about that and those Members are going to have to have their say and do their thing that in my judgment, overall, looking at our budget deficit, the comparative cost of agricultural programs out there, I think the whole House wants an opportunity to work its will.

And, Mr. Speaker, I will withdraw my objection here under my reservation, having carried on this dialog with the hope that we have alerted some people to the fact that we are going to have a hassle on our hands October 1 if we do not come to grips with this.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas (Mr. de la GARZA)?

Mr. LUNGREN. Reserving the right to object, Mr. Speaker, I would direct my remarks to the attention of the chairman.

Obviously I am surrounded by a number of Members who do not want any objection here. Who are pleading very desperately that they need this at this time.

My question is a simple one: Why do we come to this point in time when virtually nine-tenths of all the Members of Congress have left this town, bring this up under unanimous consent to take an action that admittedly is going to cost all of our taxpayers $60 million under the excuse that we are not going to be here?

□ 1910

As I recall, we voted an adjournment resolution last week setting today as the day. This has not come as a surprise to anybody. We all knew we were going to leave today. And now we are being pleaded with to not do this to the dairy farmers. What are we doing to the taxpayers? Sixty million dollars.

Mr. DE LA GARZA. Mr. Speaker, will the gentleman yield?

Mr. LUNGREN. I yield to the gentleman from Texas.

Mr. DE LA GARZA. Mr. Speaker, I would like to inform the gentleman that the hour is not of our making or of our choosing. This is the time the other body sent the legislation to us.

Mr. JEFFORDS. Mr. Speaker, will the gentleman yield?

Mr. LUNGREN. Under my reservation of objection, I yield to the gentleman from Vermont.

Mr. JEFFORDS. Mr. Speaker, first I would like to point out that $60 million is not coming from the taxpayers. The $60 million comes from the farmers.

Mr. LUNGREN. In other words, it was money that was supposed to go to the Treasury as an effort to try and reduce production, which has not succeeded thus far?

Mr. JEFFORDS. That is correct. And the problem right now is that production is increasing.

The compromise that we worked out would: First, reduce production; and second, reduce the cost to the taxpayer.

We have been waiting very patiently to bring what I think is a very excellent compromise, although there is disagreement on that, before this House. We thought as late as perhaps 2 or 3 o'clock this afternoon we would have that compromise here.

I would have to say, in fairness, also, that my office itself, and others, we have held meetings with all of the legislative assistants, we have notified every office of the contents of that compromise.

What we do not want to see now is an opportunity for that to come back to us, even under an open rule or otherwise, in September, having it all destroyed in the sense of having everybody put through horrendous difficulty, another 50-cent assessment, and then come back and take it away, and undo it, and cause all of the confusion that is going to go on on the dairy farms because we are out on vacation. And that is the way it is going to look to them. We are going to be asking them to ship another $60 million down here because we are not around to correct a probem which we thought as late as 2 o'clock this afternoon we would have corrected.

So I really ask the gentleman to certainly not object.

Mr. CONABLE. Mr. Speaker, will the gentleman yield?

Mr. LUNGREN. Under my reservation of objection, I yield to the gentleman from New York.

Mr. CONABLE. Mr. Speaker, I would like to conform what the gentleman from Vermont has said. This money is not paid by the taxpayers. It is paid by the farmers. It is an assessment directly against them on their milk production.

Mr. LUNGREN. I appreciate that. Under my reservation of objection, I would like to ask the gentleman one thing: What does this program cost the taxpayers on an annual basis?

Mr. CONABLE. It cost the consumers money because we are maintaining the support price for milk, and then having the farmers pay to the Treasury the 50 cent or dollar assessment that is made against them if they continue to have that support price.

Now, the gentleman from Vermont and I disagree about the right way to handle this. Rather than have a special tax paid to the Treasury by the farmers, I would like to see the support price of milk reduced and the benefit of the reduced support price go to the consumer and a clear signal sent to the farmers that we are not going to continue to pay $13.10 a hundredweight support for milk.

Now, that is a disagreement. The important thing is that we get it resolved. And it ought to get resolved in September. If we are going to postpone the second 50-cent assessment on the farmers, we ought to do it under a clear understanding that this disagreement cannot continue, that one way or another we get the issue of milk resolved so that we can send a clear signal to the farmers, for one thing, as to what they should do relative to their herds, rather than have this Mickey Mouse kind of thing where we leave the support price high and then tax them specially under the assessment procedure that we are having.

So I would like to see, actually, this 30-day delay go through with an understanding that everybody in the Agriculture Committee, whether or not they agree with the assessment procedure or the support price procedure, we get it out here on the floor and get it settled.

Mr. LUNGREN. Mr. Speaker, continuing my reservation of objection, I would just suggest to the gentleman that we heard some of these same arguments in the last couple of years when we were dealing with the specific dairy program. We were told we were going to give clear signals to the dairy farmers to cut their production, we established a program. It has not done that. It has cost the consumers and the taxpayers more. And I think that it ill-suits this institution for us to bring up this subject at this particular time, with virtually nobody here, and say, "Just one more month," and somehow that is going to give an indication to the farmers to respond in the proper manner. I would be constrained to object.

Mr. THOMAS of California. Mr. Speaker, will the gentleman yield?

Mr. LUNGREN. Under my reservation of objection, Mr. Speaker, I yield to the gentleman from California.

Mr. THOMAS of California. Mr. Speaker, could I ask the distinguished chairman of the Agriculture Committee, a committee on which I enjoyed my service under the chairman immensely, that I fully understand the changes in the committee structure that have occurred over the last few years and the relatively circumscribed role that the chairman has versus past chairmen, and certainly the chairman cannot bind the committee, especially when there are Republicans and Democrats from dairy States on that committee.

All I would ask from the chairman is if he would assure me, as far as he is concerned, that, as far as the gentleman from Texas is concerned, as far as the chairman of the Agriculture Committee is concerned, he would work for—his position would be an open rule on the dairy bill. Would the gentleman from Texas, the chairman of the committee, at least go that far?

Would the gentleman from California yield to the chairman to respond?

Mr. LUNGREN. Under my reservation of objection, I yield to the gentleman from Texas.

Mr. DE LA GARZA. Mr. Speaker, the gentleman from Texas has no objection to asking for an open rule if it were the sole discretion of the gentleman from Texas. The gentleman knows that I can say I would want an open rule but if the committee would want me to act otherwise, I would have to oblige them.

But the gentleman has the assurance, for whatever it is worth, that the gentleman from Texas has no objection to an open rule.

Mr. THOMAS of California. Mr. Speaker, will the gentleman yield further to me under his reservation of objection?

Mr. LUNGREN. I yield to the gentleman from California.

Mr. THOMAS of California. Will the gentleman from Texas support an

open rule rather than merely indicate there is no objection?

Mr. DE LA GARZA. Mr. Speaker, will the gentleman yield?

Mr. LUNGREN. I will be happy to yield under my reservation of objection, but it is getting close to the time to object.

Mr. DE LA GARZA. I would like to accommodate my good friend, but the gentleman from Texas cannot place himself in a position of going to the Rules Committee and saying that I personally would like an open rule but that the committee has instructed me to ask for a different rule.

But I think that possibly all of the anxieties of the Members, as far as being able to propose amendments with their specific ideas, this issue I think will be handled properly and everyone would be given an opportunity to present their viewpoints.

Mr. THOMAS of California. Mr. Speaker, will the gentleman yield to me one more time?

Mr. LUNGREN. Under my reservation of objection, I yield to the gentleman from California.

Mr. THOMAS of California. To the distinguished chairman of the Agriculture Committee, the request I make of the distinguished chairman of the Agriculture Committee is not that he go before the Rules Committee and indicate he is personally in support of an open rule, but rather, during the time of the committee hearing, does the gentleman indicate that his position would be, in working with his colleagues on both sides of the aisle in the committee, that his position is support of an open rule? And I try this now for the third time because I am having difficulty indicating what is of some concern to this Member on some assurance that we have a reasonable chance to get an open rule.

I have observed the chairman of the Agriculture Committee and his tremendous ability to convince people to do what is right, and all I am looking for is the assurance of the chairman that his commitment is to support an open rule within the committee structure and work for it. Clearly, the committee has to work its will. But I am confident that there is an excellent chance that the committee's will will be an open rule if the chairman supports it in the committee process. That is my question.

Mr. LUNGREN. Mr. Speaker, I will be happy to yield to the chairman of the Committee on Agriculture, under my reservation of objection.

Mr. DE LA GARZA. I inform my distinguished colleague, the gentleman from California, the committee has already acted. The legislation is out of committee. We are waiting to go to the Rules Committee.

But I will assure the gentleman that I will call a meeting of the committee, assure the committee that I support and open rule, and then let the committee work its will.

Mr. HUCKABY. Mr. Speaker, will the gentleman yield?

Mr. LUNGREN. Under my reservation of objection, Mr. Speaker, I yield to the gentleman from Louisiana.

Mr. HUCKABY. Mr. Speaker, the chairman of the committee has said that he would work for a consensus within the full Agriculture Committee to obtain an open rule. Even if he should, by some reason, not be able to get that, I feel very comfortable by stating that I think the consensus of the committee would be at least to have all of the major competing factions, such as the Conable amendment, in order. I cannot imagine a dairy bill coming to the floor that would not let the various competing interests—and there are varied interests on the different sides of the question—and I would urge the gentleman not to object. The dairy industry is bleeding like it never has been in our lifetime. It is time we resolved this issue. Many of us on the Agriculture Committee have been offering to work with the Secretary of Agriculture for a compromise as far as his feed grain target price, not only to reduce costs, but also to move this dairy legislation that is so vital to this industry throughout the Nation. We are just simply going to have to act when we come back, and I think this October 1 will put more pressure on the entire Congress to act.

I would urge the gentleman not to object.

Mr. LUNGREN. I appreciate the gentleman's remarks.

Mr. MARTIN of New York. Mr. Speaker, will the gentleman yield?

Mr. LUNGREN. Under my reservation of objection, Mr. Speaker, I yield to the gentleman from New York.

Mr. MARTIN of New York. I thank the gentleman for yielding.

Mr. Speaker, I want to respond to the gentleman's original question as to why this comes here at this hour, as the gentleman says, with Members leaving town, and I wanted to explain to the gentleman. The gentleman raises a very good question because I do not think anybody appreciates the circumstances under which it comes here.

□ 1920

But I can say, as someone who has been following this on a day-to-day basis for weeks, and the hard work of the people on the committee, trying to get a bill here so that we can work or will, that the problem was the other body. That came over from the other body today, and that is not the fault of the people here who are trying to get this bill to the floor and work their will.

I want to say one other thing to the gentleman, because I know he is concerned, as he has expressed on a number of occasions, about what such a minimal delay of 30 days is going to cost the taxpayers. I would point out to the gentleman that when the bill comes to the floor, however, it is worked out and whatever the unpleasant alternatives are going to be for the dairy industry, this second 50-cent tax going on this group of farmers for this period of time is going to be undone in any event as part of the new program.

So I would ask the gentleman if he would, while this House is not in session, if we could reserve that back 30 days, only 30 days, I think the gentleman appreciates that everyone here from dairy or nondairy is interested in resolving this problem as soon as possible.

Because it was not the fault of this body, I would ask the gentleman if he would accommodate us for just that 30-day period of time.

Mr. MOORE. Mr. Speaker, will the gentleman yield?

Mr. LUNGREN. Further reserving the right to object, I yield to the gentleman from Louisiana.

Mr. MOORE. I appreciate the gentleman from California yielding.

Mr. Speaker, I respect the gentleman's concern about the deficit spending. I share those same concerns. I come from a district that does have some dairy cows. The dairy farmers in my district do not want to see a big price support program, and there are a number of us in that situation.

You are going to find us coming from dairy areas that are going to support an amendment, the Conable amendment, that is going to reduce their price supports, not create new programs, not create set-asides, but do it in the way it ought to be done, like I think the gentleman from California will vote.

The situation is, as I think a lot of progress has been made here tonight, thanks to the gentleman from California and the distinguished minority leader, who had a reservation before you, the chairman of the Committee on Agriculture, as I understand his remarks, and I think he will ask to be yielded to if I quote him incorrectly, has stated that he will call a meeting of the committee, he will personally say he is in favor of an open rule, he will see to it that the bill gets to the floor as soon as possible in September so this House can work its will.

The gentleman from Louisiana, my colleague, and others, have indicated that even if there is a modified closed rule, which I will not support, even if there is such a rule it will make in order the Conable amendment, which I think is the way the gentleman from California would vote and I would vote, so I think what we have gotten here tonight is the assurance this

thing is going to be taken care of in September.

I think that is an accomplishment. I think it is a step forward. I thank the gentleman for seeing to it that is done, because the dairy industry across the country would like to get it resolved.

I, for one, will not support another delay. I head the gentleman from New York (Mr. CONABLE) say the same thing a moment ago. We are asking for one extension, just one, and the only one, and I would ask the gentleman to indulge us to give the dairy farmer the chance to have this worked out on his behalf, rather then seeing that tax doubled while the Congress is not in session and cannot address that issue.

Mr. LUNGREN. I appreciate the gentleman's remarks.

Mr. STENHOLM. Mr. Speaker, will the gentleman yield?

Mr. LUNGREN. Further reserving the right to object, I yield to the gentleman from Texas.

Mr. STENHOLM. I thank the gentleman for yielding.

Mr. Speaker, the discussion has been very fruitful. I hope the gentleman from California (Mr. LUNGREN) paid particularly close attention to the original statement of the gentleman from Louisiana (Mr. MOORE) that he made concerning the workability of what we are talking about in order to attack the budget problems, that the majority on this committee, and I sense the majority in the House, and certainly those who are still here tonight who are interested in dealing with the cost of the dairy program.

In my judgment, if the gentleman paid particular attention to the gentleman from Louisiana (Mr. MOORE) the best way to get at what you are thinking about objecting to would be to allow a 30-day reprieve and to give the committee and this body the chance to work when we come back. I hope you will pay particular attention to what Mr. MOORE said.

Mr. LUNGREN. I appreciate the gentleman's remarks.

Further reserving the right to object, I would ask the gentleman, is he of the same mind, as expressed by the chairman of the Committee on Agriculture, to support a request for an open rule when the Agriculture bill gets to the floor?

Mr. STENHOLM. If the gentleman will yield further, I have tried my best to follow the leadership of the gentleman from Texas, the chairman of the Committee on Agriculture, on matters as serious as what we are talking about, and I certainly would intend to back my chairman.

Mr. LUNGREN. Well, I appreciate that, but do I understand the gentleman to say that he would, in fact, support and argue for, within that meeting of the Committee on Agriculture, an open rule?

Mr. STENHOLM. Yes; I would.

Mr. LUNGREN. I appreciate that.

Mr. OBERSTAR. Mr. Speaker, will the gentleman yield?

Mr. LUNGREN. Further reserving the right to object, I yield to the gentleman from Minnesota.

Mr. OBERSTAR. I thank the gentleman for yielding.

Mr. Speaker, I compliment the chairman of the Committee on Agriculture on his commitment to work for an open rule. I have supported and open rule on this legislation. Our State of Minnesota has a very keen interest in it. I have written the Speaker urging that when that bill comes to the floor that it come under an open rule, and I have so written to the chairman of the Committee on Rules, and will continue to work for that.

I think it is vitally important that we do so. So I hope the gentleman would not object.

Mr. LUNGREN. I appreciate the gentleman's remarks.

Further reserving the right to object, I just suggest I am not trying to limit this to just one particular part of agriculture or this few people in this institution. As a Member who does not represent agriculture, and I will admit that freely, and does not represent dairy interests, I am concerned about the continuing cost of these programs. I have heard time and time again the promises that the programs that we have orchestrated through compromises involving everybody, including the dairy industry, were going to accord the necessary compromise in that we were going to help the dairy producers such that they would not be going out of business, but we were also going to save the taxpayers and consumers of America reasonable amounts of money.

Now, everybody admits that is not happening. The problem is, most of us who are not on the Committee on Agriculture do not get an opportunity to really deal with those issues because of the form of the rule by which these bills are brought before us. I would just suggest that those of us have virtually no leverage except at times such as these to exercise our influence with respect to a problem that affects every single person and every single district.

Mr. OBERSTAR. If the gentleman will yield further, I share that view. I do not serve on the Committee on Agriculture. That is one of the reasons I have argued for an open rule. I am confident that with what has transpired tonight that that will take place.

Mr. PENNY. Mr. Speaker, I rise in support of the bill directing the Secretary of Agriculture to delay collection of the second 50-cent assessment on dairy production.

We know that the assessments do not reduce the milk surplus. We know that the assessments merely increase the pressure on dairy farmers to add to production because an assessment reduces a farm's cash flow. With fixed costs, farmers must increase production to meet expenses.

This is no way to solve the dairy surplus problem. We know that the first 50-cent assessment added to production. We should not repeat that mistake by imposing another 50-cent assessment.

By delaying the implementation of the second assessment until October, we give Congress time to craft a dairy plan that will work, a dairy plan that reduces the surplus, costs less for the Government, and, most importantly, does not drive family farmers out of business.

I had hoped that we would not be in this situation. I had hoped that we would have developed a better dairy plan for farmers by now. Because we have not, we should at least eliminate the second 50-cent assessment, to give Congress time to develop something better.

I urge my colleagues to support this delay of the second dairy assessment.

● Mr. KASTENMEIER. Mr. Speaker, I rise in support of Senate Joint Resolution 149, which will prevent the Secretary of Agriculture from implementing a second assessment of 50 cents per hundredweight against all milk sold commercially by dairy farmers prior to October 1, 1983.

This measure is the very least we must do with regard to the dairy situation before recessing for the August district work period. Since Agriculture Secretary Block has announced his intention to begin the second 50 cents per hundredweight assessment on September 1, 1983, it is imperative that we approve this joint resolution so that the House and Senate may act on the compromise dairy agreement upon our return to session after Labor Day.

The fact is this 11th-hour action would not be necessary at all if the administration would have agreed to consideration of the compromise dairy proposal on its merits, without demanding that the Congress first approve a 2-year freeze in feed grain target prices. Their unwillingness to support consideration of changes in the dairy program has hardly been in the spirit of compromise which has dominated congressional action on this matter.

We must approve this joint resolution to prevent the needless, harmful, and costly imposition of an additional assessment on the Nation's dairy farmers. They are already suffering dearly from the current 50 cents per hundredweight assessment, or milk tax, which is costing the average dairy farmer in my district more than $250 a month. For many dairy farmers, that is a sizable portion of their monthly net income. If the assessment is allowed to increase to $1 per hundred-

weight, many milk producers will not be able to stay in business.

I urge support for this joint resolution in the hopes that the dairy price support situation can be resolved when we return in September.●

Mr. LUNGREN. Mr. Speaker, I would just say that I will withdraw my reservation based on the understandings that I believe are on the record as a result of the statements of the chairman of the Committee on Agriculture and other members of that committee.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas (Mr. DE LA GARZA)?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 149

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That, prior to October 1, 1983, the Secretary of Agriculture may not implement, under the provisions of section 201(d)(3) of the Agricultural Act of 1949, a second deduction of 50 cents per hundredweight from the proceeds of sale of all milk marketed commercially by producers.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AUTHORIZING CLERK TO MAKE CORRECTIONS IN ENROLLMENT OF H.R. 3190, EXTRA LONG STAPLE COTTON ACT OF 1983

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate concurrent resolution (S. Con. Res. 63) providing that in the enrollment of the bill (H.R. 3190) to establish an improved program for extra long staple cotton, the Clerk of the House of Representatives shall make certain corrections.

The Clerk read the title of the Senate concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

Mr. MADIGAN. Mr. Speaker, reserving the right to object, I will provide the distinguished chairman of the Committee on Agriculture the opportunity to explain to the Members still here assembled exactly what this does.

Mr. DE LA GARZA. Mr. Speaker, will the gentleman yield?

Mr. MADIGAN. I will be happy to yield to the gentleman from Texas.

Mr. DE LA GARZA. I appreciate my distinguished colleague yielding.

Mr. Speaker, this resolution affects H.R. 3190, which was passed by this House. A word was misspelled and a cross-reference number was erroneously omitted. This allows the Clerk to correct the misspelled word and the mis-cross-reference.

Mr. MADIGAN. Further reserving the right to object, I would yield further to the gentleman from Texas so he may advise me if this technical correction involves substituting the word "production" for "provision" and changes the bill only in form and not in substance.

Mr. DE LA GARZA. If the gentleman will yield further, it does not change the bill in any way whatsoever. It is just that the word was misspelled.

Mr. MADIGAN. I thank the gentleman for his explanation.

Mr. Speaker, I withdrew my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the Senate concurrent resolution, as follows:

S. CON. RES. 63

Resolved by the Senate (the House of Representatives concurring), That in the enrollment of the bill (H.R. 3190) to establish an improved program for extra long staple cotton, the Clerk of the House of Representatives shall make the following corrections:

(1) In the eleventh sentence of the proposed subsection (h)(8)(A) of section 103 of the Agricultural Act of 1949, contained in section 4 of the bill, strike out "such provision" and insert in lieu of thereof "such production".

(2) In proposed subsection (h)(9) of section 103 of the Agricultural Act of 1949, contained in section 4 of the bill, strike out "paragraph (3)" and insert in lieu thereof "paragraph (8)".

The Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on Senate Concurrent Resolution 63 and on Senate Joint Resolution 149, both previously approved.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 3409. An act to amend the Federal Supplemental Compensation Act of 1982 with respect to the number of weeks of benefits paid in any States.

□ 1930

DESIGNATING SEPTEMBER 26, 1983 AS "NATIONAL HISTORICALLY BLACK COLLEGES DAY"

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 85) to designate September 26, 1983, as "National Historically Black Colleges Day," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. CAMPBELL. Mr. Speaker, reserving the right to object, and I shall not object, I commend the committee for bringing this resolution to the floor and commend my colleague, the gentleman from Tennessee (Mr. FORD), who along with myself offered the House bill. I think it is most worthy.

I believe all Members, had they realized what this was, would have joined in sponsorship of this legislation.

Mr. Speaker, it is with great pleasure that I rise to support Senate Joint Resolution 85, which designates September 26, 1983, as "National Historically Black Colleges Day" to recognize the contributions that have been made by the black colleges and universities of this Nation. This legislation is a companion to House Joint Resolution 105, which I introduced, and I urge the adoption of the resolution.

I would like to thank my distinguished colleague, HAROLD FORD, who joined me in the introduction of this bill and who has worked very hard toward its passage. Furthermore, I would like to recognize the members of the Committee on the Post Office and Civil Service for their interest and assistance in this matter. Finally, I thank all of my colleagues who supported this resolution by cosponsoring it.

The 103 historically black colleges and universities in the United States have contributed monumentally to the progress of education among blacks over the last century and a half. I am especially pleased to have seven of these fine institutions in my State: Allen University, Benedict College, Claflin College, Clinton Junior College, Morris College, South Carolina State College, and Voorhees College. These schools, along with their counterparts in 19 States, the District of Columbia, and the Virgin Islands, graduate more than 30,000 young black Americans each year in every field of education. In fact, over 85 percent of the black doctors and lawyers in this Nation are graduates of one of these postsecondary institutions.

History attests to the many achievements of those who have excelled in the area of black education. Unfortunately, history also attests to the struggles through which these individuals and institutions have gone. Some have been forced to succumb along the way, but the wills of many prevailed and we can now, as the Nation's legislative body, say to those who put forth the supreme effort: "Yours is a dream fulfilled!"

● Mr. FORD of Tennessee. Mr. Speaker, I rise in support of Senate Joint Resolution 85, which authorizes President Reagan to declare September 26, as "National Historically Black Colleges Day."

Congressman CARROLL CAMPBELL and I jointly introduced this resolution to pay special tribute and recognition to the vital achievements and goals of the historically black colleges and universities in America.

There are 103 historically black colleges and universities located across the Nation. Many of these institutions are well over 100 years old. These institutions have a rich heritage and have played a prominent role in American history. They have produced upward of 70 percent of all black graduates since the birth of our Nation. They are a vital national resource, and have been the breeding ground which has nurtured much of America's black leadership.

In the future, they will produce in excess of 300,000 college graduates every 10 years. Their record is beyond comparsion, more than 50 percent of the Nation's black business executives and elected officials are graduates of our historically black institutions, and I am proud to include myself in that statistic, as I am a product of two historically black universities, Tennessee State University and Howard University.

Additionally 75 percent of black Americans with Ph. D. degrees, 75 percent of black military officers, 80 percent of black Federal judges, and 85 percent of black physicians are graduates of historically black insitutions.

These graduates attest to the quality education they received and many have gone on to attain recognition for distinguished accomplishments in their chosen professions.

I have had firsthand experience regarding the important role these institutions have played, for I am a graduate of two historically black universities. They continue to be of vital importance. They have championed the cause of equal opportunity and quality education and have provided this opportunity to those who were denied it, or could not afford it. The Nation's historically black colleges and universities have assumed leadership roles in the development of techniques for overcoming handicaps of the educationally disadvantaged, served as custodians of archives of black Americans, and as centers of the study of the rich cultural contributions of blacks to America.

I am a strong supporter of this legislation, not just as a Member of Congress who happens to be black, but also because, as I mentioned previously, I am a product of these institutions myself, and I sincerely believe that these historically black colleges and universitties deserve this day of recognition, which is a small tribute in comparison to their longstanding contributions to this Nation.

I want to thank all of my colleagues who joined in sponsoring this resolution, and I urge its adoption.●

Mr. CAMPBELL. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 85

Whereas there are one hundred and three historically black colleges and universities in the United States; and

Whereas they are providing the quality education so essential to full participation in our complex, highly technological society; and

Whereas black colleges and universities have a rich heritage and have played a prominent role in American history; and

Whereas these institutions have allowed many underprivileged students to attain their full potential through higher education; and

Whereas the achievements and goals of these historically black colleges are deserving of national recognition: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That September 26, 1983, is designated as "National Historically Black Colleges Day" and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States and interested groups to observe that day by engaging in appropriate ceremonies, activities, and programs, thereby showing their support of historically black colleges and universities in the United States.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

DESIGNATING WEEK BEGINNING AUGUST 7, 1983, AS "NATIONAL CORRECTIONAL OFFICERS WEEK"

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the joint resolution (H.J. Res. 295) to designate the week beginning August 7, 1983, as "National Correctional Officers Week," and ask for its immediate consideration.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. COURTER. Reserving the right to object, Mr. Speaker, and I will not object, this matter has been debated in the subcommittee. A number of Members on our side of the aisle are in favor of its passage. I just wanted the other side to know that the minority has no objection.

● Mr. TRAXLER. Mr. Speaker, I rise in complete support of House Joint Resolution 295, which seeks to declare the week of August 7, 1983, as "National Correctional Officers Week."

I want to take this opportunity to thank the gentle lady from Indiana, Mrs. HALL, the chairperson of the Subcommittee on Census and Population of the House Post Office and Civil Service Committee for moving this measure so quickly following my obtaining the required number of cosponsors for this bill's consideration.

Mr. Speaker, correctional officers are an extremely important part of our society. They have a job that very few people want. They have to deal with criminals on a daily basis, and in doing so they are making valiant efforts to help those convicted obtain an important sense of respect, both for themselves and for the law.

The American Correctional Association, which was founded in 1870, boasts over 12,000 members across the country. These individuals are correctional officers and administrative personnel in all of our rehabilitative facilities. There are about 6,000 correctional facilities in the country at the State and local level, with about 20 percent of these facilities being for the correction of juvenile offenders. Over 4,100 of the 6,000 facilities are local ones, operated by county and municipal governments, and according to recent surveys, all of these institutions house about 600,000 convicted individuals.

Many people think of the correctional officer as the hardened, uncaring individual that we saw in many of the prison movies of the thirties and forties. While this representation may make for an entertaining movie, it does not accurately reflect the dedicated professionals who are our Nation's correctional officers. The years of training and retaining, the strain of trying to help offenders reform, and the bitter sorrow when these efforts fail all take their toll on correctional officers. But this does not turn them into callous individuals. In fact, it is testimony to the fact that correctional officers do care. To work in the face of such difficult tensions shows that these individuals are truly professionals of the highest order.

The American Correctional Association has over 60 member organizations, including the American Association of Correctional Officers which is holding its convention in Chicago later this week. Mr. Speaker, this organization which has several thousand members is very interested in our activities here. This is one of those times when we must take a moment out of our daily lives to say "thank you," and to honor those who do those things that are important to our entire society, even though few want to undertake these very difficult tasks. It is for this reason—to thank those individuals who so unselfishly have undertaken an important and risky profession—that I have introduced House Joint Resolution 295, and ask for its immediate approval by our colleagues.

I also ask unanimous consent that the list of cosponsors of House Joint Resolution 295 be printed in the RECORD at this point.

COSPONSORS OF HOUSE JOINT RESOLUTION 295

Mr. Ackerman, Mr. Addabbo, Mr. Akaka, Mr. Albosta, Mr. Alexander, Mr. Anderson, Mr. Andrews of North Carolina, Mr. Andrews of Texas, Mr. Annunzio, Mr. AuCoin, Mr. Barnard, Mr. Barnes, Mr. Bateman, Mr. Bates, Mr. Bennett, Mr. Bereuter, Mr. Berman, Mr. Bevill, Mr. Biaggi, Mrs. Boggs, Mr. Boner of Tennessee, Mr. Bonior of Michigan, Mr. Boucher, Mrs. Boxer, Mr. Britt, Mr. Brooks, Mr. Broomfield, Mr. Brown of California, Mr. Broyhill, Mr. Bryant, Mr. Campbell, Mr. Carper, Mr. Carr, Mr. Chappell, Mr. Chappie.

Mr. Clarke, Mr. Conte, Mr. Conyers, Mr. Corcoran, Mr. Corrada, Mr. Daniel B. Crane, Mr. Crockett, Mr. Coughlin, Mr. D'Amours, Mr. Daniel, Mr. Daub, Mr. Davis, Mr. de Lugo, Mr. Dickinson, Mr. Dicks, Mr. Dingell, Mr. Dixon, Mr. Donnelly, Mr. Dowdy of Mississippi, Mr. Duncan, Mr. Dwyer of New Jersey, Mr. Dymally, Mr. Dyson, Mr. Early, Mr. Edgar, Mr. Emerson, Mr. English, Mr. Fascell, Mr. Fauntroy, Mr. Fazio, Ms. Ferraro, Mr. Fish, Mr. Ford of Michigan, Mr. Ford of Tennessee, Mr. Forsythe.

Mr. Fowler, Mr. Frenzel, Mr. Frost, Mr. Fuqua, Mr. Gekas, Mr. Gibbons, Mr. Gilman, Mr. Gramm, Mr. Gray, Mr. Green, Mr. Gunderson, Mr. Sam B. Hall, Jr., Mr. Hammerschmidt, Mr. Hance, Mr. Hansen of Idaho, Mr. Harkin, Mr. Harrison, Mr. Hatcher, Mr. Hefner, Mr. Heftel of Hawaii, Mr. Hertel of Michigan, Mr. Hightower, Mrs. Holt, Mr. Horton, Mr. Hoyer, Mr. Hughes, Mr. Hutto, Mr. Hyde, Mr. Jeffords, Mr. Jenkins, Mr. Jones of North Carolina, Ms. Kaptur, Mr. Kasich, Mr. Kastenmeier, Mr. Kazen.

Mr. Kemp, Mr. Kildee, Mr. Kolter, Mr. Kostmayer, Mr. LaFalce, Mr. Lagomarsino, Mr. Lantos, Mr. Leath of Texas, Mr. Lehman of Florida, Mr. Leland, Mr. Lent, Mr. Levin of Michigan, Mr. Levine of California, Mr. Livingston, Mr. Long of Maryland, Mr. Luken, Mr. Madigan, Mr. Markey, Mr. Martin of New York, Mr. Martin of North Carolina, Mr. Martinez, Mr. Matsui, Mr. Mavroules, Mr. Mazzoli, Mr. McCollum, Mr. McDonald, Mr. McEwen, Mr. McGrath, Mr. McHugh, Mr. McNulty, Mr. Mica, Mr. Mineta, Mr. Moakley, Mr. Mollohan.

Mr. Moore, Mr. Morrison of Connecticut, Mr. Mrazek, Mr. Murphy, Mr. Murtha, Mr. Myers, Mr. Natcher, Mr. Neal, Mr. Nichols, Mr. Nielson of Utah, Mr. O'Brien, Mr. Oberstar, Mr. Ortiz, Mr. Ottinger, Mr. Owens, Mr. Panetta, Mr. Pashayan, Mr. Patman, Mr. Patterson, Mr. Pepper, Mr. Price, Mr. Pritchard, Mr. Pursell, Mr. Rahall, Mr. Rangel, Mr. Ratchford, Mr. Reid, Mr. Richardson, Mr. Roberts, Mr. Robinson, Mr. Rodino, Mr. Roe, Mr. Roemer, Mr. Rowland, Mr. Sabo.

Mr. Sawyer, Mr. Scheuer, Mrs. Schneider, Mr. Schumer, Mr. Shaw, Mr. Shumway, Mr. Siljander, Mr. Simon, Mr. Skelton, Mr. Robert F. Smith, Mr. Smith of Florida, Mr. Smith of Iowa, Mrs. Smith of Nebraska, Mr. Smith of New Jersey, Mr. Snyder, Mr. Solarz, Mr. Spence, Mr. Stangeland, Mr. Stark, Mr. Stokes, Mr. Stump, Mr. Sunia, Mr. Tallon, Mr. Tauke, Mr. Tauzin, Mr. Thomas of Georgia, Mr. Torricelli, Mr. Towns, Mr. Udall, Mr. Valentine, Mr. Vandergriff, Mr. Vander Jagt, Mr. Vento, Mr. Watkins, Mr. Waxman, Mr. Weaver, Mr. Weiss, Mr. Wheat, Mr. Whitley, Mr. Whittaker, Mr. Whitten, Mr. Williams of Montana, Mr. Williams of Ohio, Mr. Wilson, Mr. Winn, Mr. Wolpe, Mr. Won Pat, Mr. Wortley, Mr. Young of Alaska.●

Mr. COURTER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. FAZIO. Reserving the right to object, Mr. Speaker, and I will not object, I wish to commend the committee for bringing this very noteworthy and long awaited resolution to the floor.

I would like to commend my colleague the gentlewoman from Indiana and my colleague the gentleman from Michigan for focusing much-deserved attention on the achievements of this Nation's correctional officers. I am a cosponsor of the gentleman's resolution (H.J. Res. 295) to proclaim the week of August 7, 1983, as "National Correctional Officers Week" and am pleased that this measure is now before us for consideration.

The entertainment industry often paints a picture of correctional officers which portrays them as callous and inhumane. However, the perpetuation of such myths does a great disservice to the hard working and dedicated officers who daily perform a service which is vitally needed by our society and who do so under highly stressful and even life-threatening circumstances. They do a tough, sometimes dangerous, job for all of us.

California's Fourth Congressional District, which I represent, directly benefits from the skills and devotion of correctional officers, since two State correctional facilities—Folsom Prison and Vacaville Medical Facility—are located there. The employees of these facilities and their families are valued participants in the life of their communities. They have contributed to a public attitude that considers the location of these prisons to be a local asset. It is my experience that the correctional officers at those facilities, as well as those who work at the county level in local jails, are top-notch individuals committed to the utmost professionalism in their jobs. It is fitting that we set aside a week to provide national recognition and praise to correctional officers across the Nation.

Mr. FAZIO. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 295

Whereas American correctional officers who work in our jails and prisons are currently responsible for the containment and control of over six hundred thousand prisoners;

Whereas correctional officers must protect inmates from violence while encouraging them to develop skills and attitudes that can help them become productive members of society following their release;

Whereas the morale of correctional officers is affected by many factors, and the public perception of the role of correctional officers is more often based upon dramatization rather than factual review;

Whereas good job performance requires correctional officers to absorb the adverse attitudes present in confinement while maintaining themselves as professionals in order to have their actions appreciated and accepted by the public at large;

Whereas the American Association of Correctional Officers will be holding its annual convention August 5-6, 1983; and

Whereas the attitude and morale of correctional officers is a matter worthy of serious congressional attention: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week beginning August 7, 1983, hereby is designated "National Correctional Officers Week" and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate ceremonies and activities.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

DESIGNATING THE MONTH OF SEPTEMBER OF EACH YEAR AS "NATIONAL SEWING MONTH"

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the joint resolution (H.J. Res. 218) to designate the month of September of each year as "National Sewing Month," and ask for its immediate consideration.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 218

Whereas the sewing industry annually honors the approximately fifty million people who sew at home and the approximately forty million people who sew at least part of their wardrobe;

Whereas the home sewing industry generates over $3,500,000,000 annually for the economy of the United States; and

Whereas innumerable careers in fashion, retail merchandizing, design, patternmaking, and textiles have had their geneses in the home and in elementary school home economics classes: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the month of September of each year is designated "National Sewing Month". The President is requested to issue a proclamation calling upon the people of the United States to observe that month with appropriate ceremonies and activities.

AMENDMENT OFFERED BY MR. GARCIA

Mr. GARCIA. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GARCIA: Page 2, line 3, strike "that the month of September of each year is designated" and insert in lieu thereof "that the month of September of 1983 is designated".

The SPEAKER pro tempore. The question is on the amendment offered by the gentleman from New York (Mr. GARCIA).

The amendment was agreed to.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed.

TITLE AMENDMENTS OFFERED BY MR. GARCIA

Mr. GARCIA. Mr. Speaker, I offer an amendment to the title.

The Clerk read as follows:

Title amendment offered by Mr. GARCIA: Strike "to designate the month of September of each year as 'National Sewing Month'" and insert in lieu thereof "To designate the month of September of 1983 as 'National Sewing Month'".

The title amendment was agreed to.

A motion to reconsider was laid on the table.

DESIGNATING WEEK OF SEPTEMBER 4, 1983, TO SEPTEMBER 10, 1983, AS "YOUTH OF AMERICA WEEK"

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 116) to designate the week of September 4, 1983, through September 10, 1983, as "Youth of America Week," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. COURTER. Reserving the right to object, Mr. Speaker, I reserve the right to object to ask the gentleman from New York a question under my reservation.

I would like to ask the gentleman whether this matter was brought up a week ago or a couple weeks ago?

It is my understanding it was brought up at that time and people made comments in the RECORD.

Why is it brought up again today?

I yield to the gentleman.

Mr. GARCIA. Mr. Speaker, if the gentleman will yield, my response is that I really do not know. I was not the one charged with this on the floor when it was brought up the last time, so I cannot respond.

PARLIAMENTARY INQUIRY

Mr. COURTER. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. COURTER. Mr. Speaker, some people spoke so eloquently a couple weeks ago when this was brought up before, brought up by unanimous consent.

Can those comments that were placed in the RECORD by the people who were here a couple weeks ago be inserted in the RECORD at his point?

The SPEAKER pro tempore. By unanimous consent

Mr. COURTER. Mr. Speaker, I ask unanimous consent that those comments I just referred to may be placed in the RECORD at this point.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. COURTER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

S.J. RES. 116

Whereas the children of our Nation are the most valuable natural resource for the future of the country;

Whereas the sharing of knowledge, experiences, and wisdom by adults with children will help to nurture the development in our youth of democratic principles and strong moral and spiritual values, so important to the survival and future betterment of our Nation; and

Whereas all of the people of the United States can be involved in the development of such important principles and values in the youth of America; Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of September 4, 1983, through September 10, 1983, is designated as "Youth of America Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe the week with appropriate programs, ceremonies, and activities.

DESIGNATING OCTOBER 2 THROUGH OCTOBER 9, 1983, AS NATIONAL HOUSING WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate joint resolution (S.J. Res. 98) to designate October 2 through October 9, 1983, as "National Housing Week," and ask for its immediate consideration in the House.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. COURTER. Reserving the right to object, Mr. Speaker, under my reservation I would like to ask the gentleman from New York as to why this is put on the calendar for today? We were given four items and this did not appear as one of those items. I was wondering whether this was an oversight as to why it is brought up today, what the significance is? I have not really heard too much about this.

I yield to the gentleman from New York.

Mr. GARCIA. Mr. Speaker, if the gentleman will yield, I just was told by counsel that this just came over from the Senate 20 minutes ago. Again, I am just, as the gentleman knows, I no longer chair this committee. I am doing this as a favor to the chairwoman of this committee.

Mr. AUCOIN. Mr. Speaker, will the gentleman yield?

Mr. COURTER. Under my reservation, I yield to the gentleman from Oregon.

Mr. AUCOIN. Mr. Speaker, the statement of the gentleman from New York is absolutely correct. It has just recently, in a matter of minutes came over from the Senate.

This declares a "National Housing Week" from October 2 through 9. If the Congress does not pass it now, because of the recess, obviously, there will not be time to issue a proclamation and have the various machinery take place to make it effective; so we have before us a resolution supported by the administration, cleared by the OMB and, in fact, HUD has been soliciting cosponsors of the resolution.

I would hope Members would support it.

Mr. COURTER. Under my reservation, Mr. Speaker, I just make the observation, particularly in lieu of the fact that the housing market has now turned around with increased starts outperforming last year and the year before, which I think is indicative of the resurgence of the economy.

Mr. GARCIA. Mr. Speaker, I thank the gentleman.

Mr. COURTER. Mr. Speaker, I certainly have no objection and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. CRAIG. Reserving the right to object, Mr. Speaker, and I will not object, I think it is appropriate that we move as expeditiously as we can on Senate Joint Resolution 98, designating October 2 through 9 as "National Housing Week." I certainly join with my colleague in echoing that the housing industry in this Nation is making a major comeback; but anything this body can do to assist in drawing to the attention of the American public the importance of the housing industry on giving them a national week in which to have that opportunity, not only to express their enthusiasm, but I think also to express their concerns, that even as of last week we saw interest rates move up a full point, which at that time caused a lot of shudders in the industry, both in the housing industry and in the real estate industry, and that this body by this action ought well to recognize the importance of housing, and I think we do so.

Mr. CRAIG. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 98

Whereas housing is helping to lead the Nation out of recession creating jobs for the unemployed, tax revenue for Government and raising economic confidence throughout America;

Whereas the construction of between one million four hundred thousand and one million six hundred thousand housing starts in 1983—a dramatic increase from 1982—will create millions of worker-years of employment in construction and construction-related industries, billions in wages and billions in tax revenue for local, State and Federal governments;

Whereas an upturn in home sales and housing production has triggered every economic recovery since World War II;

Whereas to sustain this housing-led recovery, it is essential that interest rates continue to fall to increase housing affordability;

Whereas homeownership and decent housing instill pride and contribute to the stability and vitality of communities throughout America;

Whereas it is appropriate to reaffirm our Nation's historic commitment to housing and homeownership as a national priority and to recognize and sustain the role that housing plays in the economic recovery: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That October 2 through 9, 1983, be declared "National Housing Week" and that the President of the United States be authorized and requested to issue a proclamation calling upon all people of the United States to observe this week with appropriate ceremonies and activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PROVIDING FOR THE ESTABLISHMENT OF A COMMISSION ON THE BICENTENNIAL OF THE CONSTITUTION

Mr. GARCIA. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 118) to provide for the establishment of a Commission on the Bicentennial of the Constitution, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

□ 1940

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 118

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there is established a Commission on the Bicentennial of the United States Constitution, hereinafter referred to as the "Commission".

FINDINGS

SEC. 2. The Congress finds that—

(1) the bicentennial of the Constitutional Convention's adoption of the Constitution occurs on September 17, 1987;

(2) the Constitution enunciates the limitations on government, the inalienable rights, and the timeless principles of individual liberty and responsibility, and equality before law, for the people of the United States of America;

(3) this document has set an enduring example of representative democracy for the world; and

(4) the maintenance of the common principles that animate our Republic depend upon a knowledge and understanding of their roots and origins.

PURPOSE

SEC. 3. It is the purpose of this Act to establish a Commission to promote and coordinate activities to commemorate the bicentennial of the Constitution.

MEMBERSHIP

SEC. 4. (a) The Commission shall be composed of sixteen members as follows:

(1) thirteen members appointed by the President, three of whom shall be appointed from among the recommendations made by the Speaker of the House of Representatives (in consultation with the minority leader of the House of Representatives), three of whom shall be appointed from among the recommendations made by the president pro tempore of the Senate, in consultation with the majority leader and minority leader of the Senate, and three of whom shall be appointed from among the recommendations made by the Chief Justice of the United States;

(2) the Chief Justice of the United States, or his designee;

(3) the President pro tempore of the Senate, or his designee; and

(4) the Speaker of the House of Representatives, or his designee.

(b) Each of the individuals making recommendations to the President regarding appointments shall seek to achieve a balanced membership representing, to the maximum extent practicable, the Nation as a whole. The Commission members shall be chosen from among individuals who have demonstrated scholarship, a strong sense of public service, expertise in the learned professions, and abilities likely to contribute to the fulfillment of the duties of the Commission.

(c) Members of the Commission shall be appointed for the life of the Commission.

(d) The Commission shall select a chairman from among its members who shall serve as Chairman for the life of the Commission.

(e) Eight members of the Commission shall constitute a quorum, but a lesser number may conduct meetings.

(f) A vacancy in the Commission resulting from the death or resignation of a member shall not affect its powers, and shall be filled in the same manner in which the original appointment was made.

ADMINISTRATIVE PROVISONS AND POWERS

SEC. 5. (a) The Commission shall appoint a staff director who shall be paid at a rate not to exceed the rate of basic pay provided for level I of the Executive Schedule pursuant to section 5312 of title 5, United States Code.

(b) The Commission is authorized to appoint and fix the compensation, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, of such additional publicly paid personnel up to five persons, as the Chairman finds necessary to carry out the purposes of this title. Such personnel shall be compensated at a rate not to exceed a rate equal to the maximum rate of pay for GS-18 of the General Schedule under section 5332 of title 5, United States Code.

(c) Subject to the provisions of this subsection, the Commission may appoint and fix the pay of such additional personnel to be paid out of private donations. An individual appointed to a position funded in such manner shall be so designated at the time of such individual's appointment. The Chairman may appoint such additional personnel as he deems appropriate, not to exceed thirty staff members. If the Chairman deems it appropriate to make appointments in excess of such thirty-person limit, he shall notify the Chairman of the Committee on Post Office and Civil Service in the House of Representatives and the Chairman of the Committee on the Judiciary in the Senate. If neither House Committee disapproves the appointments in excess of the limit by an affirmative vote of the full committee within sixty days after receiving notice of the appointments, the personnel appointed in excess of the limit to be paid out of private donations shall become permanent personnel.

(d) Each member of the Commission shall serve without being compensated as a member of such Commission, except that each member shall be reimbursed for travel, subsistence, and other necessary expenses

incurred by them in the performance of their duties.

(e)(1) Upon request of the Commission, the head of any Federal agency may detail any of the personnel of such agency to the Commission to assist the Commission in carrying out its duties under this Act. Details under this subsection shall be without reimbursement by the Commission to the agency from which the employee concerned was detailed.

(2) The Commission may accept the services of not to exceed twenty employees under this subsection at any time.

(f) The Commission is authorized to procure supplies, services, and property, and make contracts, in any fiscal year, only to such extent or in such amounts as are provided in appropriation Acts or are donated pursuant to subsection (h) of this section.

(g) The Commission is authorized to enter into agreements with the General Services Administration for procurement of necessary financial and administrative services, for which payment shall be made by reimbursement from funds of the Commission in such amounts as may be agreed upon by the Chairman and the Administrator of the General Services Administration.

(h)(1) The Commission is authorized to accept, use, solicit, and dispose of donations of money, property, or personal services.

(2) The Commission shall prescribe regulations under which the Commission may accept donations of money, property, or personal services, except that under such regulations, the Commission may not accept donations—

(A) the value of which exceeds $25,000 annually, in the case of donations from an individual; or

(B) the value of which exceeds $100,000 annually, in the case of donations from a corporation, partnership, or other business organization.

(1) plan and develop activities appropriate to commemorate the bicentennial of the Constitution, including a limited number of projects to be undertaken by the Federal Government seeking to harmonize and balance the important goals of ceremony and celebration with the equally important goals of scholarship and education;

(2) encourage private organizations, and State and local governments to organize and participate in bicentennial activities commemorating or examining the drafting, ratification, and history of the Constitution and the specific features of the document;

(3) coordinate, generally, activities throughout all of the States; and

(4) serve as a clearinghouse for the collection and dissemination of information about bicentennial events and plans.

(b) In planning and implementing appropriate activities to commemorate the bicentennial, the Commission shall give due consideration to—

(1) the historical setting in which the Constitution was developed and ratified, including such antecedents as the Federalist Papers, the Articles of the Confederation, and the ratification debates in the States;

(3) The regulations prescribed under this subsection shall include procedures for determining the value of donations of property or personal services.

(4) The limitations set forth in this subsection shall not apply in the case of an organization if it is an organization described in section 501(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C. 501(c)(3)), and exempt from taxation under section 501(a) of such Code.

(i) The Commission may use the United States mails in the same manner and under the same conditions as other departments and agencies of the United States.

(j) The Commission shall have the authority to design and use a logo as the official emblem of the bicentennial. The Commission shall issue rules and regulations, including penalties for unauthorized use, regarding the use of such logo, except that under those regulations, the Commission shall be prohibited from selling, leasing, or otherwise granting to any corporation or private person the right to use the logo in connection with the production or manufacture of any commercial goods, as part of an advertisement promoting any commercial goods or services, or as part of an endorsement for any such goods or services.

DUTIES OF THE COMMISSION

SEC. 6. (a) The Commission shall—

(2) the contribution of diverse ethnic and racial groups;

(3) the relationship and historical development of the three branches of the Government;

(4) the importance of activities concerning the Constitution and citizenship education throughout all of the States regardless of when such State achieved statehood;

(5) the unique achievements and contributions of the participants in the Constitutional Convention of 1787 and the State ratification proceedings;

(6) the diverse legal and philosophical views regarding the Constitution;

(7) the need for reflection upon both academic and scholarly views of the Constitution and the principle that the document must be understood by the general public;

(8) the substantive provisions of the Constitution itself;

(9) the impact of the Constitution on American life and government;

(10) the need to encourage appropriate educational curriculums designed to educate students at all levels of learning on the drafting, ratification, and history of the Constitution and the specific provisions of that document; and

(11) the significance of the principles and institutions of the Constitution to other nations and their citizens.

(c) The Commission shall seek the cooperation, advice, and assistance from both private and governmental agencies and organizations, including the National Endowment for the Arts, the National Endowment for the Humanities, the Library of Congress, the Smithsonian Institution, the National Archives, the Department of the Interior, State and local governments, learned societies, academic institutions, and historical, patriotic, philanthropic, civic, and professional groups, and bar associations.

(d) The Commission may, in carrying out the purposes of this Act, delegate authority to State advisory commissions to assist in implemeting this Act.

(c) Within two years after the date of enactment of this Act, the Commission shall submit to the President and each House of the Congress and the Judicial Conference of the United States a comprehensive report incorporating specific recommendations of the Commission for commemoration and coordination of the bicentennial and related activities. Such report shall include recommendations for publications, scholarly projects, conferences, programs, films, libraries, exhibits, ceremonies, and other projects, competitions and awards, and a calendar of major activities and events planned to commemorate specific historical dates. Each year after such comprehensive report, the Commission shall submit an annual report to the President, each House of the Congress, and the Judicial Conference until such Commission terminates.

TERMINATION

SEC. 7. The Commission shall terminate on December 31, 1989.

AUTHORIZATION OF APPROPRIATIONS

SEC. 8. There are authorized to be appropriated to carry out the purposes of this Act $300,000 for fiscal year 1984 and such sums as may be necessary for the subsequent fiscal years through fiscal year 1989.

EFFECTIVE DATE

SEC. 9. This Act shall become effective on the date of enactment.

AMENDMENT OFFERED BY MR. GARCIA

Mr. GARCIA. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GARCIA:

Page 2, lines 16–17, strike out "sixteen" and insert in lieu thereof "twenty-three".

Page 2, line 18, strike out "thirteen" and insert in lieu thereof "twenty".

Page 2, line 19, strike out "three" and insert in lieu thereof "four".

Page 2, line 22, strike out "three" and insert in lieu thereof "four".

Page 3, line 1, strike out "three" and insert in lieu thereof "four".

Page 3, strike out lines 20–22 and insert in lieu thereof the following:

(d) One of the members shall be designated as Chairman by, and shall serve in the position of Chairman at the pleasure of, the President.

Page 3, line 23, strike out "Eight" and insert in lieu thereof "Twelve".

Page 5, line 2, strike out "thirty" and all that follows thereafter through the period in line 12, and insert in lieu thereof "forty staff members.".

Mr. GARCIA (during the reading). Mr. Speaker, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection of the request of the gentleman from New York?

There was no objection.

The SPEAKER pro tempore. The question is on the amendment offered by the gentleman from New York (Mr. GARCIA).

The amendment was agreed to.

The SPEAKER pro tempore. The gentleman from New York (Mr. GARCIA) is recognized for 1 hour.

Mr. GARCIA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, S. 118 passed the Senate unanimously on July 18, 1983. This bill would establish a Presidential Commission for the expressed purpose of planning and conducting a meaningful national celebration to mark the 200th anniversary of the drafting and ratification of the U.S. Constitution and the Bill of Rights.

The President is fond of telling audiences that America is the last best hope for mankind. If we are, it is because our Constitution guarantees all men and women equality. In addition, it secures rights and freedoms un-

matched anywhere else in the world. That is why the people of this Nation have reposed great faith in the principles which the Constitution embodies.

The constitutional bicentennial presents an unique opportunity to instill in our citizenry a greater sense and understanding of the rights, privileges, and opportunities afforded by the Constitution.

I will forgo a lengthy review of the bill's provisions but I would like to highlight a few major items contained in the Senate-passed bill.

As passed by the Senate, the Commission will be composed of 16 members appointed by the President. Congress and the Judiciary shall each recommend to the President an equal number of members to be appointed by the President.

The bill caps the number of staff that may be hired from either private or donated funds. Furthermore, the bill places an annual limitation on the amount individuals or businesses may contribute to the Commission, and it also precludes the use of the official logo for any private, commerical, or promotional endeavor.

There is authorized to be appropriated $300,000, for fiscal year 1983 and such sums as are required in subsequent fiscal years.

Finally, the Commission terminates on December 31, 1989.

Since Senate passage of S. 118 last month, the White House has requested certain amendments. They have asked for an increase in the size of the Commission and in the number of direct Presidential appointments; the authority to select the Chairman of the Commission; and certain changes relating to staff employment. The requested changes are acceptable to the committee as well as Senate sponsors. I will explain each amendment in further detail at the appropriate time.

Mr. Speaker, there is an urgent need to get the necessary planning for this historic anniversary underway as soon as possible. The administration knows this and, in fact, is poised to establish a Commission by Executive order if we fail to act before we adjourn for the August distict work period. By failing to act, Congress, as a coequal branch of the Government, would be relinquishing to the Executive, its right to participate directly in an event celebrating the formation of our Government. That is not only unwise, but foolish.

I urge my colleagues to support this legislation, and I include a summary of the major provisions of S. 118, as passed by the Senate, at this point in the RECORD.

SUMMARY OF MAJOR PROVISIONS OF SUBSTITUTE AMENDMENT FOR S. 118

(PASSED THE SENATE ON JULY 18, 1983)

Section 1: Establishes a Commission on the Bicentennial of the Constitution of the United States.

Section 2: Sets forth Congressional findings regarding the U.S. Constitution and the need for a Commission to commemorate the bicentennial of the Constitution.

Section 3: States that the purpose of the Act is to establish a Commission to commemorate the bicentennial of the Constitution.

Section 4: Establishes a 16-member Commission which shall, to the maximum extent practicable, be representative of the nation. Thirteen members shall be appointed by the President. The Speaker of the House of Representatives and the President pro tempore of the Senate shall each recommend three (3) members to the President to be appointed. In addition, the Speaker, Senate President pro tempore and the Chief Justice of the United States or their designees shall serve as members of the Commission.

Members shall be appointed for the life of the Commission and shall elect a Chairman from among the members of the Commission.

Section 5: Provides for the appointment of a staff director and five additional staff to be paid from public funds.

An additional thirty persons may be appointed to the staff provided they are paid from donated funds. The Chairman of the Commission may hire additional personnel in excess of the thirty-person limit. However, the House and Senate Committees of jurisdiction must be notified of such additional appointments. Either Committee may, within 30 days after receiving such notice, by affirmative vote of the full Committee, disapprove the appointment of the additional personnel.

The Commission is authorized to accept not more than twenty persons detailed from federal agencies.

This Section also limits the amount individuals and businesses may donate to the Commission annually. In the case of an individual, the limit is $25,000; a business is limited to a $100,000 annual donation. These limitations do not apply to not-for-profit organizations exempt from taxation under the Internal Revenue Code.

The Commission is barred, under this section, from leasing, selling, and otherwise granting to any person, the right to use the Commission's official logo in connection with any commercial related activity.

Section 6: Enumerates the duties of the Commission which are essentially to plan appropriate activities and encourage nationwide participation in the bicentennial commemoration.

Within two years of enactment, the Commission is directed to submit to the President, Congress and the Judicial Conference of the United States, a report with specific recommendations for commemorating the bicentennial of the Constitution.

Section 7: Commission terminates on December 31, 1989.

Section 8: Authorizes $300,000 for fiscal year 1983 and such sums as are necessary for subsequent fiscal years.

Section 9: Act takes effect upon enactment.

EXPLANATION OF AMENDMENTS

Mr. Speaker, this amendment has three parts. First, the size of the Commission would be expanded from 16 to 23 members. The amendment provides the President with an additional four appointees. The Speaker, Senate President pro tempore, and the Chief Justice would each recommend one additional member of the Commission to the President for appointment.

The second part of the amendment would permit the President to name the Commission's Chairman.

The final part of the amendment eliminates a provision in S. 118 relating to the appointment of staff paid from donated funds. The bill would have required the Chairman of the Commission to notify both House and Senate oversight committees of the appointment of any staff in excess of the 30-person limit. Either committee could have, within 30 days after receiving such notice, disapproved the appointment of such additional staff by an affirmative vote of the committee. This provision appears to violate the recent Supreme Court decision which invalidated legislative vetoes. Accordingly, this provision is deleted and replaced with an absolute staff ceiling. Although there is an increase of 10 staff positions this should be viewed as a maximum limit on the size of staff employed by the Commission and paid from donated funds. No changes are made with respect to the number of employees to be paid from appropriated funds.

Mr. COURTER. Mr. Speaker, will the gentleman yield?

Mr. GARCIA. I yield to my colleague from New Jersey.

Mr. COURTER. Mr. Speaker, I rise in support of S. 118 to establish a Presidential Commission on the Bicentennial of the Constitution.

This legislation would provide for the appointment by the President of the United States a 23-member Commission with representation from each of the three branches of Government, charged with developing a plan for the appropriate celebration of events leading up to the signing of the Constitution and the subsequent ratification process. The Commission will undertake a limited number of Federal projects but is also directed to encourage State, local, and private participation in planning activities. While the Federal involvement is necessary for a variety of reasons, S. 118 recognizes the important role which State and local governments and the private sector can contribute. The intent of this legislation is not for the Federal Government to solely plan the events celebrating and commemorating the 200th birthday of our Constitution.

The primary function of the Bicentennial Commission will be to educate, evaluate, and rededicate Americans to our constitutional Republic. The U.S. Constitution is at the center of American political life and there exists today a dire need to educate our young people about our system of constitutional freedoms. The public's understanding of the Constitution is at a low ebb.

This bicentennial offers an opportunity to correct this educational problem and foster a better understanding of our representative Government. Also this bicentennial will offer the opportunity to evaluate the successes of our governing institutions since their inauguration in 1787.

Our Constitution grows and becomes more effective over time not through a process of change and evolution but instead through a process of study and application of its unchanging principles.

The growth and effectiveness of the Constitution is most evident in the dedication of Americans to its changless tenents. The Constitution has proven durable—not because it is an evolving or flexible document but because it addressed principles that were enduring and because it created institutions which have made our country second to none.

As we begin the third century of our existence under this great document, the American people should renew their knowledge about our heritage and should rededicate themselves to the maintenance of a republic under the Constitution.

The primary purpose of the Commission will be to establish a new awareness and knowledge of our Constitution in the mind of the American people. It is for these reasons that I urge my colleagues to support this legislation which would develop a Presidential Commission on the Bicentennial of the Constitution.

Mrs. BOGGS. Mr. Speaker, will the gentleman yield?

Mr. GARCIA. I yield to my colleague, the gentlewoman from Louisiana.

Mrs. BOGGS. Mr. Speaker, I thank the gentleman for yielding and I wish to compliment the gentleman and the committee on bringing forth this very fine piece of legislation establishing the Commission for the Bicentennial celebration of the drafting and the signing of the Constitution.

I trust that it will pass in a very splendid fashion so that we can get on with the business of the preparation for this important date in our history.

Mr. GARCIA. Mr. Speaker, I have no more requests for time, and I yield back the balance of my time.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on the Senate bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

FRANCO-AMERICAN WAR VETERANS

(Mrs. JOHNSON asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. JOHNSON. Mr. Speaker, today I have the privilege and the honor of introducing legislation to recognize a veterans organization known as the Franco-American War Veterans, Inc. Founded over 50 years ago in Massachusetts, and chartered in my own State of Connecticut in 1957, this fine organization of over 2,000 American veterans of French descent has since established itself as a valuable asset to the many communities it serves. Franco-American Veterans perform a vast variety of volunteer services for VA hospitals, local senior citizen centers, and other nursing and home-care programs, and donate supplies such as wheelchairs and air mattresses to comfort bedridden patients. In addition, the group donates funds raised through weekly events to needy community service organizations and sponsors such successful endeavors as the home service center program, the visiting nurses association, and the rehabilitation center for the blind. The Franco-American Veterans group has been particularly active in support of the rehabilitation center for the blind and taken the lead in its promotion. Furthermore, the organization offers scholarships to talented students who would otherwise be unable to afford the rising cost of higher education.

My legislation seeks to recognize the Franco-American War Veterans, Inc., and grant this distinguished organization a Federal charter, giving these veterans the recognition they deserve for their many years of unselfish, dedicated service to our communities and our veterans. This national recognition would serve to help the organization expand its membership and voluntary services, which are provided without charge to the American public. This proposal reflects our appreciation for those who have sacrificed so much for our country as well as our support for the exemplary goals of this compassionate, dedicated, and patriotic organization. I urge my colleagues to join me by adding your names as cosponsors to this well-deserved recognition bill.

FEDERAL SUPPLEMENTAL UNEMPLOYMENT COMPENSATION EXTENSION

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 3409) to amend the Federal Supplemental Compensation Act of 1982 with respect to the number of weeks of benefits paid in any State, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read thetitle of the bill.

The Clerk read the Senate amendments, as follows:

Page 1, strike out lines 3 to 12, inclusive, and insert:

That (a) subparagraph (B) of section 602 (e)(2) of the Federal Supplemental Compensation Act of 1982 is amended to read as follows:

"(B) If the applicable limit for a State, as determined under clause (ii) of subparagraph (A), for the week beginning July 24, 1983, was a number equal to or less than such State's applicable limit for the week beginning March 27, 1983, under this paragraph (as in effect for such week) reduced by four, the applicable limit for such State shall not be less than the applicable limit for the week beginning July 24, 1983, for any week after the week beginning after July 24, 1983.

(b) The amendment made by subsection (a) shall apply to weeks beginning after July 24, 1983.

(c)(1) In the case of an account, established before the week beginning June 5, 1983, the applicable limit under section 602 (e)(2)(A)(ii) of the Federal Supplemental Compensation Act of 1982 shall in no event be less than the number of weeks applicable to such State for the week beginning March 27, 1983, under section 602(e)(2) of such Act (as in effect for such week) reduced by four.

(2) Paragraph (1) shall apply only to compensation for weeks of unemployment beginning on or after the date of the enactment of this Act.

Page 2, line 1, strike out "(c)" and insert "(d)".

Page 2, line 2, after "subsection (a)" insert "or the provisions of subsection (c)".

Page 2, line 8, after "subsection (a)" insert "or the provisions of subsection (c)".

Page 2, after line 14, insert:

SEC. 2. Effective October 1, 1983, the Temporary Emergency Food Assistance Act of 1983 (title II of Public Law 98-8; 97 Stat. 35 and 36) is amended by—

(1) in section 201, striking out "the Act" and inserting in lieu thereof "this Act";

(2) inserting, after section 201, a new section 201A as follows:

"ELIGIBLE RECIPIENT AGENCIES

"SEC. 201A. As used in this Act, the term 'eligible recipient agencies' means public or nonprofit organizations that administer—

"(1) activities and projects providing nutrition assistance to relieve situations of emergency and distress through the provision of food to needy persons, including low-income and unemployed persons;

"(2) school lunch programs, summer camps for children, and other child nutrition programs providing food service;

"(3) nutrition projects operating under the Older Americans Act of 1965, including congregate nutrition sites and providers of home-delivered meals;

"(4) activities and projects that are supported under section 4 of the Agriculture and Consumer Protection Act of 1973;

"(5) activities of charitable institutions, including hospitals and retirement homes, to the extent that needy persons are served; or

"(6) disaster relief programs; and that have been designated by the appropriate State agency, or by the Secretary, and approved by the Secretary for participation in the program established under this Act.";

(3) amending section 202(a) to read as follows:

"SEC. 202. (a) Notwithstanding any other provision of law, in order to complement the domestic nutrition programs, make maximum use of the Nation's agricultural abundance, and expand and improve the domestic distribution of price-supported commodities, commodities acquired by the Commodity Credit Corporation that the Secretary of Agriculture (hereinafter referred to as the 'Secretary') determines, in his discretion, are in excess of quantities needed to—

"(1) carry out other domestic donation programs,

"(2) meet other domestic obligations (including quantities needed to carry out a payment-in-kind acreage diversion program),

"(3) meet international market development and food aid commitments, and

"(4) carry out the farm price and income stabilization purposes of the Agricultural Adjustment Act of 1938, the Agricultural Act of 1949, and the Commodity Credit Corporation Charter Act,

shall be made available by the Secretary, without charge or credit for such commodities, for use by eligible recipient agencies for food assistance.";

(4) in section 202(b)—

(A) in the first sentence, striking out "shall" and inserting in lieu thereof "may"; and,

(B) in the second sentence, striking out "December 1, 1983" and inserting in lieu thereof "October 1, 1985";

(5) inserting, after section 203, new sections 203A, 203B, and 203C as follows:

"INITIAL PROCESSING COSTS

"SEC. 203A. The Secretary may use funds of the Commodity Credit Corporation to pay costs of initial processing and packaging of commodities to be distributed under the program established under this Act into forms, and in quantities, suitable, as determined by the Secretary, for use in individual households when such commodities are to be consumed by individual households or for institutional use, as applicable. The Secretary may pay such costs in the form of Corporation-owned commodities equal in value to such costs, except that wheat from the Food Security Wheat Reserve may not be used to pay such costs. The Secretary shall ensure that any such payments in kind will not displace commercial sales of such commodities.

"FEDERAL AND STATE RESPONSIBILITIES

"SEC. 203B. (a) The Secretary shall, as expeditiously as possible, provide the commodities made available under this Act in such quantities as can be used without waste to State agencies designated by the Governor or other appropriate State official for distribution to eligible recipient agencies, except that the Secretary may provide such commodities directly to eligible recipient agencies and to private companies that process such commodities for eligible recipient agencies under sections 203 and 203A of this Act.

"(b) State agencies receiving commodities under this Act shall, as expeditiously as possible, distribute such commodities, in the quantities requested (to the extent practicable), to eligible recipient agencies within their respective States. However, if a State agency cannot meet all requests for a particular commodity under this Act, the State agency shall give priority in the distribution of such commodity to eligible recipient agencies providing nutrition assistance to relieve situations of emergency and distress through the provision of food to needy persons, including low-income and unemployed persons.

"(c) Each State agency receiving commodities for individual household use under this Act shall distribute such commodities to eligible recipient agencies in the State that serve needy persons, and shall, with the approval of the Secretary, determine those persons in the State that shall qualify as needy persons eligible for such commodities.

"ASSURANCES; ANTICIPATED USE

"SEC. 203C. (a) The Secretary shall take such precautions as the Secretary deems necessary to assure that any eligible recipient agency receiving commodities under this Act will provide such commodities to persons served by the eligible recipient agency and will not diminish its normal expenditures for food by reason of the receipt of such commodities. The Secretary shall also take such precautions as the Secretary deems necessary to assure that commodities made available under this Act will not displace commercial sales of such commodities or the products thereof. The Secretary shall not make commodities available for donation in any quantity or manner that the Secretary, in the Secretary's discretion, determines may, substitute for the same or any other agricultural produce that would otherwise be purchased in the market.

"(b) Commodities provided under this Act shall be distributed only in quantities that can be consumed without waste. No eligible recipient agency may receive commodities under this Act in excess of anticipated use, based on inventory records and controls, or in excess of its ability to accept and store such commodities.";

"(6) in section 204—

(A) designating the last sentence as subsection (c);

(B) inserting, after the first sentence, a new subsection (b) as follows:

"(b) There are hereby authorized to be appropriated $50,000,000 for each of the fiscal years ending September 30, 1984, and September 30, 1985, for the Secretary to make available to the States for storage and distribution costs of which not less than 20 percent of the amount appropriated under this subsection in any fiscal year shall be made available for paying or providing advance payments to cover the actual costs incurred by charitable institutions, food banks, hunger centers, soup kitchens, and similiar nonprofit eligible recipient agencies providing nutrition assistance to relieve situations of emergency and distress through the provision of food to needy persons, including low-income and unemployed persons: *Provided*, That in no case shall such payments exceed five per centum of the value of commodities distributed by any such agency."; and

(C) in subsection (c), as so designated by subclause (A) of this clause, striking out "this appropriation" and inserting in lieu thereof "appropriations made or authorized under this section";

(7) in section 205—

(A) amending the heading to read as follows:

"RELATIONSHIP TO OTHER PROGRAMS";

(B) inserting "(a)" after the section designation; and

(C) adding, at the end thereof, a new subsection

"(b)" as follows:

"(b) Except as otherwise provided in section 203A of this Act, none of the commodities distributed under this Act shall be sold or otherwise disposed of in commercial channels in any form.";

(8) amending section 209 to read as follows:

"SEC. 209. Section 5(a)((2) of the Agriculture and Consumer Protection Act of 1973 (7 U.S.C. 612c note) is amended by striking out "amount appropriated for the provision of commodities to State agencies" and inserting in lieu thereof "sum of (A) the amount appropriated for the commodity supplemental food program and (B) the value of the additional commodities donated by the Secretary to State or local agencies for use in such program which are provided without charge against funds appropriated for such program and are included in food packages distributed to program participants";

(9) in section 210—

(A) inserting "(a)" after the section designation; and

(B) adding, at the end thereof, new subsections (b) and (c) as follows:

"(b) In administering this Act, the Secretary shall minimize, to the maximum extent practicable, the regulatory, recordkeeping, and paperwork requirements imposed on eligible recipient agencies.

"(c) With respect to the commodity distribution program under this Act in effect during the fiscal years ending September 30, 1984, and September 30, 1985, the Secretary shall, not later than October 1, 1983, publish in the Federal Register an estimate of the types and quantities of commodities that the Secretary anticipates are likely to be made available during the first twelve months of the program; and, prior to the beginning of the fiscal year ending September 30, 1985, the Secretary shall publish in the Federal Register an estimate of the types and quantities of commodities that the Secretary anticipates are likely to be made available during the second twelve months of the program under this Act: *Provided*, That the actual types and quantities of commodities made available by the Secretary under this Act may differ from the estimates."; and

(10) inserting, after section 210, new sections 211 and 212 as follows:

"FINALITY OF DETERMINATIONS

"SEC. 211. Determinations made by the Secretary of Agriculture under this Act and the facts constituting the basis for any donation of commodities under this Act, or the amount thereof, when officially determined in conformity with the applicable regulations prescribed by the Secretary, shall be final and conclusive and shall not be reviewable by any other officer or agency of the Government.

"PROGRAM TERMINATION

SEC. 212. The provisions of this Act, with the exception of 207, shall terminate September 30, 1985.".

SEC. 3. Section 4(c) of the Agriculture and Consumer Protection Act of 1973 is amended by inserting "Temporary" before "Emergency Food Assistance Act of 1983".

Mr. ROSTENKOWSKI (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

Mr. FRENZEL. Mr. Speaker, reserving the right to object, I would like to yield to the distinguished chairman to explain the nature of the bill before us.

Mr. ROSTENKOWSKI. Will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from Illinois.

Mr. ROSTENKOWSKI. Mr. Speaker, the Federal supplemental compensation program (FSC) provides additional weeks of unemployment compensation to individuals who have exhausted their regular State benefits and any extended benefits to which they were entitled. The program was originally enacted as part of the last year's Tax Equity and Fiscal Responsibility Act and was due to expire on March 31, 1983. The number of weeks of benefits paid under the original 6-month program ranged from 8 to 16, depending on the insured unemployment rate in a State.

We extended the program, from April 1, 1983, through September 30, 1983, as part of the Social Security amendments of 1983. Under this extension, the maximum number of weeks of benefits ranged from 8 to 14, and the trigger rates for determining how many weeks an individual could receive in any given State were amended. Because of these changes, the maximum number of FSC weeks payable in a number of States was reduced on April 1, 1983.

The insured unemployment rate (IUR) is used to determine how many weeks of FSC benefits are payable in a State. The IUR is the number of individuals claiming regular State benefits divided by the number of people who are working in jobs covered by the States' unemployment insurance law. It bears limited relation to the total unemployment rate in the State. The 1981 Reconciliation Act made changes in the calculation of the IUR which has had the result of lowering dramatically the insured unemployment rate in a number of high unemployment States. Because of this rapid drop in the IUR, 25 States have lost more than 4 weeks of FSC benefits, compared to the number of weeks payable under the original program. Between now an September 30, 1983, as many as seven more States will experience a similar loss.

H.R. 3409 as amended would limit the loss of FSC weeks. In most of the effected States, this will mean an additional 2 weeks of benefits for long-term unemployed individuals.

The bill before us is a compromise agreement between both Houses that has passed the Senate. I urge this body to understand that this legislation, as modified by the other body, is reduced in cost to a range of $51-55 million from an orginal level estimated by the Department of Labor to be $200 million.

In light of the continuing hardships faced by the long-term unemployed, who are precisely the jobless workers the FSC program was designed to help. It is imperative that we pass this bill.

□ 1950

Mr. FRENZEL. Mr. Speaker, further reserving the right to object, I yield to the distinguished gentleman from California, the author of the "hitchhiker" that comes along with the gentleman from Illinois' bill.

Mr. PANETTA. I thank the gentleman for yielding. Also attached to this bill is the emergency food assistance and commodity distribution bill, similar to H.R. 1590, which was adopted by this House by an overwhelming vote of 389 to 18 and provided for administrative funding for the distribution of commodities. A similar bill in the other body S. 17 has been reported by the Senate Agriculture Committee and was pending action on the Senate floor. The administration had initially opposed the measure. But as a result of the President's actions with regard to hunger this last week, the appointment of a hunger task force, and the announcement by the Secretary of Agriculture that he was expanding the distribution of commodities, the administration also supports now the legislation that is included in this measure and supports the additional administrative funding that is now provided.

As a result of that and in cooperation with Members from the other body we developed a compromise which is consistent with the basic thrust of H.R. 1590.

Mr. Speaker, I do not particularly like the lateness of the time or the process in doing it in this manner, but it is important, nevertheless, to adopt this legislation.

The administration has announced an expanded commodity distribution program. If that program is to be effective, administrative funding is needed and this bill provides that funding. So, I would urge the Members to support the legislation as included in this bill.

Mr. FRENZEL. Further reserving the right to object, I yield to the distinguished coproponent, the gentleman from Missouri (Mr. Emerson).

Mr. EMERSON. I thank the gentleman for yielding.

Mr. Speaker, I rise in support of the commodity distribution bill, and associate myself with the remarks of the gentleman from California.

Mr. Speaker, I rise in support of this compromise on the extension of the commodity distribution bill. It makes sense to me that surplus commodities held by the Government should be shared with needy people. The lengthy recession and unemployment have caused suffering—no one disputes this. There are positive signs that the economy is turning around—but while this occurs there are people in need. There are Federal food assistance programs designed to help people in need by providing food stamps, school lunches, and other food benefits. These programs subsidize in whole or in part over 95 million meals per day for needy people.

However, at this time it appears that the need for food exceeds the benefits provided under Federal programs. At the same time the Federal Government is storing surplus commodities. That is why, in my mind, if the need for food is present and surpluses are available—distribution should be made to help families who are in need.

The primary purposes of this compromise are:

To continue the surplus commodity distribution program, as contained in the jobs bill, for 2 years.

To require the Secretary to distribute surplus commodities, in excess of domestic or foreign commitments.

To provide reimbursement for actual administrative costs of transporting, handling and storing surplus commodities at the State or local level. Administrative cost reimbursement cannot exceed $50 million.

To have commodities to be processed into forms suitable for home or institutional use.

At a time when our country is struggling to get back on its economic feet, I believe we should make every effort to help our needy and jobless. This legislation would provide for processing surplus farm commodities into food products, pay for transportation to eligible agencies which will distribute the food, and reimburse the States for the administrative costs involved.

In addition to helping the needy, this program will aid farmers by decreasing the surpluses which have depressed farm prices and it will also reduce the Government costs for storing these surpluses.

I urge Members to support this bill.

Mr. FRENZEL. Further reserving the right to object, Mr. Speaker, when the FSC bill was before the House I objected to it very strenuously. I still oppose that bill with great vigor and think it is a terrible mistake for this House to ratify a mistake of an agency of this Government.

However, the House passed that bill by a very heavy majority.

The principal sponsor, a very able and effective gentleman from Massachusetts (Mr. SHANNON) has convinced me that it would be mean spirited and curmudgeonly of me to object at this time for it would simply delay the arrival of benefits by 30 days which are

going to be there anyway and are needed sooner rather than later.

For that reason, Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois (Mr. ROSTENKOWSKI)?

There was no objection.

The SPEAKER pro tempore. Is there objection to the original request of the gentleman from Illinois?

There was no objection.

A motion to reconsider was laid on the table.

SAVINGS RATE TRICKLES DOWNWARD

(Mr. ANNUNZIO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ANNUNZIO. Mr. Speaker, the administration has been making a lot of noise in the past few weeks about the supposed "economic recovery"; amid this blustering clamor, let me sound a note of caution. The savings rate represents the percentage of disposable income that Americans put away for rainy days. That rate has now hit its lowest point since 1950, declining steadily from 7 percent in 1981 to 5.4 percent in the first quarter of this year, and dropping to a dismal low of 3.3 percent in June. All this after the great tax cuts, which were supposed to magically enable the American people to increase their savings, but have instead produced the greatest Federal deficits ever.

In the last day or two we have all read the saddening reports stating that the poverty level has reached 15 percent—the highest point since 1965—meaning that 34.4 million Americans are living in absolute squalor, from hand to mouth. It is not too surprising that this group of Americans has not yet had a chance to save. And things are hardly better for the middle class—among people who are living in relative security. Perhaps it is among the rich, who seem to get so much sympathy from the administration these days, that the tax cuts have proven to be a savings incentive. But this is just run-of-the-mill inequity. When the effects of this unimaginable deficit become apparent, that's when the real injustice will begin.

The single home mortgage rate is on the rise again—up from 12 percent in May to a current 14 percent. When the combined effects of a low savings rate and a huge deficit begin to take hold, we will see the mortgage rate really skyrocket. The lowered savings rate means that the available pool of money for loans is scarce to begin with. With the Federal Government swallowing up the majority of this money in a desperate attempt to keep up with its mushrooming deficit, precious little is left for the average citizen who wants to buy a home—and that small amount will be going for a very high rate.

Already the housing market is feeling the pressure. There was a decline of 52,000 housing starts, on an annual basis, from May to June. The rate of sales of new homes has gone down. The unsold housing inventory rose from April to May, and again from May to June. Most alarming, though, are reports from around the country which indicate a big drop in the number of people applying to banks and savings and loans institutions for mortgages. This makes the housing industry nervous; it knows that in an economic climate where every penny counts, it takes only a slight increase in interest rates to shut business down.

And consumers are nervous. With interest rates on the climb again, working people feel that to own a home and gain some measure of real economic security is an impossible dream—a fairy tale. They have no incentive to save for the future. No longer do Americans view their Nation as the land of economic opportunity. People are beginning to lose hope as the economic policies of the administration begin to push up interest rates.

Now it is all most Americans can do to live on a day-to-day basis. And that is a very tough way to live. We must be realistic—the 11.1 million men and women who are unemployed cannot save because they are struggling to survive. They are treading water—trying to keep afloat in stormy economic seas. They cannot save while struggling to stay afloat. Only when we give them the economic lifesaver of jobs and lower interest rates will we see a rise in the savings rate. Then Americans will be back on the dry land of prosperity.

A FEDERAL RESERVE BOARD ANALYSIS RELATING TO PROPOSED FINANCIAL INSTITUTIONS DEREGULATION ACT OF 1983

(Mr. ERDREICH asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ERDREICH. Mr. Speaker, one issue which Congress will be called to take action upon in the very near future will be the question of nonbanks, engaging in the delivery of financial services; and nonbanking activities in which banks have begun to engage. To date, there has been legislation introduced calling for a moratorium on the nonbanking activities of financial institutions; and there has been legislation calling for the deregulation of financial institutions.

The financial services industry has experienced enormous changes over the past decade as a response to market demand. Technological advances have changed the very nature and substance of banking activities. Consequently, the statutes enacted to regulate the activities of financial institutions are in need of revision. The administration has submitted such a revision—the Financial Institutions Deregulation Act of 1983. This legislation is, of course, highly complex and extremely controversial.

In order to help facilitate a proper review of the bill, I requested that Federal Reserve Board Chairman Paul Volcker prepare a side-by-side analysis of what restrictions the measure lifts, what restrictions remain in place, and what restrictions are altered by the legislation. The Chairman's response is most thorough and I would like to submit it in the RECORD for review. It will I believe, help expedite consideration of this matter and I would urge my colleagues to use it as a resource in the upcoming debate.

BOARD OF GOVERNORS,
FEDERAL RESERVE SYSTEM,
Washington, D.C., *August 3, 1983.*

Hon. BEN ERDREICH,
House of Representatives,
Washington, D.C.

DEAR MR. ERDREICH: Chairman Volcker has asked me to respond to your letter of July 18, 1983, in which you requested an outlne of current restrictions on the nonbanking activities of bank and thrift holding companies that would be eliminated, altered, or unchanged by the Administration's proposed Financial Institutions Deregulation Act of 1983.

I am pleased to provide the enclosed table which compares, in chart form as you requested, the regulation of nonbanking activities under existing law and the proposed bill. We have added a category of "new restrictions imposed" since the bill would impose new restrictions in certain areas. The Board's staff would be pleased to modify this table in any manner desired. Please let me know if I may be of any further assistance.

Sincerely,

DONALD J. WINN,
Assistant to the Board.

REGULATION OF NONBANKING ACTIVITIES OF BANK & THRIFT HOLDING COMPANIES UNDER THE FINANCIAL INSTITUTIONS DEREGULATION ACT OF 1983

	Current restrictions remaining	Current restrictions eliminated	Current restrictions altered	New restrictions imposed
Nonbanking activities permissible for bank holding companies.	Bankholding companies could continue to engage in activities that FRB determines by order or regulation to be closely related to banking.	Bank holding companies would be authorized to engage in activities that FRB determines by regulation to be "of a financial nature," in addition to the following expressly authorized activities that are currently prohibited:. General insurance underwriting and brokerage activities. Real estate investment, development, and brokerage (limited to 5% of primary capital). Operating a mutual fund; underwriting and selling shares of a mutual fund (through a separate subsidiary only) dealing in and underwriting municipal revenue bonds (through a separate subsidiary only). Operating a nonfailing thrift institution Any activity authorized as of July 1, 1983, by the FHLBB for multiple S&L holding companies (other than real estate investment and development).	FRB would be authorized to prescribe limitations on the conduct of activities consistent with financial, managerial, safety and soundness, and other criteria. In prescribing permissible activities, FBB would be required to promote competition between bank holding companies and all other companies engaged in such activities.	Within one year of formation of a securities affiliate by a holding company, all subsidiary banks or thrifts of the holding company would be required to cease any activity authorized for a securities affiliate.
FRB approval of individual proposals to engage in nonbanking activities.	.....	Prior FRB approval of proposals to engage in nonbanking activities would be eliminated.	.....	60-day prior notice to FRB of proposed activities would be required; FRB could issue a notice of disapproval of a proposal.
Criteria for FRB evaluation of individual proposals to engage in nonbanking activities.	.....	Public benefits test (i.e. balancing of public benefits, such as increased competition, gains in efficiency, against adverse effects, such as conflicts of interests and undue concentration of resources) would be eliminated, but FRB could consider certain adverse effects of a proposal in diciding whether to disapprove an activity. Hearing requirement would be eliminated		
	FRB could disapprove an activity for financial or managerial reasons.	.....	Decreased or unfair competition, undue concentration of resources, and conflicts of interest criteria would be replaced by "any practice or arrangement that may adversely affect the independence or impartiality of an affiliated bank in the provision of credit or other services or the terms on which such credit and services are made available or the availability of such credit.". Safety and soundness criteria would be altered from "unsound banking practices" to "any material adverse effect on the safety and soundness or the financial condition of an affiliated bank or banks.".	In considering financial and capital adequacy, FRB would be required to give due consideration to financial resources and capital of others engaged in similar activities and could not impose capital standards higher than those required by state or federal regulations applicable to other companies engaged in such activities, unless circumstances warranted a higher capital level.
Judicial review	.....	Right of competitors to seek judicial review of FRB decisions not to disapprove bank holding company proposals to engage in nonbank activities would be eliminated.		
Supervision and examination	FRB's authority to require reports of and to examine bank holding companies would be unchanged.	.....	FRB's authority to require reports of nonbank subsidiaries generally would be limited to kinds of reports that a publicly held corporation would be required to file with SEC, except where circumstances warranted additional information. FRB is directed "to the extent feasible" to limit examination of nonbank subsidiaries by utilizing reports of other supervisory authorities and if possible by focusing examinations on activities of nonbank subsidiaries that affect the financial condition of an affiliated bank.	
Jurisdiction	A company that owns both a bank and a thrift would continue to be subject to jurisdiction of both FRB and FHLBB.			
Transactions with affiliates	.....	Restrictions applicable to thrifts on transactions with affiliates would be eased and same restrictions applicable to banks would apply.	.....	New restrictions would be imposed on transactions with affiliates (e.g., all covered transactions between a bank and its holding company affiliates must be on nonpreferential terms).
State authorized nonbank activities	States would not be prohibited from authorizing state banks to engage in activities not permissible for bank holding companies..	.....	.....	States may not prohibit affiliations of national banks or federal thrifts with companies engaged in activities permissible under BHC Act or S&LHC Act, respectively.
Definition of "bank"	"Bank" would continue to encompass any institution that accepts demand deposits or transaction accounts and engages in the business of making commercial loans. Federally insured thrifts and certain other institutions (e.g., Edge corporations) would continue to be exempt..	.....	.....	"Bank" would be redefined to include any bank that is federally insured or eligible for federal insurance (if it accepts deposits other than in a fiduciary capacity).
S&L holding companies	.....	S&L holding companies would be authorized, subject to FHLBB review, to engage in activities authorized by FRB for bank holding companies, including specifically export trading companies, securities affiliates, and the operation of an insured bank (currently not permitted for multiple S&L holding companies)..	.....	Unitary S&L holding companies would be subject to restrictions applicable to multiple S&L holding companies (which essentially parallel those of bank holding companies). Real estate investment and development authority of multiple S&L holding companies would be limited to 5% of primary capital (currently unlimited). FRB, rather than FHLBB, would have jurisdiction over securities affiliates. S&L holding companies would be required to provide 60 days prior written notice of activities to the FHLBB (currently no notice required for unitary S&L holding companies); FHLBB may apply same criteria for reviewing individual proposals as apply to bank holding company proposals.

REGULATION OF NONBANKING ACTIVITIES OF BANK & THRIFT HOLDING COMPANIES UNDER THE FINANCIAL INSTITUTIONS DEREGULATION ACT OF 1983—Continued

	Current restrictions remaining	Current restrictions eliminated	Current restrictions altered	New restrictions imposed
Service corporations				Bank and S&L service corporations would be required to limit their activities to providing clerical, data processing, and other administrative services to other depository institutions and could no longer deal with the public.

A PETITION ON CENTRAL AMERICA

(Mr. LOWRY of Washington asked and was given permission to address the House for 1 minute, and to revise and extend his remarks, and include extraneous matter.)

Mr. LOWRY of Washington. Mr. Speaker, I take this time to insert into the RECORD a petition that was being circulated by interns in the House on some of their individual concerns about Central American policy.

Under the rules of the House that I had not been familiar with prior to this, our interns cannot do that. I do not rise to quarrel with that rule. I think I might do that at some other time. That is not the point of my statement.

An excellent employee in my office had been working on this, and I would like to put into the RECORD what their petition stated as their individual concerns about our policies in Central America.

Mr. Speaker, the petition is as follows:

AUGUST 1983.

PRESIDENT REAGAN: During the past few years, the political instability in Central America has raised serious concerns in our country. We, the undersigned Congressional and Government Interns, wish to express our opposition to several of your Administration's actions in Central America:

(1) Increased U.S. military involvement;

(2) U.S. military support of governments that blatantly violate fundamental human rights;

(3) U.S. violation of national and international laws; and

(4) continuing U.S. efforts to overthrow the Nicaraguan Government.

These actions are increasing the probability of direct U.S. troop involvement in a full-scale regional war.

We believe these actions stem partly from a misguided perception of events in Central America as little more than an outgrowth of the international competition between the United States and the Soviet Union. This overemphasis on the Soviet influence in Central America diverts attention from the history of political and economic oppression which is the principal cause of the current unrest. Moreover, your Administration's policy in Central America is consistent with your actions that increase the disparity of wealth between the rich and poor peoples of the world.

Believing that these policies can only undermine both the interests and ideals of the United States and that negotiations provide that best means to the establishment of peace, democracy and justice in Central America, we therefore present the following petition:

WHEREAS, the Reagan Administration has violated the Boland Amendment, the Rio Treaty, and O.A.S. Charter, and the U.N. Charter by providing military assistance to groups attempting to overthrow the Nicaraguan Government; and

WHEREAS, in the past six months the political death toll in El Salvador has risen twelve percent over the previous six month period, to 1,054 deaths, according to the U.S. Embassy estimate, (Tutela Legal, the Salvadoran Catholic Church and Amnesty International document 2,527 deaths or disappearances in the same period, making the total for the last four years more than 38,000); and

WHEREAS, the U.S. has deployed combat troops in Honduras and three task forces led by the carriers *Ranger, Coral* and the battleship *New Jersey* off the Nicaraguan coasts; and

WHEREAS, direct U.S. intervention in the internal conflicts in Latin America has led to the imposition of brutally repressive regimes in those nations (e.g. Nicaragua, 1933; Guatemala, 1954; Chile, 1973);

Therefore, we call for the following actions:

(1) Cease all U.S. military aid to Central America;

(2) End U.S. "covert" destabilization efforts against Nicaragua;

(3) Grant extended voluntary departure status to Central American refugees until they can safely return to their homelands;

(4) Make human rights a priority in the formulation of your policy toward all of the nations of Central America; and

(5) Support the proposals of the Contadora Group.

Sincerely,

Name and permanent address.

RECONCILIATION UPDATE

(Mr. PANETTA asked and was given permission to address the House for 1 minute, and to revise and extend his remarks and include extraneous matter.)

Mr. PANETTA. Mr. Speaker, I would like to place in the RECORD another update on reconciliation action taken by House committees. Five of the seven committees given reconciliation instructions in the first budget resolution have now reported legislation in response to those instructions. The two committees that have not yet acted, Energy and Commerce and Ways and Means, have until September 23 to submit their reconciliation legislation.

Obviously, I recognize that it is difficult to meet the revenue instructions without the cooperation of the White House and the Senate. But the House and particularly, the Ways and Means Committee has always responded effectively to reconciliation instructions. With the size deficit being projected, it is essential that action be taken.

The following table shows that each committee was asked to cut in spending, and, in the case of the Ways and Means Committee, raise in revenue, and what action has been taken so far, including the official CBO cost estimates of legislation reported by the five committees which have finished their work.

Mr. Speaker, the update on reconciliation is as follows:

House committee	Reconciliation instructions (fiscal years)			
	1984	1985	1986	1984–86
Armed Services: [1]				
BA	$253	$360	$621	$1,234
O	253	360	621	1,234
Energy and Commerce: [2]				
BA				
O	400	500	800	1,700
Foreign Affairs: [3]				
BA				
O	3	4	9	16
Post Office and Civil Service: [4]				
BA	1,619	2,332	3,235	7,186
O	1,900	2,841	4,144	8,885
Small Business: [5]				
BA	139	555	544	1,238
O	287	466	443	1,196
Veterans' Affairs: [6]				
BA	228	139	141	508
O	226	138	140	504
Ways and Means:				
Savings: [7]				
BA				
O	400	500	800	1,700
Revenues: [8]	12,000	15,000	46,000	73,000

[1] H.R. 2969, the DOD Authorization Act, passed the House on July 27th. It included a six month delay on the COLA for military retirees. This represents a savings of $252 million in BA and O for fiscal year 1984 and is a permanent delay. In addition, the bill delays the active duty pay raise for 3 months. Savings in both these programs could also be achieved through the legislative link with civilian personnel in the jurisdiction of the Post Office & Civil Service Committees.

[2] On July 18, the Subcommittee on Health and Environment held hearings on possible ways to meet their reconciliation instructions. No further action has been taken to date. The Committee has until Sept. 23rd to report their savings to the Budget Committee.

[3] These savings are incorporated in the reconciliation action taken by the Post Office & Civil Service Committee.

[4] On July 19th, the Committee reported their reconciliation savings, which are scored as saving: (1) 4% Pay raise in October 1983—BA: FY 1984, $795; FY 1985, $1,369; FY 1986, $1,985; total, $4,149. O: FY 1984, $800; FY 1985, $1,405; FY 1986, $2,041; total, $4,246. Savings assume extension of 4% pay raise in fiscal years 1985 and 1986. (2) Delay Retirement COLA until January and move the adjustment period—BA: FY 1984, $248; FY 1985, $363; FY 1986, $530; total, $1,151. O: FY 1984, $534; FY 1985, $727; FY 1986, $1,218; total, $2,479. Total: Committee Reconciliation Amount—BA: FY 1984, $1,053; FY 1985, $1,732; FY 1986, $2,515; total, $5,300. O: FY 1984, $1,334; FY 1985, $2,132; FY 1986, $3,259; total, $6,725.

[5] On July 21, the Committee reported their reconciliation savings of $139 million in BA and $287 million in, O in fiscal year 1984 and their out-year savings as well. These savings are achieved by providing a cap on the SBA disaster loan program.

[6] On June 3, by delaying the COLA for veterans' compensation and making a small change in the GI bill, the Committee reported the following savings: BA: FY 1984, $216; FY 1985, $234; FY 1986, $240; total, $690. O: FY 1984, $214; FY 1985, $233; FY 1986, $237; total, $684.

[7] No action to date on legislative savings.

[8] July 19–21, the Committee held hearings on possible ways to raise the revenues called for in the Budget Resolution. No further action has been taken. The Committee has until Sept. 23 to report to the Budget Committee.

HUMAN RIGHTS VIOLATIONS IN EL SALVADOR

(Mr. SILJANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks, and include extraneous matter.)

Mr. SILJANDER. Mr. Speaker, a great deal of confusion exists over the question of political violence and human rights abuses in El Salvador. Thousands of people have been killed, wounded, kidnaped and taken hostage, but who are the victims and who are those who perpetuate the violence?

It has become an accepted public fact that the democratically elected government of El Salvador is responsible for the death and destruction that has occurred in the country since 1979. The facts, however, indicate shared responsibility by the insurgents.

When the reformist military coup of 1979 succeeded in El Salvador the leaders made promises not unlike those made by the Sandinistas. They promised: One, respect for human rights; two, free elections; and three, economic and social pluralism. Unlike the Sandinistas, the Government of El Salvador is keeping its promises. Land reform and the development of a constitution have begun, there is a free press, free universities, free trade unions and of course, there has been an internationally accepted free and fair election.

The Communist guerrillas have, through a campaign of terror, fought each of these reforms every step of the way. As Lenin said, "the purpose of terrorism is to terrorize." Terrorism is deployed to create a repressive government, to intimidate the population, and removing the hope of the citizens for peace without change. The guerrillas have done their utmost, with the help of Nicaragua, Cuba and the Soviet Union, to destabilize the Government and demoralize the people.

The report which will appear at the conclusion of my remarks gives a quick summary of a 500-page report compiled by the Council for Inter-American Security documenting the 21,948 citizens killed, wounded, kidnaped or held hostage by the Communist guerrillas in El Salvador since 1979. The large report was submitted to the House Foreign Affairs Committee when it held hearings on the Presidential Certification of El Salvador yesterday. If you wish to have an objective opinion on what may prove to be our Nation's greatest domestic crisis, I urge you to weigh the findings of this report.

Revolutionary Terrorism in El Salvador Over 20,000 Victims

(Prepared by the Council for Inter-American Security, August 2, 1983)

TERRORISM IN EL SALVADOR

It has become a given, a "public fact", that the democratically elected Government of El Salvador is responsible for the death and destruction that has occurred in that country since 1979. During last week's House of Representative's debate on the Boland-Zablocki bill, for example, one Congressman said: "In El Salvador, the abuse of human rights is legend. Killing and torture are the pattern and practice of the "security forces". The military in El Salvador is a clear and present danger to human life and constitutes the major impediment to much needed economic and social reform." But the facts are quite different, and it is our intent to make these facts available to the American public.

When the reform-minded military leaders of El Salvador staged a successful coup on October 15, 1979, they made a series of promises to the people of El Salvador not unlike the promises the Sandinistas in neighboring Nicaragua made when they had come to power four months earlier—respect for human rights, free elections, economic and social pluralism. Unlike the Sandinistas in Nicaragua, the junta in El Salvador has kept their stated public promises to the citizens of their country. Economic and Constitutional reform have proceeded. Parties and politics flourish, there is a free press, free universities, free trade unions in El Salvador. And, of course, elections were held in March 1980 in which over 80 percent of the population participated and were judged by hundreds of international observers to have been fair elections. Democracy, though fragile, has taken root in El Salvador.

It has not been easy. The response of the communist terrorists in El Salvador to these reforms has been to conduct a campaign of armed insurrection and terrorism against the people and property of El Salvador. As Lenin said, the purpose of terrorism is to terrorize. The deliberate use of terrorism as a tactic of destabilization is a consistent aspect of so-called "wars of national liberation." Terrorism is employed to produce repression by the government under attack, to intimidate the population, and to produce anger at the inability of the government to provide order and security, thus weakening its authority and legitimacy, and creating a "revolutionary situation."

The assumption that the Government of El Salvador is responsible for the death and destruction in that country cannot continue to go unchallenged. The data presented today represents a description of communist terrorist activities in El Salvador from October 1979 through June 1983. It is not a complete record because full and accurate information is difficult to obtain in the United States. The daily reports contained in the Latin American edition of the Foreign Broadcast Information Service (FBIS) do provide, however, a more than accurate account of the violence perpetrated by the communist guerrillas in El Salvador to reveal the shocking results of serious and repeated terrorist activities seldom given adequate, if any, coverage in the Western press. FBIS contains reports from a wide variety of sources, including radio reports from various stations ranging from Radio Cadena in San Jose, Costa Rica to Radio Venceremos (the guerrilla station started in early 1981), Radio Sandino, Radio Havana, various Central American newspapers, and Central American wire services such as Latin Reuters and ACCAN-EFE.

It is virtually impossible to quantify terrorism. How can one measure fear, how can one measure disorientation, intimidation, grief, and anguish? Exact statistics, even if available, would not measure these consequences. But if terrorism cannot be quantified, it can be described.

The communist guerrillas in El Salvador have killed, kidnapped, intimidated, bombed, burned, sabotaged, forcibly occupied churches, schools, hospitals, radio stations, attacked embassies, buses, villages, homes, cars, streets, and citizens causing death, destruction, terror and refugees.

FBIS reports, alone, report that from October 1979 to June 1983, 21,948 citizens of El Salvador were killed, wounded, kidnapped or held hostage by communist terrorists.

The following is a description of terror. The attacks by the communist guerrillas on innocent citizens, trying to pursue their lives in normal ways—driving in a car, disk jockeys in radio stations, government workers at their jobs, people praying in church, people sitting in their livingrooms plunged into darkness without electricity, peasants harvesting—the very people the guerrillas claim they desire to liberate—gives evidence of the systematic, deliberate and uninhibited use of violence against the innocent.

On January 4, 1980, it is reported by Paris AFP radio service that "Members of the clandestine Farabundo Marti Popular Liberation Forces (FPL) today seized five local radio stations. The FPL occupied the radio stations to broadcast to the nation what they termed a revolutionary New Year's message, in which they made an appeal for national insurrection. . . . The Radio stations seized were Radio Senorial, Radio Cadena Central, Circuito, Radio Sonora and Radio 1080."

El Diario De Hoy reports on March 20, 1980 "Several automobiles were burned yesterday when subversive groups armed with submachineguns and pistols stopped cars at traffic lights and hurled Molotov cocktails at them. Similar actions against innocent drivers were reported in other sectors of the capital."

A January 13, 1980, Buenos Aires Latin reports: "Some 20 members of the subversive organization the People's Revolutionary Bloc (BPR) seized the metropolitan cathedral this morning while San Salvador Archbishop Oscar Arnulfo Romero was about to finish his homily, a church spokesman said. The prelate had criticized kidnapings and the taking of hostages, specifically mentioning the occupation of the Panamanian Embassy, the kidnaping of South African Ambassador Archibald Gardner Dunn and the capture of a national guardsman in Arcatao, 130 km north of here.

"Archbishop Romero asked for mercy for the hostages during the homily. He told the BRP group that, if they truly represent the people, they should not torment people who have no responsibility whatsoever for the events taking place in this convulsed country."

On April 16, 1980, Panama City ACAN radio service reports: "Six persons died Monday in Soyapango, 6 km east of San Salvador, when the town was "taken" by a guerrilla commando group. That morning a large number of guerrillas of the Armed Forces of National Resistance (FARN) arrived at the mayor's office and killed the

mayor, Jose Atilio Estrada, and a member of his staff. When government soldiers arrived on the scene, an armed clash ensued. Four civilians were killed in the 90 minute clash. None of these four victims had any relationship with the guerrilla group, and it is believed that they were caught in the crossfire."

The mayor of San Salvador on April 15, 1980: "The destruction of small businesses, factories, banking and financial institutions, ambulances, state agricultural equipment, mass transit and private automobiles by bombs, arson, and looting is reducing the capability for providing public services and leads to mass unemployment which generates poverty, Julio Adolfo Rey Presndes, mayor of San Salvador, told newsmen yesterday."

Radio Cadena's report of August 7, 1980: "Spokesmen of Berlin municipality in Usulutan Department told this station today that some 1,000 people who have fled the violence in nearby cantons are in Berlin. The municipal spokesman said that most of the refugees are women and children from the cantons of Corozal, Corozalito, La Union and (Las Cielitas). . . . It has also been reported that in San Augustin, Usulutan Department, there are some 1,500 refugees who have fled from the political violence in the rural areas."

Over 3,500 people—working at the Salvadoran Education Ministry, the Spanish Embassy, the National Commercial School, the General Francisco Mendez National Institute, the Panamanian Embassy, the Agriculture and Livestock Development Bank, the Branch office in Usulutan of the Farming Development Bank, the National Waterworks and Sewers Administration, the Labor and Social Welfare Ministry, the Salvadoran Foreign Trade Institute, the Offices of the Teachers Welfare Board, the Jose Simeon Canas Central American University, the Central Market Administrative Office, all of which were forcibly occupied—were held hostage in the month of February 1980, alone.

In February 1981, a report from El Mundo: "Another general power outage in the east was caused by another dynamite attack at 0275. In this way, San Miguel returned to its situation of the previous days and nights. . . . It was also said that it had been known that the area affected is larger than the previous one. since it includes a part of Usulutan, Morazan and La Union Departments. For the time being, it was said that San Miguel, which was just beginning to recover from a recent outage, has returned to a disastrous situation and the citizens fear that the situation might be worse this time."

Over 25 separate bombings of highway machinery, restaurants, stores, private homes, banks, high tension wire, supermarkets and branch banks were reported in September, 1981 alone.

October 8, 1980 reports from San Jose Radio Noticias: "A new state of the liberation struggle waged by the revolutionary organizations against the Salvadoran regime has begun. Some 300 guerrillas made the first reported appropriations of stable grains and export products. In La Haciendita, in the northern part of the country, revolutionary columns carrying automatic weapons and dressed in olive drab seized a significant amount of corn yesterday. They urged us to help them load the cereals and then left, a peasant said. He added that a young woman who arrived with the guerrillas emphasized that the people need the food to continue the war.

As Aleksandr Solzhenitsyn has so directly pointed out: "Let us not forget that violence does not and cannot exist by itself: it is invariably intertwined with the lie. They are linked in the most intimate, most organic and most profound fashion: violence cannot conceal itself behind anything except lies, and lies have nothing to maintain them except violence. Anyone who has once proclaimed violence as his method, must inexorably choose the lie as his principle." The violence and the lies regarding El Salvador must be exposed, challenged, and understood for what they are. El Salvador is country that is under attack by externally supported terrorists whose goal is to gain power in order to implement a totalitarian dictatorship over the people of that country. This report is a description of the means—the use of terror—they are employing to achieve that goal.

[Graphs on revolutionary terrorism in El Salvador during 1979, 1980, 1981, 1982, and 1983 not printed in the RECORD.]

WHOLESALE DESTRUCTION OF FIRST AMENDMENT BY THE SEC

(Mr. NIELSON of Utah asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. NIELSON of Utah. Mr. Speaker, I have become aware of a problem relating to the Securities and Exchange Commission that should be of interest to my fellow Members. In 1940 Congress passed the Investment Advisors Act, designed to prevent fraud and stock scalping by those handling money on behalf of others.

This is a good law, except that there is a group of publishers who believe that the first amendment applies to the whole press, not just part of the press. Hundreds of financial newsletters, which handle no money whatsoever and have no fiduciary relations with their subscribers are being forced to seek licenses before they can publish or be faced with Federal felonies and fines. What has happened is nothing less than the wholesale destruction of the first amendment by the SEC.

The SEC has the power to obtain copies of the complete lists with subscribers with no judicial protection for any of the normal considerations of privacy between author, publisher, and reader. This action can occur without any showing of any criminal, or even suspicious, activity. Additionally, all financial records of these publications must be handed over to the SEC. In fact, these publications may not even sell their businesses without the prior approval of the SEC under the theory that the subscription list is a regulated asset.

The first amendment is being seriously damaged by this licensing and prior restraint of publication by the SEC. I urge you to read the column by Stephen Chapman which appeared in the Chicago Tribune on April 21, 1983, and which I am inserting in the CONGRESSIONAL RECORD, as follows:

[From the Chicago Tribune, Apr. 12, 1983]

THE SEC AND PRESS FREEDOM

(By Stephen Chapman)

Censorship. Prior restraint. Licenses to publish. These are the familiar tools of foreign dictators—but also of our own Securities and Exchange Commission, which operates on the assumption that the 1st Amendment doesn't mean what it says.

But that assumption is being challenged. The agency's authority to restrict what investors may read, and by whom it may be written, is disintegrating under judicial scrutiny. A recent court descision dramatized the essential point: The SEC's rules are incompatible with a free press.

The case involved one Christopher Lowe, a registered investment adviser distinguished only for his convictions for everything from theft to tampering with evidence. Taking a dim view of that record, the SEC revoked his registration, making it illegal for him to publish his investment newsletters. But U.S. District Court Judge Jack Weinstein of New York ruled that, under the 1st Amendement, it cannot prevent Lowe from publishing.

That decision may be the beginning of the end of these restrictions. Since 1940, the SEC has had broad powers over investment advisers, including anyone giving advice "either directly or through publications or writings."

Those who fail to register with the agency can be imprisoned for five years and fined $10,000—even if they are doing nothing more than exercising what look suspiciously like 1st Amendment rights. Besides giving the SEC the effective right to license publishers, the law allows it to regulate the content of such publications and to restrict the sale of the publisher's assets.

To give the appearance of complying with the 1st Amendment, Congress exempted "the publisher of any bona fide newspaper, news magazine or business or financial publication of general and regular circulation." But the distinction won't wash—as the case of SEC v. Lowe suggests.

Who would imagine that the constitution would allow similar rules for ordinary newspapers? A criminal conviction may be reprehensible, but it isn't—and shouldn't be—a legal obstacle to putting out a newspaper. As Geoffrey Stone, a law professor at the University of Chicago, puts it, "Prohibiting someone from engaging in future speech because of his past transgressions is about as clear a violation of the 1st Amendment as any restriction could be."

The theory behind the 1st Amendment is that the reading public is the best judge of the press. Bad ideas and even false information may get propagated in a free marketplace of ideas, but competition among different voices is the public's best protection—far better than letting the state dictate what may be written and read.

The SEC assumes the investing public can't distinguish good advice from bad, or honest advisers from criminals. But investment publishers face the same imperative as newspapers: to please their readers. Because its readers judge it by the strictest and simplest of standards—whether or not it makes them richer—an investment newsletter is probably more vulnerable than a newspaper, not less.

If it consistently recommends what turn out to be poor investments, it won't have many subscribers. If it provides fraudulent information, it will be liable for damages to the victims.

The SEC's rules have always rested on sand, surviving only because they have rarely been challenged in court. As a recent article in Reason magazine pointed out, "The one time the SEC actually received a court ruling on the issue of whether a financial publication must register as an investment adviser, it lost." Make that two times.

In this case, the agency argued that "commercial speech" has always gotten less protection than other types of speech. "To be sure, the investment publisher has a financial motivation to disseminate his analyses and recommendations," said Judge Weinstein, "but so may the literary publisher or political pamphleteer." Investment newsletters, he concluded, are more like newspapers than like commercial advertisements. Hence they should be protected like newspapers.

That is a long step, though hardly the last one, toward making the 1st Amendment operable for the press in all its forms. In considering the SEC's powers, the courts should keep in mind what a lawyer once told the Supreme Court: "The commandment of the 1st Amendment is simply: Thou shalt not abridge. And it is not, 'You may abridge, but please try to keep it reasonable.'"

IN MEMORY OF JUANITA DUGGAN ROBERTS

(Mr. GONZALEZ asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

● Mr. GONZALEZ. Mr. Speaker, I would like to pay tribute to the memory of a truly remarkable woman and friend, Juanita Duggan Roberts.

She will be remembered for her dedicated service to her country, her commitment to her beloved State of Texas, and her loyalty to President Lyndon Baines Johnson.

Mrs. Roberts served as Johnson's principal secretary and as a military aide during much of his political career. They had first met around 1938, and she joined Johnson's congressional staff in 1953, continuing to work for him throughout his years in public office.

Mrs. Roberts performed her tasks with unwavering skill and devotion. President Johnson often referred to her as "Miss Efficiency." Those who worked with her describe her as "extraordinarily competent." George Reedy, Johnson's Press Secretary, said of her: "She could take a terribly confused situation and make it manageable." Johnson trusted her to carefully handle many of the important and sensitive problems of the time.

Juanita Roberts and Lyndon Johnson continued a close friendship with each other right up to his death. Her devotion and skill went into formulating a dietetic program for then U.S. Senator Johnson when he suffered his first heart attack in 1955. Mrs. Roberts' early experience was as a county home demonstration agent at Nacogdoches following her graduation from Texas State College for Women (now called Texas Woman's University) at Denton with a bachelor's degree in foods and institutional management.

During World War II Mrs. Roberts served on active duty from 1942 to 1946, later becoming a staff officer in the Pentagon headquarters of the Joint Chiefs of Staff. She was a member of the first class of officers commissioned into the Women's Army Auxiliary Corps. She attained the rank of Colonel and held several distinguished decorations, including the Legion of Merit and the Oak leaf Cluster.

Those who knew Mrs. Roberts remember her dedicated work in organizing the Lyndon B. Johnson Library at Austin. As far back as the 1950's, Mrs. Roberts had wanted to preserve a lasting record of Johnson's papers. As Johnson's secretary, she kept an account of the Senator's daily activities and continued to do so when he became Vice President, and then President.

Mike Gillette, director of the oral history program at the LBJ Library, said that Juanita was responsible for getting an expert from the Library of Congress to set up a filing system to preserve Johnson's papers.

Mrs. Roberts worked in especially close cooperation with Lady Bird Johnson in creating the library. George Reedy, and others who know of her efforts, praise her organization of the project. Reedy said: "In a very real sense, Juanita was the foundation of the Lyndon Baines Johnson Library."

Mrs. Roberts demonstrated personal qualities of warmth and kindness that endeared her to the many people who came to know her. I was one of those people. A long time good friend of Juanita's, Washington reporter Sarah McClendon, summed it up perfectly, "she was a wonderful person."

She was devoted to her fellow Texans in Washington, and earlier this year, shortly before her death, the Texas State Society of Washington honored her for her many years of distinguished service.

As an admirer and friend of Juanita Roberts I extend my heartfelt sympathies to her many friends in Washington, in Austin, and in Port Arthur where she was reared and once served for 5 years as president and general manager of a fashion shop and tea room.

Also my condolences go to her cousins and friends at Yazoo City, Miss., the original home of the Duggan family.

A memorial service is planned for September 9 here in Washington at 2 p.m. at the United Church, 1920 G Street, Northwest.

Let all of us pause a moment to pay tribute to the memory of this wonderful person, this great American who contributed greatly to our country, and whose life made this world a better place.●

COMMUNICATION FROM CHAIRMAN OF THE COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION

The SPEAKER pro tempore laid before the House the following communication from the Chairman of the Committee on Public Works and Transportation:

COMMITTEE ON PUBLIC
WORKS AND TRANSPORTATION,
HOUSE OF REPRESENTATIVES,
Washington, D.C., August 3, 1983.

Hon. THOMAS P. O'NEILL,
The Speaker, U.S. House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the provisions of the Public Building Act of 1959, as amended, the House Committee on Public Works and Transportation approved the following projects on August 3, 1983:

An amended resolution providing for construction of a Federal Building in Long Beach, California.

11(b) Resolution, Newark, New Jersey.
11(b) Resolution, St. Louis, Missouri.
11(b) Resolution, Paterson, New Jersey.
11(b) Resolution, Baltimore, Maryland.

R&A PROSPECTUSES

Federal Building, New Orleans, Louisiana.
Post Office Building, Pittsburgh, Pennsylvania.

CONSTRUCTION PROSPECTUSES

Federal Building, Knoxville, Tennessee.
Federal Office Building, Portland, Oregon.

The original and one copy of the authorizing resolutions are enclosed. Every best wish.

Sincerely,

JAMES J. HOWARD,
Chairman.

The SPEAKER pro tempore. Without objection, the communication is referred to the Committee on Appropriations.

There was no objection.

GENERAL LEAVE

Mr. GONZALEZ. Mr. Speaker, I ask unanimous consent that all Members may be permitted to extend their remarks and to include extraneous material on the subject of the special order speech today by the gentleman from Illinois (Mr. ROSTENKOWSKI).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

□ 2000

U.S. FISHERIES DEVELOPMENT CORPORATION ACT OF 1983

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. FORSYTHE) is recognized for 15 minutes.

● Mr. FORSYTHE. Mr. Speaker, today I introduced the U.S. Fisheries Development Corporation Act which

would establish a Corporation to promote the development of the U.S. fishing industry. The Corporation would bring together in one place the financial assistance and other services which are essential if the U.S. fishing industry is to take its rightful place of prominence in the international community.

While fantasy would have the American fishing industry succeed merely by dint of the resolve of men who go down to the sea in ships, a more pragmatic appraisal reveals that not only is the industry multifaceted, but the achievement of its development objectives requires a sophisticated blending of a variety of skills, funding sources, and services. The Corporation would provide that blend.

The sea was a vital factor in the exploration and development of the United States, but the Federal Government's commitment to its continued preeminence in ocean affairs has been inconsistent at best. In particular, the Federal commitment to the future of the American fishing industry has been inadequate, as has the faith of the Government in the ability of the industry to take full advantage of a helping hand. I believe we must break with past practice and give high priority to the nourishment of that industry.

It is clear that full utilization of the vast and valuable fishery resources off our shores will only be achieved as a result of a partnership among all parties concerned in which the Federal Government serves as a primary catalyst. Certainly the Government cannot do the whole job, and I would not propose that it try, but equally the Federal Government cannot shirk its obligation to an industry which laid a substantial part of the economic foundation for America's greatness.

Seven years ago, the United States expanded its fishery jurisdiction to 200 miles off its coasts in an effort to realize for the United States the benefits from the substantial resources in that zone. While that extension of jurisdiction has certainly benefited the domestic fishing industry, it would still be appropriate to say that the industry is only on the threshold of its full potential.

I believe strongly that the fishery resources off our shores can provide the foundation for a resurgence of the U.S. fishing industry to a position of world leadership. Achievement of that goal will require us to overcome a number of obstacles—but clearly the will is there. What is needed is to translate that will into tangible results through a creative partnership between the Federal and State governments, the investment community, and all sectors of the fishing industry.

The potential rewards of such a partnership are enormous. Of course, the effort will involve some risks—most things that are worthwhile do. But, I am convinced that the individuals involved in all phases of the industry have shown that they are prepared to bear some of that risk. It is up to the Government to bear some of that risk as well because it can be profitable both for the industry and for the Nation.

Too often in the past we have sought solutions to the industry's needs through a piecemeal approach. This has led to a maze of Government programs which have made it difficult for fishermen, processors, marketers, and investors to communicate their needs to responsible agencies, to identify the sources of assistance, and to take full advantage of them. This situation must not be allowed to continue.

I believe the Corporation envisioned in the bill I introduced today could form the nucleus for the creative partnership I mentioned earlier and could channel the vitality of the U.S. fishing industry toward achievement of its goals.

Virtually all major fishing nations have established government-sponsored institutions to assist their fishing industry. These include such institutions as the United Kingdom's Sea Fish Industry Authority, the Japan External Trade Recovery Organization—or JETRO, as it is commonly known, the Fisheries and Port Development Bank of Mexico, and the New Zealand Fishing Industry Board. Although the cultural, political, and economic contexts of each country are different, the impediments facing their industry are, in many ways, similar to the problems confronting the U.S. fishing industry. Therefore, the degree to which foreign nations have successfully turned to quasi-government institutions similar to the Corporation I am proposing is instructive. The extent to which the United States has turned to quasi-government institutions to assist other domestic industries, such as agriculture, housing, transportation, and communications, also suggests that this approach can be highly beneficial to the U.S. fishing industry.

Let me first emphasize that I am not talking about the creation of an enlarged Federal bureaucracy with all that entails. Rather, I am talking about creating an institution directed by the fishing industry with the goal of designing and administration programs to serve that industry. I am also not talking about casting the fishing industry adrift to fend for itself without Federal help. Rather, I am talking about redirecting Federal dollars now devoted to a plethora of industry programs, and adding to those funds substantial moneys which Congress has long indicated should be devoted to the fishing industry, plus income earned through the provision of necessary services and borrowing authority from the Treasury.

Like every corporation, this one will require a Board of Directors. To insure balanced representation of all segments of the industry, the voting members of the Board would be drawn from knowledgeable and experienced individuals from the harvesting, processing, and marketing sectors of the domestic fishing industry. Each of these three sectors would be represented on the Board by eight Directors who are residents of each of the regions over which the Regional Fishery Management Councils established under the Fishery Conservation and Management Act of 1976 have jurisdiction. To facilitate communications with relevant Federal agencies, the Board would also have three nonvoting members, including the Secretaries of Commerce and State and the Special Trade Representative of the President, or their designees.

The voting members of the Board of Directors would number 25, all of whom would be appointed by the President by and with the advice and consent of the Senate. Not more than 13 voting members could be members of any 1 political party. The Chairman of the Board, who would need to be knowledgeable and experienced in business affairs, would also be appointed by the President. All members of the Board would be eligible for reappointment for any number of terms, and could be removed from the Board by the President only for neglect of duty or malfeasance in office. All actions of the Board would have to be by a majority vote of all members, including the adoption or amendment of bylaws, policies, and administrative provision necessary to the functioning of the Corporation and consistent with the provisions of the act. Compensation for each Board member would be limited to $5,000 per year.

Because of the broad scope of financial responsibilities of the Corporation, there would also be established a Financial Affairs Committee for the purpose of advising the Board as to policies and procedures relating to: The investment of money; the initiation or operation of financial assistance programs the Corporation may administer or consider initiating; the initiation or operation of insurance programs; and such other financial matters as the Board determines are appropriate for its review. The Committee would consist of five members knowledgeable and experienced in financial affairs relevant to the Corporation's responsibilities. The members, including the Chairman, would be appointed by the President and serve at his pleasure. Like the Board of Directors, the Committee members could be compensated for their services up to $5,000 per year.

11-059 O-87-15 (Pt. 17)

In order to provide the Corporation with the maximum flexibility to carry out its responsibilities, the Board of Directors would have the power to select, employ, and fix the compensation and benefits of such officers, employees, attorneys, and agents as shall be necessary for the performance of the Corporation's duties. If the Board determines it is necessary to fix the compensation of any individual in excess of that prescribed for level V of the Executive Schedule—$63,800—the Board would be required to transmit a recommendation to the President, whereby it would become effective shortly thereafter, unless disapproved by the President. This employment and compensation procedure would allow the Corporation to attract the best talents to serve the U.S. fishing industry. There is, of course, the possibility that the Board would wish to employ individuals who are now employed by the National Marine Fisheries Service in capacities relating to the implementation of some programs which would be assumed by the Corporation. There is nothing in this legislation which would prohibit such action by the Corporation. In fact, I would hope that the Corporation and the Department of Commerce could cooperate, where appropriate, to facilitate the shift of employees to the Corporation or the detailing of certain employees to the Corporation where requested.

The legislation makes it clear that no political test or political qualifications shall be used in selecting, appointing, promoting, or taking any other personnel action in the Corporation, or in selecting any grantee, contractor, or other person or entity receiving financial assistance under the act. The bill also encourages the Corporation to make such arrangements or agreements for cooperation or mutual assistance with Government agencies as are practicable and consistent with the law in order to avoid unnecessary expense and duplication of functions. In doing so, the Corporation may, on a reimbursable basis, utilize the facilities or services of any department, agency, or establishment of the United States, or of any State or political subdivision of a State, including the services of any of its employees, with the lawful consent of that department, agency, or establishment.

The financial disclosure provisions of the Ethics in Government Act of 1978 would be applicable to officers and employees of the Corporation compensated at a rate equivalent to that payable to a grade GS-16 or above of the General Schedule. In order to insure that the decisions of the Corporation are not unduly influenced by the financial interests of individual Directors, the bill contains a provision requiring that no Director shall vote on any matter in which the Director or his immediate family, or an organization other than the Corporation in which the Director is serving as an officer, Director, trustee, partner, or employee, or any person or organization with whom the Director is negotiating or has an arrangement concerning prospective employment, or has a financial interest. Action by a Director contrary to this prohibition would be cause for removal, unless the Director first advises the Board of Directors of the nature of the matter in which he proposes to participate and makes full disclosure of his financial interest, and the Board of Directors determines by a majority vote that the financial interest is too remote to affect the integrity of the Director's services for the Corporation in that matter.

Because the Board of Directors is expected to serve a policy role similar to that of the boards of typical American corporations, rather than a day-to-day management function, the bill provides that the Board of Directors may delegate to an Executive Director the functions, powers, and duties assigned to the Corporation. The Chief Executive Officer similarly may delegate the functions, powers, and duties assigned to him to such other officers or employees of the Corporation as the Executive Director deems appropriate.

In order to carry out its responsibilities, the Corporation is specifically given a number of powers. These powers include, but are not limited to, the power: To make agreements and contracts with individuals and private or governmental entities; to lease, purchase, accept gifts or donations of, or otherwise to acquire or dispose of property; to sue and be sued; to make provisions for and designate such committees, and the functions thereof, as the Board may deem necessary or desirable; to use the U.S. mails on the same terms and conditions as executive departments of the U.S. Government; to retain and use earnings without fiscal year limitations; and to determine the character, manner, and necessity of expenditures, except in specific cases where revenues from certain programs must not exceed revenues necessary for operation and administration of these programs; and to exercise all other lawful powers necessary or reasonably related to the establishment of the Corporation and the carrying out of the Corporation's functions under the act.

In order to maximize the opportunity for the Corporation to be of substantial benefit to the domestic fishing industry in its efforts to achieve full development, the Corporation is provided with a variety of means to target assistance to promote revitalization of the industry. The thrust of this legislation is the provision of capital formation assistance to the domestic fishing industry through the provision of loans and indirect incentives in the form of credit guarantees, as well as through grants intended to stimulate innovative research in areas which show promise of being assumed totally by the private sector.

The Corporation's principal authority granted by its character to promote full development of the domestic fishing industry falls into five categories: Loans, loan guarantees, equity investments in joint ventures, grants, and export transaction assistance.

First, the Corporation would have the power to make loans, under certain conditions, to U.S. citizens, to assist them to: Finance the cost of purchasing or constructing new U.S. fishing vessels or fisheries facilities; finance the cost of purchasing, reconstructing, or reconditioning used U.S. fishing vessels or used fisheries shoreside facilities; and finance the purchase of fishing gear for new or used U.S. fishing vessels.

Second, the Corporation would have authority to guarantee debt obligations under the same general terms and conditions as set forth for loans, except that the guarantee authority is to be utilized where application of the standard economic soundness criteria considerations mitigate against the use of the loan authority. The maximum aggregate contingent liability of the Corporation outstanding at any one time with respect to such guarantees could not exceed $500,000,000.

Third, the Corporation would be able to promote capital investment and stimulate innovative approaches to the development of the industry through the authority to participate as an equity investor in fisheries development projects. The Corporation's participation in a joint venture would be restricted to limited partnership status. In such a joint venture project, the Corporation may not directly undertake the construction and operation of the project, and the Corporation shall not finance more than 60 percent of the total costs of the project as estimated by the Corporation as of the date of the execution of the project agreement. As noted earlier, Corporation participation in any such venture would be limited to financial participation only, and could not include any direct role in the construction or operation of fishing vessels or shoreside facilities or primary responsibility for management of the joint venture.

Fourth, the act provides that the Corporation may, subject to appropriations, make grants for innovative research where there is a high probability that the private sector is prepared to commit sufficient resources to continue the project beyond a certain date. Each grant would be limited to no more than $200,000 and would have to proceed in three phases. The

purpose of phase one would be to conduct feasibility related experimental or theoretical research on the proposed innovative idea or approach. Phase 2 would be the principal research effort; only those receiving phase 1 awards would be eligible for phase 2 funding. The third phase, to be conducted by the private sector, would be funded from a third party source through the exercising of a follow-on funding commitment. In effect, phase 3 would be to pursue commercial objectives following the Corporation-supported research carried out in phases 1 and 2. Phase 3, the development phase to pursue commercial applications of the project, would not be funded by the Corporation. The objective of the above approach would be to increase the incentive and opportunity for undertaking cutting edge, high risk, or long-term research that has a high potential payoff if the research is successful. Major innovations often require high risk front-end investment which effectively lowers the risk for follow-on investors. It is hoped that Corporation support of front-end research on new ideas, often the highest risk part of the innovation process, would provide sufficient incentive for the private sector to pursue such research.

Fifth, the Corporation is empowered to facilitate, through loans, guarantees, and insurance—including coinsurance and reinsurance, those export transactions which offer sufficient likelihood of repayment to justify the Corporation's support. Such assistance could include export credit guarantees and other types of assistance now offered to agricultural commodities by the Commodity Credit Corporation. The aggregate of any loans, plus the contracted liability of guarantees and insurance outstanding at any one time for export transactions, may not exceed $500,000,000. This limit is separate from $1,500,000,000 in borrowing authority from the Federal Financing Bank described later.

In addition to the above forms of financial assistance, the Corporation would be assigned the responsibility to:

One identify, and undertake a continuing analysis of the effects of, the economic, physical, legal, institutional, and social constraints that inhibit the full development of the harvesting, processing, and marketing sectors of the U.S. fishing industry;

Two, undertake studies and experiments, on a contractual basis, in cooperation with Federal and State agencies and appropriate private institutions, to determine the effectiveness of concepts with the potential of advancing innovation in each sector of the U.S. fishing industry;

Three, identify those aspects of the U.S. fishing industry and those areas of the U.S. economy which, if addressed, could make a significant contribution to the welfare of the U.S. fishing industry and the economy;

Four, establish and maintain an information service for the collection, analysis, and dissemination of information useful to the U.S. fishing industry;

Five, enter into arrangements with foreign nations and institutions for the exchange of data and information relating to foreign fishing industry development, and provide appropriate translation services;

Six, assist U.S. citizens in the generation, evaluation, and development of new entrepreneurial ventures to expand the U.S. fishing industry;

Seven, provide, upon request, general technical assistance and advisory services to the U.S. fishing industry;

Eight, provide insurance services if the Board determines that such insurance cannot be obtained on reasonable terms and conditions from insurance carriers authorized to do business in any State and if such insurance can be offered by the Corporation with due regard to principles of risk management; and

Nine, through trade offices required to be established in foreign countries, carry out programs consistent with the legislation to increase the effectiveness of export promotion for products of the U.S. fishing industry.

In carrying out the above functions, the Corporation would be required to charge a reasonable fee.

In addition to the above mandatory functions, the Corporation would be empowered to carry out the following discretionary functions:

One, on a contractual basis, aid in the expansion of domestic markets, or in the development of new and additional foreign markets, for the products of the U.S. fishing industry through the provision of appropriate services, both within the United States and abroad, such as, but not limited to—(a) appropriate business, management, legal, engineering, architectural, and other professional services; (b) financial, transportation, informational, and any data-based services; and (c) communication services.

Two, on a contractual basis, provide management and program services to a national fisheries products marketing board, or to one or more regional fisheries marketing boards, to enable such boards to establish a coordinated program of research, education, and promotion to expand the domestic markets for the products of the U.S. fishing industry;

Three, on a contractual basis, provide specialized technical assistance and advisory services sought by members of the U.S. fishing industry;

Four, extend export credit with respect to the products of the U.S. fishing industry; and

Five, enter into contracts to enhance the research and development capability of developing foreign nations with respect to fishery-related activities, except that such contracts may not prejudice activities of the Corporation for the benefit of the U.S. fishing industry and may be entered into only after consultation with the Secretary of State.

Financing of the Corporation to enable it to carry out all the functions enumerated above would come from a variety of sources. At the outset the Secretary of Commerce would be required to transfer to the Corporation 60 percent of all funds appropriated to the Secretary, but unobligated as of October 1, 1984, from the Saltonstall-Kennedy fund and all funds appropriated to the Secretary, but unobligated as of October 1, 1984, from the Fisheries Loan Fund. If the sum of the above amounts is less than $100,000,000, there is authorized the appropriation of the difference. Subsequent receipts from foreign fishing fees are also to be transferred to the Corporation, first to be used to establish and maintain trade offices in foreign nations and second to reduce the charges imposed by the Corporation with respect to certain industry services. The Saltonstall-Kennedy funds transferred at the outset, or subsequently appropriated, are to be devoted to the grants program provided for in the bill.

For the purposes of carrying out the functions of the Corporation, to the extent such functions are not funded by appropriations, not covered by fees, charges or premiums imposed and collected by the Corporation, or by revenue otherwise accruing to the Corporation, the bill provides that the Corporation may: (1) issue for purchase by the Secretary of the Treasury, obligations which may at any one time not exceed $1,500,000,000; and (2) either sell its guaranteed loans or guaranteed obligations to the Federal Financing Bank or retain them as security for the issuance of mortgage-backed securities for sale either through the Federal Financing Bank or in the private market. The Secretary of the Treasury is required to purchase any obligations of the Corporation issued under the Corporation's authority as described in (1) above.

The Federal Financing Bank (FFB) is an off-budget entity which currently accounts for over 95 percent of the current estimate for offbudget spending. The FFB finances all of its transactions by borrowing from the Treasury. The FFB conducts three distinct kinds of spending transactions. First, the FFB purchases the debt securities of Federal agencies. This kind of transaction converts agency debt into Treasury borrowing, thereby removing that agency debt from competition with Treasury borrowing. This reduces

the total interest cost of Federal borrowing. Second, the FFB purchases loan assets from Federal agencies. This kind of transaction shifts the direct loan outlays of onbudget Federal agencies offbudget. Finally, the FFB purchases loans guaranteed by Federal agencies. This kind of transaction effectively converts a federally guaranteed loan into an offbudget direct loan.

Mr. Speaker, I believe the Corporation's structure, financing procedures, and range of functions will provide a sound basis for the Corporation to make a substantial contribution to restoring the U.S. fishing industry to a preeminent position in world fisheries. Enactment of this legislation would signal to the industry that the Federal Government recognizes the current and potential contribution of that industry to the Nation's economy, and is prepared to offer its full support to the realization of that potential.●

LEGISLATION FOR A RESEARCH CONSERVATION PROGRAM IN THE ST. JOHN RIVER BASIN

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Maine (Ms. SNOWE) is recognized for 5 minutes.

● Ms. SNOWE. Mr. Speaker, I am pleased to introduce legislation to authorize a major resource conservation and cropland irrigation project in northern Maine's St. John River basin.

The St. John basin in Aroostook County covers nearly one-quarter of Maine and represents 85 percent of the truck crops—primarily potatoes, grown in all New England. As you know, Mr. Speaker, for over 8 years the Maine potato industry has battled with the unfair trade practices of the Canadian Government. As a result of a vast array of Canadian agricultural subsidy programs, imports of Canadian potatoes into the United States have increased by more than 700 percent since 1976, causing serious economic hardship on the industry. As these trade problems have persisted, Maine farmers have also been forced to cope with the ongoing problems of soil erosion which has further reduced farm income.

In recent years, the overall health of the Maine's potato industry has been severely impaired by the lack of sufficient conservation practices on croplands. Consequently, over 75 percent of the 180,000 acreas of cropland in potato rotation is polluted from an annual 1 million tons of eroding topsoil, pesticides, insecticides, and fertilizers. The harsh reality of this major agricultural industry in Maine faltering as a result of inadequate conservation measures is cause for serious concern.

In view of Maine's pressing agricultural problems, the Army Corps of Engineers in 1980 proposed the St. John River basin resource demonstration project for cropland irrigation and conservation for farmers to utilize cost-effective conservation measures to improve the quality of their croplands. The potential strength of this project lies in its ability to reduce soil erosion by 59 percent and increase crop yields by 65 percent which will significantly improve the net income of potato producers in the region.

Unfortunately, in the 2½ years that the project has been proposed, State and local agricultural officials have not been able to garner sufficient financial support to implement the project, and therefore greatly need Federal assistance. This bill offers a vehicle for Federal aid by authorizing $1.8 million in fiscal year 1984, $820,000 in fiscal year 1985, and $785,000 in fiscal year 1986 to implement the St. John River basin resource conservation project.

Mr. Speaker, in an effort to greatly improve the quality of Maine's croplands and insure the economic livelihood of Maine's 1,200 commercial potato producers, I urge my colleagues to support this legislation and I urge its prompt consideration by the House.

H.R. 3844

A bill to authorize the United States Army Corps of Engineers to undertake a program of research demonstration in the Saint John River Basin, Maine

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Army, acting through the Chief of Engineers, is authorized to implement a program of research in order to demonstrate the cropland irrigation and conservation techniques described in the report issued by the New England Division Engineer, dated May 1980, for the Saint John River Basin, Maine.

SEC. 2. For the purposes of this Act, there is authorized to be appropriated to the Secretary the sums of $1,825,000 in the fiscal year ending September 30, 1984, $820,000 in the fiscal year ending September 30, 1985, and $785,000 for the fiscal year ending September 30, 1986, such sums to remain available until expended.●

MILITARY AND POLITICAL DEVELOPMENTS IN CENTRAL AMERICA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. LEACH) is recognized for 60 minutes.

Mr. LEACH of Iowa. Mr. Speaker, military and political developments in Central America have quickened in pace and intensity in the last few weeks and with them the debate in this body over the direction of U.S. policy toward the region.

As one Member of the minority who believes that an effective foreign policy demands a delicate balance of bipartisan support as well as bipartisan criticism, I urge the administration at this critical strategic juncture to assure the Congress and the American people by its actions as well as its words that the momentum which appears to be building toward war will not eclipse the momentum which is also building toward peace, and that the snowball of war will not be allowed to overwhelm the snowball of peace.

I realize those assurances may not be easy to grant. In the past several weeks, Congress and the American public have been confronted almost daily with headlines reporting military maneuvers and exercises in which U.S. Armed Forces will be intimately involved in Central America. Some 4,000 U.S. troops are to be committed to joint ground exercises in Honduras. Naval deployments to the region will involve aircraft carriers, destroyers, and even the battleship *New Jersey.* Contradictory stories deny, on the one hand, the likelihood of a blockade against Nicaragua and, on the other, through reports of "practice" blockades, fuel fears of such action. Administration determination to support the secret war against Nicaragua has alarmed many and the threat of provocation of a direct military exchange between the Honduran and Nicaraguan Armed Forces hangs over the region.

In the judgment of many Latin experts there is a real possibility that rather than securing stability for Honduras, U.S.-supported actions along the Nicaraguan-Honduran border and training of Salvadoran troops within Honduras may sabotage the future viability of that fledgling democracy. The shadow of full-scale regional war in Central America has seldom been more ominously cast.

At the same time, however, negotiating initiatives appear to hold equally compelling promise that a peaceful, political settlement to the tensions of the region can still be achieved. Special Envoy Richard Stone's meeting with Ruben Zamora of the FMLN/FDR of El Salvador should be applauded as a concrete step toward building a viable negotiating base for ending the civil war in that country. The Contadora group's efforts have won broad support of regional governments including constructive responses from the Governments of Nicaragua and Cuba.

There is no doubt that the present moment holds vast potential for peace as well as for war. Even as the United States mounts a major show of military force in the region, there is increasing evidence that we may well be on the threshold of a breakthrough in meaningful negotiations which may draw us all—friends and adversaries alike—back from the precipice of confrontation.

My concern is that miscalculations in displays of U.S. military might, with all that they are intended to imply, may have the ultimate effect of sabotaging the current peace efforts. There is an ever-present danger that U.S. credibility may be seriously impaired if our Government—faced with an unanticipated challenge to its military might—finds itself unable or unwilling to up the ante and thus comes to be perceived as backing down. That prospect is not so remote if one measures the lack of support for the administration's latest maneuvers in the Congress as well as among the American public. Serious miscalculation by the administration in engaging in military bluster could call into question the political will of the United States and undermine the effectiveness of such deployments for political ends in the future. A too aggressive effort to prove the alleged debilitating aspects of a Vietnam war syndrome are behind, and could reinforce rather than undermine the political strength of those Americans who are skeptical of new U.S. military entanglements abroad.

No one can dispute the President's right, in his capacity as Commander in chief, to authorize certain military actions, as long as such actions are conducted in compliance with the requirements of the Constitution, the Boland amendment, and the War Powers Act. All must acknowledge that there may be limited occasions when positive political benefits may be derived from a selective flexing of military muscle. There may be certain advantages in engaging in a show of force and in leaving an adversary uncertain as to whether bellicose rhetoric may have the potential of fulfillment. However, the administration must understand that displays of military force carry significant liabilities as well, especially if not matched by a credible and equally public commitment to the peace process in Central America.

Here, Congress should be prideful of its role in suggesting that a special envoy be named to meet with all parties to the conflict in the region and that a bipartisan commission be established to reassess the thrust of our Central American foreign policy. The public response to these initiatives, particularly the appointment of the Special Envoy, indicates that it is neither unpopular nor imprudent to stress publicly the second track, the negotiating dimension of our foreign policy.

As for the role of the bipartisan commission, it would seem to provide an ideal opportunity to examine the full implications of our policy in the region. For example, it would appear that little planning introspection has occurred on the question of what happens if the "contras" gather significantly more support, even to the point, with or without our direct intervention, of overthrowing the Government of Nicaragua. What then?

Is not the violence simply likely to escalate? Even if the "contras" or U.S. Marines capture Managua, the capital, would not the civil war almost certainly go on? Nicaragua could become another El Salvador, with the leftists better armed, better trained, and better financed. Under these circumstances, the United States could well become complicitous in sparking a civil disorder without definable resolution.

More perplexing than the strategic issues involved in our Nicaragua policy are the legal ones. Four hundred and eleven Members of this body—Republicans, Democrats, moderates, liberals, and conservatives—voted unanimously in December 1981 for the Boland amendment. Unequivocally, it must be concluded that this Gulf of Tonkin resolution in reverse is now being violated. As Members of Congress posited with the primary obligation to craft law, we have a special responsibility to insure that American foreign policy conforms to the rule of law. Many of us have concluded in this respect that the contra-led covert operation has exceeded its intent and justification under U.S. statute and that, therefore, as a symbol of jurisprudence as well as prudence, U.S. support for the contras should be terminated.

One of the most incomprehensible features of American diplomacy over the last several years has been how little effort has been made to sit down with the Nicaraguans to talk seriously about our differences. Administration spokesmen have painstakingly listed the occasions on which they have attempted to initiate talks with the Sandinistas, beginning in August 1981 and followed by other efforts in the spring and fall of 1982. However, the unadulterated facts are that for a period of nearly 18 months, this great country's pride and diplomatic strategy were such that, on many occasions, we refused to meet with the representatives of the Sandinistas in spite of the fact that we have formal diplomatic relations with that government.

One does not have to assume the Nicaraguans are Eagle Scouts to come to the conclusion that the Nicaraguan Government, like the United States, has a vested interest in peace. Furthermore, while the latest statements emanating from Managua have been heralded as a sudden shift in the position of that government, they are, with several exceptions, not all that different from those made by Nicaraguan officials when Congressman SOLARZ and I visited the country in January. They were beseeching the United States, then as now, for negotiations. It would be misleading to now assume that these latest statements are the direct or exclusive result of administration demonstrations of military force. Waving the flag may impel potential enemies to reconsider their actions. It may also force them into stronger alliances with parties we would not prefer and cause them to build up further internal preparations for war. It is not at all clear which effect has been stronger in Nicaragua.

We must remind ourselves as we escalate our involvement in the region that just as we request regional governments to demonstrate diplomatic flexibility and not become trapped in political rhetoric, we too have an obligation to be vigilant lest we become captives of our own rhetoric.

The momentum of peace is much more difficult to sustain than the pace of military preparation. Timing has become the all-decisive element. There may be temptation among some administration officials to advocate military gestures rather than commit this country to less confrontational diplomatic negotiations. But the great challenge confronting policymakers at this moment is to so construct a decisionmaking process that opportunities for deescalating tension and maximizing opportuntiles for peace are able to prevail over opportunities for further saber-rattling that may lead to unintended results.

It is relevant to call to mind in this context the revelations in Henry Kissinger's recently released memoirs. In an extraordinary strategic acknowledgment, Mr. Kissinger revealed that a decision had been reached early in the administration to bring the Vietnam war to an end. Peace with honor was the goal. It was never obtained. The Nixon administration threatened Hanoi with a blockade of Haiphong harbor and an escalation in bombing of the North if it did not yield to our demands to negotiate. Hanoi refused and the President and his minions—whose pride would not permit their threats to go unfulfilled—proceeded to escalate our involvement.

Of the lessons to be gleaned from analogies between the Vietnam war and the conflicts now underway in Central America, one stands out: that relating to the domino theory of decisionmaking, whereby one miscalculation and one bad decision is followed by still others without the ability of politicians to recommend.

If negotiations are not immediately forthcoming, does the administration intend to blockade Nicaragua, authorize bombing runs to assist the Contras, and/or breach directly Nicaragua's border? And if so, will this likely be more effective than the mining of Haiphong, bombing of Hanoi, and encroachment of Cambodia? How relevant, after all, is the deployment of the battleship *New Jersey* to the Gulf of Mexico?

The risks the administration has assumed as the result of its recent ac-

tions are enormous, and, I suspect, unnecessary. It would be wiser for this great country to invest our awesome energies and resources in the pursuit of peace rather than in the pursuit of violence. We can begin by bringing the gunboats and military personnel home and committing our best diplomats to the peace processes now underway. As the president of Stanford University, David Starr Jordan, said in 1916 when hostilities between the United States and Mexico seemed imminent: "If we must intervene * * *, of which I am not so sure, let us intervene with schoolteachers and educators and doctors, but let us leave our guns and cannons behind." We would do well to heed Dr. Jordan's counsel today.

FLAWS IN MINNESOTA'S TAXPAYER FUNDING OF ELECTIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota (Mr. FRENZEL) is recognized for 30 minutes.

● Mr. FRENZEL. Mr. Speaker, the Committee on House Administration's Task Force on Elections has held a series of hearings this summer on campaign financing. A number of witnesses have testified with great affection on behalf of extending taxpayer financing to congressional elections.

I believe it is most often informative and revealing to receive testimony from those who at the State level have had experience with similar types of laws. One such witness, Bruce Willis, general counsel of the Independent Republican Party in Minnesota was particularly informative. In his testimony, he made several salient observations. First, 14 candidates who were unopposed received over $51,000 in taxpayer funds. They in turn made contributions totaling $25,912 to other candidates, legislative caucuses, and to media funds. Most of the candidates who received these contributions had already received their share of taxpayer moneys.

Additionally, Mr. Speaker, participation in the checkoff has also fallen from a high in 1977 of 27.1 percent to 15.6 percent in 1981.

Proponents of public financing usually cite as a goal the reduction of the influence of special interest money as a reason to support raiding the Treasury. I would like to point out that in the Minnesota experience, special interest money increased by 217 percent from 1978–82. So much for lofty goals.

An article summarizing Mr. Willis' testimony appeared in the July 20 edition of Politics in Minnesota. I commend it to my colleagues.

[From Politics in Minnesota, July 20]

TESTIMONY GIVEN ON ABUSES OF MINNESOTA PUBLIC CAMPAIGN FINANCING LAW

Testimony was presented to an Election Law Task Force of the U.S. House of Representatives Administration Committee in Boston earlier this month that made some devastating revelations about allowable abuses taking place under Minnesota's public campaign financing laws. The testimony was presented by noted Minneapolis attorney Bruce Willis, general counsel of the IR Party of Minnesota.

Willis pointed out to the Congressmen that 14 legislative candidates in last year's election, who were unopposed, received over $51,000 in public monies.

"Those same 14 candidates," Willis testified, "made contributions totaling $25,912 to other candidates, to legislative caucuses, and to media funds. One contribution was made to a candidate for federal office, but the vast majority of the money was transferred to other state candidates who had already received their shares of public financing," Willis noted.

Willis gave the Committee an example drawn from the records of State Senator Doug Johnson (DFL-Cook), powerful Chairman of the Senate Tax Committee. Johnson, who was unopposed in both the primary and general elections, received a total of $5,540 in public dollars. Johnson's committee reported $5,561 in campaign expenditures, about what he got from public funds. But, because of their own fund raising efforts, Johnson's committee also reported transferring a total of $11,835 to other candidate committees—more than twice what they spent on their own effort.

Willis, who did not identify Johnson by name in his testimony, took pains to point out that this was not illegal under existing state law.

Examples of other abuses:

A. A candidate who received $175 from his political party, raised only $25 in individual contributions, yet received $1,926 in public financing.

B. A candidate who raised a total of $575 but received $3,196 in public monies.

We've had public financing in Minnesota for the general elections held since 1976. Taxpayer participation in the checkoff system hit its peak in 1977 when 27.1 percent of state taxpayers designated payments into the campaign fund. That dropped to 15.6 percent in 1981, the most recent year for which figures are available.

Willis' revelations are no surprise to those experienced in Minnesota campaigns. For the past few years we've seen both parties and caucuses scramble to find candidates in all districts, even where they had no chance of winning, so that they could get the public funding and funnel the money to others from the same party in districts where they had a chance. Without some type of reform and tightening of some of the requirements, however, Minnesota's voters will become disillusioned with public financing and the participation figures for campaign checkoff will drop even further in the years to come.●

THE 300TH ANNIVERSARY OF KING JAN III SOBIESKI'S VICTORY AT THE BATTLE OF VIENNA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, September 12, 1983, marks the 300th anniversary of the Battle of Vienna, at which the beloved elected King of Poland, Jan III Sobieski, courageously won a decisive victory over invading Turkish forces. I rise today not only to commemorate this historic battle which removed a grave threat to the freedom of all Europe, bu also to pay tribute to the many achievements of Jan III Sobieski which have made him an enduring hero not only in Poland but throughout the world.

King Jan III, the descendant of an illustrious and respected Polish family, was born in the summer of 1629. In his early twenties he began to distinguish himself as a brilliant leader both on the battlefield and in the political arena. He participated in the Polish-Swedish wars beginning in 1655, and was appointed Grand Marshal of the Polish Diet in 1665. One year later, he became Field Hetman—field commander—of the Polish army. In this capacity he displayed outstanding abilities as a Polish leader and patriot, dedicating his life to maintaining an independent Poland, free from outside aggressors.

In 1667, with an army only a fraction in size compared to the opposing forces, he soundly defeated the Tatars and Cossacks, and the following year he was appointed Grand Hetman—commander in chief—of the entire Polish army. His name struck terror in the hearts and minds of all men who opposed a free Poland.

Having earned a reputation as defender of the Polish people in his repeated victories against Cossack, Tatar, and Turkish armies, Jan was elected King of Poland in May 1674. He then embarked on the twin foreign policy objectives of returning his country to prominence and compensating Poland for its earlier territorial losses to the Turks. He continued to win battle after battle in his effort to secure and maintain Polish territorial integrity, self-determination, and freedom.

In the spring of 1683, it became clear that the Turkish armies would once again strike, this time in the heart of the Holy Roman Empire in Vienna, and in the next few months, Pope Innocent XI urgently requested the King of Poland to lead his forces in defense of Western civilization and values. King Jan III willingly complied and began to move his army toward Vienna, a city which had been under siege for months. He then engaged the enemy on September 12 and won an overwhelming victory, the 300th anniversary of which we are now observing.

Mr. Speaker, at this point in the RECORD, I would like to include an excerpt from an article describing the Battle of Vienna, written by Louis Koncza, noted student and researcher of Polish history, which appeared in the Polish American Congress Newsletter of July 1983. The excerpt follows:

On the morning of September 6th, the bridges on the Danube were finished and the Christian armies, approximately 70,000 strong crossed the river within two days. After a study of the surrounding terrain, it became apparent that the mountain slopes on the side of Vienna were covered by forests and vineyards with numerous deep ravines and stone walls and could be conquered only step by step.

The King called the War Council and established the "Ordre de la Bataille." The infantry had to attack in the front line with cavalry and artillery closely behind, until they would reach the plains at the foot of the mountains. Then the cavalry would move forward. The Imperial Austrian forces were on the left wing under the command of Prince of Lorraine, he had 2,800 of Polish troops under Prince Lubomirski with him. The German armies were in the center under Prince of Waldeck and the Polish forces were on the right wing. Great Hetman Jablonowski was on the far right. General Katski with the infantry and artillery in the center of the Polish wing and Field Hetman Sieniawski on the left. The Polish forces had to cross the longest and most difficult mountain terrain before reaching their positions.

Kara Mustafa did not believe until the last day that John III himself would appear with the Polish Army. When the Austrian commanders observed from the top of Kahlenberg the enormous fields of the Turkish encampment and expressed doubt in the possibility of an attack with their relatively small forces, the King stated: "The commander, who in spite of the approach of our army, did not gather his forces and did not fortify his encampment, is foredoomed to loss."

On September 12th, in the early morning the Austrian forces were closest to reach the enemy lines and Prince Charles of Lorrain started the attack on the left wing. The Turks were pushed out from the strategic position at Nussberg. The King was personally there and served at the Holy Mass celebrated by the Papal Envoy to give thanks for the first success. At about 1:00 P.M., General Katski's artillery reached the top of the hills and the King started the infantry assault and routed the enemy from the vineyards on the mountain slopes in hard fought separate battles. The Tartars massed their forces and staged a lightning attack with thousands of cavalry directed at the flank of the Polish right wing. Jablonowski quickly regrouped and successfully repulsed the attack. At about 4:00 P.M. all passes to the plain of the Turkish camp were in the hands of the Allies. When the Grand Vizir saw the mass of Polish troops emerge from the forests on the mountain slopes, he realized that the main danger was approaching from this side and issued orders to move a great portion of his army to the south in order to form a strong front against the Polish wing.

King John, who at the beginning of the battle had expected for the decisive engagement to develop only on the second day, observed from a hill-top the feverish movements of large enemy masses blocking each other's way in the narrow passages between the camp tents. He also notices the first signs of disorder, groups of auxiliary troops breaking out from the enemy camp and galloping away to safety. The King came to the conclusion that the enemy should not be given time to regroup and ordered the Polish and German cavalry to assemble for the final assault. To find out how suitable the ground conditions were for a cavalry attack, he sent a squadron of hussars first. The squadron came back with heavy losses, but the King was certain that a cavalry attack was possible.

Masses of newly assembled Turkish cavalry rushed against the Christian forces. In the meantime, the King and his cavalry of close to 20,000 horsemen formed in his own special chessboard formation—hussar blocks in the front line with saber, and carbine-equipped armored cavalry stationed at intervals of a hundred paces behind; the heavy reiters of Sieniawski's left wing and the royal lead center were reinforced farther back by dragoons and flanked to the northeast by Sachsen-Lauenburg's regiments and to the southwest by Jablonowski's corps. In the lead, astride a handsome Podolian charger, was John III himself in luxurious garb, upon his head the cap with feathers held by a priceless jewel-clasp and body armor covered by a dark blue robe. Close by were a herald and a hussar, bearing the crown escutcheon and the royal sign—a white falcon's wing mounted high on a lance. The first lines of hussars lowered their 16 foot lances as the wind uplifted the eagles's wings and the leopard and wolf pelts attached to their shoulders. The polished and gleaming armor plates, visible from afar caused the German infantry on the far left to pause briefly and a loud cheer echoed through the vineyards. The German cavalry attached to the right wing was making an attack in full gallop for the first time in riding shoulder to shoulder with the elite of the Polish gentry. Slowly they picked up speed. The Turks staged repeated counterattacks and the roar of the battle resounded time after time like rolling thunder. At about 6:00 P.M. Jablonowski's hussars reached the Grand Vizir's camp. Kara Mustafa made one last attempt to resist. All his staff and body-guards fell and he was able to save only his private treasure.

The victory was complete. The Turkish camp with all tents, artillery and uncounted riches were left by the fleeing enemy. Sobieski was enthusiastically greeted by the people of Vienna and declared "The Savior of Christendom" by the Pope. The victorious campaign brought new international pride to the Polish King and attracted the eyes of the whole world to the Republic.

Aloysius Mazewski, national president of the Polish American Congress, has appointed a PAC Observance Committee to plan and coordinate national activities to commemorate this important battle and historic day in Polish history. Dr. Edward C. Rozanski, national vice president of the Polish American Congress, is chairman of this committee, and other members include: Harriet Bielanski, Alfred Szebel, Leon S. Kawecki, Henry Archacki, and Prof. S. Smolenski. I congratulate President Mazewski and the members of his committee for the outstanding job they are doing in planning and coordinating an impressive schedule of events commemorating the 300th anniversary of King Jan III's momentous victory at the Battle of Vienna which preserved freedom for all of Europe.

Mr. Speaker, it gives me great pleasure to join with Polish Americans in the 11th Congressional District of Illinois, which I am honored to represent, and Poles throughout the world, in observing the 300th anniversary of this great battle. The heroic efforts of King Jan III Sobieski still serve today as a source of strength and inspiration for all who strive to free themselves from the yoke of oppression.●

THE CURRENT WAR COURSE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 30 minutes.

Mr. GONZALEZ. Mr. Speaker, I am very sorry that the gentleman preceding me a few minutes ago, for whatever exigencies of the moment, required him to suspend it, because what he was saying I consider to be extremely important. And be that as it might, it was right in line with what I felt impelled to rise and speak forth.

It is true, we are all anxious to get away, but the House has taken action here that in effect will create the very situation—and I am no prophet and I do not have to be a prophet to say that during the time we are away we will have developments that will take place that will encumber this House and Members of the Congress with heavy responsibilities upon our return and an accomplished fact that I do not think the Congress will be able to do anything about—and I am speaking about the current war course that the President has instituted with respect to Central America, the Caribbean in particular, and south of our border.

The gentleman, as I understood some of his words awhile ago, was pointing out that this whole situation is frought with great danger that though there is a potential for us to pluck out of this nettlesome situation this flower of peace that the danger is just as great and may be greater, because if I understood him correctly he said the course of action the President has instituted in the last few days jeopardizes the self-same peace efforts. I believe they do. I believe worse. I believe that in a matter of days we will have developments that will just render the course of events immutable.

I really feel that the President has embarked on an adventure for political purposes in the guise of a Maggie Thatcher of England, where the Falklands, it was said, in June, during the elections held in Britain, was the main reason for her overwhelming victory.

I hope I am dead wrong, but I do not think I am. And what I am saying is that all during the debate that the House entertained last week and the week before with respect to the resolutions that impacted on the Central American and the Latin American situation generally were at best deficient in presenting the perspective that has

to be ultimately recognized by our leaders and by the Congress.

□ 2010

For example, the actions just reported, which are just fragmentarily reported and are not reported in full, some of the activities, in turn, have been reported to me by our Armed Forces on the seas and on land actually involving us in intervention in a form of war in some of these countries that are sovereign in their own right.

Under the impulse of the so-called charges of a Cuban-Russian takeover, in particularly Nicaragua, and with that environment unchallenged, the House barely scraped through a resolution that had to do with our defining the role of our intelligence agencies and bringing them to rein. They talk about the Sandinistas and the fact that they are unfriendly to the United States.

And recently there was an article by a former AID director, in which he stated the often repeated charges that this country, our country, offered help, proffered help, gave some help, but that it was refused or turned down or unappreciated by Nicaragua or the so-called Sandinistas.

At this point I would like to insert into the RECORD a summary, an interpretation of the situation, by a priest who has just returned from Nicaragua. He has been there a considerable amount of time. And I speak of a priest who is dedicated, a great man, Father William James Callaghan, and who on my request has given me a written report and authorized me to disseminate it as I see fit. So at this point I include in the RECORD a summary entitled "A Flawed Tale," which also encloses a complete rebuttal to this former AID official of our country in the statements he made in the Washington Post editorial page.

But above all, Father Callaghan goes beyond just referring to that particular aspect, and he tells us why it is that no matter how many arms, how many soldiers, American soldiers, we bring into Nicaragua, we will not succeed.

And at this point, as I said, and repeat, I offer this statement:

A FLAWED TALE

Mr. Lawrence E. Harrison, who arrived after the revolution to direct USAID programs in Nicaragua writes a flawed tale (W. Post, 9/30) of apparent naivete and cultural insensitivity.

Mr. Harrison gives the impression that the U.S. Government approached Nicaragua after the revolution extending the glad hand of friendship, only to be rebuffed by a hostile, leftist government.

How unaware he seems that USAID, which with its reputed inteiligence agents and its task as a principal executor of U.S. foreign policy, would hardly be welcomed by Nicaraguans as a white knight from the north.

He lacks a sense of the suffering of the Nicaraguan people, and writes by anecdotes taken from his upper class contacts, without a hint of the context for his examples.

When the Sandinistas overthrew Somoza and routed his hated National Guard, it was not just Somoza they replaced. The Nicaraguans hailed victory as breaking free from the whole Somoza system and from the U.S. institutions and policies for which Somoza was a puppet.

The Nicaraguan view had strong justification. It was the U.S. which instituted the National Guard, presided over by the elder Somoza, to control Nicaragua when U.S. marines were withdrawn in the early 1930's after 20 years of almost uninterrupted occupation.

The Somoza family, through the National Guard dominated, exploited and brutalized Nicaragua for the next 45 years. In return for total support of U.S. policies in international matters, the Somozas were free to rule and loot Nicaragua. They even took the $88 million in U.S. aid sent to rebuild Managua after the terrible earthquake of 1972.

During the 1978-79 revolution, the U.S. tried to save Somoza. When that effort failed the U.S. fought to keep the National Guard structure intact. The Sandinistas rejected all these efforts and swept away the whole system.

Subsequent to the revolution the U.S. government sought to regain control by channeling aid to the private sector. As the Sandinistas strengthened their position, the U.S. cut off food aid, blocked aid through multilateral institutions such as the IMF, World Bank, and the Interamerican Development Bank. In 1981, before Mr. Harrison left Nicaragua, the signs grew obvious that the U.S. CIA had begun to organize a fighting force among former members of the hated National Guard who had fled to Honduras. Cross border incidents began to occur in mid-1981 and have continued to escalate. Did Mr. Harrison know it then? Does he recall it now?

His examples bear little scrutiny.

1. Peace Corps teachers—Nicaragua's tremendous drive for Literacy training in early 1980 sought teachers from many lands, including the U.S. The Cubans, who have great experience with such teaching methods were warmly welcomed. All were accepted on two conditions—that they respect the revolution—that they respect the religious beliefs of the Nicaraguan people.

Mr. Harrison offered a program through the U.S. Peace Corps. The Nicaraguans, viewing it as do many in the developing world, as a cover for U.S. intelligence agents, resisted it as "inappropriate." Mr. Harrison persisted and obtained Mr. Robelo's support on the junta.

Insisting that US teachers enter Nicaragua under an official program like the Peace Corps was obviously viewed as a U.S.-government move to counter the influence of the Cubans, not a move to help Nicaragua.

Imagine how our U.S. revolutionary government in 1783, might have responded to a British complaint about too much French influence coupled with an offer to send teachers to educate illiterate Americans!

2. National anthem—The Sandinista anthem does indeed contain the line "We shall fight against the Yankee, enemy of humanity," about which Mr. Harrison often complained.

The Nicaraguan history, with repeated invasions or occupations by U.S. interests, including almost continuous occupation by U.S. Marines from 1912-1933, is a history of U.S. control and exploitation of Nicaragua and its resources.

By the time Mr. Harrison was leaving Nicaragua, the first signs were growing obvious that U.S. CIA operatives were arming the former Somoza guards in Honduras to attack Nicaragua, as well as plotting among the Miskito Indians. Mr. Harrison's article appears when these U.S.-backed forces have escalated to 7,000 people.

How naive of Mr. Harrison for urging changes when the Reagan Administration was doing everything it could to redominate Nicaragua. Would Mr. Harrison suggest that we acknowledge British sensibilities and drop our own national anthem's celebration of victory over the British?

3. Elections—The Sandinistas, as they clearly stated in their early days, made national reconstruction a priority. Somoza left the country in shambles with a debt of $1.5 billion and only $3 million in reserves.

The Sandinistas, in 1980, announced elections for 1985, after a Law of Parties was constructed. The time frame was said to allow growth in popular participation at the grassroots level, building experience upward toward national elections.

Whether we consider it too slow or not, this plan is proceeding apace. Popular participation at the local levels through the Sandinista Defense Committees (CDS's), the neighborhood watches, the voluntary militia, education programs, "face the People" programs of the national leadership, newspaper sections which encourage speaking out, and the extensive programs of volunteering to harvest the crops, have brought an enormous upsurge in popular participation and discussion since the revolution.

4. Dissent—Mr. Harrison's cultural naivete appears most strongly in his frustrations to explain U.S. style "dissent" to the Sandinistas, a frustration he would have with nations including many U.S. allies. He should try explaining it to the governments of Chile, El Salvador, Guatemala, South Korea, Taiwan, Saudi Arabia, Uruguay, Brazil, Israel, the Philippines.

Dissent is a sophisticated practice for a few nations where mediating structures exist for dealing with differences, and where there is a welcome, however modest, for preserving free speech. If Mr. Harrison recalled U.S. attempts to repress dissent during the Vietnam days, he might be a little less patronizing of the slowness of others.

5. "Revolutionary truth . . . is what serves the ends of the revolution"—There is no need to be an apologist for the Sandinista revolution. Its achievements in the fact of extreme pressures from the U.S. and from the extreme poverty and depredations of the Somoza system can make its own case of mistakes and triumphs.

However revolutions, in their early years, typically have a zeal, fervor and excesses that later wisdom moderates.

After the U.S. revolution, many colonists who had been sympathetic to continued English rule, fled, or were forced to flee to Canada. Slavery was accepted for a good part of the nation, a choice that would be resolved only 80 years later in a bloody, internal war.

The French revolution was marked with enormous excesses, as would be the Russian revolutions and a host of other revolutions that followed.

It is to the Sandinista credit, that excesses of violence, infringement of human rights and personal freedoms, have been among the very lowest recorded for any armed revolution. Is Mr. Harrison aware of that?

6. August 1980 completion of literacy campaign—Mr. Harrison's comparisons of the scene to the Hitler youth meetings, again suggests his limited sense of history, and of Nicaragua.

The shouting of "consignes" or revolutionary chants, has long been a way of educating and coordinating mass, popular where literacy is low and recently acquired.

If Mr. Harrison were to move through a Nicaraguan crowd and associate with them freely, he would find both an enjoyment of the chanting, and a warmth and amiability especially toward Americans, that are vastly removed from the fierce ideology and preaching of moral superiority of the Nazis.

In 1980, U.S. legislators meeting with the Sandinistas and talking about elections had joked of the challenge of holding honest elections in the U.S. Our intense struggle to overcome racial barriers to fair elections is not yet over in the U.S., as the recent Reynolds trip to Mississippi illustrates. Many an hispanic constituent of mine could tell similar tales.

Fair elections are an unknown experience for Nicaraguans where the troops took away the ballot boxes when Somoza-backed candidates ran into trouble.

That the Reagan Administration urges elections so fiercely in Nicaragua, while making no such urgent demands on Pinochet of Chile, Uruguay, S. Korea, Taiwan, Guatemala, etc., justifiably appears hypocritical to Nicaraguans. The memory of U.S. involvement in manipulating elections in Chile, San Salvador and other lands is enough to give the leaders of any small land great pause.

7. Genesis II—Few people seem to know exactly what happened with Genesis II, a program to promote grassroots programs. There seems some evidence that Mr. Macias was unfairly treated. Mr. Harrison sheds no light on it.

The Maciases left the country feeling bitter about the revolution and have continued to speak as sharply against the revolution as the quote shared by Mr. Harrison, in which they accuse the Sandinistas of mirroring the Somoza practices of rape, torture, disappearances, murders, threats, community control.

However, anyone who experienced the Somoza days and compares them with the present days will reflect just how extremist and false are their charges. The systemic corruption and violence of Somoza cannot be compared to the basically honest and struggling nature of the Sandinista government which even under intense U.S. pressure has stoutly resisted the Marxist route of Cuba.

Nicaragua, despite the pressures and austerity, has been attempting an independent, national way between Cuban style Marxism, and U.S. style capitalism.

The harsh public attacks by the Maciases on Nicaragua should make it no surprise that former Washington friends who strongly support Nicaragua should not seek their company. Mr. Harrison once again displays a seeming ingenuousness that raises questions about his article.

9. Most Nicaraguans like Americans—Mr. Harrison here gives witness to what most U.S. visitors to Nicaragua experience—Nicaraguans like Americans.

At no time does a U.S. visitor experience an attempt to paint Americans as devils. The focus is precisely on the U.S. government and U.S. policies. However, U.S. programs often must face suspicion of harboring U.S. intelligence agents. This would have been especially true in late 1980 in the area of Puerto Cabezas, the area of the "Red Christmas" plot to separate that part of Nicaragua from the rest of the country and to seek U.S. protection. It was a time of great tension between the Sandinistas and the Miskito leaders.

Revelations of U.S. CIA covert operations among the Miskitos and the ex-National Guard of Somoza, show just how justified have been the suspicions of the Nicaraguan leaders.

10. National Guard—Mr. Harrison again shows his naivete in his description of the sentencing of former Lieut-Colonel Byron Pineda. The supposedly non-combatant officer was tried and sentenced to 11 years, although claiming he had done nothing wrong.

His statement may be true, but in general, the officers corps of the National Guard was so shot through with corruption and had so shared in the violence done to the Nicaraguan people, (50,000 deaths in 18 months, equivalent to 5 million deaths on a population the size of the U.S.) that few officers could have reached the position of Lieut-Col. without being touched by that corruption and violence.

A striking feature of the Sandinista revolution is that so little retribution was exacted on the former National Guard. Easy escape through the northern border was deliberately set up for many of the national guard. The death penalty outlawed. The longest sentences (received by few) were 30 years. The retribution on leaders has been far less than that which the U.S. and its allies visited upon the Nazi leaders after World War II.

11. U.S. Academic reactions to the Nicaraguan revolution—

Mr. Harrison's deepest pain seems to arrive in two stories of supporters of Nicaragua's revolution being cheered in academic circles, while critics were "booed and jeered."

It is clear, even from Mr. Harrison's account, that the Latin American scholars were applauding the success of the Nicaraguan revolution and were hostile to people, such as Mr. Cheek and Mr. Harrison, who were attacking the revolution.

At the time, late 1980, Mr. Cheek, as deputy assistant secretary of state for Latin America, was a principal U.S. spokesperson defending the U.S. policies in El Salvador, where Archbishop Romero had recently been assassinated, and where the first 10,000 people had been murdered at the hands of forces allied to the U.S. Two U.S. AIFLD advisers and four U.S. women missionaries would soon be murdered by these same forces.

If Mr. Cheek, as Mr. Harrison alleges "had played a crucial role in U.S. disengagement from Somoza as far back as 1974", that role had been carefully hidden. To most observers it seems that the U.S. supported Somoza right into 1979 when it sought to have a multinational OAS force take over the situation. Failing this, the U.S. sought a compromise which would lead to Somoza's departure while preserving in place the hated National Guard and the system known as "Somocismo."

That Mr. Harrison places last, in a position of emphasis, the account of how badly received by scholars, were his own accusations of the Nicaraguan government, suggests the deepest roots of his article. Were the scholars perceiving the same naivete and cultural insensitivity that the W. Post article displays.

Throughout his article Mr. Harrison quotes no one who is poor. His examples are personal contacts with leaders of the U.S. and Nicaragua, with upper class people, or accounts of his own painful personal experiences.

Perhaps if the USAID Director had managed more contact with the poor of Nicaragua he might have sensed what so many who visit Nicaragua experience—that in the face of terrible limits and pressures, in the face of inexperience, youth and mistakes, the Sandinista have tried to redirect the resouces of Nicaragua to benefit the poor majority of that land. That they to do so in the face of U.S. backed military and economic pressures.

Mr. Harrison gives no hint of this. His selection of events hint of nothing good. Perhaps it is no surprise that his objectivity appears questionable.

The Sandinistas are not friendly toward the United States. Let us not make any mistake about it. In fact, the very name "Sandino" and "Sandinistas" is one that invokes anti-American activity. General Sandino was resisting the marine invasion of his country. He is a hero throughout all Latin America in history and literature. Marine intervention in Nicaragua for that period of time was resisted, and I think the lesson we ought to learn is that the Marines never caught him, any more than General Pershing ever caught Pancho Villa when we made a similar incursion into Mexico.

It was the United States that intalled a Somoza regime and unswervingly supported it through decades of repression and terror, the worst of anywhere in the world.

Nicaraguans have plenty of reason to dislike and mistrust the United States. After all, it was a U.S. action that installed in their country and maintained one of the most rotten regimes not only in Latin America but throughout the whole globe, one that eventually fell more of its own weight than by the combined exertion of these so-called Sandinistas.

Today the Reagan administration is trying to huff and puff and blow the Sandinistas' house down. That is not likely to happen. But before that finally comes through, I am afraid the price in treasure and blood is going to be great unless our leaders are somehow persuaded into a more realistic and justified course of action.

The Sandinistas are tough. And the reason they are tough is the reason why they can distribute arms at will. Every housewife, every peasant has an automatic machine. If the government were afraid of its people, they would not be armed the way they are. And they are going to stand up and they are going to fight. They are tough. And so far at least this can be determined and reflected in the good priest's report. They are popular and they enjoy popular support.

What should the American policy be? First we have to understand that

in Nicaragua and elsewhere in Central America it will take a long time to cure the ills brought about by corruption, poverty and bad government. There will be no quick fix, in the favored words of the President.

Second, we have to understand that we have neglected Latin America in general and Central America in particular. Our Government has not really done much to help resolve the problem of poverty, ill health or repression. It will take time to convince people that we really want to help.

Third, we have got to quit pretending that we can wish or bluff rebellions out of existence. Rebellions reflect real grievances, real injustices, and they are the products of despair.

Fourth, our policy ought to be constructive and foresighted. We want liberty for ourselves, and we ought to work with people who want liberty for themselves. We want decent jobs, homes, health and schools for ourselves, and we ought to support programs that help others obtain these for themselves. We want a government that stands with us, not on top of us, and that is the kind of government that we ought to support in Central America.

Do we want Nicaragua to trust us? Then we would do better to send doctors, teachers, farmers, tradesmen than to mount military maneuvers. They want us to help them raise standards of living, not raise armies. Thus far, our policies and actions have done nothing but prove the claim of the Sandinistas: The United States cares more about Somoza-style stability than the hopes and aspirations of Nicaraguans.

If we really want to win over the people of Nicaragua, it is time to recognize that close to a century of bad policy will take a whole lot of time to undo. Somoza might have produced stability, but he surely left a bitter legacy. We are paying the price now, and the current policy is only making that cost higher.

TRIBUTE TO FORMER REPRESENTATIVE AARON FORD

● The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Mississippi (Mr. MONTGOMERY) is recognized for 5 minutes.

Mr. MONTGOMERY. Mr. Speaker, it is my sad duty to inform the House of the death of one of its former Members, Representative Aaron L. Ford, who represented the old Fourth District in my State of Mississippi.

He died in July as a result of injuries suffered in an auto accident on the Natchez Trace Parkway. He was 80.

Representative Ford was elected as a Democrat to the House in 1934 and served four terms before losing in 1942 to Representative Thomas Abernethy. After serving in this Chamber, he practiced law in Washington before going home to Jackson, Miss.

While in Congress, he was a member of the Foreign Affairs Committee and the Ways and Means Committee, where he was regarded as an expert on revenue legislation. Aaron Ford served his State and this Nation well in the House of Representatives.

Mr. Speaker, I want to offer this article, from the July 10 edition of the Jackson, Miss., Clarion-Ledger, concerning the death of Representative Ford.

[From the Jackson, Miss., Clarion-Ledger, July 10, 1983]

FORMER REPRESENTATIVE AARON FORD

(By Robert Ourlian)

Former U.S. Rep. Aaron L. Ford, who was sent to Congress from the state's old 4th District in the midst of the Great Depression, was killed Friday in an automobile accident.

Ford, 80, died about 8:45 p.m. at the Mississippi Baptist Medical Center in Jackson after the accident on the Natchez Trace Parkway about 40 miles northeast of Jackson, according to Staff Park Ranger Ron Medford.

Medford said Ford was a passenger in a car driven by his attendant, Billy Dotson, who lived with Ford at 3834 Eastover Drive.

The two were southbound on the Natchez Trace near Carthage when their car angled off the highway, crossing the northbound lane and hitting a tree on the east side of the road. Medford said Dotson was not seriously hurt.

Hinds County Coroner Robert Martin said Ford died of a skull fracture, and said he suffered many injuries to the head and face. He said an autopsy would be performed on the remains at the request of family doctors.

A native of Potts Camp in Marshall County, Ford attended law school at Cumberland University in Lebanon, Tenn. He began his practice in 1927 in Aberdeen and moved to Ackerman later in the year.

Ford was elected district attorney of the 5th Circuit District in 1931, and was elected as a Democrat to Congress in 1934, defeating 12 year incumbent Jeff Busby. He was reelected in 1936, 1938, and 1940, then lost in 1942 to Thomas G. Abernethy, who held the seat for the next 30 years. Ford practiced law in Washington for a time before returning to Mississippi where he opened a law practice in Jackson.

Former Gov. J. P. Coleman received an early taste of politics through Ford when he took part in Ford's first congressional campaign and later served as an aide to the Congressman. "He waged a strenuous campaign—we made a speech in every schoolhouse in the district," Coleman recalled Saturday, adding that the Depression stimulated interest in politics. "We could announce a campaign speech somewhere in the interior of Calhoun County and we'd get a crowd."

Gov. William Winter remembered Ford as a "very aggressive campaigner who supported President Roosevelt's New Deal programs during the Depression.

"He left a mark in Congress that is still remembered by the people of that district," said Winter, whose father was friends with Ford.

Coleman recalled Ford as a charismatic public official who knew how to ply his constituents.

"He was a prodigious worker," Coleman said. "When he put his hands on the plow, he was one of the most effective politicians you ever saw."

Coleman recalled leaving the Congressional office in 1940 to begin his law practice. That was after the 1938 election campaign, during which Ford went to Europe and "didn't even campaign," winning nonetheless.

"If he had really maintained his love for politics and public office and public service, he probably would have been elected in 1941 for the Senate when Sen. (Pat) Harrison died," Coleman said.

Services for Ford are at 12:30 p.m. Monday at Wright and Ferguson Funeral Home Chapel with burial at noon Tuesday at Cuthbert, Ga. Visitation is 4–8 p.m. today and after 11 a.m. Monday at Wright and Ferguson Funeral Home.

He is survived by his wife, Mrs. Gertrude Ford; brother, Howard C. Ford of Sardis; and one niece.●

COSPONSORSHIP OF BILL TO PROVIDE FAIRNESS IN WINE TRADE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. STARK) is recognized for 5 minutes.

● Mr. STARK. Mr. Speaker, to quote from an Associated Press article,

A bottle of wine that retails for a modest $4 in California sells for $18 in Japan—just one example from the State's billion-dollar wine industry of protective trade barriers against wine from the United States.

Indeed, as that article so vividly points out,

It takes 21 pages to detail the complicated taxes, add-ons and mind-boggling label conditions and other roadblocks foreign countries put in the path of U.S.-made wines. The United States, by contrast, is virtually an open market for wines from the rest of the world.

These paragraphs sum up the frustrating and economically disadvantageous position our country's vintners have been placed in as a result of these restrictive and apparently punitive foreign trade barriers—barriers that I hope we can replace with equity and fairness through the proposed Wine Equity Act of 1983. The sole purpose of this legislation is to encourage export of U.S.-produced wines by achieving harmonization, reduction and elimination of tariff and nontariff trade barriers so that American wines will be admitted into a foreign country on the same fair and equal basis as the wines of those countries are admitted into the United States.

The current trade situation is not only unfair and unjust, it is intolerable. Consider that despite American-produced wine achieving worldwide recognition among wine experts, everywhere the American winegrowers seeks to market his or her product abroad they are faced with a maze of restrictive and prohibitive tariff and nontariff barriers. In 1982, for exam-

ple, foreign wines with a value of $781 million were imported into the United States while the value of U.S. wine exports amounted to only $38 million, resulting in a trade deficit for wine alone of $743 million—2.1 percent of the entire U.S. trade deficit. U.S. residents consumed 122.1 million gallons of imported wine in 1982 while U.S. winegrowers sold merely 9.1 million gallons of American wine to foreign markets, almost half of which went only to Canada.

Mr. Speaker, this is hardly a recent problem. Historically, there has been a substantial imbalance in international wine trade resulting from the easy accessibility enjoyed by foreign wines in the American market, which is in direct contrast to the export position of the American wine industry in virtually every existing or potential foreign wine market.

Unlike the wine industries in many foreign nations, the U.S. wine industry receives no government aid or subsidy. The United States imposes no nontariff trade obstacles to the entry, distribution and sale of foreign wines. Foreign wines move freely in the American market subject only to the same laws and regulations which apply to American wines and to payment of the lowest duties assessed anywhere in the world by a significant wine-producing country on imported wine. Nearly 91 percent of imported wine is subject to duties ranging from 37½ cents per gallon to as low as 21 cents per gallon. By contrast, many other countries impose duties on American-produced wines at least double that of the United States, ranging as high as Japan's $4.80 per gallon.

To correct this situation, our legislation provides the President the authority and remedies needed to eliminate tariff and nontariff trade barriers so as to provide U.S. produced wines fair and equal access to foreign markets. Under this legislation, the President is authorized, if he finds a country refuses to eliminate its barriers to American wine, to impose on wines imported into the United States from that country the same tariff and nontariff restrictions that are applied by that country to U.S. wine exports.

Again, all we ask for in this legislation is a means by which to put into effect a concept that should be the cornerstone of foreign trade: fairness.●

A TRIBUTE TO BISHOP W. B. McNEIL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. TOWNS) is recognized for 5 minutes.

● Mr. TOWNS. Mr. Speaker, I want to recognize the achievements of Bishop W. B. McNeil on the occasion of his 20th anniversary as pastor of The Holy Cross Remnant Church of Jesus in Brooklyn, N.Y.

Bishop McNeil's calling began in Brooklyn in July 1963 with the founding of Holy Cross. Beginning with but seven followers his flock has grown and he now provides spiritual guidance and community service to some 250 parishioners. From the very beginning Bishop McNeil has returned his time and talents to the community through his leadership at Holy Cross. One of his first acts was to open a community cafe serving one free meal a day to the poor and needy. He has also established a summer lunch program, and through these efforts demonstrated a commitment to integrate the work of the church with the needs of the community.

The services and work Bishop McNeil has rendered over his 20 years cannot be fully described in this short space. From his work with the Bradford Street Block Association to his involvement with the local community board he has served as an inspiration to many. He has counseled the youth of our community, helped the sick and the poor and through his ceaseless efforts improved the quality of life in my congressional district for many people.

I want to offer my heartiest congratulations to Bishop W. B. McNeil on his upcoming 20th anniversary on Sunday, August 21.●

HUNGARIAN MINORITY IN ROMANIA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. LANTOS) is recognized for 5 minutes.

● Mr. LANTOS. Mr. Speaker, in January I visited several East European countries with a House delegation of 13 of my colleagues. During a brief stopover in Bucharest, Romania, I had an opportunity to discuss with the Romanian leadership the treatment of that country's approximately 2 to 2.5 million Hungarian minority. This is not an issue that receives the amount of international attention it deserves. For my colleagues' information I submit a somewhat abbreviated version of a "Memorandum" and "Program Proposal" prepared by a group of leading intellectuals of the Hungarian minority in Romania. It was sent to the government delegations to the Madrid Conference reviewing the implementation of the Helsinki Final Act.

Last November several Hungarian intellectuals, including the well-known poet Geza Szocs were arrested in Rumania. They were accused of being authors of this document and severely beaten during interrogations.

These people took serious risks in turning to our Government in seeking implementation of an international agreement that we are party to and whose implementation we strongly favor. This fact reinforces our interest and responsibility in this matter.

The text of the document follows:

MEMORANDUM TO THE PARTICIPANTS OF THE MADRID CONFERENCE REVIEWING ADHERENCE TO THE PROVISIONS OF THE HELSINKI FINAL ACT

The forced Rumanianization of Transylvania and the suppression of our culture are being carried out with unprecedented vehemence. Masses of Rumanians from beyond the Carpathian Mountains are being resettled into regions with a predominantly Hungarian population and into purely Hungarian communities, mainly cities. At the same time, according to official nationwide population statistics, the number of Hungarians remains stagnant. The Hungarian-language school system is gradually being destroyed. More and more obstacles are created to hinder the publication of Hungarian books and periodicals. Our language, in truth, has been forced out of public life entirely. The effort to seclude us from Hungarians living elsewhere is being carried out with increasing vigor. (Relations between Hungary and Rumania are at a sub-minimum level in all respects.)

All conceivable means are employed to thwart the natural development of our identity. Successive Hungarian generations are brought up in an atmosphere of chauvinism which denigrates our heritage and preaches the superiority of Rumanian history and culture, without allowing those Hungarians an opportunity to learn about their own ethnic background, or even the true history of Transylvania. The state powers treat us, especially intellectuals and workers, as if we were the enemies within. Terror on the part of the security forces is the order of the day. If we speak out in defense of our heritage, it is we who are called chauvinists. We live as second-class citizens in Rumania, whose possibilities for career advancement are also limited by the fact that we are Hungarian.

We lack any means of self-protection. The individual is defenseless in the face of the tyranny of the state, and since 1949—when the Hungarian People's Alliance was liquidated—there has been no organization to safeguard our collective interests. Thus, our situation is characterized by the denial of not only our individual rights, but our collective rights as well, which two sets of rights are inseparable in our case.

The fact that existing international agreements do not deal with the collective rights of minorities bears profoundly upon the possibilities for bringing about a change in our situation. The focus on individual human rights, which constitutes the prevalent approach to this problem in the international arena, fails to take into consideration the shared values critical to a national minority as a collective entity—values which evolved through tradition and are carried on through a national minority's unique culture and the group identity of its members. These values would require special legal protection. While for the majority—due to its larger size and dominant position—the medium for the expression of its unique values exists as a natural given, for the minority to achieve the same purpose would require a means of collective self-protection. For this reason, regardless of the underlying motive, the effort to secure human rights for minorities, without taking into ac-

count their nature as collective entities, can actually place them at the mercy of the majority.

Having taken the above into consideration, we believe that in order to alter our present deprived condition, it would be of fundamental importance that the international agreements reached in Madrid establish on the record our right to survive, and in doing so, define those human rights which would insure the preservation of our culture:

1. Allow us to regard ourselves as bound by unbreakable bonds to the entire Hungarian people, and grant the same right to all national minorities.

2. Grant us the right to preserve our ethnic identity and collective values.

3. Allow us to establish an independent organization to protect our interests.

4. These rights—in our view—could acquire real validity only if an independent, unbiased international commission were formed which would examine our situation, act as arbitrator and also have supervisory authority.

Attached to this memorandum is a program proposal in which we endeavored to formulate the most important of our demands of the Rumanian government in the interest of ameliorating our situation.

Transylvania, September 1982.

By the editors of the samizdat periodical ELLENPONTOK (Counterpoints), whose continued anonymity in present-today Rumania—where critics of the regime disappear without a trace or become "accident" victims—unfortunately need not be explained.

PROGRAM PROPOSAL PRESENTED BY THE EDITORS OF THE PERIODICAL ELLENPONTOK (COUNTERPOINTS) IN THE INTEREST OF IMPROVING THE DEPRIVED CONDITION OF THE HUNGARIANS IN RUMANIA

The Hungarians of Transylvania, and of Rumania in general, are presently experiencing a more critical period of threat to their existence than perhaps ever before. Legal provisions protecting their survival exist only for the sake of appearances; they serve only to veil practices and realities which are diametrically opposed to the formulations contained in ceremonial speeches and official declarations.

To the practitioners of this system of thought, the mere idea of someone actually demanding a right is a complete absurdity. Even the simplest petition in Rumania must take the form of a more or less humble entreaty, clad in official phraseology and supported by the "principles" which happen to be in style. It is unthinkable for any request to be fulfilled without the support of an influential member of some central body of authority, and the granting of a request is always akin to the benevolent gesture of a feudal lord, awarding a well-behaved subject. (The dispenser of awards to the citizen is the state; to the minorities, the dominant Rumanian nation.) The graceful gesture has nothing to do with the rights of the petitioner, merely with the merits of the gift-giver.

As it is our conviction that two ethnic groups can live next to, and indeed together with, each other only if they regard one another as equal partners, we demand that the Hungarians of Rumania be granted the fundamental freedom to voice demands regarding the protection of their rights and opportunities.

We are also aware that, given present conditions in Eastern Europe, it is unrealistic to expect that a demand of this kind will be met. But since our situation is growing worse each day, we feel obligated to take action because we cannot afford the luxury of waiting for a miracle to change these conditions.

For these reasons:

I. We demand that we be considered an inseparable part of the entire Hungarian people, and that as such, and as citizens of Rumania, we be permitted to maintain unhindered contacts with the Hungarian People's Republic, on both the institutional and the individual levels!

Allow every citizen of Rumania to travel to the Hungarian People's Republic without restrictions.

Repeal the regulation which forbids the accommodation of friends from abroad in our homes. (This regulation affects us, Hungarians, most of all.)

Until the Transylvanian Hungarian universities are restored, permit Hungarian students from Rumania to study in Hungary. Upon their return, allow them to function according to the qualifications they have obtained.

Stop the practice by Rumanian customs officials of arbitrarily confiscating Hungarian-language publications.

Allow us to subscribe to any and all newspapers and periodicals published in Hungary. See to it that such publications are, in fact, delivered to the subscribers by the postal service.

II. We demand that cultural autonomy and institutionalized forms of self-protection be guaranteed to the Hungarians of Rumania, as an ethnic community!

Expand paragraph 22 of the Constitution to grant minorities the right to form an organization to protect their interests, the officers of which are democratically elected.

Allow this organization the right to direct Hungarian cultural activity and education policy, to supervise cadre-policies affecting Hungarians, to maintain Hungarian historical monuments and to seek legal redress for minority grievances.

Publish the history of the Hungarian People's Alliance, and make known the true circumstances of its termination in 1949.

Publicly rehabilitate all formerly imprisoned leaders of the Hungarian People's Alliance, as well as all others who have been sentenced during the past 35 years for defending the interests of Hungarians, and declare their sentences null and void.

Re-open the Hungarian-language kindergartens and schools, granting every Hungarian child the opportunity to attend a Hungarian-language kindergarten or school. In all Hungarian-inhabited counties, make high school education in the humanities and the various trades available in Hungarian.

Establish Hungarian-language orphanages and schools for the handicapped, putting an end to the practice of placing Hungarian-speaking orphans and handicapped children in the respective Rumanian institutions—a practice uses as a tool of Rumanianization.

Reduce the minimum quota of children required to form a class, in order to prevent the elimination of Hungarian village schools. Enact legislation in Rumania similar to the exemplary nationality statute in Yugoslavia which requires a minimum of nine children in order to establish a school In this regard, any quotas should apply to Rumanian and Hungarian children equally.

Reestablish the Hungarian universities, and establish Hungarian-language institutions of higher education in all trades.

Allow the Hungarian-language press, and the Hungarian-language radio and television programs, to discuss the actual and real problems of the Hungarians in Rumania.

The Rumanian authorities should, once and for all, stop the practice of treating Hungarian intellectuals as suspicious elements, and of subjecting them to constant police surveillance and harassment solely because they are Hungarian.

Insure true freedom of worship, and grant the Hungarian churches real internal autonomy.

III. For regions inhabited predominantly by Hungarians, we demand self-administration and an equitable share in the country's government!

In the villages inhabited predominantly or exclusively by Hungarians, stop the practice of appointing ethnic Rumanians to leadership positions (Chairman of the Village Council, Chairman of the Farm Cooperative, Party Secretary, policeman).

Allow Hungarians to be represented according to their percentage of the total population not only as Party members and representatives to the Grand National Assembly, but also among the managers of the economy, in the Party leadership at all levels, and in the government.

IV. We demand an immediate end to measures aimed at artificially altering the ethnic composition of Transylvania (including historic Transylvania, the territories west of it, and the Banat region)!

Terminate the massive and forced resettling of peoples from Moldavia and Wallachia into Transylvania.

Stop experimenting with the ethnic composition of purely Hungarian villages, trying to create a mixed population in those villages.

Stop the practice of assigning recent Hungarian graduates (especially physicians and engineers) to Moldavia and Wallachia, against their will.

V. We demand the opportunity for the Hungarians in Rumania to develop and cultivate their identity!

With regard to the past:

Allow the Hungarian pupils studying in their native tongue to learn the true history of their own ethnic group, and allow Rumanian pupils as well to become acquainted with that history, at least in broad outline.

Discuss the history of Transylvania objectively in historical publications. Stop using materials placed on museum display to conceal or trivialize the significance of Hungarians in the past, or their presence in Rumania today.

With regard to the present:

Make public, and accessible to all, detailed statistical data regarding the present situation of the national minorities.

Allow anyone who so desires, to engage in sociological research pertaining to the national minorities, without police harassment against those who express an interest in this line of research.

Let schools, regardless of their language of instruction, teach their pupils an awareness of the country's national minorities and their culture.

VI. We demand that in all areas of greater Transylvania inhabited by Hungarians, the Hungarian language be treated as equal to the Rumanian language in official as well as everyday use!

Grant, in practice, the right provided for in paragraph 22 of the Constitution to use the Hungarian language in administrative offices and before the various authorities, and to submit to those offices documents

written in that language. Make identification cards, passports, official form letters, etc., bilingual.

Within the regions described, require workers employed in the fields of health care, commerce and public services to be familiar with the Hungarian language.

In these areas, make the inscriptions of place-names and street-names, the signs on shops, factories, museums and public institutions, and the inscriptions on consumer products, etc., bilingual.

VII. We demand the same career opportunities for the Hungarians of Rumania as the Rumanians have!

Terminate the practice whereby job hiring and professional advancement are determined primarily according to ethnic background rather than professional expertise. Discontinue the practice of applying the proportion of Hungarians nationally to determine the number of Hungarians hired locally, even in firms located in overwhelmingly Hungarian areas.

VIII. We demand the preservation of the environment which reflects our historic and cultural past!

Preserve the traditional townscape of Transylvanian cities.

Stop tearing down the buildings which are significant for cultural or historical reasons.

Register as protected cultural properties all items deserving that title.

IX. We demand that the Hungarian-speaking natives of Moldavia, the Csángós—whom official statistics have declared to be Rumanian, without exception—be permitted to declare themselves Hungarians again, and to participate in Hungarian cultural life!

Permit them to join the organization representing Hungarian nationality interests.

Permit them free use of their native Hungarian language.

Reopen their Hungarian-language schools.

Grant them the right to conduct religious services in the language of their choice.

Put an end to the forced isolation of the Csángós, the obstruction of their contacts with Hungarians from elsewhere and the persecution of visitors to Csángós villages.

X. We demand that an impartial international commission (whose members would also include Hungarians and Rumanians) examine our situation and make decisions in the issues which bear upon our fate!

The foregoing, which was written on behalf of two million Hungarians, provides only a partial cross-section of the country's problems: those affecting the Hungarians (and even those only in a summary and incomplete fashion). We are quite aware that the solution to these problems cannot be isolated from the more general set of questions. Our primary purpose, however, is to identify these problems, since if we do not do so, no one will do it for us. As far as calling attention to the general issues affecting all of us, this is not our responsibility alone, and perhaps not even ours primarily; it would first and foremost be the responsibility of the Rumanian people.

Nevertheless, we do not consider this act of ours premature. The wall of silence must at last be broken from somewhere on the inside, as must that enormous, motionless and seemingly immovable block of tyranny and deprivation of rights which weighs nightmarishly on every inhabitant of Rumania (except for those who profit from it) and which is ultimately responsible for the totally catastrophic condition in which the country finds itself. In this regard, it is our conviction that our program proposal, which may be considered by "some" to be directed against the Rumanian people, actually supports their interests, because any increase in the respect for human rights would necessarily lead to an increase in their rights as well.●

GASOHOL AND HIGHWAY TRUST FUND

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. SHARP) is recognized for 5 minutes.

● Mr. SHARP. Mr. Speaker, today I am introducing legislation to ensure that the progress our Nation has made in reducing oil imports through the increased consumption of gasohol will not be unintentionally impeded.

The damaging of U.S. dependence on insecure foreign energy supplies was starkly demonstrated during the OPEC embargo of 1973 and the Iranian crisis of 1979. The congressional response to reduce this vulnerability included the exemption of gasohol from the Federal excise tax on gasoline. Several States, particularly those States with excess farm production capacity, followed suit by providing some level of State excise tax exemption to encourage gasohol usage.

The results have been astounding. In January 1982 slightly more than 100 million gallons of gasohol were sold. One year later, in January 1983, gasohol consumption had risen to nearly 350 million gallons monthly, at a time when overall gasoline consumption declined.

The results in some States are particularly noteworthy. In my home State of Indiana, for example, gasohol sales now represent nearly 25 percent of all motor fuel sales.

This dramatic success has not occurred without an unintended consequence. Many States have found that their increased gasohol sales have resulted in a reduction in their allocation from the highway trust fund.

The Congress provided, in the Surface Transportation Assistance Act of 1982, that no State can receive from the highway trust fund less that 85 percent of its tax payments to the fund. States such as Michigan, California, Texas, Ohio, and Indiana are receiving this minimum allocation. Their increased consumption of gasohol, with its lower tax rate, has reduced their payments to the trust fund and has therefore caused them to suffer a significant loss of Federal funding for highway programs. For Indiana will translate into a loss of nearly $28 million in 1984, or 12 percent less than Indiana would receive had there been no reduced tax on gasohol.

One result has been a decision by four of the five States to reduce State excise tax exemptions for gasohol. Another has been to generate pressure on Congress to remove the Federal exemption.

Clearly, this unfortunate byproduct of the tax exemption was not intended. I support the continued exemption of gasohol from 5 cents of the 9-cent Federal excise tax. However, we cannot allow the effort to decrease our dependence on foreign oil to undermine our willingness and ability to commit resources to repair and rehabilitate our highways and bridges.

The corrective legislative I am introducing today simply allows for the 85-percent minimum to be calculated based upon what a State's contribution to the highway trust fund would have been if all gasohol, like gasoline, had been taxed at the 9-cent-per-gallon level. In other words, for purposes of the minimum funding level, I propose that we not discriminate against gasohol but treat it as if it were gasoline.

This correction would not reduce the share of other States. It only makes adjustments for those States already below the minimum level, because the total available for allocation to the States exceeds the actual allocation by an amount in excess of the adjustments made by this legislation.

I urge my colleagues to join me in sponsoring this remedial measure to insure that the goals of energy independence can be pursued without penalty.●

MARTIN LUTHER KING HOLIDAY BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. CONYERS) is recognized for 60 minutes.

● Mr. CONYERS. Mr. Speaker, on August 2 this body took a major step in the continuation of the great civil rights struggle which has brought meaning to the words of our Constitution for blacks and other minorities in this country. By passing the Martin Luther King, Jr., legal public holiday bill we have established an enduring beacon which will guide all Americans.

It is with much disappointment, on the eve of my departure for the Soviet Union, that I read the words of the Soviet News Agency, Tass and the criticism it expresses in the passage of this bill.

The Martin Luther King Holiday victory must be put in proper perspective. It is a peoples victory—the result of a 14-year legislative effort and peoples movement which is much older than that. It is an effort which is marked by the Montgomery bus boycott of 1955 led by Ms. Rosa Parks, the great March on Washington of 1963 led by Dr. King, the passage of the Civil Rights Act of 1964, the Voting Rights Act of 1965, the peace movement of the 1960's and 1970's, and the upcoming 20th anniversary march on Washington which takes place on

August 27 of the year. The King Holiday is already marked on so many American calendars and the U.S. Congress has finally decided to catch up.

On one count, however, the Tass News Agency is correct. The passage of this bill is not evidence that blacks are equally honored in the United States. They are also correct in pointing out that the plight of black America is far worse than it has been in several decades. But Tass should rest assured, the black community is not so naive as to have their votes and loyalties held captive or bought off by the passage of a single piece of legislation. Our long history of struggle for the goals and ideals which Dr. King died for will not be relinquished so easily.

Contrary to the Tass report, these ideals and the bill are not violently opposed in the U.S. Senate. Both Democratic and Republican leaders in the Senate support the bill and the majority leader has placed it on the calendar for consideration this year.

I hope to discuss the great significance of a King holiday with the people of the Soviet Union in my upcoming visit to that country.

The comments of the Tass News Agency are set forth below:

Moscow.—A bill passed by the U.S. House of Representatives to make Martin Luther King's birthday a national holiday is no more than a scheme to win black votes in the next election, the Soviet Union said Thursday.

"The hostile attitude of the U.S. authorities to King himself, to the ideas that he gave his life for, is manifest in the present-day racist, anti-people policy of the Reagan administration," the official Tass news agency said.

In a report from Washington, Tass said that American blacks "were brought to despair by the racist policy of the Reagan administration, with Congressmen having more than once obediently followed that policy."

Now that election campaigns are coming up, Tass said, they want blacks to see them in "a noble light."

Tass said the House decision to make January 15 a national holiday honoring the assassinated civil rights leader has little meaning.

"The decision by no means signifies that such a holiday will really be marked in the American calendar," Tass said. "Such a proposal is being violently opposed in the Senate."

Tass accused the U.S. media of describing the bill as evidence that blacks are equally honored in the United States. "There is nothing further from the truth," the agency said.

As a result, Tass said, "the plight of the black American population is now the heaviest in the past decades."●

● Mr. GILMAN. Mr. Speaker, I commend my distinguished colleague, the gentleman from Michigan (Mr. CONYERS) for reserving this special order to discuss the Soviet's critical comments about legislation passed this week by the House which creates a national holiday in memory of the Reverend Dr. Martin Luther King, Jr. As a cosponsor of this legislation and as one who has worked during past Congresses to secure favorable consideration of similar measures by the Committee on Post Office and Civil Service, of which I am a member, I share the gentleman from Michigan's indignation about today's report in the official Soviet News Agency, Tass, that the bill to commemorate Dr. King "is no more than a scheme to win black votes in the next election." The UPI Wire Service report continues that "Tass said the House decision to make January 15 a national holiday honoring the assassinated civil rights leader has little meaning."

Mr. Speaker, I acknowledge that the Soviet Union is well recognized for its uncanny ability to distort the news to best fit the needs of its worldwide propaganda machine. This latest exercise, however, has reached new heights of hypocrisy and blatantly malicious reporting.

I personally resent the fact that we in the House are characterized as dupes of a purported scheme to use Dr. King's memory for temporary political gain. As one who has witnessed the sincere efforts of many of my colleagues who have worked long and hard on civil rights issues and on this legislation, I can wholeheartedly state that passage of the measure was based on an overwhelming feeling in the House of respect and admiration for Dr. King and for his accomplishments in the civil rights area.

Moreover, who but the Soviet Union, could so unabashedly point an accusing finger at another nation's actions in support of civil rights. The Soviets have unquestionably the most abominable human rights record and a worldwide reputation for brutally supressing any call to minimally respecting human rights. The flow of those wishing to emigrate for reunification of their families has dropped to barely a discernable trickle.

Accordingly, I join my colleagues in responding to this singularly objectionable commentary on the legislation to create a national holiday in memory of Dr. King. Having nothing to show which demonstrates a positive approach to basic human rights in their nation, the Soviets are now reduced to the level of resorting to distorting and maliciously characterizing this significant progress made—due in large measure to the work of Dr. King—in the United States in strengthening our civil rights.●

FOREIGN SALES CORPORATION LEGISLATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ROSTENKOWSKI) is recognized for 5 minutes.

● Mr. ROSTENKOWSKI. Mr. Speaker, at the request of President Reagan, the Honorable BARBER B. CONABLE, Jr., and I, today are introducing the administration's legislative proposal to repeal the Federal income tax deferral for Domestic International Sales Corporations (DISC's) and provide, in its place, an exclusion from income for certain foreign income of Foreign Sales Corporations (FSC's). I want to clearly state that I am not endorsing the administration's specific legislative proposal. However, I hope that introduction of the bill will further public discussion of this important issue and utlimately contribute to a solution to the problems now presented by DISC.

The Congress first enacted DISC in the Revenue Act of 1971 to insure that the U.S. tax system did not lead to reduced exports. In general, a DISC is a U.S. corporation that derives substantially all of its income from the export of U.S. goods and whose assets are substantially all export related. If a corporation qualifies as a DISC for a taxable year, it is not taxed by the Federal Government, but a portion of its income is taxed to its shareholders. The remainder of the income may be retained by the DISC. Tax on the retained portion is deferred until the income is actually or constructively distributed, or otherwise realized by its shareholders.

From the beginning, the DISC provisions have been controversial. The General Agreement on Tariffs and Trade (GATT), as well as the subsidies code negotiated pursuant to GATT, contain various obligations regarding the use of export subsidies. In 1972, European member countries filed a formal complaint in the GATT charging that the DISC violated these provisions. However, the United States has never conceded this point.

In 1976, separate GATT panels found that certain tax practices of the United States, France, Belgium, and the Netherlands had characteristics of illegal subsidies. DISC was cited among the violative practices. In December of 1981, the United States agreed to the adoption of these panel reports pursuant to a formal understanding among the parties stating that signatories are not required to tax export income outside their territorial limits. This agreement did not entirely sanction DISC, and the issue remained a stumbling block preventing discussions of important trade matters in sessions of the GATT Council. Debate over the applicability of the 1981 understanding to DISC occupied much of the first part of 1982.

Because of the continued controversy, the administration made a commitment to the GATT Council on October 1, 1982, to propose legislation which would address concerns regarding the legality of DISC under GATT rules. The administration has therefore proposed that the Congress repeal the ex-

isting DISC provisions and replace them with the Foreign Sales Corporation (FSC). The intent of this substitute proposal, as I understand it, is to shift much of the export activity overseas through new foreign management and economic process requirements.

Mr. Speaker, I am concerned about the growing American trade deficit. I also believe that we must put the DISC controversy behind us in our GATT discussions. For these reasons, I am introducing the administration's FSC legislation at the request of President Reagan. However, significant tax and trade policy questions surrounding this proposal remain unanswered. For instance, the proposal raises questions regarding the exporting of jobs associated with managing the FSC.

As proposed, the bill might well encourage the use of tax havens, providing them with an economic benefit, even when those tax havens do not cooperate in providing information to assist with the administration of U.S. tax and other laws. In addition, it may be questionable to permit taxpayers to shift the burden of proof to the Secretary of the Treasury with respect to the foreign presence test and other tax related issues merely by filing a written affidavit. The proposal also raises questions regarding sales by agricultural companies as well as small business concerns. Another vital concern is the revenue impact of the proposal, including the appropriate treatment of any accumulated tax-deferred income of a DISC.

Perhaps the most critical question is whether this new version of DISC is indeed acceptable to GATT countries, clearing the path for productive discussion of world trade issues and their resolution. However, it is important that we begin the difficult task of reviewing these controversial issues. I am hopeful that introduction of the administration's proposal will facilitate and hasten that process.

I am attaching a brief description of the act at the conclusion of this statement:

FOREIGN SALES CORPORATION ACT OF 1983

The Foreign Sales Corporation Act provides tax rules for exports of goods and services. Under these rules, 17 percent of the taxable income that a foreign sales corporation and its related party derive from an export transaction is tax-exempt. Alternatively, up to 1.35 percent of the gross receipts from the transaction are tax-exempt. The bill repeals the present Domestic International Sales Corporation (DISC) rules, with an exception for small exporters, but it forgives tax on DISC income that has already benefitted from tax deferral.

A foreign sales corporation is a new kind of entity. It must be organized under the laws of a jurisdiction outside the U.S. customs area. It must have at least one director who is not a U.S. resident. It must maintain an office outside U.S. customs territory, and it must keep tax records both at that office and in the United States. It must elect foreign sales corporation treatment.

The bill applies to the export income of a foreign sales corporation if it is managed outside the United States and if economic processes of the transaction take place outside the United States. In addition, the bill applies to the export income of small foreign sales corporations with up to $2,500,000 of export receipts.

To be managed outside the United States, a foreign sales corporation must have its shareholders' meetings, board meetings, and principal bank account outside the United States. To meet the economic process test, the foreign sales corporation or its agent must solicit, negotiate, or make the contract relating to the transaction outside the United States. In addition, half of the costs the foreign sales corporation incurs for advertising, handling orders, transportation, collection, and assumption of credit risk must be for performance outside the United States; alternatively, it may incur 85 percent of its costs for any two of these five activities for their performance outside the United States.

Some export transactions between foreign sales corporations and related U.S. taxpayers qualify for administrative transfer pricing rules. These administrative rules are available only if the foreign sales corporation or its agent performs all the activities of the economic process test. Under these rules, the foreign sales corporation generally earns the greater of 23 percent of the taxable income that it and its related party derive from the transaction or 1.83 percent of the gross receipts from the transaction.

The bill exempts a portion of the export income of a foreign sales corporation from U.S. tax. If the transaction is subject to one of the administrative transfer pricing rules, this exempt portion is seventeen twenty-thirds (17/23) of foreign sales corporation's income from the transaction. Otherwise, this exempt portion is 34 percent of its export income. The rest of export income is subject to U.S. tax. All investment income of a foreign sales corporation is also subject to U.S. tax. Dividends from export income of a foreign sales corporation to a U.S. corporate shareholder are tax-exempt.

The bill provides tax deferral under the DISC rules for companies with up to $10,000,000 of export receipts, but requires those companies to pay interest on the deferred tax.

The bill requires that foreign sales corporations and DISC's have the same taxable year as their parent corporations. It provides that income from trade receivables of a related party is passive income subject to anti-incorporated pocketbook and anti-tax haven rules. It treats accumulated DISC income as having been previously taxed.●

● Mr. CONABLE. Mr. Speaker, the Honorable DAN ROSTENKOWSKI and I are today introducing, by request of the President, the Foreign Sales Corporation Act of 1983. This bill is intended to terminate a longstanding controversy over this country's Domestic International Sales Corporations (DISC's). The controversy started after the Internal Revenue Code was amended to permit the establishment of DISC's, in 1971. Various countries have asserted since then that these provisions were inconsistent with our obligations under the General Agreement on Tariffs and Trade (GATT).

The United States made a commitment to the GATT to modify or replace the existing DISC provisions so as to eliminate any possibility of inconsistency. The bill being introduced today was developed by the Treasury Department and the U.S. Trade Representative with the aim of keeping it consistent with our obligations under the GATT while attempting at the same time to provide benefits for taxpayers which are comparable to those provided under existing DISC provisions.

This legislation represents a significant change from the DISC provisions which require the use of a domestic corporation but no activity outside the United States. Under the bill, taxpayers will be entitled to an exemption from income only if they use a foreign entity referred to as a Foreign Sales Corporation (FSC), and only if they meet certain specified requirements which are designed to insure that a minimal level of business activity, principally administrative procedures, take place outside the United States in order to qualify as an FSC and escape the GATT prohibition against granting a tax or other subsidy to a domestic industry for the purpose of boosting exports. A description of the bill follows my statement.

There are several aspects of this bill which I believe should receive special attention as it proceeds through the legislative process. First, as it was drafted, it does provide a relatively complex set of rules under which taxpayers must operate in order to obtain the benefits of the FSC provisions. I believe that we should review carefully the complexity as well as the substance of these rules and consider the possibility of simplifying them. Second, I wish to point out that, under the bill, U.S. taxpayers could be establishing operations in low tax jurisdictions, that is, tax havens, at the same time that the Treasury Department is pursuing a treaty negotiating policy intended to minimize the use of tax havens by U.S. taxpayers. I recognize that, in trying to balance tax policy considerations with trade policy considerations, we do have to confront dilemmas and deal with very sensitive situations. I only wish to alert my colleagues to this potential difficulty at the outset.

It is extremely important for the Congress to modify or replace the DISC provisions as soon as possible and practical. We have made such commitments, in effect, to the international trading community and we must do all we can to follow through expeditiously. Resolving the DISC controversy will permit the United States to deal more effectively with other key trade issues which are of vital importance to U.S. exporters. At this point I include the following:

DESCRIPTION OF THE FOREIGN SALES CORPORATION ACT OF 1983

The Foreign Sales Corporation Act provides tax rules for exports of goods and services. Under these rules, 17 percent of the taxable income that a foreign sales corporation and its related party derive from an export transaction is tax-exempt. Alternatively, up to 1.35 percent of the gross receipts from the transaction are tax-exempt. The bill repeals the present Domestic International Sales Corporation (DISC) rules, with an exception for small exporters, but it forgives tax on DISC income that has already benefitted from tax deferral.

A foreign sales corporation is a new kind of entity. It must be organized under the laws of a jurisdiction outside the U.S. customs area. It must have at least one director who is not a U.S. resident. It must maintain an office outside U.S. customs territory, and it must keep tax records both at that office and in the United States. It must elect foreign sales corporation treatment.

The bill applies to the export income of a foreign sales corporation if it is managed outside the United States and if economic processes of the transaction take place outside the United States. In addition, the bill applies to the export income of small foreign sales corporations with up to $2,500,000 of export receipts.

To be managed outside the United States, a foreign sales corporation must have its shareholders' meetings, board meetings, and principal bank account outside the United States. To meet the economic process test, the foreign sales corporation or its agent must solicit, negotiate, or make the contract relating to the transaction outside the United States. In addition, half of the costs the foreign sales corporation incurs for advertising, handling orders, transportation, collection, and assumption of credit risk must be for performance outside the United States; alternatively, it may incur 85 percent of its costs for any two of these five activities for their performance outside the United States.

Some export transactions between foreign sales corporations and related U.S. taxpayers qualify for administrative transfer pricing rules. These administrative rules are available only if the foreign sales corporation of its agent performs all the activities of the economic process test. Under these rules, the foreign sales corporation generally earns the greater of 23 percent of the taxable income that it and its related party derive from the transaction or 1.83 percent of the gross receipts from the transaction.

The bill exempts a portion of the export income of a foreign sales corporation from U.S. tax. If the transaction is subject to one of the administrative transfer pricing rules, this exempt portion is seventeen twenty-thirds (17/23) of foreign sales corporation's income from the transaction. Otherwise, this exempt portion is 34 percent of its export income. The rest of export income is subject to U.S. tax. All investment income of a foreign sales corporation is also subject to U.S. tax. Dividends from export income of a foreign sales corporation to a U.S. corporate shareholder are tax-exempt.

The bill provides tax deferral under the DISC rules for companies with up to $10,000,000 of export receipts, but requires those companies to pay interest on the deferred tax.

The bill requires that foreign sales corporations and DISC's have the same taxable year as their parent corporations. It provides that income from trade receivables of a related party is passive income subject to anti-incorporated pocketbook and anti-tax haven rules. It treats accumulated DISC income as having been previously taxed.●

● Mr. FRENZEL. Mr. Speaker, today my colleagues Chairman ROSTENKOWSKI and Representative CONABLE, the ranking Republican on the Committee on Ways and Means, have introduced legislation designed to replace the Domestic International Sales Corporation provisions—DISC—in the Internal Revenue Code with a new, GATT-legal export program. The new export program, which has been introduced at the request of, and after close consultations with, the administration, would create Foreign Sales Corporations, FSC's.

Almost since the day DISC was enacted 12 years ago, it has been under attack by our trading partners as not being in conformity with our treaty obligations under the General Agreement on Tariffs and Trade, GATT. In October 1982, the United States made a commitment to the GATT council to propose legislation which would address the GATT conformity concerns the other GATT members had raised with DISC.

This bill introduced today, the Foreign Sales Corporation Act of 1983, is designed to fulfill that commitment.

The proposal is the result of a process which was initiated late last year, and involved the participation of the Treasury, the USTR, the Department of Commerce. Members of both the House and the Senate, and representatives of the business community. It represents a lot of hard work by all of the parties involved, and all are to be commended for putting together such a complicated proposal in such a short period of time.

While it is generally a good proposal, however, there are several provisions which I think deserve the Members attention during further deliberations on the bill. Under current law, individuals, as well as corporations, are permitted to use the DISC. The new proposal, while continuing to permit individuals to use FSC, does not allow individuals to directly receive any tax benefits from such use. All Members recognize the important role small businesses—which are usually not corporations—play in developing new export markets. I think that the Congress should move very cautiously before it enacts any proposal which will deny small businesses that are not corporations the benefits provided for in this bill.

The bill also extends FSC benefits to farm cooperatives. While Co-ops are permitted to use DISC under current law, they are not permitted to pass on any benefits from DISC to their members. The bill attempts to address this problem by allowing FSC benefits to be passed through to co-op members. However, it is unclear as to exactly what the impact of the provision in the bill might be. There is a possibility that the provision may be overly broad, or may create inequities in the commodities markets that do not currently exist. I think that the Congress should examine this issue very carefully before any changes from current law are made.

The bill also contains ambiguities as to exactly what is meant in the foreign presence requirements, specifically as to what must be done in order to meet the requirements set forth in the bill. I do not believe that Congress should leave this issue up to the Department of Treasury to solve by regulation, and I would hope that additional detail could be included in the bill before it is enacted into law.

Other problems, including the availability of FSC treatment for computer software, and whether sales pursuant to the export credit programs of the Commodity Credit Corporation will qualify for FSC treatment, are left unanswered by the bill. They, too, will have to be discussed during further consideration of this legislation.

On the whole, however, the bill introduced is a good bill, and represents a good step toward resolving the GATT problems which currently exist with the DISC program. I urge all of my colleagues to examine this proposal closely, and make their views known to the Ways and Means Committee as the bill is considered.●

TRIBUTE TO AMERICAN POLITICIAL SCIENCE ASSOCIATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington (Mr. FOLEY) is recognized for 5 minutes.

● Mr. FOLEY. Mr. Speaker, I rise to congratulate the American Political Science Association on the 30th anniversary of its congressional fellowship program.

Since 1953, the APSA has sent nearly a thousand scholars, Federal executives, and journalists to the Congress for an opportunity to learn about the institution while absorbing an education on the legislative process that can only be acquired firsthand.

For those who may not be familiar with the program, the fellows are selected for year-long appointment during which they serve as professional staff assistants for Members of Congress and congressional committees. They serve half their fellowship in the House of Representatives and half in the Senate.

It is a testament to the value of the program that fellows have served in 350 different offices over the 30-year history of the program and that the 40–50 fellows a year have little trouble finding an office to assist. As many of my Republican colleagues can attest, the strength of this program also is

apparent in the fact that many Members of both parties participate in it.

The program's success and value can also be illustrated in the achievements of the fellows' program participants in their years after their fellowships. Alumni of the program include Members of Congress; university presidents, vice presidents, deans, department heads, and university professors; newspaper and magazine editors, columnists and reporters; Federal bureaucrats, a number at supergrade and assistant secretary heads; foundation and business executives; and congressional committee and office staff.

The program has been excellently administered during its recent history by Thomas Mann, Fred Holborn, and Catherine Rudder. It is a testament to their considerable skills that the program has flourished.

I highly recommend the program to all Members and again congratulate the APSA on creating and maintaining the finest program of its kind.●

PRIVATE LEGISLATION FOR THE RELIEF OF MR. THOMAS J. SCANLON

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. PANETTA) is recognized for 5 minutes.

● Mr. PANETTA. Mr. Speaker, I rise today to introduce legislation for the relief of Mr. Thomas J. Scanlon for the loss of personal property while in the service of the U.S. Govenment.

Mr. Scanlon, who presently resides in my congressional district, served as an economic/commercial officer attached to the U.S. Embassy in Reykjavik, Iceland, in the fall of 1979. On September 10, 1979, Mr. Scanlon was directed by U.S. Ambassador Richard A. Ericson to meet two Federal Aviation Agency [FAA] consultants arriving at Keflavik Airport the following morning and transport them to the Embassy. The sole purpose of the trip was to pick up the FAA officials.

Unable to secure a Government car for the trip, Mr. Scanlon was forced to rely on his own car, a 1977 Mercedes-Benz sedan. On the morning of September 11, while on the way to Keflavik Airport, Mr. Scanlon's car struck a patch of ice, causing it to travel out of control and over an embankment. Damage to the car was beyond repair. The car, estimated to have been worth $9,400, was not insured against an accident of that kind.

Accordingly, Mr. Scanlon filed a claim with the Claims Section of the State Department's Office of Operations for the loss of his car. Investigations conducted by both local police and the State Department held that the accident was not the result of any negligence on the part of Mr. Scanlon. The Claims Section, however, denied Mr. Scanlon's claim on the basis of a provision (paragraph 315f of volume 6) of the Foreign Affairs Manual which states that employee claims are not payable for any damages or loss of a privately owned motor vehicle incident to its operation. The Department's Employee's Grievance Board dismissed an appeal filed by Mr. Scanlon, ruling that the Board lacked jurisdiction.

Mr. Scanlon's request for compensation is minuscule against the backdrop of Federal budgets approaching a trillion dollars annually. Yet I hasten to add that the loss of a car represents a formidable setback for most American families. That Mr. Scanlon's car was lost while being used for the benefit of the U.S. Government and not as the result of negligence, makes his claim all the more compelling.

Mr. Speaker, this body has traditionally offered citizens, after all avenues of administrative recourse have been exhausted, a final means of resolving claims with the U.S. Government. We ought not allow an arbitrary regulation prevent a dedicated public servant from recovering the loss of personal property destroyed while in the service of the U.S. Government.

Accordingly, I am introducing private legislation authorizing the payment of $9,400 for the uncompensated loss of Mr. Scanlon's car.

Following is the text of my bill:

H.R. 3855

A bill for the relief of Thomas J. Scanlon

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Secretary of the Treasury shall pay, out of any money in the Treasury not otherwise appropriated, to Thomas J. Scanlon of Monterey, California, the sum of $9,400, which sum represents the uncompensated loss of personal property sustained by Mr. Scanlon on September 11, 1979, while assigned to the United States Embassy in Reykjavik, Iceland.

(b) The payment made pursuant to subsection (a) shall be in full satisfaction of all claims which Mr. Scanlon has against the United States for compensation for the loss described in subsection (a).

SEC. 2. No part of the amount provided for in the first section of this Act in excess of 10 per centum thereof shall be paid to or received by any agent or attorney on account of services rendered in connection with the claim described in the first section, and the payment or receipt in excess of 10 per centum of the amount provided for in the first section shall be unlawful, any contract to the contrary notwithstanding. Violation of the provisions of this section is a misdemeanor punishable by a fine not to exceed $1,000.●

LEGISLATION DEALING WITH INDEXING PROCEDURES IN TAX CODE AND ENTITLEMENT PROGRAMS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma (Mr. JONES) is recognized for 5 minutes.

● Mr. JONES of Oklahoma. Mr. Speaker, today, I am introducing two bills which deal with indexing procedures in both the Tax Code and entitlement programs. These bills are not the only way to begin to regain control over the budget and to reduce the horrendous deficits which we face. Instead my intent is to start a debate on the issue of indexing and to increase the level of concern about what to do about the budget deficits. These bills are not answers to our budgetary problem but, instead, simply represent initial steps toward framing the issue. It is my hope that these bills will enable concerned Members from both sides of the aisle to work together toward developing a bipartisan solution to the budgetary crisis which we face.

The first bill, H.R. 3800, would repeal indexing in both the Tax Code and also in the non-means-tested entitlement programs in which benefits are tied to the Consumer Price Index. In its place, the Congress would assume responsibility for deciding each year in light of current economic conditions what tax adjustments and benefit increases are appropriate. The revenue gain over the period, fiscal years 1985–88, from a repeal of indexing in the Tax Code would be $88.2 billion. On the spending side, the cost savings of indexing in non-means-tested entitlement programs over the period, fiscal years 1985–88 would be $84.35 billion.

The second bill, H.R. 3790, would reduce the indexing in the income tax and in non-means-tested entitlement programs by 2 percentage points each year during the period, fiscal years 1985–90.

The justification for these bills is that the indexation of individual income tax for inflation which was enacted in the Economic Recovery Tax Act of 1981 is a major cause of the extremely rapid rise in the projected structural budget deficit in the Federal budget throughout this decade and beyond. The revenue loss from indexing rises from $6 billion in 1985 to $39 billion by 1988 and continues to grow thereafter. The explosion of the structural deficits, and the apparent lack of political will to address them, is a major factor in high and rising interest rates today. Thus, tax indexing, even before it becomes effective, is already a potent force in damaging and distorting our economy.

I am well aware of the theoretical arguments that can be made for indexing as a principle of tax policy. Indeed, in normal times, with the budget under control, I would have some sympathy with those arguments. But these are not normal times. The demands being placed upon our fiscal capacity by the rapid rise in defense spending, the sharply increasing proportion of elderly citizens in the popu-

lation, and the inexorable rise in medical costs, suggest to me that it is unlikely that we will see normal fiscal circumstances in the foreseeable future. As a matter of fiscal sanity, we must not budget on a business-as-usual basis when we are, in fact, in a fiscal crisis.

Indexing reduces taxes across the board and it increases spending benefits for entitlements. Reducing indexing will not be politically popular. However, the economic sacrifices necessary for budgetary control needs to be widely shared if it is to be effective. But, I would like to point out that the argument about the relative benefits of indexing for low- and middle-income taxpayers is often overstated. In fact, indexing provides a 0.63-percent increase in after-tax income for families of four with $100,000 in income, a similar 0.62-percent increase for families with $50,000 of income, but only a 0.23-percent increase for families with incomes of $20,000 per year. The $20,000 family gets a $43 tax benefit from indexing, while the $100,000 family gets a $490 benefit. So the argument that only the little guy benefits from indexing really has no foundation in fact.

The budgetary effects of my proposal to modity indexing temporarily by reducing it by 2 percentage points each year as follows:

Revenue increases

Fiscal years:	*Billions*
1985	$2.4
1986	6.6
1987	11.4
1988	17.0

In conjuction with a revision of the tax code, H.R. 3790 would also make a temporary change in annual COLA adjustments for non-means-tested programs including social security, civil service retirement, military retirement, Federal employee compensation, and the social security equivalent of railroad retirement benefits (tier I). Like the Tax Code, adjustments during fiscal years 1985-90 for these programs would be based on the CPI less 2 percentage points rather than the full CPI. This limitation would expire at the end of fiscal year 1990. At that point, the Congress could reassess the issue in light of the economic and budgetary situation at that time. The Congressional Budget Office estimates that spending savings of $40.15 billion would be achieved in fiscal years 1985-88 from this proposal.

Outlay savings

Fiscal years:	*Billions*
1985	$3.25
1986	7.70
1987	12.30
1988	16.90

I want to emphasize that both bills continue full COLA's for entitlement programs serving the poor in which benefits are tied to the Consumer Price Index. Given the impact of Budget reductions made in means-tested entitlement programs, during the last Congress and the limited ability of this group of persons to absorb the impact of inflation, it is important that full inflation protection be granted. In particular, the continuation of full indexing in the supplemental security income (SSI) program insures that low-income elderly and disabled persons will receive full protection against inflation.

The tremendous struggles that we all have experienced the past few years in determining Federal spending priorities has highlighted the fact that we as a Congress have very little control over how our budget dollars are spent. Currently, 41 percent of the Federal budget is automatically indexed. Without any action by Congress, Federal program spending continues to increase each and every year. It is no wonder that we have had such difficulty in putting our fiscal house in order. While this proposal would not do away with the automatic nature of indexing, it would serve to help limit the increase. I am convinced that this is imperative if we are to bring down soaring future deficits which will only serve to stifle or even eliminate economic growth.

If the Congress were to take no action, the CBO estimates that deficits between $200 and $300 billion would persist for the remainder of this decade. This is simply unacceptable. The First Budget Resolution for Fiscal Year 1984 does assume spending constraint and revenue increases by the Congress reducing the deficit to $179.35 billion. But more needs to be done. My bill tries to do it in a way that asks modest sacrifice from a large number of people. The sacrifice would be made by those who are in the best position to absorb it, namely taxpayers and recipients of Federal benefits programs not based on financial need. Non-means-tested entitlement programs now account for approximately 33 percent of all Federal spending.

A contributor toward this increase in Federal spending has been the rapid rise in health care cost. This bill does not affect medicare because the program is not indexed. Nevertheless, I strongly believe that health care costs must be brought under control and am pleased that the Congress this year made substantial progress toward this goal. Included in the Social Security Act Amendments of 1983 was a new reimbursement system which will serve to control program costs without hurting beneficiaries. The First Budget Resolution for Fiscal Year 1984 assumes savings of $400 million in medicare next year.

In conclusion, I believe that it is essential that any modification to annual adjustments for benefits be linked to a modification of the Tax Code. For equity's sake, it is important that everyone share in the sacrifice. It would be unfair for the disabled and elderly who must depend on these Government programs to shoulder all of the sacrifice. If we all sacrifice a little then we all will help a lot and share in the fruits of a solid, growing economy.●

THE FEDERAL INSECTICIDE, FUNGICIDE, AND RODENTICIDE REFORM ACT OF 1983

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. HARKIN) is recognized for 30 minutes.

Mr. HARKIN. Mr. Speaker, pesticides are vital tools to U.S. agriculture, and help protect consumers, farmers, property, and domestic animals from literally thousands of different pests. For 3 years now, serious deficiencies in the Federal statute regulating pesticides have been surfacing. The nature and extent of pesticide regulatory bottlenecks, loopholes, and unrealistic standards has become increasingly obvious. In addition, we are all paying too high a price for the public health protection actually gained. We are, in effect, gambling like overconfident children with extremely toxic chemical agents if we fail to act now to rectify the many well-documented deficiencies in pesticide regulation.

For this reason, I am introducing, today, the Federal Insecticide, Fungicide, and Rodenticide Reform Act. I am joined in introducing this legislation by the distinguished chairman of the subcommittee with jurisdiction over this statute. My friend and colleague, Hon. GEORGE E. BROWN, JR., has patiently and systematically explored that complex area of pesticide regulation in hearings before the Department Operations, Research, and Foreign Agriculture Subcommittee. Under Chairman BROWN'S able and steady leadership, the subcommittee has developed much of the factual record supporting the reform measures I am introducing today.

The Federal Insecticide, Fungicide, and Rodenticide Reform Act is an important piece of legislation. It responds in a realistic fashion to a broad range of concerns. The provisions of this bill are modest and straightforward. No abrupt changes would be forced upon the industry or the Environmental Protection Agency (EPA), and no new major program activities or expenditures would be necessitated. Indeed, a major thrust of the bill is to simplify the mandates and procedures governing the pesticide program so that essential steps needed to protect the public health can and will be taken. We can no longer afford a statute that inadvertently squanders so much time and such a great portion of the Agency's resources. The inefficien-

cy of the program is no great surprise to those who have studied the reams of regulations promulgated to implement the FIFRA statute. It is easy to understand why so many observers complain about the indecisiveness of the pesticide program.

I share the concerns of my colleagues and the pesticide industry that all regulatory programs should be reasonable, cost effective, and equitable in their impacts. But I strongly reject the notion that the basic goal of these programs—protecting the public health—should be compromised, if not abandoned altogether, in overlapping efforts to create and administer fair or cost-effective regulatory procedures and decisions. My bill is designed to simplify the pesticide program and help EPA accomplish its basic mandates. I believe it is in everyone's best interest—and especially our agricultural producers and the pesticide industry—to support passage of these reform measures so that the public will continue to perceive the use of hazardous pesticides as an acceptable risk and a net benefit to society. The future cost to American agriculture, and the severity of public health hazards associated with inadvertent and misguided pesticide applications, are ominous if we fail now to take the steps desperately needed to place the pesticide program back on solid footing.

Before presenting a brief explanation of the Federal Insecticide, Fungicide, and Rodenticide Reform Act, I would like to direct attention to some of the critical problems addressed by the bill. In my opinion, and in the view of many experts, the most severe obstacle to protecting the public health from pesticides is the lack of solid, modern scientific information on pesticides. Beginning in 1972 with the passage of a major reform of the pesticide statute, Congress has tried many times and in many ways to compel the Agency to reregister older pesticides which came onto the market three or four decades ago. A key step in taking a new, hard look at old pesticides is requiring the manufacturers of these products to upgrade the base of safety and health data on these pesticides in compliance with modern data requirements applicable to newer pesticides. Such a requirement has been widely accepted for over a decade as only fair, and obviously prudent. It came as a great surprise to me to learn earlier this year that the vast majority of major pesticides still have not been adequately tested in compliance with the EPA's data requirements. According to an indepth investigation by the staff of the Department Operations, Research, and Foreign Agriculture Subcommittee, considerably less than one-half of a sample of 60 major pesticides has been tested in compliance with modern data requirements imposed to estimate the potential cancer hazards of pesticides. I need not remind my colleagues of the frightful toll this disease exerts on society each year. Recent scientific advances in many disciplines are clarifying the subtle ways that minute quantities of environmental contaminants can initiate or promote cancer in man. These are sound scientific reasons to be more concerned than ever before about cancer-causing pesticides.

The Federal Insecticide, Fungicide, and Rodenticide Reform Act contains a straightforward provision which would cause pesticide data gaps to be filled as quickly as the scientific research can be conducted. This is absolutely vital. The pesticide regulatory program has been trapped in regulatory grid lock on literally dozens of major pesticides over the last decade. Unless the registrants voluntarily agree, the EPA cannot restrict or substantially modify the uses of an older pesticide without valid significant evidence demonstrating that a pesticide poses hazards to man. With diseases like cancer, it is simply unreasonable to expect epidemiological research to detect and prove a casual link between a given pesticide and an increase in human cancer in the general population. Epidemiology does have an important contribution to make in detecting adverse health effects in isolated populations involving occupational exposure to pesticides. The recent preliminary finding in chemical manufacturing workers exposed to dioxin over three decades ago could have a very substantial impact on all regulatory programs. Since dozens of major pesticides still widely used contain trace amounts of dioxin, there may be reason to significantly tighten regulations on dozens of products. This bill will facilitate a timely and prudent response to this emerging area of concern.

There are other major areas where the pesticide data base is inadequate. The same study mentioned earlier found that over three-quarters of major pesticides have not been adequately tested for genetic mutation and birth defects. A regulatory statute and program which proposes to protect the public health and welfare through a balancing of risks and benefits is simply a charade when bureaucratic doubletalk and indecision makes it essentially impossible to credibly estimate risks. The Federal Insecticide, Fungicide, and Rodenticide, and Rodenticide Reform Act would resolve this problem in a simple, equitable, and efficient manner by mandating all existing data gaps to be identified and filled as soon as the research can be completed following sound scientific procedures.

The Federal Insecticide, Fungicide, and Rodenticide Reform Act also will promote a fair and effective regulatory program by closing a number of loopholes in the statute. For good reasons, Congress has provided the Administrator of the EPA with statutory provisions in sections 18 and 24 of FIFRA designed to provide him with the ability to respond to emergency situations and special local pest control problems that arise from time to time in certain States. Unfortunately the streamlined registration process and reduced regulatory requirements of these sections of FIFRA have been eagerly exploited by the pesticide industry during the last few years. Well meaning statutory provisions have become loopholes that threaten to totally undermine the integrity of the FIFRA statute. As evident throughout the brief explanation of the bill, which follows, the Federal Insecticide, Fungicide, and Rodenticide Refort Act strives to close, or at least markedly narrow, literally dozens of loopholes in a straightforward and equitable manner. Few, if any, new resources will be required to implement these important corrective measures. I think it is clearly advisable for Congress to adopt these amendments now before public sentiment threatens the very existence of these special provisions of the law.

Mr. Speaker, I would like to point to one other primary thrust of the bill I am introducing today. In the last few years, there has been a systematic and concerted campaign by individual chemical companies and pesticide industry trade associations to close the public out of the pesticide regulatory process. The EPA has been compliant, bordering on solicitous, in responding to the requests of industry for "regulatory relief" measures that are, in all candor, unlawful procedural hurdles designed to insulate major changes in EPA policy from public scrutiny and criticism.

Several Congresses have built into the FIFRA statute avenues for members of the public who wish to contribute information during the course of formulating regulatory decisions. To meaningfully participate in the process, though, members of the public obviously need to have access to timely information pending regulatory actions and must be able to review the scientific data available to EPA for estimating pesticide risks and benefits. The right of the public to oversee and participate in the regulatory process is of great importance if EPA is to restore public confidence in the prudence and advisability of its actions. I am pleased and encouraged that Mr. William Ruckelshaus, the new Administrator of the Environmental Protection Agency, has made so clear and decisive a commitment to openness. I urge him to carefully consider and support the many sections of the Federal Insecticide, Fungicide, and Roden-

ticide Reform Act which would foster constructive public participation in the pesticide program.

Mr. Speaker, I urge my colleagues to cosponsor and support this bill. I recognize that there are some important issues which it does not adequately address; however, I am sure that the bill can and will be improved as it progresses through the legislative process. But it is critical to American agriculture and to the public that Congress act now before the end of the session to correct the longstanding, statutory problems that will continue to undermine this important area of environmental protection.

A basic explanation of the Federal Insecticide, Fungicide, and Rodenticide Reform Act follows:

BRIEF EXPLANATION OF THE FEDERAL INSECTICIDE, FUNGICIDE, AND RODENTICIDE REFORM ACT

Section 1 contains the title of the bill. Section 2 states that all amendments altering an existing statute refer to the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), unless otherwise specified.

Section 3 contains several changes in definition of basic terms in FIFRA. An additional clause is added to the definition of "active ingredient," stating that the definition shall include an ingredient of a pesticide which will endanger human beings. The primary intent of this change is to allow the Administrator to require data on inert ingredients, to consider potential adverse impacts from inert ingredients in reading regulatory decisions under FIFRA, to list inert ingredients on the label, and to state and enforce pesticide use restrictions specified because of the potential toxicity of inert ingredients. (Several other sections of the "Pesticide Hazard Prevention Act" contain other amendments to FIFRA clarifying how specific provisions of FIFRA shall apply to inert ingredients.)

Section 3 also changes the definitions of "certified," "private," and "commercial" applicators. In all three cases, a clause is eliminated that allows a certified applicator to "supervise the use of" a restricted use pesticide applied by another person. The definition specifying what it means to apply a restricted use pesticide "under the direct supervision of a certified applicator" is deleted. Accordingly, all applicators of restricted use pesticides must be certified under the provisions of section 4 of FIFRA.

The definition of "ingredient statement," which must appear on pesticide labels, is extended to include the name of toxic inert ingredient, in addition to the name and percentage of active ingredients. The definition does not require the percentage of each inert ingredient to be specified in order to help protect from potential competitors the exact formula of pesticide products.

The definition of "unreasonable adverse effects on the environment," the basic standard governing nearly all regulatory decisions under FIFRA, is changed by deleting references to adverse effects on man. The "adverse impacts" standard would still apply to environmental impacts. Elsewhere in this Act, a "will endanger human health" standard is specified for adverse effects on man.

A definition of the term "data gap" is added to the statute. A "data gap" exists when a data requirement prescribed by the Administrator applicable to a given active ingredient or pesticide product has not been satisfied by pesticide registrants through submission of a valid study which has been conducted according to an experimental design judged to be acceptable in response to the data requirement. The definition also specifies the criteria of the Administrator shall apply in judging whether a given study satisfies a data requirement. These include the study protocols, documentation of the conduct and analysis of the study, and the results of the study.

Section 4 contains a number of extensive amendments to section 3 of FIFRA. Section 4(a)(1) of this Act alters the provision stating the Administrator "shall revise" the guidelines specifying what data shall be required in support of a registration to "may revise." This change is intended to grant the Administrator greater discretion. A provision is added which clarifies what information that the Administrator shall require in support of pesticide registrations. "Pursuant to the standards in this Act," the Administrator shall require sufficient information to assess the risks and benefits of pesticides. Such data requirements shall be applied uniformly and consistently to the extent practicable. Waivers or variation in data requirements may be granted only if the advisability of the waiver or variation is clearly established, taking into account public comments received pursuant to a notice proposing such an action. The term "he" is replaced througout this paragraph by "the Administrator."

Subsection 4(a)(1)(D) of this Act changes the provisions of FIFRA pertaining to the disclosure of information submitted to the Administrator in support of a pesticide registration. Under current law, the Administrator is required within 30 days of granting a registration to make available to the public, subject to the provisions of section 10 of FIFRA, the data submitted by registrants relevant to the registration actions. This Act establishes elsewhere a 90 day comment period after receipt of an application for registration of a pesticide containing a new active ingredient or a changed use pattern of previously registered active ingredient. Section 4(a)(1)(D) of this Act specifies that the Administrator shall make available to the public in an expeditious manner the data submitted in support of such registration applications, or petitions to establish tolerances, Hence, data would be disclosable subject to the provisions of section 10 prior to granting registrations or establishing tolerances during the period the Administrator is evaluating the pertinent applications.

Subsection 4(a) (2) of this Act contains a substantial rewrite of section 3(c)(2)(B) of FIFRA. The amendment is substantially identical to the language contained in H.R. 5203, the bill which passed the House August 11, 1982. This section of FIFRA specifies the procedures and provisions governing the joint development and sharing of "defensive data" as required by the Administrator to fill a data gap. The new provisions would:

(1) Allow registrants 120 days to respond to an EPA data request, rather than the present 90 days;

(2) Require, rather than permit, registrants to enter into joint data development arrangements, unless all registrants agree otherwise;

(3) Establish a cost-sharing arrangement under which each of the joint data developers would pay an initial cost of $100,000 or divide equally 25 percent of the estimated total cost, whichever is less, and pay the balance of the costs as needed on a pro rata basis, according to individual United States market share of the pesticide in question. Each participant's share would be determined by an independent auditor, based on the most recent available sales figures;

(4) Provide for suspension of the registration of any registrant that fails to enter into a joint data development arrangement for the products for which the additional data are requested, and make such arrangement enforceable in a Federal district court action instituted by any of the participants;

(5) Expand the scope of hearings provided for registrants who appeal such suspensions to allow consideration of whether the Administrator had a valid and reasonable basis for requiring the additional data. Now such hearings are restricted to considering whether the registrant has failed to take the action required to provide the requested data and whether the suspension order provides for disposition of existing stocks consistent with the Act. Other hearing provisions would be unchanged;

(6) Provide a 15-year period of protection for defensive data, following the date the data were submitted, during which time any party could obtain the right to use defensive data by joining the joint data development group and reimbursing the previous members of the group. The new member would pay a share of the total data cost in proportion to the number of persons sharing in such cost. The payment then would be distributed among the previous group members according to the amount of their contribution;

(7) Provide for data submitted by a registrant after September 30, 1978, to replace previous data that are deemed scientifically insufficient by generally accepted standards to be treated in the same way as defensive data requested by EPA, except that other registrants would be entitled, but not required, to participate in joint data development arrangements; and

(8) Provide a transition between current procedures and the new procedures of this amendment by giving persons, who had received notices from EPA asking for additional data to support existing registrations, the right to compel joint data development with other registrants currently performing testing. This option must be exercised within 120 days after enactment of the bill.

Subsection 4(a)(3) of this Act extends the comment period from 30 to 90 days for persons wanting to comment on applications for registration. Subsection 4(a)(4) adds a requirement that the Administrator shall, when registering a pesticide, make a written determination with respect to the active and inert ingredients of a pesticide. Another change specifies that the determination shall be that the pesticide, when used in accordance with widespread and commonly recognized practices, "will not cause unreasonable adverse effects on the environment," instead of "will not generally cause . . ." as under existing law. A new subparagraph (E) is added establishing the new "will endanger" standard applicable to a pesticide's potential hazards to man. The Administrator is further directed to consider a full range of potential chronic health effects in determining whether a pesticide "will endanger" human beings.

Subsection 4(a)(b) of this Act eliminates the Administrator's existing authority to waive efficacy data requirements. A new provision is added requiring the Administrator to publish in the Federal Register a summary of the factual basis supporting

registration actions. Persons adversely affected or opposed to registration actions are granted the same remedies to initiate judicial review of the action as specified in section 6(b) of FIFRA.

Subsection 4(a)(5) of this Act removes the Administrator's discretionary authority to deny registrations when the basic requirements of paragraph (5) are not met. The clause "the Administrator may refuse to register a pesticide" is changed to "the Administrator shall . . .".

Subsection 4(a)(6) of this Act alters when the Administrator may grant a conditional registration for a pesticide under section 3(c)(7) of FIFRA. The new provision prohibits the Administrator from granting a conditional registration for a use of a pesticide which has previously been cancelled or suspended. The same prohibition applies if a registration was voluntarily withdrawn, if the Administrator determines that the voluntary withdrawal was associated with concern over potential adverse effects of the pesticide. Another provision is added requiring the Administrator to make available to the public, subject to section 10 of FIFRA, the data submitted in support of a conditional registration, along with a list of outstanding tests to be performed on the pesticide and the timetable governing completion and submission of the tests.

Subsection 4(a)(7) of this Act strikes the so-called "Grassley-Allen" amendment pertaining to the conditions which must be met before initiating an interim administrative review (formerly known as an RPAR review, now called a Special Review). The Grassley-Allen amendment prohibits the Administrator from initiating a Special Review, unless the Administrator has "a validated test or other significant evidence raising prudent concerns of unreasonable adverse risk to man or the environment."

Subsection 4(b) amends the provisions pertaining to classification of pesticides under section 3(d) of FIFRA. The Administrator may classify a pesticide for general use when it "will not cause unreasonable adverse effects. . ." rather than when it "will generally not cause. . .". The Administrator is further directed in all decisions pertaining to classification to consider the potential contamination of groundwater in determining whether a pesticide should be classified for restricted use. The allowance in section 3(d)(1)(ii) that a restricted use pesticide may be applied "under the direct supervision" of a certified applicator is eliminated.

Subsection 4(c) amends the "miscellaneous" provisions in section 3(f) of FIFRA. Under current law, a pesticide registration is prima facie evidence that a pesticide is in compliance with the Act, unless a cancellation proceeding is in effect. This provision is amended to provide that registration of a pesticide constitutes such evidence only if the active ingredient has been registered after enactment of this Act or re-registered since October 21, 1972, and provided that a cancellation proceeding is not in process and that no required studies are outstanding. The Administrator is granted authority to consult any state, in addition to other federal agencies, in connection with regulatory actions under FIFRA.

Subsection 4(g) extensively amends the provision of FIFRA requiring that pesticides be re-registered "in the most expeditious manner practicable.". The new provision requires the Administrator to publish in the Federal Register a list of pesticide active ingredients not re-registered since September 30, 1978, in order of their priority for re-registeration. The list is to be published by 120 days after the date of enactment of this Act. In establishing the order of the list, the Administrator is directed to give highest priority to pesticides used in high volumes on food or feed crops, and to pesticides shown to cause mutagenic effects in an appropriately designed study using a bacterial test system. The establishment of the list shall not be subject to judicial review.

Following the same schedule, the Administrator is required to also publish in the Federal Register a list of all data gaps by active ingredient. Within one year of publication of the list of active ingredients and data gaps, the Administrator is required to initiate steps under section 3(c)(2)(B) to fill the data gaps as expeditiously as possible.

Subsection 4(g)(4) requires the Administrator to issue a notice of intent to suspend a pesticide's registration if there are outstanding data gaps on the pesticide and the Administrator has failed to include the ingredient on the re-registration priority list. Subsection 4(g)(5) stipulates that a registrant must conduct studies to fill data gaps and report the results of the studies to the Administrator within three years after the publication of the list and data gaps under paragraph (3) above. Data gaps shall be filled according to the schedule specified in the 3(c)(2)(B) letters sent to registrants. When a short-term study is needed to establish appropriate dosage levels in a chronic feeding study, up to an additional year is provided for reporting the results of the chronic study to the Administrator. The Administrator is directed to issue a notice of intent to suspend a pesticide'e registrations if the prescribed schedule for filling data gaps is not followed.

Subsection 4(e) adds a new subsection 3(h) dealing with inert ingredients. The Administrator is required to issue regulations specifying what tests shall be undertaken on inert ingredients. Information on inert ingredients may be disclosed under the provisions of section 10, provided that the Administrator may not disclose the percentage of each toxic inert ingredient unless such disclosure is necessary in the public interest.

Section 5 changes the requirements that must be met by persons seeking certification to apply restricted use pesticides. The amendment eliminates the existing clauses that prohibit a state from requiring a written examination as part of the certification process.

Section 6 of this Act restricts the Administrator from granting an experimental use permit for a use of a pesticide under section 5(a) of FIFRA if the use has previously been cancelled, suspended, or voluntarily withdrawn for health or environmental reasons (unless there are no available alternatives). The discretion of the Administrator to suspend an experimental use permit if the terms of the permit are violated or inadequate to avoid unreasonable adverse effects on the environment is eliminated by changing "may revoke" to "shall revoke." In addition, the Administrator is required to revoke a permit if he finds that the permit will not yield data useful in satisfying section 3 registration requirements.
